

AT&T

INTERSTATE/INTRALATA
TOLL SERVICES
(IITS)

GUIDEBOOK

LEGAL NOTICE

The AT&T Interstate IntraLATA Toll Services (IITS) Guidebook ("Guidebook"), which is part of the AT&T Interstate Guidebook, applies to the AT&T Interstate IntraLATA Toll Services (IITS) that are subject to the jurisdiction of the Federal Communications Commission ("FCC").

IITS, as described in this document, are services for which tariffs are subject to withdrawal pursuant to FCC (Memorandum Opinion and Order No. FCC 07-160 released August 31, 2007.) IITS described in the Guidebook are common carrier services under Title II of the Telecommunications Act, as applicable to non-dominant carriers. Upon the effectiveness of the withdrawal of IITS tariffs, IITS will be provided under contracts, which may incorporate the rates, terms or conditions of the Guidebook.

AT&T reserves the right to change the rates, terms and conditions in the Guidebook from time to time. Notification of changes will be made available at the AT&T website.

AT&T and other AT&T product names are trademarks of AT&T Intellectual Property.

INTERSTATE INTRALATA TOLL SERVICES

PART 1 - Preface
SECTION 2 - Regions and States

Original Sheet 1

REGION	OPERATING COMPANIES	STATES
Midwest	Ameritech Operating Companies	IL, IN, MI, OH, WI
Southeast	BellSouth Telecommunications, Inc.	AL, FL, GA, KY, LA, MS, NC, SC, TN
Southwest	Southwestern Bell Telephone Company	AR, KS, MO, OK, TX
West	Pacific Bell Telephone Company, Nevada Bell Telephone Company	CA, NV

EXPLANATION OF SYMBOLS

- C - to signify changed regulation
- D - to signify discontinued rate or regulation
- I - to signify increase
- M - to signify material relocated without change
- N - to signify new rate or regulation
- R - to signify reduction
- S - to signify reissued matter
- T - to signify a change in text but no change
- in rate or regulation
- Z - to signify a correction

EXPLANATION OF ABBREVIATIONS

Addn'l	-	Additional
Adm.	-	Administrator
Ark.	-	Arkansas
CABS	-	Customer Access Billing System
Calif.	-	California
CIC	-	Carrier Identification Code
Co.	-	Company
Cont'd	-	Continued
Corp.	-	Corporation
CP	-	Customer Provided
d/b/a	-	doing business as
Dept.	-	Department
Dist.	-	District
ea.	-	each
Exch.	-	Exchange
FCC (F.C.C.)	-	Federal Communications Commission
Gov't	-	Government
Hz	-	hertz
IC	-	Interexchange Carrier
IECC	-	Interexchange Carrier Center
IITS	-	Interstate IntraLATA Toll Services
IL	-	Illinois
Ill.	-	Illinois
IN	-	Indiana
Inc.	-	Incorporated
IWS	-	IntraLATA Wholesale Service
Kan.	-	Kansas
kbps	-	kilobits
kHz	-	kilohertz
LATA	-	Local Access and Transport Area
MHz	-	Megahertz
MI	-	Michigan
MO	-	Missouri
MTS	-	Message Telecommunications Service
NECA (N.E.C.A.)	-	National Exchange Carrier Association
Nev.	-	Nevada
No.	-	Number
OC	-	Other Carrier
OH	-	Ohio
Okla.	-	Oklahoma
PBX	-	Private Branch Exchange
PIC2	-	Presubscribed Interexchange Carrier 2
RMS	-	Route-Mean Square
Tex.	-	Texas
TS	-	Toll Station
U.S.	-	United States
United States	-	United States mainland, i.e., the District of Columbia and all states except Alaska and Hawaii
V & H	-	Vertical and Horizontal
WI	-	Wisconsin

TRADEMARKS AND SERVICEMARKS

REGISTERED TRADEMARKS AND SERVICE MARKS

P.O. Box C738
Pratt Street Station
Brooklyn, N.Y. 11205

for the Southwest Region

2.1 Scope and Availability**2.1.1 Scope**

- (A) Interstate IntraLATA Toll Services (IITS) is the furnishing of those service components required for telecommunication between stations in different local service areas within the same LATA in accordance with the conditions and system of charges specified in this Guidebook. The message charges specified in this Guidebook are in payment for Interstate IntraLATA Toll Services furnished between the calling and called stations.
- (B) The Telephone Company does not undertake to transmit messages but furnishes the use of its service to its Customers for telecommunications.
- (C) The design, maintenance and operation of Interstate IntraLATA Toll Services envisions that communications will originate or terminate at a station of the associated exchange telephone service used for IITS. Connections of Customer or Other Common Carrier-provided communications systems may be made to IITS. However, the Telephone Company will not be responsible for the through transmission of signals or for the quality of transmission on such connections.

2.1.2 Availability of Service

- (A) The use and restoration of service shall be in accordance with Part 64, Subpart D, of the Federal Communications Commission's Rules and Regulations, which specifies the priority system for such activities.
- (B) Subject to compliance with the above mentioned rules, where a shortage of service components exists at any time either for temporary or protracted periods, the establishment of Interstate IntraLATA Toll Services shall take precedence over all other services.
- (C) Service is furnished subject to the availability of the service or service components required. The Telephone Company will (1) determine which local service areas the service will be available, (2) which service components shall be used, and (3) make modifications to those components at its option.
- (D) When connections are made to Customer or Other Common Carrier-provided communications systems at a premises where the Customer does not originate or terminate communications, the Telephone Company may require that the exchange telephone service be furnished from a Telephone Company Central Office(s) different than the Central Office(s) designated by the Telephone Company to serve that premises.
- (E) Customer equipment may be used with IITS. The Telephone Company does not provide Customer equipment under this Guidebook.
- (F) The Telephone Company is responsible for the provision of IITS from station to station. It is not responsible for the quality of transmission or signaling on the Customer's side of the interface at a Customer's premises.

2.1 Scope and Availability (Cont'd)**2.1.3 Limitations on Duration of Connections**

The Telephone Company reserves the right to limit the duration of connection when necessary because of a shortage of service components caused by emergency conditions.

2.1.4 Liability

- (A) In view of the fact that the Customer has exclusive control of his communications over the service furnished him by the Telephone Company, and of the other uses for which service may be furnished him by the Telephone Company, and because of the unavailability of errors incident to the use of such services of the Telephone Company, the services furnished by the Telephone Company are subject to the terms, conditions and limitations specified in (B), (C) and (D), following.
- (B) The Telephone Company's liability, if any, for its willful misconduct is not limited by this Guidebook. With respect to any other claim or suit, by a customer or by any others, for damages associated with any aspect of the provision of service (including the failure to reach a called station), and subject to the provisions of (C) through (E), following, the Telephone Company's liability, if any, shall not exceed an amount equal to the initial period charge applicable for such a message to the called station. This liability shall be in addition to any billing adjustments that may otherwise be appropriate.
- (C) The Customer indemnifies and saves the Telephone Company harmless against claims for libel, slander, or infringement of copyright from the material transmitted over its service; against claims for infringement of patents arising from combining with, or using in connection with, service of the Telephone Company, apparatus and systems of the Customer; and against all other claims arising out of any act or omission of the Customer in connection with service provided by the Telephone Company.
- (D) No carrier participating in this service shall be liable for any act or omission of any other carrier also participating in the service.
- (E) The services furnished by the Telephone Company, in addition to the limitations set forth in 2.1.4(A) through (D), preceding, also are subject to the following limitation: the Telephone Company shall not be liable for damage arising out of mistakes, omissions, interruptions, delays, errors or defects in transmission or other injury, including but not limited to injuries to persons or property from voltages or currents transmitted over the service of the Telephone Company caused by Customer-provided equipment (except where a contributing cause is the malfunctioning of a Telephone Company-provided connecting arrangement).

2.1 Scope, Availability, Limitations and Liabilities (Cont'd)**2.1.4 Liability (Cont'd)**

- (F) The Telephone Company is not liable for damages associated with service, channels, or equipment which it does not furnish.
- (G) The Telephone Company is not liable for damages to a premises resulting from the furnishing of IITS, including the installation and removal of equipment and associated wiring, unless the damage is caused by the Telephone Company's negligence.
- (H) The Telephone Company does not guarantee or make any warranty with respect to IITS when used in an explosive atmosphere. The Telephone Company shall be indemnified, defended, and held harmless by the Customer and User against all claims, losses or damages by any person relating to IITS provided pursuant to this Guidebook when used in an explosive atmosphere.
- (I) No license under patents (other than the limited license to use) is granted by the Telephone Company or shall be implied or arise by estoppel, with respect to any service offered under this Guidebook. The Telephone Company will defend the Customer and User against claims of patent infringement arising solely from the use by the Customer or User of IITS offered under this Guidebook, and will indemnify such Customer or User for any damages awarded based solely on such claims.
- (J) The Telephone Company's failure to provide or maintain service under this Guidebook shall be excused by labor difficulties, governmental orders, civil commotions, acts of God, and other circumstances beyond the Telephone Company's reasonable control, subject to the Credit Allowances for Interruptions provisions of this Guidebook.

Restoration of Service

The use and restoration of IITS will be in accordance with Part 64, Subpart D, of the Federal Communications Commission's Rules and Regulations.

2.2 Use, Abuse, Fraud and Unlawful Purposes**2.2.1 Use of Service**

The service is provided for use by the Customer and may be used by others, when so authorized by the Customer, providing that all such usage shall be subject to the provisions of this Guidebook.

Interstate IntraLATA Toll Services may be used for non-voice transmission on a two-point basis between points within the same LATA.

Telephone Company-provided local business exchange service may be used for the purpose of providing access to resold or shared Interstate IntraLATA Toll Services notwithstanding any tariff regulations respecting resale and sharing contained in Telephone Exchange Service Tariffs of the Telephone Company.

Interstate IntraLATA Toll Services may be used for non-voice transmission on a two-point basis between points within the same LATA, except in the BellSouth Region where this service may be used for non-voice to all points.

2.2.2 Abuse and Fraudulent Use

The service is furnished subject to the condition that there will be no abuse or fraudulent use of the service. Abuse or fraudulent use of service includes:

(A) the use of the services of the Telephone Company to transmit a message or to locate a person or otherwise to give or obtain information, without payment of the charge applicable for service;

(B) the obtaining, or attempting to obtain, or assisting another to obtain or to attempt to obtain, Interstate IntraLATA Toll Services, by rearranging, tampering with, or making connection with any service components of the Telephone Company, or by any truck, scheme, false representation, or false credit device, or by or through any other fraudulent means or device whatsoever, with intent to avoid the payment, in whole or in part, of the regular charge for such service;

(C) the use of the service of the Telephone Company for a call or calls, anonymous or otherwise, if in a manner reasonably expected to frighten, abuse, torment, or harass another;

(D) the use of profane or obscene language;

(E) the use of the service in such a manner as to interfere unreasonably with the use of the service by one or more other Customers.

2.2.3 Unlawful Purposes

The service is furnished subject to the condition that it will not be used for an unlawful purpose.

2.3 Obligations of the Customer

When Customer equipment or a Customer-provided communications system is connected to IITS, the Customer assumes additional responsibilities that are described in the Connections section of this Guidebook.

The Customer is responsible for complying with guidebook conditions for IITS and for assuring that its Users comply with guidebook conditions.

The Customer retains responsibility for compliance with guidebook conditions and any act or omission of the agent, regardless of any limitations the Customer may place on the agent's authority.

2.3.1 The calling party shall establish his or her identify in the course of any communication as often as may be necessary.

2.3.2 The calling party shall be solely responsible for establishing the identify of the person or persons with whom connection is made at the called station or stations.

Each Aggregator, as described in Section 2.5, following, for which the Telephone Company is the Presubscribed Provider of Operator Services must comply with Section 226 of the Communications Act of 1934.

In the Southeast and Midwest Regions there are additional obligations of the customer. Those specific obligations are listed below, by region.

2.3.3 In the Southeast Region, other obligations of the Customer include:

A. Floor Space, Conduit and Electrical Power at a Customer's Premises

The Customer must provide any equipment space, supporting structure, conduit and electrical power required to terminate IITS at a premises without charge to the Telephone Company. The space, structure, conduit and power must be made available in sufficient time to permit the installation of IITS to be completed prior to its due date. Selection of ac or dc power will be a matter of mutual agreement between the Customer and the Telephone Company.

B. Access to Customer's Premises

The Customer is responsible for arranging premises access at any reasonable time so that Telephone Company personnel may install, repair, maintain, inspect or remove IITS components. Premises access must be made available at a time mutually agreeable to the Customer and Telephone Company

2.3 Obligations of the Customer (Cont'd)**C. Locations Involving High Voltage Power**

When a Customer orders IITS installed at a location where high voltage power is present, the Customer shall:

Install, maintain and pay for any special facilities and protective apparatus required by federal, state or local regulations.

Pay for protective apparatus recommended for the location by the Telephone Company.

D. Availability for Maintenance, Testing or Modifications

The Customer must make IITS available for maintenance, testing, or implementation of changes it has ordered, at any reasonable, mutually agreeable time. Occasionally an impairment may only be evident at certain times (e.g., a certain hour of the day). In such cases, IITS must be made available for testing during the same time periods if the trouble condition is to be corrected.

E. Damage to IITS

The Customer must pay the Telephone Company for replacement or repair of any IITS component(s) when damage results from:

- The negligence or willful act of the Customer or others,
- improper use of IITS, or
- any use of equipment or systems provided by the Customer or others.

F. Loss

The Customer must pay for the loss through theft of any Telephone Company-provided equipment installed at a Customer's premises.

2.3.4 Additionally, in the Midwest Region, each Aggregator, as defined in 2.5, for which the Telephone Company is the provider for operator services must:

- A. Post on or near the telephone instrument, in plain view of consumers, the following information:
 1. The name and address of the provider of operator services.
 2. A written disclosure that the rates for all operator-assisted calls are available on request, and that consumers have a right to obtain access to the interstate common carrier of their choice and may contact their preferred interstate common carriers for information on accessing that carrier's service using that telephone.
 3. The name and address of the enforcement division of the Common Carrier Bureau of the Commission, to which the consumer may direct complaints regarding operator services.

2.3 Obligations of the Customer (Cont'd)

- B. Ensure that each of its telephones presubscribed to a provider of operator services allows the consumer to use "800" and "950" access code numbers to obtain access to the provider of operator services desired by the consumer.
- C. Ensure that no charge by the Aggregator to the consumer for using an "800" or 950" access code number, or any other access code number, is greater than the amount the Aggregator charges for calls placed using the presubscribed provider of operator services.

The conditions of paragraph (A) shall not apply to an Aggregator in any case in which State law or State regulation requires the Aggregator to take actions that are substantially the same as those required in paragraph (A).

For purposes of complying with paragraph (A), following are the names and addresses of the Telephone Companies providing service, and the F.C.C. In addition, the Telephone Companies, as applicable, may be reached by dialing 0. An access digit may be required, such as 9 from a motel, before dialing 0.

The Telephone Company will assume responsibility for complying with the requirements for posting information on or near their payphones located on an Aggregator's premises.

2.4 Payment Arrangements**2.4.1 Application of Charges**

The rates and charges that are in effect in this Guidebook when IITS is furnished are the rates and charges used to determine the Customer's bill. If the rates for services furnished on a monthly basis change after a bill has been rendered, the bill will be adjusted to reflect the new charges.

2.4.2 Minimum Payment Period

The minimum payment period is the minimum period, if any, for which the Customer is required to make payment for the IITS offering. The charges applicable for this period include the minimum recurring charge(s) plus any nonrecurring charge(s) that may be due.

The minimum payment period is calculated from the date that billing starts after (1) the initial installation, or (2) a reinstallation after a change.

Minimum payment period charges apply if the Customer discontinues an IITS component before the specified minimum payment period expires. The minimum payment period for a given IITS component is specified in the section of this Guidebook applicable to that IITS component.

2.4.3 Recurring Charges

Recurring charges are incurred on a per unit of use basis, as specified for each IITS offering.

- (1) Usage Charges - Usage charges are stated as a function of, and vary with, use (e.g., per connection or per unit of time). Usage charges are billed in arrears.

2.4.4 Optional Billing Arrangements

When an IITS call is not billed to the calling station, the Telephone Company offers certain billing options depending on the type of call. These options are:

A. Collect Calls

This option allows a call to be billed to the called station, if the charges are accepted by the called party, station, or number. Collect Calls are not acceptable at a public or semi-public coin station. In lieu of a collect call to a public or semi-public coin station, the charges may be billed to a Calling Card as specified in (B), following, or to a Third Number as specified in (C), following, or the call may be re-originated from the called station.

B. Calling Card

This option enables a Customer to charge a call to an authorized Calling Card. Calls charged to a Telephone Company Calling Card will then be included on the IITS bill for the Main Billed Account with which the card is associated.

2.4 Payment Arrangements (Cont'd)

C. Third Number Billing

This option allows a call to be billed to a telephone number identified with a station other than the calling or called one. Charges to be billed to a third number are subject to verification by the Telephone Company that they will be accepted at the third number, prior to completion of the call. Other efforts may be undertaken subsequently by the Telephone Company, as necessary, to determine responsibility for payment of such calls.

2.4.5 Gross Receipts Tax (Southeast Region Only)

When utility or telecommunications assessments, franchise fees, or privilege, license, occupational, excise, or other similar taxes or fees, based on interstate receipts are imposed by certain taxing jurisdictions upon the Telephone Company, the amounts of such taxes or fees will be billed to Customers in such a taxing jurisdiction on a prorated basis. The amount of charge that is prorated to each Customer's bill is determined by the interstate telecommunications services provided to and billed to a Customer service location in such a taxing jurisdiction with the aggregate of such charges equal to the amount of the tax or fee imposed upon or passed on to the Telephone Company. The taxing jurisdictions in which the charges will be applicable are:

<u>Jurisdiction</u>	<u>Tax Factors</u>
State of Florida	2.56%
South Carolina municipalities listed below	0.30%
Allendale	
Bamberg	
Barnwell	
Burnettown	
Carlisle	
Chapin

Sellers	
Seneca	
Tatum	
Travelers Rest	
Williamston	
South Carolina municipality listed below	4.94%
Orangeburg	

2.4 Payment Arrangements (Cont'd)**2.4.6 Credit Allowance**

A credit allowance is applicable to that portion of a call which is interrupted due to poor transmission (e.g., noisy circuit condition), one-way transmission (one party is unable to hear the other), or involuntary disconnection (cut-off) of the call caused by components or IITS. A Customer may also be granted credit for reaching a wrong number. To receive the proper credit, the Customer must notify the Telephone Company operator or Telephone Company office and furnish the called number, the trouble experienced (e.g., cut-off, noisy circuit, reached wrong number, etc.), the class of call, and the approximate time the call was placed. At the Customer's option, when the Telephone Company operator is notified, the operator will attempt to re-establish the call. IITS charges will apply to the re-established call.

A. Interruptions to Established Calls

When a call to be billed under this Guidebook is interrupted due to cut-off, one-way transmission, or poor transmission conditions the Customer will receive credit equivalent to the time the call was interrupted.

B. Wrong Numbers

When a wrong number is reached, a credit equivalent to the time of the call will be granted if the Customer reports the situation promptly to the Telephone Company operator or a Telephone Company office.

C. When Credit Allowances Do Not Apply

Credit allowances for an IITS call do not apply for:

- interruptions not reported to the Telephone Company,
- interruptions that are due to the failure of power, equipment or systems not provided by the Telephone Company, or
- interruptions caused by the failure of other services provided by the Telephone Company which are connected to IITS.

If the Customer elects to use another means of communication during the period of interruption, the Customer must pay the charges for the alternative service used.

2.4 Payment Arrangements (Cont'd)

2.4.7 Late Payment Charges

The late payment charge applicable to intrastate services as specified in the Telephone Company's local exchange service tariffs also applies to Interstate IntraLATA Toll Services.

2.4.8 Monetary Units

In connection with service from ships, vessels or aircraft, to points within the LATA, when the charges to Customers are made by a company or administration not subject to the Communications Act of 1934, as amended, the following conditions apply:

- A. In the case of service from vessels or aircraft of United States registry, the charges shown in this Guidebook for such service are quoted by the vessel in United States dollars.
- B. In the case of service from vessels or aircraft registered in countries other than the United States, the charges are quoted in United States dollars or are converted into the currency of the country of registry at rates of exchange with respect to United States dollars, which may vary from time to time because of changes in monetary and other conditions.

In connection with service from ships, vessels or aircraft, to points within the LATA, when the charges to Customers are made by Telephone Companies in the United States, rates as specified herein, plus additional charges of foreign administrations if any, in United States dollars, apply to all calls.

2.4 Payment Arrangements (Cont'd)**2.4.13 Deposits**

The Telephone Company may, in order to safeguard its interests, require an applicant or a Customer to deposit a sum up to an amount equal to twice the estimated average monthly charge for usage of Interstate IntraLATA Toll Services offered herein, such deposit to be held by the Telephone Company as a guarantee of the payment of charges provided for herein. The fact that a deposit has been made in no way relieves the applicant or Customer from complying with the Telephone Company's regulations and guidelines as to advance payments and the prompt payment of bills on presentation. At such time as the service is terminated, the amount of the deposit is credited to the Customer's account and any credit balance which may remain is refunded. At the option of the Telephone Company, such a deposit may be refunded or credited to the Customer at any time prior to termination of the service.

In case of a cash deposit, for the period the deposit is held by the Telephone Company, the Customer will receive simple interest at the rate that has been established by the appropriate legal authority within the state as stated in the Telephone Company's General Exchange Tariffs.

2.4.14 Termination of Service for Cause

Upon nonpayment of any sum due the Telephone Company, or upon a violation of any of the conditions governing the furnishing of service, the Telephone Company may by notice in writing to the Customer, without incurring any liability, forthwith discontinue the furnishing of said service.

2.4.15 Monetary Units

In connection with service from ships, vessels or aircraft, to points within the LATA, when the charges to Customers are made by a company or administration not subject to the Communications Act of 1934, as amended, the following conditions apply:

- A. In the case of service from vessels or aircraft of United States registry, the charges shown in this Guidebook for such service are quoted by the vessel in United States dollars.
- B. In the case of service from vessels or aircraft registered in countries other than the United States, the charges are quoted in United States dollars or are converted into the currency of the country of registry at rates of exchange with respect to United States dollars, which may vary from time to time because of changes in monetary and other conditions.

In connection with service from ships, vessels or aircraft, to points within the LATA, when the charges to Customers are made by Telephone Companies in the United States, rates as specified herein, plus additional charges of foreign administrations if any, in United States dollars, apply to all calls.

2.5 Definitions

Access Line - a transmission path that connects a Customer premises to a Telephone Company Central Office

Aggregator - An Aggregator, for purposes of this tariff, is any person that, in the ordinary course of operations, makes telephones available to the public or to transient users of their premises, for interstate telephone calls using the Telephone Company as its provider of operator services.

APCC, Ameritech PrePaid Calling Card - A card available to end users in varying dollar denominations. It can be used to place prepaid send-paid calls from any telephone without the use of coins.

Assembly - a configuration consisting of Customer equipment and/or a Customer-provided communications system or systems, which is connected to IILDMTS.

Authorized Protective Connecting Module - The term "Authorized Protective Connecting Module" denotes a protective unit designed by the Telephone Company and manufactured under the control of Telephone Company quality assurance procedures, which unit is to be incorporated in a Conforming Answering Device.

Bill to Third Party - The term "Bill to Third Party" denotes a billing arrangement by which a call may be charged to an authorized station as determined by the Telephone Company other than the station originating the call or the station where the call is terminated.

Building - a structure consisting of an enclosed area surrounded by outside walls and under one continuous roof.

Call - a completed connection established between a calling station and one or more called stations.

Called Station - the station (e.g., telephone number) called, or the terminating point of a call.

Call Forwarding - Call forwarding denotes that feature whereby a call placed to a Customer's telephone number is one exchange (the call forwarding location) is automatically forwarded by Telephone Company central office equipment to a station designated by said Customer in another exchange.

Calling Card - The term "Calling Card", denotes a credit/charge card for use in billing IIMTS.

Calling Station - the station from which a call is originated.

Central Office - the physical point of access for a service to the Telephone Company interoffice network.

2.5 Definitions (Cont'd)

Carrier Identification Code (CIC) - Denotes the numeric code that is assigned by the North American Numbering Plan Association (NANPA) to Interexchange Carriers for the provisioning of (FGB) and/or (FGD) trunk side Access Service. The four digit numeric code uniquely identifies the IC.

Centrex Control Switching Equipment - The term "Centrex Control Switching Equipment" denotes switching equipment, located on the Telephone Company's premises, used to provide Centrex service furnished in accordance with Centrex service provisions of the General and Local Exchange Service Tariffs of the Telephone Company.

Central Office Connecting Facility - The term "Central Office Connecting Facility" denotes a voice grade facility furnished to an Other Participating Carrier by the Telephone Company (in accordance with the Telephone Company's Facilities for Other Common Carriers' Tariffs or their successor tariffs and/or Guidebook of services) between the terminal location of the Other Participating Carrier and a point of connection on the Telephone Company premises.

Collect Call - The term "Collect Call" denotes a billing arrangement by which the charge for a call may be reversed, provided the charge is accepted at the called station. A collect call may be billed to a Calling Card or third party number. In the case of a public or semi-public coin telephone, the charges must be billed to a Calling Card or third party number, or the call may be reoriginated from the called station.

Communications System - The term "Communications System" denotes channels and other facilities which are capable, when not connected to Interstate IntraLATA Message Telecommunications Service, of communications between Customer-provided terminal equipment or Telephone Company stations.

Conformance Number - The term "Conformance Number" denotes an identifying number assigned by the Telephone Company to a particular model of Conforming Answering Device incorporating an Authorized Protective Connecting Module when that model of device is in conformance with the provisions set forth by the American Telephone and Telegraph Company in its Technical Reference for Conforming Answering Devices.

Conforming Answering Device - The term "Conforming Answering Device" denotes a Customer-provided device which automatically answers incoming calls; transmits a prerecorded voice message or appropriate audible signal to the calling party; records a voice message from the calling party if so designed and arranged; and automatically disconnects from the line in a prearranged manner on completion of the last of the functions for which it was designed and arranged as described in this paragraph. The Conforming Answering Device may include remote interrogation and/or device function control. A Conforming Answering Device must incorporate an Authorized Protective Connecting Module and must bear a valid Conformance Number.

2.5 Definitions (Cont'd)

Connecting Arrangement - The term "Connecting Arrangement" denotes the equipment provided by the Telephone Company to accomplish the direct electrical connection of Customer-provided equipment or systems with Telephone-Company provided services.

Credit Card - See Calling Card

Customer - The term "Customer" denotes the person, firm or corporation responsible for the payment of charges and compliance with the regulations of the Telephone Company.

Customer Dialed Calling Card Station - The term "Customer Dialed Calling Card Station" denotes that service where the person originating the call dials prescribed numbers in order to complete the message without operator assistance (unless it is necessary to record the originator's calling card number), and the message is billed to a calling card number.

Customer Equipment - terminal equipment, a multiline terminating system or protective circuitry located at a non-Telephone Company premises.

Customer-Provided Communications System - dedicated private line channels and equipment (e.g., microwave or cable system) furnished by the Customer for communications between premises.

Customer-Provided Terminal Equipment - The term "Customer-Provided Terminal Equipment" denotes devices or apparatus and their associated wiring, provided by a Customer, which do not constitute a multiline terminating system or a communications system and which, when connected to the communications path of the telecommunications network, are connected either electrically, acoustically or inductively.

Customer-Provided Test Equipment - The term "Customer-Provided Test Equipment" denotes test equipment located at the premises of the Customer that is used by the Customer for the detection and/or isolation of a communications service fault.

Data Access Arrangement - The term "Data Access Arrangement" denotes a protective connecting arrangement for use with the network control signaling unit, or in lieu of the connecting arrangement, an arrangement to identify a central office line and protective equipment and procedures to determine compliance with criteria set forth in 2.6.3(C) of this Guidebook.

Dial Station/Direct Dial Station - The term "Dial Station" denotes that service where the person originating the call dials the telephone number desired, completes the message without the assistance of an operator and the message is billed to the originating number.

2.5 Definitions (Cont'd)

Dial Station-to-Station/Direct Dial Station-to-Station - (See Dial Station)

Direct Electrical Connections - The term "Direct Electrical Connections" denotes a physical connection of the electrical conductors in the communications path.

End User - Denotes any customer of an intrastate or interstate carrier, or foreign telecommunications service that is not a carrier, except that a carrier other than a Local Exchange Carrier (LEC) shall be deemed to be an "end user" to the extent that such carrier uses a telecommunication service for administrative purposes, and a person or entity that offers telecommunications services exclusively as a reseller shall be deemed to be an "end user" if all resale transmissions offered by such reseller originate on the premises of such reseller.

Exchange - The term exchange denotes a unit generally smaller than a local access and transport area, established by the Telephone Company for the administration of communications service in a specified area which usually embraces a city, town or village and its environs. It consists of one or more central offices together with the associated facilities used in furnishing communications service within that area. One or more designated exchanges comprise a local access and transport area.

Exchange Area - The territory served by an exchange.

Grandfathered - The term "Grandfathered" denotes terminal equipment, multiline terminating systems, protective circuitry or connecting arrangements directly connected at the Customer's premises to Interstate IntraLATA Toll Services in accordance with Telephone Company tariffs and/or Guidebook, and that are considered grandfathered under Part 68 of the Federal Communications Commission's Rules and Regulations because:

- (i) such terminal equipment was directly connected to the telecommunications network prior to July 1, 1979, and is of a type which was directly connected to the telecommunications network as of October 17, 1977.
- (ii) such multiline terminating systems are directly connected to the telecommunications network prior to January 1, 1980, and are of a type which was directly connected to the telecommunications network as of June 1, 1978.
- (iii) such protective circuitry or connecting arrangements associated with Customer-Provided terminal equipment or multiline terminating systems are directly connected to the telecommunications network, and are of a type which was directly connected to the telecommunications network prior to the dates set forth in (i) and (ii), preceding, as appropriate.

2.5 Definitions (Cont'd)

Headset - The term "Headset" denotes a hands-free, multi-wire device containing acoustic-to-electric (transmitter) and electric-to-acoustic (receiver) transducers, normally worn on the head of the user for close talking, which provides for the transmission of human speech.

Incomplete Call Attempt - calls that are not completed (e.g., a busy signal or ring no answer returned to the calling party) due to insufficient answering capability.

Interexchange Carrier (IC) - Denotes any individual, partnership, association, joint-stock company, trust, governmental entity or corporation engaged for hire in intrastate, interstate or foreign communication by wire or radio, between two or more exchanges.

Interface - The term "Interface" denotes that point on the premises of the Customer at which provision is made for connection of other than Telephone Company-provided facilities to facilities provided by the Telephone Company.

Interstate IntraLATA Toll Service (IITS) - The term "Interstate IntraLATA Toll Services" applies to service between points in different states which are in the same Local Access and Transport Area.

IntraLATA Service - Applies to service between points that are in the same Local Access and Transport Area (LATA).

Local Access and Transport Area (LATA) - The term "Local Access and Transport Area" denotes a geographic area established for the provision and administration of communications service. It encompasses one or more designated exchanges, which are grouped to serve common social, economic and other purposes.

Local Exchange Service Access Line - a common line that connects a Customer premises to a Telephone Company switched service via the Telephone Company public switched network.

Main Billed Account - The local exchange telephone number associated with a Customer name and address and to which IITS charges are billed.

Maintenance of Service Charge - Where maintenance of testing is required at a Customer's premises and the trouble is found to be due solely to the Customer-provided terminal equipment or other causes within the Customer's control, or any combination thereof, a Maintenance of Service Charge applies for each occurrence where such maintenance or testing is performed.

2.5 Definitions (Cont'd)

Multiline Terminating System - The term "Multiline Terminating System" denotes switching equipment (e.g., PBX, Centrex, ACD, tandem switching equipment) and key telephone type systems which are capable of terminating more than one local central office line, WATS access line, private line service or communications system.

Network Control Signaling - The term "Network Control Signaling" denotes the transmission of signals used in the telecommunications network which perform functions such as supervision (control, status, and charging signals), address signaling (e.g., dialing), calling and called number identification, audible tone signals (call progress signals indicating re-order or busy conditions, alerting, coin denominations, coin collect and coin return tones) to control the operation of switching machines in the telecommunications network.

Network Control Signaling Unit - The term "Network Control Signaling Unit" denotes the terminal equipment furnished for the provision of network control signaling.

Non-Powered Conferencing Equipment - The term "Non-Powered Conferencing Equipment" denotes a portable plug ended device, without active elements, consisting of a multiwinding transformer and manual line switches designed to bridge two or more, but not to exceed five, of the lines appearing on 4-button and 6-button key telephone instruments equipped with both hold and illumination features.

North American Numbering Plan (NANP) - Denotes a three-digit Numbering Plan Area (NPA) code and a seven-digit telephone number made up of a three-digit Central Office code plus a four-digit station number.

Operator Station - the term "Operator Station" denotes Station-to-Station service other than Dial Station service or Customer Dialed Calling Card Station service.

Operator Station-to-Station - (See Operator Station)

Other Common Carrier (OCC) - The term "Other Common Carrier" denotes:

1. Specialized Common Carriers, Interexchange Carriers (InterLATA Carriers), Domestic and International Record Carriers and Domestic Satellite Carriers engaged in providing private line voice, data or video services or other services such carriers may be allowed by the Federal Communications Commission to provide.
2. All resellers not included in (1), preceding.

Payphone Use Charge - The Payphone Use Charge is a rate element that applies to completed non-sent paid calls originated from payphones. The charge is a cost recovery mechanism that permits the Local Exchange Carrier to recover the cost of per-call compensation to Payphone Service Providers from the end user.

2.5 Definitions (Cont'd)

Person-to-Person - The term "Person-to-Person" denotes that service where the person originating the call specifies to the operator a particular person, mobile station, department, or office to be reached.

Point of Connection - a rate center specified in Section 4, following.

Premises - The term "Premises" denotes a building or buildings on continuous property (except railroad rights-of-way, etc) not separated by a public thoroughfare.

Premises Wiring - The term "Premises Wiring" denotes wiring associated with a multiline terminating system that is used to connect separately housed equipment entities or system components to one another, or wiring which connects an equipment entity or system component with the telecommunications network interface, located at the Customer's premises and not within an equipment housing.

Presubscribed Interexchange Carrier 2 (PIC2) - Denotes an arrangement whereby a Customer of the Telephone Company has designated an IC to complete its 1+ and 0+ intraLATA toll calls. This is referred to as Local Presubscribed Interexchange Carrier (LPIC) for intraLATA toll calls.

Presubscribed Provider - The term "Presubscribed Provider" denotes the interstate provider of operator services to which the consumer is connected when the consumer places a call using a provider of operator services without dialing an access code.

Protective Circuitry - discrete electrical circuitry that is within the scope of the Registration Program and is designed to protect IITS from harm.

Provider - The term "Provider" denotes any common carrier that provides operator services or any other person determined by the Commission to be providing operator services.

Rate Center - a specified geographical location used for determining mileage measurements.

Rate Center Area - the area which encompasses the territories identified by the central office codes that are assigned to a rate center.

Registered - The term "Registered" denotes terminal equipment, protective circuitry and multiline terminating systems which comply with the Registration provisions of Part 68 of the Federal Communications Commission's Rules and Regulations.

Registration Program - Part 68 of the FCC's Rules and Regulations which permits Customer equipment to be directly connected to IITS without the requirement for protective circuitry.

2.5 Definitions (Cont'd)

Routing Telephone Number - a telephone number used by the Telephone Company Network to route a call to the proper destination. The routing telephone number contains the intelligence to locate the terminating 4ESS and the internal software routing mechanism contained in the 4ESS.

Sent Paid Service - The term "Sent Paid Service" denotes that service where the person originating the call pays for the call by having the call billed to the originating telephone number. Sent paid calls also include calls from pay telephones when the caller pays for the call by depositing coins.

Service Station Lines - The term "Service Station Lines" denotes telephone facilities provided by the Customer in isolated and sparsely developed areas where it is not practicable for the Telephone Company to make such facilities available.

Service Terminating Arrangement - The term "Service Terminating Arrangement" denotes Telephone Company-provided equipment which terminates exchange telephone service, used for Interstate IntraLATA Toll Services (IITS), at a Customer's premises. The "Service Terminating Arrangement" provides a clearly delineated interface which facilitates the design, isolation, and testing of IITS. Where a protective connecting arrangement is required, the "Service Terminating Arrangement" is provided as a part of the protective connecting arrangement.

Single Ended Terminal Device - The term "Single Ended Terminal Device" denotes a terminal device which terminates only one line at a given time (e.g., headset).

Special Access Line - a dedicated communication path that connects a Customer premises to a Telephone Company switched service using services obtained from the Telephone Company's Tariff and/or access obtained from others.

Standard Jack - The term "Standard Jack" denotes the Telephone Company-provided means of connection for terminal equipment or multiline terminating systems to Interstate IntraLATA Toll Services, as described (1) in Part 68 of the FCC's Rules and Regulations, or (2) in the current issue of the Telephone Company document on file with the FCC entitled "Descriptions of Standard Registration Program Connection Configurations Supplementing Configurations Described in Subpart F of Part 68 of the FCC Rules and Regulations."

Station - The term "Station" denotes the network control signaling unit and any other equipment provided in accordance with Telephone Exchange Service Tariffs of this Company's issuing and connecting carriers, or tariffs of this Company's other participating carriers, or furnished by foreign telephone administrations, at a Customer's premises or at public or semi-public telephone locations, or in a Telephone Company central office for call forwarding which enables a Customer to establish communications connections and to effect communications through such connections.

2.5 Definitions (Cont'd)

Station-to-Station - The term "Station-to-Station" denotes that service where the person originating the message does not specify the person, mobile station, department, or office to be reached.

Switching Equipment - The term "Switching Equipment" denotes equipment which performs the function of establishing and releasing connections between:

1. Two or more Telephone Company-provided services, or
2. Telephone Company-provided service or services and a communications system or systems provided by the Customer, or Other Common Carrier.

Such equipment shall operate to establish each connection for the purpose of the transmission of communications, and shall operate to release the connection, or generate a supervisory signal for the manual release of the connection by an attendant, immediately following the conclusion of each call.

Telecommunications Network - the IITS network provided by the Telephone Company.

Telephone Company - The term "Telephone Company" denotes the Required as State Operating Companies, their issuing carriers and their connecting carriers, either individually or collectively.

Terminal Equipment - any telecommunications equipment other than a multiline terminating system, or communications system connected to IILDMTS at a Customer's or User's premises.

Third Number Billing - an optional billing procedure that permits the charges for an IILDMTS call to be billed to a number that is different from the calling number of the called number.

Transient Land Mobile Unit - The term "Transient Land Mobile Unit" denotes a land mobile unit communicating through a base station other than the base station with which it is normally associated

United States - The term "United States" denotes the United States mainland, i.e., the District of Columbia and all states except Alaska and Hawaii.

2.6 Connection General**2.6.1 General**

- A. Terminal equipment, multiline terminating systems and protective circuitry which are connected to IITS must comply with Part 68 of the Federal Communications Commission's Rules and Regulations.
- B. Upon notice from the Telephone Company that Customer-provided terminal equipment or systems are causing such hazard, damage, malfunction or degradation of service, the Customer shall make any changes necessary to remove or prevent such hazard, damage, malfunction or degradation of service. When any equipment or system which is not subject to Part 68 of the FCC's Rules and Regulations is connected, the Minimum Protection Criteria specified in this Guidebook must be met.
- C. The Customer is responsible for the payment of a Maintenance of Service Charge as provided for in the General and Local Exchange Service Tariffs of the Telephone Company for visits by a Telephone Company employee to the Customer's premises when a service difficulty or trouble report results from the use of Customer-provided terminal equipment, multiline terminating system or communications system.

2.6.2 Responsibility of the Customer

- A. The Customer is responsible for the installation, operation, and maintenance of any Customer-provided terminal equipment, multiline terminating system or communications system. The connection of such equipment or system shall not require a change in or alteration of the equipment or services of the Telephone Company; cause electrical hazards to Telephone Company personnel; damage to Telephone Company equipment; malfunction of Telephone Company billing equipment; or degradation of service to persons other than the user of the terminal equipment, communications system, multiline terminating system, or the user's calling or called party.
- B. Upon notice from the Telephone Company that Customer-provided terminal equipment or systems are causing such hazard, damage, malfunction or degradation of service, the Customer shall make any changes necessary to remove or prevent such hazard, damage, malfunction or degradation of service.
- C. The Customer is responsible for the payment of a Maintenance of Service Charge as provided for in the General and Local Exchange Service Tariffs of the Telephone Company for visits by a Telephone Company employee to the Customer's premises when a service difficulty or trouble report results from the use of Customer-provided terminal equipment, multiline terminating system or communications system.

2.6 Connection General (Cont'd)**2.6.3 Responsibility of the Telephone Company**

- A. IITS is not represented as adapted to the use of Customer-provided terminal equipment, multiline terminating systems or communications systems. If Customer-provided equipment or systems are used with IITS, the Telephone Company will only be responsible for furnishing service components suitable for IITS and to design, maintain and operate those service components accordingly. Subject to that responsibility, the Telephone Company will not be responsible for (1) the quality or the through transmission of signals generated by the Customer-provided equipment or system, or (2) the reception of signals by Customer-provided equipment or systems, or (3) address signaling performed by Customer-provided signaling equipment.
- B. When a Customer-provided communications system (1) utilizes satellite facilities, or (2) is connected to a communications system which utilizes satellite facilities, the connection of that Customer-provided system to IITS may result in the utilization of two or more satellite circuits on the combined connected facilities. In such cases, the Telephone Company will only be responsible to furnish service components suitable for IITS and for the maintenance and operation of these service components accordingly. Subject to that responsibility, the Telephone Company will not be responsible for the quality of the through transmission of signals on such connection. The Telephone Company will not apply any credit allowance for impaired transmission from such connection unless the defect was in the IITS service.
- C. The Telephone Company will, at the Customer's request, provide certain information concerning interface parameters, including the number of ringers which may be connected to a particular telephone line, needed to permit Customer-provided terminal equipment or multiline terminating systems to operate in a manner compatible with IITS.
- D. The Telephone Company may make changes in its telecommunications services, service components, operations or procedures, where such action is not inconsistent with Part 68 of the Federal Communications Commission's Rules and Regulations. If such changes can be reasonably expected to render any Customer's terminal equipment or multiline terminating system incompatible with IITS, require their modification or alteration, or otherwise materially affect their use or performance, the Customer will be given adequate notice, in writing, to allow the Customer an opportunity to maintain uninterrupted service.

2.6 Connection General (Cont'd)**2.6.4 Recording of Two-Way Telephone Conversations**

Interstate IntraLATA Toll Services are not represented as adapted to the recording of two-way telephone conversations. However, Customer-provided voice recording equipment may be directly, acoustically or inductively connected with Interstate IntraLATA Toll Services. When such connections are made, the Customer-provided voice recording equipment shall be so arranged that at the will of the user it can be activated or deactivated. In addition, one of the following conditions must apply:

- All parties to the telephone conversation must give their prior consent to the recording of the conversation, and the prior consent must be obtained in writing or be a part of, and obtained at the start of, the recording, or
- The recording party must give notification that the telephone conversation is being recorded. This notification must be made in a clear, unambiguous manner at the beginning, and as part of, the recorded portion of any call, or
- A distinctive recorder tone that is repeated at intervals of approximately fifteen seconds is required to alert all parties when the recording equipment is in use. The distinctive recorder tone can be provided as part of (1) the recording equipment, (2) Customer-provided registered or grandfathered protective circuitry, or (3) a grandfathered Telephone Company-provided connecting arrangement.

A broadcast licensee shall be exempt from the above recording conditions provided at least one of the following conditions is met:

- the licensee informs each party to the call of its intent to broadcast the conversation; or
- each party to the call is aware of the licensee's intent to broadcast the call; or
- such awareness of the licensee's intent to broadcast the call may be reasonably inputted to the party.

2.6.4.1 The FCC has established the following exceptions to the foregoing conditions:

- A. Recordings made of incoming calls to telephone numbers publicized for emergencies involving health or safety of life and property (e.g., emergency situations involving fire, health care, police, public utilities and emergency road service) and outgoing calls made in immediate response to such calls. Included in this exception are:
 1. Recordings made at the United States Department of Defense Command Centers of emergency communications transmitted over the Department of Defense's private line system connected to Interstate IntraLATA Toll Services.

2.6 Connection General (Cont'd)

- (a) Recordings made by the United States Nuclear Regulatory Commission of the Department of Energy with respect to the telephone systems located at its Operations Center.
- 2. Recordings of calls made for patently unlawful purposes, such as bomb threats, kidnap ransom requests, and obscene telephone calls. Outgoing calls made in immediate response to such calls are also excepted. Included in this exception are:
 - (a) Recordings made by the United States Secret Service of the Department of the Treasury for recording of two-way telephone conversations which concern the safety of the person of the President of the United States, members of his immediate family, or the White House and its grounds.
- 3. Recordings of calls made by federal, state, or local law enforcement authorities, or federal intelligence authorities, acting under color of law.

2.6.5 Violation of Conditions

If any of these connection conditions is violated, the Telephone Company will take immediate action to protect the telecommunications network and will promptly notify the Customer of the violation. After receiving such notice, the Customer must correct the violation and must confirm in writing that the correction has been made. This confirmation must be received by the Telephone Company within ten days after the Customer has received written notification of the violation. If the Customer does not correct the violation, or does not provide the required written confirmation to the Telephone Company within ten days, service will be suspended until such time as the Customer does comply.

2.7 Connections- Registered Equipment and Services**2.7.1 Registered Terminal Equipment, Registered Protective Circuitry and Registered Multiline Terminating Systems**

Terminal equipment, protective circuitry, and multiline terminating systems that are registered may be directly connected at the Customer's premises to IITS, subject to Part 68 of the Federal Communications Commission's Rules and Regulations, if:

- A. All combinations of registered equipment or systems and associated non-registered terminal equipment (including but not limited to wiring) are installed, operated and maintained so that the requirements of Part 68 of the Federal Communications Commission's Rules and Regulations are continually satisfied.
- B. The Customer provides the following information to the Telephone Company prior to the connection of Customer-provided equipment or systems:
 - (1) the Registration Number
 - (2) the Ringer Equivalence Number and Type
 - (3) the type of Telephone Company-provided standard jack required
 - (4) the line(s) to which the equipment or system will be connected
 - (5) information concerning the premises wiring associated with multiline terminating systems (when required).
- C. The Customer notifies the Telephone Company when the Customer-provided registered equipment or system is permanently disconnected.
- D. The Ringer Equivalence of the equipment or system in combination with the total Ringer Equivalence of other equipment connected to the same line does not exceed the allowable maximum of five or as otherwise determined by the Telephone Company.
- E. The ringer type is designated by the Telephone Company as suitable for that particular line.
- F. All connections of registered equipment or systems are made through Telephone Company-provided standard jacks. In certain cases there are exceptions: (a) registered multiline terminating systems may be connected through standard jacks wired in other than a standard manner, when agreed to by the Telephone Company, or (b) registered equipment which is in a hazardous or inaccessible location may be connected as set forth in 12.4, following.

2.7 - Connections- Registered Equipment and Services (Cont'd)**2.7.2. Premises Wiring Used in Connection with Telephone Company-Provided Multiline Terminating Systems.**

The Telephone Company will install and maintain all premises wiring utilized with a Telephone Company-provided multiline terminating system. It will assume the responsibility to assure that the regulations pertaining to premises wiring in Part 68 of the FCC's Rules and Regulations are continually met. The Customer may not install, rearrange, or remove any premises wiring provided with a Telephone Company-provided multiline terminating system.

2.7.3 Premises Wiring Used in Connection with Customer-Provided Multiline Terminating Systems

When Customer-provided multiline terminating systems utilize Fully-Protected Premises Wiring, no further action is required. However, when a Customer elects to install, connect, reconfigure, or remove other than Fully-Protected Premises Wiring with a Customer-provided multiline terminating system, the appropriate institutional controls specified in Part 68 of the FCC's Rules and Regulations must be followed. These controls are not applicable when the preceding activities are accomplished functionally using a cross-connect panel or when the entire multiline terminating system is removed.

A. Institutional Controls

Institutional controls require that:

- (1) At least 10 days advance notice must be given to the Telephone Company in the form of a notarized affidavit before placement and connection of the premises wiring. (This time period may be changed by agreement of the Telephone Company and the installation supervisor.) A copy of the affidavit must also be maintained at the Customer's premises.
- (2) If the premises wiring being stalled is classified as unprotected, the work must be supervised by an installation supervisor who has been trained by the equipment manufacturer, received written authority to install their equipment, and has at least six months experience in this type of work. A licensed professional engineer (as specified in Part 68 of the Federal Communications Commission's Rules and Regulations) may also supervise the work, but does not have to meet these conditions.
- (3) If the premises wiring being installed is classified as partially protected, the work must be supervised by an installation supervisor who has at least six months experience in this type of work. However, the supervisor is not required to be trained by or have written authority from the equipment manufacturer. A licensed professional engineer may also supervise the work, but does not have to meet these conditions.

2.7 - Connections- Registered Equipment and Services (Cont'd)

- (4) An installation supervisor or licensed professional engineer may submit an application for a blanket affidavit number to the Telephone Company(s) within each state in lieu of individual affidavits. This blanket affidavit number will be assigned on a yearly basis by each Telephone Company. Prior to each installation thereafter, this blanket affidavit number must be submitted to the Telephone Company

B. Extraordinary Procedures

- (1) When Customer-provided multiline terminating systems are utilized, the Telephone Company may invoke the extra-ordinary procedures that are specified in Part 68 of the Federal Communications Commission's Rules and Regulations where one or more of the following conditions are present:
 - (a) Information provided in the aforementioned affidavit gives reason to believe that a violation of Part 68 is likely.
 - (b) A failure has occurred during acceptance testing for imbalance.
 - (c) Harm has occurred, and there is reason to believe that this harm was a result of wiring operations performed under Part 68.
 - (d) Disconnecting service.

When the activities in (a) or (b), preceding, disclose a failure to comply with Part 68 of the Federal Communications Commission's Rules and Regulations, the Customer is responsible for the payment of a charge equal to the Maintenance of Service charge as specified in the General and Local Exchange Service Tariffs and/or this Guidebook of the Telephone Company.

2.7.4 Connections Involving National Defense and Security

- A. In certain cases, Part 68 of the FCC's Rules and Regulations permit the connection of nonregistered terminal equipment or multiline terminating systems to IITS, if:
 1. The Secretary of Defense, the head of any other governmental department (having requisite FCC approval), or their authorized representative certifies in writing to the Telephone Company that:
 - (a) the connection is required in the interest of national defense and security;
 - (b) the equipment to be connected either complies with the technical requirements of Part 68 or will not cause harm to IITS or Telephone Company employees; and
 - (c) the work is supervised by an installation supervisor who meets the qualifications stated in Part 68.

2.8 Connections of Grandfathered Equipment and Systems**2.8.1. Direct Connections****A. Grandfathered Terminal Equipment, Multiline Terminating Systems and Protective Circuitry**

Terminal equipment, multiline terminating systems and protective circuitry, which is grandfathered, may remain connected or be moved and reconnected to IITS for the life of the equipment without registration, and may be modified only in accordance with Part 68 of the Federal Communications Commission's Rules and Regulations, if:

1. the Customer provides the following information to the Telephone Company prior to reconnecting the grandfathered Customer-provided equipment or system:
 - (a) Manufacturer's Name
 - (b) Model No.
 - (c) Type Equipment or System
 - (d) Description of the Interface
 - (e) Line(s) to which the equipment or system will be connected
 - (f) Information concerning the premises wiring associated with a multiline terminating system (when required).
2. all connections are made through Telephone Company-provided standard jacks unless the Telephone Company agrees to an alternate type of connection;
3. all such connections comply with the minimum protection criteria set forth in C. following;
4. premises wiring, associated with grandfathered multiline terminating systems which (a) were installed after June 1, 1978, or (b) are moved and reconnected, conforms to Part 68 of the Federal Communications Commission's Rules and Regulations; and
5. no changes are made to equipment or systems so connected, except by the manufacturer thereof or a duly authorized agent of the manufacturer.

The Customer must notify the Telephone Company when the grandfathered Customer-provided equipment or system is permanently disconnected.

B. Additions to grandfathered multiline terminating systems may be made without registration of any additional equipment involved if:

1. equipment so added is being reconnected, i.e., was previously directly connected to the telecommunication network prior to January 1, 1980, in accordance with Telephone Company Tariffs; and
2. any premises wiring added conforms to Part 68 of the Federal Communications Commission's Rules and Regulations and 2.6.2 (B), preceding.

2.8 Connections of Grandfathered Equipment and Systems (Cont'd)**2.8.2. Connections Through Grandfathered Connecting Arrangements or Data Access Arrangements Provided by the Telephone Company.**

A. General

Grandfathered connecting arrangements or data access arrangements will be provided by the Telephone Company to connect Customer-provided terminal equipment or multiline terminating systems under the following conditions:

1. Telephone Company-provided grandfathered connecting arrangements or data access arrangements will continue to be provided to reconnect Customer-provided terminal equipment or multiline terminating systems which were previously connected toll IITS through such connecting arrangements or data access arrangements, prior to the respective register only dates. (The register only dates are (1) July 1, 1979, for terminal equipment, and (2) January 1, 1980, for multiline terminating systems.) In addition, connecting arrangements or data access arrangements, which were installed prior to the respective register only dates, may remain connected for the life of the equipment and may be moved and reconnected.
2. Grandfathered connecting arrangements or data access arrangements used to move and reconnect Customer-provided terminal equipment or multiline terminating systems will continue to be provided by the Telephone Company, subject to their availability.
3. Network control signaling is performed by equipment furnished, installed and maintained by the Telephone Company, except that:
 - (a) Customer-provided tone-type address signaling is permissible through a Telephone Company-provided connecting arrangement,
 - (b) signaling functions may be performed by Customer-provided Conforming Answering Devices specified in 12.2 (B), following.
4. The Customer-provided equipment or system must comply with the minimum protection criteria specified in C, following.
5. When used for data transmission, the Customer shall furnish the equipment which performs the function of data signaling conditioning. When the Customer-provided terminal equipment is used for both voice and data communications, the same data access arrangement may be used.

2.8 Connections of Grandfathered Equipment and Systems (Cont'd)

2.8.3 Minimum Protection Criteria

- A. To prevent excessive noise and crosstalk in the telecommunications network, it is necessary that the power of the signal at the central office not exceed 12db below one milliwatt when averaged over any three-second interval. To insure that this limit is not exceeded, the power of the signal which may be applied by the equipment to the Telephone Company interface located on the Customer's premises will be specified for each Customer location, but in no case shall it exceed one milliwatt.

- B. To protect other services, it is necessary that the signal which is applied by the equipment to the Telephone Company interface located on the Customer's premises meet the following limits:
 - 1. The power in the band from 3,995 Hertz to 4,005 Hertz shall be at least 18db below the power of the signal as specified in A, above.
 - 2. The power in the band from 4,005 Hertz to 10,000 Hertz shall not exceed 16db below one milliwatt.
 - 3. The power in the band from 10,000 Hertz to 25,000 Hertz shall not exceed 24db below one milliwatt.
 - 4. The power in the band from 25,000 Hertz to 40,000 Hertz shall not exceed 36db below one milliwatt.
 - 5. The power in the band above 40,000 Hertz shall not exceed 50db below one milliwatt.

- C. To prevent the interruption or disconnection of a call, or interference with network control signaling, it is necessary that the signal applied by the equipment to the Telephone Company interface located on the Customer's premises at no time have energy solely in the 2450 to 2750 Hertz band. If signal power is in the 2450 to 2750 Hertz band, it must not exceed the power present at the same time in the 800 to 2450 Hertz band.

2.9 Connections of Customer-Provided Data Terminal Equipment Through a Data Set

Not applicable in the Southwest Region.

A. Customer-provided data terminal equipment may be connected to IITS through a Telephone Company-provided registered or grandfathered Data Set which will perform the functions of:

1. network control signaling,
2. conditioning the data signals generated by the Customer-provided terminal equipment to signals suitable for transmission by means of Telephone Company services, and
3. conditioning signals transmitted by means of Telephone Company services to data signals suitable for reception by Customer-provided equipment.

2.10 Connections - Acoustic and Inductive**2.10.1 General**

- A. Voice or data terminal equipment (including telephotograph equipment), multiline terminating systems and Customer or Other Common Carrier-provided communications systems may be acoustically or inductively connected at the Customer's premises to the telecommunications network if the acoustic or inductive connection is made externally to the network control signaling unit when that unit is provided by the Telephone Company.
- B. Customer-provided tone-type address signaling is permitted through acoustic or inductive connections. However, the services of the Telephone Company are not designed for such use and the Telephone Company makes no representation as to the reliability of address signaling which is performed in such manner.

2.10.2 Minimum Protection Criteria

- A. To prevent excessive noise and crosstalk in the telecommunications network, it is necessary that the power of the signal which is applied by the equipment to the network control signaling unit located on the Customer's premises be limited so that the signal power at the output of the network control signaling unit (i.e., at the input of the Telephone Company Line) does not exceed 9dB below one milliwatt when averaged over any three-second interval. However, to permit each Customer, independent of distance from the central office, to supply signal power which at the central office approximates 12dB below one milliwatt when averaged over any three-second interval, the Telephone Company, at the Customer's request, will specify, for each Customer location, the signal power at the output of the network control signaling unit, which shall in no case exceed one milliwatt.
- B. To protect other services, it is necessary that the signal which is applied by the equipment to the network control signaling unit located on the Customer's premises meet the following limits at the output of the network controlling signaling unit:
 - 1. The power in the band from 3,995 Hertz to 4,005 Hertz shall be at least 18dB below the power of the signal as specified in A, preceding.
 - 2. The power in the band from 4,005 Hertz to 10,000 Hertz shall not exceed 18dB below one milliwatt.
 - 3. The power in the band from 10,000 Hertz to 25,000 Hertz shall not exceed 24dB below one milliwatt.
 - 4. The power in the band from 25,000 hertz to 40,000 Hertz shall not exceed 36dB below one milliwatt.
 - 5. The power in the band above 40,000 Hertz shall not exceed 50dB below one milliwatt.
- C. To prevent the interruption or disconnection of a call, or interference with network control signaling, it is necessary that the signal applied by the equipment to the network control signaling unit located on the Customer's premises be limited so that the signal at the output of the network control signaling unit shall at no time have energy solely in the 2450 to 2750 Hertz band. If there is signal power at the output of the network control signaling unit in 2450 to 2750 Hertz band, it must not exceed the power present at the same time in the 800 to 2450 Hertz band.

2.10 Connections - Acoustic and Inductive (Cont'd)

2.10.3 Accessories

Accessories are devices which are mechanically attached to, or used with, IITS. They are independent of the transmission conductors in the communications path of IITS (Devices which are electrically, acoustically or inductively connected to IITS are not considered accessories). Examples of accessories are telephone dial locks and headset shoulder rests.

Accessories may be used with IITS if they do not cause any harm to the telecommunications network or Telephone Company-provided equipment.

2.11 Connections - CP Systems not Subject to Part 68/FCC Rules/Regulations

2.11.1 Answer Supervision

Answer supervision must be provided when an IITS offering is connected to switching equipment or a Customer-provided communications system which is not subject to Part 68 of the FCC Rules and Regulations, 47 C.F.R., Part 68. In such cases, the equipment or system must provide answer supervision so that the measure of chargeable time begins upon the delivery of the IITS call to the switching equipment, or to the equipment connected to the communications system, and ends upon termination of the call by the calling party.

2.11.2 Minimum Protection Criteria

General

A. Minimum Protection Criteria have been specified so that Telephone Company personnel, equipment, and services will be protected from the harmful effects of signal power overload, hazardous voltages and longitudinal imbalance. Minimum Protection Criteria apply to the direct electrical, acoustic, or inductive connections of Customer equipment, test equipment and Customer-provided communications systems to IITS.

B. Customer-provided Communications System Failures

When a Customer-provided communications system fails and the connection to IITS is not through switching equipment, the Customer-provided communications system must be arranged to promptly return the IITS to an idle (on-hook) state. In addition, the Customer must notify the Telephone Company when the Customer-provided communications system fails.

C. All Connections

Customer equipment, test equipment and Customer-provided communications systems, which are connected to IITS on a direct electrical basis or an acoustic or inductive basis, must comply with the following:

1. To protect other Telephone Company services, it is necessary that the signal which is applied at the station meets the following limits:

(a) Metallic Voltage

i. 4 kHz to 270 kHz

Center Frequency (f) of 8 kHz Band	Maximum Voltage in All 8 kHz Bands	Terminating Impedance
8 kHz to 12 kHz	- (6.4+12.6 log f) dBV*	300 ohms
12 kHz to 90 kHz	(23 - 40 log f) dBV	135 ohms
90 kHz to 266 kHz	- 55 dBV	135 ohms

*dBV = 20 log₁₀ voltage in volts

- ii. The root-mean-square (RMS) value of the metallic voltage components in the frequency range of 270 kHz to 6 MHz shall, averaged over 2 microseconds, not exceed -15 dBV. This limitation applies with a metallic termination having an impedance of 135 ohms.

2.11 Connections - CP Systems not Subject to Part 68/FCC Rules/Regulations
(Cont'd)

(b) Longitudinal Voltage

i. 4 kHz to 270 kHz Center Frequency (f) of 8 kHz Band	Maximum Voltage in All 8 kHz Bands	Terminating Impedance
8 kHz to 12 kHz	- (18.4+20 log f) dBV*	500 ohms
12 kHz to 42 kHz	(3 - 40 log f) dBV	90 ohms
90 kHz to 266 kHz	- 62 dBV	90 ohms

*dBV = 20 log₁₀ voltage in volts

- ii. The root-mean-square (RMS) value of the longitudinal voltage components in the frequency range of 270 kHz to 6 MHz shall, averaged over 2 microseconds, not exceed -30 dBV. This limitation applies with a longitudinal termination having an impedance of 90 ohms.

2. To prevent the interruption or disconnection of an IITS call, it is necessary that the signal power applied at the station be limited. Specifically, the signal at the station shall at no time have energy concentrated solely in the 2450 to 2750 Hz band. If there is signal power at the station in the 2450 to 2750 Hz band, it must not exceed the power present at the same time in the 800 to 2450 Hz band.

2.11.3 Direct Electrical Connection

Customer-provided communications systems not subject to Part 68 of the Federal Communications Commission's Rules and Regulations may be connected with exchange telephone service to be used with IITS on a direct electrical basis at the Customer's premises provided that:

- A. The connection is made through:
- (a) a connecting arrangement furnished by the Telephone Company, or
 - (b) registered or grandfathered terminal equipment, multiline terminating system, or protective circuitry which, either singularly or in combination, assures that the requirements of Part 68 of the FCC's Rules and Regulations are met at the IITS interface.

In lieu of these conditions for total hardware protection, an optional, alternative method, as described in B, following, is available for the control of signal power only.

B. The connection is:

1. through switching equipment, or
2. to a Customer-Provided communications system that is arranged to promptly return the exchange telephone service to an idle (on hook) state should the communications system fail. In addition, the Customer must notify the Telephone Company when the communications system fails.

- C. Preceding minimum protection criteria set forth in this Guidebook are complied with when the connection is made through equipment or systems that are not registered.

**2.11 Connections - CP Systems not Subject to Part 68/FCC Rules/Regulations
(Cont'd)****2.11.4 Institutional Procedures for Signal Power Control**

A. When Customer-provided communications systems are connected through: (a) a Telephone Company-provided connecting arrangement, or (b) registered or grandfathered terminal equipment, multiline terminating system or protective circuitry which assures that all of the requirements of Part 68 of the FCC's Rules and Regulations are met at the IITS interface, no further action is required. However, when a Customer elects to connect a communications system to IITS and the registered or grandfathered equipment, system or protective circuitry through which the connection is made does not provide protection for signal power control, the Customer must comply with the following institutional procedures:

1. The Customer-provided communications systems must be installed, operated and maintained so that the signal power (within the frequency range of 200-4000 Hertz) at the IITS interface continuously complies with Part 68 of the FCC's Rules and Regulations.
2. The operator(s)/maintainer(s) responsible for the establishment, maintenance and adjustment of the voice frequency signal power present at the IITS interface must be trained to perform these functions by successfully completing one of the following:
 - (a) a training course provided by the manufacturer of the equipment used to control voice frequency signal power; or
 - (b) a training course provided by the Customer or authorized representative, who has responsibility for the entire communications system, using training materials and instructions provided by the manufacturer of the equipment used to control the voice frequency signal power; or
 - (c) an independent training course (i.e., trade school or technical institution) recognized by the manufacturer of the equipment used to control the voice frequency signal power; or
 - (d) in lieu of the preceding training requirements, the operator(s)/maintainer(s) is under the control of a supervisor trained in accordance with () through (c) preceding.

Upon request the Customer is required to provide the proper documentation to demonstrate compliance with the conditions in (b) preceding.

3. At least 10 days advance notice must be given to the Telephone Company in the form of a notarized affidavit before the initial connection of the Customer-provided communications system. A copy of the affidavit must also be maintained at the Customer's premises. The affidavit must contain the following information:
 - (a) The full name, business address, business telephone number and signature of the Customer or authorized representative who has responsibility for the operation and maintenance of the communications system.
 - (b) The line(s) which the communications system will be either connected to or arranged for connection to.
 - (c) A statement that all operations associated with establishment, maintenance and adjustment of the signal power present at the IITS interface will comply with Part 68 of the FCC's Rules and Regulations.

**2.11 Connections - CP Systems not Subject to Part 68/FCC Rules/Regulations
(Cont'd)**

- (d) A statement describing how each operator/maintainer of the communications system will meet and continue to meet the training requirements for persons installing, adjusting or maintaining the communications system.

2.11.5 Extraordinary Procedures

- A. The Telephone Company may invoke extraordinary procedures to protect the IITS network where one or more of the following conditions are present:
 - 1. Information provided in the affidavit gives reason to believe that a violation of Part 68 of the FCC's Rules and Regulations or the Institutional Procedures set forth in 2, preceding is likely.
 - 2. Harm has occurred and there is reason to believe this harm was a result of operations performed under the Institutional Procedures set forth in B, preceding.
- B. The extraordinary procedures, which can be invoked by the Telephone Company, include:
 - 1. Requiring the use of protective apparatus which either protects solely against signal power or which assures that all of the requirements of Part 68 are met at the IITS interface. This protective apparatus may be provided by either the Telephone Company or the Customer, or
 - 2. Disconnecting service.
- C. A charge equal to the Maintenance of Service charge (as set forth in the General and Local Exchange Service tariffs of the Telephone Company) will apply when:
 - 1. It is necessary to send a repairperson to the premises where the connection is made because a condition set forth in (a) preceding exists, and
 - 2. A failure to comply with Part 68 of the FCC's Rules and Regulations or the institutional Procedures for Signal Power Control is disclosed.

2.11.6 Connection of Communications Systems Provided by Certain Customers

The regulations set forth in A, thru C, following, apply only to connections of Customer-provided communications systems to Interstate IntraLATA Toll Services which are connected through PBXs provided and installed by the Telephone Company prior to January 1, 1984. Such connections may continue to be made for the life of the PBX. As of January 1, 1984, all other connections of Customer-provided communications systems must be made in accordance with the regulations set forth in A, and B, preceding.

**2.11 Connections - CP Systems not Subject to Part 68/FCC Rules/Regulations
(Cont'd)****A. Connections of Certain Facilities of Power, Pipe Line and Railroad Companies.**

1. Communications systems of an electric power company, an oil, oil products or natural gas pipe line company, or a railroad company provided primarily to communicate with points located along a right-of-way (including premises of such company anywhere in cities, towns or villages along the right-of-way) owned or controlled by such company, may, in lieu of the regulations for connecting arrangements and minimum protection criteria in A, preceding, be connected with the telecommunications network for the following purposes:
 - (a) in cases of emergency involving safety of life or property;
 - (b) in cases of calls originated by railroad employees under circumstances indicating need for prompt action to secure or maintain the safety, continuity, or reliability of railroad service to the public, and related to the movement of passengers, mail property, or equipment by railroad, or the repair, maintenance, or construction of railroad rights-of-way, structures or equipment;
 - (c) in cases where the Customer facilities serve locations where it is impracticable because of hazard or inaccessibility for the Telephone Company to furnish its services; and
 - (d) during an interim period in cases where the Customer has arranged for replacement of Customer-provided communications systems with Telephone Company-provided services.
2. Telephone circuits of such companies will be connected to a local or toll central office line to form a through connection only through manual switching equipment, or an attendant's position of dial PBX equipment furnished by the Telephone Company prior to January 1, 1984. Such equipment or position may be located at either or both ends of the Customer's circuit.
3. Connection of a telephone circuit of such companies as specified in 1., (b), (c) or (d), preceding may be established at either end of such circuit, but shall not be established at both ends simultaneously.
4. Effective January 1, 1980, Terminal equipment and multiline terminating systems that are subject to Part 68 of the Federal Communications Commission's Rules and Regulations, and are associated with Customer-provided communications systems connected to services provided by the Telephone Company for use with Interstate IntraLATA Toll Services pursuant to this paragraph, must meet the requirements of Part 68 of the Federal Communications Commission's Rules and Regulations.

**2.11 Connections - CP Systems not Subject to Part 68/FCC Rules/Regulations
(Cont'd)****B. Connections of Certain Facilities of the National Aeronautics and Space Administration**

1. Communications systems of the National Aeronautics and Space Administration (NASA) may, in lieu of the regulations for connecting arrangements and minimum protection criteria in A, preceding, be connected to multiline terminating systems furnished by the Telephone Company prior to January 1, 1984, when the Administrator of NASA or an authorized representative notifies the Telephone Company in writing that the connection is required for the control of space vehicles. Connection of those communications systems to the telecommunications network will be made only:
 - (a) in cases of emergency involving life or property, or
 - (b) when the communications systems provided by NASA are in locations where it is impractical for the Telephone Company to furnish its services.
2. Effective January 1, 1980, terminal equipment and multiline terminating systems that are subject to Part 68 of the Federal Communications Commission's Rules and Regulations, and are associated with Customer-provided communications systems connected to services provided by the Telephone Company for use with Interstate IntraLATA Toll Services pursuant to this paragraph, must meet the requirements of Part 68 of the Federal Communications Commission's Rules and Regulations.

C. Connections of Certain Facilities of the U.S. Army, Navy and Air Force

1. Communications systems of the U.S. Department of the Army, Navy, or Air Force may, in lieu of the provisions for connecting arrangements and minimum protection criteria in A, preceding, be connected to a multiline terminating system, where the:

Secretary of the appropriate Department or his authorized representative notifies the Telephone Company in writing that such connection is required for reasons of military necessity. Such communications systems will be connected to the telecommunications network only:

 - (a) in cases of emergency involving life or property
 - (b) when the communications systems provided by the Department are in locations where it is impractical for the Telephone Company to furnish its services.
2. Effective January 1, 1980, Customer-provided terminal equipment and multiline terminating systems that are subject to Part 68 of the Federal Communication Commission's Rules and Regulations, and are associated with Customer-provided communications system connected to services provided by the Telephone Company for use with Interstate IntraLATA Toll Services pursuant to this paragraph, must meet the requirements of Part 68 of the Federal Communications Commission's Rules and Regulations.

INTERSTATE INTRALATA TOLL SERVICES

PART 2 - General Terms and Conditions

Original Sheet 7

SECTION 11 - Connections - CP Systems not Subject to Part 68/FCC Rules/Regs

**2.11 Connections - CP Systems not Subject to Part 68/FCC Rules/Regulations
(Cont'd)**

D. Connections of Service Station Lines and Facilities Furnished by the Customer Which Involve Hazardous or Inaccessible Locations

1. Customer-provided service station lines, and communications systems which involve hazardous or inaccessible locations and which are authorized to be connected to local exchange service under tariffs filed with the appropriate regulatory agency, may be connected to the telecommunications network.

2. Effective January 1, 1980, Customer-provided terminal equipment and multiline terminating systems that are subject to Part 68 of the Federal Communications Commission's Rules and Regulations, and are connected with Customer-provided communications systems connected to services provided by the Telephone Company for use with Interstate IntraLATA Toll Services pursuant to this paragraph, must meet the requirements of Part 68 of the Federal Communications Commission's Rules and Regulations.

2.12 Connections - CP Terminal Equipment via Attestation Program

A. Attested Equipment Connected Prior to July 1, 1980

1. Customer-provided headsets and non-powered conferencing equipment, which will meet the standards and procedures set forth by the American Telephone and Telegraph Company in its Technical References for Attested Equipment and which are connected at the Customer's premises to IITS prior to July 1, 1980, may remain connected or be moved and reconnected in accordance therewith for the life of the equipment, unless subsequently modified, if:
 - (a) The connection is made through an interface termination (i.e., headset jack) provided by the Telephone Company.
 - (b) The Identification Number issued by the Telephone Company to the manufacturer or supplier appears on each unit of Attested Equipment utilized.
 - (c) The Customer notifies the Telephone Company of the Identification Number of the equipment and the location where the equipment is to be used.
 - (d) The Attested Equipment is not:
 - (i) connected to a source of electrical power which is external to the telecommunications network;
 - (ii) grounded;
 - (iii) performing any network control signaling functions prior to and including the establishment of the intended transmission path;
 - (iv) providing amplification in the transmission path (other than single ended terminal devices with the maximum gain limited so that the output power meets the minimum protection criteria set forth in 2.11.2 preceding.); and
 - (v) using external wiring that is permanently affixed at the site of the installation, other than portable connections compatible with the interface terminations provided by the Telephone Company.
 - (e) The Attested Equipment complies with the minimum protection criteria set forth in 2.11.2 preceding.
2. In the event Attested Equipment bearing an Identification Number does not meet the requirements set forth by the American Telephone and Telegraph Company in its Technical References, the Customer shall either disconnect the equipment from the Telephone Company service or arrange for connection of the equipment in accordance with 2.11, preceding.

2.12 Connections - CP Terminal Equipment via Attestation Program (Cont'd)

B. Conforming Answering Devices Connected Prior to July 1, 1979

1. Customer-provided Conforming Answering Devices which meet the standards and procedures set forth by the American Telephone and Telegraph Company in its Technical References for Conforming Answering Devices, and which were connected at the Customer's premises to IITS prior to July 1, 1979, may remain connected or be moved and reconnected in accordance therewith for the life of the equipment, unless subsequently modified, if:
 - (a) The Customer notifies the Telephone Company of the Conformance Number and the location where the Conforming Answering Device is to be used.
 - (b) The Conforming Answering Device is only connected by means of a jack or jack arrangement provided by the Telephone Company.
 - (c) The Conforming Answering Device is operated and maintained in accordance with those instructions furnished with such Conforming Answering Device as required by the American Telephone and Telegraph Company in its Technical References for Conforming Answering Devices.
 - (d) The Conforming Answering Device is not:
 - (i) used to transmit or receive data signals;
 - (ii) used with party line service or with public or semi-public coin telephone service; and
 - (iii) used to originate calls.
 - (e) The Conforming Answering Device complies with the minimum protection criteria set forth in 2.11.2, preceding.
2. In the event that an answering device bearing a Conformance Number does not meet the requirements of the Technical Reference for Conforming Answering Devices, the Customer using such answering device shall either disconnect the device from the Telephone Company service or arrange for connection of the device in accordance with 2.11, preceding.

2.13 Connection-CP Test Equipment (Cont'd)**2.13.1 Direct Electrical Connection**

Customer-provided test equipment can be connected to IITS at the premises of the Customer through registered or grandfathered terminal equipment, multiline terminating system or protective circuitry, which either singularly or in combination assures that all the requirements of Part 68 of the FCC's Rules and Regulations are met at IITS interface.

Connections can also be made on a direct electrical basis or through terminal equipment, multiline terminating system or protective circuitry under the following Interim Program for Connection of Customer-Provided Test Equipment, provided that:

- A. The Customer-provided test equipment is limited to transmission signal power generating and/or detection devices, or similar devices utilized by the Customer for the detection and/or isolation of a communications service fault.
- B. The Customer-provided test equipment is of a type that was lawfully directly connected to IITS as of March 6, 1981. Such test equipment may remain connected, be moved or reconnected during the life of the test equipment unless it has been subsequently modified.
- C. Direct connections of Customer-provided test equipment or connections through Telephone Company-provided terminal equipment, multiline terminating systems or protective circuitry are made through Telephone Company-provided jacks or as otherwise authorized by the Telephone Company.
- D. Customer-provided test equipment directly connected to IITS must comply with either the minimum protection criteria in 2.11.2, preceding or the Institutional Procedure for Signal Power Control in 2.13.2, following.
- E. The Customer notifies the Telephone Company of each IITS service at each premises to which the Customer-provided test equipment will be connected in advance of the initial connection. The Customer must also notify the Telephone Company when such test equipment is permanently disconnected at each premises.
- F. No Customer-provided test equipment or combination of terminal equipment, multiline terminating system or protective circuitry, and test equipment (including but not limited to wiring) may cause electrical hazards to Telephone Company personnel, damage to Telephone Company equipment, malfunction of Telephone Company billing equipment, or degradation of service to persons other than the user of the subject test equipment or the user's calling or called party.

2.13 Connection-CP Test Equipment (Cont'd)**2.13.2 Institutional Procedures for Signal Power Control**

A. When Customer-provided test equipment, if directly connected to IITS or when the connection is made through registered or grandfathered terminal equipment, multiline terminating systems or protective circuitry which does not provide protection for signal power control, the Customer must comply with the following Institutional Procedures:

1. The Customer must install, operate and maintain the test equipment, other than automatic test equipment utilizing responders (or their functional equivalents) so that its signal power at the IITS interface complies with Subpart D of Part 68 of the Federal Communications Commission's Rules and Regulations. Automatic test equipment utilizing responders (or their functional equivalents) must be installed, operated and maintained so as to comply with the signal power specifications in Section 8 of Compatibility Bulletin 106, Issue No. 2, and Technical Reference - PUB 60101. (See Reference To Technical Reference Publications, Part 1 Section 6.)
2. The operator(s)/maintainer(s) responsible for the test equipment signal power present at the IITS interface must be trained to perform these functions by successfully completing one of the following:
 - (a) a training course provided by the manufacturer of the test equipment, or
 - (b) a training course provided by the Customer or authorized representative, using training materials and instructions provided by the manufacturer of the test equipment, or
 - (c) an independent training course (i.e., trade school or technical institution) recognized by the manufacturer of the test equipment, or
 - (d) in lieu of the preceding training requirements, the operator(s)/maintainer(s) is under the control of a supervisor trained in accordance with (a) through (c), preceding.

Upon request, the Customer is required to provide proper documentation to demonstrate compliance with the requirements in this paragraph 2.

3. At least 10 days advance notice must be given to the Telephone Company in the form of a notarized affidavit before the initial connection of the Customer-provided communications system. A copy of the affidavit must also be maintained at the Customer's premises. The affidavit must contain the following information:
 - (a) The full name, business address, business telephone number and signature of the Customer or authorized representative who has responsibility for operation and maintenance of the communications system.
 - (b) The line(s) which the communications system will be either connected to or arranged for connection to.

2.13 Connection-CP Test Equipment (Cont'd)

- (c) A statement that all operations associated with establishment, maintenance and adjustment of the signal power present at the IITS interface will comply with Part 68 of the FCC's Rules and Regulations.
- (d) A statement describing how each operator/maintainer of the communications system will meet and continue to meet the training requirements for persons installing, adjusting or maintaining the communications system.

B. Extraordinary Procedures

1. The Telephone Company may invoke extra-ordinary procedures to protect the IITS network where one or more of the following conditions are present:
 - (a) Information provided in the affidavit gives reason to believe that a violation of Part 68 of the FCC's Rules and Regulations or the Institutional Procedures set forth in (B) preceding, is likely.
 - (b) Harm has occurred and there is reason to believe this harm was a result of operations performed under the Institutional Procedures set forth in (B), preceding.
2. The extra-ordinary procedures, which can be invoked by the Telephone Company, include:
 - (a) Requiring the use of protective apparatus, which either protects solely against signal power or which assures that all of the requirements of Part 68 are met at the IITS interface. This protective apparatus may be provided by either the Telephone Company or the Customer.
 - (b) Disconnecting service.
3. A charge equal to the Maintenance of Service charge (as set forth in the General and Local Operating Company Exchange Tariffs of the Telephone Company) will apply when:
 - (a) It is necessary to send a repair person to the premises where the test equipment is connected because a condition as set forth in 1, preceding, exists, and
 - (b) A failure to comply with the Institutional Procedures for Signal Power Control is disclosed.

2.14 Connections-Other Common Carrier Provided Communications Systems

Other Common Carrier-provided communications systems may be connected to IITS as specified in this Section and 2.15, following.

2.14.1 Responsibility of the Customer

- A. The Customer is responsible for making arrangements with the Other Common Carrier for the installation, operation and maintenance of any Other Common Carrier-provided communications system. The connection of the Other Common Carrier-provided communications system to IITS shall not require a change in or alteration of the equipment or services of the Telephone Company; cause electrical hazards to Telephone Company personnel; damage to Telephone Company equipment; malfunction of Telephone billing equipment; or degradation of service to persons other than the user of the communications system, or his calling or called party.
- B. Upon notice from the Telephone Company that the Other Common Carrier-provided communications system is causing such a hazard, damage, malfunction or degradation of service, the Customer shall arrange with the Other Common Carrier to make any changes necessary to remove or prevent such hazard, damage, malfunction or degradation of service.

2.14.2 Responsibility of the Telephone Company

- A. Interstate IntraLATA Toll Services are not represented as adapted to the use of the Other Common Carrier-provided communications systems. If such systems are used with IITS, the Telephone Company will only be responsible for furnishing service components suitable for IITS, and to design, maintain and operate those service components accordingly. Subject to that responsibility, the Telephone Company will not be responsible for (1) the quality or the through transmission of signals generated by the Other Common Carrier-provided systems, or (2) the reception of signals by Other Common Carrier-provided systems, or (3) address signaling where such signaling is performed by the Other Common Carrier-provided signaling equipment.
- B. When an Other Common Carrier-provided communications system (1) utilizes satellite facilities, or (2) is connected to a communications system which utilizes satellite facilities, the connection of that system to IITS may result in the utilization of two or more satellite circuits on the combined connected services. In such cases the Telephone Company will only be responsible to furnish service components suitable for IITS, and to design, maintain and operate those service components accordingly. Subject to that responsibility, the Telephone Company will not be responsible for the quality of the through transmission of signals on such connection. The Telephone Company will not apply any credit allowance for impaired transmission resulting from such connection unless the defect was in the IITS service.
- C. The Telephone Company shall not be responsible to anyone if changes in its minimum network protection criteria, service components, operations or procedures render any Other Common Carrier-provided facilities or equipment obsolete, require their modification or alteration, or otherwise affect their use or performance.

2.14 Connections-Other Common Carrier Provided Communications Systems(Cont'd)

2.14.3 Violation of Regulations

When any Other Common Carrier-provided communications system is connected to the Interstate IntraLATA Toll Services in violation of any of the conditions in this Guidebook, the Telephone Company will take such immediate action as necessary for the protection of the network, and will promptly notify the Customer of the violation. The Customer will discontinue the connection or correct the violation. In addition, the Customer shall confirm in writing that the connection has been discontinued or the violation has been corrected within 10 days of receiving written notice of the violations. Failure of the Customer to discontinue the connection or to correct the violation and to give the required written confirmation to the Telephone Company will result in suspension of the Customer's service until such time as the Customer complies.

2.14.4 Other Common Carrier Services

All arrangements concerning the Other Common Carrier services will be made by the Customer with that Other Common Carrier. The furnishing of IITS is not part of a joint undertaking with an Other Common Carrier.

Conditions for Connections of Other Common Carrier-Provided Communications Systems

2.14.5 At the Premises of the Telephone Company

Other Common Carrier-provided communications systems (utilizing Central Office Connecting Facilities) provided to a Customer may be directly connected at the premises of the Telephone Company, with exchange telephone service to be used with Interstate IntraLATA Toll Services furnished by the Telephone Company to the same Customer, provided that the connections are made through:

- A. individual exchange lines or PBX trunk lines furnished in accordance with the regulations and rates specified in the General and Local Exchange Service tariffs of the Telephone Company that provide for the connections of those lines with Other Common Carrier-provided communications systems. The purpose of the connection will be to permit communications via the Other Common Carrier communications system to or from the Customer's premises located in an exchange foreign to the exchange in which the connection is made, or
- B. Switching Equipment furnished in accordance with the provisions of the General and Local Exchange Service tariffs of the Telephone Company.

2.14.6 At the Premises of the Customer

Other Common Carrier-provided communications systems may be connected with exchange telephone service for use with IITS at the Customer's premises, provided that the connection is only made through a Service Terminating Arrangement in one of the following ways:

- A. through switching equipment,
- B. through a channel derivation device, or
- C. directly to the Service Terminating Arrangement.

2.15 Rate Determination

The surcharge(s) for an IITS call is/are determined by class of service.

The specific factors which apply to a given IITS call and their application are listed in the rate section applicable to that type of call. The guidelines pertaining to those factors are as follows:

2.15.1 Class of Service in the Midwest, Pacific Bell and Nevada Bell regions:

For the purpose of rate applications, one of the following classes of service may apply to a given call:

1. Station-to-Station

There are three types of Station-to-Station calls:

A. The Dial Station class of service applies when the person originating the call dials the telephone number desired without the assistance of an operator, and the call is billed to the calling station. It does not include calls from public or semi-public coin telephones. Dial Station rates also apply when:

- (1) An operator records the calling station number where no automatic recording equipment is available.
- (2) A call is placed from a dormitory station, and an operator records a special identification number issued by the Telephone Company for billing purposes to students of colleges or universities. The calling station must be equipped with Dormitory Centrex Service or with a PBX equipped with Direct Inward Dial and Identification Outward Dial service.
- (3) A call is forwarded by Call-Forwarding equipment.
- (4) An operator reaches the called station because of trouble on the network.
- (5) An operator places a call for a calling party who identifies himself/herself as being handicapped and unable to dial the call because of his/her handicap.
- (6) An operator reestablishes a Dial Station call that has been interrupted after the called station has been reached.
- (7) Calls are originated from vessels which have an assigned Telephone-Company Marine Identification Number (MIN).
- (8) An operator places a call because service components are not available for dial completion.

B. The Operator Station class of service applies when calls are completed with the assistance of an operator, except as specified for the Dial Station or Customer Dialed Calling Card Station classes of service. Operator Station service includes messages originated at a public or semi-public coin telephone.

2.15 Rate Determination (Cont'd)

- C. The Customer Dialed Calling Card Station class of service applies when the person originating the call:
1. dials the digit zero, plus the telephone number, plus a calling card number (where equipment is available) to complete the call without operator assistance, or
 2. dials the digit zero, plus the telephone number (0 + number) to complete the call. In such cases, operator assistance is limited to recording the calling card number for billing purposes, or
 3. dials the operator and places a calling card Station-to-Station call when equipment capability precludes either of the foregoing.

2. Person-to-Person

The Person-to-Person class of service applies when the person originating the call specifies the particular party to be reached by an operator. That party may be:

- A. A person.
- B. A mobile station through a Miscellaneous Common Carrier attendant.
- C. A station, department, or office through a PBX attendant.

After the called station has been reached, if the calling party requests or agrees to speak to a party other than the party initially specified, the call is still classified as Person-to-Person. The calling party is responsible for identifying the party at the called station.

Person-to-Person also applies when the call originator requests an operator to make arrangements with a called party to establish a call at a specified time.

The Telephone Company does not undertake to bring a called party to a station who cannot be readily reached at the called station. However, at the request of the calling party, the Telephone Company, when possible, will arrange on behalf of the calling party for messenger service. Messenger service is defined as a messenger or other means of notifying the called party of the call. The calling party shall reimburse the Telephone Company for the amount expended for such messenger service. These charges, to the extent they can be determined in advance, require approval of the calling party. Charges for messenger service are added to the tariff charges for the call.

2.15 Rate Determination(Cont'd)

3. Third Number

The Third Number class of service applies when calls are billed to a telephone number other than the calling or called number.

2.15.2 Class of Service in the Southeast region:

For the purposes of rate application, one of five classes of service may apply to an IITS call, as specified in Section 3. These classes of service are Dial Station, Customer Dialed Calling Card Station, Operator Station, Person-to-Person, and Real Time Rated. Each class of service and its specific regulations follow.

A. Dial Station

Dial Station rates apply when the person originating the call dials the telephone number desired and completes the call without the assistance of a Telephone Company operator, and the call is billed to the calling station. Dial Station does not include calls from public or semi-public coin telephones. Dial Station rates also apply when:

- (1) the Customer has dialed the call and a Telephone Company operator is used only to record the calling station number where automatic number recording equipment is not available,
- (2) a call is forwarded by Call-Forwarding equipment,
- (3) a Telephone Company operator reaches the called station because the calling party could not complete the call due to trouble on the telecommunications network,
- (4) a Telephone Company operator places a call for a calling party who identifies himself/herself as being handicapped and unable to dial the call because of his/her handicap,
- (5) a Telephone Company operator re-establishes a Dial Station call that has been involuntarily interrupted after the called station has been reached, or
- (6) a Telephone Company operator places a call because service components are not available for dial completion.

B. Customer-Dialed Calling Card Station

Customer-Dialed Calling Card Station rates apply when calls are originated as specified below.

- (1) Customer-Dialed/Automated - The Customer dials the telephone number desired and completes the call without the assistance of a Telephone Company operator, and the call is billed to a Calling Card, or
- (2) Customer-Dialed and Operator Assisted - The customer dials the telephone number desired and Telephone Company operator assistance is limited to recording the Calling Card number for billing purposes, or

2.15 Rate Determination(Cont'd)

- (3) Customer-Dialed and Operator Must Assist - The Customer dials the Telephone Company operator or the desired telephone number and the Operator Services equipment capability precludes the Customer from completing the call without the assistance of a Telephone Company operator and the call is billed to the Customer's Calling Card.

C. Operator Station

Operator Station rates apply when calls are completed with the assistance of a Telephone Company operator, except as specified for the Dial Station, Customer Dialed Calling Card Station, Person-to-Person and Real Time Rated classes of service. Operator Station rates apply to calls which are billed to a different telephone number (e.g., collect, bill to a third number) or a calling card.

D. Person-to-Person

Person-to-Person rates apply when the person originating the call specifies the particular party to be reached by the Telephone Company operator, except person to person calls rated on a real time basis. The specified party may be a person, or a station, department, extension or office through a PBX attendant.

After the called station has been reached, if the called party is unavailable and the calling party requests or agrees to speak to a party other than the party initially specified, the call is still billed as Person-to-Person call. The calling party is responsible for identifying the party at the called station.

The Person-to-Person rates also apply to those calls for which the calling party requests a Telephone Company operator to make arrangements with a called party to establish a call at a specified time or to arrange for messenger service.

E. Real Time Rated-Operator Station/Person-to-Person

Real Time Rated rates apply to the following calls:

1. Calls originated and paid for at public or semi-public telephones.
2. Calls for which the Telephone Company furnishes time and/or charges.

2.15 Rate Determination (Cont'd)**2.15.3 Class of Service in the Southwest region:**

A. Station-to-Station

There are two types of station-to-station calls:

1. The Direct Dial Station class of service applies when the person originating the call dials the telephone number desired without the assistance of an operator, and the call is billed to the calling station. It does not include calls from public or semi-public coin telephones. Direct Dial Station rates also apply when:
 - a. An operator records the calling station number where no automatic recording equipment is available.
 - b. A call is placed from a dormitory station, and an operator records a special identification number issued by the Telephone Company for billing purposes to students of colleges or universities. The calling station must be equipped with Dormitory Centrex Service or with a PBX equipped with Direct Inward Dial and Identified Outward Dial service.
 - c. A call is forwarded by Call-Forwarding equipment.
 - d. An operator reaches the called station because of trouble on the network.
 - e. An operator places a call for a calling party who identifies himself/herself as being disabled and unable to dial the call because of his/her disability.
 - f. An operator re-establishes a Direct Dial Station call that has been interrupted after the called station has been reached.
 - g. Calls are originated from vessels which have an assigned Telephone Company Marine Identification Number (MIN).
 - h. An operator places a call because service components are not available for dial completion.
 2. The Operator Assisted Station-to-Station class of service applies when calls are completed with the assistance of an operator, except as specified for the Direct Dial Station class of service. Operator Assisted Station-to-Station service includes calls charged to a calling card number, collect calls, calls billed to a third number and sent paid calls. Messages originated at a public or semi-public coin telephone are included in this service.
- B. The Customer-Dialed Calling Card Station class of service applies when the person originating the call:
1. dials the digit zero, or a special access number (e.g., an 800/888 number) plus the telephone number, plus a calling card number (where equipment is available) to complete the call without operator assistance, or
 2. dials the digit zero, plus the telephone number (0 + number) or a special access number (e.g., an 800/888 number) plus the telephone number to complete the call. In such cases operator assistance is limited to recording the calling card number for billing purposes, or

2.15 Rate Determination(Cont'd)

3. dials the digit zero or a special access number (e.g., an 800/888 number) to reach the Telephone Company operator and places a calling card Station-to-Station call when equipment capability precludes either of the foregoing.

C. Person-to-Person

The Person-to-Person class of service applies when the person originating the call specifies the particular party to be reached by the operator. That party may be:

1. A person.
2. A mobile station through an attendant.
3. A station, department, or office through a PBX attendant.

After the called station has been reached, if the calling party requests or agrees to speak to a party other than the party initially specified, the call is still classified as Person-to-Person. The calling party is responsible for identifying the party at the called station.

Person-to-Person also applies when the call originator requests an operator to make arrangements with a called party to establish a call at a specified time.

2.15.4 Timing of Messages

Chargeable time includes:

- A. On Station-to-Station messages, chargeable time begins when connection is established between the calling station and the called station.
- B. On Person-to-Person messages, chargeable time begins when connection is established between the calling person and a specified person, station, department, office or an agreed-upon alternate.
- C. Chargeable time ends when the calling station "hangs up." If the called station "hangs up" but the calling station does not, chargeable time ends when the connection is released either by automatic timing equipment in the telecommunications network or by the operator.
- D. Chargeable time does not include time lost because of service faults or defects that are reported to the Telephone Company.
- E. When exchange telephone service used for Interstate IntraLATA Toll Services is directly connected (i.e., not connected through a Multiline Terminating System) at a Customer's premises to a communications system, chargeable time for all classes of service begins when a call from the telecommunications network terminates in or passes through the first multiline terminating system or terminal equipment on that communications system. It is the Customer's responsibility to furnish appropriate answer supervision to the point of connection with the exchange telephone service so that chargeable time may begin.

INTERSTATE INTRALATA TOLL SERVICES

PART 3 - Services and Pricing
SECTION 1 - Services and Pricing (two point) Schedule 1

Original Sheet 1

3.1 Services and Pricing (two point) Schedule 1

3.1.1 Service Classifications and Rates

IITS service is billed \$0.52 per minute plus any additional Service Charges or Surcharges. Following are the applicable Service Charges and Surcharges by region and class of service:

3.2 Rates and Charge Application**Applicable to Midwest Region.****3.2.1 Classes of Service**

- A. Service is offered on a Dial Station, Customer-Dialed Calling Card Station, Operator Station or Person-to-Person basis.
- B. In order to control fraud, the Company may refuse to accept Calling Cards which it determines to be invalid and/or may limit the use of Calling Cards to or from certain areas within the LATA.
- C. The Ameritech PrePaid Calling Card Service schedule is limited to APCC calls made from all end users of local exchange services. Charges will be debited to the card-holder's APCC account.
- D. Dial Station
Only minute rates apply.
- E. Customer-Dialed Calling Card Station, Operator Station and Person-to-Person Minute rates apply in addition to a Service Charge.
- F. Service Charge
A Service Charge applies to each Customer-Dialed Calling Card Station, Operator Station or Person-to-Person call. This charge is added to the minute charges.

3.2.2 Reversal of Charges (Collect Calls)

Collect calls are permissible for all Interstate IntraLATA telephone calls except messages to which Dial Station rates apply.

The regularly established Operator Station or Person-to-Person rates apply.

Operator Assisted Service Charges - Interstate IntraLATA Service - Schedule I

(a) Service Charges

Coin Sent Paid	\$4.60
Collect	\$4.60
Customer-Dialed Calling Card	\$1.15
Operator Calling Card (0-)	\$4.60
Operator Sent Paid	\$4.60
Person-to-Person	\$8.65
Third Number	\$4.60
Payphone Use Charge	\$0.50

3.2.3 Charges Paid for by Coin Deposits in a Public or Semi-Public Coin Telephone

The charge for a call paid for by coin deposit in a public or semi-public coin telephone is the sum, rounded to the nearer multiple of \$.05, of the appropriate Operator-Assisted service period initial and additional minute charges.

3.2 Rates and Charge Application(Cont'd)

3.2.4 Payphone Use Charge

The \$.50 Payphone Use Charge applies to each completed non-sent paid call originating from a payphone. The charge is a cost recovery mechanism that permits the Local Exchange Carrier to recover the cost of per-call compensation to Payphone Service Providers from the end user.

3.2.5 Call Forwarding

Charges

The charges for forwarded calls may be comprised of three charges: two separate message charges; (i) a charge for that portion of the call from the originating station to the call forwarding location, if applicable, (ii) the Dial Station charge for that portion of the call from the call forwarding location to the terminating station designated by the Customer, and (iii) a monthly and a nonrecurring charge for Call Forwarding or Remote Call Forwarding provided by the Telephone Company as set forth in the Telephone Company's General and Local Exchange Service Tariff.

The respective charge for each such portion (i) and (ii), shall be either the rate specified in this guidebook or the rate specified in the Exchange Service Tariff of the Telephone Company, which is applicable for the type of call involved in each portion of the forwarded call.

On a Person-to-Person, Operator Station or Customer-Dialed Calling Card Station call other than collect, the originating subscriber is charged the respective Person-to-Person, Operator Station or Customer-Dialed Calling Card Station rate for the portion covered in (i), preceding. The charge for the portion of the call described in (ii), preceding, is the Dial Station rate and charged to the call forwarding Customer.

On a collect call placed to a call forwarding directory number, the collect charges apply to the portion of the call between the rate center of the originating number and the rate center of the call forwarding location; but the portion between the rate center of the call forwarding location and the terminating rate center of the Customer will be billed at the Dial Station rate.

On a Person-to-Person or collect call that is not accepted, the terminating subscriber will be charged the Dial Station rate in effect for the portion of the call described in (ii), preceding.

3.2.6 APCC IntraLATA Interstate

Charges are uniform for all calls regardless of time of day or distance. Each minute or fraction thereof will constitute one unit.

Rate

APCC IntraLATA Interstate
Per Unit

\$.40

3.2 Rates and Charge Application(Cont'd)**3.2.7 Applicable to Southeast Region****3.2.7.1 General**

This section contains regulations and rates for IILDMTS. Rates, regulations and material in this section are for two-point service only, and apply to dial station, Calling Card, and operator-assisted message services.

3.2.7.2 Application of Charges

The specific factors used to determine the applicable charges for a call are indicated on the respective rate schedules. The following factors are common to all IILDMTS rate schedules in this Section.

3.2.7.3 Charges Paid for by Coin Deposits in a Public or Semi-Public Coin Telephone

When the charges for a call are paid by the depositing of coins in a public or semi-public coin telephone, the total charge for the call is the sum of the appropriate initial period rate and any additional minute(s) charge, rounded to the nearest multiple of \$.05, plus any applicable Service Charge, and tax(es).

3.2.7.4 Call Forwarding

Call Forwarding is an Exchange Service feature offered in certain areas by the Telephone Company. This feature enables Customers to arrange for incoming calls to be automatically forwarded to a different telephone number designated by the Customer. The charges for a forwarded call are as follows:

- A. A charge for the portion of the call from the calling station to the called station (call forwarding number), if applicable.
- B. a charge for the portion of the call from the call forwarding number to the terminating number designated by the Customer.
- C. The respective charge for each such portion in (A) and (B), preceding, is dependent upon the jurisdiction of that portion. Where the call(s) is furnished via the Telephone Company's telecommunications network, for each Interstate Intralata call, the rates specified in this Guidebook apply.

For an Interstate IntraLATA Person-to-Person, Customer-Dialed Calling Card Station, or Operator Station call, other than Collect, the calling station is charged the appropriate Operator Service Charge in addition to the Dial Station rate from this Guidebook for the portion of the call described in (A), preceding. If that portion of the call described in (B), preceding, is interstate, the Dial Station rate from this Guidebook applies and is billed to the call forwarding Customer.

For an Interstate IntraLATA Collect Call placed to a call forwarding number, the Collect Call charges apply to the portion of the call described in (A), preceding, if the call is answered at the terminating number. If the portion of the call described in (B), preceding, is interstate, it will be billed at the Dial Station rate from this Guidebook.

For an Interstate IntraLATA Person-to-Person or Collect Call which is not accepted by a party at the terminating number, for the portion of the call described in (B), preceding, the Dial Station rate in effect in this Guidebook will be charged to the terminating number.

3.2 Rates and Charge Application(Cont'd)

The following applies to calls between stations covered by this schedule.

3.2.7.5 Classes of Service

The Dial Station, Customer-Dialed Calling Card Station, Operator Station, Person-to-Person and Real Time Rated classes of service.

3.2.7.6 Collect Calls

Collect Calls are permissible between all stations except that the Collect Call option is not available for calls to a public or semi-public coin station.

3.2.7.7 Service Charges and Surcharges

A Service Charge is applicable to Customer-Dialed Calling Card Station, Operator Station, Person-to-Person and Real Time Rated calls, and for Busy Line Verifications and Busy Line Interruptions. This charge is in addition to the minute charges applicable to a call. When a call is subject to more than one service charge, only the highest service charge applies.

A Surcharge applies to Operator Station and Person-to-Person calls (as specified in Section 3.2.2, following) in which the Customer has the capability to dial the number, but has the operator dial instead.

3.2.7.8 Application of Service Charges and Surcharges

TYPE OF CALL	OPERATOR SERVICE CHARGE	OPERATOR DIALED SURCHARGE
Dial Station (customer dialed 1+)	No	No
Customer-Dialed Calling Card Station (0+)	Yes	No
Operator Station (customer dialed 0+) collect, billed to third number	Yes	No
Operator Station (operator dialed 0-) collect, billed to third number, sent paid	Yes	Yes
Operator Station (operator dialed 0-) billed to a calling card	Yes	No
Person-to-Person (customer dialed 0+) collect, billed to third number, calling card, sent paid	Yes	No
Person-to-Person (operator dialed 0-) collect, billed to third number, sent paid	Yes	Yes
Person-to-Person (operator dialed 0-) billed to a calling card	Yes	No
Real Time rated (customer dialed 0+) coin paid, time and charges	Yes	No
Real Time rated (operator dialed 0-) coin paid, time and charges	Yes	Yes

3.2 Rates and Charge Application(Cont'd)

If the computed charges include a fraction of a cent, the fraction is rounded down to the next whole cent (e.g., \$1.426 would be rounded down to \$1.42).

3.2.7.9 Service Charges

<u>Classes of Service</u>	Service Charge Per Call
- <u>Customer-Dialed Calling Card Station</u>	
Customer-Dialed/Automated	\$1.15
Customer-Dialed and Operator Assisted	\$2.45
Customer-Dialed-Operator must Assist	\$1.15
- <u>Person-to-Person*</u>	\$6.50
- <u>Operator Station*</u>	
All mileages	\$2.45

*Includes Real Time Rated Calls

3.2 Rates and Charge Application(Cont'd)

3.2.7.9.1 Operator Dialed Surcharge

Applies a surcharge to Operator Station and Person-to-Person rated calls when the Customer has the capability of dialing all the digits necessary to complete a call, but elects to dial only the appropriate operator code ("0") and requests the operator to dial the called station.

In addition to any service charges, the surcharge applies to interstate intraLATA calls. The surcharge does not apply to

- Calls where a Customer cannot otherwise dial the call, due to defective equipment or trouble on the Telephone Company Network,
- calls in which a Telephone Company operator places a call for a calling party who identifies himself/herself as being handicapped and unable to dial the call because of his/her handicap, or
- Telephone Company Calling Card calls.

Operator Dialed Surcharge

	<u>Rate</u>
- per call	\$2.15

3.2.7.9.2 Busy Line Interruption

Provides for Telephone Company operator interruption of a conversation in progress on a called station. A charge applies for each attempt to interrupt regardless of whether or not the called station releases the call. A Busy Line Verification must be made, and its Service Charge incurred, prior to a Busy Line Interruption.

	<u>Service Charge</u>
- per interruption	\$6.50

3.2 Rates and Charge Application(Cont'd)**3.2.8.5 Charges Paid for by Coin Deposits in a Public or Semi-Public Coin Telephone**

The charge for a call paid for coin deposit in a public or semi-public coin telephone is the sum, rounded to the nearest multiple of \$.05, of the appropriate initial period rate and additional period charges.

3.2.8.6 Payphone Use Charge

The Payphone Use Charge is a rate element that applies to completed non-sent paid calls originated from payphones. The charge is a cost recovery mechanism that permits the Local Exchange Carrier to recover the cost of per-call compensation to Payphone Service Providers from the end user.

Payphone Use Charge \$0.50

3.2.8.7 Call Forwarding Charges

The charge for forwarded calls may be comprised of three charges:

two separate message charges: (i) a charge for that portion of the call from the originating station to the call forwarding location, if applicable, (ii) the Dial Station charge for that portion of the call from the call forwarding location to the terminating station designated by the Customer, and (iii) a monthly and a non-recurring charge for Call Forwarding or Remote Call Forwarding provided by the Telephone Company, as set forth in the Telephone Company's General and Local Exchange Service Tariff.

The respective charge for each such portion (i), (ii), shall be either the rate specified in this Guidebook or the rate specified in the Exchange Service Tariff, which is applicable for the type of call involved in each portion of the forwarded call.

On a Person-to-Person, Operator Station or Customer-Dialed Calling Card Station call other than collect, the originating subscriber is charged the respective Person-to-Person, Operator Station or Customer-Dialed Calling Card Station rate for the portion covered in (i), preceding. The charge for the portion of the call described in (ii), preceding, is the Dial Station rate and charged to the call forwarding Customer.

On a collect call placed to a call forwarding directory number, the collect charges apply to the portion of the call between the rate center of the originating number and the rate center of the call forwarding location; but the portion between the rate center of the call forwarding location and the terminating rate center of the Customer will be billed at the Dial Station rate.

On a Person-to-Person or collect call that is not accepted, the terminating subscriber will be charged the Dial Station rate in effect for the portion of the call described in (ii), preceding.

3.2 Rates and Charge Application(Cont'd)

3.2.9 Applicable for Pacific Bell Telephone Company

3.2.9.1 Classes of Service

- A. Service is offered on a Dial Station, Customer-Dialed Calling Card Station, Operator Station or Person-to-Person basis.
- B. In order to control fraud, the Telephone Company may refuse to accept Calling Cards which it determines to be invalid and/or may limit the use of Calling Cards to or from certain countries or areas, including all or part of the United States, Alaska, Hawaii, Puerto Rico or the U.S. Virgin Islands.
- C. Rates are stated in terms of minute rates and service charges

3.2.9.2 Dial Station

Only minute rates apply.

3.2.9.3 Customer-Dialed Calling Card Station, Operator Station and Person-to-Person

Minute rates apply in addition to a Service Charge.

3.2.9.4 Service Charge

A Service Charge applies to each Customer-Dialed Calling Card Station, Operator Station or Person-to-Person call. This charge is added to the minutes charges.

3.2.9.5 Reversal of Charges (Collect Calls)

Collect calls are permissible for all Interstate IntraLATA telephone calls, except messages, to which Dial Station rates apply.

The regularly established Operator Station or Person-to-Person rates apply.

3.2.9.6 Operator Assisted Messages

In addition to the Dial Station-to-Station Rate, the following service charges are applicable:

Service Charges

Classes of service	
- Person-to-Person	\$8.65
- Operator Station (Including Bill To Third Party, Collect, Sent Paid calls and Calling Card)	\$4.60
- Customer-Dialed Calling Card Station	
Customer-Dialed/Automated	\$1.15
Customer-Dialed and Operator Assisted	\$2.45
Customer-Dialed-Operator must Assist	\$2.45

3.2 Rates and Charge Application(Cont'd)

3.2.10 Applicable for Southwest

3.2.10.1 Classes of Service

Interstate IntraLATA - Schedule I service is offered on a Station-to-Station or Person-to-Person basis.

3.2.10.2 Minutes and Service Charges

Rates are stated in terms of minutes and Service Charges based on classes of service, following.

3.2.10.3 Direct Dial Station

Only minute rates apply.

3.2.10.4 Operator Assisted Station-to-Station and Person-to-Person

Minute rates apply in addition to a Service Charge.

3.2.10.5 Operator Assistance Service Charge

An Operator Assistance Service Charge applies to each Operator Assisted Station-to-Station or Person-to-Person call. This charge is added to the initial minute and additional minute charges.

3.2.10.6 Reversal of Charges (Collect Calls)

Collect calls are permissible for all Interstate IntraLATA telephone calls, except messages, to which Direct Dial Station rates apply.

The regularly established Operator Assisted Station-to-Station or Person-to-Person rates apply.

3.2 Rates and Charge Application(Cont'd)**3.2.10.7 Operator Assistance Service Charges**

Station-to-Station Service	
Calling Card	
Non-Automated	4.60
Semi-Automated	2.45
Fully Automated	1.15
Collect	
Non-Automated	4.60
Semi-Automated	4.60
Billed to a Third Number	
Non-Automated	4.60
Semi-Automated	4.60
Sent Paid	
Non-Automated	4.60
Semi-Automated	4.60
Person-to-Person Service	
Non-Automated	8.65
Semi-Automated	8.65

3.2.10.8 Charges Paid for by Coin Deposits in a Public or Semi-Public Coin Telephone

The charge for a call paid for by coin deposit in a public or semi-public coin telephone is the sum, rounded to the nearer multiple of \$.05, of the appropriate service charges, minute rate plus applicable taxes.

Payphone Use Charge

A \$.50 Payphone Use Charge applies to Texas, Arkansas, Kansas, Missouri and Oklahoma, to each Interstate IntraLATA completed non-sent paid call originating from a payphone to compensate payphone service providers.

3.2 Rates and Charge Application(Cont'd)**3.2.10.9 Call Forwarding Charges**

The charges for forwarded calls may be comprised of three charges: (i) a charge for that portion of the call from the originating station to the call forwarding location, if applicable, (ii) the Direct Dial Station charge for that portion of the call from the call forwarding location to the terminating station designated by the Customer, and (iii) a monthly and a non-recurring charge for Call Forwarding or Remote Call Forwarding provided by the Telephone Company, as set forth in the Telephone Company's General and Local Exchange Service Tariff.

The respective charge for each such portion (i) and (ii), shall be either the rate specified in this Guidebook or the rate specified in the Exchange Service Tariff of the Telephone Company, which is applicable for the type of call involved in each portion of the forwarded call.

On a Person-to-Person or Operator Assisted Station-to-Station call other than collect, the originating subscriber is charged the respective Person-to-Person or Operator Assisted Station-to-Station rate for the portion covered in (i), preceding. The charge for the portion of the call described in (ii), preceding, is the Direct Dial Station rate and charged to the call forwarding Customer.

On a collect call placed to a call placed to a call forwarding directory number, the collect charges apply to the portion of the call between the rate center of the originating number and the rate center of the call forwarding location; but the portion between the rate center of the call forwarding location and the terminating rate center of the Customer will be billed at the Direct Dial Station rate.

On a Person-to-Person or collect call that is not accepted, the terminating subscriber will be charged the Direct Dial Station rate in effect for the portion of the call described in (ii), preceding.

3.2 Rates and Charge Application(Cont'd)

3.2.8 Applicable for Nevada Bell Telephone Company

3.2.8.1 Classes of Service

- A. Service is offered on a Dial Station, Customer-Dialed Calling Card Station, Operator Station or Person-to-Person basis.
- B. In order to control fraud, the Telephone Company may refuse to accept Calling Cards which it determines to be invalid and/or may limit the use of Calling Cards to or from certain countries or areas, including all or part of the United States, Alaska, Hawaii, Puerto Rico or the U.S. Virgin Islands.
- C. Charges are for Minute Rates and service charges, as applicable, for the following classes of service:

(1) Dial Station

Only Initial minute and additional minute rates apply.

(2) Customer Dialed Calling Card Station, Operator Station and Person-to-Person

Minute rates apply in addition to a Service Charge.

3.2.8.2 Service Charge

A Service Charge applies to each Customer-Dialed Calling Card Station, Operator Station or Person-to-Person call. This charge is added to the minutes charges.

3.2.8.3 Reversal of Charges (Collect Calls)

Collect calls are permissible for all Interstate IntraLATA telephone calls, except messages to which Dial Station rates apply.

The regularly established Operator Station or Person-to-Person rates apply.

3.2.8.4 Operator Assisted Messages

In addition to the Dial Station-to-Station Rate, the following service charges are applicable:

Service Charges

Classes of service	
- Person-to-Person	\$8.65
- Operator Station	\$4.60
- Customer-Dialed Calling Card Station	
Customer-Dialed/Automated	\$1.15
Customer-Dialed and Operator Assisted	\$2.45
Customer-Dialed-Operator must Assist	\$2.45

3.3 Directory Assistance**3.3.1 Applicable to Midwest****3.3.1.1 Directory Assistance Charge**

- A. Applies to all calls made from points within the LATA to interstate Directory Assistance. Up to two requests may be made on each call to Directory Assistance. The Directory Assistance Charge applies whether or not the Directory Assistance Bureau furnishes the requested telephone number(s) (e.g., where the requested telephone number is unlisted, non-published or no record can be found) and Directory Assistance personnel cannot complete a call to a requested telephone number. A Complementary Call Allowance may apply as specified in (2), following.
- B. Operator Service Charges (i.e., Operator Station, Customer-Dialed Calling Card Station) do not apply to calls to Directory Assistance. Person-to-Person or Collect Calls to Directory Assistance are not permitted.

(1) Rate

- Per call \$1.99

(2) Complimentary Call Allowance

Directory Assistance Customers will be entitled to up to two free Directory Assistance calls per billing period for each main billed account when at least the same number of interstate IITS calls provided by this Company are also billed to that main billed account during that billing period. Calls to Directory Assistance or IITS calls originated at a public or a semi-public coin phone for which the charges are paid by depositing coins, or IITS calls originated at and charged to a hotel, motel, or hospital guest extension are not counted for purposes of determining the Complimentary Call Allowance. The Complimentary Call Allowance will be determined at the end of the billing period and will be applied to the Customer's bill for that billing period. A Complimentary Call cannot be carried forward for application to the next bill, or applied retroactively to a previous bill.

(3) Handicapped Exemption

Those handicapped Customers who qualify for exemptions from local Directory Assistance charges under Local Exchange Company tariff(s) or in the absence of a local Directory Assistance charge plan, receive special rates on other Local Exchange Company services, and are exempted from the interstate Directory Assistance Charge. This exemption applies only to calls to Directory Assistance which are billed to the handicapped Customer's residence telephone number.

(4) Credit Allowance

A credit will be given for calls to Directory Assistance when:

- the Customer experiences poor transmission or is cut-off during the call,
- the Customer is given an incorrect telephone number, or
- the Customer inadvertently misdials (e.g., the caller dialed 202-555-1212 when they intended to dial 201-555-1212).

To receive the credit, the Customer must notify a Company operator or Business Office of the problem experienced.

3.3 Directory Assistance**3.3.2 Applicable for Nevada Bell Telephone Company****3.3.2.1 Directory Assistance Charge**

- A. Applies to all calls made from points within the LATA Directory Assistance. Up to two requests for listings within the area code dialed may be made on each call to Directory Assistance. Two listings will be provided only when the listing information is accessible to the Directory Assistance Operator that handles the request. The Directory Assistance Charge applies whether or not the Directory Assistance bureau furnishes the requested telephone number(s) (e.g., where the requested telephone number is unlisted, non-published or no record can be found) and Directory Assistance personnel cannot complete a call to a requested telephone number.
- B. A Directory Assistance Charge will be the only charge applied to a call to Directory Assistance. Operator Service Charge (i.e., Operator Station, Customer-Dialed Calling Card Station) do not apply to calls to Directory Assistance. Person-to-Person or Collect Calls to Directory Assistance are not permitted.
- (1) Rate
- per call \$1.99
- (2) Handicapped Exemption - These handicapped Customers who qualify for exemptions from local Directory Assistance charges under Local Exchange Company tariff(s), or in the absence of a local Directory Assistance charge plan, receive special rates on other Local Exchange Company Services, and are exempted from the interstate Directory Assistance Charge. This exemption applies only to calls to Directory Assistance which are billed to the handicapped Customer's residence telephone number.
- (3) Credit Allowance - A credit will be given for calls to Directory Assistance when:
- the Customer experiences poor transmission or is cut-off during the call,
 - the Customer is given an incorrect telephone number, or
 - the Customer inadvertently misdials (e.g., the caller dialed 202+555-1212 when they intended to dial 201+555-1212).

To receive the credit allowance, the Customer must notify a Company operator or Business Office of the problem experienced.

3.3 Directory Assistance**3.3.3 Applicable for Southwest****3.3.3.1 Directory Assistance Charge***

- A. Applies to all Interstate IntraLATA calls made to interstate Directory Assistance from points within the LATA to obtain a telephone number(s) within the same LATA. Up to two requests may be made on each call to Directory Assistance. The Directory Assistance Charge applies whether or not the Directory Assistance bureau furnishes the requested telephone number(s) (e.g., where the requested telephone number is unlisted, non-published or no record can be found), and Directory Assistance personnel cannot complete a call to a requested telephone number. A Complimentary Call Allowance may apply as specified in (B) following.
- B. Operator Assistance Service Charges (i.e., Calling Card, Billed to a Third Number) do not apply to calls to Directory Assistance. Person-to-Person or Collect Calls to Directory Assistance are not permitted.
- (1) Rate
- per call \$1.99
- (2) Complimentary Call Allowance - Directory Assistance Customers will be entitled to up to two free Directory Assistance calls per billing period for each main billed account when at least the same number of IITS calls provided by this Company are also billed to that main billed account during that billing period. Calls to Directory Assistance, or IITS calls originated at a public or semi-public coin phone for which the charges are paid by depositing coins, or IITS calls originated at and charged to a hotel, motel, or hospital guest extension are not counted for purposes of determining the Complimentary Call Allowance. The Complimentary Call Allowance will be determined at the end of the billing period, and will be applied to the Customer's bill for that billing period. A Complimentary Call cannot be carried forward for application to the next bill or applied retroactively to a previous bill.
- (3) Disabled Exemption - Those disabled Customers who qualify for exemptions from local Directory Assistance charges under Local Exchange Company tariff(s), or in the absence of a local Directory Assistance charge plan, receive special rates on other Local Exchange Company services, and are exempted from the Interstate IntraLATA Directory Assistance Charge. This exemption applies only to calls to Directory Assistance which are billed to the disabled Customer's residence telephone number.
- (4) Credit Allowance - A credit allowance will be given for calls to Directory Assistance when:
- the Customer experiences poor transmission or is cut-off during the call,
 - the Customer is given an incorrect telephone number, or
 - the Customer inadvertently misdials (e.g. the caller dialed 315-555-1212 when they intended to dial 314-555-1212).

To receive the credit allowance, the Customer must notify a Company operator or Business Office of the problem experienced.

* Interstate IntraLATA Service Rates and Charges will be assessed by Concurring Carriers listed in Section 3.3.1 (A), following.

3.4 Optional Calling Plans**Applicable for Midwest**

Optional Calling Plans provide unique terms, conditions, and rates for Interstate IntraLATA Message Telecommunications Service in lieu of the rates set out in Section 3.1 of this Guidebook.

3.4.1 Enhanced Ameritech ValueLink Plus Service**A. Description**

Enhanced Ameritech ValueLink Plus Service is an optional calling plan service that combines outbound, toll free inbound, and Ameritech calling card types of intraLATA long distance usage into a single simplified calling plan.

B. Terms and Conditions

In addition to the regulations set forth in other portions of this Guidebook, the following terms and conditions apply to this service.

- (1) Enhanced Ameritech ValueLink Plus prices apply to Customer-Dialed Station-to-Station and calling card intraLATA long distance usage. The Service may be provided on the Customer's main telephone account and on any other accounts billed under the main account. Operator Service Charges for Calling Card calls are not included with this service.
 - (a) Enhanced Ameritech ValueLink Plus prices are not applicable to IntraLATA long distance usage that is originated (outbound) or terminated (toll free inbound) on a FlexLine basic exchange access line.
- (2) Enhanced Ameritech ValueLink Plus is available to business end users of local exchange service (excluding Coin and Semi-Public).
- (3) Enhanced Ameritech ValueLink Plus cannot be combined with any other optional calling plan.
- (4) Enhanced Ameritech ValueLink Plus is available on a month-to-month, twelve (12), twenty-four (24), or thirty-six (36) month term plan.
- (5) Enhanced Ameritech ValueLink Plus provides the following features:
 - (a) Price Protection which guarantees no price increases for the duration of the 12, 24, or 36 month term plan. Price protection is not provided for the month-to-month plan.
 - (b) Agreement Upgrade which allows the Customer to upgrade to longer term and / or larger volumes at lower prices, per the plan price schedule.
 - (c) Ninety-day Customer satisfaction guarantee that allows new Enhanced Ameritech ValueLink Plus Customers to cancel their agreement without incurring termination liability charges. This satisfaction guarantee does not apply to Customers that terminate an Ameritech agreement or convert from another Ameritech Toll term product to subscribe to Enhanced Ameritech ValueLink Plus.

3.4 Optional Calling Plans (Cont'd)

- (6) Enhanced Ameritech ValueLink Plus offers a variety of monthly usage package options. These usage package options represent different levels of Minimum Monthly Usage Commitment (MMUC) or Minimum Annual Usage Commitment (MAUC), per account, from which Customers may choose. The monthly usage package option selected by the Customer will be the minimum monthly usage charge for the service at the payment plan selected by the Customer. Ameritech intraLATA long distance usage will be used to determine whether the total commitment level has been met.
- (7) The Enhanced Ameritech ValueLink Plus MMUC and MAUC, per account, per usage package option, and per minute prices are set forth following.
- (8) Enhanced Ameritech ValueLink Plus usage is billed in initial increments of eighteen (18) seconds, and additional increments of six (6) seconds or fraction thereof.
- (9) No service charges are applicable to establish or change to Enhanced Ameritech ValueLink Plus.

C. Common Line 800 Service Component

This component of Enhanced Ameritech ValueLink Plus Service is a Common Line Termination routing feature. It provides for the termination of intraLATA 800 calls on Customer access lines. IntraLATA calls are completed by the Telephone Company and interLATA calls are completed by Interexchange Carriers.

(1) Terms and Conditions:

- (a) Interstate/intralata Common Line 800 Service is offered only in association with Enhanced Ameritech ValueLink Plus Service, and is not available on a stand-alone basis.
- (b) Enhanced Ameritech ValueLink Plus Customers that subscribe to an Intrastate/IntraLATA Common Line 800 Service are not required to separately subscribe to Interstate/IntraLATA Common Line 800 Service. Enhanced Ameritech ValueLink Plus Service will provide Common Line 800 Service coverage and functionality within the entire LATA.
- (c) Customers may retain the same Common Line 800 Service telephone number when moving to another location.
- (d) Common Line 800 Service is not available on semi-public, public, or Customer Owned Coin Operated Telephone (COCOT) service.
- (e) Common Line 800 Service provides for termination of calls only.
- (f) Common Line 800 Service is only available where facilities permit.

3.4 Optional Calling Plans (Cont'd)

(2) Inbound Optional Features:

- (a) Time of Day Routing - Allows inbound calls to be routed to a different location based on the time of day.
- (b) Day of Week Routing - Allows inbound calls to be routed to a different location based on the day of the week.
- (c) Specific Dates Routing - Allows inbound calls to be routed to a different location based on a specific date.
- (d) Original Location Routing - Allows inbound calls originating in a predefined NPA NXX, or where facilities permit, a ten-digit telephone number, to be routed to a given destination while other calls complete to another destination.
- (e) Specialized Area of Service Routing - Allows Enhanced Ameritech ValueLink Plus Customers to define a geographic location from which to accept inbound calls. This area must be defined as other than a single NPA or the entire LATA.
- (f) Dialed Number Identification Service (DNIS) - Allows Customers with more than one inbound number termination in one switch to route calls by number to the appropriate person(s) or department.

(3) Rates and Charges:

- (a) No service charges are applicable to establish the Common Line 800 Service associated with Enhanced Ameritech ValueLink Plus Service.
- (b) Usage prices, as specified in Section 3.4.1 (D), of this Guidebook, apply to all Common Line 800 Service inbound calls associated with Enhanced Ameritech ValueLink Plus Service.
- (c) Non-recurring charges, as specified in Section 3.4.1 (D) of this Guidebook, may apply to the Common Line 800 Service Inbound Optional Features associated with Enhanced Ameritech ValueLink Plus Service.

(d) Price (cont'd)

Nonrecurring Charge*

1. Inbound Optional Features	\$82.50
------------------------------	---------

* NOTE: This charge does not apply when these features are established at the same time as an Enhanced Ameritech ValueLink Plus 12, 24, or 36 Month Plan.

3.4 Optional Calling Plans (Cont'd)

(d) Prices (cont'd)

2. Payment Plans:

Enhanced Ameritech ValueLink Plus is available on a month-to-month, twelve, twenty-four, or thirty-six month term plan.

A. Month-to-Month:

The month-to-month term plan requires a Minimum Monthly Usage Commitment (MMUC). The MMUC is a minimum usage level that a Customer must commit to, per month, per account, in order to receive the discounted per minute price. If the total Enhanced Ameritech ValueLink Plus usage charges are below the MMUC in any given month, the full amount of the applicable MMUC will apply in lieu of the actual usage charges. The MMUC will not be enforced in the first bill period. Customers will be given one billing cycle to attain their MMUC level.

B. Term Payment Plans:

The twelve, twenty-four, and thirty-six month term plans require Minimum Annual Usage Commitments (MAUC). The MAUC is a minimum usage level that a Customer must commit to per year, per account, in order to receive the discounted per minute price. If the total Enhanced Ameritech ValueLink Plus usage charges are below the MAUC in any given year, then the remaining balance of the MAUC will apply.

C. Termination Charges:

Customers who terminate their twelve, twenty-four, or thirty-six month plans before the expiration date of the agreement will be billed a termination liability, which consists of a lump sum equal to the MAUC times the number of years, or fraction thereof, remaining on the agreement.

At the expiration of the selected Enhanced Ameritech ValueLink Plus term, if the Customer does not expressly indicate election of a new term plan, the rates will revert to the highest Enhanced Ameritech ValueLink Plus Month-to-Month per minute rate.

3.4 Optional Calling Plans (Cont'd)**3.4.2 The Anytime Rate Calling Plan****3.4.2.1 Description**

The Anytime Rate Calling Plan is an optional plan that provides residence Customers with a simplified Interstate IntraLATA Toll pricing option. The Anytime Rate Calling Plan consists of a fixed price per minute and a monthly price in certain states. The fixed per minute price is not time-of-day or distance sensitive.

3.4.2.2 Terms and Conditions

The terms and conditions contained herein are specific to the service, and are in addition to the regulations set forth in other portions of this Guidebook.

- (A) The Anytime Rate Calling Plan is only available to residence Customers.
- (B) The Anytime Rate Calling Plan is not available on ISDN lines.
- (C) The Anytime Rate Calling Plan is applicable to Customer-Dialed Station-to-Station calls only. Operator handled and Customer-Dialed credit card calls are not included.
- (D) The Anytime Rate Calling Plan is available in all Ameritech exchanges, however, it is applicable only to Interstate IntraLATA Toll calls.
- (E) The Anytime Rate Calling Plan cannot be combined with any other optional calling plan on the same line.
- (F) The Anytime Rate Calling Plan is available on a per account basis.
- (G) No Service Charges are applicable to establish or change the Anytime Rate Calling Plan.
- (H) The Anytime Rate Calling Plan is available in Illinois,* Indiana, Michigan, Ohio, and Wisconsin.

3.4.2.3 Prices

Anytime Rate Calling Plan	Monthly Price	Price Per Minute, or fraction thereof
IL*	\$0	\$0.05
IN	\$7.95	\$0.07
OH	\$2.95	\$0.07
MI	\$4.95	\$0.10
WI	\$4.95	\$0.07

* The Anytime Rate Calling Plan option will no longer be available for new Customers in Illinois on or after, November 18, 2003. There will be no change to existing Customers.

3.4 Optional Calling Plans (Cont'd)**3.4.3 Anytime Rate Calling Plan II****3.4.3.1 Description**

Anytime Rate Calling Plan II is an optional calling plan that offers residence Customers a simplified Interstate IntraLATA Toll pricing option. Anytime Rate Calling Plan II consists of fixed price per minute which is not time-of-day or distance sensitive.

3.4.3.2 Terms and Conditions

The terms and conditions contained herein are specific to the service, and are in addition to the regulations set forth in other portions of this Guidebook.

- (A) Anytime Rate Calling Plan II is available to residence Customers and is offered in conjunction with The Anytime Rate Calling Plan II offered on an Intrastate IntraLATA basis out of Ameritech's Message Toll Services Tariff.
- (B) Anytime Rate Calling Plan II is not available on ISDN lines.
- (C) Anytime Rate Calling Plan II is applicable to Customer-Dialed Station-to-Station calls only. Operator handled and Customer-Dialed credit card calls are not included.
- (D) Anytime Rate Calling Plan II cannot be combined with any other optional calling plan on the same line.
- (E) Anytime Rate Calling Plan II is available on a per account basis.
- (F) No Service Charges are applicable to establish or change the Anytime Rate Calling Plan II.
- (G) Anytime Rate Calling Plan II is available in Indiana, Michigan, Ohio, and Wisconsin.

3.4 Optional Calling Plans (Cont'd)**3.4.4 Ameritech CompleteLink Service****3.4.4.1 Description**

Ameritech CompleteLink Service is an optional calling plan service that combines outbound, toll free inbound, and Ameritech calling card types of intraLATA long distance usage into a single simplified calling plan.

3.4.4.2 Terms and Conditions

In addition to the regulations set forth in other portions of this Guidebook, the following terms and conditions apply to this service:

- (A) Ameritech CompleteLink prices apply to Customer-Dialed Station-to-Station and calling card intraLATA long distance usage. Operator Service Charges for Calling Card calls are not included with this service.
- (B) Ameritech CompleteLink is available to business end users of local exchange services (excluding Coin and Semi-Public).
- (C) Ameritech CompleteLink cannot be combined with any other optional calling plan.
- (D) Ameritech CompleteLink usage is billed in initial increments of eighteen (18) seconds, and additional increments of six (6) seconds or fraction thereof.
- (E) No service charges are applicable to establish or change to Ameritech CompleteLink.
- (F) Ameritech CompleteLink is available on a one (1), three (3) or five (5) year Term Plan.
- (G) At the expiration of the selected Ameritech CompleteLink term, if the Customer does not indicate election of a new term plan, the rates will revert to the highest Ameritech CompleteLink per minute rate.
- (H) Specific to this Guidebook, Ameritech CompleteLink Customers who terminate their one, three or five year Term Plan before the expiration date of the agreement will not be subject to termination charges.

3.4.4.3 Common Line 800 Service Component

This component of Ameritech CompleteLink Service is a Common Line Termination routing feature. It provides for the termination of intraLATA 800 calls, on Customer access lines. IntraLATA calls are completed by the Telephone Company, and interLATA calls are completed by Interexchange Carriers.

(1) Terms and Conditions:

- (a) Interstate/IntraLATA Common Line 800 Service is offered only in association with Ameritech CompleteLink Service, and is not available on a stand-alone basis.

3.4 Optional Calling Plans (Cont'd)

- (b) Ameritech CompleteLink customers that subscribe to an intrastate/intraLATA Common Line 800 Service are not required to separately subscribe to interstate/intraLATA Common Line 800 Service. Ameritech CompleteLink Service will provide Common Line 800 Service coverage and functionality within the entire LATA.
 - (c) Customers may retain the same Common Line 800 Service telephone number when moving to another location.
 - (d) Common Line 800 Service is not available on semi-public, public, or Customer Owned Coin Operated Telephone (COCOT) service.
 - (e) Common Line 800 Service provides for termination of calls only.
- (2) Inbound Optional Features:
- (a) Time of Day Routing - Allows inbound calls to be routed to a different location based on the time of day.
 - (b) Day of Week Routing - Allows inbound calls to be routed to a different location based on the day of the week.
 - (c) Specific Dates Routing - Allows inbound calls to be routed to a different location based on a specific date.
 - (d) Original Location Routing - Allows inbound calls originating in a predefined NPA NXX, to be routed to a given destination while other calls complete to another destination.
 - (e) Specialized Area of Service Routing - Allows Ameritech CompleteLink Customers to define a geographic location from which to accept inbound calls. This area must be defined as other than a single NPA or the entire LATA.
 - (f) Dialed Number Identification Service (DNIS) - Allows Customers with more than one inbound number termination in one switch to route calls by number to the appropriate person(s) or department.
- (3) Rates and Charges:
- (a) No service charges are applicable to establish the Common Line 800 Service associated with Ameritech CompleteLink Service.
 - (b) Usage prices, as specified in Section 3.4.4 (D) of this Guidebook, apply to all Common Line 800 Service inbound calls associated with Ameritech CompleteLink Service.
 - (c) Non-recurring charges, as specified in Section 3.4.4 (D) of this Guidebook, may apply to the Common Line 800 Service Inbound Optional Features associated with Ameritech CompleteLink Service.

3.4.5 Ameritech Saver Plus

3.4.5.1 Description

Ameritech Saver Plus is an optional plan that provides residence Customers with a simplified Interstate IntraLATA Toll pricing option. Ameritech Saver Plus consists of a fixed price per minute of use for Interstate IntraLATA Toll calls. Ameritech Saver Plus is available to residence Customers who had their Interstate IntraLATA Toll usage with Ameritech, went to another carrier for their Interstate IntraLATA Toll usage, and now wish to return their Interstate IntraLATA Toll usage to Ameritech. The fixed price is not time-of-day or distance sensitive.

3.4.5.2 Terms and Conditions

The terms and conditions contained herein are specific to the service, and are in addition to the regulations set forth in other portions of this Guidebook.

- A. Ameritech Saver Plus is available to Ameritech's residence Customers who had their Interstate IntraLATA Toll usage with Ameritech, went to another carrier for their Interstate IntraLATA Toll usage, and now wish to return their Interstate IntraLATA Toll usage to Ameritech.
- B. Ameritech Saver Plus is not available on ISDN lines.
- C. Ameritech Saver Plus is applicable to Customer-Dialed Station-to-Station calls only. Operator-handled and Customer-Dialed credit-card calls are not included.
- D. Ameritech Saver Plus is only available for Interstate IntraLATA Tolls originating in Indiana, Michigan, Ohio, Illinois, and Wisconsin.
- E. Ameritech Saver Plus cannot be combined with any other optional calling plan on the same line.
- F. Ameritech Saver Plus is available on a per account basis.
- G. No service charges are applicable to establish or change to Ameritech Saver Plus.

3.4 Optional Calling Plans (Cont'd)**3.4.6 Saver Packs and Solution Packages - Special Usage Rate****3.4.6.1 Description**

The Saver Packs and Solution Packages - Special Usage Rate provides residence Customers with a simplified Interstate IntraLATA Toll pricing option which consists of a fixed price per minute of use for Interstate IntraLATA Toll calls. The fixed price is not time-of-day or distance sensitive. The Saver Packs and Solution Packages - Special Usage Rate is available to residence Customers who subscribe to the Saver Pack 60, Saver Pack 200, or Saver Pack 500 plans. These three optional plans provide Customers a simplified pricing option that consists of a single monthly rate for a specified number of Intrastate IntraLATA usage minutes per month and a single per minute of use rate for usage over 60 minutes, 200 minutes and 500 minutes, respectively. The Saver Packs and Solution Packages - Special Usage Rate is also available to residence Customers who subscribe to any one of the Economy Local, Sensible Local, Complete Local, or 2-Line Complete Local Solution Packages.

3.4.6.2 Terms and Conditions

The terms and conditions contained herein are specific to the service, and are in addition to the regulations set forth in other portions of this Guidebook.

- A. The Saver Packs and Solution Packages - Special Usage Rate is not available on ISDN lines.
- B. The Saver Packs and Solution Packages - Special Usage Rate is applicable to Customer-Dialed Station-to-Station calls only. Operator-handled and customer-dialed credit-card calls are not included.
- C. The Saver Packs and Solution Packages - Special Usage Rate cannot be combined with any other optional calling plan, except those listed above, on the same line.
- D. The Saver Packs and Solution Packages - Special Usage Rate is available on a per account basis.
- E. No service charges are applicable to establish or change to The Saver Packs and Solution Packages - Special Usage Rate.
- F. The Saver Packs and Solution Packages - Special Usage Rate is only available for Interstate IntraLATA Toll originating in the State of Illinois.

3.4 Optional Calling Plans (Cont'd)**3.4.7800/888 Toll Free Service****3.4.7.1 Description**

This Service is a Common Line Termination routing feature. It provides for the termination of Interstate IntraLATA 800/888 calls on Customer access lines. Calls must originate and terminate within the same LATA. The access lines can be provisioned to both originate and terminate calls (Common Line); the 800/888 Service pertains only to call termination. Customers subscribing to Common Line service must obtain local exchange access service, and provide the line number to which the calls should be routed.

3.4.7.2 Terms and Conditions:

The regulations contained herein are specific to this service, and may be in lieu of as well as in addition to the regulations set forth in Section 2 of this Guidebook.

- (A) Customers may retain the same 800/888 telephone number when moving to another location.
- (B) 800/888 is not available on semi-public, public, or Customer Owned Coin Operated Telephone (COCOT) service.
- (C) 800/888 provides for termination of direct dialed calls only. A direct dialed call is a call dialed and completed to an 800/888 Service Common Line Termination access line without the assistance of a Company operator, or placed with an operator where facilities are not available for dial completion, or where, for other service reasons, operator assistance in completion of the call is necessary.
 - (1) 800/888 Service does not include collect, conference, person-to-person, or other calls requiring operator assistance, except as provided in the preceding paragraph.
- (D) 800/888 is available only in Ameritech rate centers specified in Section 3.1 (B), of this Guidebook.
- (E) The minimum service period is one month.
- (F) Purchasers of 800/888 Service shall not use any 800/888 Service in a manner that would result in:
 - (1) The calling party or the subscriber to the originating line being assessed, by virtue of completing the call, a charge for a call;
 - (2) The calling party being connected to a pay-per-call service;
 - (3) The calling party being charged for information conveyed during the call unless:
 - (a) The calling party has a written agreement (including an agreement transmitted through electronic medium) that specifies the material terms and conditions under which the information is offered and includes:

-
- (i) The rate at which charges are assessed for the information;
 - (ii) The information provider's name;
 - (iii) The information provider's business address;
 - (iv) The information provider's regular business telephone number;
 - (v) The information provider's agreement to notify the subscriber at least one billing cycle in advance of all future changes in the rates charged for the information;
 - (vi) The subscriber's choice of payment method, which may be by direct remit, debit, prepaid account, phone bill, or credit or calling card and, if a subscriber elects to pay by means of phone bill, a clear explanation that the subscriber will be assessed for calls made to the information service from the subscriber's phone line;
 - (vii) A unique personal identification number or other subscriber-specific identifier that must be used to obtain access to the information service and instructions on its use, and, in addition, assures that any charges for services accessed by use of the subscriber's personal identification number or subscriber-specific identifier be assessed to subscriber's source of payment elected pursuant to paragraph 3.4.7.2(F)(3)(a)(iv) of this section; or
- (b) The calling party is charged for the information by means of a credit, prepaid, debit, charge, or calling card and the information service provider includes in response to each call an introductory message that
- (i) Clearly states that there is a charge for the call;
 - (ii) Clearly states the service's total cost per minute and any other fees for the service or for any service to which the caller may be transferred;
 - (iii) Explains that the charges must be billed on either a credit, prepaid, debit, charge, or calling card;
 - (iv) Asks the caller for the card number;
 - (v) Clearly states that charges for the call begin at the end of the introductory message; and
 - (vi) Clearly states that the caller can hang up at or before the end of the introductory message without incurring any charge whatsoever.
- (4) The calling party being called back collect for the provision of audio or data information services, simultaneous voice conversation services, or products; and

-
- (5) The calling party being assessed, by virtue of the caller being asked to connect or otherwise transfer to a pay-per-call service, a charge for the call except as allowed pursuant to the Rules of the Federal Communications Commission.
- (a) 800/888 Service used to provide pay-per-call programs not in compliance with Section 64.1504 of the Rules of the Federal Communications Commission will be terminated by the Telephone Company upon written notice to the customer.
- (b) Charges for a fraction of a month are determined by dividing the monthly rate by 30 to obtain a daily rate. That rate is multiplied by the number of days service is provided. Usage charges will be billed as specified in paragraphs D and E, following.
- (c) Interstate IntraLATA Toll Services (IITS) furnished at a Customer's request when the Customer's 800/888 Service is interrupted is charged for at the (IITS) rates shown in Section 3 of this tariff.
- (d) Allowance for interruptions applies to each 800/888 Service number as set forth in (1) through (3) following:
- (1) When the Company's service is interrupted and the interruption exceeds the appropriate qualification period of 12 hours (as measured from the time the interruption is reported to or detected by the Telephone Company, whichever occurs first), a credit allowance will be made, at the Customer's request, for the Telephone Company's service which is rendered useless and inoperative due to the interruption.
 - (2) The credit allowance will be based upon the ratio of the duration of the service interruption (measured from the time the interruption is reported to or detected by the Company, whichever occurs first, and expressed in multiples of 24 hours) to the total time in a 30-day month. The ratio, multiplied by the monthly charge for the Telephone Company's service affected shall determine the amount of the credit allowance. No other liability shall attach to the Telephone Company in consideration of such interruption to service.
 - (3) None of the above credit allowances will be made for:
 - Non-completion of 800/888 Service messages due to busy network conditions,
 - Interruption of the Telephone Company's service due to Customer-provided equipment or systems,
 - Interruption of the Telephone Company's service due to the negligence or willful act of the Customer,
 - Interruption of the Telephone Company's service during any period in which the Telephone Company is not afforded access to the premises at which the 800/888 Service is terminated, or
 - Interruption of the Telephone Company's service during any period when the Customer has released the 800/888 Service to the Telephone Company for maintenance purposes, or implementation of a Customer order for a change in service arrangement.
-

3.4 Optional Calling Plans (Cont'd)

(B) Terms and Conditions: (Cont'd)

- (E) 800/888 Service is furnished upon condition that the Customer obtain adequate lines to permit use of this service without injurious effect upon it or any other service rendered by the Company. This requirement refers to the local exchange service lines to which the Common Line Termination Service terminates.

The Telephone Company may terminate or refuse to furnish 800/888 Service to any Customer if the use of the service would interfere with or impair any other service rendered by the Telephone Company.

The Telephone Company will notify the Customer, at least five days in advance, by telephone or in writing that disconnection of the service may be required; however, where an emergency condition exists or is threatened and prior notice is not practicable, nothing contained herein shall be deemed to preclude the Telephone Company's right to temporarily suspend the service without notice to the Customer if the Telephone Company determines that such action is necessary under the circumstances. In case of such temporary suspension, the Customer will be notified promptly and afforded the opportunity to correct the condition which gave rise to the suspension. During such period of temporary suspension, credit allowance for service interruptions as set forth in 3.4.7.2.(F)(5)(d), preceding, is not applicable.

- (F) 800/888 Service may be assigned or transferred; provided there is no interruption of the service or relocation of the service outside of the LATA served by the Telephone Company subject to the following conditions:

- (1) The assignment or transfer may be made to any person, partnership, association or corporation, or to a receiver, trustee or other person appointed by a court or acting pursuant to law in bankruptcy, receivership, reorganization, insolvency, liquidation or other similar proceedings, provided the assignee or transferee complies with all provisions of this Guidebook and assumes all outstanding indebtedness for such service and the unexpired portion of the initial service period applicable, if any; and
- (2) The assignee or transferee shall obtain and provide to the Telephone Company the written consent of the subscriber from whom the service is transferred. In addition, the transferee or assignee shall, upon request, provide written acceptance of responsibility for all outstanding charges, if any; and
- (3) The legal rights and financial responsibility of the assignee or transferee are established to the satisfaction of the Telephone Company.

3.4.7.3 Inbound Optional Features:

- A. Time of Day Routing - Allows inbound calls to be routed via either a different carrier or to a different location based on the time of day.
- B. Day of Week Routing - Allows inbound calls to be routed to a different location based on the day of the week, or have calls routed to a different carrier based on the day of the week.

3.4 Optional Calling Plans (Cont'd)

- (C) Specific Dates Routing - Allows inbound calls to be routed to a different location based on a specific date, or to have calls routed to a different carrier based on a specific date.
- (D) Original Location Routing - Allows inbound calls originating in a predefined NPANXX or a ten digit telephone number, to be routed to a given destination while other calls complete to another destination.
- (E) Percent Allocation - allows customers to route their calls over several carriers using a predefined percentage split.
- (F) Specialized Area of Service Routing - Allows customers to define a geographic location from which to accept inbound calls. This area must be defined as other than a single NPA or the entire LATA.

3.4.7.4 Rates and Charges:

Rates are subject to subsequent adjustment, effective retroactively in light of USTA v. FCC, (Case No. 97-1469) (slip. op. May 21, 1999) (D.C. Cir.), or pursuant to pending motions or petitions or any other adjustment pursuant to a Commission or court order.

- A. No Service charges are applicable to establish Common Line 800/888 Service.
- B. Usage prices, as specified in Section 3.2 (E) of this Guidebook, apply to all 800/888Service inbound calls.
- C. Method of determining usage charges

- (1) Determine the total actual hours used for the service group, rounded to the nearest .1 hours. A service group denotes the arrangement of one or more access lines, as designated by a Customer, for the same service area, terminated at the same premises.
- (2) Determine the total number of completed calls for the service group.
- (3) Determine the total hours used for each service group. Apply the Minimum Average Time Requirement (MATR), stated below, multiplied by the number of calls completed in each service group, divided by 360. The time billed will be the higher of the total actual hours or the MATR calculation.

MATR

Illinois	30 seconds
Indiana	15 seconds
Michigan	15 seconds
Ohio	15 seconds
Wisconsin	1 second

- (4) Determine the usage charge for the service group by multiplying the hourly rate by the number of hours.

3.4 Optional Calling Plans (Cont'd)

D. Timing of Calls

(1) Chargeable time begins when connection is established between a station associated with the 800/888 Service and the calling station, and ends when the calling station "hangs up," thereby releasing the network connection. If the called station "hangs up" but the call station does not, chargeable time ends when the network connection is released by automatic timing equipment in the telecommunications network.

(2) When 800/888 Service is directly connected to a communications system at a Customer's premises, chargeable time begins when the 800/888 Service call terminates in or passes through the first Customer premises equipment on that communications system. It is the Customer's responsibility to furnish appropriate answer supervision to the point of connection with the 800/888 Service so that chargeable time may begin. Chargeable time ends as in (D) (2), above.

3.4.7.5 Prices

COMMON LINE
Per 800/888 Number

State	Monthly Rate*	Additional Hour of use
Illinois	\$20.00	\$20.00
Indiana	20.00	20.00
Michigan	21.00	21.00
Ohio	20.00	20.00
Wisconsin	20.00	20.00

* Included one hour of usage

3.4 Optional Calling Plans (Cont'd)

3.4.8 Applicable for Southwest

3.4.8.1 IntraLATA 800 Usage*

A. Description - IntraLATA 800 usage results from calls using the dialing code 1-800-NXX-XXXX, where the call is carried by the Telephone Company and originates and terminates within the same LATA. The charges for the call are billed to the terminating party, and there is no charge by the Telephone Company to the party that originated the call.

B. Charges for IntraLATA 800 Usage - The following charges apply to intraLATA 800 usage terminating on a local exchange line:

	<u>USOC</u>	<u>Monthly charge</u>
1. Business		
a. Common Line 800 service (in addition to the rate for the exchange telephone service) per 800 number		
1 or 2 Terminations	WFA	\$5.00
3 to 10 Terminations	WFA	\$5.00
Over 10 Terminations	WFA	\$5.00
		<u>Per Minute Rate</u>
b. IntraLATA Usage Rates		
I. Per Minute Plan		\$0.15
		<u>Initial Period</u>
II. 2 hour Block Plan		\$15.00
III. 5 Hour Block Plan		\$30.00
2. Residence		
a. Common Line 800 service (in addition to the rate for the exchange telephone service) per 800 number		
1 or 2 Terminations	WFA	\$3.95
3 to 10 Terminations	WFA	\$3.95
Over 10 Terminations	WFA	\$3.95
		<u>Per Minute Rate</u>
b. IntraLATA Usage Rates		\$0.15
I. Per Minute Plan		<u>Initial Period</u>
II. 2 hour Block Plan		\$15.00
III. 5 Hour Block Plan		\$30.00

3.4.8.2 Optional Calling Plan

Optional Calling Plan is an optional discount plan, for one-way originating Direct Dial Station-to-Station and certain Operator Assisted Station-to-Station Interstate IntraLATA messages, available to residential and business customers.

* Interstate IntraLATA Service Rates and Charges will be assessed by Concurring Carriers listed in Section 3.3.1 (A), following.

3.4 Optional Calling Plans (Cont'd)**3.4.8.3 1+ SAVERSM Application****A. General**

Applies to Interstate IntraLATA messages from local exchange Customers subscribing to the 1+ SAVER Optional Calling Plan. The 1+ SAVER Optional Calling Plan allows a participating Customer to receive a discount on all Direct Dial Station usage, excluding local usage, on one-way originating messages within the LATA. With the exception of 1+ Saver Direct, participating Customers in Kansas, Missouri, Oklahoma and Texas will receive a discount on all Operator Assisted calls charged to and billed at the appropriate calling card rate, excluding local usage, on one-way originating messages within the LATA.

In addition to the applicable usage rates, the appropriate Service Charge described in 3.2.10.5, preceding, will be applied to Operator Assisted calls charged to and billed at the appropriate calling card rate. Discounts do not apply to the Service Charge.

The 1+ SAVER rates and discounts applied are identical to those the Customer subscribes to under the Telephone Company's intrastate tariff.

B. Calling Options

For the Discount Options described in 3.4.8.3.(B)(1) and (2), following, the additional percent discount will be applied to the sum of the Interstate IntraLATA and IntraLATA toll qualified usage after the applicable rate period discounts. When the application of the discount results in a fractional charge, the amount will be rounded to the nearest cent. The monthly rate applies per customer account for the customer's combined Interstate IntraLATA and IntraLATA Toll Service.

For the Block-of-Time Options described in 3.4.8.3.(B)(1) and (2), following, the monthly rate applies per customer account for the Customer's combined Interstate IntraLATA and IntraLATA Toll Service. The additional usage rate applies to the combined Interstate IntraLATA and IntraLATA Toll usage exceeding the initial block of time purchased.

1. Business 1+ SAVERSM Options

The Business 1+ SAVER rates and discounts apply to usage for all rate periods and on all Business lines per account. With the exception of 1+ Saver Direct, usage from all Business lines will be accumulated per class of service and billed as if a multiline customer were a single account. Discounts are listed in 3.4.8.3(C), following.

- a. Discount Options: Business Options 1, 2 and 3 are Discount Options. With these options, a specified percent discount is applied on qualified usage for a flat monthly rate.
- b. Block-of-Time Options: Arkansas, Kansas, Missouri, Oklahoma and Texas Business Option 4 is a one-hour Block-of-Time option. Oklahoma Business Option 5 is a one-hour Block-of-Time option where the specified rates are available only to Customers subscribing to the Telephone Company's local exchange service packages. Kansas Business Option 5 is a five-hour Block-of-Time option. Arkansas and Missouri Business Options 5 and 6 and Oklahoma Business Options 6 and 7 are five-hour and ten-hour Block-of-Time options, respectively.

3.4 Optional Calling Plans (Cont'd)

With these options, a flat monthly rate will be applied to the relevant one-hour, five-hour or ten-hour block of time of qualified usage. A per minute rate will be applied to usage exceeding the initial block of time purchased.

2. Residence 1+ SAVERSM Options

The Residence 1+ SAVER rates and discounts apply to usage for specified rate periods, as indicated below. Rates and Discounts are listed in 3.4.8.3.C following.

- a. Discount Options: With these options, a specified percent discount is applied on qualified usage for a flat monthly rate for all rate periods except for Kansas and Missouri Residence Option 1.

Under Kansas and Missouri Residence Option 4, and Oklahoma Residence Option 3, the specified rate and percent discount is available only to Customers subscribing to the Telephone Company's local exchange service packages.

- b. Block-of-Time Options: Arkansas and Oklahoma Residence Option 4, Kansas and Missouri Residence Option 5 and Texas Residence Option 2 are one-hour Block-of-Time options. Oklahoma Residence Option 5 is a one-hour Block-of-Time option where the specified rates are available only to Customers subscribing to the Telephone Company's local exchange service packages. Kansas Residence Option 6 is a five-hour Block-of-Time option. Arkansas Residence Options 5 and 6 and Missouri Residence Options 6 and 7 are five-hour and ten-hour Block-of-Time options, respectively.

With these options, a flat monthly rate will be applied to the relevant one-hour, five-hour or ten-hour block of time of qualified usage. A per minute rate will be applied to usage exceeding the initial block of time purchased.

- c. Single rate options: with these options, a single per minute rate is applied to all minutes of use, in addition to a flat monthly subscription rate.

d.

3. Business and Residence 1+ SAVER Options

- a. The 1+ Saver Direct Options: These options apply to business and residence Customers in Arkansas, Missouri, Oklahoma and Texas and residence Customers in Kansas. In Kansas, the 1+ Saver Direct Options designated telephone number cannot be an internet access number. 1+ Saver Direct Options provides for one-way originating calling to a designated telephone number within the LATA. Customers subscribing to this option receive Block of Time or unlimited calling to the designated number at a fixed monthly rate. 1+ Saver Direct will be provided where billing capabilities exist.

3.4 Optional Calling Plans (Cont'd)

The 1+ Saver Direct Options, excluding the Business Deluxe options, apply per subscribed access line. Subscribers are not required to purchase 1+ Saver Direct on all access lines of a multiline account except in cases where Customer Dialed, Station-to-Station minutes of use cannot be billed on a per line basis. Such exceptions include, but are not limited to:

- i. The 1+ Saver Direct Options must be purchased on all access lines associated with single working telephone numbers used for multiple access lines.
- ii. Plexar II, Plexar Custom, Centrex, or similar type services which are billed on a PBX trunk equivalent basis. 1+ Saver Direct must be purchased on all Outward and Combination PBX-equivalent trunks.

1+ Saver Direct Business Deluxe service is available to business Customers in Missouri and Oklahoma except those only subscribing to basic business exchange access line service. Business Deluxe service includes, but is not limited to, business Centrex, Plexar service, excluding Plexar 1, Digiline, Analog PBX, and Digital PBX such as SmartTrunk, Super Trunk.

1+ Saver Direct Unlimited service is available to business Customers in Oklahoma and provides for one-way originating Interstate IntraLATA calling to a designated AT&T retail Telephone number within the LATA. If it is determined that the designated telephone number is not an AT&T retail telephone number, the Telephone Company will notify the customer of the violation. The Customer will be given thirty (30) days from the date of the Customer notification to select another designated telephone number that meets the requirements of this Guidebook. If the Customer does not make the necessary change of the designated telephone number within the thirty (30) day period, the 1+ SAVER Direct Unlimited calling plan will be automatically cancelled and all subsequent calls to the designated telephone number will be billed at the rate of the Customer's pre-subscribed intra-LATA toll provider.

A 20 percent discount is applied to the monthly recurring rate when a Customer simultaneously subscribes to a TOLL VALUE plan (excluding Business Deluxe) and any 1+ SAVER Direct plan (excluding Business Deluxe) and/or 1+ SAVER Direct Unlimited plan; each plan must be on the same line of a customer's account. TOLL VALUE (excluding Business Deluxe) is a requirement for this 20% discount package. The discount is limited to only one TOLL VALUE plan and only one 1+ SAVER Direct plan and only one 1+ SAVER Direct Unlimited plan per working telephone number (WTN). The 20 percent discount will remain in effect for as long as the Customer subscribes simultaneously to TOLL VALUE and to 1+ SAVER Direct plan (excluding Business Deluxe) and/or 1+ Saver Direct Unlimited plan.

The 1+ Saver Direct Options cannot be used for the aggregation of toll traffic of multiple end users. This includes, but is not limited to, the prohibition of 1+ Saver Direct when combined with any of the following services: Telebranch, Preferred Number Service, Simultaneous Call Forwarding and other like services.

3.4 Optional Calling Plans (Cont'd)**3.4.8.4 Prepaid Calling Card Service Charge***

A. General

Applies to all Interstate IntraLATA calls made using the Telephone Company's Prepaid Calling Card. The Prepaid Calling Card is available to Customers in various dollar denomination values. The value of the Prepaid Calling Card will decrease automatically during the call at the established rate per minute. The call will be terminated when the value of the card is exhausted.

The Prepaid Calling Card can be used to place Interstate IntraLATA calls. Calls to Directory Assistance, any operator service, or special telephone numbers such as 500 numbers, 700 numbers, 800 numbers, 900 numbers, etc., will not be completed using the Telephone Company's Prepaid Calling Card.

B. Rate

The Prepaid Calling Card Service Charge applies to all Interstate IntraLATA calls made within the Telephone Company's LATAs and will apply to each minute of use regardless of mileage or time of day.

Per minute, or fraction thereof \$0.40

3.4.8.5 Local Plus

A. Description

Local Plus is an optional one way, flat rate service whereby Customers will be able to call within their LATA by dialing 7 or 10 digits. The service provides for unlimited originating (outward) usage within an expanded calling area for a flat monthly rate.

B. Scope

This service is available to single-party flat rate business and residence Customers in Arkansas.

C. General Conditions

The minimum contract period is one-month. The rates and charges are payable in advance. Local Plus will be provided where facilities permit. Customers are not required to purchase Local Plus for all lines on their account. However, in cases where a single working telephone number is used for multiple lines, if Local Plus is purchased for one line in the arrangement, it must be purchased for all the lines. Within a multiline hunting arrangement if one line has Local Plus, all lines must have Local Plus. Since this is a 1-way service, the Telephone Company does not plan to offer additional directory listings or provide free directories.

* Interstate IntraLATA Service Rates and Charges will be assessed by Concurring Carriers listed in Section 3.3.1 (A), following.

3.4 Optional Calling Plans (Cont'd)

D. Rates and Calling Scopes

The rates for this optional service are monthly rates, applicable on a per line basis. The service provides for unlimited originating (outward) usage within an expanded calling area. Customers will also be provided, by mail, with a map of the applicable LATAs and calling scopes. The rates and calling scopes for the service shall be as follows:

Arkansas Local Plus - Local Optional one way outbound calling plan. Customers can place calls to other SWBT exchanges within their LATA for a flat monthly rate.

State	Class of Service	Monthly Rate	USOC
Arkansas	Residence	\$39.99	OLKOX
Arkansas	Business	\$75.00	OLKOX

3.4.8.6 CompleteLink

A. Description

CompleteLink Service is an optional calling plan for business Customers in Kansas, Missouri, Oklahoma, Arkansas, and Texas. It combines outbound, toll free inbound, and calling card types of Interstate IntraLATA usage and Intrastate IntraLATA usage into a single simplified calling plan.

B. General Regulations

The CompleteLink rate applies to Customer-Dialed Station-to-Station, Calling Card, and 800 Interstate IntraLATA usage. Operator Service Charges for Calling Card calls are not included with this service.

CompleteLink cannot be combined with any other optional calling plan.

CompleteLink is available on a one (1), two (2), three (3), or five (5) year Term Plan.

At the expiration of the selected CompleteLink term, if the Customer does not indicate selection of a new term plan, the rates will revert to the non-discounted per minute rate.

Customers must commit to a Minimum Annual Revenue Commitment (MARC) of \$700 in applicable Interstate and Intrastate spending for each year of their term in order to be eligible for this plan.

Customers who fail to meet their MARC will be billed the difference between the MARC and the annual revenue billed.

3.4 Optional Calling Plans (Cont'd)**Rates and Discount Structure**

Usage Rate per Minute of Use

1 Year	2 Year	3 Year	5 Year
\$0.10	\$0.10	\$0.10	\$0.10

1. No service charges are applicable to establish or to convert existing service to CompleteLink Service.
2. No early termination charges apply.
3. The discount is effective the day after the service is "activated" by the Telephone Company. The date "activated" is the date the order installing the plan is completed in the Telephone Company's billing system.

3.4.8.7 TOLL VALUE PLANS**A. Description**

The Residence and Business Block of Time Plans are optional one-way outbound Interstate IntraLATA Message Telecommunications Services that offer discounted blocks of time calling beyond a subscriber's local calling scope to all rate centers within the Customer's LATA. An additional per minute rate applies to usage exceeding the specified block of time.

B. Scope

This service is available to business and residence Customers in Missouri and Oklahoma.

C. General Regulations

Qualified usage for the TOLL VALUE Block of Time plans is all Interstate/IntraLATA Customer-Dialed, Station-to-Station, sent-paid, non-coin Interstate IntraLATA Message Telecommunications Service.

TOLL VALUE Block of Time Plans allow subscribers a specified amount of qualified usage per month at a flat rate. Subscribers are charged the full monthly rate even if the specified block of time usage is not used.

Customers who subscribe to optional Metropolitan Calling Areas (MCA) will receive these plans at the discounted rate specified in 3.4.8.7(D) of this Guidebook.

The monthly recurring rates for these plans apply on a per line or per trunk basis, except for Plexar or Centrex type services, which are billed on a per trunk equivalent basis, and Business Deluxe Services, which are billed on a per account basis.

3.4 Optional Calling Plans (Cont'd)

Subscribers are not required to purchase TOLL VALUE on all access lines of a multi-line account, except in the cases where Customer-Dialed, Station-to-Station minutes of use cannot be billed on a per line basis. Such exceptions include, but are not limited to:

1. The TOLL VALUE Plans must be purchased on all access lines associated with single working telephone numbers used for multiple access lines.
2. Plexar II, Plexar Custom, Centrex, or similar type services which are billed on a PBX trunk equivalent basis. TOLL VALUE must be purchased on all Outward and Combination PBX-equivalent trunks.

The TOLL VALUE Plans cannot be used for aggregation of toll traffic of multiple end users. This includes, but is not limited to, the prohibition of TOLL VALUE when combined with any of the filling services: Telebranch, Preferred Number Service, Simultaneous Call Forwarding and other like services

A 20 percent discount is applied to the monthly recurring rate when a customer simultaneously subscribes to a TOLL VALUE plan (excluding Business Deluxe) and any 1+ SAVER Direct plan (excluding Business Deluxe) and/or 1+ SAVER Direct Unlimited plan; each plan must be on the same line of a Customer's account. TOLL VALUE (excluding Business Deluxe) is a requirement for this 20 percent discount package. The discount is limited to only one TOLL VALUE plan and only one 1+ SAVER Direct plan and only one 1+ SAVER Direct Unlimited plan per working telephone number (WTN). The 20 percent discount will remain in effect for as long as the Customer subscribes simultaneously to TOLL VALUE and a 1+ SAVER Direct plan.

3.4 Optional Calling Plans (Cont'd)

(1) Usage is aggregated per line on a customer account.

(2) Usage is aggregated for all lines on a customer account.

4.1 Southwestern Bell Telephone Company**4.1.1 Applicable for Southwest****4.1.2 Public Land Mobile Radiotelephone Service**

Through Base Stations of the Southwestern Bell Telephone Company, Connecting Carriers (other than Miscellaneous Common Carriers), and Concurring Carriers

A. Application

1. Two-way communication service is furnished through radiotelephone Base Stations listed in C.(3) (LATA Stations), following, between a vehicle and a point located outside the land mobile service area associated with such Base Station, between two vehicles served through Base Stations having different rate centers, or between a vehicle served through a Base Station and a ship or aircraft served through another land radiotelephone station.
2. Public Land Mobile Service is available to vehicles equipped for this service when within range of a Base Station through which such service is furnished. Service is furnished subject to transmission, atmospheric and like limitations.

This service is also available through a Base Station, between a point or a vehicle and another station, hereinafter called an "Other Station" which is authorized by the Federal Communications Commission to communicate with the Base Station, or between two "Other Stations" so authorized.

In the application of regulations and rates, stations other than vehicles which are authorized by the Federal Communications Commission to communicate with a Base Station are considered as vehicles.

3. The services offered are those referred to in B.(1) and in B.(2), following.

B. Mileage Measurements - Rate Determination

1. Rates for service as set forth in (a) and (b) following are based on airline mileage between rate centers or mileage rate bands. Obtain V-H coordinates for Base Station rate centers by reference to AT&T Tariff F.C.C. No. 10.
 - a. For service between a point in the LATA and a vehicle served through a Base Station in the LATA listed in C.(3), following the mileage or mileage rate band is determined as in (1), following:
 - (1) for service involving a point in the LATA, mileage is measured between the rate center of the point and the rate center of the Base Station serving the vehicle in accordance with the provisions of part 8 section 3, preceding. Rates for the mileage obtained are applied as specified in C.(1)(a), following.
 - b. For service between two vehicles, each served by a different Base Station in the LATA, listed in C.(3) following, mileage is measured between the rate centers of the Base Station involved in accordance with the provisions of part 8 section 3, preceding. Rates for the mileage obtained are applied as specified in C.(1)(a), following.
2. Rates for service set forth in (a) and (b), following are as provided for therein. Obtain V-H coordinates for Base Station rate centers by reference to AT&T Tariff F.C.C. No. 10.
 - a. For service between a vehicle served through a Base Station in the LATA (listed in C.(3), following) and a ship or aircraft served through other land radiotelephone stations, conditions and rates are determined in accordance with (1), following:

4.1 Southwestern Bell Telephone Company (Cont'd)

B. Mileage Measurements - Rate Determination (Cont'd)

(i) Other Land Radiotelephone Station	Regulations and Rates Apply as Specified in:
VHF Service Stations of Other Participating Carriers	Southwestern Bell Tariff F.C.C. No. 72
Air-Ground Service	Southwestern Bell Tariff F.C.C. No. 72

The vehicle served through a Base Station is treated as a point for which the rate center is that of the Base Station serving the vehicle.

- b. For service between a vehicle served through a Base Station in the LATA (listed in C.(3), following) and a ship served through this Telephone Company's or its Concurring Carrier's VHF Service Station, regulations and rates are as specified in this Company's Tariff F.C.C. No. 72.

The vehicle served through a Base Station is treated as a point for which the rate center is that of the Base Station serving the vehicle.

C. Rate and Charge Application

1. Rates for the mileage or mileage rate band obtained as set forth in B.(1), preceding, between the applicable rate center and the rate center of the serving Base Station or between the rate centers of two Base Stations are determined as specified in (a), following. conditions applicable are those specified in 3.1, preceding.

- a. The rates, according to the connection established, apply as specified in the rate tables for Interstate IntraLATA service under Part 3, preceding.

2. Charges

- a. For Calls Involving Transient Land Mobile Units. When the service connection involves a call to or from a transient land Mobile Unit and requires the assistance of an operator, the Operator Station or Person-to-Person rate shall apply, as applicable. When the call is placed without the assistance of an operator, the Dial Station rate shall apply.
- b. For Calls Involving Base Stations Prefixed by an Asterisk. For calls to or from a mobile station served through a base station prefixed by an asterisk (*) (listed in 3, following), in addition to the charges specified in this Guidebook, the mobile usage charge listed in the Exchange Mobile Service Tariff of the Telephone Company will apply. Such mobile usage charges will be billed to and collected from the mobile Customer.

4.1 Southwestern Bell Telephone Company (Cont'd)**4.1.3 Through Miscellaneous Common Carriers (as defined in Part 22 of the F.C.C. Rules)**

A. Application

1. Service is available to and from Customers of the miscellaneous common carriers listed in B, following through connecting facilities provided by the Telephone Company in accordance with the provisions set forth in A(2) through A(6), following. For the purposes of A(1) and A(3) through A(6), following, the term "Telephone Company" does not include American Telephone and Telegraph Company, Long Lines Department, or GTE Satellite Corporation.
2. Rates between the rate center applicable to the miscellaneous common carrier and the applicable rate center of the point or applicable mileage rate band are those set forth in Part 8 (Interstate IntraLATA Service), as appropriate. Additional charges, which the miscellaneous common carrier bills to and collects from its Customers, are applicable to the remainder of the haul, as set forth in B(1), following, or in the tariff indicated in B(2), following. V-H coordinates for the rate centers applicable to the miscellaneous common carrier can be obtained by reference to American Telephone and Telegraph Company, Long Lines Department's Tariff F.C.C. No. 10.
3. Subject to the availability of facilities and the reasonable requirements of the Telephone Company for its telecommunications services, the Telephone Company will, at the miscellaneous common carrier's request, extend and physically connect its facilities with those of the miscellaneous common carrier for the purpose of interchanging interstate traffic in connection with the miscellaneous common carrier's Domestic Public Land Mobile Radio Services (as defined in Part 22 of the FCC Rules). Such connection and interchange of interstate traffic shall be as follows:
 - a. Two-Way Mobile Traffic

The Telephone Company will extend and connect its facilities between any telephone exchange whose rate center is located in the miscellaneous common carrier's Reliable Service Area (as defined in Part 22 of the FCC Rules) and the miscellaneous common carrier's control point(s) or communications system serving that Reliable Service Area.
 - b. One-Way Signaling Traffic

The Telephone Company will extend and connect its facilities between any telephone exchange within which a signaling receiver is served by the miscellaneous common carrier's system and the miscellaneous common carrier's control point(s) or communications system serving that system.
4. The facilities provided for connection and interchange of traffic shall not be used, switched or otherwise connected together by the miscellaneous common carrier for the provision of through calling from a landline telephone to another landline telephone, nor shall they be switched or otherwise connected together by the miscellaneous common carrier for the provision of through calling from a landline or mobile unit located in one Reliable Service Area (as defined in Part 22 of the FCC Rules) to a landline telephone or mobile unit in another Reliable Service Area (as defined in Part 22 of the FCC Rules).

4.1 Southwestern Bell Telephone Company (Cont'd)

5. Specific administrative procedures, connection and operating arrangements and charges for the facilities provided by the Telephone Company to the miscellaneous common carrier for the purpose of connection and interchanging traffic are as set forth in various intercarrier agreements between the Telephone Company and the miscellaneous common carriers, or in the general exchange tariffs of the Telephone Company as appropriate. Where the state franchise area or state authorization of the miscellaneous common carrier is different than the Reliable Service Area (as defined by Part 22 of the FCC Rules), the terms and conditions of connection and interchange of traffic may be modified to recognize the extent of such state franchise or authorization.

6. The connection and interchange of traffic as set forth in A(1), through A(5), preceding, does not constitute a joint undertaking with the miscellaneous common carrier for the furnishing of any service.

4.2 Nevada Bell Telephone Company**4.2.1 Applicable for NB****4.2.1.1 Public Land Mobile Radiotelephone Service**

Through Base Stations of Nevada Bell Connecting Carriers (other than Miscellaneous Common Carriers), and Concurring Carriers

(A) Application

- (1) Two-way communication service is furnished through radiotelephone Base Stations listed in (C)(3), following, between a vehicle and a point located outside the land mobile service area associated with such Base Station, between two vehicles served through Base Stations having different rate centers, or between a vehicle served through a Base Station and a ship or aircraft served through an other land radiotelephone station.
- (2) Public Land Mobile Service is available to vehicles equipped for this service when within range of a Base Station through which such service is furnished. Service is furnished subject to transmission, atmospheric and like limitations.

This service is also available through a Base Station, between a point or a vehicle and another station, hereinafter called an "Other Station" which is authorized by the Federal Communications Commission to communicate with the Base Station, or between two "Other Stations" so authorized.

In the application of regulations and rates, stations other than vehicles which are authorized by the Federal Communications Commission to communicate with a Base Station are considered as vehicles.

- (3) The services offered are those referred to in (B)(1) and (B)(2), following.

(B) Mileage measurements - Rate Determination

- (1) Rates for service as set forth in (a) and (b), following, are based on airline mileage between rate centers or mileage rate bands. Obtain V-H coordinates for Base Station rate centers by reference to AT&T Tariff F.C.C. No. 10.
 - (a) For service between a point in the LATA and a vehicle served through a Base Station listed in (C)(3), following, the mileage or mileage rate band is determined as in (i), following:
 - (i) Mileage is measured between the rate center of the point and the rate center of the Base Station serving the vehicle in accordance with the provisions of AT&T Tariff F.C.C. No. 1. Rates for the mileage obtained are applied as specified in (C)(1)(a), following.

4.2 Nevada Bell Telephone Company(Cont'd)

(b) For service between two vehicles, each served by a different Base Station listed in (C)(3), following, mileage is measured between the rate centers of the Base Stations involved in accordance with the provisions of AT&T Tariff F.C.C. No. 1. Rates for the mileage obtained are applied as specified in (C)(1)(a), following.

(2) Rates for service set forth in (a) and (b), following are as provided for therein. Obtain V-H coordinates for Base Station rate centers by reference to E.C.A. Tariff F.C.C. No. 2.

(a) For service between a vehicle served through a Base Station (listed in (C)(3), following) and a ship or aircraft served through other land radiotelephone stations, regulations and rates are determined in accordance with (i), following:

(i):

Other Land Radiotel. Station	Regulations and Rates Apply as Specified in
VHF Service Station of other participating Carriers	3.3.2, following
Aviation Service Stations	3.4, following

The vehicle served through a Base Station is treated as a point for which the rate center is that of the Base Station serving the vehicle.

(b) For service between a vehicle served through a Base Station (listed in (C)(3), following) and a ship served through a Concurring Carriers VHF Service Station (listed in 3.3.2, following), regulations and rates are as specified in 3.3.2.

(C) Rate and Charge Application

(1) Rates for the mileage or mileage rate band obtained as set forth in (B)(1), preceding, between the applicable rate center and the rate center of the serving Base Station, or between the rate centers of two Base Stations in the United States are the rates, according to the connection established, as specified in the rate tables. Regulations applicable are those specified in 3.1.

(2) Charges

(a) Additional Charge for Service with a Ship of Foreign Registry. When the service connection includes a ship of foreign registry, in addition to the charges specified in this Guidebook, the ship station charge specified in the List of Ship Stations published by the International Telecommunication Union in accordance with the International Telecommunication Convention (Montreux, 1965), shall apply.

(b) For Calls involving Transient Land Mobile Units. When the service connection involves a call to or from a transient land Mobile Unit and requires the assistance of an operator, the Operator Station or Person-to-Person rate shall apply, as applicable. When the call is placed without the assistance of an operator, the Dial Station rate shall apply.

4.2 Nevada Bell Telephone Company(Cont'd)

(c) For Calls Involving Base Stations Prefixed by an Asterisk. For calls to or from a mobile station served through a base station prefixed by an asterisk (*) (listed in (3), following), in addition to the charges specified in this Guidebook, the mobile usage charge listed in the Exchange Mobile Service Tariff of the Telephone Company will apply. Such mobile usage charges will be billed to and collected from the mobile Customer.

4.2 Nevada Bell Telephone Company(Cont'd)

Through Miscellaneous Common Carriers (as defined in Part 21 of the F.C.C. Rules

(A) Application

- (1) Service is available to and from Customers of the miscellaneous common carrier listed in (B), following through connecting facilities provided by the Telephone Company in accordance with the provisions set forth in (A)(2), through (A)(6), following.
- (2) Rates between the rate center applicable to the miscellaneous common carrier and the applicable rate center of the point or applicable mileage rate band are those set forth in AT&T Tariff F.C.C. No. 1 (Intra United States Mainland Service). Additional charges which the miscellaneous common carrier bills to and collects from its Customer, are applicable to the remainder of the haul, as set forth in (B)(1), following, or in the tariff indicated in (B)(2), following. V-H coordinates for the rate centers applicable to the miscellaneous common carrier can be obtained by reference to E.C.A. Tariff F.C.C. No. 2.
- (3) Subject to the availability of facilities and the reasonable requirements of the Telephone Company for its telecommunications services, the Telephone Company will, at the miscellaneous common carrier's request, extend and physically connect its facilities with those of the miscellaneous common carrier's Domestic Public Land Mobile Radio Services (as defined in Part 22 of the FCC Rules). Such connection and interchange of interstate traffic shall be as follows:
 - (a) Two-Way Mobile Traffic

The Telephone Company will extend and connect its facilities between any telephone exchange whose rate center is located in the miscellaneous common carrier's Reliable Service Area (as defined in Part 22 of the FCC Rules) and the miscellaneous common carrier's control point(s), or communications system, serving that Reliable Service Area.
 - (b) One-Way Signaling Traffic

The Telephone Company will extend and connect its facilities between any telephone exchange within which a signaling receiver is served by the miscellaneous common carrier's system and the miscellaneous common carrier's control point(s), or communications system, serving that system.
- (4) The facilities provided for connection and interchange of traffic shall not be used, switched or otherwise connected together by the miscellaneous common carrier for the provision of through calling from a landline telephone to another landline, telephone, nor shall they be switched or otherwise connected together by the miscellaneous common carrier for the provision of through calling from a landline or mobile unit located in one Reliable Service Area (as defined in Part 22 of the FCC Rules) to a landline telephone or mobile unit in another Reliable Service Area (as defined in Part 22 of the FCC Rules).

INTERSTATE INTRALATA TOLL SERVICES

4.2 Nevada Bell Telephone Company(Cont'd)

- (5) Specific administrative procedures, connection and operating arrangements and charges for the facilities provided by the Telephone Company to the miscellaneous common carrier for the purpose of connection and interchanging traffic are as set forth in various intercarrier agreements between the Telephone Company and the miscellaneous common carriers, or in the general exchange tariffs of the Telephone Company, as appropriate. Where the state franchise area or state authorization of the miscellaneous common carrier is different than the Reliable Service (as defined by Part 22 of the FCC Rules), the terms and conditions of connection and interchange of traffic may be modified to recognize the extent of such state franchise or authorization.
- (6) The connection and interchange of traffic as set forth in (A)(1) through (A)(5), preceding, does not constitute a joint undertaking with the miscellaneous common carrier for the furnishing of any service.

Sierra Communications, Inc.	Reno, Nevada	1	

5.1 VHF Service**5.1.1 Applicable for Nevada Bell Telephone Company****5.1.2 VHF Service - Through Land Stations of Concurring Carriers**

(A) Application

- (1) VHF Service is a two-way communication service furnished through the following land radiotelephone stations. These stations are licensed to provide a maritime mobile service, which is primarily of a local character.

VHF Service Stations

Rate Center	Serving Company
Bodega Bay, Calif.	Pacific Bell
Eureka, Calif.	Pacific Bell
Fort Bragg, Calif.	Pacific Bell
San Diego, Calif.	Pacific Bell
San Francisco, Calif.	Pacific Bell
San Pedro, Calif.	Pacific Bell
Stockton, Calif.	Pacific Bell

- (2) VHF Service is available to ships equipped for this service, when within range of a VHF Service Station through which such service is furnished. Service is furnished subject to transmission, atmospheric and like limitations.
- (3) The services offered are those referred to in (C)(1) and (C)(2), following.
- (4) Conference service is available to ships served through VHF Service Stations, the regulations and rates are as set forth in AT&T Tariff F.C.C. No 1.

(B) Regulations

- (1) Service is offered on a Dial Station, a Customer-Dialed Calling Card Station, and Operator Station, or on a Person-to-Person basis.
- (2) The Telephone Company does not undertake to bring to a telephone a called person who cannot be reached at a telephone connected to the Telephone Company. However, at the request of the calling party, the Telephone Company, when possible, will arrange on behalf of the calling party for messenger service; that is, a messenger or other means to notify the called party of the call. The Telephone Company shall be reimbursed by the calling party for the amount expended for such messenger service, such charges being subject to prior authorization by the calling party to the extent that they can be determined in advance. Such charges for messenger service are in addition to the tariff charges for the message.
- (3) Calls filed in advance of the time communication are accepted on the basis that the Telephone Company will endeavor to complete them as near as possible to the time specified by the calling party.

5.1 VHF Service(Cont'd)

(C) Rate and Charge Application

Rates for service through a VHF Service Station of Concurring Carriers listed in (A) (1), preceding, or through two such stations are determined as set forth in (1) and (2), following.

- (1) For service through a VHF Service Station of Concurring Carriers listed in (A) (1), preceding, and a point in the United States, or for service between two ships where both are served through VHF Service Stations listed in (A)(1), preceding, the total charge is the sum of the charges of (a) and (b), following.
 - (a) the appropriate charge, as determined by the rates set forth in AT&T Tariff F.C.C. No. 1 (Intra United States Mainland Service), preceding,
 - (i) between the rate center for the point in the United States and the rate center of the VHF Service Station listed in (A)(1), preceding, which serves the ship

or
 - (ii) between the rate centers of the VHF Service Stations listed in (A)(1), preceding, when both ships on the connection are served through such stations.

When the point on land and the serving VHF Serving Station are assigned to the same rate center, 0 mileage is treated as 1 mile. When the connection involves only ships being served through the same VHF Service Station, a charge as for one mile applies.

- (b) the VHF station charge to each ship on the connecting which is served through a station or stations listed in (A)(1), preceding, as follows.
 - (i) For the initial period of three minutes or fraction thereof
\$2.55
 - (ii) For the additional minute of fraction thereof
\$.85

When the connection involves two ships served through the same VHF Service Station on a single channel, the VHF station charge applies only once.

- (2) Rates for service as specified in (a) through (i), following, are determined as set forth therein.
 - (a) For service between a ship served through a VHF Service Station of Concurring Carriers and a vehicle served through a United States Base Station for Land Mobile Service (listed in Part 4 Section 2, (c)(3), preceding), the vehicle served through the Base Station is treated as a point for which the rate center is that of the serving Base Station, and rate is determined as specified in (1), preceding.

5.1 VHF Service(Cont'd)

- (i) the charge, determined as specified in (C)(10)(a) of 3.3.1, preceding, for the ship or aircraft served through the High Seas Service Station,
- (ii) the VHF station charge, as set forth in (1)(b), preceding, to the ship service through the VHF Service Station listed in (A)(1), preceding.

(3) Additional Charge for Service with a Ship of Foreign Registry

When the service connection includes a ship of foreign registry, in addition to the charges specified in this Guidebook, the ship station charge specified in the List of Ship Stations published by the International Telecommunication Union in accordance with the International Telecommunication Convention (Montreux, 1965), shall apply.

(4) Initial and Additional Periods

Rates are quoted in terms of initial and additional periods, the initial period being three minutes, or fraction thereof, and the additional period being one minute, or fraction thereof.

(5) Timing of Messages**(a) Chargeable time begins when connection is established between**

- (i) the calling telephone and the called telephone, Miscellaneous Common Carrier mobile radio system or PBX, or
- (ii) the calling person and the particular person or station specified or an agreed alternate.

(b) Chargeable time ends when the connection is terminated at any point.**(c) Chargeable time does not include time lost because of faults or defects in service.****(6) Reversal of Charges (Collect Calls)**

Collect Calls are accepted to and from ships served through VHF Service Stations Concurring Carriers.

6.1 Conditions under which Service is Furnished

6.1.1 Conference Service is available in the Southwest and Midwest Regions and the following conditions apply:

Conference Service

A. Definition

1. Conference Service is the furnishing of IIMTS for telecommunications among an originating station and two or more stations when at least one of the stations is in a different local service area than the originating station. In addition to the condition in Parts 2 and 3, preceding, the following apply:
2. Conference service is not available in connection with:
 - Radiotelephone units served through:
 - VHF Service stations of Other Participating Carriers, or
 - Air-Ground Service Stations

B. Conditions Under Which Service is Furnished

1. Service is furnished subject to the availability of the service components required.
2. All stations, on a conference connection may be so interconnected that each may communicate with all the others, or one station may be the transmitting station and all others receiving stations.
3. Service is offered to a specified person or station.
4. An operator, upon request, will attempt to arrange for the establishment of a conference call at a specified time.

6.2 Rate and Charge Application

A. IITS rates apply for two-point service between any two points on a conference call, as set forth in 6.3, following.

1. Timing of Messages

- a. Chargeable time begins when connection is established between all the stations on the conference.
- b. Chargeable time ends on a given two-point connection of a conference call when the connection is terminated by the originating station or the called station.

2. Billing Arrangements

Charges for conference calls are billed in total only and may be billed to the originating station, a calling card or a designated station, provided:

- a. The total charge will be billed to one station.
- b. The charge is accepted at the designated station.
- c. The originating station and the designated station are located in the LATA.

6.3 Rates and Charges

A. The rates for a conference call are as follows:

1. The charge is the sum of:

- a. the two-point minute charges determined in accordance with Part 3, preceding, for a call between the originating station and each called station on the conference (for calls between the originator and a called station in the same local service area, the charge for a one mile call determined in accordance with Part 3, preceding, applies), and
- b. a service charge of \$3.00 to each called station.

7.1 Application

7.1.1 Dial Conference Service

A. Application

Dial Conference Service is a communications service furnished between a calling station and two or more called stations. Such stations are connected together by means of a local exchange dial conference arrangement. This service is limited to only stations that are direct dialed from the calling station.

7.2 Rate and Charge Applications

A. Charges for services are the sum of (1) and (2), following:

1. The rate for each two-point Interstate IntraLATA connection is the appropriate dial station rate as set forth in this Guidebook.
2. Rates for the appropriate dial conference connection and each two-point connection within the state where the call originates are those rates as set forth in the appropriate intrastate tariffs and/or guidebook.

7.3 Timing of Messages

- A. Chargeable time begins for each individual two-point connection at the time the two-point connection is established.

- B. Chargeable time ends for each individual two-point connection when the calling station "hangs up," thereby releasing the network connection. If the called station "hangs up" but the calling station does not, chargeable time ends for each individual two-point connection when each network connection is released by automatic timing equipment in the telephone network.

7.4. Reversal of Charges

Collect Calls are not permitted.

General

- (A) For the purpose of determining airline mileages vertical and horizontal grid lines have been established across AT&T's Operating Territory. The spacing between adjacent vertical grid lines and between horizontal grid lines represents a distance of one coordinate unit. This unit is the square root of 0.1., expressed in airline miles. A vertical (V) and a horizontal (H) coordinate is computed for each rate center for its latitude and longitude location by use of appropriate map-projection equations. These rate centers and their V and H coordinates are shown in 8.2 following. A pair of V-H coordinates locates a rate center, for determining airline mileages, at a particular intersection of an established vertical grid line with an established horizontal grid line. The distance between any two rate centers is the airline mileage computed as explained in 8.2 following.
- (B) For long distance message telecommunications service the rate center for a point not listed in this section is the rate center for the central office to which the point is assigned for long distance telecommunications rate purposes; where the point is not assigned to a central office, the rate center is the location of the point.

Determination of Airline Mileages

(A) To determine the rate distance between any two rate centers proceed as follows:

- (1) Obtain the V and H coordinates for each rate center.
- (2) Obtain the difference between the V coordinates of the two rate centers. Obtain the difference between the H coordinates.¹
- (3) Divide each of the differences obtained in 2. by three, rounding each quotient to the nearer integer.
- (4) Square these two integers and add the two squares. If the sum of the squares is greater than 1777. divide the integers obtained in 3 by three and repeat step 4. Repeat this process until the sum of the squares obtained in 4 is less than 1778.
- (5) The number of successive divisions by three in steps 3 and 4 determines the value of N. Multiply the final sum of the two squares obtained in step 4. by the multiplier specified in the following table for the value of N preceding.

N	Multiplier	Minimum Rate Mileage
1	0.9	-
2	8.1	41
3	72.9	121
4	656.1	361
5	5,904.9	1,081
6	53,144.1	3,241

- (6) Obtain square root of product in 5. and with any resulting fraction, round up to next higher integer. This is the message rate mileage except that when the mileage so obtained is less than the minimum rate mileage shown in 5. preceding, the minimum rate mileage corresponding to the N value is applicable.

(a) EXAMPLE:

The message rate difference is required between Phenix City, Alabama and Atlanta, Georgia.

	V	H
(1) Atlanta	7260	2083
Phenix City	7559	2047
(2) Difference	299	36

Note 1: The difference is always obtained by subtracting the smaller coordinates from the larger coordinate.

INTERSTATE INTRALATA TOLL SERVICES

PART 8 - Rate Centers
SECTION 2 - Determination of Airline Mileages

Original Sheet 2

(3) Dividing each difference by three and rounding to nearer integer = 100 and 12.

(4) Squaring integers and adding, $100 \times 100 = 10000$
 $12 \times 12 = 144$
Sum of squared integers 10144

(5) Sum of integers is greater than 1777 so divide integers in (3) by three and repeat (4).

(6) Dividing integers in (3) by three and rounding = 33 and 4.

(7) Squaring integers and adding, $33 \times 33 = 1089$
 $4 \times 4 = 16$
Sum of squared integers 1105

(8) The sum of the squared integers is less than 1778 and was obtained after two successive divisions by three, therefore N = 2.

(9) Multiply final sum of squared integers by factor 8.1 (corresponding to N = 2)

$$\begin{array}{r} 1105 \\ \times 8.1 \\ \hline 8950.5 \end{array}$$

(10) Square root of 8950.5 = 94 and a fraction which is rounded up to 95 miles (fractional miles being considered full miles). The 95 miles is larger than the minimum of 41 rate miles applicable when N = 2, so the message rate mileage is 95 miles.
