A9. CENTRAL OFFICE SERVICE

- 9.1 DIAL SWITCHING SYSTEMS (Cont'd)
- 9.1.1 5-1-1 TRANSPORTATION INFORMATION SERVICE

(T)

(N)

A. DESCRIPTION

5-1-1 Transportation Information Service is a local telephone exchange communications service that allows local exchange end users to reach the 5-1-1 service provider (customer) by dialing an abbreviated telephone number, five-one-one (5-1-1).

5-1-1 is an intelligent routing service that determines the central office serving the calling party, converts the 5-1-1 dialed digits to a Routing Telephone Number (RTN) and then uses the RTN to complete the call over the public switched network to a call center designated by the 5-1-1 customer.

The Routing Telephone Number (RTN) for 5-1-1 Service is an 800/8XX number provided by the Utility or by another 800/8XX service provider. The 800/8XX number provided by the Utility is billed separately as set forth in Schedule Cal.P.U.C No. D8.

- B. REGULATIONS
 - 1. 5-1-1 is an optional service that may be purchased only by federal, state and/or local government transportation agencies.
 - 2. A minimum billing period of one month applies to this service.
 - 3. There can be only one 5-1-1 customer for each stand-alone, host, or remote central office serving area (the "5-1-1 service area"). This assures that 511 calls from an end user located within a 5-1-1 service area can be routed to a unique 5-1-1 call center. The Utility will route calls based on the serving central office. If a central office serves one or more remote central offices or multiple states, the Utility will route the 5-1-1 calls based on the originating NPA-NXX. The Utility will default route calls to one of the customer's RTNs if the Utility is unable to route based on the serving central office or originating NPA-NXX.

A9. CENTRAL OFFICE SERVICE

- 9.1 DIAL SWITCHING SYSTEMS (Cont'd)
- 9.1.1 5-1-1 TRANSPORTATION INFORMATION SERVICE (Cont'd)

(T)

B. REGULATIONS (Cont'd)

- 4. When establishing a call center, the customer is responsible for informing all local exchange service providers operating within the 5-1-1 service area of the establishment of such a call center.
- 5. Only calls originating within an operational 5-1-1 service area will be routed to a call center. End users dialing 5-1-1 outside operational 5-1-1 service areas will receive a recorded message that the call cannot be completed as dialed.
- 6. The 5-1-1 customer may designate only one RTN per 5-1-1 service area but may designate different RTNs for different 5-1-1 service areas as described below:
- a. If the customer utilizes more than one 5-1-1 RTN, it must designate the specific stand-alone, host or remote central offices to be served by each RTN.
- b. Normally only one RTN can serve a stand-alone, host or remote central office serving area.
- c. 5-1-1 calls are not permitted where local calling is restricted (e.g., prisons.)
- 7. The Utility will route 5-1-1 calls originating from end users on its local exchange network whether the end users purchase service directly from the Utility or from another Local Exchange Carrier (LEC) providing service to end users by utilizing Utility dial tone service.
- 8. 5-1-1 Service is provided solely for the benefit of the customer; the provision of such service shall not be interpreted, construed or regarded as being for the benefit of or creating any obligation toward, or any right of action on behalf of, any third person or other legal entity.
- 9. The Utility will make every effort to route 5-1-1 calls to the appropriate calling center, however, it will not be held responsible for routing mistakes and errors.

9.1.4 PACIFIC BELL LOCAL AREA NETWORK

(T)X

A. DESCRIPTION

(N)

Pacific Bell Local Area Network (PB LAN) is a data communications network service providing for the interconnection of customer-provided data devices and for the transmission of data between such devices. PB LAN is provided from specially equipped Utility premises and utilizes data switching, digital and/or analog transmission facilities, and Centrex facilities to provide switched data transport at speeds to 19.2 Kbps.

The primary component of PB LAN is the data switch located in the customer's serving central office. PB LAN Service will support asynchronous data terminals and host computers and is capable of switching PC to PC, terminal or PC to host computers, and host computer to host computer. The standard features included with PB LAN are Auto Connect, Session Hold, Closed User Group, Directory Display, Host Autobaud, Message of the Day, Round Robin Hunt Groups and Terminal Autobaud.

PB LAN also provides access to the telecommunications network via an optional modem pooling arrangement. The standard feature included with Modem Pooling is Dial-in Port Password Capability. For customers served by more than one central office, data networks connecting PB LAN's may be established by using internodal trunks.

B. DEFINITION OF TERMS

ASYNCHRONOUS MULTIPLEXED HOST ACCESS

The Multiplexed Host Access is provided at each separate customer host computer location. A single multiplexed host access common equipment arrangement may serve one or more host computers within 125 feet from the PB LAN host multiplexer's Network Interface.

- 9.1 DIAL SWITCHING SYSTEMS (CONT'D)
- 9.1.4 PACIFIC BELL LOCAL AREA NETWORK (CONT'D)
 - B. DEFINITION OF TERMS (CONT'D)

ASYNCHRONOUS TERMINAL/HOST ACCESS

The Asynchronous Terminal/Host Access is the switch interface module, local area network common equipment and the Integrated Voice/Data Multiplexer (IVDM) in the Central Office. It permits the transmission of asynchronous protocol data communications via exchange type facilities between the PB LAN data switch on the Utility's premises and customer-provided data equipment designated as peripheral equipment. (e.g., data terminals, personal computers, printers or, when used as individual host port access, central data processing equipment and host computers).

DATA SWITCH

Provides asynchronous switching capability at speeds up to 19.2 Kbps. The switch data base provides the capability to define data access capabilities for specific groups. Access to hosts, printers, modem pools, and network facilities is allocated by user groups.

INTEGRATED VOICE/DATA MULTIPLEXER (IVDM)

The IVDM allows for the simultaneous transmission of both voice and data over a centrex line.

INTERNODAL TRUNKING

Supports Digital Services and High Capacity Digital Service connections to a non-colocated Local Area Network switching facility.

MODEM POOLING

A modem pool is one or more modems arranged in a group for a customer's use for either incoming or outgoing PB LAN data transmission via Centrex station lines. Modem pools are located on the Utility's premises.

A9. CENTRAL OFFICE SERVICES

- 9.1 DIAL SWITCHING SYSTEMS (CONT'D)
- 9.1.4 PACIFIC BELL LOCAL AREA NETWORK (CONT'D)
- B. DEFINITION OF TERMS (CONT'D)

MULTIPLEXED PORT

A derived channel termination at the network interface where customers connect their equipment, ie. host computer.

MULTIPLEXER INTERFACE

The Multiplexer Interface is provided between the C.O. Multiplexer and the HCDS or the DS. Included is the Drop/Insert (D/I) Multiplexer on z HCDS, the Multiplexer Interface Unit (MIU) on DS and the connecting wire. z This equipment is required to support the Multiplexing of data signals between PB LAN and another location, either a multiplexed host access or Internodal trunking to a non-colocated local area network.

C. REGULATIONS

- 1. Pacific Bell Local Area Network can only be provided from central offices equipped for Local Area Network Service subject to the technical limitation of such equipment and availability of suitable facilities. The local loop range (distance) for a particular loop may vary depending on electrical connection requirements. Not all Pacific Bell serving Central Offices will be equipped.
- 2. PB LAN service requires that the customers provide all IVDM units located on their premises. The customer provided equipment (CPE) must also be compatible with the Utility provided PB LAN services under the technical guidelines of such services.
- 3. Host location is defined as a location not more than 125 feet from Pacific Bell's host multiplexer's Network Interface.
- 4. When terminal access via IVDM is used with a key telephone set, a RJ31X must be installed. A one time labor charge will be charged for installation. See Schedule Cal.P.U.C. No. A8.1.21.

 - C. REGULATIONS (Cont'd)
 - 5. Modem pool members are dedicated to a specific customer for access by the customer's designees only. For each modem, the customer must also purchase a Centrex station line.
 - 6. In addition to the PB LAN rates and charges, the customer is also responsible for all exchange service rates, local usage, toll and private line channels as well as all other applicable rates, charges and regulations.
 - 7. On and after January 9, 1993 the effective date of Advice Letter No. 16375, the offering of PB LAN will only be furnished to the same customer of record on the same premises until August 1, 1993, at which time the service will be discontinued. Supersedures and additions are prohibited.
 - 8. Service Charges as set forth in the Utility's tariff Schedules will be waived from the effective date of Advice Letter No. 16375 until August 1, 1993, for customers who convert their existing PB LAN service to an alternate Utility service such as, but not limited to, Centrex IS, Public Packet Switching¹ with Data Over Voice access.

D. SERVICE

PB LAN is comprised of three basic rate elements: PB LAN Centrex station line, terminal access and host access. Modem Pooling and Internodal Trunking features are offered as options.

PB LAN will provide the customer with the ability to transmit integrated voice and data over the existing centrex local loop for the purpose of switching the data to a host, modem, network facility or another terminal access.

A. DESCRIPTION

Occasional service is a special equipment installation that enables a telephone answering bureau to provide answering service on a part time basis. The equipment is installed in the central office and can handle up to 100 secretarial lines. The bureau can order as many of these units as it needs. Each unit is connected to the bureau switchboard by a maximum of 10 occasional-service lines. 9.4 CALL MANAGEMENT SYSTEMS

A. GENERAL

1. Description

Automatic Call Distribution - Electronic Switching System (ACD-ESS) is a service which provides for distribution of a large volume of incoming calls to a customer's premises where they may be answered on attendant positions. If all positions are busy, calls are held in their order of arrival in queue in the switching equipment until an attendant position becomes available or until the calling party hangs up and abandons the call. The switching functions are performed in the Utility's central office. ACD-ESS service is available only from a #1ESS central office equipped with the proper generic program and where facilities and operating conditions permit.

An ACD-ESS will be furnished independently of, or associated with, a manual or dial private branch exchange, airport intercommunicating system or Centrex service as required.

2. Regulations

a. Types of services available

Two types of service arrangements are available as described below. The (T) Utility will provide service to its local loop demarcation point. The customer is responsible for equipment and facilities beyond the Utility's local loop demarcation point. (N)

- (1) Type A System is a service that may be furnished in connection with standard telephone equipment on a customer's premises. The maximum number of calls which may be answered and queued depends on the number of those rate elements to which the customer subscribes. Rates, charges and regulations apply as shown in Schedule Cal.P.U.C. No. A9.4.1.
- (2) Type B System is a service that requires certain unique customer premises common equipment and attendant console equipment. The system may be arranged for up to 30 separate trunk groups (splits) and 31 attendant report groups. The system's maximum size is a total of 1,000 attendant and supervisor consoles. Certain management information systems are provided on an optional basis. The system employs Touch-Tone[£] Calling Service as a standard feature. Rates, charges and regulations apply as shown in Schedule Cal.P.U.C. No. 9.4.2.

 - 2. Regulations (Cont'd)
 - b. Attendant Position Lines

Each attendant position line (more than one line may be terminated on an attendant position) requires a special access voice grade channel between the serving central office and the customer's premises. One special access voice grade channel is included in the rates and charges applicable to a trunk line service. A customer may be furnished, without additional charge, a special access voice grade channel provided between the serving central office and their premises for each trunk line service or Special Access Voice Grade Channel (VG32) terminated in the system. Each attendant position line provided which exceeds the total number of trunk line services or Special Access Voice Grade Channel (VG32) terminated in the system, will require a Special Access Voice Grade Channel (VG32). The channel will consist of one channel termination between the customer premises and the central office which provides the ACD-ESS service.

c. Off Premise Locations

When attendant positions or supervisor consoles are located off premises from the primary service location of the ACD-ESS, the rates and charges for the additional channels required will be furnished as set forth in Schedule Cal.P.U.C. No. 175-T, Section 7.5.3,(A)(B) and (C). If additional equipment is required for operation of the off-premises positions or consoles, such equipment will be furnished in accordance with g. following.

- d. Channels for primary and supplemental ACD functions, supervisory signaling and management information systems.
 - (1) Special Access Voice Grade channel facilities are employed in the operation of an ACD-ESS system. These are indicated in the rates and charges by the use of Metallic (see Regulation A.1.aa. preceding) or (T) Special Access Voice Grade Channels (VG32 and VG36) designations. All channels referred to as such are furnished at the rates, charges and (T) regulations as set forth in Schedule Cal.P.U.C. No. 175-T, Section 7.5.3.
 - (2) Channels between the customer's premises and the central office which (T) regularly serves that premises will be furnished at the rate and charge for one channel termination.

In such a case, appropriate rates and charges for mileage would apply to channels of all types between the two central office locations which are used to provide service. In addition, in the event operating conditions require additional equipment to provide the service arrangement, such equipment would be furnished in accordance with g. following. Rates and charges for the equipment would be in addition to all other applicable mileage and equipment items required.

B. DESCRIPTION

- 1. California 976 is a service of customer-provided General Audience recorded programs of information. California 976 allows a caller to access a 976 telephone number and receive, for a charge, a wide variety of California 976 customer-provided General Audience recorded or recorded-interactive programs. As a part of this service the Utility transports and bills the call. Billing and collection by the Utility for services rendered to or for an Information Provider engaged in furnishing any recorded or recorded-interactive programs which contain harmful matter as defined in California Penal Code Section 313(a), is a matter for contractual arrangement between the Information Provider and the Utility and is not subject to the terms of this tariff. Programs containing harmful matter may not reside on California 976. The prefix designated for harmful matter programs is contained in Schedule Cal.P.U.C. No. A9.5.3, California 900. Each remittable call to a California 976 number will be charged to the caller at the pre-designated rate.
- 2. A California 976 customer is an Information Provider who wishes the Utility to bill callers on its behalf for all calls completed to the customer's announcement or interactive program and for whom the Utility agrees to provide such billing. A Caller to a California 976 is a "Client" of the customer.
- 3. Interactive program: A program whereby a Caller through the use of a Touch-Tonef pad or similar device can communicate with the California 976 customer equipment for the purpose of sending or receiving information.
- 4. The telephone number assigned to this service is restricted to the 976 prefix.

- 9.5 PUBLIC ANNOUNCEMENT SERVICES (CONT'D)
- 9.5.4 INFORMATION SERVICES CALL BLOCKING

A. DESCRIPTION

1. Information Services Call Blocking (ISCB) is a Central Office call blocking service that allows the Utility's residential and business subscribers to block directly dialed calls placed from their telephones to California 976 programs within California, California 900 programs, and Interexchange Carrier 900 Services (900 IEC) program calls originating within California calls placed to IEC 900 numbers outside of California. ISCB will be provided at the (T) subscriber's serving Central Office, where technically feasible, and when placed on the subscriber's line, will prevent access to all directly dialed, the Utility's operator-assisted and the Utility's operator-entered billing to California 976 and California 900 numbers within California and Interexchange Carrier 900 Services (900 IEC) program calls originating within California and calls placed to IEC 900 numbers outside of California. If a subscriber with ISCB dials a California 976, California 900 or 900 IEC number, they will receive an announcement that tells the subscriber that the call cannot be completed as dialed. The subscriber will be able to dial all other numbers.

Three selective blocking options are available to the Utility's residential subscribers that order ISCB. A residential subscriber may select any of these three options. Business subscribers may only select Option 1.

 $\underline{\text{Option 1}}$ blocks access to California 976 and to all 900 numbers, including California 900 and IEC 900 programs.

Option 2 blocks access to California 976, California (900) 505, California (900) 303 and IEC 900 prefixes designated as carrying harmful matter. California (900) 505 programs are live general audience programs. California (900) 303 are programs containing harmful matter on both live and recorded.

Option 3 blocks California (900) 303 and IEC 900 prefixes designated as carrying harmful matter.

Material omitted now on Sheet 339.1.
