ACCESS SERVICE

5. Ordering Options for Switched and Special Access Service (Cont'd)  
 5.2 Access Order (Cont'd)

5.2.1 Access Order Service Date Intervals

Access Service is provided with one of the following Service Date Intervals:

- Standard Interval
- Negotiated Interval

To the extent the Access Service can be made available with reasonable effort, the Telephone Company will provide the Access Service in accordance with the customer's requested interval, subject to the following conditions:

(A) Standard Interval

Schedules that specify installation intervals will also specify the services and quantities of the services that can be provided as specified in Section 5.2.1(B)(2) and (3). The Telephone Company will adhere to the intervals as specified in Section 5.2.2(D)(1), except during circumstances beyond its direct control (i.e., acts of God, governmental requirements, work stoppages and civil commotions). Standard Intervals only apply when facilities and equipment are available.

Access Services provided in a standard interval will be installed during Telephone Company business days. If a customer requests that installation be done outside of normally scheduled working hours, and the Telephone Company agrees to this request, the customer will be subject to applicable Additional Labor Charges as set forth in Section 13.2.6.

(B) Negotiated Interval

The Telephone Company will negotiate a service date interval with the customer when:

- (1) There is no standard interval for the service, or
- (2) The quantity of Access Services ordered exceeds the quantities specified in Section 5.2.2(D)(1), or
- (3) The customer requests a service date beyond the applicable standard interval service date.

Standard Intervals	
Analog/Voice Grade/DS0	10 days
DS1/DS1 128, 256, 384, 512, 768 Kbps <sup>(3)</sup>	7 days
DS3	7 days <sup>(1)</sup>
<sup>(2)</sup>	

The Telephone Company will offer a service date based on the type and quantity of Access Services the customer has requested. The negotiated interval may not exceed by more than six months the standard interval Service date, or, when there is no standard interval, the Telephone Company offered service date.

Each part-time Video and Program Audio<sup>(1)</sup> Special Access service is subject to a service inquiry. A service inquiry is a request to the Telephone Company to determine if facilities exist to provide the service ordered and to determine the service date on which service can be provided to the customer. (N)

All services for which rates are applied on an individual case basis are provided with a negotiated interval.

## 5.2.5 Minimum Period (Cont'd)

(B) The minimum period for part-time Video and Program Audio<sup>(1)</sup> Special Access Services is one day even though the service will be provided only for the duration of the event specified on the order (e.g., one-half hour, two hours, five hours, etc.). (N)

(C) Service Rearrangements as set forth in Sections 6.8.2(C)(5), 7.4.2(C)(5) and 7.4.2(C)(6) for Switched Access, Special Access and Specialized Network Services respectively, may be made without a change in minimum period requirements.

The changes listed below will cause a new minimum period to be established.

- (2) A change in customer premises or customer's end user's premises
- (3) A change in type of service (i.e., Switched Access to Special Access, one type of Special Access to another, or one type of Switched Access Feature Group to another except as set forth in Section 6.7.5)
- (4) A change in Local Distribution Channel (number or type) in Special Access (Section 7)
- (5) A change in Interface Group in Switched Access or Directory Assistance Service (Sections 6 and 9)
- (6) A change in traffic type
- (7) A change from two point to multipoint Special Access Service or from multipoint to two-point Special Access Service

(D) The minimum period for Special Access Services provided on an Individual Case Basis (ICB) and for Specialized Services Arrangement is as specified in the ICB filing.

## 5.2.6 Minimum Period Charges

When Access Service is disconnected prior to the expiration of the minimum period, charges are applicable for the balance of the minimum period. A disconnect constitutes facilities being returned to available inventory.

The Minimum Period Charge for monthly billed services will be determined as follows:

- (A) For Switched Access Service, the charge for a month or fraction thereof is equal to the applicable minimum monthly charge for the capacity as set forth in 6.7.3 following.
- (B) For Special Access Service or Dedicated Network Access Link, the charge for a month or fraction thereof is the applicable monthly rates for the service as set forth in 7.5 or 8.3.5 following.

The Minimum Period Charge for part-time Video and Program Audio Services<sup>(1)</sup> is the applicable daily rate for the service as set forth in 7.5 following. (N)

The Minimum Period Charges for the Optional Payment Plan (OPP) are the monthly payments for the OPP term.

All applicable nonrecurring charges for the service will be billed in addition to the Minimum Period Charge.

## 5.2.7 Shared Use Facilities

Shared Use (i.e., Switched and Special Access Services provided over the same analog or digital high capacity facilities) is allowed. Shared use facilities to a Hub will be ordered and provided as Special Access Service. While shared use is allowed, individual services utilizing these facilities must be ordered either as Switched Access Service or Special Access Service. When placing the order for the individual service(s), the customer must specify a channel assignment for each service ordered.

**ACCESS SERVICE****7. Special Access Service (Cont'd)****7.4 Rate Regulations (Cont'd)****7.4.8 Facility Hubs**

A customer has the option of ordering direct analog, Ameritech DS1 or Ameritech DS3 facilities (i.e., Group, Supergroup, Mastergroup, Ameritech DS1 or Ameritech DS3) to a facility Hub for channelizing to individual services requiring lower capacity facilities (e.g., Telegraph<sup>(1)</sup>, Voice<sup>(1)</sup>, Program Audio<sup>(2)(3)</sup>, etc.).

(N)

Different locations may be designated as Hubs for different facility capacities, e.g., multiplexing from digital to digital may occur at one location while multiplexing from digital to analog may occur at a different location. Hub locations (Wire Centers) may be further designated as Intermediate and Terminus Hubs as set forth in Section 2.6.

When ordering, the customer will specify the desired multiplexing Hub(s) selected from the Exchange Carrier Association Tariff F.C.C. No. 4. This tariff identifies the type(s) of multiplexing functions which are available and the serving wire centers where they are available.

Some of the types of multiplexing available include the following:

- from higher to lower bit rate
- from higher to lower bandwidth
- from digital to voice frequency channels

End to end services may be provided on channels of these facilities to a Hub. The transmission performance for the end to end service provided between customer designated premises will be that of the lower capacity or bit rate. For example, when a 1.544 Mbps facility is multiplexed to voice frequency channels, the transmission performance of the channelized services will be Direct Analog Service, not Ameritech DS1 Service.

**ACCESS SERVICE****7. Special Access Service (Cont'd)****7.4 Rate Regulations (Cont'd)****7.4.8 Facility Hubs (Cont'd)**

Cascading multiplexing occurs when an analog, Ameritech DS1 or Ameritech DS3 channel is de-multiplexed to provide channels with a lesser capacity and one of the lesser capacity channels is further de-multiplexed. For example, a Supergroup facility is de-multiplexed to five Group facilities and then one of the Group facilities is further de-multiplexed to individual voice grade channels.

When cascading multiplexing is performed, whether in the same or a different Hub, a charge for the additional multiplexing unit also applies. When cascading multiplexing is performed at different Hubbing locations, Channel Mileage Termination and Channel Mileage charges also apply between the Hubs.

Although not requiring multiplexing, the Telephone Company will designate certain Hubs for Video and Program Audio<sup>(1)(2)</sup> Services. A customer can order full-time and/or part-time services(s) between customer designated premises and a Hub and will be billed accordingly at the rates set forth in 7.5.4 or 7.5.5 following for a full-time or part-time service, as appropriate. At the request of a customer, the full-time and/or part-time services provided to the Hub may be connected together in the following configurations; full-time to full-time, full-time to part-time or part-time to part-time. The customer will be charged for each such connection made at the rates for Other Labor as set forth in 13.2.6(C) following. The rates that apply for the service between each customer designated premises and the Hub are a Local Distribution Channel and Channel Mileage Terminations and Channel Mileage, if applicable. In addition, for Program Audio<sup>(1)(2)</sup> Services, rates for optional features and functions may be applicable. (N)
