A131. OBSOLETE SERVICE OFFERINGS - MULTI-LOCATION BUSINESS SERVICE (MLBS)

A131.1 Reserved For Future Use (Cont'd)

A131.2 Systems Communication Service (SCS)

(Obsoleted 10-13-95, Type D) Service rates and charges in this Section are available for inward activity of existing Systems Communication Service subscribers in conjunction with ESSX service or Digital ESSX service and only as specified in the obsolescence rules stated in A112.26 and A112.28. Not available for new service or entire moves of existing service to new locations. (T)

A131.2.1 General

A. Service Description

1. Systems Communication Service (SCS) is an arrangement that provides calling, with abbreviated dialing, among multiple ESSX service systems for a single customer. SCS allows users in one ESSX service system to dial four or five digits to reach users in the other destinations included in the SCS arrangement. Destinations included in the SCS arrangement may be PBX, ESSX service or any other location which may be dialed directly. The calls can be local or toll. The customer may subscribe to ESSX service at the other locations, but it is not required.
2. The only function SCS offers to ESSX service customers is abbreviated dialing to the other selected locations.

A131.2.2 Terms and Conditions

A. Service Specifications

1. SCS will allow four or five digit dialing on a system basis to the customer's distant number range. SCS will prefix any Access Code (if required), Home (HNPA) or Foreign Numbering Plan Area (FNPA) (if required), and NXX dialed by the customer before routing to the distant location.
2. For each SCS destination, customers must specify the number of other destinations to be called via SCS and the quantity of terminations required.
3. The four or five digit abbreviated dialing ranges cannot be duplicated at any other SCS location or destination.
4. ESSX service customer groups (Digital) or common blocks (Analog) are required at each serving central office at which SCS is provided.
5. SCS service will be offered only where facilities permit.
6. IntraLATA toll calls will be subject to the applicable rates for the authorized intraLATA toll service selected by the customer. InterLATA toll calls will be routed to the interexchange carrier (IC) to which the customer has presubscribed.
7. The Variable Term Payment Plan *Terms and Conditions* in A2.4.8 apply. (T)
8. A Termination Liability charge will apply to subscribers who discontinue service prior to the expiration of the selected payment plan. The Termination Liability charge will be 100 percent of the remaining monthly charges of the selected payment plan.

A131.2.3 Definitions

A. Features

Abbreviated dialing is the only feature offered by SCS.

B. Destination

Destination represents the number of routes or other locations in the SCS arrangement.

C. Termination

Termination represents the number of simultaneous originating SCS calls from each ESSX service location.

A131.2.4 Rates and Charges

A. General

SCS service rates and charges are in addition to those incurred for other services described in this *guidebook*. (T)

EFFECTIVE: September 1, 2006
