2.4 Payment Arrangements and Credit Allowances (Cont'd)

2.4.8 Optional Payment Plans (Cont'd)

(A) Channel Services Payment Plan (Cont'd)

(9) Prepayment (Cont'd)

(b) (Cont'd)

- When a customer who has prepaid recurring monthly rates replaces the existing CSPP arrangement with a new CSPP arrangement, the customer will be credited with that portion of the prepayment amount, representing a prepayment of the monthly recurring rates remaining in the existing CSPP arrangement.
- Customers who prematurely disconnect will have termination liability charges deducted from the unused prepaid balance. The remaining prepaid balance, if any, will be credited to their bill.

(B) Area Commitment Plan (ACP)

The Area Commitment Plan (ACP) allows customers who have obtained service on a month-to-month basis to receive reduced rates, in the form of ACP credits, in exchange for a commitment to maintain a level of service for a specified period of time. The terms of this plan apply to special access services or switched access services that are available under an ACP, except as noted in the rate regulations for a service.

Services included in a Channel Services Payment Plan (CSPP) and/or a Transport Payment Plan (TPP) may not be included in an ACP or vice versa.

The customer determines the commitment level of rate elements that will be included in an ACP, i.e., the customer will provide the number of commitment rate elements expressed as a whole number (e.g., 12 DS1 Local Channels). For example, a customer wishes to establish an ACP for all of his DS1 services that are billing on a month-to-month basis. The customer has 12 DS1 Local Channels and 6 DS1 Interoffice Channels⁽¹⁾ that have a total of 90 Interoffice Channel miles⁽¹⁾. In this example, the quantity of commitment rate elements would be specified as 12 DS1 Local Channels and 90 Interoffice Channel miles⁽¹⁾. For interoffice channels⁽¹⁾, the commitment is based on a quantity of miles. When credits are applied to interoffice channel miles⁽¹⁾ on a circuit, the customer automatically receives credit for the fixed rate element component of the interoffice channel⁽¹⁾. As a further example, this customer may desire to establish a commitment level only for a small portion of these DS1 services. In this case, the customer would specify the level that is desired (e.g., 1 DS1 Local Channel). ACP commitments are made on a regional basis, i.e., one commitment for all Company service areas.

(B) Area Commitment Plan (ACP) (Cont'd)

The Customer may choose any period of time between 24 and 72 months for the commitment.⁽¹⁾⁽³⁾ The applicable rate for use in the ACP calculation is the ACP rate selected commitment period. ACP commitment periods are offered as follows:

- ACP A, commitment periods may be selected from 24 months to 48 months in length.⁽²⁾⁽³⁾

(D)
(D)

Each month the Telephone Company will determine the number of in-service rate elements, by type (Local Channel, Multiplexer or Channel Mileage), for which the Telephone Company will apply credits during the following month. The amount of any ACP credit will be based on the difference between the month-to-month rate and the associated ACP rate. Credit and shortfall calculations will be performed at the end of each month, and the resulting credit/shortfall amounts will be applied to the Customer's bill during the following month.

The Telephone Company will apply credits to Local Channel and Multiplexer rate elements, by applying the following steps in the following order:

1. Credits will be applied by state, in proportion to the percentage of the relevant rate element type purchased by the Customer in each state. For example, if a Customer purchases 40 percent of its Local Channels in Florida, then the Telephone Company will apply 40 percent of the Customer's ACP credits to Local Channels to Florida.
2. Within each state, Local Channel and Multiplexer credits will be applied by Rate Zone, beginning with Rate Zone 1 and proceeding to Zone 3.
3. Within each Rate Zone, credits will be applied according to the applicable monthly charge for each rate element, beginning with the highest billed rate elements and proceeding to the lowest billed rate elements.

⁽¹⁾ Effective May 15, 2015, Plan B commitment periods of 61 to 72 months will no longer be available. Plan B commitment periods from 49 to 60 months will continue to be available for new ACPs. There is no change for existing ACPs.

⁽²⁾ Effective on September 13, 2017, ACPs greater than 36-months for special access services are no longer available, including for any otherwise available conversions. Circuits already subject to an ACP greater than 36-months, as of September 13, 2017, will continue to be provided under the then-current ACP term for the remainder of that term.

⁽³⁾ Effective on November 1, 2022, all ACPs for High Capacity (a.k.a. BellSouth SPA High Capacity DS1 (a.k.a. BellSouth SPA DS1)), CSPPs of greater than 24 months for High Capacity (a.k.a. BellSouth SPA High Capacity DS1 (a.k.a. BellSouth SPA DS1)), SMARTPath Service (a.k.a. BellSouth SPA DS1 Shared Ring), and SMARTPath DS3 Transport Service (a.k.a. BellSouth SPA DS3 Shared Ring), and TPPs greater than 12 months for BellSouth DS1 Diverse Service and LightGate Systems (a.k.a. BellSouth SPA Point to Point Network), are no longer available, including for any otherwise available conversions. Circuits already subject to ACPs, CSPPs, and TPPs, as of November 1, 2022, will continue to be provided under the then-current term for the remainder of that term.

2.4 Payment Arrangements and Credit Allowances (Cont'd)

2.4.8 Optional Payment Plans (Cont'd)

(B) Area Commitment Plan (ACP) (Cont'd)

The Telephone Company will apply credits to mileage⁽¹⁾ rate elements, by applying the following steps in the following order: (N)

1. Credits will be applied by state, in proportion to the percentage of the relevant rate element type purchased by the customer in each state. For example, if a Customer purchases 40 percent of its Local Channels in Florida, then the Telephone Company will apply 40 percent of the Customer's ACP credits to channel mileage⁽¹⁾ in Florida. (N)
2. Within each state, credits will be applied beginning with the longest mileage⁽¹⁾ circuit and proceeding to the shortest mileage⁽¹⁾ circuit. (N)
3. If circuits have the same mileage⁽¹⁾, credits will be applied by Rate Zone, beginning with Rate Zone 1 and proceeding to Zone 3. (N)
4. Within a Rate Zone, credits will be applied according to the applicable monthly charge for each mileage⁽¹⁾ rate element, beginning with the highest billed rate element and proceeding to the lowest billed rate element. (N)

If the number of in-service rate elements is less than the commitment level, a shortfall charge will apply. The shortfall charge will be equal to the difference between the Customer's commitment level and the number of in-service rate elements of the relevant type (Local Channel, Multiplexer⁽¹⁾ or Channel Mileage⁽¹⁾); multiplied by 50 percent of the ACP rate applicable to each rate element to which a shortfall charge is applied. To calculate shortfall charges, the Telephone Company will apply the ACP Plan B, Price Cap Zone 2 rate that is in effect on the billing date for the appropriate commitment period, i.e., the ACP rate that is effective at the end of each month for which the credit/shortfall calculations are performed. BellSouth SPA Point to Point Network) or BellSouth Dedicated Ring TPP customer disconnects services or rate elements prior to the minimum number of months for the plan period selected, termination liability charges will apply. The termination liability charge will be derived at the time of disconnection by taking the difference between the rate for the TPP period for which the customer subscribed, and the rate for the TPP period that the customer's completed service would otherwise qualify, and multiplying the difference by the number of months service the customer completed under a TPP. For example, a customer subscribes to a TPP for 73 months (Plan C) and terminates service after 20 months (Plan A). The termination liability charge will be applied by multiplying the number of months in service (20) by the difference between the Plan A and Plan C monthly rates. ACCESS SERVICE

7 - Special Access (a.k.a. BellSouth SPA) Service

7.1 General

Non-Competitive End-User Channel Terminations (and associated optional features and functions) are the Special Access Services offered under this tariff. Other Special Access Services require to complete a circuit are available at www.att.com/guidebook.

(N)
|
(N)

Special Access (a.k.a. BellSouth SPA) service provides a transmission path to connect customer designated premises¹ or a customer designated premises and a WATS serving office, either directly or through a Telephone Company Hub where bridging or channelization functions are performed. Special Access (a.k.a. BellSouth SPA) service includes all exchange access not utilizing Telephone Company end office switches.

The connections provided by Special Access (a.k.a. BellSouth SPA) service can be either analog or digital. Analog connections are differentiated by spectrum and bandwidth. Digital connections are differentiated by bit rate.

7.1.1 Channel Types

There are ten types of channels used to provide Special Access (a.k.a. BellSouth SPA) services. Each type has its own characteristics. All are subdivided by one or more of the following:

- Transmission specifications,
- Bandwidth,
- Speed (i.e., bit rate),
- Spectrum

Customers can order a basic channel and select, from a list of available transmission parameters and channel interfaces⁽²⁾, those that they desire to meet specific communications requirements.

(N)

For purposes of ordering channels, each has been identified as a type of Special Access (a.k.a. BellSouth SPA) service. However, such identification is not intended to limit a customer's use of the channel nor to imply that the channel is limited to a particular use. For example, if a customer's equipment is capable of transmitting voice over a channel that is identified as a Metallic (a.k.a. BellSouth SPA Metallic) service in this tariff, there is no restriction against doing so.

(1) Telephone Company Centrex Type Services switches and Telephone Company Answering Service Concentrators are considered to be customer premises for purposes of administering regulations and rates contained in this tariff.

(T)

(2) This service has been de-tariffed pursuant to FCC Order No. 17- 43, released April 28, 2017. Terms and Conditions for de-tariffed services are available at www.att.com/guidebook.

7 - Special Access (a.k.a. BellSouth SPA) Service (Cont'd)

7.1 General (Cont'd)

7.1.1 Channel Types (Cont'd)

Derived Data Channel⁽¹⁾ (a.k.a. BellSouth SPA Derived Data Channel) - a digital data channel derived from a two-wire local exchange facility that transmits voice and data signals simultaneously.

Digital Data⁽¹⁾ (a.k.a. BellSouth SPA DSO Digital Data) - a channel for the digital transmission of synchronous serial data at rates of 2.4, 4.8, 9.6, 19.2, 56.0 or 64.0 kbps.

High Capacity (a.k.a. BellSouth SPA High Capacity) - a channel for the transmission of isochronous serial digital data at rates of 1.544 Mbps (DS1), 3.152 Mbps (DS1C), 6.312 Mbps (DS2), or 44.736 Mbps (DS3).

Detailed descriptions of each of the channel types are provided in Section 7.2.

The customer also has the option of ordering digital high capacity (a.k.a. BellSouth SPA High Capacity) facilities i.e., Group, Supergroup, Mastergroup, DS1 (1.544 Mbps), DS1C (3.152 Mbps), DS2 (6.312 Mbps), and DS3 (44.736 Mbps) to a Telephone Company Hub for channelization to individual channels of a lower capacity or bandwidth.

Descriptions of the types of channelization available at the Hubs, as well as the number of individual channels which may be derived from each type of facility are set forth in Section 7.2. Additionally, the customer may specify optional features for the individual channels derived from the facility to further tailor the channel to meet specific communications requirements. Descriptions of the optional features and functions available are also set forth in Section 7.2.

For example, a customer may order LightGate service (a.k.a. BellSouth SPA Point to Point Network) with DS3 channel interfaces⁽²⁾ at a customer designated premises and terminate it at a Telephone Company Hub with DS1 (a.k.a. BellSouth SPA DS1) (1.544 Mbps) channel interfaces⁽¹⁾. These DS1 (a.k.a. BellSouth SPA DS1) channels may be further channelized to Voice Grade (a.k.a. BellSouth SPA DSO VG) (i.e., Group level) channels or may be extended to other customer designated premises or a different Hub. Optional features may be added to either the DS1 (a.k.a. BellSouth SPA DS1) or the Voice Grade (a.k.a. BellSouth SPA DSO VG) channels. (N)

(1) Effective November 20, 2019, this Service will no longer be available for purchase by new or existing customers, and service agreements may no longer be renewed. In addition, requests to move, add or change existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable monthly extension rates until the service is discontinued. The following rate categories apply to Special Access (a.k.a. BellSouth SPA) Service:

- Local Channels (described in Section 7.1.2(A))
- Interoffice Channels (described in Section 7.1.2(B))⁽²⁾
- Optional Features and Functions (described in Section 7.1.2(C))⁽²⁾
- SMARTPath Area Connection (described in Section 7.1.2(E))
- SMARTPath Area Junction (described in Section 7.1.2(E))
- Fast Packet Access Services⁽¹⁾ (as set forth in Section 21 of this Tariff)
- Digital Subscriber Line Access Services (as set forth in Section 28 of this Tariff)

(N)
(N)

(A) Local Channel

In general, the Local Channel rate category provides for the communications path between a customer-designated premises and the serving wire center of that premises. Included as part of the Local Channel is a standard channel interface arrangement which defines the technical characteristics associated with the type of facilities to which the access service is to be connected at the Point of Termination (POT) and the type of signaling capability, if any. The signaling capability itself is provided as an optional feature as set forth in Section 7.1.2(C). One Local Channel charge will apply per customer-designated premises at which the channel is terminated. This charge will also apply where the customer designated premises and the serving Wire Center are collocated in a Telephone Company building. This charge will also apply where both customer-designated premises are in the same building, or where the service is provided without physically traversing the serving wire center. The charge also applies where the designated premises is served from a wire center other than the one from which the customer would normally obtain dial tone, i.e., an alternate serving wire center, as described in Section 7.2.9(A).

⁽¹⁾ Exchange Access Frame Relay Service (a.k.a. BellSouth Exchange Access Frame Relay Service), BellSouth Exchange Access Asynchronous Transfer Mode Service, BellSouth Managed Shared Frame Relay Service, and BellSouth Managed Shared Asynchronous Transfer Mode Service have been discontinued and are no longer available in this publication (see WC Dkt. 11-120).

(F) BellSouth Expanded Interconnection Service Cross Connects

Terms and conditions and rates for BellSouth Expanded Interconnection Service Cross Connects are as set forth in Section 20 of this Tariff.

7.1.3 Service Configurations

There are four types of service configurations over which Special Access (a.k.a. BellSouth SPA) services are provided: link service, two-point service and multipoint service .

A change from one Special Access (a.k.a. BellSouth SPA) Service configuration to another will be treated as a discontinuance of existing service and an installation of a new service as set forth in 5.6 preceding, except for BellSouth SPA CNM - FlexServ Service reconfigurations service or link service configurations.

(A) Link Service

A link is a service configuration provided as a DS3 or DS1 channel of a LightGate service (a.k.a. BellSouth SPA Point to Point Network) local channel and/or interoffice channel⁽¹⁾. DS3 or DS1 channels provided in a LightGate service (a.k.a. BellSouth SPA Point to Point Network) interoffice channel⁽¹⁾ must either be combined with corresponding DS3 or DS1 channels in a LightGate service (a.k.a. BellSouth SPA Point to Point Network) local channel system to form a single link, or they may be provided on a stand-alone link basis with BellSouth SPA CNM - FlexServ Service, or hubbing applications at Voice Grade channel (a.k.a. BellSouth SPA DS VG) service levels when not directly connected with LightGate service (a.k.a. BellSouth SPA Point to Point Network) local channels.

Individual links may be installed, maintained in service, and subsequently disconnected without affecting other links connected to them. Disconnection of a link, which forms a part of a two-point service configuration, necessitates the disconnection of the non-link service elements in the two-point configuration also.

(C) Multipoint Service

Multipoint service connects three or more customer designated premises through a BellSouth Hub. There is no limitation on the number of mid-links available with multipoint service. However, when more than three mid-links are provided in tandem, the quality of the service may be degraded. A mid-link is a channel between Hubs (i.e., bridging locations). Only certain types of Special Access (a.k.a. BellSouth SPA) service are provided as multipoint service. These are so designated in the Service Descriptions set forth in 7.2. following.

Multipoint service utilizing a customized technical specifications package as set forth in 7.2 following will be provided when technically possible. If BellSouth determines that the requested characteristics for a multipoint service are not compatible, the customer will be advised and given the opportunity to change the order.

When ordering, the customer will specify the desired bridging Hub(s) selected from the NATIONAL EXCHANGE CARRIER ASSOCIATION INC. TARIFF F.C.C. No. 4. This tariff identifies the type(s) of bridging functions which are available and the serving wire centers at which they are available.

Applicable Rate Elements are:

- Local Channels (one per customer designated premises)
- Interoffice Channels (as applicable between serving wire centers associated with two customer designated premises, between a serving wire center and a Hub, or between Hubs)⁽¹⁾

ACCESS SERVICE

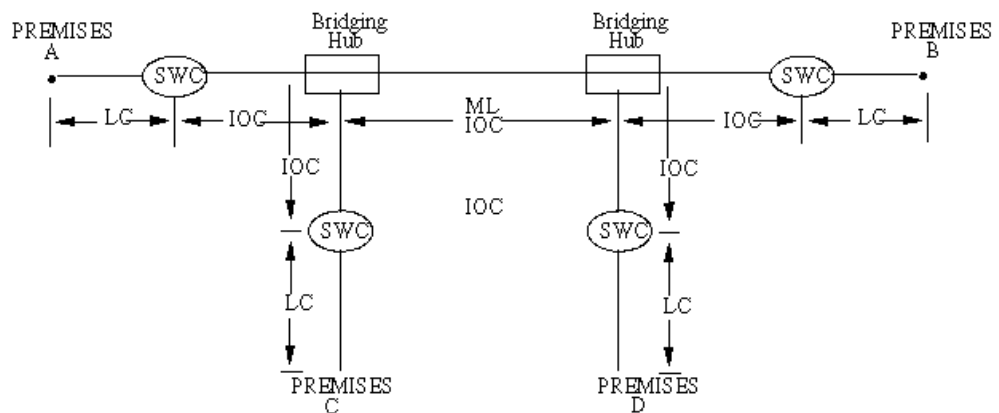

7 - Special Access (a.k.a. BellSouth SPA) Service (Cont'd)

7.1 General (Cont'd)

7.1.4 Alternate Use

Alternate Use occurs when a service is arranged by the Telephone Company so that the customer can select different types of transmission at different times. A customer may use a service in any privately beneficial manner. However, where technical or engineering changes are required to effectuate an alternate use, the Telephone Company will make such special arrangements available on an individual case basis.

The arrangement required to transfer the service from one operation to the other (i.e., the transfer relay and control leads) will be rated and provided on an individual case basis and filed in Section 12 of this Tariff. The customer will pay the stated tariff rates for the Access Service rate elements for the service ordered (i.e., Local Channels, Interoffice Channels⁽¹⁾ [as applicable] and Optional Features⁽¹⁾ [if any]). (N)
(N)

7.1.5 Special Facilities Routing

A customer may request that the facilities used to provide Special Access Service (a.k.a. BellSouth SPA) be specially routed. The regulations, rates and charges for Special Facilities Routing (i.e., Avoidance, Diversity and Cable-Only) are set forth in Section 11 of this Tariff.

7.1.6 Design Layout Report

At the request of the customer, the Telephone Company will provide to the customer the make-up of the facilities and services provided under this tariff as Special Access Service (a.k.a. BellSouth SPA) to aid the customer in designing its overall service. This information will be provided in the form of a Design Layout Report. The Design Layout Report will be provided to the customer at no charge, and will be reissued or updated whenever these facilities are materially changed.

7.1.7 Acceptance Testing

At no additional charge, the Telephone Company will, at the customer's request, cooperatively test, at the time of installation, the following parameters:

ACCESS SERVICE

7 - Special Access (a.k.a. BellSouth SPA) Service (Cont'd)

7.2 Service Descriptions

For the purposes of ordering, there are twelve categories of Special Access Service. These are:

Metallic⁽²⁾ (a.k.a. BellSouth SPA Metallic) (MT)
Telegraph Grade⁽²⁾ (a.k.a. BellSouth SPA Telegraph) (TG)
Voice Grade⁽²⁾ (a.k.a. BellSouth SPA DSO VG) (VG)
Program Audio⁽¹⁾⁽³⁾ (a.k.a. BellSouth SPA Program Audio) (AP)
Video (a.k.a. BellSouth SPA Video) (TV)

Digital Data Access⁽²⁾ (a.k.a. BellSouth SPA DSO Digital Data) Service (DDAS)
High Capacity (a.k.a. BellSouth SPA High Capacity) (HC)
WATS Access Line⁽²⁾ (a.k.a. BellSouth SPA WATS Line) (WAL)
Derived Data Channel⁽²⁾ (a.k.a. BellSouth SPA Derived Data Channel) Service (DDCS)

Each service consists of a basic channel to which a technical specifications package (predefined), channel interface(s)⁽⁴⁾ and, when desired, optional features and functions are added to construct the service desired by the customer. Each of the components of the service are described in this section. (N)

The channel description specifies the characteristics of the basic channel and indicates whether the channel is provided between customer designated premises or between a customer designated premises and a Telephone Company Hub where bridging and/or channelization functions are performed.

Information pertaining to the technical specifications packages indicates the transmission parameters that are available with each package. This information is displayed in a matrix with the transmission parameters listed down the left side and the packages listed across the top. Each package is identified by a code, e.g., VG1. The first two letters of the code indicate the category of Special Access Service to which the parameters are applicable. The number "1" following the two-letter code indicates the technical specifications package for a Voice Grade (a.k.a. BellSouth SPA DSO VG) service. The numeric designation following the two-letter code indicates the specific predefined package. When appropriate, the Technical Reference which contains detailed specifications for the parameters is shown following the matrix.

(A) Basic Description

An Uncompressed Switched Video (a.k.a. BellSouth SPA Uncompressed Switched Video) service channel is a channel that connects customer-designated video source(s) and video distribution location(s) through a customer-configurable video switch located at a Telephone Company Central Office (CO). Uncompressed Switched Video (a.k.a. BellSouth SPA Uncompressed Switched Video) service channels are single-direction and provided via fiber-optic facilities. This channel adheres to either a standard 525-line/60-field National Television Committee (NTSC) System-M video signal and includes up to four (4) 15 kHz audio signals or is a Serial Digital Interface⁽¹⁾ (SDI) uncompressed digital video signal transported at a speed of 270Mbps. (N)

- (1) Uncompressed Switched Video (a.k.a. BellSouth SPA Uncompressed Switched Video) service Local Channels (LC) (one way) provide connectivity of Single Channel or Multiple Channel Systems from each customer-designated end-location to its normal Serving Wire Center (SWC). Each Multiple Channel System also requires video channel activations. A customer may activate from one (1) to eight (8) video channels per Multiple Channel System.
- (2) Uncompressed Switched Video (a.k.a. BellSouth SPA Uncompressed Switched Video) service Interoffice Channels (IOC)⁽¹⁾ (one-way) provide connectivity of Single Channel or Multiple Channel Systems from the customer-designated location's normal SWC to the central office video switch. (N)
- (3) Uncompressed Switched Video (a.k.a. BellSouth SPA Uncompressed Switched Video) service arrangements are available in two configurations that are available as independent, or in combination of, Single Channel Video Systems and/or Multiple Channel Video Systems. Each arrangement requires a minimum 36-month commitment period and a minimum of 8 video channels. Customers meeting the minimum 8 video channel/36 month commitment period requirement may request additional Single Channel Systems be associated with the same arrangement on a month-to-month basis. Both Single Channel Systems and Multiple Channel Systems will have an interface⁽¹⁾ at the customer-designated end-location(s) with analog video and audio parameters as specified in TR-73593 or digital video signals specified in TR-73621. Customer designated end-locations are video source locations (transmit) or video distribution locations (receive). (N)

7.2.5.6 BellSouth SPA Modular Video Transport Service¹ (Cont'd)

(A) Basic Channel Description

BellSouth SPA Modular Video Transport service is a fiber optic transport video service that interconnects two or more customer designated end point locations to provide one way video service with associated audio. Multiple endpoint locations may be interconnected to form one way video services, e.g. rings or multipoint hubs. Two-way service may be obtained by ordering two one-way (opposite directions) services. This service is available in two configurations, Multiple Channel Video Systems or Single Channel Video systems. Different rates and charges apply for the two configurations. Multiple Channel systems and Single Channel Systems are comprised of Local Channels, Interoffice Channels⁽²⁾, and Optional Features⁽²⁾. (N)

The technology that supports Multiple Channel Systems has a 16 channel capacity associated with each transport system. The specific number of channels supported are based on the design and video interface⁽²⁾ selected by the customer. The technology that supports Single Channel Systems has a capacity of one channel. (N)

This service may transport uncompressed National Television Systems Committee (NTSC) video signals, Component 270 Mbps video signals (Multiple Channel Systems only), Advanced Television Stream (ATV), and/or Intermediate Frequency (IF) video signals between customer premises.

The NTSC video interface⁽²⁾ supports transmission capability for a standard, System M - National Television Systems Committee, composite, 525 line/60 field, uncompressed, video signal and has four associated 20 kHz audio signals. NTSC video interfaces⁽²⁾ are provided as either 10 bit, NTSC10, or 8 bit, NTSC8, signals. (N)

Component 270 Video is a 270 Mbps serial digital interface⁽²⁾ that contains separate luminous and color signals plus associated audio. It is based on international standards and provides a better quality of service than NTSC composite video. (N)

Advanced Television Stream (ATV) video is a standard, dual port interface⁽²⁾ that can support up to 90 Mbps of MPEG2 video. (N)

Intermediate Frequency (IF) video provides for transmitting an analog video signal at an Intermediate Frequency between 40 and 46 mHz that can be modulated for a full 6 mHz of analog bandwidth. IF video can also be utilized to transport many Quadrature Amplitude Modulated (QAM) signals

customer. The channel provides a synchronous service with timing provided by the Telephone Company through the Telephone Company's facilities to the customer in the received bit stream. Digital Data Access (a.k.a. BellSouth SPA DSO Digital Data) service is used to connect customer designated premises or to connect customer designated premises to a Telephone Company DDAS Hub (where connection to other services may be allowed). DDAS (a.k.a. BellSouth SPA DSO Digital Data) channels are only available from Telephone Company serving wire centers designated as DDAS (a.k.a. BellSouth SPA DSO Digital Data) Hubs. A DDAS (a.k.a. BellSouth SPA DSO Digital Data) Hub is a Telephone Company designated wire center where specialized timing, testing, maintenance and monitoring is provided for DDAS (a.k.a. BellSouth SPA DSO Digital Data) circuits; DDAS (a.k.a. BellSouth SPA DSO Digital Data) bridging is provided and available only at a DDAS (a.k.a. BellSouth SPA DSO Digital Data) Hub office. Wire centers designated as DDAS (a.k.a. BellSouth SPA DSO Digital Data) Hubs are identified in the NATIONAL EXCHANGE CARRIER ASSOCIATION, INC. TARIFF F.C.C. NO. 4. In accordance with Section 7.4.6, interoffice mileage⁽²⁾ required to connect each customer designated premises to the DDAS (a.k.a. BellSouth SPA DSO Digital Data) Hub office is computed and rates applied separately for each section of the Interoffice Channel⁽²⁾, i.e., customer designated premises serving wire center to DDAS (a.k.a. BellSouth SPA DSO Digital Data) Hub to customer designated premises serving wire center. (N)

Secondary Channel Capability (SCC) is a derived companion digital transmission path that is independent of the primary data path and operates at a substantially lower bit rate. This derived channel allows the customer to perform network management functions during the normal operation of the network. This diagnostics channel utilizes a portion of a customer's previously unavailable data bit stream allowing for the ability to remotely control and test the network and peripheral devices without taking the network out of service. Special customer equipment is necessary to utilize the benefits of the SCC. Customers not wishing to utilize this capability will not be impacted. Due to transmission equipment restrictions, SCC cannot be provided on 56 Kbps service that require the installation of loop repeater equipment for provision of service. Also, SCC cannot be provided on 64.0 kbps service since all of the available bit stream will be used by the customer. (N)

The customer will provide the Channel Service Unit-type equipment or other Network Channel Terminating Equipment associated with the Digital Data Access (a.k.a. BellSouth SPA DSO Digital Data) channel at the customer premises. The interim program for interconnection of such equipment is set forth in Technical Reference PUB AS No. 1.

7.2 Service Descriptions (Cont'd)

7.2.9 High Capacity (a.k.a. BellSouth SPA High Capacity) Service ⁽²⁾

(A) Basic Channel Description

A High Capacity (a.k.a. BellSouth SPA High Capacity) channel is a channel for the transmission of nominal 64.0 kbps ⁽¹⁾⁽³⁾ or 1.544, 3.152, 6.312, or 44.736, Mbps isochronous serial data. The actual bit rate is a function of the channel interface ⁽⁴⁾ selected by the customer. High Capacity (a.k.a. BellSouth SPA High Capacity) channels are provided between customer-designated premises or between a customer-designated premises and a Telephone Company Hub. (N)

Except for DS1 Diverse service, a DS1 (1.544 Mbps) High Capacity (a.k.a. BellSouth SPA DS1) channel may also be provided over a fiber transmission path between a customer-designated premises and an alternate wire center. DS1 High Capacity (a.k.a. BellSouth SPA DS1) channels may not be provided over DS1 Diverse service. The customer must have at least one other High Capacity (a.k.a. BellSouth SPA High Capacity) service from the same customer-designated premises to its normal serving wire center. This DS1 Alternate Serving Wire Center (ASWC) transmission path avoids the wire center from which the customer would normally obtain dial tone. The ASWC local channel is provisioned between contiguous wire centers with adjacent fiber feeder routes. This service utilizes fiber facilities from the ASWC to the designated customer premises. Interoffice channel ⁽⁴⁾ facilities, if required, will avoid the normal serving wire center. The Telephone Company will designate the serving wire center to be used as the alternate. (N)

The DS1 ASWC arrangement is immediately available for all existing arrangements and, where facilities exist, for customers whose normal serving wire centers are those listed below:

ALPRGAMA	ATLNGABU	ATLNGACS	TUKRGAMA
ATLNGAEP	ATLNGAPP	ATLNGASS	
ATLNGATH	DNWDGAMA	RSWLGAMA	
SMYRGAMA	SMYRGAPF	CHMBGAMA	

(1) Available only as a channelized element of a 1.544 Mbps facility between two Telephone Company Digital Data (a.k.a. BellSouth SPA DSO Digital Data) Access Hubs or as a cross connect of two 2.4, 4.8, 9.6, 19.2, 56.0 or 64.0 Kbps channels of two 1.544 Mbps facilities at a Digital Data (a.k.a. BellSouth SPA DSO Digital Data) Access Hub. The customer must provide system and channel assignment data.

(2) Effective September 20, 2017, High Capacity Service has limited availability; see Section 2.1.15.

(3) Effective November 20, 2019, this Service will no longer be available for purchase by new or existing customers, and service agreements may no longer be renewed. In addition, requests to move, add or change existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable monthly extension rates until the service is discontinued. AT&T currently plans to discontinue this Service on or after June 30, 2024.

(4) These services have been de-tariffed pursuant to FCC Order No. 17-43, released April 28, 2017. Terms and Conditions for de-tariffed services are available at www.att.com/guidebook.

(A) Basic Channel Description (Cont'd)

A BellSouth DS1 Diverse service local and interoffice channel⁽¹⁾ provides for a local and interoffice channel⁽¹⁾ facility, as defined in 7.1.2(A) and (B), utilizing a structurally diverse, fiber-based, architecture designed to limit single points of failure. DS1 Diverse service is available to customer locations where existing Local and Interoffice Channel⁽¹⁾ facilities are fiber-based and utilize structurally diverse routes. Connectivity is available from a BellSouth DS1 Diverse Local Channel to another BellSouth DS1 Diverse service Local or Interoffice Channel⁽¹⁾, a DS1 (a.k.a. BellSouth SPA DS1) service Basic Channelization System, Centrex Type service, BellSouth SPA CNM - FlexServ Service, LightGate (a.k.a. BellSouth SPA Point to Point Network) service, BellSouth SPA Managed Shared Network service, Expanded Interconnection service, or Exchange Access Frame Relay (a.k.a. BellSouth Exchange Access Frame Relay) service (XAFRS). BellSouth DS1 Diverse Interoffice Channels⁽¹⁾ are not available without interconnection to a BellSouth DS1 Diverse service Local Channel. BellSouth DS1 Diverse service Local and Interoffice Channels⁽¹⁾ may not be connected to a DS1 (a.k.a. BellSouth SPA DS1) service Local or Interoffice Channel⁽¹⁾, and are not eligible for Alternate Serving Wire Center (ASWC) routing.

The DS1 ASWC arrangement will be provided elsewhere within 12 months of receiving a customer request. Where facilities do not exist, special construction charges for construction of a route or type of facility other than normal may apply as set forth in the Telephone Company's special construction tariff.

The charges for DS1 ASWC as specified in 7.5.9(A) following, apply on a per DS1 local channel basis and are in lieu of the per DS1 local channel charges which apply for DS1 local channels which extend from the customer-designated premises to the normal serving wire center. Interoffice channel mileage⁽¹⁾ for the alternately routed service is based on mileage measured from or to the alternate serving wire center.

7.2.9 High Capacity (a.k.a. BellSouth SPA High Capacity) Service (Cont'd)

(A) Basic Channel Description (Cont'd)

Two additional levels of reliability are offered as options of basic LightGate service (a.k.a. BellSouth SPA Point to Point Network). These service levels provide guaranteed Separate Alternate Facilities Transport (SAFT Levels I & II) for improved protection of local channel systems extended from the first outside plant service access point outside the Telephone Company's serving wire center to the last outside plant service access point prior to entering a customer's premises.

SAFT Level I

Service protection facilities will be guaranteed to be provided in a separate sheath, i.e., cable, from the primary facilities.

SAFT Level II

Service protection facilities will be guaranteed to be provided in a separate sheath, i.e., cable, separate supporting structure and route from the primary facilities. Intermediate equipment, if required, will be configured to prevent a single service interruption point.

LightGate service (a.k.a. BellSouth SPA Point to Point Network) channel interfaces⁽¹⁾ are offered to provide individual DS1 and DS3 channels⁽¹⁾. Each DS3 channel has a capacity of 28 DS1 channels. A group of 28 DS1 channels or fraction thereof displaces the availability of a DS3⁽¹⁾ channel in a system. Appropriate electrical signals will be provided in accordance with the specifications of Technical Reference TR-INS-000342. The specifications for LightGate service (a.k.a. For the installation of local channels when more than one of the same type of service between the same locations, for the same customer, is ordered and installed at the same time; one at each location is billed at the First Service Installed charge and the others are billed at the Additional Service Installed charge. Future service requests for the same access services, at a later date, will be treated as new orders and nonrecurring charges for first service and additional service will again apply. For all video services, one nonrecurring charge applies for each Local Channel.

For LightGate service (a.k.a. BellSouth SPA Point to Point Network), one nonrecurring charge applies for each system, SAFT I or II option, and channel interface⁽¹⁾.

(2) Installation of Optional Features and Functions

Nonrecurring charges apply to the installation of Optional Features and Functions available with Special Access (a.k.a. BellSouth SPA) service. The Initial nonrecurring charge applies if the feature or function is installed coincident with the primary service. The Subsequent nonrecurring charge applies if the feature or function is installed after the installation of the primary service.

First and Additional nonrecurring charges are applicable to activate each individual Central Office Channel Interface⁽¹⁾ of a Basic Channelization System, and are in addition to the nonrecurring charges for the Basic Channelization System. A "First" nonrecurring Central Office Channel Interface⁽¹⁾ nonrecurring charge is applicable to the first Channelization Feature installed coincident with the installation of a Basic Channelization System, per service request. An "Additional" nonrecurring charge applies for each additional Central Office Channel Interface⁽¹⁾, of the same type, ordered and installed at the same location, for the same customer, at the same time, on the same order request. Future requests for a Central Office Channel Interface(s)⁽¹⁾ on an existing Basic Channelization System will be treated as new requests and will require "First" and "Additional" Central Office Channel Interface⁽¹⁾ nonrecurring charge application, in addition to any other applicable charges.

The nonrecurring charges for the installation of Optional Features and Functions are set forth in Section 7.5 following as nonrecurring charges for Optional Features and Functions associated with the specific services.

Administrative changes, as identified below, will be made without charge to the customer. Such changes require the continued provision and billing of the Access Service to the same entity (i.e., customer remains responsible for all outstanding indebtedness for the Access Service). Administrative changes are as follows:

- Change of customer name (i.e., the customer of record does not change but rather the customer of record changes its name -- e.g., AT&T-Long Lines to AT&T-Communications),
- Change of customer or customer's end user premises address when the change of address is not a result of a physical relocation of equipment,
- Change in billing data (name, address, or contact name or telephone number. The customer of record does not change),
- Change of customer circuit identification,
- Change of billing account number,
- Change of customer test line number,
- Change of customer or customer's end user contact name or telephone number, and
- Change of jurisdiction.

All other service rearrangements, including physical changes to existing services, will be charged for as follows:

- If the change involves the addition of other customer designated premises to an existing multipoint service, the nonrecurring charge for the local channel rate element(s) being added will apply. Nonrecurring charges for interoffice channel mileage⁽¹⁾ may also apply. (N)
- If the change involves the addition of other customer designated premises to an existing two-point service, resulting in a multipoint circuit configuration, the nonrecurring charge for the local channel rate element(s) being added will apply. - If the change involves the disconnection of customer designated premises from an existing multipoint circuit resulting in a two-point circuit configuration, no charges will apply.
- If the change involves the addition of an optional feature or function which has a separate nonrecurring charge, that nonrecurring charge will apply.
- If the change involves the conversion, or rollover, of DS1 High Capacity (a.k.a. BellSouth SPA DS1) service to LightGate service (a.k.a. BellSouth SPA Point to Point Network), made at a customer's request, then a separate nonrecurring charge(s), as appropriate, will apply to update the Network Channel Interface⁽²⁾ (NCI) code associated with each Voice Grade⁽¹⁾ (a.k.a. BellSouth SPA DS0 VG) and/or other sub-DS1 level circuit riding the channelized DS1 High Capacity (a.k.a. BellSouth SPA DS1) service(s) being rolled over. This charge will apply only where NCI code updates are requested by the customer. Payment of the nonrecurring charge(s) will be the responsibility of the customer who leases the channelized DS1 High Capacity (a.k.a. BellSouth SPA DS1) service(s) being rolled over. (N)
- If the change involves changing the type of signaling on a Voice Grade⁽¹⁾ (a.k.a. BellSouth SPA DS0 VG) service, a charge equal to the Voice Grade (a.k.a. BellSouth SPA DS0 VG) Local Channel rate element nonrecurring charge will apply. When more than one Local Channel with the same type of signaling has the same changes made at the same time between the same locations, for the same customer, the first Local Channel charge is billed at the First Service Installed charge and the other Local Channels are billed Additional Service Installed charges. These charges will apply per service termination affected.
- If the change involves an existing Dry Fiber ICB arrangement scheduled to terminate on August 5, 1991, which converts to the standard tariffed dry fiber offering in compliance with the FCC's Memorandum Opinion and Order in FCC Docket 88-136, released July 19, 1991, associated nonrecurring charges will be waived provided that the customer's conversion request is received by August 5, 1991.

In addition, requests to move, add or change existing service arrangements will not be accepted. In addition, service reconfiguration charges are applicable per customer request and circuit moved as contained in 7.5.17 following. Service will not be available simultaneously at both the original and new customer locations. Additional cooperative end-to-end testing is available and will be conducted by the Telephone Company at a customer's request at rates and charges contained in 13.3.5(B) following. ACCESS SERVICE

7 - Special Access (a.k.a. BellSouth SPA) Service (Cont'd)

7.4 Rate Regulations (Cont'd)

7.4.7 Facility Hubs

A customer has the option of ordering analog or digital high capacity facilities (i.e., Group, Supergroup, Mastergroup, DS1, DS1C, DS2, DS3, STS-1, OC-3, OC-12, OC-48, or OC-192) to a facility Hub for channelizing to individual services requiring lower capacity facilities (e.g., Digital Data Access⁽²⁾ (a.k.a. BellSouth SPA DSO Digital Data) service, Voice⁽²⁾ (a.k.a. BellSouth SPA DSO VG), Program Audio⁽¹⁾⁽³⁾ (a.k.a. BellSouth SPA Program Audio), etc.).

Different locations may be designated as Hubs for different facility capacities, e.g., channelization from digital to digital may occur at one location while channelization from digital to analog may occur at a different location. When ordering, the customer will specify the desired channelization Hub(s) selected from the NATIONAL EXCHANGE CARRIER ASSOCIATION, INC. TARIFF F.C.C. No. 4. This tariff identifies the type(s) of channelization functions which are available and the serving wire centers at which they are available.

Some of the types of channelization available include the following:

- from higher to lower bit rate
- from higher to lower bandwidth
- from digital to voice frequency channels

End to end services may be provided on channels of these facilities to a Hub. The transmission performance for the end to end service provided between customer designated premises will be that of the lower capacity or bit rate. For example, when a 1.544 Mbps facility is channelized to voice frequency channels, the transmission performance of the channelized services will be Voice Grade (a.k.a. BellSouth SPA DSO VG), not High Capacity (a.k.a. BellSouth SPA High Capacity).

The Telephone Company will commence billing the monthly rate for the facility to the Hub on the date specified by the customer on the service order. Individual services utilizing these facilities may be installed coincident with the installation of the facility to the Hub or may be ordered and/or installed at a later date, at the option of the customer. The customer will be billed for a Voice Grade or a high capacity analog or digital Local Channel, Interoffice Channel⁽⁴⁾ (when applicable) and the Basic Channelization System at the time the facility is installed. DS1 and DSO Basic Channelization Systems require a Central Office Channel Interface⁽⁴⁾ for activation of each lesser capacity channel. Individual service rates (by service type) will apply for a Local Channel, Central Office Channel Interface(s)⁽⁴⁾, and/or an additional Interoffice Channel⁽⁴⁾ (as required) for each channelized service. These will be billed to the customer as each individual service is installed. (N) (N) (N)

ACCESS SERVICE

7 - Special Access (a.k.a. BellSouth SPA) Service (Cont'd)

7.4 Rate Regulations (Cont'd)

7.4.7 Facility Hubs (Cont'd)

Cascading channelization occurs when a high capacity (a.k.a. BellSouth SPA High Capacity) analog or digital channel is channelized to provide channels with a lesser capacity and one of the lesser capacity channels is further channelized. For example, a Supergroup facility is channelized to five Group facilities and then one of the Group facilities is further channelized to individual Voice Grade (a.k.a. BellSouth SPA DSO VG) channels.

When cascading channelization is performed, whether in the same or a different Hub, a charge for the additional Basic Channelization System and Central Office Channel Interface(s)⁽⁴⁾ also applies. A DS1 (a.k.a. BellSouth SPA DS1) Basic Channelization System and DDAS⁽²⁾ (a.k.a. BellSouth SPA DSO Digital Data) Central Office Channel Interface⁽⁴⁾ are required for high speed or low speed DDAS⁽²⁾ (a.k.a. BellSouth SPA DSO Digital Data) activations when channelized from a DS1 (1.544 Mbps) channel. A DSO Basic Channelization System and Subrate Central Office Channel Interface⁽⁴⁾ are required for subrate activations of 2.4, 4.8 and 9.6 Kbps when channelized from a DSO⁽²⁾ (64 Kbps) channel. When cascading channelization is performed at different Hubbing locations, Interoffice Channel⁽⁴⁾ charges also apply between the Hubs. (N)

Although not requiring channelization, the Telephone Company will designate certain Hubs for Program Audio⁽¹⁾⁽³⁾ (a.k.a. BellSouth SPA Program Audio) service. A customer can order full-time and/or part-time service(s) between customer designated premises and a Hub and will be billed accordingly at the rates set forth in Section 7.5.4 for the full-time or part-time service, as appropriate. At the request of a customer, the full-time and/or part-time services provided to the Hub may be connected together in the following configurations: full-time to full-time, full-time to part-time or part-time to part-time. The customer will be charged for each such connection made at the rates for Other Labor as set forth in Section 13.2.6(C). The rates that apply for the service between each customer designated premises and the Hub are a Central Office Channel Interface⁽⁴⁾, Local Channel, and Interoffice Channel⁽⁴⁾, if applicable. In addition, rates for optional features and functions may be applicable. (N)

7.4.8 Shared Use Analog and Digital High Capacity (a.k.a. BellSouth SPA High Capacity) Services

Shared use occurs when Special Access (a.k.a. BellSouth SPA) service and BellSouth SWA service are provided over the same High Capacity Special Access facility through a common interface⁽⁴⁾. The Special Access monthly rate for the Local Channel, Interoffice Channel⁽⁴⁾, if applicable Basic Channelization System and Central Office Channel Interface (s)⁽⁴⁾ will apply, regardless of whether any individual channels of the shared Special Access (BellSouth SPA) facility are used for Special Access (BellSouth SPA) service, BellSouth SWA service, or any other type of service. The practice known as "ratcheting" (to apply non-Special Access rates on a proportional basis) shall not apply in any circumstance (N)

7.4.9 LightGate Service (a.k.a. BellSouth SPA Point to Point Network)

Rates and charges are specified in 7.5.9 following for LightGate service (a.k.a. BellSouth SPA Point to Point Network). System rates provide system capacity and channel interfaces⁽¹⁾. Local channel systems include the transport common equipment, and first half air-mile of local channel facilities and additional lengths of local channel facilities. These rates are specified in 7.5.9(A)(3) following. Separate Alternate Facility Transport (SAFT), options for LightGate service (a.k.a. BellSouth SPA Point to Point Network), local channel system rates are offered at the rates specified in 7.5.9.A. (3)(u), (aq) and (bc) following. These rates are in addition to local channel system rates. Interoffice channel⁽¹⁾ system mileage rates and charges are as specified in 7.5.9(B)(5) following. (N)

DS3 and/or DS1 channel interfaces⁽¹⁾ are required for asynchronous LightGate service (a.k.a. BellSouth SPA Point to Point Network) local channel systems at both the customer and central office locations. DS3 channel interfaces⁽¹⁾ are not required in connection with the provision of DS1 channel interfaces⁽¹⁾ at a system's termination location. LightGate services (a.k.a. BellSouth SPA Point to Point Network) channel interfaces⁽¹⁾ are only offered in conjunction with a LightGate service (a.k.a. BellSouth SPA Point to Point Network) system. The resulting number of DS1 and DS3 channels provided by a system may not exceed the capacity of the system ordered. A minimum of four DS1 or one DS3 channel(s) is (are) required to maintain a system in service. (N)

7.4.9 LightGate Service (a.k.a. BellSouth SPA Point to Point Network) (Cont'd)

Customers may request a C-Bit Parity framing format for a DS3 level circuit. If the request is made at the time the circuit is installed, there is no additional charge. When a request for C-Bit Parity framing format is made for an existing circuit, a nonrecurring charge will be applicable for rearranging the framing format on the circuit. This charge will also be applicable if a customer requests that the C-Bit Parity framing format be removed from a circuit. This charge is specified in 7.5.17 following and is applied on a per circuit basis.

LightGate 3 (a.k.a. BellSouth SPA Point to Point Network 12 DS3 Capacity), LightGate 4 (a.k.a. BellSouth SPA Point to Point Network 24 DS3 Capacity) service local channel systems require a 28 DS1 system channel interface⁽¹⁾ and DS1 channel interfaces⁽¹⁾ to derive DS1 channels. When a collocater desires to derive DS1's from a Virtual Access Cross Connect Service, Physical Access Cross Connect Service, Intra-Office Collocation Cross Connect Service, a LightGate 1 service (a.k.a. BellSouth SPA Point to Point Network) local channel system is not required. However the customer is required to pay the charge for the 28 DS1 channel system channel interface⁽¹⁾ in addition to the DS1 central office interfaces⁽¹⁾. (N)

DS1 or DS3 channels provided by interoffice channel(1) systems must be combined with corresponding channels in local channel systems or ^{may} be a stand-alone link when connected with BellSouth Customer Network Management Service, or voice grade (a.k.a. Customers must designate, at the time service is ordered, the association of any DS3 or DS1 channels in a LightGate service (a.k.a. BellSouth SPA Point to Point Network) interoffice⁽¹⁾ system with corresponding DS3 or DS1 channels in a LightGate service (a.k.a. 7.4 Rate Regulations (Cont'd)

7.4.9 LightGate Service (a.k.a. BellSouth SPA Point to Point Network) (Cont'd)

LightGate service (a.k.a. BellSouth SPA Point to Point Network) is available at month-to-month rates, with a four month minimum service period for all associated rate elements. However, local channel systems with SAFT levels I or II reliability, have a 4-month minimum service period. Service is also available under a Transport Payment Plan (TPP), or Channel Services Payment Plans (CSPP) A, (24-48 Months), B (49-72 Months), or C (73-96 Months) as specified in Section 2.4.8 preceding, except as modified following:

- (A) All rate elements associated with a LightGate service (a.k.a. BellSouth SPA Point to Point Network) local channel system or a interoffice channel⁽¹⁾ system must be provided under the same TPP or CSPP arrangement; provided, however, that channel interfaces⁽¹⁾ may be provided under a monthly rate arrangement which is greater than, equal to or less than the payment plan for the associated local channel or interoffice channel⁽¹⁾. (N)
(N)
- (B) A termination liability charge will be applicable for LightGate service (a.k.a. BellSouth SPA Point to Point Network) rate elements provided under a CSPP arrangement that are disconnected prior to the end of the chosen service period. The termination liability charge is equal to the number of months remaining in the service period multiplied by 60% of the monthly rates for the rate elements disconnected. LightGate service (a.k.a. BellSouth SPA Point to Point Network) rate elements provided under a TPP arrangement that are disconnected prior to the end of the chosen service period will incur termination liability in accordance with Section 2.4.8. preceding. The following exceptions apply:
 - (1) No Termination Liability Charge will be applicable for a LightGate service (a.k.a. BellSouth SPA Point to Point Network) when the customer replaces an existing CSPP arrangement with a new TPP arrangement for the same or larger system(s) and all associated rate elements at the same location(s) for a service period equal to or greater than the time remaining on the existing CSPP arrangement. 7.4.9 LightGate Service (a.k.a. BellSouth SPA Point to Point Network) (Cont'd)

LightGate (a.k.a. BellSouth SPA Point to Point Network) service links may be connected together, or links may be connected to BellSouth Customer Network Management Service to Voice Grade (a.k.a. BellSouth SPA DS0 VG) services through hubbing applications. Individual DS1 and DS3 channel link configurations may be installed, maintained, and disconnected as desired without affecting separate links.

A LightGate (a.k.a. BellSouth SPA Point to Point Network) service system is not required to have the same payment plan arrangement as other LightGate (a.k.a. BellSouth SPA Point to Point Network) service systems to which it is connected. However, when a DS1 or DS3 channel within a LightGate (a.k.a. BellSouth SPA Point to Point Network) service interoffice channel⁽¹⁾ is combined as a single link with a DS1 or DS3 channel within a LightGate (a.k.a. BellSouth SPA Point to Point Network) service local channel, the LightGate (a.k.a. BellSouth SPA Point to Point Network) service interoffice channel⁽¹⁾ system and associated interfaces⁽¹⁾ must be obtained under the same payment plan arrangement as the LightGate (a.k.a. BellSouth SPA Point to Point Network) service local channel system, or under month-to-month rates as desired by the customer. (N)

All LightGate (a.k.a. BellSouth SPA Point to Point Network) service local channel systems may be upgraded to a larger capacity LightGate (a.k.a. BellSouth SPA Point to Point Network) service local channel system without requirement to disconnect existing DS1 or DS3 channel services. DS1 channel interfaces⁽¹⁾ in a LightGate 1 (a.k.a. BellSouth SPA Point to Point Network 1 DS3 Capacity) or 2 (a.k.a. BellSouth SPA Point to Point Network 3 DS3 Capacity) service local channel system must include the rates and charges for associated DS1 channel systems when upgraded to LightGate 3 (a.k.a. BellSouth SPA Point to Point Network 12 DS3 Capacity), LightGate 4 (a.k.a. BellSouth SPA Point to Point Network 24 DS3 Capacity) or higher local channel systems. Upgrades of systems will incur a new four month minimum service period when ordered at month-to-month rates for upgraded rate elements. Upgraded systems provided with SAFT Levels I or II reliability incur a new 12 month minimum period. Upgraded systems provided under rate stabilized Channel Services Payment Plan rates and charges are subject to the terms preceding. (N)

SMARTPath Area Junction connections will receive the same rate treatment for credits and shortfall charges as long as the associated SMARTPath Area Connection qualifies under the ACP. ACP termination liability charges will be calculated using the SMARTPath Area Connection and the Central Office SMARTPath Area Junction rates. The ACP shortfall charge will not apply for 12 months after SMARTPath service (a.k.a. BellSouth SPA DS1 Shared Ring) first becomes available in an ACP billing area.

Termination liability charges for SMARTPath service (a.k.a. BellSouth SPA DS1 Shared Ring) under CSPP or ACP will be calculated using the procedures for DS1 High Capacity service (a.k.a. BellSouth SPA DS1), as specified in 7.4.16(A) and 2.4.8(B) preceding, respectively.

The rates applicable to a month-to-month payment plan are subject to Telephone Company initiated changes. Rates stabilized under an ACP arrangement are exempt from Telephone Company initiated increases, however, decreases for any rate element will automatically flow through to the customer.

Customers may request a C-Bit Parity framing format for a DS3 level circuit. If the request is made at the time the circuit is installed, there is no additional charge. When a request for C-Bit Parity framing format is made for an existing circuit, a nonrecurring charge will be applicable for rearranging the framing format on the circuit. This charge will also be applicable if a customer requests that the C-Bit Parity framing format be removed from a circuit. This charge is specified in 7.5.17 following and is applied on a per circuit basis.
