

SECTION 4 - Pricing

Pricing (P)

P-1 Rate Elements

Except as set forth below, monthly recurring charges for AT&T Switched Ethernet Service Ports and associated Committed Information Rates are set forth in Section P-4 and vary by Port size, CIR, CoS, and term.

P-2 Ethernet Payment Plan (EPP)

To subscribe to AT&T Switched Ethernet Service, the Customer must select one of the EPP options below. The service is not available to be subscribed to on a month-to-month basis.

Ethernet Payment Plan Options				
12 Months	24 Months	36 Months	48 months	60 months

- (1) Nonrecurring charges shown in Sections P-4.1.1, P-4.1.3, P-4.1.5, P-4.2.1, P-4.2.14, and P-4.3 will be waived for Customers subscribing to new service under an EPP, or for Customers subscribing to a new EPP for an existing service, subject to Section P-2(5). For moves of service and service reconfigurations, nonrecurring charges will apply as specified in Sections P-2(6) and (7).
- (2) During the Customer's EPP term, AT&T initiated recurring rate changes (i.e., rate increases or decreases) will be automatically applied to the Customer's EPP rates for the months remaining in the Customer's EPP term. However, at no time during the Customer's EPP term will rates exceed the Customer's initial EPP rates.
- (3) When an EPP term expires, the Customer may select a new EPP term from among any EPP options which are then available to new Customers hereunder. EPP rates in effect at the time the new EPP term starts will apply. If the Customer orders such new EPP term at least 10 but not more than 90 days in advance of the existing EPP term expiration date, the new EPP term will begin immediately after the order is processed. If the Customer selects such new EPP term, but does not do so at least 10 days in advance of the existing EPP term expiration date, the Term Extension Month-to-Month Rates may apply between the expiration of the existing EPP term and the date upon which AT&T implements the new EPP term in its billing system.

(C)
|
(C)
(C)

SECTION 4 - Pricing

- (4) The Term Extension Month-to-Month (MTM) rates in Section P-4 will apply when a Customer's EPP term expires. The Customer will be billed the MTM rates in effect from time to time until such time as the Customer selects a new EPP or the Service is terminated.
- (5) Termination Liability will apply if the Customer disconnects service (or AT&T disconnects service for default by Customer) prior to the end of the selected EPP. Termination Liability will be determined based on the number of months remaining in the EPP term times 50 percent of the applicable EPP monthly rates, calculated as follows:
[(EPP Monthly Rates) X (Months Remaining in EPP Term)] X 50% = Termination Liability
- In addition, the Customer must pay all nonrecurring charges that were waived, as specified in Section P-2(1).
- (6) Moves involve a change in the physical location of one of the following:
- Point of service demarcation in the same building; or
 - Change of Customer premises to a new building

When the move is to a different location within the same building (i.e., results in a different point of service demarcation in the same building, such as a move to a different floor), previously waived nonrecurring charges associated with the existing service (if still under term) will be charged for all service components affected.

A new EPP term is not required (if still under EPP term) and Termination Liability will not apply for such a move. For move requests from Customers who have completed an EPP term and are currently being billed Term Extension MTM rates, a new EPP is required for the service at the new location.

When the move is to a different building (i.e., a different Customer premises), such a move is treated as a discontinuance of service and activation of new service. The previously waived non-recurring charges at the disconnecting location will be billed if the EPP term has not expired.

SECTION 4 - Pricing

The Customer must select an EPP term for the new service at the new location. The new EPP term will be subject to the rates in effect at the time of the move. Termination liability will also apply for such a move (if the EPP term has not expired) except where all of the following conditions apply:

- The existing and new service locations must be served by the same serving wire center.
- The Customer's existing service must have been in place for at least 12 months.
- The Customer must select a new EPP with a term that is greater than or equal to the remainder of the existing EPP.
- Orders from the Customer to disconnect the existing service and reestablish service at the new location must be placed by the Customer and received by AT&T on the same date.
- No lapse in billing will occur for moves of service under an EPP. If the Customer requests that both the existing AT&T Switched Ethernet Service and the new AT&T Switched Ethernet Service be in service at same time, such "overlapping" service shall be provided for no more than 30 days, and all applicable charges will be billed for both services during the period of overlapping service.

(7) The Customer may reconfigure service, subject to the conditions below.

For reconfigurations to a higher-capacity Customer Port Connection, from a Broadband Port to a Basic Port or PPCoS Port, or from a Basic Port to a PPCoS Port, previously waived nonrecurring charges associated with the existing service will be charged for all service components affected if such reconfiguration occurs prior to the expiration of the EPP term. An example of such upgrade would be a change from a 1 Gbps to a 10 Gbps Customer Port Connection. The Customer must select a new EPP term for the new configuration. The new EPP term will be subject to the rates in effect at the time of the reconfiguration. (C) (C)

EPP Termination Liability will not apply, subject to the following conditions:

- The upgraded service must be at a higher capacity than the existing service; and
- The new and existing services must be billed to the same Customer at the same Customer location; and
- The new EPP term selected must be equal to or greater than the remainder of the EPP term of the disconnected service.

SECTION 4 - Pricing

For reconfigurations to a lower capacity of the Customer Port Connection, from a PPCoS Port or Basic Port to a Broadband Port, or from a PPCoS Port to a Basic Port, EPP Termination Liability and nonrecurring charges will apply, as set forth in Section P-2(5), to all service components affected. An example of such a downgrade would be a change from a 1 Gbps to 100 Mbps Customer Port Connection. The Customer must select a new EPP term for the reconfigured service. The new EPP term will be subject to the rates in effect at the time of the reconfiguration.

Reconfigurations that require changes to the CoS, PPCoS Package, Broadband Speed Tier, or CIR are subject to the nonrecurring charges associated with the new CoS, PPCoS Package, Broadband Speed Tier, or CIR service components. EPP Termination Liability will not apply to such reconfigurations. The term effective dates associated with the Customer Port Connection shall apply to the associated CIR/CoS or Broadband Speed Tier. For example, a Customer with a 60-month term on original port and CIR configuration may change the CIR in month 48, while still keeping the original EPP expiration date associated with both port and CIR.

For reconfigurations not defined above in this Section P-2(7), the nonrecurring charge associated with the Customer Port Connection will apply. An example of such change would be a Customer-requested change from a multi-mode fiber interface to a single-mode fiber interface. EPP Termination Liability will not apply to such reconfiguration changes.

For any of the reconfigurations described above, any Customer that has completed an EPP term and is being billed at Term Extension MTM rates must select a new EPP term for the reconfigured service.

(8) Upgrades to a Higher Level of Service

A Customer may upgrade from AT&T Switched Ethernet Service to a different service provided by AT&T, as provided herein. EPP Termination Liability will not apply if all of the following conditions are met:

1. Either:
 - The new service as requested by the Customer must be at a transport speed or capacity greater than the speed or capacity of AT&T Switched Ethernet Service, or
 - The new service must offer the same transport speed or capacity as available with AT&T Switched Ethernet Service and include technology or functionality not available with AT&T Switched Ethernet Service.
2. The new service and existing AT&T Switched Ethernet Service must be billed to the same Customer of record at the same Customer location.
3. The Customer's existing AT&T Switched Ethernet Service must have been in place for at least 12 months.

(N)

(N)

4. The minimum term for the new service must be equal to or greater than the remainder of the Customer's existing EPP term.
5. The order for the new service and the disconnect order for the existing service must be placed by the Customer and received by AT&T on the same date.
6. If the Customer requests that both the existing AT&T Switched Ethernet Service and the new higher level service be in service at the same time, such "overlapping" service shall be provided for no more than 90 days, and all applicable charges will be billed for both services during the period of overlapping service.
7. Nothing in this section shall prohibit upgrades within AT&T Switched Ethernet Service as allowed under the terms contained elsewhere in this Service Guide.

(9) Conversion of DS1 and DS3 Services to AT&T Switched Ethernet Service

The replacement of interstate DS1 or DS3 special access services provided by AT&T with AT&T Switched Ethernet Service will not be deemed to be a termination or disconnection of the relevant DS1 or DS3 special access service for purposes of applying termination liability charges, provided that all of the following conditions are satisfied:

1. The length of the term commitment for the AT&T Switched Ethernet Service must be equal to or greater than the remainder of the term commitment of each DS1 or DS3 circuit being replaced.
2. Each replaced DS1 and/or DS3 special access service must:
 - Have been in service for at least twelve (12) months; and
 - Have been provided to the same End User location as the AT&T Switched Ethernet Service.
3. The Customer must issue a disconnect order for the replaced DS1 and/or DS3 special access service to be effective within ninety (90) days after the AT&T Switched Ethernet Service installation date.

For the purposes of this Section P-2(8), one AT&T Switched Ethernet Service port may replace multiple existing DS1 or DS3 special access services provided by AT&T.

P-3 Administrative Charge

The Administrative Charge is a non-recurring charge that applies for each order. The Administrative Charge will be waived for all orders requesting new service. (C)
