

ACCESS SERVICE

13. Additional Engineering, Additional Labor and Miscellaneous Services

In this section normally scheduled working hours are an employee's scheduled work period in any given calendar day (e.g., 7:00 a.m. to 4:00 p.m.) for the application of rates based on working hours.

13.1 Additional Engineering

Additional Engineering will be provided by the Utility at the request of the customer only when:

- (A) A customer requests additional technical information after the Utility has already provided the technical information normally included on the Design Layout Report (DLR) as set forth in 6.1.5 and 7.1.6 preceding.
- (B) Additional engineering time is incurred by the Utility to engineer a customer's request for a customized service as set forth in 7.1.1 preceding.

The Utility will notify the customer that additional engineering charges, as set forth in 13.1.3 following, will apply before any additional engineering is undertaken.

13.1.1 Reserved (T)

13.2 Additional Labor

In this section the Normal Business Day is Monday - Friday,
8 am - 5 pm.

All charges apply, per technician.

Holidays will be defined as: New Year's Day, Memorial Day,
Independence Day, Labor Day, Thanksgiving Day, the day after
Thanksgiving and Christmas Day.

Additional labor is that labor requested by the customer on a given
service and agreed to by the Utility as set forth in 13.2.1 through
13.2.5 following. The Utility will notify the customer that
additional labor charges as set forth in 13.2.6 following will apply
before any additional labor is undertaken.

13.2.1 Overtime Installation

Work related efforts of the Company performed outside a
Normal Business Day.

13.2.2 Reserved

Material omitted now on Sheet 588

13.2.3 Stand-by

Stand-by includes all time in excess of one-half (1/2) hour during which Utility personnel stand by to make cooperative tests with a customer to verify facility repair on a given service. (T)

13.2.4 Testing and Maintenance with Other Telephone Companies

Additional testing, maintenance or repair of facilities which connect to facilities of other telephone companies, which is in addition to normal effort required to test, maintain or repair facilities provided solely by the Utility.

13.2.5 Other Labor

Other labor is that additional labor not included in 13.2.1 through 13.2.4 preceding, including, but not limited to labor incurred for the installation of inside wire, used to extend the Point of Termination as set forth in 2.1.5 preceding, and labor incurred to accommodate a specific customer request that involves only labor which is not covered by any other section of this tariff.

13.3 Miscellaneous Services

13.3.1 Maintenance of Service

- (A) When a customer reports a trouble to the Utility for clearance, and no trouble is found in the Utility's facilities, the customer shall be responsible for payment of a visit charge for the period of time from when Utility personnel are dispatched to the customer's premises to when the work is completed. Failure of Utility personnel to find trouble in Utility facilities will result in no charge if the trouble is actually in those facilities, but not discovered at the time.
- (B) The customer shall be responsible for payment of a visit charge as set forth in Guidebook, Part 8, Section 8 when the Utility (T) dispatches personnel to the customer's premises, and the trouble is in the equipment of communications systems provided by other than the Utility or in detariffed CPE provided by the Utility.

In either this case or in (A) preceding, no credit allowance will be applicable for the interruption involved if the visit charge applies.

13.3.2 Restoration Priority

Existing Restoration Priority (RP) was superceded by Telecommunications Service Priority (TSP), as specified in Section 10.8.1(C), preceding, on September 10, 1990. Existing RP arrangements for Special Access Services will remain in effect for thirty (30) months until March 10, 1993. If RP Service is converted to TSP, the customer will incur the Priority Restoration Level Implementation Nonrecurring Charge as specified in 10.8.3(D) (2) (a), preceding.

13.3.3 Presubscription

(T)

(A) Description

(1) Presubscription is a procedure by which an end user, or an authorized agent for public pay telephones, may designate a specific carrier(s) to complete interLATA and/or intraLATA calls without dialing a carrier identification code. The end user's designated interLATA carrier is called its Primary Interexchange Carrier (PIC) and its designated intraLATA carrier is called its Local Primary Interexchange Carrier (PIC).

(T)

The designated PIC may direct the routing of 1+, 0+, and 00- and 011+ sent-paid interLATA, interstate and international calls either to itself or another carrier.

(T)

With the exception of the calls listed below, the designated LPIC may direct the routing of 1+ and/or 0+ and/or 7-digit intraLATA calls either to itself or to another carrier.

(1) End User/Agent Notification (Cont'd)

A designated carrier that obtains PIC/LPIC commitments directly from the end user/agent and submits them to the Utility on the end user's/agent's behalf must:

- Have separate authorization from the end user/agent that specifically designates the carrier to handle the end user's/agent's interLATA and/or intraLATA calls. Such authorization must comply with applicable state and federal laws and/or regulations;
- Retain the authorization(s) for the length of time required by applicable state and federal laws and/or regulations; and

(D)
(D)

- For each PIC or LPIC change submitted to the Utility, provide either the CIC or the Utility Number which will identify the carrier who was required to obtain the end user's authorization to change their PIC or LPIC. The Utility Number information will be populated as defined by Pacific Bell to meet industry guidelines.

13.3.3 Presubscription (Cont'd) (T)

(B) Provisions (Cont'd)

(3) Routing of IntraLATA and InterLATA Sent-Paid
Coin Traffic (T)

When a pay telephone end user or agent selects a primary IC for their intraLATA and/or interLATA traffic, the IC selected shall indicate how the sent-paid traffic from the pay phone(s) shall be routed. The option chosen by the IC will apply to all pay telephones provided from a single end office which are presubscribed to that IC.

(T)

If the end user or agent does not submit an order for the routing of its interLATA and/or intraLATA sent paid traffic from COPT Coin Access Lines or fails to select a designated subcontractor (secondary service provider) for such traffic, the traffic will be routed to the existing interLATA and/or intraLATA carrier.

(C)

(C)

(4) Discontinuance of IntraLATA and/or InterLATA Service (C) (L)

If the end user's or agent's designated carrier plans to discontinue intraLATA and/or interLATA service, the canceling carrier is must inform all presubscribed end users/agents of the discontinue of service, request the end user/agent to designate a new Primary Interexchange Carrier and/or Local Primary Interexchange Carrier, and state that the canceling carrier will pay the PIC/LPIC Change Charges set forth in 13.3.3(C) following. The Utility will bill the canceling carrier based on the total number of end users/agents assigned to the canceling carrier at the time it notifies the Utility of its discontinuance of Feature Group D Service.

(b) Existing End Users/Agents

(i) Existing end users/agents who change their LPIC will incur the Presubscription Change Charge set forth in 13.3.3(C) following.

(ii) Access Customer Billing Option

(T)
(D)
(D)

The Interexchange Carrier (IXC) Billing Option is an agreement between the Utility and an Interexchange Carrier (IXC) under which the Local Presubscription change charge (LPIC) is assessed to the IXC instead of being charged to the end user customer when the Telephone Company changes an end user's LPIC IXC assignment.

(N)

The LPIC change may be requested either via an IXC-provided end user or agent list submitted in the Customer Account Record Exchange (CARE) format (AC Billing Option - Carrier Initiated) or the LPIC change may be requested by the end user customer directly to the Telephone Company (AC Billing Option - Customer Initiated).

IXCs that subscribe to IXC Pays Billing Option - Carrier Initiated, must populate position 405 of the LPIC change order with a "Y" to redirect billing of the LPIC change charge.

(b) Existing End Users/Agents (Cont'd)

(ii) Access Customer Billing Option (Cont'd)

For IXCs that subscribe to IXC Pays Billing Option - Customer Initiated, all end user LPIC changes to the IXC's CIC (and at the IXC's option, changes from the IXC's CIC to "No PIC") initiated through the Telephone Company will be redirected to the IXC. (N)
|
(N)

The IXC submitting the LPIC change must sign an IXC Pays Billing Option agreement with the Telco for either of the IXC Pays Billing Options to apply.

When these conditions have been met, the end user customer will not be assessed the Presubscription change charge for the LPIC change. The IXC participating in the IXC Pays Billing Option will be charged the Presubscription change charge per line or trunk as set forth in Section 13.3.3 (C) following.

All LPIC changes subsequent to the end user's or agent's initial selection, other than any change described in (a) preceding will be assessed nonrecurring charges as set forth in 13.3.3, (C) following and described below.

A nonrecurring charge as set forth in 13.3.3, (C) (1) following to process a change in LPIC is bifurcated into two separate nonrecurring charges and applies as follows:

- 1) a nonrecurring charge applies when the request to change an LPIC is submitted through mechanized methods;
- 2) a nonrecurring charge applies when the request to change an LPIC is submitted through manual methods.

As used above, manual methods are either (1) personal interaction between an end user or agent and a Utility employee, or (2) any written submission from an end user or agent to a Utility service center. Mechanized methods shall include all other methods. If a request utilizing a mechanized method results in manual processing, the mechanized nonrecurring charge shall apply upon completion of the request.

(c) Changes in Carrier Identity (T)

For an IC change in identity, as defined in (T)
Section 2.6 preceding, which results in a change
in the IC's carrier identification code (CIC)
assigned to the end user, the IC will bear the
Presubscription Change Charges for the existing (T)
PIC/LPIC processing flow of such changes (e.g. (T)
via IC and/or end user initiation of individual
line input, etc.) for each affected Utility line (T)
or trunk. If the IC wishes to arrange for special
processing of the change in the IC's carrier
identification code (CIC) assigned to the end
user, such arrangements may be provided on an
individual case basis (ICB) mutually agreed upon
by the IC and the Utility for each affected
Utility exchange line or trunk.

Information previously on this sheet now on Sheet 594-C in different form.

13.3.5 Testing Services

Testing services are provided by Utility personnel at the Utility's local loop demarcation point. However, provisions are made in (A) (4), (A) (5) and (B) (2) following for Utility personnel to perform testing services on the customer's side of the local loop demarcation point at the customer's request and expense. (T)
(T)
(N)
(N)

Testing Services offered under this section of the tariff are optional and subject to rates and charges as set forth in 13.3.5(C) following. Other testing services provided by the Utility in association with Access Services are furnished at no additional charge. These other testing services are described in 6.1.6 and 7.1.8 preceding.

The offering of Testing Services under this section of the tariff is made subject to the availability of the necessary qualified personnel and test equipment at the various test locations mentioned in (A), (B) and (C) following:

(A) Switched Access Service

Testing Services for Switched Access are comprised of (a) tests which are performed during the installation of a Switched Access Service, and (b) tests which are performed after acceptance of such access services by a customer, i.e., in-service tests. These in-service tests may be further divided into two broad categories of tests: scheduled and nonscheduled.

Scheduled tests are those tests performed by the Utility on a regular basis, e.g., monthly, which result in the measurement of Switched Access Service. Scheduled tests may be done on an automatic basis (no Utility

or customer technicians involved), on a cooperative basis (Utility technician(s) involved at Utility office(s) and customer technician(s) involved at customer premises(s)), or on a manual basis (Utility technician(s) involved at Utility office(s) and at customer premises(s) or end user's premises). (T) (T)

Nonscheduled tests are performed by the Utility "on demand", which result in the measurement of Switched Access Services. Nonscheduled tests may involve Utility technicians at Utility offices and at the customer's premises. (T)

(1) Additional Cooperative Acceptance Testing (ACAT)

Additional Cooperative Acceptance Testing of Switched Access Service involves the Utility provision of a technician at its office(s) and the customer provision(T) of a technician at its premises, with suitable test equipment to perform the required tests. (T)

Additional Cooperative Acceptance Tests may, for example, consist of the following tests: (T)

- . Impulse Noise
- . Phase Jitter
- . Signal-to-C-Notched Noise Ratio
- . Intermodulation (Nonlinear) Distortion
- . Frequency Shift (Offset)
- . Envelope-Delay Distortion
- . Dial-Pulse Percent Break

(3) Cooperative Scheduled Testing (CST)

Cooperative Scheduled Testing of Switched Access Services (Feature Groups B, C and D and Directory Access Service not routed through an access tandem), where the Utility provides a technician at its office(s) and the customer provides a technician at its premises, with suitable test equipment to perform the required (T) tests, will consist of quarterly loss and C-message noise tests, and annual balance tests. However, the customer may specify a more frequent schedule of tests at an appropriately adjusted monthly rate. In addition to the loss/noise/balance measurements, the customer may also order, at additional charges, 3-tone-slope, C-notched noise testing.

The Utility will provide, on a quarterly basis, a CST report that lists the test results for each trunk tested. Trunk test failures requiring customer participation for trouble resolution will be provided to the customer on an as-occurs basis.

13.3.5 Testing Services (Cont'd)

(A) Switched Access Service (Cont'd)

(4) Manual Scheduled Testing (MST)

Manual Scheduled Testing of Switched Access Services (Feature Groups B, D and Directory Access Service not routed through an access tandem), where the Utility provides a technician at its office(s) and at the customer or end user premises, will consist of (T) quarterly loss and C-message noise tests, and annual balance tests. However, the customer may specify a more frequent schedule of tests. In addition to the loss/noise balance tests, the customer may also order, at additional charges, 3-tone slope and C-notched noise testing.

The Utility will provide, on a quarterly basis, a MST report that lists the test results for each trunk tested. Trunk test failures requiring customer participation for trouble resolution will be provided to the customer on an as-occurs basis.

(A) Switched Access Service (Cont'd)

(5) Nonscheduled Testing (NST)

Nonscheduled Testing of Switched Access Services is where:

(D)
|
(D)

- the Utility provides a technician at its office(s) and the customer provides a technician at its premises, with suitable test equipment to perform the required tests ("cooperative testing"), or
- the Utility provides a technician at its office(s), at customer or End User premises with suitable test equipment to perform the required tests ("manual testing").

Nonscheduled Tests may consist of any tests, e.g., loss, noise, slope, envelope delay, which the customer may require.

(6) Obligations of the Customer

- (a) The customer shall provide the Remote Office Test Line priming data to the Utility, as appropriate, to support NST as set forth in 13.3.5(A) (5) preceding.
- (b) The customer shall make the facilities to be tested available to the Utility at times mutually agreed upon.

(B) Special Access Service

The Utility will, at the request of a customer, provide assistance in performing specific tests requested by the customer.

(1) Additional Cooperative Acceptance Testing (ACAT)

When a customer provides a technician at its premise(s) or at an end user premises, with suitable test equipment to perform the required tests, the Utility will provide a technician at its office for the purpose of conducting Additional Cooperative Acceptance Testing on Voice Grade Services. At the customer's request, the Utility will provide a technician at the customer's premises or at an End User's premises. These tests may, e.g., consist of the following:

- VG1 through VG5: Attenuation Distortion, C-Message Noise and Echo Control

- VG6 through VG12: Attenuation Distortion, C-Message Noise, Echo Control, Impulse Noise, Phase Jitter, Intermodulation Distortion, Envelope Delay Distortion and Frequency Shift.

(2) Nonscheduled Testing (NST)

When a customer provides a technician at its premises or at the end user premises, with suitable test equipment to perform the required tests, the Utility will provide a technician at its office for the purpose of conducting Nonscheduled Testing. At the customer's request, the Utility will provide a technician at the customer's premises or at the end user premises. Nonscheduled tests may consist of any tests, e.g., loss, noise, slope, envelope delay, which the customer may require.

13.3.9 Busy Line Verify/Emergency Interrupt Service)

(A) Description

Busy Line Verify

When unsuccessful in reaching a called party, a customer's subscriber can contact the customer's operator to request that the dialed party's line be checked. If the call inquiry concerns an intrastate call, the customer's operator must contact the Utility's operator which serves the (T) end user whose line is to be checked. The Utility's operator then checks the status of the line and reports the results to the customer's operator, who in turn reports the results to their inquiring subscriber.

Emergency Interrupt

This service is provided after verify service. When a customer's subscriber is advised that the called party's line is in operation, but engaged in conversation with another party, the subscriber to the customer can ask that the conversation be interrupted. The Utility's operator interrupts the line and requests that the parties terminate their conversation so that the inquiring subscriber can complete his or her call. The Utility's operator only interrupts the ongoing call and does not complete the subsequent telephone call for the customer's subscriber.

Continued

ACCESS SERVICE

13. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)

13.3 Miscellaneous Services (Cont'd)

13.3.9 Busy Line Verify/Emergency Interrupt Service

(B) Obligations of the Utility

- The Utility's operator will, when furnished a telephone number in its serving area, verify that status of the line and report that status to the customer's operator. Upon further request, the Utility's operator will interrupt a conversation in progress on the line and ask the conversing parties to terminate the conversation to allow the customer's subscriber to complete their call.
- The Utility's operator will notify the customer's operator to contact the serving Local Exchange Company when the end user line number in question is determined to be served by a different Local Exchange Company.
- The Utility will specify the Access Tandem in each LATA at which the customer shall deliver this traffic to the Utility. The customer may use existing facilities to the Access Tandem in each LATA. The call will then be routed by the Utility to the designated operator services location. When it becomes necessary to change those locations, the Utility will inform the customer six months prior to the change. For such changes, the regulations set forth in Section 2.1.7 apply.
- The Utility assumes no obligations for any contacts and arrangements the customer may have with its subscribers for the provision, maintenance or billing and collection associated with the service.
- Busy Line Verify/Emergency Interrupt Service may, at the option of the customer, be provided for interstate and intrastate communications. When the customer (T) requests such mixed access, the intrastate Verify and (T) Interrupt Service charges will be determined by the Utility using reports furnished by the customer as set forth in 2.3.14 preceding.

13. Additional Engineering, Additional Labor and Miscellaneous Services
(Cont'd)

13.3 Miscellaneous Services (Cont'd)

13.3.9 Busy Line Verify/Emergency Interrupt Service

(C) Obligations of the Customer

- The customer recognizes that the Utility operator will respond to a request to verify or verify and interrupt one telephone number per call and will not transfer, redial or forward the call to another location for any other purpose than the provision of Busy Line Verify/Emergency Interrupt service.

(D) Rate Regulations

- The Busy Line Verify/Emergency Interrupt Charge shall apply for each request to verify a line status and/or interrupt a line. A maximum of one charge may be incurred on a call for service to the Utility's operator. The number of calls answered or forwarded to the Utility's operators shall be measured by the Utility.
- A charge applies to each Busy Line verified or conversation Interrupted except when the utility operator finds the called number out of order.

13.3.11 Coordinated End User Service (CE-US)

An administrative function in conjunction with Special Access service, as set forth in Section 7 preceding. The service provides a point of contact for end to end coordination of provisioning and maintenance between the Utility, Interexchange Carrier and Local Exchange Carrier, if applicable, for an Intrastate Special Access Service. The coordination will be provided from Network Interface to Network Interface. CE-US is an optional service provided to Special Access customers.

In order to subscribe to CE-US, the customer must subscribe to a minimum of one (1) Digital Services Link or one (1) High Capacity Link (1.544 Mbps) or one (1) Voice Grade Link which may consist of the Utility End Links, Local Exchange Carrier Links and Interexchange Carrier Mid-Links.

(T)

The above Special Access service meets the requirement for CE-US service.

The customer must maintain at least one end link within the Utility serving territory per Special Access Service.

13.3 Miscellaneous Services (Cont'd)

13.3.11 Coordinated End User Service (CE-US) (Cont'd)

(N)

The Utility will, upon receipt of letter of authorization from the customer, assist the customer with the provisioning and maintenance by acting as the customer's point of contact, provided from Network Interface to Network Interface for the coordination of the customer's Special Access Service.

(A) Undertaking of the Telephone Company

- (1) The Utility will coordinate provisioning on behalf of the customer, the following: (a) the Special Access Link from the Utility or Local Exchange Carrier (LEC) in the originating territory, (b) the Mid Link from the Interexchange Carrier (IC) of the customer's choice, and; (c) the Special Access Link from the Utility or Local Exchange Carrier (LEC) in the terminating territory. The customer will be billed by each Carrier for that portion of Special Access Service which they provide. The customer must maintain at least one Special Access End Link per circuit provided by the Utility within the Utility serving territory.
- (2) The Utility will assign a Network Control Office (NCO) to coordinate and act as a point of contact for the provisioning and maintenance of the customer's Special Access Service.

(B) Obligations of the Customer

- (1) The customer will provide to the Utility written authorization to act on its behalf and is responsible for all charges incurred.
- (2) The customer will provide upon the Utility's request, the names of its Interexchange Carrier (IC) and any Local Exchange Carriers (LECs) and identify the customer's point of contact with such IC and LECs, and will request such IC and LECs to coordinate provisioning and maintenance with the Utility.

13.3.12 Special High Voltage Protective Apparatus

(N)

If Switched and/or Special Access Service, as set forth in 6. and 7., respectively, preceding, terminates in a high voltage environment, such as an electric power station, Special High Voltage Protective Apparatus may be required as set forth in (A) through (H) following.

- (A) Telephone Company facilities which provide service to a customer's electric power generating, switching, or distribution station may require the use of Special High Voltage Protective Apparatus (isolation or neutralization devices, mutual drainage transformers, etc.) on the Telephone Company side of the Point of Termination to protect against the effects of Ground Potential Rise (GPR) and induction in a customer's electric power system.

The special protection is intended to (1) minimize electrical hazards to personnel, (2) prevent electrical damage to telecommunications equipment and facilities, and (3) provide the required continuity of telecommunications transmission at times of power system faults.

The customer shall be responsible for advising the Telephone Company, at the time a service is ordered, of the expected fault-produced electrical environment at the power station so that special protection requirements can be determined.

(N)

Continued

ACCESS SERVICE

13. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)

13.3 Miscellaneous Services (Cont'd)

13.3.12 Special High Voltage Protective Apparatus (Cont'd) (N)

(B) Special High Voltage Protective Apparatus is required on Telephone Company facilities at the power station or site or premises under either of the following conditions:

(1) when the fault-produced GPR and/or induction at the power station is 1000 Volts peak or greater;
or

(2) when the fault-produced GPR and/or induction at the power station is 300 Volts peak or greater, and at least one telecommunication service in the serving Telephone Company facility has been identified by a customer as having a requirement for uninterrupted service performance at times of power system faults.

(C) When the conditions in (B) (2) preceding are applicable, mutual drainage transformers will be required for noise reduction purposes on the serving facilities at the Telephone Company wire center and at any intermediate (remote drainage) locations.

(D) For power station, except as described in (E) following, the Telephone Company will provide the required Special High Voltage Protection Apparatus at rates and charges developed and filed under (H) following.

(E) The customer may elect to provide the Special High Voltage Protective Apparatus at a power station. However, in any given case, all of the Special High Voltage Protective Apparatus on a customer premises must be provided by either the customer or the Telephone Company. The Special High Voltage Protective Apparatus proposed for use by the customer must be approved by the Telephone Company. Additional engineering charges as set forth in 13.1 preceding shall apply for the time spent on engineering consultations concerning the proposed Special High Voltage Protective Apparatus.

13.3.13 Mechanized Screening Codes

At the request of a customer, the Utility will provide the screening codes information, as described in Section (A) (4) below, for end user services that are screened within the Utility's territory. The Utility will provide information under this tariff only if the customer holds a certificate of public convenience and necessity from the CPUC authorizing the customer to provide intrastate telecommunications services.

Such information shall be provided from the Utility's Screening Services data base and will include working telephone numbers with associated screening codes. The information will be provided on a territory-wide basis only and will not include billing name and address information.

The Utility will make this product available to certificated IECs, Operator Service Providers, and billing agents (clearinghouses) to the extent required by law. Customers' use of this product is limited to call management (i.e. operator handling and billing). Customers may not use this information for any other purpose, including but not limited to market strategy or resale to a third party.

(A) Undertaking of the Utility

- (1) The Utility will provide the Mechanized Screening Codes File on a total file (i.e. statewide) basis with daily order updates at rates and charges set forth in (D) following.
- (2) Upon acceptance by the Utility of an order for Screening information from a customer, the Utility will determine the period of time to implement.

(N)

(3) Screening information will be provided to the customer in the industry supported CARE (Customer Account Record Exchange) format for the total file at service set up, for file snap-shot requests and daily based on order update activity. The total file basis will permit the customer to receive all statewide information that is authorized for the customer's use.

The Utility will transmit product data to the customer based on the existing Daily Activity Reports (DAR) options, i.e., via paper, electronic transfer or magnetic tape.

Once available, the paper printout or magnetic tapes will be sent to the customer via U.S. Mail overnight delivery or at the customer's request may be picked up at a location designated by the Utility.

(4) Mechanized Screening Codes information consists of:

- ⊗ Working Telephone Number (WTN)
- ⊗ Customer Type Indicator
- ⊗ Utility's line level Screen Code
- ⊗ Order due date
- ⊗ Published or Non-published Indicator
- ⊗ Type of Order Activity: i.e. new connects, disconnects, change, and record orders.

(5) All Mechanized Screening Codes File information including magnetic tapes, reproduction, etc., shall remain the sole property of the Utility.

(C) Obligation of the Customer

- (1) The customer must have a CPCN (Certificate of Public Convenience and Necessity) to provide telecommunications service within California.
- (2) The customer shall order the Mechanized Screening Code service under the Utility's designated service order and must not release this information to any other person or entity.
- (3) The customer shall not publicize or represent to others that the Utility participates in any way with the customer in the development of the customer's End User records,
- (4) The customer shall be responsible for the correct handling of calls and for AMA call management for services screened. The customer will use the provided Mechanized Screening Codes information solely in connection with the following elements of customer's telecommunications service:
 - ⊗ Originating call screening.
 - ⊗ AMA call validation.
 - ⊗ Prevention of network fraud.
- (5) Under no circumstances shall the customer resell the information, use the information in connection with marketing, or provide the tapes or information to any parent, subsidiary, affiliate, agent of the customer, or to any third party.

13.3.14 Deaf and Disabled Equipment Distribution

(A) Description

The Utility will accept and process requests for deaf and disabled equipment for end users who qualify under the Deaf and Disabled Telecommunications Program (DDTP) on behalf of Competitive Local Carriers authorized by the Commission to provide Intrastate Telecommunications Services, to the extent such authorization is required by law. This service is offered within the Utility's operating territory and in accordance with Cal.P.U.C.95-12-056.

The Utility does not warrant, represent, or propose DDTP guidelines or other applicable rules, regulations, state or federal laws concerning the provision of service to the deaf and disabled community for CLCs.

(B) Undertaking of the Utility

- (1) For existing program participants, the Utility will migrate the telephone service at the request of the CLC and provide the CLC with the name of the program participant, the nature of the disability (deaf, hard of hearing, speech, vision, or mobility), and a list of all DDTP products associated with the program participant's account.
- (2) The Utility will provide a dedicated toll free number for the use of CLCs.
- (3) The Utility will provide the same level of service to CLC program participants that it provides to its own program participants.

- (4) The Utility will educate CLC program participants in the types of services available, program qualification standards, and certification processing.
- (5) The Utility will supply appropriate products and equipment according to the CLC program participant's needs.
- (6) The Utility will mail program information to CLC program participants when appropriate.
- (7) A Utility representative will visit a CLC program participant for training and support when needed.
- (8) The Utility will send the CLC notice of equipment that has been loaned to a program participant.
- (9) The Utility will determine any equipment repair or upgrade needs of a program participant.
- (10) The Utility will notify the CLC of any changes in equipment provided to a program participant.
- (11) When a program participant elects to visit a Utility Deaf and Disabled Service Center, the Utility will notify the CLC before processing the distribution or receipt of products.

(B) Undertaking of the Utility (Cont'd)

(12) The Utility will label all equipment as the property of the State of California and will include the customer contact information specified by the CLC.

(13) The Utility will advise the program participant of his/her responsibilities once the equipment has been delivered.

(14) The Utility will not brand incoming calls with its own name with the exception of walk-in centers and identification for field personnel.

(15) The Utility will report to the DDTP, on a monthly basis all transactions with CLC program participants, all equipment in service, by type, for its own program participants and an inventory of all units in its distribution center.

(C) Limitation of Liability

The Utility's liability for any loss, cost, claim, injury, liability or expense in connection with the activities set forth in this Agreement will be limited to the amount of direct damages actually incurred. The Utility will not be liable for any indirect, incidental, special, reliance or consequential damage of any kind, including (without limitations) damages for lost profits, regardless of the form of action, whether in contract, indemnity, warranty, strict liability, or tort, including (without limitation) negligence of any kind.

(N)

- (1) The CLC assumes all responsibility for its compliance with DDTP guidelines or applicable rules, regulations, and state or federal laws concerning the provision of service to the deaf and disabled community.
- (2) When a program participant changes his/her local exchange service provider, the CLC will contact the Utility to arrange for the migration of the telephone service and obtain the information described in (B) (1) preceding.
- (3) The CLC will bridge calls from the program participants to the Utility and will provide the necessary information while on line.
- (4) The CLC will provide to the DDTP, on a monthly basis, a report detailing the number of units of equipment in service, by type.
- (5) The CLC will advise the Utility, in writing, within two business days of a participant leaving the program.
 - (a) The CLC will explain to the program participant that the equipment is on loan.
 - (b) The CLC will notify the Utility when equipment is to be retrieved.
 - (c) The CLC will not hold the Utility responsible for the non-return of equipment.

13.3.15 Billing Name and Address (BNA)

Billing Name and Address (BNA) provides the billing name and address associated with a telephone number for the purpose of billing a call.

At the request of a certificated Carrier or its authorized billing agent, the Utility will provision BNA Service. BNA Service will be provided to the Customer for the limited purpose of billing a call, where the originating telephone number is provided by the Customer, and the original telephone number was obtained through Automatic Number Identification (ANI).

BNA will be provided to the Customer in the industry supported Customer Account Record Exchange (CARE) format at the time the end user presubscribes to the Customer's service. Additional information will be provided to the Customer regarding end users presubscribed to the Customer, via the supported CARE format, advising the Customer when a toll restriction is either initiated and/or removed from the end user's account.

The Utility will bill Customers for BNA services under this tariff. The payment regulations set forth in Section 2.4 preceding apply.

z Correction: This sheet was erroneously filed as "Original" in Advice Letter No. 47344. It is now being corrected to 2nd Revised Sheet 618. The material omitted on the 1st Revised Sheet 618 in Section 14 is now on Sheets 627 and 628 in Section 14 of this tariff.

(L) (T)

(A) Undertaking of the Utility

- (1) The Utility will determine the period of time to establish the Customer's BNA service. A standard format for the receipt and provision of originating telephone numbers and BNA information will be established by the Utility and provided to the Customer.
- (2) Once established, the Utility will receive from the Customer via magnetic tape or Data Transmission which contains the originating telephone numbers obtained through ANI. The frequency will be at intervals mutually agreed upon between the Utility and the Customer. The Customer provided end user telephone numbers will be associated with the proper end user BNA contained in the Utility's file at that time. The BNA associated with the Customer provided telephone number will contain an indicator for nonpublished status. The information will then be provided to the Customer as set forth in (3) following.

(A) Undertaking of the Utility (Cont'd)

- (3) Output magnetic tape(s) containing BNA details will be provided to the Customer as part of the BNA Service. The Utility will determine the number of magnetic tapes required to provide the BNA Service detail.
- (4) The Utility will normally make the output magnetic tape available 6 business days after receipt of the Customer provided magnetic tape, or at an interval that is mutually agreed upon by the Utility and the Customer. Availability may be delayed in the case of input data errors in the Customer provided magnetic tape.
- (5) The output magnetic tapes will be provided by the Utility without the return of previously supplied Customer provided tapes. Unless otherwise mutually agreed to by the Utility and the Customer, the output magnetic tapes will be sent to the Customer via first class U.S. Mail. The Customer may pick up the output magnetic tapes at a location designated by the Utility.
- (6) BNA Service detail will not be retained by the Utility for longer than 45 days. If the Customer requests that the initially provided output magnetic tape be made available again, such requests must be within 30 days from the date the first output magnetic tape was made available. The Utility will resupply the detail to the Customer and apply the Magnetic Tape charge as set forth in (E) following.
- (7) As an alternative to the Utility provided magnetic tape output, upon acceptance of a Customer special order, the Utility will develop procedures to data transmit to the Customer the BNA details from the magnetic tape output files.
