OPT-E-MAN® SERVICE

/1/

Service Availability

(N)

Effective June 30, 2021, OPT-E-MAN Service will no longer be available for purchase by new or existing customers. In addition, requests to move, add, change, or renew existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable Monthly Extension rates until the service is discontinued. The Company currently plans to discontinue this service on or after June 30, 2023.

(N)

A. Description

/1/

OPT-E-MAN® Service is an advanced service offering networking capabilities utilizing Optical Ethernet. Optical Ethernet is the use of Ethernet LAN packets running over optical fiber within or as access to a service provider's network. OPT-E-MAN provides an integrated service consisting of fiber transport connected to an Ethernet device capable of switching and routing. OPT-E-MAN will provide bandwidth ranging from 2 Mbps to 1 Gbps. Customers will connect to the service using a router, bridge or switch.

OPT-E-MAN supports a logical point-to-point, point-to-multi-point or multipoint-to-multipoint configuration and enables the customer to connect locations within the Local Access and Transport Area (LATA) or Metropolitan Area Network (MAN) as if they were segments on the same LAN.

B. Terms and Conditions

1. All terms and conditions relating the individual service offering found in this Guidebook as specified on the list of California Out of Territory Guidebook Part 2, Section 2 can be found in the Guidebook or tariff schedule indicated next to that service. All of these terms and conditions are applicable to the provisions of service in this tariff.
2. All rates and charges may be adjusted at a later date.
3. OPT-E-MAN service is available at the listed rates in this Guidebook where facilities and operating conditions permit. Where facilities can only be provided as a Special Construction offering, special construction charges as set forth in Schedule Cal. P.U.C. No. 175-T, Section 15, in an Individual Case Basis (ICB) will apply.
4. New 2 Mbps, 4 Mbps and 8 Mbps CIR bandwidth options will only be available under this Guidebook over fiber optic facilities, where such facilities exist or permit.
5. Meet-Point Billing, as described in AT&T California Guidebook Part 20, Section 6 is not available under this Guidebook.
