ACCESS SERVICE

2. General Regulations (Cont'd)

2.6 Definitions (Cont'd)

Common Line

The term "Common Line" denotes a line, trunk, pay telephone line or other facility provided under the general and/or local exchange service tariffs of the Telephone Company, terminated on a central office switch. A common line-residence is a line or trunk provided under the residence regulations of the general and/or local exchange service tariffs. A common line-business is a line or trunk provided under the business regulations of the general and/or local exchange service tariffs.

Communications System

The term "Communications System" denotes channels and other facilities which are capable of communications between terminal equipment provided by other than the Telephone Company.

(D)
|
(D)

Common Channel Signaling

The term "Common Channel Signaling" denotes a switched communications network that allows call control messages from the voice and data network to be transferred on communications paths (out of band) separate from the voice and data communications.

Conduit Space

Any reinforced passage or opening in, on under/over or through the ground between the feeder route conduit system (manhole "O") and cable vault location capable of containing communications facilities, and includes: cable entrance facilities; main conduit; ducts; inner ducts; gas traps, undergroup dips such as short sections of conduit under roadway, driveways, parking lots and similar conduit installations, required to bring the collocater provided fiber optic feeder cable into the Telephone Company's wire center.

(This page filed under Transmittal No. 517)

ACCESS SERVICE

2. General Regulations (Cont'd)2.6 Definitions (Cont'd)Equal Level Echo Path Loss

The term "Equal Level Echo Path Loss" (ELEPL) denotes the measure of Echo Path Loss (EPL) at a 4-wire interface which is corrected by the difference between the send and receive Transmission Level Point (TLP).
[ELEPL = EPL - TLP (send) + TLP (receive)]

Exception

The term "Exception" denotes a service offered under this tariff which may not be provided by a concurring carrier(s).

Exchange

The term "Exchange" denotes a unit generally smaller than a Local Access and Transport Area established by the Telephone Company for the administration of communications service in a specified area which usually embraces a city, town or village and its environs. It consists of one or more central offices together with the associated facilities used in furnishing communications service within that area. One or more designated exchange comprise a given Local Access and Transport Area.

Exchange Access Signaling

The signaling system is used by end offices to transmit originating information and address digits to the customer's premises and which includes the means of verifying the receipt of these address digits. Features of this system include overlap outpulsing, identification of the ten-digit telephone number of the calling party, and acknowledgement wink supervisory signals. (C)

Expanded Interconnection Service

The term "Expanded Interconnection Service" denotes a fiber optic or microwave connection between the Telephone Company-provided Switched or Special Access Service and collocator-provided transmission equipment.

ACCESS SERVICE

3. Carrier Common Line Access Service

This section contains the specific regulations governing the rates and charges which apply to Carrier Common Line Access Service in conjunction with Switched Access Service provided in Section 6 of this tariff. There are two types of rate elements: Carrier Common Line Charges (CCLCs) and Multiline Business Presubscribed Interexchange Carrier Charges (PICCs).

3.1 General Description

Carrier Common Line Access Service provides for the use of end users' Telephone Company provided common lines by Customers for access to such end users to furnish Interstate communications.

Premium Access is Switched Access provided under this tariff to Customers that furnish interstate MTS/WATS. (C)
(C)

A Special Access Surcharge, set forth in Section 7.4.2 (E), will apply to interstate special access service provided by the Telephone Company to a Customer, in accordance with regulations set forth in Section 7.4.2. (T)
(T)

Multiline Business Presubscribed Interexchange Carrier Charges provide for the use of an End User Common Line (EUCL) by the Multiline Business end user.

ACCESS SERVICE

3. Carrier Common Line Access Service (Cont'd)3.6 Resold Services (Cont'd)3.6.4 Rate Regulations Concerning the Resale of MTS and MTS-type Services (Cont'd)(D) Access Groups

(D)

When all the usage on an access group originates from and/or terminates at end offices, the Premium Access Charge per minute as set forth in Section 3.9.1(A) will apply. The minutes billed Carrier Common Line Access Services charges will be the adjusted originating interstate access minutes and the adjusted terminating interstate access minutes for such access groups.

(C)

(T)

The adjusted originating access minutes will be the originating interstate access minutes less the reported resold originating MTS and/or MTS-type service minutes of use as set forth Section 3.6.4(A) (1); but not less than zero. The adjusted terminating access minutes will be the terminating interstate access minutes less the reported resold terminating MTS and/or MTS-type service minutes of use as set forth in Section 3.6.4(A) (2); but not less than zero.

ACCESS SERVICE

3. Carrier Common Line Access Service (Cont'd)3.8 Rate Regulations - Carrier Common Line Charges (CCLCs) (Cont'd)3.8.5 Determination of Premium Charges

After the adjustments as set forth in Sections 3.6.4 and 3.8.4 (T)
have been applied, when necessary, to Switched Access Service
access minutes, charges for the involved customer account will be
determined as follows:

- (A) Access minutes for all premium rated Switched Access Service (T)
subject to Carrier Common Line Charges will be multiplied by
the Premium Access per minute rate as set forth in Section (D)
3.9.1(A).
- (B) Reserved for Future Use (T)
- (C) Carrier Common Line Charges shall not be reduced as set forth (T)
in Section 3.6.1 unless Switched Access Charges, as set forth (D)
in Section 6, are applied to the customer's Switched Access
Service.
- (D) Terminating Premium Access, per minute charge applies to: (D)
 - all terminating access minutes of use;
 - all originating access minutes of use associated with ALA
or FGA Access Services where the off-hook supervisory
signaling is forwarded by the Customer's equipment when
the called party answers;

ACCESS SERVICE

5. Ordering Options (Cont'd)5.2 Access Order (Cont'd)

For Directory Assistance Service, the customer shall specify which FGB, (T)
FGD, ATA-950 or ATA-101XXXX Switched Access Service trunk group is to be (T)
associated with the Directory Assistance Service. The customer then
specifies the Directory Transport options.

For originating 1+ and 011+ sent-paid traffic from a Telephone Company (C)
pay telephone, the customer must specify the end offices they want to (C)
serve. The customer will determine the number of trunks and the routing,
either direct or to the coin tandem, when ordering Exchange Access
Operator Service System (EAOSS) trunks. When ordering Modified Operator
Services (MOS) trunks, the customer will determine the number of trunks (C)
from each designated end office to their specified location. MOS trunks (C)
are not provisioned via the access or coin tandems. The customer is
responsible for providing all other operator services signaling
capabilities, as described in the Pacific Bell Network Interface Document
PUB-L-780085-PB.

(B) The following applies when placing an order for Special Access
Services:

For all Special Access Services, the customer must specify the
customer-designated premises or hubs involved, the type of service
(e.g. Video, Voice Grade, High Capacity, etc.) the channel
interface, technical specification package and optional features and
functions desired. For Multipoint services, the channel interface
at each premises may at the request of the customer be different but
all such interfaces shall be compatible.

For WATS Access Line Service, the customer must also specify the
type of calling (i.e., originating only, terminating only or two way
calling) for which the service is to be provided. Additionally,
when the wire center which serves the customer premise is not a WATS
serving office, the Telephone Company will provide the service to
the nearest wire center where the screening function exists. In
these circumstances, the customer will be so notified and the order
will be changed to designate the appropriate premises. No service
order change charge will apply.

When the customer desires an exemption from the Special Access (T)
Surcharge, they shall furnish with the order, notification as set (D)
forth in Section 7.4.2.

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.1 General (Cont'd)6.1.3 Rate Categories (Cont'd)(A) Switched Transport (Cont'd)(5) Nonchargeable Optional Features (Cont'd)(f) Tandem Signaling

Signaling information necessary for tandem switching (D)
will be provided from end offices. This option is (C)
available with either MF or SS7 signaling. Tandem
Signaling will provide the CIC and OZZ in
association with MF signaling. TNS parameter will
be provided with SS7 signaling.

Tandem signaling is an originating offering
utilizing FGD Switched Access Service. It will be (C)
provided on one-way originating FGD trunks from end
offices to a Tandem Switching Provider's (TSP) point
of termination.

TSPs can terminate switched access traffic to
Telephone Company end offices or access tandems over
any currently tariffed Feature Group Service. The
customer ordering the terminating Feature Group
service will be the customer of record and billed
the terminating usage. This customer may be either
a TSP or a customer of the TSP.

If the TSP is the customer of record and requests
the Telephone Company to separately bill the traffic
usage to it's multiple customers, the TSP must
provide to the Telephone Company billing tapes in a
format to be mutually agreed upon by the Telephone
Company and the TSP. These tapes must be provided
in a standard EMI format and received by the
Telephone Company within a mutually agreed upon
timeframe.

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.2 Provision and Description of Switched Access Service (Cont'd)6.2.11 Access Trunk Arrangement-101XXXX (ATA-101XXXX) (Cont'd)(A) Description (Cont'd)

(10) (Cont'd)

When a customer has both ATA-950 and ATA-101XXXX access in the same end office or separate end offices which subtend the same access tandem and chooses to route his originating ATA-950 calls over ATA-101XXXX access, the Telephone Company will direct calls dialed by the customer's end users using the customer's ATA-950 access code to the customer's ATA-101XXXX access service. Such calls will be rated as ATA-101XXXX. (D)

The customer must be prepared to handle normally dialed ATA-101XXXX calls, as well as, calls dialed with the ATA-950 access code which requires the customer to receive additional address signaling from the end user. Such calls will be rated as ATA-101XXXX.

- (11) ATA-101XXXX is available to accept calls with multifrequency or CCSAC signaling. With CCSAC signaling, the customer may also order Charged Number (CN) as an additional feature.

(B) ATA-101XXXX Optional Features(1) Common Switching Optional Features

- (a) Automatic Number Identification (ANI)
- (b) Service Class Routing
- (c) Alternate Traffic Routing
- (d) Call Gapping Arrangement
- (e) Trunk Access Limitation
- (f) International Carrier Option
- (g) End Office End User Line Service Screening for Use with WATS Access Line Service
- (h) Hunt Group Arrangement for Use with WATS Access Line Service
- (I) Hunt Group Arrangement for Use with PVN Access Line Service

(This page filed under Transmittal No. 517)

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.2 Provision and Description of Switched Access Service (Cont'd)6.2.14 500 Access Service (Cont'd)

When 500 Access Service is provided from an end office, all such service will be provisioned in accordance with the technical characteristics available with FGD and ATA-101XXXX. (C)

500 Access Service originating from end offices with the calling party's identification will be provided using access signaling with overlap outpulsing and ten-digit ANI, or with SS7 out of band signaling when the customer has ordered the CCSAC optional feature with FGD or ATA-101XXXX. (C)

500 Access Service originating from an independent local exchange company non-equal access end office or handicapped sources routed via operator switches without complete end user identification will be provided using traditional signaling. 500 Access Service traffic will be combined in the same trunk group arrangement with other 500 and non-500 Access Service traffic unless the customer orders a separate trunk group only for its 500 Access Service traffic. The customer can obtain a separate trunk group using traditional signaling at the access tandem.

500 Access Service usage measurement shall be in accordance with the regulations set forth in Section 6.7.8 for FGD and ATA-101XXXX. (T)

The rates and charges for 500 Access Service are described in Section 6.8.14. (T)

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.3 Local Switching Optional Features and BSEs (Cont'd)6.3.2 Transport Termination (Cont'd)(B) Operator Trunk - Modified Operator Services (MOS) - Coin, Non-Coin, or Combined Coin and Non-Coin (Cont'd)

Combined Coin and Non-Coin:

This arrangement provides for initial coin return control and routing of 0+, 0-, 1+, 01+ or 011+ prefixed originating operator-assisted coin and non-coin calls requiring operator assistance to the customer's premises. Because operator-assisted coin and non-coin-calling traffic is routed over a trunk group dedicated to operator assisted calls, this arrangement is only provided in association with the Service Class Routing option.

This arrangement is normally ordered by the customer in conjunction with the ANI optional feature, the trunk groups equipped with this arrangement will be terminated at the customer's specified location. When so equipped, the ANI optional feature provides for the forwarding of information digits which identify that the call has originated from a hotel or motel, and whether room-number identification is required, or that special screening is required, e.g., for coinless pay telephone stations, dormitory or inmate stations, or other screening arrangements agreed to between the customer and the Telephone Company.

This option provides the operator functions available in the end office to the customer's specified location. These functions are (1) Operator Release, (2) Operator Attached, (3) Coin Collect, (4) Coin Return, and (5) Ringback. It is available from the Telephone Company's end office to the customer's specified location. This option is not available in combination with the CCSAC optional feature.

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.3 Local Switching Optional Features and BSEs (Cont'd)6.3.2 Transport Termination (Cont'd)(C) Operator Trunk - Exchange Access Operator Services System
(EAOSS)

This option provides the operator functions available in the end office to the customer. These functions are (1) Operator Released, (2) Operator Attached, (3) Coin Collect, (4) Coin Return, and (5) Ringback. It is available with ATA-101XXXX and FGD and is provided as a trunk type of Transport Termination from the Telephone Company's coin tandem or direct from the end office to the customer's specified location, where technically feasible.

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.7 Rate Regulations (Cont'd)

6.7.1 Description and Application of Rates and Charges (Cont'd)

(D) Application of Rates

Switched Transport, Local Switching, and the Information
Surcharge rates are applied as premium rates.

Premium rates apply to all ATA-101XXXX and FGD access
minutes. Premium rates also apply to all ALA, FGA, FGB, ATA-
950, 500 and all Toll Free Access Service access minutes that
originate from or terminate at end offices.

ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Service Descriptions (Cont'd)7.2.3 Voice Grade Service (Cont'd)(E) WATS Access Line (WAL) Service(1) Basic Service Description

A WATS Access Line Service provides a service for voice frequency transmission capability. The service provides a connection between a customer designated premises and a WATS serving office associated with the closed end of 800 Service or WATS. Originating access is provided with Feature Group D Switched Access Service as set forth in Section 6. Terminating access is provided with Feature Groups A, B, or D as set forth in Section 6. (D)

WAL service can be arranged for screening, blocking and directionality at the option of the customer and where available. It is provided with either rotary dial or dual tone multifrequency address signaling and either loop start, ground start, E&M, or reverse battery supervisory signaling. The choice of the type of signaling is at the option of the customer and subject to the technical limitations identified in the Technical Reference TR-NPL-000334. WATS Access Line Service is provided as an effective two-wire, or an effective four-wire transmission path. (D)

WAL Service is provided for interstate Communications only. All originating intrastate calls will be blocked, as approved by the California Public Utilities Commission in Resolution No. T-12009, dated March 6, 1987. For further information refer to Pacific Bell Schedule Cal.P.U.C. Nos. A7. and 175-T.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Regulations (Cont'd)

7.4.9 Extension of WATS Access Service

WATS Access Service is available with extensions, i.e., additional terminations, of the service at different customer designated premises in the same or different LATAs. Extensions are provided and charged for as separate Voice Grade Special Access Service. The rate elements which apply are: WATS Access Line Channel Termination, Channel Mileage, if applicable, and Signalling Capability (Optional Features and Functions), if applicable. All appropriate charges as set forth in 7.5 following will apply.

(Cont'd)13.3 Miscellaneous Services (Cont'd)13.3.3 Presubscription (Cont'd)

(B) Provisions (Cont'd)

(2) Initial Selection of Primary IC

An end user or agent is the person identified in the account as responsible for payment of the account or any person contractually or otherwise lawfully authorized to change telecommunications services and/or represent the end user or agent.

- (a) New end users or agents, who request telephone service in an end office, will be asked to select a primary IC at the time they place an order with the Telephone Company for Telephone Exchange Service or public or semi-public pay telephone service. (C)

End users or agents may select either of the following options at no additional charge.

- Designate a primary IC and dial 101XXXX or other access codes (i.e., 950-0XXX or 950-1XXX) to reach services of the same IC and/or other ICs.*
- Designate that they do not want to be presubscribed to any IC and choose to dial 101XXXX or other access codes (i.e. 950-0XXX or 950-1XXX) to reach services of all ICs.*

The Telephone Company will confirm initial PIC selections in writing to the end user or agent.

In the event that end users or agents return these confirmation notices identifying PICs different from those given verbally, the Telephone Company will process such written selections without charge.

* This option is not available to public and semi-public pay telephones.
