

2.1 Definitions

As used in this Service Guide, the following terms are defined as follows:

AT&T

Participating Carriers identified in the Participating Carriers Table.

Commingling

Commingling means the connecting, attaching, or otherwise linking of an unbundled network element, or a combination of unbundled network elements, to one or more facilities or services that a requesting telecommunications carrier has obtained at wholesale from AT&T, or the combining of an unbundled network element, or a combination of unbundled network elements, with one or more such facilities or services. Commingling means the act of commingling.

Customer

Any individual, partnership, association, joint-stock company, trust, corporation, governmental entity, or any other entity which subscribes to the Service AT&T offers under this Service Guide, including both AT&T's wholesale customers and End User customers.

Customer Site

The location at which the Service is terminated, and will be construed to include an End User's Site, as appropriate in the context, where Customer is a wholesale Customer and Service is terminated at the End User's Site that is not AT&T's Customer.

End User

Any customer of a telecommunications service that is not a carrier, except that a carrier will be deemed to be an "End User" when such carrier uses a telecommunications service for administrative purposes, and a person or entity that offers telecommunications services exclusively as a reseller will be deemed to be an "End User" if all resale transmissions the reseller offers originate on the Reseller's Site.

Service

Service means AT&T Dedicated Ethernet or AT&T Switched Ethernet Service (which may collectively be referred to as Services).

1.1 General

AT&T Dedicated Ethernet (Service) is a fiber based, point-to-point, Ethernet service that allows Customers to transport data signals between 2 locations. Service can be used to transport data as an Ethernet signal or embedded within an Optical Transport Network (OTN) signal.

Service is available at the following speed and format options:

Speed	Ethernet Formats	Optical Transport Unit (OTU) Formats
1Gbps	1GE – Gigabit Ethernet	Not available
2.5Gbps	Not available	OTU1
10Gbps	10GE LAN-PHY	OTU2e
	10GE WAN-PHY	OTU2
40Gbps	40GE	OTU3
100Gbps	100GE	OTU4

1.2 Service Availability

Service is available from this Service Guide in the following jurisdictions across the following AT&T ILEC states:

Jurisdictional Offerings

Service provides transport service where suitable equipment and facilities are available in select geographic areas. Where facilities are not available, facilities may be constructed subject to terms as set forth in Part 1, Section 7. Special Construction charges may apply.

AT&T offers Service on a private carriage basis and reserves the right to make individualized decisions regarding the provision of Service to individual customers. AT&T may negotiate the specific prices and terms for Service for each individual customer.

Commingling, as defined in Part 1, Section 2, of Service is prohibited.

(1) OOT – Out of Territory

1.1 Overview

AT&T Switched Ethernet ServiceSM (Service) is a switched Ethernet transport service providing Ethernet transport functionality using fiber and copper facilities and a switched Ethernet core network. Service provides a port with full duplex transport of data signals between Customer's Premises and an Ethernet switch in an AT&T central office which then may be interconnected with other ports.

Service supports point-to-point, point-to-multipoint, or multipoint-to-multipoint configurations. Point-to-point service provides a connection between 2 ports. Point-to-multipoint service provides multiple point-to-point connections to multiple ports in AT&T's Service network. Multipoint-to-multipoint service provides a connection between 3 or more designated ports on AT&T's Service network. AT&T will determine the interface specifications for Service in its sole discretion.

Service is provided by the applicable AT&T Participating Carrier(s) that are described in Participating Carriers Table in Part 1, Section 1.

AT&T offers Service on a private carriage basis and reserves the right to make individualized decisions regarding the provision of Service to individual Customers. AT&T may negotiate the specific prices and terms for Service for each individual Customer.

Customer may not use Service for the purpose of transporting "NG 9-1-1" calls in the State of California. See AT&T California's Network and Exchange Services Schedule Cal. P.U.C. No. 2, Section A21.

Commingling, as defined in Part 1, Section 2, of Service is prohibited.

1.2 Service Availability

Service provides transport service where suitable equipment and facilities are available in selected geographic areas. Where facilities are not available, facilities may be constructed subject to the Special Construction terms and conditions set forth in Part 1, Section 7. Special Construction charges may apply.
