A111. OBSOLETE SERVICE OFFERINGS - ESSX-1 SERVICE

A111.1 ESSX-1 Service

(Obsoleted 10-13-95, Type D) Service rates and charges in this Section are not available for new installations, moves, transfer of service or replacements or additions to existing service.

Obsolescence Rules

1. ESSX-1 service subscribers under a month-to-month payment option will be allowed to maintain their ESSX-1 service at month-to-month rates.
2. ESSX-1 service subscribers under contract will be allowed to maintain their ESSX-1 service under the rates and charges outlined in this Section when the contract expires. For expired contracts, the Company may establish a date in the future to begin conversion of subscriber accounts to the month-to-month rates and charges outlined in this Section.

Obsoleted 08-05-85, Type D, Guidebook Reference Section A112. Not available for installations at new locations. Additional main station lines are available for additions to existing locations at the rates specified in these guidebook sections. If the customer requires features that are available from Section A112., his entire system's billing will be converted to rates specified in Section A112. (C)

A111.1.1 General

- A. ESSX-1 Service is furnished from No. 1 Electronic Switching System (ESS) central office equipment located on Company premises and associated facilities so arranged as to provide the following basic service features.
 1. Direct Inward Dialing (DID) and Identified Outward Dialing (IOD) of exchange and toll calls to and from station lines and attendant positions of an ESSX-1 system
 2. Intercommunicating calls between station lines of the same ESSX-1 system
 3. Identification by station number of outgoing toll calls dialed by a station line
 4. Call Transfer, Consultation Hold and Three-Way Calling of incoming and outgoing exchange, toll, Enhanced Private Switched Communications Service (EPSCS), and Common Control Switching Arrangement (CCSA) type calls without the assistance of an attendant
 5. Station hunting on main station lines provided by series sequential, series non-sequential, basic multi-line hunt group or call forwarding-busy line and call forwarding-don't answer
 6. Common recorded announcement interception of calls to unassigned station numbers
 7. Trunk answer any station line of incoming primary directory listing calls

A111.1.2 Terms and Conditions

A. Definitions

ATTENDANT ACCESS CIRCUIT

An attendant access circuit connects an attendant position to the serving central office. These circuits are used for the completion of calls directed to the attendant, extension of those calls to station lines and attendant assistance for station lines.

ATTENDANT POSITION

An attendant position consists of customer-provided premises equipment.

BASE SERVICE AREA

The base service area of an ESSX-1 system is located in the serving central office area within a one-half air line mile radius of the serving central office.

C. Service Charges

1. Establishment of Service
 - a. When PSLS is established at the same time as the associated exchange access line, no additional service charge is applicable.
 - b. When PSLS is established subsequent to the establishment of the associated exchange access line, service charges as specified in Section A4. apply.
2. Feature Additions
 - a. Service charges as specified in Section A4. are applicable to the addition of optional features to an existing PSLS arrangement.

A112.14 Prestige Deluxe Service

(Obsoleted 12-08-92, Type 4) Not available for new installations or on transfers of service to a new location. Existing customers may request changes and additions at the rates specified in this Section.

A112.14.1 General

- A.** Prestige Deluxe Service is an expanded group of central office features that may be provided in association with individual Flat Rate or Measured Rate Business exchange lines served by electronic switching equipment located in Company buildings.
- B.** Prestige Deluxe Service is offered to subscribers having a minimum of two and a maximum of thirty Individual Business exchange access lines.
- C.** Prestige Deluxe Service is offered subject to the availability of facilities. The rates and charges for Prestige Deluxe, as applicable, are in addition to rates and charges for the individual exchange access lines in Section A3.
- D.** Exchange Access lines terminating at different Prestige Deluxe locations may be combined into a single Prestige Deluxe arrangement for the same customer if the lines are all served by the same central office.
- E.** Prestige Deluxe lines will utilize Touch-Tone signaling. The rates and charges for Touch-Tone service will apply as appropriate in Section A13.
- F.** The billing record of toll calls on lines using Prestige Deluxe Service will not be affected by the application of the features of this Service.
- G.** Prestige Deluxe standard and optional station features, and optional system features are not permitted on the same line with existing Prestige or Custom Calling Service described in other sections of this Guidebook.
- H.** Service availability and/or operation may vary depending upon the type of central office serving the Prestige Deluxe arrangement, and the capabilities of that office. In addition, those features which require activation by switchhook flash may conflict with the operation of customer owned electronic key premises equipment.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.14 Prestige Deluxe Service (Cont'd)

A112.14.2 Service Description (Cont'd)

B. Optional Station Features

1. Alternate Answering

This feature automatically transfers incoming calls that encounter a don't answer condition after a preselected number of rings (from 1 to 7) on the subscribing Prestige Deluxe line to an alternate designated line within the Prestige Deluxe arrangement. Because of technical limitations, the actual number of ring cycles before a don't answer call is transferred may vary slightly from the preset number. The destination telephone number and the approximate number of ring cycles before the call is transferred are specified by the customer at the time this feature is ordered. This feature is in operation on a continuous basis and cannot be activated or deactivated by the customer. Changes to the feature must be requested from the Company by service order.

2. **(DELETED)**

(D)

3. Call Forwarding - Busy Line

This feature automatically re-routes calls intended for an equipped exchange line when that line is busy. The calls are routed to a preselected exchange line (destination) within the Prestige Deluxe arrangement. The destination telephone number is specified by the customer at the time this feature is ordered. A change in the destination telephone number must be requested from the Company by service order.

4. Call Forwarding Variable

This feature automatically transfers all calls made to the subscribing line to any other line, within or outside the Prestige Deluxe arrangement.

5. Call Forwarding Variable With Ring Reminder

This feature automatically transfers all calls made to the subscribing line to any other line, within or outside the Prestige Deluxe arrangement. Ring reminder provides a short burst of ringing on a line when that line is in the call forwarded state and a call is placed to that line.

6. Call Pickup

This feature allows an exchange line user, by dialing a specified answer code, to pick up an unanswered call to another exchange line in the same Call Pickup group. If the exchange line being rung has already answered, busy tone will be returned to the line user dialing the answer code.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.14 Prestige Deluxe Service (Cont'd)

A112.14.2 Service Description (Cont'd)

B. Optional Station Features (Cont'd)

7. Call Waiting Terminating

When a Prestige Deluxe station user is on an existing call, this feature provides a tone burst alert indicating that a call is waiting. Call Waiting may not be provided on an individual line that is in rotary (arranged for hunting) unless the line is the last line in a rotary hunt group.

8. Cancel Call Waiting

This feature allows the customer with Call Waiting (Terminating) service to inhibit the operation of call waiting for one call. The customer dials the Cancel Call Waiting code, obtains recall dial tone, and places a call normally. During this call, Call Waiting service will be inactive. Anyone calling the Call Waiting customer will receive the normal busy treatment, and no Call Waiting tones will interrupt the customer's call.

9. **(DELETED)**

(D)

10. Ring Reminder - Inhibit

Ring Reminder - Inhibit will prohibit a short burst or ringing on a line when that line is in the call forwarded state and a call is placed to that line.

11. Speed Call Short, Customer Changeable List

This feature allows the Prestige Deluxe station user to place a call by dialing a one digit code to any one of six telephone numbers listed by the customer. The station user can change the telephone numbers on the list by dialing a specified code plus the new telephone number desired. Each telephone number on the list is limited to a maximum of 16 digits including access and routing codes.

12. Speed Call 30, Individual, Customer Changeable List

This feature allows the individual Prestige Deluxe station user to place a call by dialing a two digit code to any one of 30 telephone numbers listed by the customer. The station user can change the telephone numbers on the list by dialing a specified code plus the new telephone number desired. Each telephone number on the list is limited to a maximum of 16 digits including access and routing codes. This optional feature may not be available in all central offices.

A112.26 ESSX Service - Vintage II (Cont'd)

A112.26.12 Optional Service Features

A. Attendant Service - General

1. Central office attendant console operation is offered as an auxiliary service with ESSX service.
2. The Call Transfer-Attendant feature is furnished with Non-Data Link or Data Link Console operation.
3. As an alternative the subscriber may designate a selected station or stations to perform attendant functions. Incoming calls to the listed directory number are connected to the selected station and then completed to the desired party by operation of the Call Transfer feature.

F. Centralized Attendant Service

1. General

a. Description

Centralized Attendant Service (CAS) allows a customer with a number of locations that are served by either a PBX or ESSX service to concentrate all attendants at a single centralized location (MAIN). Incoming calls over a local exchange trunk to an unattended location (BRANCH) are routed to the main location via a Release Link Trunk (RLT), where a CAS attendant completes the call by dialing the called party's extension number over the same Release Link Trunk facilities.

2. Types of Equipment with which CAS is Associated

a. The main location must be a subscriber's system that is equipped for this service, and utilizes Data Link Console operation.

b. The branch locations must be one of the following.

(1) Subscriber's system

(2) **(DELETED)**

(3) A location that has switching equipment that is customer-provided or is in an area that is served by another telephone company can be interconnected as a branch location only if the switching equipment is compatible with the Company's.

3. Basic Service Features

a. Remote Hold enables the attendant to hold a call without holding an RLT. The call is temporarily placed on hold at the originating System and automatically routed to an attendant after approximately 30 seconds.

b. Customer Testing of Release Link Trunks permits each RLT to a PBX branch to be dial accessed by the centralized attendant to insure it is in service and that the transmission performance is adequate.

c. Attendant Call Distribution queues and distributes calls to the CAS attendants. This provides administrative control over the team of attendants and enables the calls from the branch locations to be handled in their approximate order of arrival as attendant positions become available.

L. Outgoing Trunk Queuing - WATS (OTQ)

1. Terms and Conditions

a. The OTQ feature is only available for subscriber systems equipped with Customer Facility Group Network Access Registers from No. 1A ESS central offices equipped with the 1AE5 or later generics. This feature can only be offered to serve customer stations (excluding the attendant) that are colocated in the same ESSX service as the WATS simulated facilities.

b. The Inhibit Inflow/Outflow optional features require separate control channel(s) per queue between the central office and the customer provided control key(s) at the customer premises. Guidebook rates apply for control circuits between the control keys on customer premises and the ESSX service office.

c. In addition to the rates shown for the Music-On-Queue optional feature, rates specified in the Private Line Guidebook apply for channels between the central office and the customer provided music source at the customer premises.

2. Rates and Charges

N. Access To Customer Provided Features³

1. Terms and Conditions

- a. Appropriate Private Line Channel charges apply to each access code arranged (originate or answer) for connection to customer oriented facilities.
- b. All rates and charges for the above features are in addition to existing rates and charges for ESSX service and other services with which they are associated.
- c. Tie line rates and charges specified in Section A13. are applicable for control channels, when required, for control of equipment and/or apparatus located on customer premises.
- d. Compatible customer provided terminal equipment may be required.

Note 1: Private Line Guidebook rates for two private line channels for each display unit apply.

Note 2: Applicable to each controlling line arranged for control of station restrictions. The controlling station may be a line, attendant console or inquiry and display console.

Note 3: Rates and charges as specified in Section B3. of the Private Line Guidebook for a local channel also apply.

A112.28.8 Digital ESSX Service-VS and 200

A. Main Station Lines

1. The Digital ESSX service-VS and 200 main station line rate will be composed of the Intercom charge and the appropriate Exchange Circuit charge. Any charges for inside wiring already in place will also continue to apply.

a. Rates and Charges

(1) Intercom Charge, ESSX service-VS⁵

(a)	Per line	-	9.50	9.50	9.50	5.00	NRX
-----	----------	---	------	------	------	------	-----

(2) Intercom Charge, ESSX service-200⁵

(a)	Per line	-	9.50	9.50	9.50	5.00	NRX
-----	----------	---	------	------	------	------	-----

(3) Exchange Circuits, Flat Rate ESSX service-VS⁵

(a)	1/4 mile	-	7.30	7.30	7.30	4.00	EXMAX
(b)	1/2 mile	-	10.50	10.50	10.50	5.55	EXMBX
(c)	3/4 mile	-	15.95	15.95	15.95	8.45	EXMCX
(d)	1 mile	-	17.40	17.40	17.40	8.95	EXMDX
(e)	1 1/2 miles	-	26.35	26.35	26.35	13.55	EXMEX
(f)	2 miles	-	36.30	36.30	36.30	19.10	EXMFX
(g)	2 1/2 miles	-	36.60	36.60	36.60	19.25	EXMGX
(h)	3 miles	-	36.80	36.80	36.80	19.35	EXMHX
(i)	3 1/2 miles	-	37.10	37.10	37.10	19.50	EXMJX
(j)	4 miles	-	37.30	37.30	37.30	19.65	EXMKX

Note 1: Each of the rate elements shown provide only the basic auxiliary line termination equipment and facilities located at the central office where the basic service is provided and is in addition to other rates and charges applicable for the associated services.

Note 2: One Installation Charge applies when any number of miscellaneous lines of the same type are installed at the same time, per occasion, per same group.

Note 3: Recurring rates apply per DS1 circuit terminated regardless of number of channels activated at time of initial installation.

Note 4: One installation charge applies when any number of DS0 channels on the same DS1 circuit are activated at the same time, per occasion, per same type.

Note 5: New rates become effective with billing cycles beginning on or after January 4, 2003.

- Time of Day Routing for Automatic Route Selection
- Authorization Codes
- Automatic Circuit Assurance II
- Direct Inward System Access I
- Network Speed Calling I
- Priority Off Hook Queuing II
- Facilities Restriction Levels

N. Attendant Features - Non Data Link Console Operation II

1. General

Central office attendant console operation is offered where all console functions are performed at the expense of the subscriber utilizing customer provided compatible terminal equipment.

Additional station line features may be obtained from A112.28.8, A112.28.9 and A112.28.10.

Control channels are required for various optional features as indicated and are provided at the rates and charges specified in Section B3. of the Private Line Guidebook.

2. Rates and Charges

a. Attendant features arranged to work with Non Data Link Consoles.

P. Automatic Call Distribution I (ACD)

1. General

- a. Automatic Call Distribution - (ACD) features provide advanced call distribution and queuing capabilities as an integrated function of Digital ESSX service. ACD may be offered to ESSX service main station lines of customers where facilities permit. The ACD features are grouped into two sets: ACD Basic, without Network Management Reports (NMR) and ACD with NMR.
- (1) Agent Position - An Electronic Business Set (EBS) used with the ACD for call distribution.
 - (2) Supervisory Position - An Electronic Business Set used in conjunction with ACD to supervise the ACD group.
 - (3) Incoming Call Queue
 - When all agents are busy, the incoming calls are placed in the appropriate incoming queues on a priority and order-of-arrival basis. Calls are then removed as agents become available to answer them.
 - (4) ACD Basic includes one primary directory number: ACD Basic has the capability for supplemental ACD numbers.
 - (5) Agent Position Keys:
 - Call/Answer Supervisor Key¹ - If an agent requires assistance while handling an ACD call, the agent can call the supervisor for private consultation (followed by transfer of the caller to the supervisor, if desired). If the supervisor is busy with another agent call, the calling agent receives a busy tone and returns to the ACD caller. The agent can also answer a call from the supervisor by depressing the Call/Answer supervisor key.
 - Agent Not Ready Key - This key is used to terminate active calls and/or allow the agent time to follow up on the call before being returned to the idle agent queue to answer another incoming call.

Note 1: A separate private line is required.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.30 Digital Electronic Tandem Switching Features (Cont'd)

A112.30.2 Terms and Conditions (Cont'd)

C. Definitions (Cont'd)

- 10. Time of Day (TOD) system control provides a method of automatically changing network routing parameters according to a prespecified schedule. TOD is required for TOD ARS and TOD NCOS. (Cont'd)
 - a. TOD Network Class of Service (NCOS) (I) provides the capability of mapping normal NCOS values into new values based on TOD, day of week, and day of year.
 - b. TOD ARS (I) will allow the customer to activate different routing patterns on specified ranges. Calls will be routed via instructions given in the route list elements.
 - c. Time of Day (TOD, II) system control provides a method of automatically changing the routing parameters according to a prespecified schedule.
- 11. Traveling Class Mark (TCM) provides the capability to transmit across a private network certain information along with a dialed number to identify privileges available to the caller. This feature equates to Network Information Signaling in the DMS-100.
- 12. Uniform Numbering (UN) provides a customer specified numbering plan, utilizing seven digits for on-net and ten digits for off-net or seven digits for on-net and 1+10 digits for off-net. Each customer switch connected to the ETN is identified by a unique three digit location code called RNX.
- 13. Network Class of Service (NCOS) is an information bearing code that is assigned to every station line, trunk, authorization code, and attendant console at each ETN Tandem location. The NCOS is comprised of several pieces of information that combine to represent the identity of the station, trunk or attendant console to which it is assigned. NCOS equates to D-PAT for 5ESS.

(d) Arrangement I, Additions/Deletions to NPA or C.O. Code Group, each	-	-	-	NA
(e) Arrangement I, rearrangement from one screening arrangement to a different screening arrangement, per main station line or group of lines changed at the same time without main line number change ²	-	-	-	NA
(f) Arrangement II ³ , per main station line equipped	1.75	1.65	1.60	SCG
(g) Arrangement II ³ , per group with same screening arrangement and same access code	33.00	31.00	30.00	SCZ

Note 1: Except where all lines have the same arrangement, the Split Service feature is required. This feature is not available on IDDD calls. The provision of this feature will not affect the local or toll billing for any completed call.

Note 2: Main station lines with Station Dial Code Screening are assigned to a specific code screening arrangement by main station line number. Removal of the code screening arrangement from a main station line number(s) or changing the main station line number(s) from one code screening arrangement to a different code screening, requires a main station line number rearrangement.

Note 3: Arrangement II is available only with access to channels associated with private line networks and requires the associated facilities to be senderized and equipped with uniform numbering.

(D)

F. Centralized Attendant Service

1. General

a. Description

Centralized Attendant Service (CAS) allows a customer with a number of locations that are served by either a PBX or ESSX system to concentrate all attendants at a single centralized location (MAIN). Incoming calls over a local exchange trunk to an unattended location (BRANCH) are routed to the main location via a Release Link Trunk (RLT), where a CAS attendant completes the call by dialing the called party's extension number over the same Release Link Trunk facilities.

2. Types of Equipment with which CAS is Associated

a. The main location must be an ESSX system that is equipped for this service, and utilizes Data Link Console operation.

b. The branch locations must be one of the following.

(1) An ESSX system.

(2) **(DELETED)**

(3) A location that has switching equipment that is customer-provided or is in an area that is served by another telephone company can be interconnected as a branch location only if the switching equipment is compatible with the Company's.

3. Basic Service Features

a. Remote Hold - enables the attendant to hold a call without holding an RLT. The call is temporarily placed on hold at the originating System and automatically routed to an attendant after approximately 30 seconds.

b. Customer Testing of Release Link Trunks - permits each RLT to a PBX branch to be dial accessed by the centralized attendant to insure it is in service and that the transmission performance is adequate.

c. Attendant Call Distribution - queues and distributes calls to the CAS attendants. This provides administrative control over the team of attendants and enables the calls from the branch locations to be handled in their approximate order of arrival as attendant positions become available.

- 1. Terms and Conditions
 - a. The OTQ feature is only available for ESSX systems equipped with Customer Facility Group Network Access Registers from No. 1 ESS central offices equipped with the 1E5 or later generics. This feature can only be offered to serve customer stations (excluding the attendant) that are collocated in the same ESSX as the WATS simulated facilities.
 - b. The Inhibit Inflow/Outflow optional features require separate control channel(s) per queue between the central office and the customer provided control key(s) at the customer premises. Guidebook rates apply for control circuits between the control keys on customer premises and the ESSX office.
 - c. In addition to the rates shown for the Music-On-Queue optional feature, rates specified in the Private Line Guidebook apply for channels between the central office and the customer provided music source at the customer premises.

A112.32 ESSX Service - Vintage I (Cont'd)

A112.32.13 Customer Management Features¹ (Cont'd)

A. ESSX Customer Administration Service (Cont'd)

2. Terms and Conditions (Cont'd)

- j. The following types of lines will be restricted from Station TN Rearrangement capability. Service option and feature change capabilities will still be available except on lines assigned to multiline hunt groups.
 - Station lines assigned to multiline hunt groups
 - Attendant Lines
 - Any ESSX line which has a special hardware configuration (e.g., ground start lines and lines having SCAN points or signal distribution points)
 - Manual lines (e.g., station lines with full originating and/or terminating restrictions)
- k. ECAS functions performed by the Company at the customer's request subsequent to the initial installation will be subject to the nonrecurring, charges specified in 3.b. following.
- l. The Per System charges specified in 4. following apply when a feature is initially activated in a Common Block.
- m. Any required changes in customer provided equipment as a result of growth, desired enhancements or technological advancement, will be the responsibility of the ECAS customer. Compatibility with customer provided station terminal equipment is not guaranteed.
- n. The ECAS customer is responsible for assigning and maintaining a record of station feature assignments. The ECAS customer also agrees to provide the Company with a central point of contact for inquiries and/or trouble reports involving station features.
- o. ECAS customers will be responsible for initiating a Service Order to correct any information pertaining to Directory Listings that changed as a result of a ECAS TN swap. The appropriate Service Order charges specified in Section A4. apply.
- p. ECAS customers will be limited to one (1) TN swap per day as a priority request. The number of feature changes that can be requested as priority changes will be determined by the Company when ECAS is ordered.
- q. When required by the Company to use a Security Card, the ECAS subscriber will be required to authenticate with the card before network access is permitted. The network access security system validates the user, and establishes the call across the network to the ECAS host computer. In conjunction with the Security Card, the Company will provide a login and password in order to maintain secure access and an audit trail. Rates for the Security Card are outlined in 4.b.(2) following

3. ECAS Capability - Rates and Charges

ESSX-XL customers will have to pay for ECAS on a per line basis subject to the rates specified in (3) following. The installation charge will be reapplied if an ESSX-XL customer changes their ECAS billing arrangement subsequent to the installation of the ECAS feature.

A112.34.12 Reserved For Future Use

A112.34.13 Customer Management Features

A. Digital ESSX Customer Administration Service

1. General

- a. The Digital ESSX Customer Administration Service (DECAS) feature permits Digital ESSX customers to activate/deactivate selected optional features, change certain service options, and change feature configurations on predesignated Digital ESSX station lines. Customer provided terminal equipment is required for the operation of the DECAS feature.
- b. For DECAS equipped station lines, DECAS allows the customer to verify and/or display the assignment of features on a single station line, range of station lines or all station lines to determine which station or stations have a particular feature or service option.
- c. Certain Digital ESSX station lines may be specified by the customer to be exempt from this feature. Additionally, the Company reserves the right to make station lines inaccessible for DECAS.
- d. Changing the status of a station line from accessible to DECAS to inaccessible or vice versa, must be done by the Company via a Service Order request. Appropriate Service Order Charges specified in Section A4. apply.
- e. The Company has made the following provisions to protect the integrity of the switching system database and to ensure the security of DECAS changes.
 - (1) A DECAS customer's change, display or verify capabilities are restricted to that particular customer's own Digital ESSX system.

Note 1: Nonrecurring, recurring rates and service charges do not apply when Code Restriction is applied to NXX assigned to 900 and 976 Services.

A123.2 Obsolete ESSX-1 Optional Features

(Obsoleted 10-13-95, Type D) Service rates and charges in this Section are not available for new installations, moves, transfers of service or replacements or additions to existing service.

Obsolescence Rules

1. ESSX-1 Optional Feature service subscribers under a month-to-month payment option will be allowed to maintain their existing service at month-to-month rates.
2. ESSX-1 service subscribers under contract will be allowed to maintain their ESSX-1 service under the rates and charges outlined in this Section of the Guidebook when the contract expires. For expired contracts, the Company may establish a date in the future to begin conversion of subscriber accounts to the month-to-month rates and charges outlined in this Section of the Guidebook.

(Obsoleted August 5, 1985, Type D, Reference A23.)

Available for existing service and additions at existing ESSX-1 locations.

A123.2.4 Customer Management Features

A. ESSX Customer Administration Service

1. General

- a. The ESSX Customer Administration Service (ECAS) feature permits ESSX-1 customers to activate/deactivate selected optional features, change certain service options, and change feature configurations on predesignated ESSX-1 station lines. Customer provided terminal equipment is required for the operation of the ECAS feature.
- b. For ECAS equipped station lines, ECAS allows the customer to verify and/or display the assignment of features on a single station line, range of station lines or all station lines to determine which station or stations have a particular feature or service option.
- c. Certain ESSX-1 station lines may be specified by the customer to be exempt from this feature. Additionally, the Company reserves the right to make station lines inaccessible for ECAS.
- d. Changing the status of a station line from accessible to ECAS to inaccessible or vice versa, must be done by the Company via a Service Order request. Appropriate Service Order charges specified in Section A4. apply.
- e. The Company has made the following provisions to protect the integrity of the switching system database and to ensure the security of ECAS changes.
 - (1) An ECAS customer's change, display or verify capabilities are restricted to that particular customer's own ESSX-1 system.
 - (2) All changes are audited as they are entered by the ECAS customer. Invalid changes will not be accepted. An error message detailing which command is in error will be given.
 - (3) Customer access to the database is protected using a dialup, login, password/dialback arrangement.
- f. An ECAS customer can schedule changes (individual or bulk) for completion by the next day or for a future day. Additionally priority changes may be requested and the changes completed the same day subject to Terms and Conditions in A123.2.4.A.2.d., A123.2.4.A.2.1. and A123.2.4.A.2.m.
- g. Definitions pertaining to ECAS/ESSX-1 features are specified in A111.1.2.

A123.2 Obsolete ESSX-1 Optional Features (Cont'd)

A123.2.4 Customer Management Features (Cont'd)

A. ESSX Customer Administration Service (Cont'd)

2. Terms and Conditions (Cont'd)

- g. The following types of lines will be restricted from Station TN Rearrangement capability. Service option and feature change capabilities will still be available except on lines assigned to multiline hunt groups.
 - Station lines assigned to multiline hunt groups
 - Attendant Lines
 - Any ESSX-1 line which has a special hardware configuration (e.g., ground start lines and lines having SCAN points or signal distribution points)
 - Manual lines (e.g., station lines with full originating and/or terminating restrictions)
- h. ECAS functions performed by the Company at the customer's request subsequent to the initial installation will be subject to the nonrecurring charge specified in A123.2.4.A.3.b.
- i. The Per System charges specified in A123.1.4.A.3. apply when a feature is initially activated in a Common Block.
- j. Any required changes in customer provided equipment as a result of growth, desired enhancements or technological advancement, will be the responsibility of the ECAS customer. Compatibility with customer provided station terminal equipment is not guaranteed.
- k. The ECAS customer is responsible for assigning and maintaining a record of station feature assignments. The ECAS customer also agrees to provide the Company with a central point of contact for inquiries and/or trouble reports involving station features.
- l. ECAS customers will be responsible for initiating a Service Order to correct any information pertaining to Directory Listings that changed as a result of ECAS TN swap. The appropriate Service Order charges specified in Section A4. apply.
- m. ECAS customers will be limited to one (1) TN swap per day as a priority request. The number of feature changes that can be requested as priority changes will be determined by the Company when ECAS is ordered.

3. Rates and Charges

a. ECAS Capability

ESSX-1 customers having greater than 600 total main station lines will have to pay for ECAS on a per line basis subject to the rates specified in A123.2.4.A.3.a.(3). The installation charge will be reapplied if *an* ESSX-1 customer having more than 600 lines changes their ECAS billing arrangement subsequent to the initial installation of the ECAS feature. (M)
