ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements10.1 General

This section covers Specialized Services or Arrangements that are provided to a customer for use only by agencies or branches of the Federal Government and other users authorized by the Federal Government, and includes the Telecommunications Service Priority (TSP) System procedures administered by the Office of Emergency Communications (OEC) and the Federal Government Telecommunications Services (FGTS).*

Some of the services described in this section are provided for command and control communications, state emergency operations centers, communications for national security, emergency preparedness, and presidential requirements. They are required to assure continuity of Government in emergency and crisis situations and to provide for national security.

*Effective November 25, 2004, Federal Government Telecommunications Services for Megalink Data Service, Voice Grade 4-wire Service, High Capacity DS1 Service, and Megalink Custom Service will no longer be available to new customers. There will be no change to existing customers.

Effective: May 1, 2024

Four AT&T Plaza, Dallas, Texas 75202

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.2 Service Provisioning

Services for command and control communications and for national security and emergency preparedness sometimes require short notice and short duration service provisions. These provisions are especially needed to meet presidential requirements or in response to natural, man-made, or declared emergencies. Requirements of this type cannot be forecasted and are usually needed for a relatively short period.

(A) Provisioning Intervals(1) Emergency Conditions

The services set forth in this section will be provided on the date requested or as soon as possible thereafter when the emergency falls into one of the following categories:

- (a) State of crisis declared by the National Command Authorities (includes commitments made to the Office of Emergency Communications in the "National Plan for Emergencies and Major Disasters").
- (b) Efforts to protect endangered U.S. personnel or property both in the U.S. and abroad (includes space vehicle recovery and protection efforts).
- (c) Communications requirements resulting from hostile action, a major disaster or a major civil disturbance.
- (d) The director (Cabinet level) of a Federal department, Commander of a Unified/Specified Command, or head of a military department has certified that a communications requirement is so critical to the protection of life and property or to the National Defense that it must be processed immediately.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.2 Service Provisioning (Cont'd)(A) Provisioning Intervals (Cont'd)(1) Emergency Conditions (Cont'd)

(e) Political unrest in foreign countries which affect the national interest.

(f) Presidential service.

(2) The interval provisions in Section 5 (Ordering for Access Service) will apply when orders for services set forth in this section of the tariff are requested under conditions other than those described in (1) preceding.

(B) Facility Availability

In order to insure communications during periods of emergency, the Telephone Company will, within the limits of good management, make available the necessary facilities to restore service in the event of damage or to provide temporary emergency service.

(C) Temporary Facility Utilization

The provision of service under emergency conditions may require the availability of facilities, such as portable microwave equipment, which are provided on a temporary basis by the Telephone Company or customer.

(D) Utilization of Government Owned Facilities

In order to meet the requirements of agencies or branches of the Federal Government, the Telephone Company may utilize government-owned facilities when necessary to provide service.

(This page filed under Transmittal No. 1)

Effective: May 1, 2024

Four AT&T Plaza, Dallas, Texas 75202

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.3 Service Descriptions (Cont'd)10.3.1 Voice Grade Special Access Service

The provision of T-3 and G conditioned services contemplates station and tandem switching operations, using customer provided equipment, as well as Special Access Service. Separate metallic, telegraph or voice grade services, where required by the customer provided equipment or switching operation, are furnished in accordance with the applicable sections of this tariff.

All Voice Grade Secure Communications provide an approximate bandwidth of 10-50,000 Hertz and can be used to transmit either voice frequency signaling or supervisory tones.

(A) Voice Grade Secure Communications Type I

- Furnished on two-wire or four-wire metallic facilities for two-point secure communications between a customer premises location and an end user's premises.
- The net loss of the conditioned service (with or without additional conditioning) shall not vary by more than four dB at 1,000 Hz from the levels specified following.

T-3 Conditioning - The absolute loss (referenced to one milliwatt) with respect to frequency shall not exceed:

15 dB at 10 Hz
13 dB at 100 Hz
9 dB at 1,000 Hz
20 dB at 10,000 Hz
30 dB at 50,000 Hz.

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.3 Service Descriptions (Cont'd)10.3.1 Voice Grade Special Access Service (Cont'd)(A) Voice Grade Secure Communications Type I (Cont'd)

Additional conditioning (available in one or two directions on four-wire facilities only) - The absolute loss (referenced to one milliwatt) with respect to frequency shall not exceed:

0 dB at 1,000 Hz
+ 1 dB between 1,000 Hz and 40,000 Hz
+ 2 dB between 10 Hz and 50,000 Hz
- (+ means more loss)

(B) Voice Grade Secure Communications Type II

- Furnished on four-wire metallic facilities for duplex operation for two-point secure communications between a customer premises (which is located on an end user's premises) and an end user's premises.

- Services are conditioned as follows:

G-1 Conditioning - The absolute loss with respect to frequency and the net loss variation shall be the same as Voice Grade Secure Communications Type I services without additional conditioning.

(C) Voice Grade Secure Communications Type III

- Furnished on four-wire metallic facilities for duplex operation for two-point secure communication between a customer premises switch and an end user's premises.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.3 Service Descriptions (Cont'd)10.3.1 Voice Grade Special Access Service (Cont'd)(C) Voice Grade Secure Communications Type III (Cont'd)

- Services are conditioned as follows:

G-2 Conditioning - The absolute loss with respect to frequency and the net loss variation from the switch to an end user's premises shall be the same as Voice Grade Secure Communications Type I services without additional conditioning; from an end user's premises to the switch shall be the same as Voice Grade Secure Communications Type I services with additional conditioning.

(D) Voice Grade Secure Communications Type IV

- Furnished on four-wire metallic facilities for duplex operation for two-point secure communication between two customer premises switches.

- Services are conditioned as follows:

G-3 Conditioning - The absolute loss with respect to frequency and the net loss variation shall be the same in both directions of transmission as Voice Grade Secure Communications Type I services with additional conditioning.

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.3 Service Descriptions (Cont'd)10.3.4 Telecommunications Service Priority (TSP) System

The TSP System is a service, developed to meet the requirements of the Federal Government, which provides the regulatory, administrative, and operational framework for the priority installation and/or restoration of National Security Emergency Preparedness (NSEP) telecommunications services. The TSP System is available for both Switched and Special Access Services, but its applicability is limited to Access Services that the Telephone Company can discreetly identify for priority provisioning and restoring. The TSP System applies only to NSEP telecommunications services, and requires and authorizes priority action by the Telephone Company providing such services.

The customer for TSP System service also must be the same customer for the Access Service with which it is associated. The customer, in obtaining TSP System service, acknowledges and consents to the provision of certain customer service record information by the Telephone Company to the Office of Emergency Communications (OEC) in order for the OEC to maintain and administer its overall TSP System. This customer service record information will include only TSP System Authorization Code and Telephone Company Circuit/Service ID.

Under certain conditions it may be necessary to preempt one or more customer services with a lower or no restoration priority in order to install or restore NSEP telecommunications service of a higher priority. If such preemption is necessary, and if circumstances permit, the Telephone Company will make reasonable effort to notify the preempted service customer of the action being taken. Credit allowance for such service preemption shall be made in accordance with the provisions in 2.5.6(E) concerning Temporary Surrender of a Service.

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.3 Service Descriptions (Cont'd)10.3.4 Telecommunications Service Priority (TSP) System (Cont'd)

TSP System service shall be provided in accordance with the guidelines set forth in the following:

- Office of Emergency Communications (OEC) Manual 3-1-1
"Telecommunications Service Priority (TSP) System for National Security Emergency Preparedness (NSEP) Service User Manual"
- Office of Emergency Communications (OEC) Handbook 3-1-2
"Telecommunications Service Priority (TSP) System for National Security Emergency Preparedness (NSEP) Service Vendor Handbook".

In addition, priority installation and/or restoration of NSEP telecommunications services shall be provided in accordance with part 64.401, appendix A, of the Federal Communications Commission's (FCC's) Rules and Regulations.

Effective: May 1, 2024

Four AT&T Plaza, Dallas, Texas 75202

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.3 Service Descriptions (Cont'd)10.3.6 Government Emergency Telecommunications Service (GETS)

The Government Emergency Telecommunications Service (GETS) provides authorized federal government end users with a national security and emergency preparedness (NS/EP) switched voice and data communications service utilizing the public switched network through a special code(s) in the Telephone Company's end offices. GETS is activated at the request of the Federal Government or its authorized agent. GETS facilities may not be used for non-emergency government telecommunications, non-GETS services or by unauthorized end users.

GETS operates in conjunction with Switched Access Services provided under other provisions of this tariff. GETS charges will have a PIU of 100%. The credit allowance for service interruption for GETS is the same as for the Access Service with which it is associated as set forth in 2.5.6 (Credit allowance for Service Interruptions) and 2.5.7 (Service Assurance Warranty Schedule).

(A) Alternate Carrier Routing (ACR) Feature

GETS Alternate Carrier Routing (ACR) is an advanced network feature and is available where facilities exist in suitably equipped end offices. The GETS ACR feature provides for the routing of the GETS universal access number to a sequence of GETS carriers. GETS ACR allows NS/EP end users to use the public switched network to provide enhanced call completion capability on calls made during times of national emergencies or disasters. GETS ACR provides alternate route capability on calls originated from lines served by end offices equipped with the GETS ACR feature to the GETS universal access number. When the presubscribed carrier is a participating GETS carrier, GETS ACR enables calls first to be routed for completion to the presubscribed carrier of the originating line. When the presubscribed carrier is not a participating GETS carrier, then an office selection table (Ranking Table) determines the GETS carrier. The Ranking Table contains three alternatives for a GETS carrier and is preselected on a per end office basis using data provided by the Federal Government or its authorized agent.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.3 Service Descriptions (Cont'd)10.3.6 Government Emergency Telecommunications Service (GETS)
(Cont'd)(B) Calling Party Number (CPN) Overlay Feature

Where technically feasible and facilities permit, the GETS Calling Party Number (CPN) Overlay feature is included with GETS ACR in suitably equipped GETS ACR end offices. The Federal Government or its authorized agent will determine the unique GETS CPN. The GETS CPN Overlay feature allows the network CPN information to be changed from the value of the actual calling party to a unique GETS number for all GETS ACR calls. The unique GETS CPN, not the actual calling party, is passed to the participating GETS carrier.

(C) Reports

There are two monthly reports available with GETS: Call Data Report and Service Control Point (SCP) Data Report.

(1) Call Data Report

The Call Data Report provides call detail associated with GETS ACR usage. The Call Data Report is populated using data from recordings of GETS calls.

(2) Service Control Point (SCP) Data Report

The SCP Data Report tabulates a count of the GETS carrier selection order list sent to the GETS ACR end offices for GETS calls that were processed. This report provides an aggregated total of each of the call categories by end office.

(D) High Probability of Connection (HPC) Feature

GETS HPC distinguishes the priority assigned to the call setup message in the Signaling System 7 (SS7) network. Setup messages associated with calls to 1-710-NCS-GETS would be sent with the highest priority. GETS HPC provides a trunk queuing feature in equipped switches which is invoked any time an Interexchange Carrier (IC) trunk group is busy. The queuing would only be applied to GETS calls and allows GETS users to dial an emergency call one time without having to redial. The call will automatically complete when the first available trunk becomes idle.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.3 Service Descriptions (Cont'd)10.3.6 Government Emergency Telecommunications Service (GETS)
(Cont'd)(D) High Probability of Connection (HPC) Feature (Cont'd)(1) GETS HPC Service Features(a) GETS Call Recognition

This feature provides the capability to recognize originating GETS calls from an administratable screen on the called number. The screen will be set on 710 on all switches and on four 800/888 numbers which provide access to GETS on specified switches only. A call recognized as a GETS call is said to be an HPC marked call.

(b) Trunk Group Queuing (TQ)

The feature provides the capability to queue HPC marked calls to specific trunk groups within the routing chain. Only HPC marked calls are allowed to queue.

(c) Exemption From Network Management Controls (EX-NMCs)

This feature provides HPC marked calls exemption from restrictive Network Management Controls.

(2) Reports

Operational Measurement (OM) Report

The Operational Measurement (OM) report provides periodic implementation status updates and ongoing service verification. The data format is in the form of a series of time stamped OM registers for each of the HPC equipped switches.

(E) GETS Egress Queuing (EQ)

GETS EQ is a switch-based feature that provides priority call processing to calls designated as HPC that are terminating on a designated PBX trunk group. GETS EQ extends the functionality of the existing GETS HPC feature to include two way and Primary Rate ISDN which connects a DMS to a PBX.

This feature is available on DMS100 switches with release NA012.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.3 Service Descriptions (Cont'd)10.3.6 Government Emergency Telecommunications Service (GETS) (Cont'd)(F) GETS Office Wide Queuing (OWQ)

GETS OWQ is a switch-based feature that provides priority call processing to calls designated as HPC. GETS OWQ enhances the queuing of HPC calls on supported public trunk group types. GETS OWQ extends the functionality of the existing GETS HPC feature on an office wide basis. GETS OWQ will be activated only in the Central Offices with the required generic to support the OWQ feature.

This feature is available on switches with release (i.e., software) NA015, 5E15, and 19.

10.3.7 SBC Federal Access Solutions Transport (FAST) Program (Cont'd)(A) General Description

This section contains regulations, rates and charges applicable to the provision of SBC FAST Program to any customer awarded a contract to provide telecommunications services for the exclusive use of the Federal Government, Agencies of the Federal Government, or authorized agents of the Federal Governments. The SBC FAST Program will allow each of the Federal Government's authorized contractors providing network services under contract to obtain discounted rates for specified services in return for certain term commitments for dedicated Special Access connections to government locations.

(B) Services Available Under SBC FAST Program

SBC FAST Program is provided as a monthly service arrangements with a 3 year service period for the following Services listed below:

Service	General/Basic Description
High Capacity Service	7.3.10(A)
(1)	
(1)	
MegaLink Custom Service	20.1
(1)	

⁽¹⁾ Material in this Section has been de-tariffed as required by the Commission upon use of the forbearance relief pursuant to FCC Memorandum Opinion and Order No. 07-180, released October 12, 2007. Terms and Conditions associated with de-tariffed services are available at www.att.com/guidebook.

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.3 Service Descriptions (Cont'd)10.3.7 SBC Federal Access Solutions Transport (FAST) Program
(Cont'd)(C) Limitations

- (1) For Services ordered under SBC FAST Program,
The following charges will be waived:

- (a) DS1 Channel Termination Nonrecurring Charge
- (b) DS3 Channel Termination Nonrecurring Charge
- (c) DS3 and DS1 Multiplexing Installation Charge

However, the nonrecurring charges will apply pursuant to the DS1 or DS3 moves, Section 10.3.7.(D) (5) following.

- (2) All other nonrecurring Charges will apply including the Access Order Charge.
- (3) When a rate element is ordered under the SBC FAST Program, that rate element may not be used for non-SBC FAST Program services. Rate elements not included in this plan as specified in rate Section 10.5.8 are not available under SBC FAST Program and must be purchased from the appropriate tariff section.
- (4) Lower speed non-SBC FAST services may occupy a channel of a SBC FAST Program DS1 service as long as the lower speed service is being provided to a SBC FAST Program eligible customer.
- (5) During the term of the selected SBC FAST Program, Telephone Company initiated recurring charges (increases or decreases) will automatically be applied to the monthly charges for the remaining months of the current SBC FAST Program term.
- (6) The monthly recurring rate during the SBC FAST Program term will never exceed the rate in effect at the beginning of the customers SBC FAST Program term.
- (7) The SBC FAST Program cannot be combined with any other tariffed services, discounts, or pricing flexibility contracts, unless explicitly stated in the respective tariff terms and conditions.
- (8) Services receiving term discounts under this plan are excluded from any application of Shared Use provisions in Section 7.2.10 preceding.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.3 Service Descriptions (Cont'd)10.3.7 SBC Federal Access Solutions Transport (FAST)
Program (Cont'd)(D) Terms and Conditions(1) Conversions of FGTS to a new SBC FAST Program

Conversions from FGTS to a new 3-year SBC FAST Program term may be made if the expiration date for the new 3-year SBC FAST Program term is beyond the expiration of the original FGTS being converted and will become effective upon completion of the conversion activity. The rates, terms, and conditions applicable for the new 3-year SBC FAST Program term will be those in effect at the time the conversion is completed. Access Order Charges will apply for conversions of existing FGTS to a new 3-year SBC FAST Program term.

(2) Conversions of existing SBC FAST Program services to a different SBC FAST Program term

At any time prior to the expiration of the SBC FAST Program term, if the SBC FAST Program has not been grandfathered, a conversion may be made to a new 3-year SBC FAST Program term. The SBC FAST Program term must occur between the same two termination points as the original service being converted and will become effective upon completion of the conversion activity. The rates, terms, and conditions applicable for the new 3-year SBC FAST Program term will be those in effect at the time the conversion is completed. Access Order Charges will apply for the conversion of an existing SBC FAST Program term to a new 3-year SBC FAST Program.

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.3 Service Descriptions (Cont'd)10.3.7 SBC Federal Access Solutions Transport (FAST) Program (Cont'd)(D) Terms and Conditions (Cont'd)(3) Upgrading an existing SBC FAST Program to a Higher Speed Service

At any time during the SBC FAST Program term, service may be upgraded to a higher speed service. The new higher speed service must occur between the same two termination points as the original service being upgraded. The new higher speed service must be on a new term contract that has an expiration date beyond the expiration date of the SBC FAST Program term being terminated. The rates, terms, and conditions applicable for the new contract term of the higher speed service will be those in effect at the time the conversion is completed. Nonrecurring installation and ordering charges associated with the higher speed service are applicable.

(4) Conversions from existing Month-to-Month Upgrades

Customers may convert from existing month-to-month service to a new 3-year SBC FAST Program term. If there are no physical changes to service, the Access Order Charge will apply. If physical changes occur, the activity would be classified as a termination of the month-to-month service and installation of a new 3-year SBC FAST Program term. Customer will be responsible for all nonrecurring installation and ordering charges associated with the new SBC FAST Program term.

During a SBC FAST Program term a customer may move one end of a DS1 or DS3 SBC FAST Program Service to another location in the same LATA and keep the DS1 or DS3 SBC FAST Program in force provided the following requirements are met:

- (a) The minimum in-service period at the previous location must have been met. The new location will be subject to a new minimum in-service period;
- (b) The move is accommodated on a single customer order with the stipulation that the Billing Account Number (BAN), the Network Channel Code (NC), Access Customer Terminal Location (ACTL) and the Circuit Id (ECCKT) are provided and are the same as for the existing circuit being moved. Moves to a different wire center may result in change in the application of the rate elements associated with the service and therefore could result in a change in the monthly recurring charges.

If no lapse in service occurs and if the requirements in (a) and (b) as stated previously are met, termination liability will not apply. Nonrecurring Charges and Access Order Charges for the physical move will apply per the following appropriate Installation Charge Tariff Sections at 3 year term plan rates:

- DS1 Section 7.3.10(F) (5), or Section 39.5.2.7(5)
- DS3 Section 20.5.5 and 20.5.7 or Section 39.5.2.12(E) and 39.5.2.12(G)

(This page filed under Transmittal No. 1)

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.3 Service Descriptions (Cont'd)10.3.7 SBC Federal Access Solutions Transport (FAST) Program
(Cont'd)(E) Termination Liability

When an SBC FAST customer's disconnection is governed by the Federal Acquisition Regulations, then the termination provisions found in the Federal Acquisition Regulations apply.

When SBC FAST customer's disconnection is not governed by the termination provisions of the Federal Acquisition Regulations, a termination charge will be calculated as follows:

(Monthly Recurring SBC FAST rate) X (number of net terminated SBC FAST circuits subject to Termination Charges) X (months remaining in SBC FAST term) X (50.00%).

Example: An agent of the Federal Government disconnects one SBC FAST DS1 in month 30 of the 36 month term. The monthly recurring charge for the DS1 is \$300.00. The reason for the disconnection is the Agent is going to use another company's facilities to provide the Federal Government with service. Termination liability charges will be calculated as follows:

$$\$300.00 \times 1 \times 6 \text{ mos.} \times .50 = \$900.00$$

(F) Expiration of SBC FAST Program

The SBC FAST Program term is not available for renewal. At the expiration of the SBC FAST Program term, the customer may select a new SBC FAST Program term at the prevailing SBC FAST Program rates. If the customer does not wish to purchase a new SBC FAST Program term at the expiration of the term, the customer's service will automatically convert to the current month-to-month or monthly extension rates found in the appropriate tariff section.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.4 Rate Regulations

This section contains information related to the rate elements applicable to Federal Government Specialized Services or Arrangements. Rates and charges associated with these rate elements are listed in 10.5. The rates and charges for certain of these services shall be developed on an ICB basis and shall be consistent with the rates and charges for services offered in other sections of this tariff. Additional rates and charges may be applicable for other services which operate in conjunction with Special Routing Access Service, Telecommunications Service Priority (TSP) System and Government Emergency Telecommunications Service (GETS).

(A) Federal Government Regulations

In accordance with Federal Government Regulations, all service provided to the Federal Government will be billed in arrears. However, this provision does not apply to other customers that obtain services under the provisions of this tariff to provide their services to the Federal Government.

(B) Mileage Application

Mileage, when used for rate application between two serving wire centers or between an end office switch and the customer's serving wire center, shall be determined by the V and H Coordinates Method as set forth in National Exchange Carrier Association, Inc. Tariff F.C.C. No. 4 and administered as set forth in 6.8.5 (Determining Switched Transport Mileage and Charges), 7.2.6 (Mileage Measurement) or 20.4.7 (Determining Interoffice Mileage).

(C) Moves

The provisions set forth in 6.8.10 (Moves), 7.2.7 (Moves) and 20.4.12 (Moves) apply to moves involving services provided in this Section.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.4 Rate Regulations (Cont'd)(D) Cancellation

A customer may cancel an order for Special Federal Government Access Service at any time prior to notification by the Telephone Company that service is available for the customer's use.

The regulations and charges set forth in 5.3.2 (Access Order Modification Charges) apply for the cancellation of Special Federal Government Access Services.

(E) Special Routing Access Service

The Telephone Company will record Special Routing Access Service Active Mode usage, and will bill the customer in accordance with these records. In addition, a Special Routing Access Service Trunk Usage charge will apply for each hour the service is in the active mode. The hours for each trunk ordered will be summed and then rounded to the nearest hour, except that when the total is less than one hour, one hour will be used to determine the charge.

(F) Telecommunications Service Priority (TSP) System(1) Rate Elements(a) Priority Installation (Provisioning):

The act of supplying telecommunications service to a customer, including all associated transmission, wiring, and equipment, if provided by the Telephone Company, at an earlier time than standard order intervals would allow.

(This page filed under Transmittal No. 1)

Issued: April 16, 2024

Effective: May 1, 2024

Four AT&T Plaza, Dallas, Texas 75202

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.4 Rate Regulations (Cont'd)(F) Telecommunications Service Priority (TSP) System (Cont'd)(1) Rate Elements (Cont'd)(b) Priority Restoration Level Implementation
(Assignment):

The act of designating the priority level for the restoration of a particular NSEP telecommunications service.

(c) Priority Restoration Level Change:

The act of changing the priority level assignment for a NSEP telecommunications service. This includes any extension of an existing priority level assignment to an expanded NSEP service.

(d) Priority Restoration Administration and Maintenance:

The act of administering and maintaining the TSP System in such a manner that it corresponds to the OEC data base.

(2) Rate Application

The Priority Installation (PI) charge and the Priority Restoration (either Level Implementation or Level Change) (PR) charge are applied per circuit for Special Access Service and per line or trunk for Switched Access Service. PI and PR apply only one time per circuit or line except when there is subsequent order activity to add legs or lines to the service. One PI or PR will apply each time leg(s) or line(s) are added to an existing TSP System. When an Access Service is ordered with both PI and PR, the nonrecurring charge for PR Implementation applies.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.4 Rate Regulations (Cont'd)(F) Telecommunications Service Priority (TSP) System (Cont'd)(2) Rate Application (Cont'd)

The Priority Restoration Level Change charge applies when the only TSP System order activity is that of changing priority levels. It applies each time the level is changed to a higher or a lower level.

The Administration and Maintenance charge applies per line or trunk for Switched Access Service and per circuit for Special Access Service. Each leg of a Special Access multipoint service will be treated as a separate circuit and the charge will apply on a per leg basis.

No TSP System charges apply to subsequent order activity that does not affect the TSP System assignment. When the TSP System is revoked, or discontinued, and the associated Access Service is continued in service, no charge applies for such a discontinuance.

(3) Quotation of Rates

When performing Priority Restoration (either Level Implementation or Level Change) and/or Priority Installation of an Access Service, the Telephone Company will attempt to notify the customer regarding certain Access Services where additional labor charges apply, as set forth in 13.4 (Rates and Charges), before the required additional labor is undertaken. The customer, in obtaining a Priority Restoration, recognizes that quoting charges and obtaining permission to proceed with the restoration of certain Access Services may cause unnecessary delays and, as a result, would be contrary to the aforementioned regulations.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.4 Rate Regulations (Cont'd)(F) Telecommunications Service Priority (TSP) System (Cont'd)(3) Quotation of Rates (Cont'd)

In subscribing to TSP System service the customer recognizes this condition, grants the Telephone Company the right to quote charges after the restoration or installation is completed, and agrees to pay the charges.

(4) Credit Allowance

The credit allowance for service interruption for the TSP System is the same as for the Access Service with which it is associated as set forth in 2.5.6 (Credit Allowance for Service Interruptions).

(5) Access Order Charges

Access Order Charges as set forth in 5.3.1 (Access Order Charges) apply to the TSP System.

(6) Expedited Priority Installaion (Emergency or Essential)

Regulations, rates and charges are the same as those set forth in 5.3.2(C) (Expedited Order Charge) for the Switched or Special Access Service for which Priority Installation is required.

(7) Utilizing Specially Constructed Facilities for Priority Installation

Regulations, rates and charges are the same as those set forth in this Company's Tariff F.C.C. No. 69 for Special Construction of the facilities for Switched or Special Access Service for which Priority Installation is required.

(This page filed under Transmittal No. 1)

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.4 Rate Regulations (Cont'd)(G) Federal Government Telecommunications Services (FGTS)*(1) General

This section contains regulations, rates and charges applicable to the provision of FGTS to those Interexchange Carriers who have won the right to provide telecommunications service to the General Services Administration (GSA) and other Government agencies, including the agencies themselves as end users, for the sole use of the GSA and other such agencies. This section of the tariff does not apply to agencies that have not been awarded the special government contract.

Except as specifically noted below, all rules and regulations applicable to the rate elements provided under a monthly service arrangement (as set forth in Sections 7, 19, and 20 of this tariff) apply to those rate elements provided under FGTS. Rate elements not listed in 10.5.5 (Federal Government Telecommunications Service (FGTS)) are not available under FGTS and must be purchased as set forth in Sections 7, 19, and 20 of this tariff. Exceptions and/or additions to these rules and regulations as set forth in this section supersede those in other sections of this tariff.

If the Telephone Company initiates rate changes resulting in a decrease of rates for existing service with a 1 or 3 year service period, those rate changes will be passed along to the customer. Rate changes resulting in an increase of rates for an existing service with a 1 or 3 year service period will not exceed the original rate for that selected service period. Rate changes may occur as a result of F.C.C. action.

(2) Ordering

FGTS is provided as a monthly service arrangement with a 1 year or 3 year service period (Initial Service Period) for MegaLink Data Service or a 3 year service period (Initial Service Period) for Voice Grade 4 wire Service, High Capacity Service, MegaLink Custom Service, Self-Healing Transport Service and ReliaNetsm Service.

For services ordered under FGTS, only the Channel Termination nonrecurring charges will be waived. All other nonrecurring charges will apply including the Access Order Charge as set forth in Section 5.3.1 (Access Order Charges).

*Effective November 25, 2004, Federal Government Telecommunications Services for Megalink Data Service, Voice Grade 4-wire Service, High Capacity DS1 Service, and Megalink Custom Service will no longer be available to new customers. There will be no change to existing customers.

(This page filed under Transmittal No. 1)

Issued: April 16, 2024

Effective: May 1, 2024

Four AT&T Plaza, Dallas, Texas 75202

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.4 Rate Regulations (Cont'd)(G) Federal Government Telecommunications Services
(FGTS) (Cont'd)*(2) Ordering (Cont'd)

When a rate element is ordered under FGTS, that rate element may not be used for non-FGTS services. No portion of a multiplexed rate element (High Capacity - DS1, MegaLink Custom - DS3, STN or ReliaNetSM) may be under FGTS unless the entire rate element is available under FGTS.

(3) Renewal of Service

The customer must provide the Telephone Company with a written notice of intent to renew or extend FGTS no later than 90 days prior to the expiration of the service period.

The customer may elect to renew the FGTS three year service periods only at the FGTS three year rate in effect at the time of renewal.

If the customer elects not to renew FGTS or does not notify the Telephone Company of its intent to renew FGTS, the customer's FGTS rate elements will revert to the monthly rates in effect, as set forth in Sections 7, 19 and 20, at the time the FGTS expires.

(4) Termination Charges

In the event service is terminated prior to the expiration of the Initial Service Period, termination charges will apply with the following exception. No termination charges will apply in the first year of the 3 year service period only, due to conditions in the government FGTS contract. After the first year, termination charges will apply as set forth following.

FGTS services are not subject to a termination liability charge for any services disconnected at the request of the Federal Government during the life of the contract. In the event service is terminated by an Interexchange Carrier termination charges will apply. The regulations and charges set forth in 5.3.2 (Access Order Modification Charges) apply for the cancellation of services provided under FGTS.

*Effective November 25, 2004, Federal Government Telecommunications Services for Megalink Data Service, Voice Grade 4-wire Service, High Capacity DS1 Service, and Megalink Custom Service will no longer be available to new customers. There will be no change to existing customers.

ACCESS SERVICE

10. Federal Government Specialized Services or Arrangements (Cont'd)10.4 Rate Regulations (Cont'd)(I) Federal Government Telecommunications Service
(FGTS) (Cont'd) *(4) Termination Charges (Cont'd)

If Special Construction applied for the service being terminated, any associated termination charges, as referenced in 5.2.6 (C) (Special Construction), may apply.

(a) Initial Service Period

The termination charge for the Initial Service Period is calculated as follows:

Billed		Months remaining	
Termination			
Monthly Rate	X	in service period	X
percentage.			

Years in Service Period		Termination
Percentage		

1	50%
3	40%

Example: A customer with a \$2,000 monthly rate terminates service with 5 months remaining in a 3 year service period. The termination charge would be calculated as follows:

$$\$2,000 \times 5 \times .40 = \$4,000$$

The termination charge would be \$4,000.

*Effective November 25, 2004, Federal Government Telecommunications Services for Megalink Data Service, Voice Grade 4-wire Service, High Capacity DS1 Service, and Megalink Custom Service will no longer be available to new customers. There will be no change to existing customers.
