ADVANCED SERVICES**TARIFF USER'S GUIDE**

Page Numbering - Page numbers appear in the upper right corner of each page. Pages are numbered sequentially. New pages added between existing pages already in effect will have a decimal. For example, new pages added between pages 10 and 11 would be 10.1, 10.2, etc.

Page Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the Commission. For example, the 2nd Revised Page 10 cancels and replaces the 1st Revised Page 10.

Paragraph Numbering Sequence - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level.

2
2.1
2.1.1
2.1.1.A
2.1.1.A.1
2.1.1.A.1.(a)
2.1.1.A.1.(a).I
2.1.1.A.1.(a).I.(i)
2.1.1.A.1.(a).I.(i)(1)

Check Page - When a filing is made with the Federal Communications Commission ("Commission") an updated check page accompanies the filing. The check page lists the pages contained in the Tariff, with a cross-reference to the current revision number. When new pages are added, the check page is changed to reflect the revision. An asterisk (*) designates all revisions made in a given filing. There shall be no other symbols used on this page if these are the only changes made. The Tariff user should refer to the latest check page to find out if a particular page is the most current on file with the Commission.

DEFINITION OF TERMS AND ABBREVIATIONS

The following are definitions of generally used terms.

AFFILIATE REGIONS – Denotes the geographic areas served by the affiliate: AT&T Southwest-Arkansas, Kansas, Missouri, Oklahoma, and Texas; AT&T Midwest-Illinois, Indiana, Michigan, Ohio, and Wisconsin; AT&T West-California and Nevada and AT&T SNET.

AT&T ADVANCED SOLUTIONS REGIONS – Refers to the geographic areas in which AT&T Advanced Solutions offers services under this Tariff. The geographic areas include both the Affiliate Regions and the ICO Regions. AT&T Advanced Solutions' Regions are designated as follows:
AT&T Advanced Solutions West – California and Nevada
AT&T Advanced Solutions Southwest – Texas, Missouri, Oklahoma, Kansas and Arkansas
AT&T Advanced Solutions Midwest – Illinois, Michigan, Ohio, Indiana and Wisconsin
AT&T Advanced Solutions East – Connecticut.

CLEC – Competitive Local Exchange Carrier

COMMITTED INFORMATION RATE – The bit rate that the network commits to transfer data under normal conditions. Each Permanent Virtual Circuit (PVC) is assigned a committed information rate (CIR).

COMPANY –SBC Advanced Solutions, Inc., Ameritech Advanced Data Services of Illinois, Inc., Ameritech Advanced Data Services of Indiana, Inc., Ameritech Advanced Data Services of Ohio, Inc., Ameritech Advanced Data Services of Michigan, Inc., Ameritech Advanced Data Services of Wisconsin, Inc., collectively referred to as AT&T Advanced Solutions.

CUSTOMER – Any person, firm, partnership, corporation or other entity who subscribes to Service under an arrangement which incorporates, in whole or in part, this tariff.

CUSTOMER DESIGNATED PREMISES – A physical location where Company's facilities terminate to the Customer equipment or facilities.

END USER – An individual, association, corporation, government agency or entity that subscribes to the Service and does not resell the Service to others or use the Service as an input to provide an information Service to others.

ICO ("Independent Company") Regions - Refers to geographic areas within the AT&T Advanced Solutions Regions that are not served by an affiliated ILEC.

ILEC – Incumbent Local Exchange Carrier

IXC – Interexchange Carrier

ADVANCED SERVICES**DEFINITION OF TERMS AND ABBREVIATIONS (Cont'd)**

LOGICAL CONNECTION – Provides end-to-end information transfer capability from one port to another.

PERMANENT VIRTUAL CIRCUIT – (PVC) Software defined logical paths established between two points. All cells, in all sessions between two end points, follow the same route. The PVC defines the logical path from the Customer's premises through Company's ATM network to the desired destination, typically another Customer premises location. The PVC is established with the Customer's desired bandwidth at the time the circuit is initially turned up for service, which will remain in place until the Customer decides to change the PVC path or bandwidth.

SERVICE – Offering of data services under the terms contained herein.

VIRTUAL SESSION – The active communications path between Company's ATM network and End User premises.
