

AT&T CALIFORNIA OUT OF TERRITORY GUIDEBOOK

PART 15 - Dedicated Telecommunications Services
SECTION 3 - Base Rate through OC-n Services

1st Revised Sheet 2

1. HIGH CAPACITY SERVICE (cont'd)

B. BASIC CHANNEL DESCRIPTION

Service Availability

Effective December 15, 2023, High Capacity Services ("Service") will no longer be available for purchase. Existing customers may retain their current Service; however, moves, additions and change orders will no longer be accepted, including upgrading or downgrading access/port speed, installation of new service or moves to different service addresses. In addition, new or renewing term agreements will no longer be available. Following the expiration of a customer's existing term agreement, Service will be provided on a month-to-month basis.

(N)
|
(N)

A High Capacity channel is a channel for the transmission of nominal 64.0 kbps^{/1/} or 1.544, 3.152, 6.312, 44.736 (DS3, DS3x3 and DS3x12), or 274.176 Mbps isochronous serial data. The actual bit rate and framing format is a function of the network channel interface selected by the customer. DS3, DS3x3 and DS3x12 will be provided with or without Company provided terminal equipment on the customer's premises. When a customer desires to furnish their own terminal equipment, the Company will work cooperatively with the customer to provide a physical interface satisfactory to both parties. High Capacity channels are provided between customer designated premises through serving wire centers or between a customer designated premises and a Company Hub or between a customer designated premises or Company Hub, and an EIS POT. DS3x12 is only provided between a customer designated premises and the serving wire center serving that premises.

High Capacity service offerings are only available where facilities and operating conditions permit. Where facilities and/or operating conditions do not permit, Special Construction as set forth in Schedule Cal. P.U.C. No. 175-T, Section 15, shall apply.

^{/1/} Available only as a channel of a 1.544 Mbps facility between two Company Digital Data Hub or as a cross connect of two channels of two 1.544 Mbps facilities at a Digital Data Hub(s); or as a through-connect of two channels of two 1.544 Mbps facilities at an Advanced Digital Network Hub. The customer must provide system and channel assignment data.

1. HIGH CAPACITY SERVICE (cont'd)

F. RATES AND CHARGES

Service Availability

Effective December 15, 2023, High Capacity Services ("Service") will no longer be available for purchase. Existing customers may retain their current Service; however, moves, additions and change orders will no longer be accepted, including upgrading or downgrading access/port speed, installation of new service or moves to different service addresses. In addition, new or renewing term agreements will no longer be available. Following the expiration of a customer's existing term agreement, Service will be provided on a month-to-month basis.

/1/ If a customer chooses to order a DS3x3 service, the channel mileage applicable to that service would be three times the appropriate channel mileage rates.

/2/ As of November 1, 2013, Term Plans greater than 36 months are no longer available for new or renewing subscribers.

/3/ As of January 15, 2021, 3-Year Term Plans are no longer available for new or renewing subscribers.

/4/ As of December 15, 2023, 1-Year Term Plans are no longer available for new or renewing subscribers. (N)

2. ADVANCED DIGITAL NETWORK

GENERAL

Service Availability

Effective December 1, 2021, Advanced Digital Network (at fixed rates of 2.4, 4.8, 9.6, 19.2, 56.0, and 64.0 kbps) will no longer be available for purchase by new or existing customers. In addition, requests to move, add, change, or renew existing service arrangements will not be accepted.

Effective December 15, 2023, Advanced Digital Network 1.544 Mbps fixed rate speed ("Service") will no longer be available for purchase. Existing customers may retain their current Service; however, moves, additions and change orders will no longer be accepted, including upgrading or downgrading access/port speed, installation of new service or moves to different service addresses. In addition, new or renewing term agreements will no longer be available. Following the expiration of a customer's existing term agreement, Service will be provided on a month-to-month basis.

(N)
|
(N)

Additional terms and conditions applicable to Special Access Services may be found in Part 2, Section 2.

All rates and charges may be adjusted at a later date.

Advanced Digital Network may be terminated on a channel port of Access Advantage Plus as found in AT&T California Guidebook Part 6, Section 7.

2. ADVANCED DIGITAL NETWORK (Cont'd)

3. OPTICAL CARRIER NETWORK (OCN) POINT TO POINT SERVICE (cont'd)

A. SERVICE DESCRIPTION

Service Availability

Effective December 15, 2023, OCN Point-to-Point Service ("Service") will no longer be available for purchase. Existing customers may retain their current Service; however, moves, additions and change orders will no longer be accepted, including upgrading or downgrading access/port speed, installation of new service or moves to different service addresses. In addition, new or renewing term agreements will no longer be available. Following the expiration of a customer's existing term agreement, Service will be provided on a month-to-month basis.

(N)
|
(N)

Optical Point-to-Point service will be designed to provide the customer with a custom point-to-point linear network. Optical Carrier Network (OCN) Point-to-Point service offers a highly reliable transport service that connects customer premises and Company Serving Wire Center in point-to-point linear configuration. OCN supports voice, data, video, imaging, Internet traffic and other advanced broadband applications.

OCN Point-to-Point channels provide high speed synchronous optical fiber-based full duplex data transmission capabilities between two points. These services provide optical data transmission with the following characteristics:

- OC-3/OC-3c provides channels operating at the terminating bit rate of 155.52 Mbps;
- OC-12/OC-12c provides channels operating at the terminating bit rate of 622.08 Mbps;

OC-3, and OC-12 channels may be used to connect:

- a customer designated premises to another customer designated premises, without add/drop multiplexing capability.
- a customer designated premises to a Company Serving Wire Center where add/drop multiplexing and add/drop functions are performed.

Optical Transmission paths for OC-3/OC-3c and OC-12/OC-12c, differentiated by bit rate and the quality of transmission is as delineated by the Optical Interface definitions in the appropriate technical reference publication(s) for the service ordered.

OC-3, and OC-12 may be connected by (1) using the appropriate OC-3 or OC-12 add/drop multiplexer (mux) along with the add/drop function to a DS1 and/or DS3 at suitably equipped wire centers, or (2) by using the full bandwidth premises to premises.

Optical Carrier Network (OCN) Point-to-Point service is only available where facilities and/or operating conditions permit. Where facilities and/or operating conditions do not permit, Special Construction as set forth in Part 2, Section 5, shall apply.

3. OPTICAL CARRIER NETWORK (OCN) POINT-TO-POINT SERVICE (cont'd)
