A13. MISCELLANEOUS SERVICE ARRANGEMENTS

A13.9 Custom Calling Service (Cont'd)

A13.9.1 General (Cont'd)

A. Call Waiting (Cont'd)

Before a call is initiated the Call Waiting subscriber may, by dialing a code, activate the cancel feature and Call Waiting is then made inoperative on the first call initiated by the subscriber immediately following activation of the cancel feature. The cancel feature may also be activated after a call is established if the customer subscribes to flat rate Three-Way Calling. Call Waiting is restored automatically on termination of the call. During the time the cancel feature is activated, incoming callers receive a busy tone.

B. (Obsoleted, See Section A113.9)

C. Call Forwarding Variable

Provides for transferring incoming calls to another telephone number by dialing a code and the telephone number of the service to which calls are to be transferred. Calls may be transferred to a toll point subject to the availability of the necessary facilities in the Central Office from which the calls are to be transferred. Satisfactory transmission levels cannot be assured on calls forwarded outside of the Local Calling Areas.

D. Three-Way Calling

Permits an existing call to be held, and by dialing, a second telephone call can be established and added to the connection. Two toll points may be connected on a Three-Way Calling. Normal transmission performance cannot be assured on all calls.

E. Speed Calling

Provides for the calling of a 7- or 10-digit telephone number by dialing an abbreviated code. The arrangement available has an eight (8-code)[1] and thirty (30-code) number capacity.

F. Call Forwarding Busy Line

This feature provides for calls terminating to a subscriber's busy directory number to be forwarded to another telephone number on a premises other than the provisioned premises. The customer selected forward-to telephone number is preprogrammed at the time service is established and can only be changed via service order.

G. Call Forwarding Don't Answer

This feature provides for calls terminating to a subscribers idle directory number to be forwarded, after a customer preselected interval, to another telephone number. The customer selected forward-to telephone number and specified interval are preprogrammed at the time service is established and can only be changed via service order.

H. Call Forwarding Don't Answer - Ring Control (CFDA-RC) - This feature provides for calls incoming to a subscriber's idle directory number to be forwarded to another telephone number after a customer-controlled interval expressed in either ring cycles or seconds, depending on specific technology involved. The forwarded-to telephone number is specified at the time service is established and can only be changed via service order. Such change is subject to normal service order charges. CFDA-RC is available only where facilities permit, and provides the customer with the capability to change the interval after which forwarding occurs. Such change is made at the convenience of the customer, and is not subject to service order charges. After establishment of service, the interval cannot be changed via service order.

I. Customer Control of Call Forwarding Busy Line[2]   (C)

This feature provides a customer the Call Forwarding Busy Line feature and the capability to control from the base station line the activation and deactivation of the service by using dialing codes. The destination telephone number is specified by the customer at the time this feature is ordered and can only be changed via service order.

J. Customer Control of Call Forwarding Don't Answer[2]   (C)

This feature provides a customer the Call Forwarding Don't Answer feature and the capability to control from the base station line the activation and deactivation of the service by using dialing codes. The destination telephone number and forwarding interval are specified by the customer at the time this feature is ordered and can only be changed via service order.

Note 1: Effective October 31, 2013, Speed Calling (8-code) is withdrawn and no longer available for business subscribers.

Note 2: Effective August 1, 2016, Customer Control of Call Forwarding Busy Line and Customer Control Call Forwarding Don't Answer are no longer available for residence subscribers.   (N)

A13. MISCELLANEOUS SERVICE ARRANGEMENTS

A13.9 Custom Calling Service (Cont'd)

A13.9.1 General (Cont'd)

K. Call Forwarding Multipath

This feature provides customers who subscribe to Call Forwarding Busy Line, Call Forwarding Don't Answer, Customer (C)
Control of Call Forwarding Busy Line[1], Customer Control of Call Forwarding Don't Answer[1], Call Forwarding Variable, or
Remote Access to Call Forwarding Variable the capability to specify the number of calling paths that will be forwarded to
another telephone number.

Where facilities permit for a single (non-rotary) exchange line/trunk or a rotary (hunting) arrangement of 10 or less
lines/trunks, 10 calling paths will be provided at no charge. For a hunting arrangement greater than 10 lines/trunks, additional
paths (in excess of the 10 provided at no charge) can be purchased. The total number of calling paths cannot exceed the
number of lines/trunks in the forwarding hunting arrangement. In all cases, the number of call forwarding paths is dependent
upon the terminating capability of the forward-to directory number. For the Call Forwarding Don't Answer feature, each call
will be forwarded at the completion of each ring cycle. A service charge will apply to requests to increase or decrease the
number of calling paths.

L. Call Waiting ID - This feature allows a residence customer to control the treatment applied to incoming calls while the
customer is off-hook on a call. Call Waiting ID includes the functionality of the Call Waiting feature and provides several
additional call disposition options.

The customer must have a Calling Identification Delivery feature such as Caller ID-Basic or Caller ID for the calling
identification data of the waiting call to be provided following the Call Waiting ID alerting tone.

The customer must subscribe to the Call Forwarding Don't Answer feature in order to forward a waiting call to another
location.

Call disposition options provided with Call Waiting ID include:

- Answer the waiting call, placing the first party on hold
- Answer the waiting call, dropping the first party
- Direct the waiting caller to hold via a recording
- Forward the waiting call to another location (e.g., a voice mailbox or Telephone Answering Service)
- Conference the waiting call with the existing, stable call and, if desired, subsequently drop either leg of the
  "conferenced" call (where facilities permit).

Utilization of the full capabilities of Call Waiting ID requires the use of an Analog Display Services Interface (ADSI)-
compatible telephone at the customer's premises. The installation and repair of that equipment, and its technical capability to
function in conjunction with the features specified herein, will be the responsibility of the customer. The Company assumes no
liability and will be held harmless for any incompatibility between this equipment and the network features described herein.

All terms and conditions, including rates, for the other features associated with the line are as described in the feature-specific
sections of this guidebook. Such features must be ordered separate from Call Waiting ID.

M. Remote Access - Call Forwarding Variable

This feature provides a customer the Call Forwarding Variable feature and the capability to activate and deactivate the service
remotely from any line/equipment capable of Touch-Tone signaling rather than only from the base station line. This feature
does not require that a courtesy call be completed to the forward-to-telephone number.

N. Three-Way Calling with Transfer - This feature allows a user to hold an in-progress call and complete a second call while
maintaining privacy from the first call, or to add on the previously held call for a three-way conference. Incoming calls may
be transferred to another access arrangement on an inter- or intra-switch basis. Where the subscriber originates both legs of a
three-way call, those legs will remain bridged together when the subscriber goes on hook when at least one of the legs is an
intra-switch call. Where the subscriber originates two inter-switch legs of a three-way call, both legs remain bridged when the
subscriber goes on hook where the serving switch is not a 5ESS switch. For such calls in a 5ESS switch, both inter-switch legs
are disconnected when the subscriber goes on hook. This feature shall not be used to extend calls on a planned and continuing
basis to intentionally avoid the payment in whole or in part of message charges, toll or otherwise, that would regularly be
applicable between the stations bridged together by the subscriber.

O. Star 98 Access - This feature allows a subscriber to dial *98 to access a service such as their voice mail service.

(M)

Note 1: Effective August 1, 2016, Customer Control of Call Forwarding Busy Line and Customer (N)
Control Call Forwarding Don't Answer are no longer available for residence subscribers.

A13. MISCELLANEOUS SERVICE ARRANGEMENTS

A13.9 Custom Calling Service (Cont'd)

A13.9.2 Terms, Conditions and Limitations of Service (T)

A. The services are limited to those areas served by central offices arranged for Custom Calling Services, Call Forwarding feature (M) enhancements, Usage Sensitive Three-Way Calling and the cancel feature for Call Waiting are available only in central offices where the capability exists and has been implemented.

B. Except where provided otherwise in this Guidebook, Custom Calling features are furnished only in connection with Individual Line Service. The features are not available in connection with Prestige Deluxe Service, Prestige Communications Service, Prestige Communications Package, Centrex-type Service or Coin Telephone Service. Call Waiting ID is available only on single line residence and single line business service.

C. In addition to the rate in this section for the Call Forwarding features, the following charges apply for the call being forwarded.

1. Between the originating station line and call forwarding location.

   The charge for this portion of a forwarded call shall be the charge specified in this Guidebook, or any other applicable Guidebook, for the type of call involved, either local or long distance, for the entire duration of the call, measuring only the distance to the call forwarding location.

2. Between the call forwarding location and the terminating station line.

   For calls forwarded outside the Local Calling Area, the Call forwarding customer is responsible for the applicable customer-dialed station-to-station charges specified in this Guidebook or any other applicable Guidebook.

   For calls forwarded inside the Local Calling Area, a Measured or Message Rate Service Call Forwarding customer is responsible for the applicable customer-dialed Measured or Message Rate Service charges specified in this Guidebook, as appropriate, for each call answered at the answering location.

A13. MISCELLANEOUS SERVICE ARRANGEMENTS

A13.9 Custom Calling Service (Cont'd)

A13.9.2 Terms, Conditions and Limitations of Service (Cont'd)

D.   (Obsoleted, See Section A113.9)

E.   Call Forwarding On PBX Trunks

Call Forwarding is offered for use with PBX trunks subject to the following limitations:

1.   It may be provided only when compatible with the equipment configuration at the customer's premises.

2.   It is available only on two-way trunks.

3.   It is not available with Direct Inward Dialing trunks.

4.   If the feature is proposed on a facility on which hunting is also to be provided, this service is available only with Multi-Line and Series Completion hunting arrangements and is subject to the limitations of these arrangements.

5.   When calls are being forwarded intra-office, the number of calls that can be forwarded simultaneously is equal to the number of trunks in the customer's system that are arranged to receive calls and are equipped to provide the Call Forwarding feature.

6.   When calls are being forwarded inter-office, only one call can be forwarded at a time.

7.   Call Forwarding can be sequentially forwarded in a chain across lines within a central office a maximum of five times.

F.   Speed Calling On PBX Trunks

This feature is available on a per trunk equipped basis.

G.   Speed Calling On Outward WATS Lines.

This feature is available on a per-line equipped basis and is limited to one Speed Calling list per Outward WATS facility group.

H.   Appropriate Service Charges apply except during Company selected periods of special promotions.

I.   (DELETED)

J.   Subscribers to Call Waiting ID must have Touch-Tone service.

K.   The service order charge for establishment of Call Waiting ID on the customer's line will be waived for the first sixty (60) days of availability in each area.

L.   Custom Calling Services can be suspended as specified in A2.3.16. During the period of suspension, no recurring charge applies.

Note 3: Caller ID must be ordered separate from this offering to have the calling identification data with this service. Rates, terms and conditions for Caller ID apply as specified in section A13.19.

Note 4: Appropriate local or toll usage charges apply for calls originated by the subscriber, including connections which continue after the subscriber exits the call.

A13. MISCELLANEOUS SERVICE ARRANGEMENTS

A13.19 TouchStar Service (Cont'd)

A13.19.5 Additional Features

A.   Caller ID - Basic (Number Delivery)

This feature enables the customer to view on a display unit the Directory Number (DN) on incoming telephone calls.

When Caller ID - Basic is activated on a customer's line, the Directory Numbers of incoming calls are displayed on the called CPE during the first long silent interval of the ringing cycle. The date and time of the call is also transmitted to the Caller ID customer. In locations where Caller ID customers are served from a host office in a different time zone, the time zone of the host office will be transmitted.

Any customer subscribing to Caller ID - Basic will be responsible for the provision of a display device which will be located on the customer's premises. The installation, repair, and technical capability of that equipment to function in conjunction with the feature specified herein will be the responsibility of the customer. The Company assumes no liability and will be held harmless for any incompatibility of this equipment to perform satisfactorily with the network features described herein.

If the incoming call is from a caller who subscribes to RingMaster service, the telephone number transmitted will always be the main number rather than the RingMaster service number.

If the incoming call is from a caller served by a PBX, generally only the main number of the PBX is transmitted and available for display. However, in certain circumstances where facilities permit, the information associated with the actual station originating the call may be transmitted and available for display.

If the incoming call originates from a Multi-Line Hunt Group, the telephone number transmitted will always be the main number of the hunt group, unless, facilities permitting, the lines are TN (Telephone Number) identified within the group.

Calling party information via Caller ID - Basic is not available on operator handled calls.

B.   Caller ID a.k.a. Caller ID - Deluxe (Name and Number Delivery)*[1]*   (C)

This feature enables the customer to view on a display unit the calling party Directory Name and Directory Number (DN) on incoming telephone calls.

A maximum of 15 characters is allowed for transmission of the calling party Directory Name.

When Caller ID is activated on a customer's line, the calling party Directory Name and Directory Number on incoming calls will be displayed on the called CPE during the first long silent interval of the ringing cycle. The date and time of the call is also transmitted to the Caller ID customer. In locations where Caller ID customers are served from a host office in a different time zone, the time zone of the host office will be transmitted.

Caller ID also includes Anonymous Call Blocking where facilities are available. This feature allows customers to automatically reject incoming calls when the call originates from a telephone number which has invoked a blocking feature that prevents the delivery of their number to the called party. When Anonymous Call Blocking is activated on the customer's line and an incoming call marked private is received, the called party's telephone will not ring. The call will be routed to an announcement and subsequently terminated. The announcement informs the calling party that the person he or she is trying to reach will not accept the call as long as the calling number is not delivered. Incoming calls are checked for acceptance or rejection by Anonymous Call Blocking regardless of the current state of the Anonymous Call Blocking customer's line (e.g., off hook or idle).

Subsequent to establishment of Caller ID, Anonymous Call Blocking can be activated and deactivated at the customer's discretion through the use of preassigned feature access codes.

Any customer subscribing to Caller ID will be responsible for the provision of a display device which will be located on the customer's premises. The installation, repair, and technical capability of that equipment to function in conjunction with the feature specified herein will be the responsibility of the customer. The Company assumes no liability and will be held harmless for any incompatibility of this equipment to perform satisfactorily with the network features described herein.

If the incoming call is from a caller who subscribes to RingMaster service, the name and number transmitted will always be the main directory listing information rather than the RingMaster service listed name and number.   (M)

If the incoming call originates from a Multi-Line Hunt Group, the name and number transmitted will always be the main listed directory name and number of the hunt group, unless, facilities permitting, the lines are Telephone Number (TN) identified within the group.   (M)

If the incoming call is from a caller served by a PBX, generally only the main listed name and number of the PBX will be transmitted and available for display. However, in certain circumstances where facilities permit, the information associated with the actual station originating the call may be transmitted and available for display.   (M)

> **Note 1:**   Effective August 1, 2016, Caller ID – Deluxe (without ACB) is no longer available for residence subscribers.   (N)

A13. MISCELLANEOUS SERVICE ARRANGEMENTS

A13.19 TouchStar Service (Cont'd)

A13.19.5 Additional Features (Cont'd)

(M)

C.   Calling Number Delivery Blocking - Permanent

This feature enables customers to prevent the transmission of their Directory Number and/or Directory Name on all outgoing calls placed from the customer's line. Calling Number Delivery Blocking - Permanent is in operation on a continuous basis.

If the preassigned access code for Calling Number Delivery Unblocking is dialed on a line that is provisioned with Calling Number Delivery - Permanent, the Directory Number and/or Directory Name will be delivered.

Calling Number Delivery Blocking - Permanent is available to certain customers as described in A13.19.6.A.3 at no charge.

D.   Calling Number Delivery Blocking - Per Call

This feature allows a customer to temporarily prevent the transmission of that customer's Directory Number and/or Directory Name and thus control their availability to the called party.

The transmission of the Directory Number and/or Directory Name can be temporarily prevented on an as needed basis by dialing a preassigned access code prior to making a call. This action must be repeated each time a call is made to prevent the transmission of the Directory Number and/or Directory Name.

E.   (Obsoleted, See Section A113.)

A113. OBSOLETE SERVICE OFFERINGS – MISCELLNEOUS SERVICE ARRANGEMENTS

A113.19 TouchStar Service

(Obsoleted May 8, 1995, Type D) Existing Caller ID - Multi-Line customers may retain their existing service as specified in this section of the Guidebook if they so choose. However, if these customers want to change or add to their existing service, they will have to convert to Caller ID - Basic or Caller ID – Deluxe[1] as specified in A13.19. Service charges from Section A4. shall not apply for such conversions. All new customers desiring a TouchStar service calling information delivery feature will have to use A13.19.   (C)

A113.19.1 Definitions of Feature Offerings

A. Caller ID - Multi-Line

This feature allows residence and business customers with Rotary (Grouping) arrangements to receive and view on a display unit, call related information on certain incoming telephone calls.

The following information is transmitted to the Caller ID - Multi-Line customer and displayed on the called CPE during the first long silent interval of the ringing cycle: calling Directory Number, time of day (hours and minutes) the call was received, and date (month and day) the call was received.

A service order is required to establish or discontinue Caller ID - Multi-Line. Subsequent to establishment, the feature can be activated and deactivated at the customer's discretion through the use of pre-assigned feature access codes.

Note 1:   Effective August 1, 2016, Caller ID – Deluxe (without ACB) is no longer available for residence subscribers.   (N)

A113. OBSOLETE SERVICE OFFERINGS - MISCELLANEOUS SERVICE ARRANGEMENTS
A113.19 TouchStar Service (Cont'd)

A113.19.1 Definitions of Feature Offerings (Cont'd)

A. Caller ID - Multi-Line (Cont'd)

Any customer subscribing to Caller ID - Multi-Line will be responsible for the provision of a display device which will be located on the customer's premises. The installation, repair and technical capability of that equipment to function in conjunction with the features described herein will be the responsibility of the customer. The Company assumes no liability and will be held harmless for any incompatibility of this equipment to perform satisfactorily with the network feature described herein.

If the incoming call is from a line equipped with RingMaster service, the telephone number transmitted will always be the main number rather than any dependent RingMaster service number.

If the incoming call is from a caller served by a Private Branch Exchange (PBX), only the main number will be transmitted and available for display.

If the incoming call originates from a Multi-Line Hunt Group, the telephone number transmitted and available for display will always be the main number of the hunt group unless the telephone number is Telephone Number (TN) identified.

Caller ID - Multi-Line is not available on operator handled calls.

A113.19.2 Terms, Conditions And Limitations Of Service

A. The Following Limitations Apply:

1. TouchStar service is provided subject to the availability of facilities. Additionally, the features described will only operate on calls originating and terminating within TouchStar service equipped offices. Also, feature screening lists can only contain telephone numbers of subscribers served out of TouchStar service equipped offices.

2. TouchStar service is available to single line and multi-line residence and business customers who have rotary or Touch-Tone Service.

3. TouchStar service basic features will not work on an originating basis with toll terminals, trunks or some remote switching locations.

4. Appropriate service charges apply except during Company selected periods of special promotion.

5. Caller ID - Basic and Caller ID – Deluxe*1* on a flat rate basis are available to single line and multi-line residence and   (C)
    business customers. Effective May 8, 1995, Caller ID - Multi-Line which was available only for line side terminations equipped with hunting (grouping) arrangements will no longer be available to new customers. Call Tracking (BCLID) is not available for single line arrangements, but it is available for PBX and multi-line business customers. Caller ID - Basic, Caller ID – Deluxe*1*, Call Tracking, and Caller ID - Multi-Line cannot be provisioned for Basic 911 customers.

6. The Company will deliver all numbers/names, subject to technical limitations, including telephone numbers/names associated with Non-published Listing Service as described in Section A6.

7. Calling Number Delivery Blocking - Permanent is available upon request to domestic violence intervention agencies, state and county departments of human resource shelters, the Attorney General Crime Victim Assistance office, and other such agencies, their employees and volunteers, or individuals where it is certified that the personal safety of these employees or individuals will be jeopardized without blocking.

8. Calling Number Delivery Blocking - Per Call is provided subject to availability of facilities where technically feasible. The Company assumes no liability for and will be held harmless from any incompatibility of the customer's CPE to perform satisfactorily with the network feature described herein.

9. Telephone numbers transmitted via Caller ID - Multi-Line are intended solely for the use of the subscribers of this feature. Resale of this information is prohibited by this Guidebook, except the caller's number may be provided to the subscriber's client for those calls sponsored or provided by that specific client where the client's identity is disclosed to the caller and the client agrees not to distribute such information to others.

10. Calling party information via Caller ID - Multi-Line is not available on operator handled calls.

11. The Company's liability arising out of the provision of any TouchStar service feature, including but not limited to the   (M)
    delivery or non-delivery of calling numbers/names, is limited as set forth in A2.5.1.

> **Note 1:** Effective August 1, 2016, Caller ID – Deluxe (without ACB) is no longer available for   (N)
> residence subscribers.

A113.20 Reserved For Future Use

A113.21 Reserved For Future use

Note 1: Effective May 8, 1995, all existing Caller ID - Multi-Line customers may retain this service as specified in this section of the Guidebook or change to the service provided under Caller ID - Basic or Caller ID – Deluxe[2] as specified in A13.19. If existing Caller ID - Multi-Line customers change or add to their existing service, then they will have to convert to Caller ID - Basic or Caller ID – Deluxe[2]. All new single and multi-line residence and business customers desiring a TouchStar service calling information delivery feature will have to use Caller ID - Basic or Caller ID – Deluxe[2]. Call Tracking (BCLID) in A13.19 is available for PBX customers as well as business multi-line customers.   (C)

Note 2: Effective August 1, 2016, Caller ID – Deluxe (without ACB) is no longer available for residence subscribers.   (N)
