### E3. CARRIER COMMON LINE ACCESS SERVICE

#### E3.7 Resold Services (Cont'd)

- B. When the customer is reselling MTS and/or MTS-type service(s) as set forth in A. preceding, the customer will be charged Carrier Common Line Access service charges in accordance with the resale rate regulations as set forth in D. following if the customer or the provider of the MTS service furnishes documentation of the MTS usage and/or the customer furnishes documentation of the MTS-type usage. Such documentation supplied by the customer shall be supplied each month and shall identify the involved resold MTS and/or MTS-type services. The monthly period used to determine the minutes of use for resold MTS and/or MTS-type service(s) shall be the most recent monthly period for which the customer has received a bill for such resold service(s). This information shall be delivered to the Company, at a location specified by the Company, no later than 15 days after the bill date shown on the resold MTS and/or MTS-type service bill. If the required information is not received by the Company, the previously reported information, as described preceding, will be used for the next two months. For any subsequent month, no allocation or credit will be made until the required documentation is delivered to the Company by the customer.
- C. 1. The Company will apportion the resold originating MTS and/or MTS-type services and originating minutes of use for which the resale credit applies, among the access groups. Such apportionment will be based on the relationship of the originating usage for all access groups in the LATA. For purposes of administering this provision:
  - a. Resold originating MTS and/or MTS-type services minutes shall be only those attributable to intrastate originating MTS and/or MTS-type minutes and shall not include collect, third number, credit card or interstate minutes of use. <sup>1</sup> (N)
  - b. The resale credit adjustment shall apply for resold originating MTS and MTS-type services and minutes of use, provided Carrier Common Line *Access* and *BellSouth SWA* charges have been assessed on such services.
2. The Company will apportion the resold terminating MTS and/or MTS-type services and terminating minutes of use for which resale credit applies, among the access groups. Such apportionment will be based on the relationship of the terminating usage for each access group to the total terminating usage for all access groups in the LATA. For purposes of administering this provision:
  - a. Resold terminating MTS and/or MTS-type services minutes shall be only those attributable to intrastate terminating MTS and/or MTS-type (i.e., collect calls, third number calls, and credit card calls) and shall not include interstate minutes of use or MTS and MTS-type minutes of use paid for by another party.
  - b. The resale credit shall apply for resold terminating MTS and MTS-type services and minutes of use, provided Carrier Common Line *Access* and *BellSouth SWA* charges have been assessed on such services. <sup>1</sup> (N)

For those exchanges that encompass more than one state, the customer shall report the information by state within the exchange.
4. Each of the access group arrangements used by the customer in association with the resold MTS and/or MTS-type services must be connected either directly or indirectly to the customer designated premises at which the resold MTS and/or MTS-type services are terminated. Direct connections are those arrangements where the access groups and resold MTS and/or MTS-type services are terminated at the same customer designated premises.
5. Indirect originating connections are those arrangements where the access groups and the resold originating MTS and/or MTS-type services are physically located at different customer designated premises in the same exchange. Such different customer designated premises are connected by facilities that permit a call to flow from access groups to resold MTS and/or MTS-type services.
6. Indirect terminating connections are those arrangements where the access groups and resold terminating MTS and/or MTS-type services are physically located at different customer designated premises in the same exchange. Such different customer designated premises are connected by facilities that permit a call to flow from resold terminating MTS and/or MTS-type services to access groups.
