

2. AT&T SWITCHED ETHERNET SERVICESM

A. Description

AT&T Switched Ethernet Service is a switched Ethernet transport service providing Ethernet transport functionality using fiber and copper access facilities and a switched Ethernet core network. AT&T Switched Ethernet Service provides full duplex transport of data signals between a customer's premises and an Ethernet switch in a Company central office.

AT&T Switched Ethernet Service supports point-to-point, point-to-multipoint or multipoint-to-multipoint configurations. Point-to-point service provides a connection between two ports. Point-to-multipoint service provides multiple point-to-point connections to multiple ports in the network. Multipoint-to-multipoint service provides a connection between three or more designated ports on the AT&T Switched Ethernet Service network.

AT&T Switched Ethernet Service provides intraLATA transport service where suitable equipment and facilities are available. Where facilities are not available, facilities may be constructed, subject to certain conditions as determined by the Company. Special Construction charges may apply.

AT&T Switched Ethernet Service is available in two serving arrangements, the *Basic Service Arrangement* and the *Per Packet Class of Service (PPCoS) Arrangement*, and two types of customer port connections, *Basic Ports* and *Per Packet Class of Service Ports*.

B. Terms and Conditions

1. All terms and conditions relating to the individual service offering found in this Guidebook as specified on the list of California Out of Territory Guidebook Part 2, Section 2, can be found in the Guidebook reference or tariff schedule indicated next to that service. All of these terms and conditions are applicable to the provisions of service in this Guidebook.
2. All rates and charges may be adjusted at a later date.
3. AT&T Switched Ethernet Service is available at the listed prices, shown in C. following, in this Guidebook where facilities and operating conditions permit. Where facilities can only be provided as a Special Construction offering, special construction charges, as set forth in Schedule Cal. P.U.C. No. 175-T, Section 15, in an Individual Case Basis (ICB), will apply.
4. Meet-Point Billing, as described in AT&T California Guidebook Part 6, Section 9 is not available under this Out of Territory Guidebook.

5. Inside Wiring Availability

Customer may request that the Company install Inside Wiring at the time of Service installation. Inside Wiring is a deregulated connection from the Company's demarcation point to Customer premises equipment (CPE). For terms and conditions, refer to:
