(H) Service Date Advancement (Cont'd)

(8) Application of Rates and Charges (Cont'd)

(d) A Service Date Advancement-Missed Appointment charge in (9)(b), following, will apply per circuit, per occurrence for services in (1) above for Company resources expended to advance a service date. Following is an example of when this charge may apply for an order with a standard interval:

- A customer submits an Access order for a DS1 (a.k.a., BellSouth SPA DS1) service to be installed at the customer's premises. The Access Order has a requested service date that is two business days less than the standard interval for DS1 (a.k.a., BellSouth SPA DS1) service. The Company agrees to the requested advanced service date and informs the customer that Service Date Advancement charges will apply and will be billed to the customer upon the Company installing and completing the Access order. However, when a Company technician arrives to install the DS1 (a.k.a., BellSouth SPA DS1) service on the advanced service date, the Company cannot gain access to the customer's premises to install the service and complete the order. Therefore, the customer is billed a Service Date Advancement-Missed Appointment charge (i.e., \$300 per circuit per occurrence) for the additional resources required to advance the service date. Had the Company technician been allowed to install and complete the order on the advanced service date, the customer would have been billed the normal Service Date Advancement charges provided in (9)(a) following for advancing the service date.

Such intervals will be established in accordance with published service date interval guidelines which are available to customers upon request, whether the customer's service is subject to standard or negotiated intervals. The customer may request a service date other than that established pursuant to the service date interval guidelines, and the Telephone Company, where possible, will establish the service date in accordance with such request, subject, however, to other applicable provisions of this tariff.

A customer who initiates a conversion (rollover) of a DS1 (a.k.a. BellSouth SPA DS1) to a DS3 High Capacity (a.k.a. BellSouth SPA DS3) service is also responsible for submitting Network Channel Interface (NCI) Code Update requests, either mechanically or manually, on all sub-DS1 level circuits that ride the channelized DS1 High Capacity (a.k.a. BellSouth SPA DS1) service being rolled over. The Telephone Company and customer will work cooperatively to establish the number of circuits which may be submitted monthly for purposes of mechanical NCI Code updates associated with rollovers of DS1 High Capacity service (a.k.a. BellSouth SPA DS1) to DS3 High Capacity (a.k.a. BellSouth DS3) service.
