2. General Regulations (Cont'd)2.4 Payment Arrangements and Credit Allowances (Cont'd)2.4.4 Credit Allowance for Service Interruptions(A) General

A service is interrupted when it becomes unusable to the customer because of a failure of a Telephone Company facility component used to furnish service under this tariff, or in the event that the protective controls applied by the Telephone Company result in the complete loss of service by the customer as set forth in 6.5.1 following. An interruption period starts when an in operative service is reported to the Telephone Company and ends when the service is operative. The total credit allowance available to the customer regardless of the number of service interruptions within a 30 day period will not exceed 100% of the monthly rates of the affected service that the customer would have otherwise paid.

(B) When a Credit Allowance Applies

In case of an interruption to any service, allowance for the period of interruption, if not due to the negligence of the customer, shall be as follows:

- (1) For Special Access other than set forth in (2) and (3) following and for the Switched Transport portion of Switched Access Services, no credit shall be allowed for an interruption of less than 30 minutes. The customer shall be credited for an interruption of 30 minutes or more at the rate of 1/1440 of the monthly charges for the facility or service for each period of 30 minutes or major fraction thereof that the interruption continues. The monthly charges used to determine the credit shall be as follows:

- (a) For two-point Special Access the monthly charge shall be the total of all the monthly rate element charges associated with the service (i.e., two channel terminations, channel mileage⁽¹⁾ and optional features⁽¹⁾ and functions).

⁽¹⁾ These services have been de-tariffed pursuant to FCC Order No. 17-43, released April 28, 2017. Terms and Conditions for de-tariffed services are available at www.att.com/guidebook.

ACCESS SERVICE

5. Ordering Options (Cont'd)5.2 Access Order (Cont'd)5.2.3 Cancellation of an Access Order (excluding the following Special Access Service: SONET Ring and Access Service ^{(1) (2)}

(A) A Customer may cancel an Access Order for the installation of service. The Access Order must be cancelled at least 1 business day before the service date. The cancellation date is the earliest date the Telephone Company receives either written or verbal notice from the Customer that the order is to be cancelled. The verbal notice must be followed by written confirmation within 10 days. Termination liability charges, associated with term plans, will not apply to orders that are cancelled within 90 calendar days after the original service date where the Customer has accepted billing but not accepted service.

(B) When the Customer cancels an Access Order, a Cancellation Charge will apply.

Cancellation charges are calculated by multiplying the nonrecurring charges (NRC) associated with the shortest term available for the service being cancelled, by the applicable critical date percentage shown in the Table of Cancellation Charge Percentages, following, for the critical date last completed on the order, plus:

1. The Access Order Charge
2. Other charges specified in Section 5.2.2 (Access Order Modifications), if applicable.

Example

If a Customer submits an order to install a new DS1 High Capacity service channel termination and then cancels the order after the Design, Verified, and Assigned (DVA) critical date, but before the Wired and Office Tested (WOT) critical date, the cancellation charge will be calculated as follows:

Cancellation Charge = 55.7% (from the Table of Cancellation Charge Percentages, following) **X** Non-Recurring installation charge for one channel termination.

The Access Order Charge and other charges specified in Section 5.2.2 (Access Order Modifications), if applicable, are added to the cancellation charge.

(1) Effective 01/03/06, SONET Ring and Access Service is limited to existing customers at existing locations except where spare capacity exists; customers may add additional locations on existing rings. New SONET ring services will be provided via Dedicated SONE Ring Service.

5. Ordering Options (Cont'd)

5.2 Access Order (Cont'd)

5.2.3.1 Cancellation of an Access Order (for the following Special Access Service: SONET Ring and Access Service^{(1) (2)} (Cont'd)

Cancellation charges are applied based upon the type of special access service being cancelled which is categorized as either, 1) "point to point" service or 2) "non-point to point" service. However, at no time will cancellation charges apply until costs for installation of facilities have been incurred by the Telephone Company. Service installation costs incurred by the Telephone Company start on the application date, when the Telephone Company confirms the order with the customer.

Cancellation charges for "point to point" services are based upon the date that a customer cancels an Access Order with respect to the Design Layout Report Date (DLRD), of the service being provisioned, as described in Section 5.2.3.1(B) (2) following.

The DLRD is the date the Design Layout Report is forwarded to the customer. The DLRD is provided to the customer upon firm order confirmation.

The table below defines the product categories for "point to point" services pertaining to this section:

ACCESS SERVICE

7. Special Access Service

Pursuant to Federal Communications Commission's Order in CC Docket No. 83-1145, Paragraphs 7.1 through 7.5 contain material which may differ from the material previously appearing in those paragraphs.

Non-Competitive End-User Channel Terminations (and associated optional features and functions) are the Special Access Services offered under this tariff. Other Special Access Services required to complete a circuit are available at www.att.com/guidebook.

7.1 General

Special Access Service provides a transmission path to interconnect customer designated premises* either directly through a Telephone Company Wire Center or through a Telephone Company Hub where bridging or multiplexing⁽²⁾ functions are performed, or to connect a customer premises with SONET Ring and Access Services⁽¹⁾⁽²⁾, or to connect a customer designated premises with a WATS serving office, or to connect a customer designated premises to an EIS Point of Termination. Special Access Services are ordered under the Access Order provisions set forth in Section 5. preceding.

Rates and charges for Special Access Service are set forth in Section 7.5 following.

The connections provided by Special Access Service can be either analog or digital. Analog connections are differentiated by spectrum and bandwidth. Digital connections are differentiated by bit rate.

7.1.1 Service Types

Each type of Special Access Service has its own characteristics. All are subdivided by one or more of the following:

- Transmission specifications,
- Bandwidth,
- Speed (i.e., bit rate),
- Spectrum

Non-Competitive End User customers can order a basic service and select, from a list of available features and functions and channel interfaces, those that they desire to meet specific communications requirements.

* Telephone Company Centrex CO-like switches, as well as, Primary Rate ISDN (PRI) switches are considered to be customer premises for purposes of administering regulations and rates contained in this tariff.

⁽¹⁾ Effective 01/03/06, SONET Ring and Access Service is limited to existing customers at existing locations except where spare capacity exists; customers may add additional locations on existing rings. New SONET ring services will be provided via Dedicated SONET Ring Service.

⁽²⁾ These services have been de-tariffed pursuant to FCC Order No. 17-43, released April 28, 2017. Terms and Conditions for de-tariffed services are available at www.att.com/guidebook.

ACCESS SERVICE

7. Special Access Service (Cont'd)7.1 General (Cont'd)7.1.1 Service Types (Cont'd)

The customer has the option of ordering analog, digital high capacity or Fiber AdvantageSM facilities (i.e., 1.544 Mbps⁽¹⁾, 3.152 Mbps, 6.312 Mbps, 44.736 Mbps and 274.176 Mbps) to a Telephone Company Hub for multiplexing⁽³⁾ to individual channels of a lower capacity or bandwidth. Descriptions of the types of multiplexing⁽³⁾ available at the Hubs, as well as the number of individual channels which may be derived from each type of facility are set forth in 7.2 following. Additionally, the customer may specify optional features for the individual channels derived from the facility to further tailor the channel to meet specific communications requirements. Descriptions of the optional features and functions available are also set forth in 7.2 following. The customer may order SONET Ring and Access Services^{(2) (3)} (i.e., 1.544 Mbps - 2.488 Gbps) as described in 7.2.11 following.

(1) Effective May 17, 2003, Fiber AdvantageSM DS1 Rate Stability Payment Plan will no longer be available to new customers. There will be no change to existing customers. Refer to section 7.4.11(A) for conversion options.

(2) Effective 01/03/06, SONET Ring and Access Service is limited to existing customers at existing locations except where spare capacity exists; customers may add additional locations on existing rings. New SONET ring services will be provided via Dedicated SONET Ring Service.

ACCESS SERVICE

7. Special Access Service (Cont'd)7.1 General (Cont'd)7.1.1 Service Types (Cont'd)

Cascading multiplexing⁽¹⁾ occurs when a 3.152 Mbps facility is provided from a customer designated premises to a Telephone Company Hub for multiplexing⁽¹⁾ to two 1.544 Mbps channels. The 1.544 Mbps channels may be further multiplexed at the same or a different Hub to analog or digital channels or may be extended to other customer designated premises. Optional features may be added to either the high capacity service or to individually multiplexed channel(s). When ordering, the customer will specify the desired multiplexing Hub(s) selected from the NATIONAL EXCHANGE CARRIER ASSOCIATION, INC. TARIFF F.C.C. NO. 4.

End to end services may be provided on channels of these facilities to a Hub. The transmission performance for the end to end service provided between customer designated premises will be that of the lower capacity or bit rate. For example, when a 1.544 Mbps facility is multiplexed to voice frequency channels, the transmission performance of the channelized services will be Voice Grade, not High Capacity.

ACCESS SERVICE

7. Special Access Service (Cont'd)7.1 General (Cont'd)7.1.2 Rate Categories

There are four basic rate categories which apply to Special Access Service:

Channel Terminations (described in 7.1.2(A) following)
Channel Mileage (described in 7.1.2(B) following)⁽²⁾
Optional Features and Functions (described in 7.1.2(C) following)⁽²⁾
SONET Ring and Access Services⁽¹⁾ (described in 7.2.11) following)⁽²⁾.

In addition, a Special Access Surcharge and a message station equipment Recovery Charge may apply, as set forth in 7.4 following.

(A) Channel Termination

The Channel Termination rate category provides for the communications path between an end user customer designated premises and the serving wire center of that premises or for the communications path within a building which connects a customer's facilities with an end user customer designated premises without routing through a serving wire center. Included as part of the Channel Termination is a standard channel interface arrangement which defines the technical characteristics associated with the type of facilities to which the access service is to be connected at the Point of Termination (POT) and the type of signaling capability, if any. The signaling capability itself is provided as an optional feature as set forth in (E) following. One Channel Termination charge applies per customer designated premises at which the channel is terminated. For WATS Access Line Service, only one Channel Termination applies per service. This charge will apply even if the customer designated premises and the serving wire center are colocated in a Telephone Company building.

The SONET Ring and Access Service⁽¹⁾⁽²⁾ equivalent to a channel termination is the Local Loop Access Link as defined in 7.2.11(A)(4)(a) following.

(1)Effective 01/03/06, SONET Ring and Access Service is limited to existing customers at existing locations except where spare capacity exists; customers may add additional locations on existing rings. New SONET ring services will be provided via Dedicated SONET Ring Service.

7. Special Access Service (Cont'd)7.1 General (Cont'd)7.1.2 Rate Categories (Cont'd)(C) Optional Features and Functions

The Optional Features and Functions rate category provides for optional features and functions which may be added to a Special Access Service to improve its quality or utility to meet specific communications requirements. These are not necessarily identifiable with specific equipment, but rather characteristics may be obtained. These characteristics may be obtained by using various combinations of equipment. Although the equipment necessary to perform a specified function may be installed at various locations along the service, it will be charged for as a single rate element.

Examples of Optional Features and Functions that are available include, but are not limited to, the following:

- Signaling Capability
- Conditioning
- Bridging and/or multiplexing⁽¹⁾

Descriptions for each of the available Optional Features and Functions are set forth in 7.2 following.

(D) Collocation Transport

Collocation Transport provides for the transmission facilities between collocation arrangements located in Telephone Company Central Offices.

There are two components of Collocation Transport.

(1) Inter/Intra Office Fixed⁽¹⁾

Inter/Intra office fixed rate element provides for The electronic equipment required to terminate a channel between two collocation arrangements located either in the same central office (intra) or in two separate central offices (inter).

When the DS1 Intra Office Fixed channel is ordered between two collocation arrangements that are for the same collocator, it will be provisioned as a temporary arrangement and will be in service until the collocator's own facilities are installed. There is no additional charge to disconnect these temporary facilities.

(2) Inter Office Per Mile⁽¹⁾

The Per Mile charge provides for the electronic equipment and facilities necessary to provide the interoffice transport between two collocation arrangements.

For each day or part day of usage after the daily rates have been topped, a charge equal to 1/30th of the monthly rate will apply.

Split Billing Arrangement is an option which allows for the interconnection of two or more different customers' Special Access Services in Telephone Company Serving Wire Centers for billing purposes only. This arrangement is only available when a service is hubbed for multiplexing⁽¹⁾, e.g., DS3 to DS1 or DS1 to DS0 and each customer must have a minimum of one channel termination at its designated premises. Separate billing arrangements, (Shared Network Arrangement), associated with SONET Services are set forth in Sections 7.4.16(N), 30.3(G) and 32.2(D) (5) (a). Hubbing locations are set forth in the NATIONAL EXCHANGE CARRIER ASSOCIATION, INC. TARIFF F.C.C. NO. 4.

However, the customer with the higher bit rate service (e.g., DS3 or DS1) must provide the channel assignment to the customer with the lower bit rate service prior to the ordering of the lower bit rate service.

Each customer will be billed the applicable tariff rates and charges set forth in 7.5 following, for its individual service(s). Multiplexing⁽¹⁾ will be billed to the customer with the higher bit rate service.

The customer that controls the higher bit rate service shall be the primary customer for reporting service outages. Out of service adjustments will be handled in accordance with Credit Allowance for Service Interruptions as set forth in Section 2.4.4 preceding.

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.18 DS1 Term Payment Plan (DS1 TPP)(A) General Description

The DS1 Term Payment Plan (DS1 TPP) is a term plan that allows a customer to purchase DS1 High Capacity Service over a 1, 2 or 3 year period.^{(1) (2) (3)} During the term of the selected DS1 TPP, Telephone Company initiated recurring rate changes (increases or decreases) will automatically be applied to the monthly payments for the remaining months of the current DS1 TPP term. The monthly recurring rate during the DS1 TPP term will never exceed the initial DS1 TPP rate. The DS1 TPP rates can be found in Section 7.5.9(I).

The DS1 TPP cannot be combined with other tariffed services, discounts, or pricing flexibility contracts, unless explicitly stated in the respective tariff terms and conditions.

The following recurring rate elements are included in the DS1 TPP:

- DS1 High Capacity Service Channel Termination; refer to Section 7.2 for description
- DS1 High Capacity Service Channel Mileage⁽⁴⁾ - Fixed and Per Mile; refer to Section 7.2 for description
- DS1 High Capacity Service Central Office Multiplexing⁽⁴⁾; refer to Section 7.2 for description
- DS1 High Capacity Service Collocation Transport (Fixed and Per Mile)⁽⁴⁾; refer to section 7.1 for a description.

⁽¹⁾ Effective on September 13, 2017, DS1 TPP 5- and 7-year Payment Plans are no longer available, including for any otherwise available conversions. Circuits already subject to a DS1 TPP 5- or 7-year Payment Plan, as of September 13, 2017, will continue to be provided under the then-current DS1 TPP 5- or 7-year Payment Plan term for the remainder of that term.

⁽²⁾ Effective on November 1, 2022, DS1 TPP 2- and 3-year, and DS3 (High Capacity and Fiber Advantagesm) 3-year Payment Plans are no longer available, including for any otherwise available conversions. Circuits already subject to a DS1 TPP 2- or 3-year or DS3 (High Capacity and Fiber Advantagesm) 3-year Payment Plan, as of November 1, 2022, will continue to be provided under the then-current DS1 TPP 2- or 3-year or DS3 (High Capacity and Fiber Advantagesm) 3-year Payment Plan term for the remainder of that term.

⁽³⁾ Effective January 17, 2024, DS1 Term Payment Plan 1-year and Fiber Advantagesm DS3 1-year Payment Plans (collectively, Term Plan Services), are no longer available, including conversions. (B) Conversion of service to a new DS1 TPP or Higher Speed Service
During a customer's DS1 TPP term, conversion may be made to a new DS1 TPP term of the same or different length or an upgrade may be made to a higher speed service, if the expiration date for the new DS1 TPP term or for the new higher service is beyond the expiration of the original DS1 TPP term. The new DS1 TPP term or higher speed service must occur between the same two termination points as the original DS1 service being converted. The new DS1 TPP term or the higher speed service term becomes effective upon completion of the conversion activity. The rates, terms, and conditions applicable for the new DS1 TPP term or higher speed service will be those in effect at the time the conversion is requested. Credit for months under the previous DS1 TPP may not be transferred to the new DS1 TPP or to the higher speed service term. When all conditions described above are met, termination liability for the remaining months on the original DS1 TPP will not apply.

(C) Moves

During a DS1 TPP term a customer may move one end of a DS1 High Capacity Service to another location in the same LATA and keep the DS1 TPP in force provided the following requirements are met:

- (1) the customer must have met the minimum in-service period at the previous location and will be subject to a new minimum in-service period at the new location; and
- (2) the Move is accommodated on a single customer order with the stipulation that the BAN (Billing Account Number), the NC (Network Channel Code), ACTL (Access Customer Terminal Location) and the ECCKT (Circuit Id) are provided and are the same as for the existing circuit being moved.

Moves to a different wire center may result in a change in the application of the rate elements associated with the service and therefore could result in a change in the monthly recurring charges.

EXAMPLE #1: One end of a DS1 is changed from Location A to Location B within the same LATA. The new Channel Mileage⁽³⁾ associated with the one-ended Move increased by 2 miles. Therefore, the resulting Channel Mileage⁽³⁾ calculation increases the monthly recurring charge accordingly.

⁽¹⁾ Effective on November 1, 2022, DS1 TPP 2- and 3-year, and DS3 (High Capacity and Fiber AdvantageSM) 3-year Payment Plans are no longer available, including for any otherwise available conversions. Circuits already subject to a DS1 TPP 2- or 3-year or DS3 (High Capacity and Fiber AdvantageSM) 3-year Payment Plan, as of November 1, 2022, will continue to be provided under the then-current DS1 TPP 2- or 3-year or DS3 (High Capacity and Fiber AdvantageSM) 3-year Payment Plan term for the remainder of that term.

⁽²⁾ Effective January 17, 2024, DS1 Term Payment Plan 1-year and Fiber AdvantageSM DS3 1-year Payment Plans (collectively, Term Plan Services), are no longer available, including conversions. Existing Term Plan Services on January 17, 2024, will continue to be provided for the remainder of the then-current terms.

7. Special Access Service (Cont'd)7.4 Rate Regulations (Cont'd)7.4.18 DS1 Term Payment Plan^{(3) (4)} (Cont'd)(C) Moves (Cont'd)

EXAMPLE #2: One end of a DS1 is changed from Location C to Location D within the same LATA. The new Channel Mileage⁽⁵⁾ associated with the one-ended Move decreased by 5 miles. Therefore, the resulting Channel Mileage⁽⁵⁾ calculation decreases the monthly recurring charge accordingly.

If no lapse in service occurs and if the requirements in (1) and (2) as stated previously are met, termination liability will not apply. Nonrecurring Channel Termination Charges or Nonrecurring Collocation Transport Charges and Access Order Charges for the physical move will apply.

(D) Expiration of DS1 TPP term options

The DS1 TPP is not available for renewal. At the expiration of the DS1 TPP term, the customer may select a new DS1 TPP term at the prevailing DS1 TPP rates. If a customer does not wish to purchase a new DS1 TPP at the expiration of the term, the customer's service will automatically convert to the current month-to-month rates.

(E) DS1 High Capacity Service Portability Commitment⁽²⁾

DS1 High Capacity Service Portability Commitment (Portability Commitment)⁽²⁾ provides a customer the ability to establish a regional volume commitment in the form of DS1 Channel Terminations and receive a waiver on DS1 TPP Termination Liability, as described in 7.4.18(G), during the life of the Portability Commitment⁽²⁾. The Portability Commitment⁽²⁾ will consist of a Commitment Level (CL), as described below, and will have a term of three years. The Portability Commitment⁽²⁾ does not otherwise affect the rates, terms, or conditions of the Customer's DS1 TPP. Only Portability Commitments⁽²⁾ established prior to August 30, 2016, may be renewed. To renew, the Customer must notify the Telephone Company, in writing, with such notice directed to both the Customer's account manager and the access service center, and specifically identify the Customer's Commitment Level (as defined herein), prior to the expiration of the Customer's existing Portability Commitment⁽²⁾ term.

For a Portability Commitment⁽²⁾ under Section 7.4.18(E) (1), Customers may purchase DS1 service under DS1 TPP terms of 2 or 3 years⁽¹⁾ and have the associated Channel Terminations count towards the Portability Commitment CL. After establishing the CL, Customer may continue to purchase DS1 service on a month-to-month arrangement or under a DS1 TPP of 1, 2 or 3 years⁽¹⁾ without portability and have the associated Channel Terminations not count toward the Customer's portability CL.

For a Portability Commitment⁽²⁾ under Section 7.4.18(E) (2), Customers may purchase DS1 service under DS1 TPP terms of 1, 2 or 3 years⁽¹⁾ or on a month-to-month basis and have the associated Channel Terminations count towards the CL.

Access Order Charges and all installation charges will be billed as applicable.

- ⁽¹⁾ Effective on September 13, 2017, DS1 TPP 5- and 7-year Payment Plans are no longer available, including for any otherwise available conversions. Circuits already subject to a DS1 TPP 5- or 7-year Payment Plan, as of September 13, 2017, will continue to be provided under the then-current DS1 TPP 5- or 7-year Payment Plan term for the remainder of that term.
- ⁽²⁾ Effective on October 30, 2020, new DS1 High Capacity Service Portability Commitments will no longer be available for new or existing customers, and existing Portability Commitments may no longer be renewed.
- ⁽³⁾ Effective on November 1, 2022, DS1 TPP 2- and 3-year, and DS3 (High Capacity and Fiber AdvantageSM) 3-year Payment Plans are no longer available, including for any otherwise available conversions. Circuits already subject to a DS1 TPP 2- or 3-year or DS3 (High Capacity and Fiber AdvantageSM) 3-year Payment Plan, as of November 1, 2022, will continue to be provided under the then-current DS1 TPP 2- or 3-year or DS3 (High Capacity and Fiber AdvantageSM) 3-year Payment Plan term for the remainder of that term.
- ⁽⁴⁾ Effective January 17, 2024, DS1 Term Payment Plan 1-year and Fiber AdvantageSM DS3 1-year Payment Plans (collectively, Term Plan Services), are no longer available, including conversions. 7.4 Rate Regulations (Cont'd)

7.4.18 DS1 Term Payment Plan^{(2) (3)} (Cont'd)

(E) DS1 High Capacity Service Portability Commitment (Cont'd)

(1) For Portability Commitments⁽¹⁾ established prior to August 30, 2016, the terms and conditions associated with the Portability Commitment⁽¹⁾ are as follows in this Section 7.4.18(E) (1):

- (a) Customer commits to a 3-Year Commitment Level (CL) that is reviewed on a monthly basis. The initial monthly CL is calculated by the Telephone Company and is the total of all DS1 Channel Terminations in-service for the month previous to the month in which the Customer notifies the Telephone Company, in writing, of the Customer's CL. The initial monthly CL will consist of all Channel Terminations including those on Month-to-Month terms and other term pricing plans. The effective date of the Portability Commitment⁽¹⁾ will be the first day of the month immediately following the month in which the Portability Commitment⁽¹⁾ is signed;
- (b) Customer must have a minimum of 40 Channel Terminations in-service each month and at least 80% of the CL under a 2 or 3 year DS1 TPP each month;
- (c) At the commencement of the Customer's Portability Commitment⁽¹⁾ and upon any renewal of a Portability Commitment⁽¹⁾, at least 80 percent of the Customer's CL must be purchased under a 2 or 3 year DS1 TPP; and
- (d) Each month, the total number of 2 and 3 year DS1 TPP Channel Terminations for the previous month will be calculated and measured against the corresponding monthly CL;
 - (i) If the total number of Channel Terminations, as calculated above, is 80% - 124% of the CL, no other charges will apply for the previous month.
 - (ii) If the total number of Channel Terminations, as calculated above, is less than 80% of the CL, charges will be assessed as follows:

Customer will be billed the difference between 80% of the CL and the actual number of in-service Channel Terminations.

EXAMPLE #1: Customer A has a CL = 1,000 Channel Terminations for the month of June. Customer A must have at least 800 DS1 Channel Terminations in-service to meet the 80% target. In July, the monthly review calculated 795 DS1 Channel Terminations in-service for the month of June. The difference between 80% of the CL (800) and the actual in-service total (795) is 5 Channel Terminations. Therefore, the customer will be billed an amount equal to 5 Channel Terminations multiplied by the lowest available Price Cap Zone 1 Channel Termination rate, as set forth in Section 7.5.9(I). For subsequent months, Customer A will continue to be billed an amount equal to the difference between 80% of the CL and the actual in-service number of Channel Terminations that are below 80% of the CL (multiplied) by the lowest available Price Cap Zone 1 Channel Termination rate, as set forth in Section 7.5.9(I), until 80% of the CL is met.

⁽¹⁾ Effective on October 30, 2020, new DS1 High Capacity Service Portability Commitments will no longer be available for new or existing customers, and existing Portability Commitments may no longer be renewed.

⁽²⁾ Effective on November 1, 2022, DS1 TPP 2- and 3-year, and DS3 (High Capacity and Fiber Advantagesm) 3-year Payment Plans are no longer available, including for any otherwise available conversions. Circuits already subject to a DS1 TPP 2- or 3-year or DS3 (High Capacity and Fiber Advantagesm) 3-year Payment Plan, as of November 1, 2022, will continue to be provided under the then-current DS1 TPP 2- or 3-year or DS3 (High Capacity and Fiber Advantagesm) 3-year Payment Plan term for the remainder of that term.

(2) (Cont'd)

- (i) If Customer elects to decrease the CL prior to expiration of the 3-Year commitment, a buy-down charge will apply. The buy-down charge is calculated as the number by which the CL is decreased multiplied by the lowest available Price Cap Zone 1 Channel Termination rate, as set forth in Section 7.5.9(I), on the date of the buy-down multiplied by the number of months remaining in the term of the Portability Commitment⁽¹⁾.

Example: Customer C has a CL equal to 1,000 Channel Terminations. In month 10 of the 36-month Portability Commitment⁽¹⁾, Customer C elects to decrease the CL by 50 Channel Terminations. The buy-down charge associated with the decrease is equal to:

(50 Channel Terminations) X (Lowest available Price Cap Zone 1 Channel Termination rate) X (26 months remaining) = Buy-down Charge

(F) Applicable One-Time Charges

(1) Access Order Charge

Access Order Charges will apply, as described in section 5.2.1(A), to all order activity. An Access Order charge will apply on any changes made to a plan (e.g., moving from a 3 year to a 7 year plan, on physical moves of DS1 High Capacity Services, and new installations) as applicable.

(2) DS1 Term Payment Plan Non-Recurring Charges

Non-recurring channel termination charge will apply per channel termination on new installations of DS1 High Capacity Service on 1 year DS1 TPP term, and on all physical moves of DS1 High Capacity Services. Non-recurring channel termination charges will be waived on new installations with 2 and 3 year DS1 TPP terms. The Nonrecurring Channel Termination Charge will also apply, applicable as stated in 7.4.18(E) previously, for customers who have a DS1 High Capacity Service Portability Commitment⁽¹⁾.

⁽¹⁾ Effective on October 30, 2020, new DS1 High Capacity Service Portability Commitments will no longer be available for new or existing customers, and existing Portability Commitments may no longer be renewed.
