## ACCESS SERVICE

6. Switched Access Service (Cont'd)6.1 General (Cont'd)6.1.1 Switched Access Service Arrangements and Manner of Provision  
(Cont'd)(E) Manner of Provision (Cont'd)(1) Traffic Types (Cont'd)

When ordering capacity for Switched Access, the customer must at a minimum specify such access capacity in terms of Originating traffic type or Terminating traffic type or PSDS Access Traffic type. PSDS Access is available with ATA-101XXXX and FGD only. Directory Assistance traffic type is used for ordering Directory Assistance Access Service as set forth in 9.2 following. When ordering capacity for 500, 8yy or 900 Access Service, the customer must specify that the traffic type is Originating.

Because some customers will wish to further segregate their originating ATA-101XXXX, FGD or 8yy Access Service traffic into separate trunk groups, Originating traffic type is further categorized into Domestic, 500, 8yy, 900, Operator, and IDDD. Domestic traffic type (D) represents access capacity for carrying only domestic traffic other than 500, 8yy, 900, and Operator traffic; (D) IDDD traffic type represents access capacity for carrying only international traffic; and, 500, 8yy, 900, and Operator traffic type represents access capacity for (D) carrying only 500, 8yy, 900, and Operator traffic (D) respectively. When ordering such types of access, the customer must specify Domestic, 500, 8yy, 900, Operator, (D) or IDDD traffic types.

For Switched Access Services, the customer at a minimum, shall specify on the customer's order for service, the Switched Transport facilities to be provided (i.e., Entrance Facility, EISCC, Direct Trunked Transport or Tandem Switched Transport). When specifying the Switched Transport facilities to be provided, the customer must indicate if the facilities to be provided are existing (i.e. spare transmission paths) or are new.
