ACCESS SERVICE

6. Switched Access Service (Cont'd)6.8 Rate Regulations (Cont'd)6.8.1 Rate Elements (Cont'd)(D) Local Switching

The Local Switching rate elements as described in 1 through 3 following, provide for the local end office switching and end user termination functions necessary to complete the transmission of Switched Access communications to and from the end users served by the local end office. When local switching functions are not used in the provision of a Switched Access service, such as calls originating from or terminating to a Mobile Access Tandem Connection, local switching rates will not apply.

- (1) The Local Switching rate element provides for the following functions.

Common Switching - Local end office switching associated with the various feature group and basic serving arrangements switching arrangements.

Transport Termination - Line or trunk side arrangements which terminate the Local Transport facilities.

Line Termination - Terminations for the end user lines terminating in the local end office. There are two types of line terminations: Common Line terminations and WATS Access Line Service terminations.

Intercept - Termination of certain calls at a Telephone Company intercept recording. The recording tells a caller that a call, as dialed, could not be completed.
