ACCESS SERVICE

3. Carrier Common Line Access Service (Cont'd)3.3 Rate Regulations

This section contains the specific regulations governing the rates and charges which apply for Carrier Common Line Access Service. There are two types of Carrier Common Line Access Service rate elements: Carrier Common Line Access Charges and Multiline Business Presubscribed Interexchange Carrier Charges (PICCs).

Generally, all Switched Access Service provided to a customer is subject to Carrier Common Line Access Charges. Exceptions are set forth in 3.3.6. (Exceptions to Carrier Common Line Charges).

Rates and charges for Carrier Common Line Access depend generally on its use by the customer, i.e., the feature group or BSA, whether the usage is originating or terminating and the type of service (e.g., MTS/WATS or MTS/WATS-type services, 700, 800 or 900 and other service types). (D)

Rates and charges for Multiline Business PICC are assessed on multiline business.

The specific rates and charges are set forth in 3.4 (Rates and Charges). Jurisdictional Report Requirements are set forth in 2.4 (Jurisdictional Reports). Ordering, rating and billing procedures as specified in 2.6 (Jointly Provided Access Service) will apply for access services where more than one exchange telephone company is involved.

To the extent a customer is reselling another carrier's MTS or MTS-type service on which the Carrier Common Line and Switched Access Charges have been assessed, Carrier Common Line Charges will be adjusted as set forth in 3.3.5 (Adjustment for Resold MTS and MTS-Type Services).

When access to the local exchange is required to provide a customer service (e.g., MTS-type, WATS-type, telex, Data, etc.) that uses a resold private line service, rates and regulations as set forth in Section 6 (Switched Access Service) and Carrier Common Line rates and regulations will apply except when such access to the local exchange is required for the provision of an enhanced service.

(This page filed under Transmittal No. 3403)

ACCESS SERVICE

3. Carrier Common Line Access Service (Cont'd)

3.3 Rate Regulations (Cont'd)

3.3.2 CCL Usage Rates

Usage rates for each line or trunk are rates that apply on a per unit basis, e.g. per minute of use, when a specific rate element is used. Usage charges are accumulated over a monthly period.

(A) Premium Rate Application

Carrier Common Line rates are applied as premium rates.

(1) Premium rates apply to:

- (a) FGA and BSA-A access minutes. (D)
- (b) FGB and BSA-B access minutes. (D)
- (c) FGD and BSA-D access minutes.

ACCESS SERVICE

3. Carrier Common Line Access Service (Cont'd)3.3 Rate Regulations (Cont'd)3.3.2 CCL Usage Rates (Cont'd)(B) Originating and Terminating Rate Application

Carrier Common Line rates are applied based upon whether (D)
the minutes are classified as originating or terminating.
Originating calling permits the delivery of calls from
Telephone Exchange Service locations to the customer's
premises. Terminating calling permits the delivery of
calls from the customer's premises to Telephone Exchange
Service locations.

(1) Originating rates apply to:

- originating access minutes of use (excluding (T)
those to which terminating rates apply, as
specified in Section 3.3.2(B)(2));
- originating 700, 800, 900 and ACIS access minutes (C)
of use which are reported as minutes that
terminate over a Switched Access Service that is
assessed terminating Carrier Common Line. Such
originating minutes must be reported as specified
in Section 3.3.2(B)(3).

(2) Terminating rates apply to:

- terminating access minutes of use;
- FGA and BSA-A FX/ONAL originating access minutes
of use;
- originating 700, 800, 900 and ACIS access minutes
of use for calls on which Carrier Common Line are
not billed on the terminating end.

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.4 Miscellaneous Services Descriptions6.4.1 WATS Access Line Service

WATS Access Line Service is a service which utilizes Voice Grade Special Access Service to connect an end user premises with a WATS Access Line Service serving office. WATS Access Line Service is provided with either dial pulse or dual tone multifrequency address signaling and either loop start or ground start supervisory signaling. The choice of the type of signaling is at the option of the customer. A diagram and further description of WATS Access Line Service and applicable charges is provided in Section 7.2.11. (D)

(A) Originating WATS Access Line Service (Outward)

- (1) WATS Access Line Service may access any FGA, FGB, FGD, BSA-A, BSA-B, or BSA-D Switched Access Service. When WATS Access Line Service is provided from a WATS serving office, the customer will be subject to the rules governing Easy Access Dialing as specified in Section 13.3.1. (D)
- (2) WATS Access Line Service may not be used to access 911, 0+ or 01. (D)

(B) Terminating WATS Access Line Service (Inward)

- (1) FGA, FGB, FGD, BSA-A, BSA-B, or BSA-D may access WATS Access Line Service.
- (2) Intrastate IntraLATA 1+ and 101XXXX type calling in Arkansas, Kansas, Missouri, Oklahoma and Texas which is completed through the use of WATS Access Line Service, will continue to conform to the rules and regulations of each of these respective states.

(This page filed under Transmittal No. 3403)

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.4 Miscellaneous Services Descriptions (Cont'd)6.4.4 Advanced Carrier Identification Service (ACIS)(A) General

Advanced Carrier Identification Service (ACIS) is an originating offering utilizing trunk side Switched Access Services and provides the ability for calls to be delivered to access customers based on the dialed Personal Communication Service (PCS) subscriber number. ACIS will use the dialed PCS subscriber number (e.g., 1+500+NXX-XXXX) to identify the access customer (i.e., the transport carrier) to whom the call will be delivered and then deliver the call to the access customer. (D)

The ACIS functionality will be available in suitably equipped end offices or access tandems. If an ACIS routed call originates in an office not equipped to provide the identification function, the call will be routed to an office where the function is available.

ACIS allows the PCS subscriber to originate calls using one-plus (1+), zero plus (0+) and from public coin phones. The Telephone Company will block an ACIS originated call if it originates through a 101XXXX access code, zero minus (0-) dialing or 0- Transfer Service.

(B) Provisioning

Unless prohibited by technical limitations, originating traffic that is routed using ACIS may, at the option of the customer, be combined in the same FGB, FGD, BSA-B, or BSA-D trunk group with the customer's other Access Service traffic. Where such technical limitations do exist, the Telephone Company will provide notification to the customer prior to establishment of ACIS. This arrangement is only available when a customer utilizes tandem routed FGD or BSA-D. For this arrangement, premium access charges will apply for such originating ACIS usage. When FGD or BSA-D becomes available in an end office, originating ACIS routed traffic from that end office must be provided with FGD or BSA-D.

(This page filed under Transmittal No. 3403)

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.6 Switched Access Features and Basic Service Elements (Cont'd)6.6.1 Switched Transport Features (Cont'd)(B) Feature Descriptions (Cont'd)(4) Multiplexing (Cont'd)(c) Supergroup to Group (Cont'd)

Provides for an arrangement that converts a Supergroup channel (i.e., a wideband analog channel with a bandwidth of 312 khz to 552 khz) to and from five Group channels (i.e., five wideband analog channels with bandwidths of 60 khz to 108 khz). Conversion is accomplished using frequency division multiplexing.

(d) Group to DS1

This alternative is obsolete and limited to existing installations at existing locations for existing customers as of January 1, 1994.

Provides for an arrangement that converts two Group channels (i.e., two wideband analog channels with bandwidths of 60 khz to 108 khz) to and from a DS1 channel. Conversion is accomplished using frequency division multiplexing.

(5) Tandem Signaling

- Available with FGD and BSA-D in suitably equipped end offices. (C)
- This feature provides for the forwarding of the trunk group identification and Carrier Identification Code (CIC) associated with a direct dialed originating call transported via Direct-Trunked Transport Facilities or Switched Transport Connections from an end office to the tandem signaling customer. Technical limitations require the exclusion of 800 traffic from this arrangement when that traffic originates in a Telephone Company end office which is not SSP equipped.

(This page filed under Transmittal No. 3403)

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.6 Switched Access Features and Basic Service Elements (Cont'd)6.6.2 Local Switching - Common Switching Features (Cont'd)(B) Feature Descriptions (Cont'd)(15) FGD or BSA-D with 950 Access

- Available with FGD or BSA-D where technically feasible
- This feature provides for the routing of originating calls from end offices, utilizing a customer's 950-0XXX or 950-1XXX access code, to the customer's FGD or BSA-D trunks and using FGD signaling protocols and technical specifications. The 950-0XXX or 950-1XXX traffic can be routed to the customer directly or through an access tandem over FGD or BSA-D trunks with the customer's standard FGD or BSA-D traffic. (C)

(16) Flexible Automatic Number Identification (Flex ANI)

- Available with FGD in suitably equipped end offices and in association with the ANI feature. (Flex ANI for use with BSA-D is provided as a BSE as specified in 6.6.5(B).)
- Provides the ability to add values to the existing information indicators (ii) that are available with the ANI feature. The customer will receive all new ii codes that are assigned by the North American Numbering Plan Administrator as they become available and are activated in Telephone Company switches. Flex ANI is provided per end office and on a Carrier Identification Code (CIC) basis. The technical requirements for Flex ANI are contained in the Bellcore LSSGR FSD 20-20-0100, Issue 1, March, 1987.

(This page filed under Transmittal No. 3403)

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.8 Rate Regulations (Cont'd)6.8.1 Rate Elements

The following provides a list of the various rate elements and how the rate elements are defined.

- Carrier Common Line (described in Section 3) (T)
- End User (described in Section 4) (N)
- Entrance Facility (as described in Section 6.8.1(A)) (T)
- Direct-Trunked Transport (as described in Section 6.8.1(B)) (D)
- Tandem-Switched Transport (as described in Section 6.8.1(C)) (T)
- Local Switching (described in Section 6.8.1(D)) (D)
- Information Surcharge (described in Section 6.8.1(F)) (T)
- DNAL Termination (described in Section 6.8.1(G)) (T)
- DNAL Mileage (described in Section 6.8.1(H)) (T)

(A) Entrance Facility

The Entrance Facility rate element provides for an Entrance Facility as described in Section 6.5. The Entrance Facility rate element includes the transmission medium of the facility (e.g., wire or fiber) as well as certain circuit equipment that is used at the ends of the facility and employed to provision the channels on the transmission medium. (T)

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.8 Rate Regulations (Cont'd)

6.8.1 Rate Elements (Cont'd)

(D) Local Switching (Cont'd)

(1) (Cont'd)

During the transition period in which Switched Access Services are provided as either feature groups or as basic serving arrangements, Local Switching is available on a bundled or unbundled basis. Bundled Local Switching rates will apply to Switched Access Services provided as feature groups. Unbundled Local Switching rates will apply to Switched Access Services provided as basic serving arrangements. When the feature groups are abolished at the end of this transitional period, Local Switching will only be provided on an unbundled basis. Bundled and Unbundled Local Switching rates are divided into two distinct categories, i.e., LS1 and LS2.

(2) The Dedicated End Office Port provides for each dedicated line or trunk terminating in the end office port.

(3) The Shared End Office Trunk Port rate element provides for the use of the shared end office trunk ports for termination of common transport trunks for tandem routed traffic.

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.8 Rate Regulations (Cont'd)6.8.2 Nonrecurring Charges (Cont'd)

(D)

(A) Nonrecurring Charges for Installation of Service (Cont'd)(2) 900 Access Service NXX Activation Charge

This nonrecurring charge applies for the activation of each 900 Access Service NXX code subsequent to the customer's initial request for activation of 900 NXX code(s) within the LATA. The "first" charge applies to the activation of the first NXX code listed on the request per each end office within the LATA. The "additional" charge applies to the activation of each additional NXX code(s) listed on the request per each end office within the LATA. The entity that has been assigned the 900 NXX code(s) by Bellcore will be responsible for the 900 Access Service NXX Activation Charge(s) associated with that code(s).

When the customer orders 0+900 Access Service, the 900 Access Service NXX Activation Charge will always apply per NXX code within the LATA in addition to the 0+900 Access Service Installation Nonrecurring Charge as set forth in Section 6.9.

(D)

(This page filed under Transmittal No. 3403)

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.8 Rate Regulations (Cont'd)6.8.3 Monthly Recurring and Usage Rates

Monthly rates (including fixed and per mile rates) are flat recurring rates that apply each month or fraction thereof that a specific rate element is provided. For billing purposes, each month is considered to have thirty (30) days.

Usage rates for each line or trunk are rates that apply on a per unit basis (e.g., per call, per access minute or per access minute per mile) when a specific rate element is used. Usage charges are accumulated over a monthly period.

Usage rates for FGD or BSA-D Service utilizing the Multiple 64 CCC feature will apply on a per unit basis. For Multiple 64 CCC, a unit represents a FGD or BSA-D trunk with 64 Kbps of bandwidth. The Multiple 64 CCC feature (n x 64 Kbps) is available in increments from 64 Kbps to 1536 Kbps bandwidth, where n may be from 1 to 24 and represents the incremental number of 64 Kbps of bandwidth per call.

Rates and charges for Switched Access Service depend generally on its use by the customer, i.e., for MTS or WATS services, MTS-WATS equivalent services or other services (e.g., foreign exchange service); and the feature group or basic serving arrangement. (D)

When Local Switching (LS1 and LS2), and Information Surcharge usage rates are applicable, they are applied as premium rates. (D)
