A20.3.8 Saver Service Options (Cont'd)

A. Description of Service (Cont'd)

4. The service is available in connection with individual line, PBX, Centrex Type Services and Remote Call Forwarding (RCF) Service except as specified in 6. following.
5. The service is offered on an account basis only.
6. The service is not available for use with IntraLATA Only Outward WATS and Combined Outward WATS in Section A19., Mobile Telephone Service and Dormitory Communications Service.

C. Budgeting Plan (Business) - Depending upon the option selected, a customer may use up to an initial block of time of toll calling per account for a fixed monthly rate. In the same billing period, usage which exceeds the initial block of time will be billed on a per minute of use basis. At the customer's option, multiple accounts of a customer may be billed on the same bill, including accounts that represent separate locations and accounts that represent residential service. However, for the account to be eligible for the service, all services in the account must be billed on the same bill. Because this service is account based, partial billed to numbers (BTNs) are not eligible for the service; e.g., the consolidation of toll usage from multiple BTNs without the consolidation of all other service elements associated with those BTNs is not allowed.

1. Method of Determining Monthly Usage Charges

- a. Usage is determined for each call based on minutes and tenths of minutes (or fraction thereof), with a minimum call duration of 30 seconds. This value is then multiplied by the rate per minute for the rate option selected by the customer. The resultant amount is truncated to whole cents for each call.
- b. For the billing period, the amount for each call, as determined in a. preceding, is totaled for all lines in the billing account to determine the total usage amount to be billed, subject to the requirement in c. following.
- c. The amount, as determined in b. preceding, is subject to a Minimum Monthly Settlement Amount as specified by the appropriate rate option selected by the customer (minutes times rate per minute), for the billing account (Reference 3. following).

2. Rates

- a. Rates are applied according to the method specified in 1. preceding.

(1) Business (WatsSaver service) - Option A - Per Month

	Monthly Rate	Rate Per Minute	USOC
(a) 120 minute (2 hour) minimum, per account	\$-	\$-	OSWO2
(b) Each additional minute of use	-	.15	NA

Note 1: The Minimum Monthly Settlement Amount is based on the option minutes multiplied by the peak rate. Additional usage charges at the appropriate rate (either peak or off peak) will be incurred only after the Settlement Amount has been satisfied. The Minimum Monthly Settlement Amount may be satisfied through any combination of peak and off peak calling. For example, if all minutes in the selected option are off peak, the minutes of use included in the Minimum Monthly Settlement Amount, would, in effect, be increased. See Minimum Monthly Settlement Amount table (Reference A20.3.8.B.3.).

D. Budgeting Plan (Business) - Two-Way WatsSaver service. Depending upon the Option selected, a customer may use up to an initial block of time of toll calling per account for a fixed monthly rate. In the same billing period, usage which exceeds the initial block of time will be billed on a per minute of use basis. At the customer's option, multiple accounts of a customer may be billed on the same bill, including accounts that represent separate locations and accounts that represent residential service. Budgeting Plan - Two-way WatsSaver service applies to outward dialed calling as described in A.3. preceding and all station-to-station dialed (DDD) calling in the reverse direction to the telephone of the subscriber to the plan as described in A.8. preceding. Combined usage from both outward dialed toll calls and incoming toll calls (as previously described) will be used to satisfy the usage requirements of the plan options.

1. Method of Determining Monthly Usage Charges

- a. Usage is determined for each call based on minutes and tenths of minutes (or fraction thereof), with a minimum call duration of 30 seconds. This value is then multiplied by the rate per minute for the rate option selected by the customer. The resultant amount is truncated to whole cents for each call.
- b. For the billing period, the amount for each call, as determined in a. preceding, is totaled for all lines in the billing account to determine the total usage amount to be billed, subject to the requirement in c. following.

A20.3.9 Custom Rate Plan

A. Description of Service

1. Custom Rate Plan is an Optional Calling Plan offered to residential customers and is applicable to intrastate intraLATA long distance calls originated and terminated in the customer's home state. Eligible calls include those dialed on a Station-to-Station basis (as either Dial or Operator). These classes of calls are defined in Section A1., Definition of Terms. (C)
2. Individual message detail is included as part of this service

B. Timing of Messages

1. Initial thirty second rates given in the rate schedule in E.3. following are for connections of thirty seconds or any fraction thereof. All additional one-tenth minute rates given in the rate schedule in E.3. following are for each additional one-tenth minute or any fraction thereof that the connection continues beyond the first thirty seconds.
2. The time at the beginning of each billing increment determines the applicable rate period for that billing increment. The time observed at the rate center of the calling station applies. (C)
3. On Station-to-Station calls, chargeable time begins when connection is established between the calling station and the called station, Miscellaneous Common Carrier mobile radio system, or PBX system.
4. **(DELETED)** (D)
5. Chargeable time ends when the calling station "hangs up" thereby releasing the network connection. If the called station "hangs up" but the calling station does not, chargeable time ends when the network connection is released either by automatic timing equipment in the telephone network or by the Company operator.
6. Chargeable time does not include time lost because of faults or defects in the service. (D)

C. **(DELETED)** (D)

D. Rates Applicable on Certain Holidays

On Christmas Day (December 25), New Year's Day (January 1), Independence Day (July 4), Thanksgiving Day, and Labor Day, the holiday rate applicable is the discount rate in E.4. following.

E. Rates and Charges

1. There is no monthly recurring charge for this service.
2. Charges for each eligible message are determined as follows:
 - a. The initial billing increment for telephone connections between all points is thirty seconds. Additional billing increments are in one-tenth minute increments. Initial thirty second and additional one-tenth minute rates for all messages are specified in the Basic Rate Schedule Table in 3. following.
 - b. If any portion of a message occurs in the discount rate period, the Basic Rate Schedule charges are discounted, as specified in 4. following.
 - c. For any Operator Station-to-Station message, the applicable Billing and Operator Surcharges specified in 5. following are added to the Basic Rate Schedule charge. (C)

3. Basic Rate Schedule

a. The following table contains the initial thirty second and additional one-tenth minute rates for the Day rate period for all call classes. These rates are based on chargeable time (duration) of the message, as specified in B. preceding.

a. Rate periods and rate discounts are described in the table following.

	Rates and Applicable Periods

7:00 AM to 6:00 PM ¹	Full Rate	Full Rate	Full Rate	Full Rate	Full Rate	50% Disc.	50% Disc.
6:00 PM to 7:00 AM ¹	50% Disc.	50% Disc.	50% Disc.	50% Disc.	50% Disc.	50% Disc.	50% Disc.

b. Day Rate Period = Full Rate = Peak Period

Discount Rate Period = 50% Discount = Off-Peak Period

c. Discounts for the discount rate period are expressed as a percent reduction of the Basic Rate Schedule charges (in 3. preceding). The discount is applied to the total Basic Rate Schedule charge for that portion of a message occurring within the reduced rate period. When application of the discount results in a fractional charge, the amount will be rounded down to the lower cent.

d. No discount applies for that portion of a message occurring in the Day rate period.

e. When a message spans more than one rate period, total charges for the billing increments in each rate period are calculated and the results for each rate period are totaled to obtain the total message charge.

5. Billing and Operator Surcharges

a. For Operator station-to-station messages, the applicable Billing and Operator Surcharges shown in A18.3.1.B. are in addition to the Basic Rate Schedule charge for that message. Discounts do not apply to the Billing and Operator Surcharges.
