A125. OBSOLETE SERVICE OFFERINGS - LIGHTGATE DIGITAL SERVICE

A125.1 LightGate Multiline Local Exchange Service

(Obsoleted August 15, 1988, Type D.)

Obsolete Service Offering. Not available for new installations, additions, transfers of service to new location, or contract renewals.

A125.1.1 General

- A. LightGate Local Exchange Service is a multiline fiber optic digital service to provide extended customer service capability. The customer may lease a digital system with the capability to be activated. The customer may then choose channelization of all or part of a LightGate package to activate voice grade and data facilities for interconnection with the exchange network, voice grade and data facilities for private line channels, multiline based facilities as well as other LightGate Services. LightGate Service is only provided from wire centers where Local Measured Service is available.
- **B.** The customer may also choose not to channelize all or part of a LightGate package allowing direct connection to 1.544 Mbps service as provided in the Private Line *Guidebook* or for connection to unchannelized portions of other LightGate Services. LightGate Service is provided in packages based on multiples of circuit equivalents where DS1 or 24 equivalent circuits is the basic increment. For the technical description of DS1 and equipment capability, reference BellSouth Services technical publication No. 73501. This publication is available from BellSouth Documentation Operations, 9th Floor, 2121 8th Avenue North, Birmingham, Alabama 35203.
- **C.** These packages are distance sensitive as specified in A125.1.3 and all of the circuits in a customer's package must originate at the same premises, therefore, a package cannot be split between premises.
- D. Lines may be activated for Exchange Network Access Service only on a Volume Usage Measured Rate Service basis as specified in A125.1.3.
- **E.** This service provides local channels or equivalents for Exchange Network Access, off premises stations, Tie-lines, DDS, FX, and data services at 2.4 Kbps, 4.8 Kbps, 9.6 Kbps, 56 Kbps and 1.544 Mbps services. LightGate circuit equivalents may be interconnected with services offered in other *guidebook* sections based on a LightGate circuit serving as a local channel equivalent.
- **F.** The customer may activate any number or combination of circuits within a LightGate package. Circuits may be activated coincident with installation of the basic system or at any time subsequent to basic system installation. Once activated, a circuit is subject to thirty day minimum billing.
- G. The total number of equivalent circuits activated by the customer may not exceed the capacity of his basic system.

A125.1.2 Application Of Rates

- A. The statewide monthly rates as specified in A125.1.3 following apply for each LightGate package according to the number of circuit equivalent in each package and the airline distance between the served location and the serving wire center. These rates apply per package regardless of the number of circuit equivalents within each package that are activated by the customer.
- **B.** Exchange Network Access Service is provided for channels within LightGate packages only on a Volume Usage Measured Rate Service basis at the monthly recurring rates as specified in A125.1.3. following, and apply for each channel within a package that is activated for Exchange Network Access.
- C. The rates specified in other *guidebook* sections for services such as Grouping Service, Touch-Tone, Custom Calling Service, etc., are in addition to the monthly rate per LightGate package and other applicable rates as found in A125.1.3. following. Also, the rates for other services that may be interconnected or extended beyond the basic LightGate Service, such as, OPX, Tie-Lines, Private Lines, DDS, FX, etc., are in addition to the rates specified in this *Guidebook*.

(T)

A125. OBSOLETE SERVICE OFFERINGS - LIGHTGATE DIGITAL SERVICE

A125.1 LightGate Multiline Local Exchange Service (Cont'd)

A125.1.2 Application Of Rates (Cont'd)

- D. The standard transmission provided by LightGate is digital. As an option, LightGate may be provided for connection to the customer's premises equipment on an analog basis at the rates shown in A125.1.3. following. These rates are in addition to charges for the basic system.
- **E.** All usual and applicable Service Charges and Installation Charges as appropriate indicated in other *guidebooks* apply to the activation, move or change of lines within LightGate Service packages as well as for installation of the basic system. Suspension of service as described in A2.3.16 is not applicable to the LightGate Service.
- F. LightGate Local Exchange Service is available for rate periods of 36 months, 60 months or 84 months.
- **G.** A Service Cancellation Fee (SCF) is applicable at the date of termination and is reduced by 1/36, 1/60 or 1/84 per month from the date of installation, respective to the choice of rate periods. This fee will be equal to 36, 60, or 84 times the monthly rate of the appropriate Basic System and/or Basic Channelization without activation at the time service is established. This fee does not apply when the customer renegotiates a new contract converting to a MegaLink Channel Service or a LightGate 1 or LightGate 2 system of equal or greater capacity, at the same location for a period of time greater than the time remaining on the existing contract. Nonrecurring charges for the new system will be determined on an individual case basis.
- H. Transfer of service responsibility between customers is permitted subject to a transfer charge.
 - 1. Transfer of service between customers

(a) Each Rate USOC \$200.00 NA

I. The LightGate Local Exchange Service rates for Basic System and/or Basic Channelization, in effect at the time the service is installed and when the Company is notified in writing of the subscriber's choice of payment period option, will be applicable for the duration of the payment period chosen by the subscriber. The other items in the LightGate Local Exchange Service are subject to rate changes. At the expiration date of the customers payment period option the customer may select a new payment period option at current rates or revert to current rates on a month-to-month basis.

E. Volume Usage Measured Rate Service

Rates and charges for Network Access Service are applicable as contained in Section A3.26 of the *General Exchange Guidebook* in addition to Feature Activation and other LightGate rates and charges contained in this section.

A126. OBSOLETE SERVICE OFFERINGS - EXCHANGE DIGITAL SERVICES

A126.1 MegaLink - I.C.

(Obsoleted 4-11-88, Type B.) Not available for new installations, additions or on transfers of service to new location.

A126.1.1 General

- **A.** This service will provide, at a minimum, four (4) DS1/1.544 Mbps transmission channels on a digital basis between two serving wire centers (Inter-office). Additional multiples of four, or single DS1/1.544 Mbps channels may also be provided in excess of the initial minimum of four. These DS1/1.544 Mbps channels are available for inter-office connection with LightGate DS1's or MegaLink Service.
- **B.** This service provides for the simultaneous two-way transmission of isochronous digital signals, where facilities are available, between two serving wire centers within a LATA.
- C. The terms and conditions for this service are in addition to terms and conditions set forth in Section A2. and B2.2 of the Private Line Guidebook.

A126.1.2 Application Of Rates

- **A.** The statewide monthly rates in A26.1.3 following apply for each multiple of four (4) or single DS1/1.544 Mbps channels according to the airline distance between two serving wire centers.
- **B.** All appropriate rates specified in other *guidebook* sections are in addition to the monthly rate per package, or single channel. Specifically, the rates for LightGate and/or MegaLink Service that may be interconnected or extended beyond this service, apply in addition to the rates specified in this *Guidebook*.
- C. This service is available for rate periods of 36 months, 60 months or 84 months. The rates for this service, in effect when the Company is notified in writing of the subscriber's choice of payment period option, will be applicable for the duration of the payment period chosen by the subscriber. At the expiration date of the customer's payment period option, the customer may select a new payment period option at current rates, or revert to current rates on a month-to-month basis.
- **D.** A Service Cancellation Fee (SCF)¹ is applicable at the date of termination and will be an amount equal to the monthly rate for the unexpired portion of the customer's selected payment period option.
- E. Transfer of service responsibility between customers is permitted
 - 1. Subject to payment of a transfer charge.

(a)

Rate Nonrecurring Charge USOC \$200.00 NA

7. Any single interoffice DS1/1.544 Mbps channels provided under this *Guidebook* must originate and terminate in the same central offices as any multiple of four (4) DS1's/1.544 Mbps channels.

Note 1: No Service Cancellation Fee will be applicable for MegaLink Service when the customer renegotiates a new contract for the same system at the same location(s) for a period of time greater than the time remaining on the existing contract.

A129.1 Reserved For Future Use

A129.2 Reserved For Future Use

A129.3 Reserved For Future Use

A129.4 FlexServ - Digital Access Cross Connect

(Obsoleted 03-15-93, Type D) Not available for new installations or transfers of service to new locations. This service under this *guidebook* will not be available after June 30, 1993.

A129.4.1 Description Of Service

A. General

FlexServ provides customers flexibility in managing and reconfiguring their special service networks. It has the ability to connect a single digital (DSO) circuit, or multiples of up to 24 DSO circuits, from one line to any other line controlled from a customer's location.

B. Customer Circuits

The basic unit of service for FlexServ is a single voice frequency (DSO) channel. Service is also provided for full DS1 (1.544 Mbps) digital circuits or synchronous subrate digital circuits (2.4, 4.8, 9.6 or 56 Kbps). Customer circuits are made up of two general components - FlexServ access lines or inter-digital cross-connect device (DCD) facilities (channels) as required. Both can be provided out of the General Subscriber *Guidebook*, Private Line *Guidebook* or other appropriate *guidebook*.

C. Network Control

Network control switching capability is accomplished by making appropriate computer processors and certain digital cross-connect device (DCD) assignments accessible in a secured manner to the FlexServ customer. Network administration aids are available to assist users in monitoring and utilizing their networks. FlexServ requires at least one signalling channel to communicate with the network controller for network management and administrative aids. The signalling channel can be provided using Private Line facilities. Private Line Signalling Channels are to extend from the customer premises to the nearest serving wire center equipped with the Signalling Channel Interface.

D. Maintenance And Operation

Due to the nature of FlexServ service it may be necessary to perform preventive and routine maintenance on the system. This maintenance will usually be performed Monday through Saturday from midnight to 2:00 a.m. and on Sunday. This will mean that the FlexServ controller will be unavailable for circuit reconfiguration during these periods of time. Any circuits which are working will continue in operation, only the reconfiguration capability will not be usable.

It may also be necessary to periodically take the FlexServ system out of service for software updates and other maintenance. In these cases the customers will be notified in advance as to the time and duration of these outages.

A129. OBSOLETE SERVICE OFFERINGS - DATA TRANSPORT SERVICE

A129.4 FlexServ - Digital Access Cross Connect (Cont'd)

A129.4.2 Explanation Of Terms

DIGITAL CROSS-CONNECT DEVICE

The DCD provides per channel DS0 electronic cross-connection and provides test access for digital signals transmitted at the DS1 rates. It can connect multiples of up to 24 DS0 circuits.

DS(

"DS0" refers to a North American hierarchy of Digital signal levels. It means Digital Signal Level 0 which is a 64 Kbps signal. The customer bit rates are limited to a 56 Kbps signal. The required D4 format is found in BellSouth Technical Reference 73501. A copy may be obtained by writing BellSouth Services, Documentation Operations, 2121 8th Avenue North, 9th Floor, Birmingham, Alabama 35203.

DS1

"DS1" refers to a North American hierarchy of Digital signal levels. It means Digital Signal Level 1 which is a 1.544 mbps signal. The required D4 format is found in BellSouth Technical Reference 73501. A copy may be obtained by writing BellSouth Services, Documentation Operations, 2121 8th Avenue North, 9th Floor, Birmingham, Alabama 35203.

FLEXSERV ACCESS LINE

A local circuit between the customer's premises and his serving wire center, plus interoffice facilities to the DCD equipped office, if applicable.

NETWORK CONTROLLER (NC)

The Network Controller (NC) performs the end-to-end coordination of each reconfiguration request and compiles network management reports.

SIGNALLING CHANNEL

The physical circuit that will allow end users to enter commands into the FlexServ network controller(s).

SIGNALLING CHANNEL INTERFACE

The Signalling Channel Interface will perform the communications interface function between end users and the FlexServ network controller(s).

INTER DCD CHANNEL

A communication facility (a channel) between DCD equipped offices.

MULTIPOINT CHANNEL

Any connection which terminates three or more circuits on the same bridging port.

A129.4.3 Terms and Conditions

A. The terms, conditions and rates specified herein are in addition to the applicable terms, conditions and rates specified in other sections of this Guidebook.

FlexServ is furnished only from central offices which have been equipped with DCD's. This service is provided subject to the availability of appropriate facilities.

The Local and Interoffice Channels are to be provided out of the appropriate Private Line *Guidebook*, Section C3., or General Subscriber *Guidebook*, Section A25., and all other appropriate *guidebooks*, and are subject to all *terms*, *conditions* and charges contained in their respective *guidebooks* in addition to those contained herein.

A minimum initial service period of 3 months is required.

Suspension of service is not allowed.

A129. OBSOLETE SERVICE OFFERINGS - DATA TRANSPORT SERVICE

A129.4 FlexServ - Digital Access Cross Connect (Cont'd)

A129.4.3 Terms and Conditions (Cont'd)

B. Application Of Rates

For each FlexServ network arrangement, a Service Establishment Charge and a Service Provisioning Charge apply.

A Database Change Charge is applicable when a customer's database is reinitialized due to a customer location change.

A DCD Port Charge is required for each channel terminating on a DCD port. For Inter-DCD facilities (channels), a DCD Port Charge applies per Inter-DCD channel.

A Multipoint Channel Bridge Charge is applicable for each conference port bridge or polling arrangement which is required. Additionally, each access line channel which can be connected to a bridge will incur charges per channel bridged.

A Network Controller Signalling Channel Interface Port Charge is required for each Private Line facility used to access the Network Controller. These facilities may be obtained from the appropriate *guidebook*.

Reconfiguration charges are applicable for each channel reconfiguration performed by the customer. Charges are applicable for each reconfiguration request the customer makes to the Company and each transaction the Company performs at the customer's request.

C. Allowance for Interruptions

When service is interrupted due to a failure or malfunction in any of the components of the FlexServ system and the reconfiguration capability is unavailable, a pro rata adjustment of the FlexServ Service monthly charges will be allowed in accordance with the *terms and conditions* specified in Section A2.

No allowances will be granted for interruptions required to perform preventive or routine maintenance, or to perform software updates when these interruptions occur during time periods indicated in A29.4.1.D. or when the customer is notified at least 24 hours prior to such occurrences.

A129.4.4 Connections

A. Cross Connections Allowed

This *Guidebook* applies to reconfiguring connections between pairs of FlexServ channels only at the DS0 level or 24 consecutive DS0 channels.

On demand, cyclical, and reservation (scheduled) type reconfigurations are supported. Requirements must be input to the NC by the customer to activate reconfigurations.

For a given customer, all services on channels to the DCD(s) may not be compatible. Consequently, certain reconfiguration combinations must be denied. The Company shall not be responsible for service interruptions, troubles, loss of customer data, etc., resulting from invalid reconfiguration attempts. A channel service compatibility list will be provided to customers upon request.

B. DS Format

DS0 and DS1 signals as defined in the Company's technical references may be terminated on FlexServ. Other multiplexing formats must be converted to a standard D4 format, as defined in BellSouth Technical Reference 73501. A copy may be obtained by writing BellSouth Services, Documentation Operations, 2121 8th Avenue North, 9th Floor, Birmingham, Alabama 35203.

C. Network Controller (NC) Signalling Channel Interfaces

Access to the NC is via a Private Line Service. Customers will be advised as to the type of compatible terminals and data sets upon request. All terminal equipment must be provided by the customer.

D. Delays

The NC processes commands in the sequence received, consequently, on demand reconfigurations may not occur instantaneously during peak load hours.

A131. OBSOLETE SERVICE OFFERINGS - MULTI-LOCATION BUSINESS SERVICE (MLBS)

A131.1 Reserved For Future Use (Cont'd)

A131.2 Systems Communication Service (SCS)

(Obsoleted 10-13-95, Type D) Service rates and charges in this Section are available for inward activity of existing Systems Communication Service subscribers in conjunction with ESSX service or Digital ESSX service and only as specified in the obsolescence rules stated in A112.26 and A112.28. Not available for new service or entire moves of existing service to new locations.

A131.2.1 General

A. Service Description

- Systems Communication Service (SCS) is an arrangement that provides calling, with abbreviated dialing, among
 multiple ESSX service systems for a single customer. SCS allows users in one ESSX service system to dial four or five
 digits to reach users in the other destinations included in the SCS arrangement. Destinations included in the SCS
 arrangement may be PBX, ESSX service or any other location which may be dialed directly. The calls can be local or
 toll. The customer may subscribe to ESSX service at the other locations, but it is not required.
- 2. The only function SCS offers to ESSX service customers is abbreviated dialing to the other selected locations.

A131.2.2 Terms and Conditions

A. Service Specifications

- SCS will allow four or five digit dialing on a system basis to the customer's distant number range. SCS will prefix any Access Code (if required), Home (HNPA) or Foreign Numbering Plan Area (FNPA) (if required), and NXX dialed by the customer before routing to the distant location.
- For each SCS destination, customers must specify the number of other destinations to be called via SCS and the quantity of terminations required.
- 3. The four or five digit abbreviated dialing ranges cannot be duplicated at any other SCS location or destination.
- 4. ESSX service customer groups (Digital) or common blocks (Analog) are required at each serving central office at which SCS is provided.
- 5. SCS service will be offered only where facilities permit.
- 6. IntraLATA toll calls will be subject to the applicable rates for the authorized intraLATA toll service selected by the customer. InterLATA toll calls will be routed to the interexchange carrier (IC) to which the customer has presubscribed.
- 7. The Variable Term Payment Plan *Terms and Conditions* in A2.4.8 apply.
- 8. A Termination Liability charge will apply to subscribers who discontinue service prior to the expiration of the selected payment plan. The Termination Liability charge will be 100 percent of the remaining monthly charges of the selected payment plan.

A131.2.3 Definitions

A. Features

Abbreviated dialing is the only feature offered by SCS.

B. Destination

Destination represents the number of routes or other locations in the SCS arrangement.

C. Termination

Termination represents the number of simultaneous originating SCS calls from each ESSX service location.

A131.2.4 Rates and Charges

A. General

SCS service rates and charges are in addition to those incurred for other services described in this $\it guidebook$.
