 (T)

This Tariff contains Regulations, Rates and Charges applying to the provision of Access Services within a Local Access and Transport Area (LATA) or equivalent market area for Connection to Intrastate Communications Facilities for Customers within the operating territory of BellSouth Telecommunications, *LLC* in the State of Mississippi as provided herein.¹

(C)

The Company code for Mississippi is 5184.

Access Services are provided by means of wire, fiber optics, radio or any other suitable technology or a combination thereof.

The Company's intrastate switched access prices are currently at parity with the FCC interstate rates and will be adjusted annually subject to a cap at parity.

At least thirty (30) days prior to changing the rates, regulations, terms and conditions, etc. for an existing service, the Company shall file with the Commission a notice including a tariff setting forth the changes. Tariffs proposing rate reductions shall be filed on one (1) day notice. All such changes to existing services are presumptively valid and are effective at the end of the notice period.

The Company may reclassify or discontinue a service by applying to the Commission. The Commission shall review the request for reclassification or discontinuance within thirty (30) days and either approve, suspend or deny the request. If the Commission has taken no action within that time, the reclassification or discontinuance is deemed approved. When a request for reclassification or discontinuance is suspended, the Commission shall complete its review within one-hundred-twenty (120) days after suspension and approve or deny the request. After one-hundred-twenty (120) days, absent any Commission action, the reclassification or discontinuance shall be implemented.

Note 1: Wherever in this Tariff *or its headings*, the term "Company" or the name "South Central Bell", "*BellSouth Telecommunications*" or "BellSouth" appears, that shall mean and shall refer to BellSouth Telecommunications, *LLC* d/b/a AT&T Mississippi or AT&T Southeast, unless the context clearly indicates otherwise.
