ACCESS SERVICE

2. General Regulations (Cont'd)

2.5 Billing Regulations (Cont'd)

2.5.6 Credit Allowance for Service Interruptions (Cont'd)

(B) When a Credit Allowance Applies (Cont'd)

In case of an interruption to any service that is not due to the negligence of the customer, allowance for the period of interruption shall be as follows:

(1) Common Channel Signaling/Signaling System 7 (CCS/SS7) Interconnection Service (D)

No credit shall be allowed for an interruption period of less than 30 minutes. The customer shall be credited for an interruption of 30 minutes or more at the rate of 1/1440 of the monthly charges for the facility or service for each period of 30 minutes or fraction thereof that the interruption continues after the initial 30 minute interruption.

For CCS/SS7 Interconnection Service, the monthly charge shall be the total of all monthly rate element charges associated with the service (i.e., STP Access Mileage, STP Access Connection and STP Port Termination).

(D)

(This page filed under Transmittal No. 3400)

ACCESS SERVICE

2. General Regulations (Cont'd)2.7 Definitions (Cont'd)Virtual Tributary (VT)

Denotes a Synchronous Optical Network (SONET) structure designed for the transport of sub-EC-1 signals which are less than 51.84 Mbps bandwidth. A (DS1) 1.544 Mbps signal is mapped into the SONET format using a VT 1.5 (1.728 Mbps) as a packaging mechanism that is internal to the SONET signal.

Voice Grade Channel

Denotes a channel for the transmission of analog signals within an approximate bandwidth of 300 to 3000 Hz.

WATS Access Line (WAL)

Denotes a dedicated connection between a customer designated premises and the WATS serving office.

WATS Serving Office

Denotes a telephone company designated End Office where switching, screening and/or recording functions are performed in connection with the closed-end of WATS Access Line Services.

Wide Area Network Physical Transport (WAN-PHY)

An Ethernet standard for wide area network transport at the physical layer, with a maximum bit rate of 9.953 Gbps.

(D)

Wire Center

Denotes a building in which one or more central offices, used for the provision of Telephone Exchange Services, are located.

(D)

(This page filed under Transmittal No. 3400)

ACCESS SERVICE

5. Ordering for Access Service (Cont'd)5.3 Rate Regulations (Cont'd)5.3.2 Access Order Modification Charges (Cont'd)(B) Service Date Change Charge/Dispatch Charge (Cont'd)

(4) (Cont'd)

A Service Date Change Charge is applicable on a per order per occurrence basis for each service date changed. A Service Date Change Dispatch Charge will apply per occurrence when a technician is dispatched to the Customer's premises and the Customer is not ready for service. Service Date Change Charges and Service Date Change Dispatch Charges are specified in Section 5.4 (Rates and Charges).

Credit for Missed Installation on Confirmed Due Date, as described in Section 2.5.5 (Missed Installation on Confirmed Due Date), does not apply to Service Date Change Charge.

(C) Expedite Charges

Analog (Metallic, Telegraph), DS0 (Megalink Data (2.4, 4.8, 9.6, 19.2, 56, 64 Kbps)), Entrance Facilities (Voice Grade, DS1, DS3), High Capacity DS1 (Megalink Data (128, 256, 384, 512, 768 Kbps)) Access Services and MegaLink Custom Services (D)

If a Customer desires that service be provided on a due date earlier than the standard interval, the Customer may request that service be provided on an expedited service interval. To qualify for an expedited interval the Customer must provide End User premises access, where needed, until 11PM (CT), Monday-Friday.

When the Customer requests a 0-2 day expedite interval, on DS3, Analog (Metallic, Telegraph, Direct Analog), DS0 (Base Rate), DS1 128, 256, 384, 512, 768 Kbps, Entrance Facilities (Voice Grade, DS1, DS3) and DS1/DS3 Access Service, the request must be received by the Telephone Company by 8:30AM (CT), Monday-Friday. All 0-2 day expedite interval requests received after 8:30AM (CT) will reflect an application date of the next business day and the due date will also be changed to the next business day. Expedite charges will be determined by the interval between the application date and the expedite due date. APP day 0 does not begin until SBC verifies facilities or determines facilities are not in place. (D)

If, upon reviewing availability of equipment, facilities and scheduled workload, the Telephone Company agrees to provide service on an expedited basis and the Customer accepts this proposal, an Expedite Order Charge (in case of Analog, DS0, Voice Grade/DS1 Entrance Facilities and High Capacity DS1 Access Services) or Expedite Circuit Charge (in case of DS3 Entrance Facilities and MegaLink Custom Services) will apply.

(This page filed under Transmittal No. 3400)

ACCESS SERVICE

5. Ordering for Access Service (Cont'd)5.3 Rate Regulations (Cont'd)5.3.2 Access Order Modification Charges (Cont'd)(C) Expedite Charges (Cont'd)

- (1) Analog (Metallic, Telegraph), DS0 (Megalink Data (2.4, 4.8, 9.6, 19.2, 56, 64 Kbps)), Entrance Facilities (Voice Grade, DS1, DS3), High Capacity DS1 (Megalink Data (128, 256, 384, 512, 768 Kbps)) Access Services, and MegaLink Custom Services ⁽¹⁾ (Cont'd) (D)

The maximum number of circuits, which may be expedited, is limited to twelve (12) two-point or six (6) multi-point Analog/DS0 circuits at the same location; a limit of nine (9) DS1 circuits at the same location; a limit of four (4) DS1 (Megalink Data (128, 256, 384, 512, 768 Kbps)) circuits at the same location; and a limit of two (2) DS3 circuit at the same location. ⁽¹⁾ When the number of access circuits exceeds the maximum threshold the interval will be negotiated.

If the Telephone Company determines that service can be provided on an expedited basis, the following charges will apply based upon agreed upon expedited service interval. The Expedited Order Charge (in case of Analog, DS0, Voice Grade/DS1 Entrance Facilities and High Capacity DS1 Access Services) applies on a per order basis, regardless of the number of circuits on the order. The Expedited Circuit Charge (in case of DS3 Entrance Facilities, and MegaLink Custom Services ⁽¹⁾) applies on a per circuit basis.

(1)

(1)

- (a) In addition to Expedited Order Charges or Expedite Circuit Charges, special construction charges may apply, if the Telephone Company determines that additional cost will be incurred.
- (b) When the request for expediting occurs subsequent to the issuance of the Access Order, a Service Date Change Charge as specified in (B), preceding, also applies.

⁽¹⁾ Material in this Section has been de-tariffed as required by the Commission upon use of the forbearance relief pursuant to FCC Memorandum Opinion and Order No. 07-180, released October 12, 2007. Terms and Conditions associated with de-tariffed services are available at www.att.com/guidebook.

(This page filed under Transmittal No. 3400)

ACCESS SERVICE

5. Ordering for Access Service (Cont'd)5.3 Rate Regulations (Cont'd)5.3.2 Access Order Modification Charges (Cont'd)(C) Expedite Charges (Cont'd)

- (1) Analog (Metallic, Telegraph), DS0 (Megalink Data (2.4, 4.8, 9.6, 19.2, 56, 64 Kbps)), Entrance Facilities (Voice Grade, DS1, DS3), High Capacity DS1 (Megalink Data (128, 256, 384, 512, 768 Kbps)) Access Services, and MegaLink Custom Services⁽¹⁾ (Cont'd) (D)

(c) If the Telephone Company is subsequently unable to meet an agreed upon expedited service date, no Expedite Order Charge or Expedite Circuit Charge will apply, unless the missed service date was caused by the customer.

(d) The Telephone Company will adhere to the expedite intervals as specified above, except during circumstances beyond its direct control (i.e., acts of God, governmental requirements, work stoppages and civil commotions).

- (2) For all Access Services, excluding Analog (Metallic, Telegraph), DS0 (Megalink Data (2.4, 4.8, 9.6, 19.2, 56, 64 Kbps), DovLink), Entrance Facilities (Voice Grade, DS1, DS3), High Capacity DS1 (Megalink Data (128, 256, 384, 512, 768 Kbps)) Access Services and MegaLink Custom Services⁽¹⁾ (D)

If the customer desires that service be provided on an earlier date than that which has been established for the access order or the provision of the Access Service, the customer may request that service be provided on an expedited basis. If the Telephone Company determines that service can be provided on the requested date and that additional labor costs or extraordinary costs are required to meet the requested service date, the customer will be notified and will be provided with an estimate of the additional charges involved. The total charge to the customer for the Additional Engineering may not exceed the estimated amount by more than 10%. If the customer instructs the Telephone Company to proceed, such additional charges will be determined and billed to the customer as follows:

To calculate the additional labor charges, the Telephone Company will, upon authorization from the customer to incur the additional labor charges, keep track of the additional labor hours used to meet the request of the customer and will bill the customer at the applicable additional labor charges as set forth in 13.4.

⁽¹⁾ Material in this Section has been de-tariffed as required by the Commission upon use of the forbearance relief pursuant to FCC Memorandum Opinion and Order No. 07-180, released October 12, 2007. Terms and Conditions associated with de-tariffed services are available at www.att.com/guidebook.

ACCESS SERVICE

5. Ordering for Access Service (Cont'd)5.3 Rate Regulations (Cont'd)5.3.2 Access Order Modification Charges (Cont'd)(C) Expedite Charges (Cont'd)

(2) For all Access Services, excluding Analog (Metallic, Telegraph), DS0 (Megalink Data), Entrance Facilities (Voice Grade, DS1, DS3), High Capacity DS1 Access Services and MegaLink Custom Services ⁽²⁾ (Cont'd) (D)

(a) Extraordinary Costs: The special construction terms and conditions specified in Southwestern Bell Tariff F.C.C. No. 69 will be used by the Telephone Company to determine charges to recover the extraordinary costs which may be involved. Authorization to incur the costs and to bill the customer will be in accordance with the terms and conditions of Southwestern Bell Tariff F.C.C. No. 69.

(b) When the request for expediting occurs subsequent to the issuance of the access order, a Service Date Change Charge as specified in (B) preceding also applies.

(c) If the Telephone Company is subsequently unable to meet an agreed upon expedited service date, no Expedite Order Charge or Expedite Circuit Charge will apply, unless the missed service date was caused by the customer.

(d) The Telephone Company will adhere to customer requested expedites approved by the Telephone Company, except during circumstances beyond its direct control (i.e., acts of God, governmental requirements, work stoppages and civil commotions).

(D) Partial Cancellation Charge

Any decrease in the number of the following Access Services or Arrangements ordered will be treated as a partial cancellation and the charges described in 5.3.3, will apply.

- CCS/SS7 STP port terminations
- LIDB OPCs
- MicroLink II Service access terminations⁽¹⁾
- Switched Access Service lines, trunks, DNAL channels, Switched Transport channels or Directory Transport channels

⁽¹⁾ As of October 6, 2004, MicroLink II service utilizing the X.75 protocol is obsolete and limited to existing installations, at existing locations, for existing customers.

⁽²⁾ Material in this Section has been de-tariffed as required by the Commission upon use of the forbearance relief pursuant to FCC Memorandum Opinion and Order No. 07-180, released October 12, 2007. Terms and Conditions associated with de-tariffed services are available at www.att.com/guidebook.

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.5 Switched Transport (Cont'd)

6.5.2 Switched Transport Connections (Cont'd)

(C) DS3

DS3 provides 28 DS1s or 672 channels and provides for transmission of nominal 44.736 Mbps isochronous serial data.

With DS3, customers may request either an electrical interface or an optical interface installed at their customer premises. For DS3 connections utilizing an electrical interface, the customer will receive an electrical signal with a transmission speed of 44.736 Mbps per channel. For DS3 connections utilizing an optical interface, the customer will receive an optical signal at the transmission speed associated with the equivalent number of DS3s requested on the Access Order.

Technical Specifications for DS3 can be found in the following Technical Reference Publications:

TP 76625
TR-INS-000342

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.8 Rate Regulations (Cont'd)6.8.3 Monthly Recurring and Usage Rates (Cont'd)(E) Switched Transport(1) Entrance Facility

A monthly rate applies to each Entrance Facility on a per channel basis (for Voice Grade) or on a per connection type basis (for DS1 and DS3). An Entrance Facility applies even when the customer's premises and the serving wire center are located in the same building. (D)

(2) Direct-Trunked Transport

(a) Except as set forth in (b) following, for each Direct-Trunked Transport facility provided, the following rates apply:

- a fixed monthly rate
- a monthly rate per mile

(This page filed under Transmittal No. 3400)

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.8 Rate Regulations (Cont'd)6.8.3 Monthly Recurring and Usage Rates (Cont'd)(E) Switched Transport (Cont'd)(2) Direct-Trunked Transport (Cont'd)

(a) (Cont'd)

on a per channel basis (per Voice Grade) or on a per connection type basis (for DS1 and DS3). (D)
Mileage measurement is described in Section 6.8.5 (T) (Determining Switched Transport Mileage).

(b) When the customer orders a Direct-Trunked Transport facility for trunk side Switched Access services between the serving wire center and a host office, Common Transport will apply between the host office and each Remote Switching System or Remote Switching Module served by the host.

When the customer orders terminating line side Switched Access services, Direct-Trunked Transport will apply between the serving wire center and the end office providing the dial tone service. Common Transport will apply between the end office providing the dial tone service and the end office where the call is terminated.

(c) On tandem routed services the Direct-Trunked Transport rates apply to the interoffice links between the serving wire center and the access tandem.

(d) Mileage measurement is described in Section 6.8.5 (T) (Determining Switched Transport Mileage and Charges).

Rates contained in this transmittal are subject to subsequent adjustment, effective retrospectively back to the transmittal's original effective date, in the event the Commission or a court subsequently authorizes SWBT to correct its rates to allow it to calculate its price cap formulas to exclude USF contributions from the operation of the X-factor, or in the event of any other adjustment pursuant to an order of the Commission or a court.

(This page filed under Transmittal No. 3400)

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.1 Service Provisioning (Cont'd)

7.1.2 Types of Channels

For the purpose of ordering, there are ten categories (channel types) of Special Access Service. These are as follows:

Metallic
Telegraph Grade
Voice Grade
Program Audio
Video

(D)
(D)

MegaLink Data
High Capacity

Detailed descriptions of each of the channel types are provided in Section 7.3.

(T)

(This page filed under Transmittal No. 3400)

ACCESS SERVICE

7. Special Access Service (Cont'd)7.1 Service Provisioning (Cont'd)7.1.3 Hubs (Cont'd)(A) General (Cont'd)

Cascading multiplexing occurs when a High Capacity (D) digital channel is de-multiplexed to provide channels with a lesser capacity and one of the lesser capacity channels is further de-multiplexed. For example, a Supergroup facility is de-multiplexed to five Group facilities and then one of the Group facilities is further de-multiplexed to individual Voice Grade channels.

- The Network Reconfiguration Service and Transport Resource Management Service offerings allow the customer to reconfigure their Special Access Services.

(B) Types of Hubs

There are two types of bridging hubs and three types of multiplexing hubs. Bridging hubs are either intermediate or terminus. Multiplexing hubs are intermediate, super intermediate or terminus. The definitions for these hubs are as follows:

(1) Intermediate Bridging Hub

An intermediate bridging hub provides for the connection of three or more customer designated premises to form a Special Access multipoint service serving itself and a specified number of subtending wire centers.

Single office(s), subtending from different intermediate bridging hubs, that are to be bridged with multiple offices subtending from a common intermediate bridge will be bridged with the multiple offices at the common bridging hub.

(This page filed under Transmittal No. 3400)

ACCESS SERVICE

7. Special Access Service (Cont'd)7.1 Service Provisioning (Cont'd)7.1.4 Ordering Options and Provisions (Cont'd)

For example, a customer may order a 1.544 Mbps facility from a customer designated premises to a Telephone Company Hub for multiplexing to Voice Grade (i.e., Group level) channels, which may be extended to other customer designated premises. Optional features and BSEs may be added to either the 1.544 Mbps or the Voice Grade channels. (D)

When ordering multipoint service, bridging or multiplexing, the customer will select the designated bridging hub(s) for his serving wire center from NECA Tariff F.C.C. No. 4 and will select the appropriate subtending wire centers from the Subtending Wire Center Section of NECA Tariff F.C.C. No. 4. Different locations may be designated as hubs for different facility capacities, e.g., multiplexing from digital to digital may occur at one location, while multiplexing from digital to analog may occur at a different location. (T)

Special Access Service is ordered under the Access Order provisions set forth in Section 5. Also included in that section are other charges which may be associated with ordering Special Access Service (e.g., Service Date Change Charges, Cancellation Charges, etc.). Ordering provisions as set forth in Section 2.6 will apply when more than one Exchange Telephone Company is involved. (D)

(This page filed under Transmittal No. 3400)

ACCESS SERVICE

7. Special Access Service (Cont'd)7.1 Service Provisioning (Cont'd)7.1.7 Acceptance Testing

Testing and test results, are available at the customer's request as follows:

- (A) At no additional charge, the Telephone Company will cooperatively test the following parameters at the time of installation:
- (1) For Voice Grade analog services (including WATS Access Lines), acceptance test will include tests for loss, 3-tone slope, DC continuity, operational signaling, C-notched noise, and C-message noise when these parameters are applicable and specified in the order for service. Additionally, for Voice Grade services, a balance test will be made if the customer has ordered the Improved Return Loss or Improved Equal Level Echo Path Loss optional features.
 - (2) For other analog services (i.e., Metallic, Telegraph, Program Audio, and Video) acceptance tests will include tests for the parameters applicable to the service as specified by the customer in the order for service. (D)
 - (3) For digital services, acceptance tests will include tests applicable to the service as specified in the appropriate Technical References for MegaLink Data and High Capacity services.

(This page filed under Transmittal No. 3400)

ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Rate Regulations (Cont'd)7.2.4 Nonrecurring Charges* (Cont'd)(B) Installation of Optional Features, BSEs and Functions

Nonrecurring charges apply for the installation of some of the optional features, BSEs and functions available with Special Access Service. The charge applies whether the feature, BSE or function is installed coincident with the initial installation of service or at any time subsequent to the installation of the service.

The optional features for which nonrecurring charges apply are:

- Voice Grade Data Capability
- Voice Grade Telephoto Capability
- Program Audio Gain Conditioning
- Program Audio Stereo

- MegaLink Data Loop Transfer Arrangement
- MegaLink Data Secondary Channel
- High Capacity Transfer Arrangement
- High Capacity Clear Channel Capability
- High Capacity SecureNet Hub Redundancy
- High Capacity SecureNet Serving Wire Center and Facility Redundancy

(D)

(C) Installation of Service to Service Through Connect Arrangements

Nonrecurring charges apply for the work activity necessary to provide the intraoffice connection between dedicated, like services. The through connection is provided in conjunction with Voice Grade Analog, Program Audio, MegaLink Data, and High Capacity two-point services.

* For Services ordered under MVP, refer to Section 38.3(E) (5).

Effective: November 12, 2014

Four AT&T Plaza, Dallas, Texas 75202

ACCESS SERVICE

7. Special Access Service (Cont'd)7.2 Rate Regulations (Cont'd)7.2.9 Facility Hubs

The Telephone Company will commence billing the monthly rate for the facility to the hub on the date specified by the customer on the Access Order. Individual services utilizing these facilities may be installed coincident with the installation of the facility to the hub or may be ordered and/or installed at a later date, at the option of the customer. The customer will be billed for a Voice Grade or (D) High Capacity digital Channel Termination, Channel Mileage (when applicable) and the Multiplexer at the time the facility is installed. Individual service rates (by service type) will apply for a Channel Termination and additional Channel Mileage (as required) for each channelized service.

When cascading multiplexing is performed, whether in the same or a different hub, a charge for the additional multiplexing unit also applies. When cascading multiplexing is performed at different hubbing locations, Channel Mileage charges also apply between the hubs.

ACCESS SERVICE

7. Special Access Service (Cont'd)7.3 Service Descriptions, Rates and Charges7.3.1 General

The types of Special Access Service are:

Metallic (MT)
Telegraph Grade (TG)
Voice Grade (VG)
Program Audio (AP)
Video

(D)

(D)

MegaLink Data (DA)
High Capacity (HC)

Each of the channel types has its own characteristics. All are subdivided by one or more of the following:

- Transmission specifications
- Bandwidth
- Speed (i.e., bit rate)
- Spectrum.

(A) Descriptions

Each service consists of a basic channel to which the following services can be added as required to construct the service desired by the customer:

- Technical specifications packages (customized or predefined)
- Channel interface(s)
- Optional features, BSEs and functions.

Customers who wish to obtain copies of these references may obtain ordering information from the User's Guide section of this tariff.

(C) Channel Interfaces

A matrix is provided in paragraph (C) of Sections 7.3.2 through 7.3.10 that indicates the channel interfaces which are compatible with each channel type. (T)

Channel interfaces at each Point of Termination on a two-point or multipoint service may be symmetrical or asymmetrical. However, communications can only be provided between points of termination with compatible channel interfaces. Only certain channel interfaces are compatible. These may be found in the appropriate Technical Reference cited for each channel type.
