

7.3 Timing of Messages

- A. Chargeable time begins for each individual two-point connection at the time the two-point connection is established.

- B. Chargeable time ends for each individual two-point connection when the calling station "hangs up," thereby releasing the network connection. If the called station "hangs up" but the calling station does not, chargeable time ends for each individual two-point connection when each network connection is released by automatic timing equipment in the telephone network.
