

1. TWO-POINT MESSAGE TELECOMMUNICATION SERVICE^{/1/}

A. GENERAL

1. Description

A toll telephone message is a completed call or telephonic communication between two exchange stations located in different local service areas, between toll stations or between a toll station and an exchange station to which rates are applicable in accordance with the provisions of this Guidebook.

2. Regulations

a. The toll service charges specified in this Guidebook are in payment for all service furnished between the calling and the called stations.

b. Toll service is classified and rated as either:^{/2/}

- Dial station
- Operator station

(C)
(C)

c. Regulations applicable to

Use of Service for Unlawful Purposes

Legal requirements for refusal or discontinuance of service are set forth in Guidebook, Part 2, Section 2.

d. The designated commercial credit cards, authorized by contract for use, are as follows: American Express (AE), Master Card, VISA, Carte Blanche and Diner's Club, JCB (Japanese Credit Bureau).

A. GENERAL (cont'd)

2. Regulations (cont'd)

e. California relay service calls may not be placed to:

- 900 numbers^{/3/}
- Time or weather recorded messages
- Other informational recordings

(C)

f. Express Call Completion

Express Call Completion (ECC) provides an incoming directory assistance customer requesting an intraLATA number a mechanized announcement offering call completion to the listed number requested.

The mechanized announcement will instruct the caller that for an additional charge they may have their call automatically completed by depressing a specific digit on the Touch Tone keypad. All completed calls will be charged the ECC service charge, in addition to any other appropriate charges.²

ECC service is effective on and after September 30, 1990.

ECC will only be furnished where facilities and operating conditions permit.

ECC will not be provided to the following services:

800 Service

900 Service^{/3/}

Inmate Service

(D)

(N)

This offering provides call completion on a LATA wide basis only.

The Company assumes no responsibility or liability for any errors in the information furnished. The caller shall indemnify the Company and hold it free and harmless of and from any and all claims, demands or damages that shall arise from the use of the service.

/1/ Also known as Local Toll.

/2/ See A.4.a.(12) and (14), following for rate.

/3/ California 900 and California 976 services withdrawn effective November 1, 2010.

A. GENERAL (cont'd)

2. Regulations (cont'd)

f. Express Call Completion (cont'd)

This service is furnished solely for the telephone calling purposes of the caller.

Provisions concerning limitations of liability and allowance for interruptions in service are set forth in Guidebook Part 2, Section 2.

The usage associated with a call will be subject to any applicable discount.

Centrex, PBX and Commstar II^{/2/} customers with toll restriction will be offered ECC on an alternate billing basis only.^{/3/}

(C)

g. The MTS usage charges associated with up to five (5) ISDN lines, used for data and video applications, for Public Schools, Libraries and Community Colleges and Private Schools as defined in Guidebook Part 2, Section 2, participating in the Education First Program shall be waived for a period of one (1) year. The one (1) year period shall begin on the date of installation of the ISDN lines and continue for twelve (12) months after which time the customer shall begin paying the usage charges associated with these lines.

h. When calls are made to or from prefixes used by Emergency Preparedness Trailers within the lata of each prefix, no charge will be made to the calling party. For calls made outside of the LATA, toll charges will apply. The Emergency Preparedness prefixes are:

LATA	AREA CODE	PREFIX
1	510	999
1	650	999
2	530	999
3	916	999

A. GENERAL (cont'd)

3. Territory

Between two points within a LATA where the respective rate centers of such points also are located in said LATA.

4. Rates and Charges

a. Method of Applying Rates^{/1/}

(1) Toll rates between points (cities, towns or localities) are based on the airline distance between rate centers. In general, each point is designated as a rate center; certain small towns or localities are assigned adjacent rate centers with which they are closely associated for communication purposes.

(2) Determine the rate airline distance between the rate centers involved.

Where a point is divided into district areas specified in Guidebook, Part 9, Section 2, the rate airline distance is the mileage between the rate center of the district area and the rate center of the other point, except that when such mileage exceeds 40 miles the rate airline distance is the mileage between the exchange rate center and the rate center of the other point with a minimum of 41 miles.

If both points are divided into district areas the rate airline distance is the mileage between the rate centers of the district areas, except that when such mileage exceeds 40 miles the rate airline distance is the mileage between the exchange rate centers with a minimum of 41 miles.

(3) Refer to (11) following. Opposite the mileage step which includes the mileage determined as in (2) preceding, will be found the rates for sent-paid dial initial periods and rates for additional minutes for all classes of service between the rate centers involved. Below the table are the service charges for operator station service. (C)
(C)
(C)

/1/ In addition to the rates shown in this schedule, one or more of the operator assistance service charges in Guidebook Part 11, Section 2, may apply per message.

Dial station rates apply to:

Sent-Paid messages dialed and completed by the customer from a residence, business or customer-owned pay (COPT) telephone without the assistance of a Company operator.

Sent-Paid messages placed with the assistance of an operator where:

- Dial completion facilities are not available.
- Equipment or circuit conditions cause unsuccessful dial attempts.
- The customers identify themselves as being disabled and unable to dial. (C)
- The Company operator must identify the calling number where automatic recording equipment is not available.
- The Company operator reestablishes the connection after a service failure on a customer dialed call.
- The California Relay Service communication assistant completes a call between a TDD and a non-TDD telephone.
- The customers are identified as being visually or physically impaired (mobility impaired) and they use a Company operator to make a local call (except COPT).

a. Method of Applying Rates (cont'd)

(7) Time of Day and Day of Week

The rate applicable is determined by the day and time (standard or daylight savings) at the rate center of the calling station when the connection is established.

(8) Initial Period and Additional Minutes and Rounding

Rates are quoted in terms of initial period and additional minutes.

Initial Period:

- Dial Station, Operator Station and California Relay Service. (C)
- Initial period rates shown in (11) following, are for connections of one minute or any fraction thereof. (C)

Additional Minutes

All additional minute rates shown in (11) following, are for each additional minute or any fraction thereof that the connection continues beyond the initial period. (C)

Rounding

Calls are rated using one of the following schedules^{/2/}. Each call will be billed a one minute minimum. After the initial one minute minimum, calls will be billed in one minute increments. Each fractional call is rounded to nearest cent.

Calls are rated using one of the following schedules^{/3/}. Each call will be billed an 18 second minimum. After the initial 18 second minimum, calls will be billed in six second increments. each fractional call is rounded to nearest cent.

(9) Timing of Messages - Chargeable Time

- Chargeable time for calls placed on a Dial, Operator, or California Relay Service basis begins when connection is established between the calling station and the called station or private branch exchange switchboard or radiotelephone company system.

(C)

- Chargeable time for all messages ends when the calling station "hangs up" thereby releasing the network connection. If the called station "hangs up" but the calling station does not, chargeable time ends when the network connection is released either by automatic timing equipment in the telephone network or by the Company operator.
