ACCESS SERVICE

29. Dedicated SONET Ring Service29.1 General Description(A) Basic Service Description

Dedicated SONET Ring OC-3, OC-12 and OC-48 Service provides customers with a dedicated custom network. Dedicated SONET Ring Service is based on Synchronous Optical Network (SONET) Uni-Directional Path Switched Ring (UPSR) technology. The network is in a ring architecture including sub-rings designed to provide increased reliability and functionality connecting multiple customer designated locations and specified Telephone Company Central Offices (COs) via self-healing network designs. The dedicated ring can connect multiple (between 2 and 16) customer-designated locations and telephone company central offices, where SONET facilities and equipment are available. The Dedicated SONET Ring services will interface with other compatible Telephone Company provided Special Access Services as provided by the Tariff (i.e. DS1, DS3).

Rates and charges for Dedicated SONET Ring Service are set forth in Section 29.4 following, with the exception of the services provided by the Telephone Company in the Metropolitan Statistical Areas (MSAs) in which the Telephone Company has received Phase II pricing flexibility pursuant to Subpart H of Part 69 of the Commission's Rules. The rates and charges for the Dedicated SONET Ring Service in the MSAs that have received Phase II pricing flexibility are set forth in Section 39.

(N)
|
(N)

Rate elements include nodes, ports, mileage between nodes and regenerators. Rates are specified in Section 29.4 following.

(B) Service Provisioning(1) Manner of Provisioning

All customers will be served from the nearest suitably equipped end office. Information pertaining to end offices equipped to provide Dedicated Ring Service is set forth in the National Exchange Carrier Association, Inc. (NECA) Tariff F.C.C. No. 4. Dedicated SONET Ring Service will be provided subject to the availability and limitations of The Telephone Company's wire centers and outside plant facilities. Dedicated SONET Ring Service is only available where technical capabilities permit such facility distance and type of physical plant. Where facilities are not available, Special Construction charges may apply.

(2) Limitations

The Telephone Company does not undertake to originate data, but offers the use of its Dedicated SONET Ring Service, where available, to customers for the purpose of transporting data originated by the customer or a third party.

(This page filed under Transmittal No. 2951)

ACCESS SERVICE

29. Dedicated SONET Ring Service (Cont'd)

(N)

29.1 General Description (Cont'd)(B) Service Provisioning (Cont'd)(3) Allowance for Service Interruptions

Dedicated SONET Ring Service provides Automatic Protection Switching to assure 100 percent availability of the services on the ring. A service interruption will result in a credit equal to one month's bill for the individual port-to-port connection involved. An interruption of service will start when an inoperative service is reported to the Telephone Company and end when the service is operative. In any month, as a result of an interruption, the total credit per rate element of the interrupted service may not exceed 100 percent of the monthly charge for that particular rate element.

In the event that protected facilities do not exist (including dual entrance facilities) and the customer does not utilize Special Construction to provide protected facilities, the unprotected dedicated ring will be provided. In addition, the customer waives the right to receive the SAWS credit allowance, as described in Section 2.5.7, preceding.

(C) Responsibility of The Telephone Company

The Telephone Company will provision and maintain Dedicated SONET Ring Service for the customer up to and including the Network Interface (NI).

(D) Rights of The Telephone Company

The Telephone Company will not provision Dedicated SONET Ring Service if it has reasonably determined that (a) it is not technically feasible over existing facilities or (b) it will cause interference problems within The Telephone Company's network or other facilities.

During The Telephone Company's network maintenance and software update period, it may be necessary to temporarily place the Dedicated SONET Ring Service central office equipment out of service. The Telephone Company also reserves the right to temporarily interrupt Dedicated SONET Ring Service at other times in emergency situations.

(N)

(This page filed under Transmittal No. 2846)

(T)

ACCESS SERVICE

29. Dedicated SONET Ring Service (Cont'd)29.1 General Description (Cont'd)(E) Responsibility of Customer

The customer is responsible for providing compatible customer provided equipment (CPE) that is used for connection to Dedicated SONET Ring Service.

29.2 Technical Specifications

Technical specifications for Dedicated SONET Ring Service are listed in the following Telephone Company publications:

- TP 76635 High Capacity Digital Service Self-Healing Transport Network Specifications and Transmission Limits
- TP 76839 SONET Transmission Requirements Performance and Interface Specifications
- AM TR-NIS-000111 Ameritech OC-3, OC-12, OC-48 and OC-192 Service Interface Specifications

Dedicated SONET Ring Service offers the following SONET (Synchronous Optical Network) based Interfaces:

DS1 1.544 Mbps
DS3 44.736 Mbps
EC-1 51.84 Mbps
OC-3 155.520 Mbps
OC-3c 155.520 Mbps (concatenated)
OC-12 622.080 Mbps
OC-12c 622.080 Mbps (concatenated)
OC-48 2488.32 Mbps

(N)

29.3 Rate Regulations(A) Rate Elements(1) Nodes

The ring will provide connectivity to multiple customer designated locations (nodes). However, a ring must have a minimum of two nodes, excluding sub-ring nodes. At least one node must be a Telephone Company Central Office (CO) node. A maximum of 16 nodes including regenerators will be allowed per ring.

The Telephone Company reserves the right to determine the order of the nodes on the ring.

(This page filed under Transmittal No. 3063)

ACCESS SERVICE

29. Dedicated SONET Ring Service (Cont'd)29.3 Rate Regulations (Cont'd)

(N)

(A) Rate Elements (Cont'd)(1) Nodes (Cont'd)

When a customer premises node is located in the same building as a CO node, diversity between the two nodes may not be available.

If a customer collocates two customer premises nodes of the same speed, on the same dedicated ring, on the same premises, the additional node will be billed as shown in Section 29.4.

If a customer has one or more additional OC-48 Dedicated SONET Rings within a LATA, the Customer Premises Node, Central Office Node and the OC-48 Add/Drop Capability rate elements utilized on the additional OC-48 Dedicated SONET Ring(s) and co-located with like primary OC-48 Dedicated Ring rate elements as described below will be billed as "Plus" as shown in 29.4 following. All existing requirements associated with Dedicated SONET Ring Service apply to additional rings. The eligibility requirements for the "Plus" rates are as follows:

The primary dedicated ring is defined as the dedicated SONET ring with the earliest installation date. If the primary dedicated SONET ring is terminated by the customer and the customer still has two or more dedicated SONET rings, the remaining dedicated SONET ring with the earliest installation date will be designated as the new primary dedicated SONET ring. If there are any additional dedicated rings, the nodes and add/drop capability that are common with the new primary dedicated SONET ring will be billed as "Plus" nodes and "Plus" add/drop capability.

If the primary OC-48 Dedicated SONET Ring has either two or three nodes, then at least two nodes (excluding sub-ring nodes) with separate addresses must be common between the primary OC-48 Dedicated SONET Ring and the additional OC-48 Dedicated SONET Ring(s). At least one of the common nodes must be a customer premise node and at least one of the nodes must be a central office node.

(N)

(This page filed under Transmittal No. 2846)

ACCESS SERVICE

29. Dedicated SONET Ring Service (Cont'd)

(N)

29.3 Rate Regulations (Cont'd)(A) Rate Elements (Cont'd)(1) Nodes (Cont'd)

If the primary OC-48 Dedicated SONET Ring has four or more nodes, then at least three nodes (excluding sub-ring nodes) with separate addresses must be common between the primary OC-48 Dedicated SONET Ring and the additional OC-48 Dedicated SONET Ring(s). At least one of the common nodes must be a customer premise node and at least one of the nodes must be a central office node.

The customer will be billed time and material as set forth in Section 13 preceding for any additional charges incurred by the Telephone Company in locating Telephone Company equipment at the customer premises.

(a) Direct Drop Node

An optional Direct Drop Node (DDN) is available on an OC-12 Dedicated ring. This node has direct add/drop capability not to exceed 3 DS3s or its equivalent.

The remaining bandwidth of the OC-12 ring continues on through the Node to another drop point on the ring. Use of the Direct Drop Node allows customers to drop DS1s directly from the Node without the need for the Optical to Electrical DS1 Add/Drop Capability option.

OC-12 nodes and OC-12 DDNs may be used together in making up an OC-12 dedicated ring. A DS1 that enters the ring via a port on a Direct Drop Node must also exit via a port on another Direct Drop Node (DDN on - DDN off). A DS3 that enters the ring via a port on a Direct Drop Node may exit via a port on either a Direct Drop Node or OC-12 node. Direct Drop Node is not available in a two-node ring configuration.

(b) Sub-Ring Node

A sub-ring node is a lower speed optical extension off a main ring. It traverses one or more main ring nodes via the use of OC-N port connections on and off the main ring. The primary use of sub-ring nodes is to provide the ability to fully utilize the bandwidth around the ring when the customer requires DS1/VT1.5 circuit paths.

(N)

(This page filed under Transmittal No. 2846)

ACCESS SERVICE

29. Dedicated SONET Ring Service (Cont'd)

(N)

29.3 Rate Regulations (Cont'd)(A) Rate Elements (Cont'd)(1) Nodes (Cont'd)(b) Sub-Ring Node (Cont'd)

An optional sub-ring node is available at OC-3 and OC-12 speeds from an OC-48 main ring and OC-3 speed from an OC-12 main ring. A sub-ring node may only connect to the main ring at the same or an adjacent main ring node. A sub-ring node may not connect directly to another sub-ring node.

Any service that enters the main ring via a port on a sub-ring node must also exit via a port on another sub-ring node (sub-ring on - sub-ring off). Cascading sub-rings are not allowed off a main ring. Service circuits may not be established between sub-ring nodes connecting to the same main ring node or between a sub-ring node and a port on the same main ring node to which it connects.

Each sub-ring must be implemented as an OC-M on an OC-N ring with full complement of STS-1s, STS-3s or STS-12s depending on the bandwidth of the sub-ring, appearing together at all associated sub-ring nodes on a given sub-ring.

OC-3 sub-rings and OC-12 DDNs may not be combined on an OC-12 main ring. OC-12 sub-rings and OC-12 DDNs may be combined on a sub-ring connected to an OC-48 main ring.

Two OC-N ports and associated node charges apply for each sub-ring node connected to the main ring, as well as applicable mileage for the sub-ring applies.

A sub-ring node which is co-located with a main ring node at the customers premises (for the same dedicated ring) will be billed as an "Additional Node" per 29.4 (A) following. A sub-ring is not available with a two-node main ring configuration.

Effective: September 29, 2000

One Bell Plaza, Dallas, Texas 75202

ACCESS SERVICE

29. Dedicated SONET Ring Service (Cont'd)29.3 Rate Regulations (Cont'd)(A) Rate Elements (Cont'd)(2) OC-48 Add/Drop Capability

This provides the capability to add/drop lower speed channels from an OC-48 Dedicated Ring node location via OC-12, OC-3, EC-1, DS3, 100 Mbps Ethernet and 1 Gbps Ethernet ports. OC-48 Add/Drop Capability at an OC-48 Dedicated SONET Ring Service node location will support any combination of service traffic not to exceed 48 STS-1 equivalents.

OC-48 Add/Drop Capability associated with OC-48 Dedicated SONET Ring nodes that qualify as "Plus" nodes as defined in 29.3(A)(1) preceding will be billed as "Plus" as shown in 29.4 following.

For OC-48 SONET Rings established prior to 03/24/05, the Add/Drop capability charge is applied per node. Customers may upgrade their existing ring provided that new TPP is equal to or greater than their existing TPP and the new MRC revenue is equal to or greater than their existing MRC revenue.

For OC-48 SONET Rings established after 03/24/05, the Add/Drop capability charge is applied only once and only when the 25th DS-3 port is applied per node.

(3) Ports

Lower speed channels are accessible at nodes via port terminations. Ports provide access to lower-speed services at each node (e.g. DS1, DS3, EC-1, OC-3, OC-12, 100 Mbps Ethernet, 1 Gbps Ethernet and possibly OC-12 or OC-48, depending on the bandwidth of the ring). Port configuration requirements are provided by the customer when the Dedicated SONET Ring service is ordered. The capacity of the selected OC-3, OC-12 or OC-48 Dedicated SONET Ring service is determined by the number of individual port-to-port connections available between all nodes on the ring.

(This page filed under Transmittal No. 3063)

ACCESS SERVICE

29. Dedicated SONET Ring Service (Cont'd)29.3 Rate Regulations (Cont'd)(A) Rate Elements (Cont'd)(3) Ports (Cont'd)

Accepted interfaces are as follows:

	OC-3 Node	OC-12 Node	OC-48 Node
DS1 Ports	X (Max. 84/Node)	X ⁽¹⁾ (Max. 84/OC-3 Port)	X ⁽¹⁾ (Max. 84/OC-3 Port)
DS3 Ports	X (Max. 3/Node)	X (Max. 12/Node)	X (Max. 48/Node)
EC-1 Ports	X (Max. 3/Node)	X (Max. 12/Node)	X (Max. 48/Node)
OC-3 Ports	X (Max. 1/Node)	X (Max. 4/Node)	X (Max. 16/Node)
OC-12 Ports	N/A	X (Max. 1/Node)	X (Max. 4/Node)
OC-48 Ports	N/A	N/A	X (Max. 1/Node)
100 Mbps (STS-1)) Ethernet Port	X (Max. 3/Node)	X (Max. 12/Node)	X (Max. 48/Node)
100 Mbps (STS-3c) Ethernet Port	N/A	X (Max. 4/Node)	X (Max. 16/Node)
1 Gbps (STS-1) Ethernet Port	N/A	X (Max. 12/Node)	X (Max. 32/Node)
1 Gbps (STS-3c) Ethernet Port	N/A	X (Max. 4/Node)	X (Max. 16/Node)
1 Gbps (STS-12c) Ethernet Port	N/A	N/A	X (Max. 4/Node)
1 Gbps (STS-24c) Ethernet Port	N/A	N/A	X (Max. 2/Node)

(N)
(N)
(N)

By using the existing OC-3 or OC-12 Service and cross-connection capability, OC-3 point-to-point service may connect to an OC-3 port of an OC-12 or OC-48 ring or OC-12 point-to-point service may connect to an OC-12 port of an OC-48 ring located in a Telephone Company CO.

An OC-3 port will permit the connection of STS-1 channels to other STS-1 channels across the OC-12 or OC-48 Dedicated SONET Ring Service subject to the overall ring capacity limits described in 29.3(A)(7), following. Also, an STS-1 channel with DS1 payload mapping accessing an OC-12 Dedicated SONET Ring using an OC-3 port may be connected to the Optical to Electrical DS1 add/drop capability for the purpose of connecting up to 28 DS1 ports. An STS-1 channel with DS3 payload mapping accessing the OC-12 or OC-48 Dedicated SONET Ring using an OC-3 port may individually connect to a DS3 or EC-1 port.

DS1 ports, DS3 ports, EC-1 and STS-1 channels within OC-3 ports may not connect to any other ports within the same node. All other port-to-port connections are allowable except for DS3 or EC-1 port to DS1 port connections. If a DS3 or EC-1 to DS1 connection is required, it may be accomplished by the customer's CPE or through the current multiplexing environment of DS3, EC-1, and DS1 services.

(1) Optical to Electrical DS1 Add/Drop Capability as described in 29.3(A)(5) following is needed along with an OC-3 port unless the customer has chosen an OC-12 DDN.

(This page filed under Transmittal No. 3063)

Issued: May 13, 2005

Effective: May 28, 2005

One SBC Plaza, Dallas, Texas 75202

ACCESS SERVICE

29. Dedicated SONET Ring Service (Cont'd)29.3 Rate Regulations (Cont'd)(A) Rate Elements (Cont'd)(4) Mileage

Mileage is the total airline distance between the serving wire center of each node involved on the ring. A one-mile minimum will be billed between nodes. A two-node ring configuration has a two-mile minimum - one mile from the wire center node to the customer premises node, and one mile from the customer premises node to the wire center node.

(5) Optical to Electrical DS1 Add/Drop Capability

This option allows an electrical DS1 to be derived from an optical OC-12 or OC-48 ring by using this capability to add/drop the electrical DS1 from an OC-3 port.

For SONET Rings established after 03/24/05, the Optical-to-Electrical DS-1 Add/Drop capability charge is applied when the 85th DS-1 port is purchased per OC-12 node. Additional charges will apply per each subsequent increment of 84 DS-1 ports.

(N)

|
(N)(6) Dedicated SONET Ring Regenerator

Regenerators provide essential detection and retransmission of SONET Optical 155.52 Mbps, 622.08 Mbps and 2488.32 Mbps signals between nodes. Regenerators will only be provided as required by the Telephone Company when actual fiber facility distances between nodes exceed inter-nodal design limits (typically 20 to 25 miles). Regenerators will be located exclusively in Telephone Company COs and do not allow ports to access customer service connections.

(This page filed under Transmittal No. 3047)

ACCESS SERVICE

29. Dedicated SONET Ring Service (Cont'd)

(N)

29.3 Rate Regulations (Cont'd)(A) Rate Elements (Cont'd)(7) Dedicated SONET Ring Connection Capacity

Maximum transport capacity of OC-3, OC-12 and OC-48 Dedicated SONET Ring Service is characterized by the total quantity of individual port-to-port connections allowed between all nodes on the ring. The DS3 Port connections shown below in this section can be exchanged with EC-1 Port connections.

For OC-3 Dedicated SONET Ring Service, the maximum ring capacity will be equal to one of the following combinations:

DS3 Port to DS3 Port Connections		DS1 Port to DS1 Port Connections
Three	and	None
Two	and	Up to 28
One	and	Up to 56
None	and	Up to 84

An OC-3 Sub-ring provided as part of OC-12 or OC-48 Dedicated SONET Ring Service has a maximum capacity equal to one of the above combinations.

For OC-3 Dedicated SONET Ring Service and OC-3 Sub-rings as part of OC-12 or OC-48 Dedicated SONET Ring Service, individual DS1 port-to-DS1 port and DS3 port-to-DS3 port connections capacities may be incrementally distributed between nodes on the ring in any manner.

(N)

(This page filed under Transmittal No. 2846)

ACCESS SERVICE

29. Dedicated SONET Ring Service (Cont'd)29.3 Rate Regulations (Cont'd)(A) Rate Elements (Cont'd)(7) Dedicated SONET Ring Connection Capacity (Cont'd)

For OC-12 Dedicated SONET Ring Service, the maximum ring capacity will be equal to one of the following combinations:

DS3 Port to DS3 Port Connections	DS1 Port to DS1 Port Connections
Twelve and None	
Eleven and One Group of 28	
Ten and Two Groups of 28 (56)	
Nine and Three Groups of 28 (84)	
Eight and Four Groups of 28 (112)	
Seven and Five Groups of 28 (140)	

Six and Six Groups of 28 (168)	
Five and Seven Groups of 28 (196)	
Four and Eight Groups of 28 (224)	
Three and Nine Groups of 28 (252)	
Two and Ten Groups of 28 (280)	
One and Eleven Groups of 28 (308)	
None and Twelve Groups of 28 (336)	

An OC-12 Sub-ring provided as part of OC-48 Dedicated SONET Ring Service has a maximum capacity equal to one of the above combinations.

For OC-12 Dedicated SONET Ring Service and OC-12 Sub-rings as part of OC-48 Dedicated SONET Ring Service, individual DS1 port-to-DS1 port connection capacities may be distributed only in incremental groups of 28 between any two nodes on the ring. Individual DS3 port-to-DS3 port connection capacities may be incrementally distributed between nodes on the ring in any manner.

For OC-12 Dedicated SONET Ring Service using OC-12 Direct Drop Nodes, the maximum ring capacity will be up to 84 DS1 port-to-port connections, together with up to 9 DS3 port-to-port connections (not to be added/dropped at the DDN), or equivalent. Individual DS1 port-to-port connections up to a total of 84 may be incrementally distributed between OC-12 Direct Drop Nodes on the ring in any manner.

ACCESS SERVICE

29. Dedicated SONET Ring Service (Cont'd)29.3 Rate Regulations (Cont'd)(A) Rate Elements (Cont'd)(7) Dedicated SONET Ring Connection Capacity (Cont'd)

For OC-48 Dedicated SONET Ring Service, individual DS1 port-to-DS1 port connection capacities may be distributed only in incremental groups of 28 between any two nodes on the ring. Individual DS3 port-to-DS3 port connection capacities may be incrementally distributed between nodes on the ring in any manner.

OC-48 Dedicated SONET Ring Service also provides capability for node-to-node connection of STS-1 or STS-3c channels using OC-3 or OC-12, 100 Mbps Ethernet and 1 Gbps Ethernet ports on the OC-48 ring. Each STS-1 to STS-1 channel connection or STS-1 channel to DS3 port connection requested by the customer reduces the remaining ring capacity by the equivalent of one DS3 port-to-port connection or 28 DS1 port-to-port connections. Each STS-3c to STS-3c channel connection requested by the customer reduces the remaining ring capacity by the equivalent of three DS3 port-to-DS3 port connections or 84 DS1 port-to-DS1 port connections.

An OC-3 Sub-ring provided as part of OC-48 Dedicated SONET Ring Service reduces the remaining OC-48 ring capacity by the equivalent of three DS3 port-to-DS3 port connections or 84 DS1 port-to-DS1 port connections.

OC-48 Dedicated SONET Ring Service also provides capability for node-to-node connections of STS-12c channels using OC-12 ports on the OC-48 ring. Each STS-12c to STS-12c channel connection requested by the customer reduces the remaining ring capacity by the equivalent of twelve DS3 port-to-DS3 port connections or 336 DS1 port-to-DS1 port connections.

An OC-12 Sub-ring provided as part of OC-48 Dedicated SONET Ring Service reduces the remaining OC-48 ring capacity by the equivalent of twelve DS3 port-to-DS3 port connections or 336 DS1 port-to-DS1 port connections.

Ethernet over SONET (EoS) allows the efficient transport of Ethernet frames using SONET. Ethernet ports will be available in bandwidths up to the Ethernet interface of 100 Mbps or 1 Gbps on Dedicated SONET Ring Service as set forth in Section 29. As SONET bandwidths will be preset, the customer will be unable to transmit data (including any bursts) beyond these preset SONET bandwidths. Interfaces of 100 Mbps Ethernet or 1 Gbps Ethernet are available only to customers with Next Generation SONET equipment.

ACCESS SERVICE

29. Dedicated SONET Ring Service (Cont'd)29.3 Rate Regulations (Cont'd)(C) Term Pricing Plan(1) General Description

Dedicated SONET Rings are available for either 36- or 60-month Term Pricing Plan (TPP) periods. Monthly recurring charges apply for the nodes, ports, mileage between nodes, and regenerators.

(x)

(x)

(2) Nonrecurring Charges

Nonrecurring Charges, as set forth in 29.4 following, will apply for those arrangements ordered under the Dedicated SONET Ring TPP. The Access Order Charge, as described in Section 5.3.1 preceding, does not apply.

(3) Rate Flow Through

Any decreases in recurring tariff rates will be passed on to customers who participate in the TPP. The Telephone Company will notify customers participating in the TPP when monthly rates are decreased.

Should the Telephone Company increase its rates during the TPP period, the customer will pay the increased rates as long as the increase does not exceed the original tariffed rate in effect at the time the customer established service under the TPP.

(4) Adding Nodes to the Ring

If a node is added after the initial installation of the dedicated ring, the new node will carry the same TPP rate as the initial ring and be co-terminus with that TPP. However, if a node is added during the last 12 months or less of a TPP, the customer will be billed the initial TPP ring rate for a minimum period of 12 months.

x Issued under authority of Special Permission No. 02-051 of the F.C.C. in order to restore currently effective provisions and to withdraw material filed under Transmittal No. 2888 without becoming effective.

ACCESS SERVICE

29. Dedicated SONET Ring Service (Cont'd)29.3 Rate Regulations (Cont'd)(C) Term Pricing Plan(5) Renegotiation

The customer may choose to terminate an existing TPP any time prior to the end of the 36- or 60-month period and negotiate a new TPP without termination liability provided the new TPP meets the following requirements:

- (a) The minimum period for the new TPP must be greater than the remaining period currently in effect and
- (b) The renegotiated TPP will be based on the current rates.

An existing 36 month TPP may be converted into a 60 month TPP without termination liabilities, provided that:

- the 36 month TPP has not ended, and
- the converted TPP must be based upon the rates that are currently in effect and otherwise available to all customers.

When the customer converts to a 60 month TPP, actual time in service for the original TPP will be applied to the new TPP. However, no credits or refunds will apply for the billing of actual time in service for the previous TPP.

(6) Renewal

- (a) The customer must provide the Telephone Company with a written notice of intent to renew a TPP no later than 60 days prior to its expiration.
- (b) The customer will continue to be billed at the current TPP rates.
- (c) The new TPP must be for a 36- or 60-month period.
- (d) If the customer does not renew the TPP or does not notify the Telephone Company of its intent to renew the TPP, the Customer's service will convert to the Monthly Extension rate until the customer cancels or renews the service with a new TPP term.

ACCESS SERVICE

29. Dedicated SONET Ring Service (Cont'd)29.3 Rate Regulations (Cont'd)(C) Term Pricing Plan (Cont'd)(7) Termination of Service

If a customer cancels a service order or terminates services before the completion of the term for any reason other than a service interruption, the customer agrees to pay the Telephone Company termination liability charges, which are defined below. These charges shall become due as of the effective date of the cancellation or termination and are payable within 30 days of the invoice date, subject to interest penalty on the unpaid balance.

(x)

(x)

Customer's termination liability for cancellation or termination of service shall be equal to:

- (a) All waived and/or unpaid nonrecurring charges, plus;
- (b) 50% of all recurring charges for the balance of the customer's term.

x Issued under authority of Special Permission No. 02-043 of the F.C.C. in order to restore currently effective provisions and to withdraw material filed under Transmittal No. 2881 without becoming effective.

(N)

29.3 Rate Regulations (Cont'd)(D) Moves(1) Moves within a Customer's Premises

A move involves a change in the physical location of the Point of Termination on the customer's premises. Such moves will be treated as an extension of Dedicated SONET Ring facilities. Extension of Dedicated SONET Ring facilities will be provided, at the customer's request, on a time-sensitive charge basis. The labor rates that apply are set forth in Section 13 preceding (Rates and Charges). There will be no change in the TPP term requirements.

(2) Moves of Dedicated SONET Ring Nodes

Moves of Dedicated SONET Ring nodes will be provided, at the customer's request, on a time-sensitive charge basis. The charge will not exceed the nonrecurring charge for subsequent installation, as specified in Section 29.4(A), for the specific Dedicated SONET Ring node being modified. The labor rates that apply are set forth in Section 13 preceding (Rates and Charges). No change in billing period is required.

Termination charges will not apply to moves of Dedicated SONET Ring nodes.

29.3 Rate Regulations (Cont'd)(E) Upgrades of Dedicated SONET Ring Service to higher speed services

Customers with 36 or 60 month TPPs may at any time upgrade to a higher speed service (e.g., OC-3 to OC-12), without incurring the Termination Liability charge, providing the following criteria are met:

- The customer subscribes to a new higher speed Term Pricing Plan period that is equal to, or greater than 36 months;
- The expiration date for the new Term Pricing Plan period is beyond the end of the original Term Pricing Plan period;
- No lapse in service occurs;
- Nonrecurring Charges will apply, when applicable;
- The monthly rates for the new service will be those rates in effect at the time the new service is installed;
- The new service is provided between the same customer locations and with the same customer of record as the disconnected service;
- The billed monthly recurring revenue for the new service is equal to or greater than the billed monthly recurring revenue remaining in the service being converted; and
- Spare facilities and equipment must be available or a nonrecurring upfront payment, which is a special construction charge, may apply.

ACCESS SERVICE

29. Dedicated SONET Ring Service (Cont'd)29.3 Rate Regulations (Cont'd)(F) Upgrade to Dedicated SONET Ring Service from Other Services

Customers may upgrade one of the following existing services to Dedicated SONET Ring Service without incurring the Termination Liability charges for those existing services as long as the minimum requirements in that section of the tariff for waiver of the Termination Liability charges of that section are met. The STN, BCS*, DS3, OCN Point-to-Point Service and ReliaNet Tariffs will depict applicable termination liability exemptions. (C)

The following services found in F.C.C. No. 73 may be upgraded to Dedicated SONET Ring:

- Self-Healing Transport Network (STN): Section 19.3.15.A.1.c
- Broadband Circuit Service (BCS)*: Section 35.2.J.4 (C)
- Megalink Custom (DS3): Section 20.4.6
- ReliaNet: Section 31.3.2.K.1.b
- Optical Carrier Network Point-to-Point: Section 40.2.I (N)

*This option is limited to existing customers at existing locations as of January 11, 2002 , 2001 (N)

Effective: January 11, 2002

One Bell Plaza, Dallas, Texas 75202

ACCESS SERVICE

29. Dedicated SONET Ring Service (Cont'd)29.3 Rate Regulations (Cont'd)(G) Shared Network Arrangement

A Shared Network Arrangement is a service offering that enables a customer ("Service User") to connect subtending services to an OC-3, OC-12 or OC-48 Dedicated SONET Ring service of another customer (the "Host Subscriber"), with the Telephone Company maintaining separate billing for each. Each customer will be billed for those rate elements associated with their own portion of the service configuration. The Host Subscriber will be responsible for all Dedicated SONET Ring Service rate elements (for example, node, ports and mileage, etc). Under no circumstances will the rates or charges for individual rate elements be split. This offering is limited to service configurations where a Service User orders a subtending service dropped from a Host subscriber's Dedicated SONET Ring wire center node.

Under the Shared Network Arrangement, the Telephone Company may share record information with the Host Subscriber pertaining to the services of other users of the shared network. Such disclosure will be under the sole discretion of the Telephone Company and is necessary to perform billing reconciliation and/or other functions required in connection with maintaining account records.

(H) Shared Use

Shared Use occurs when Switched Access and Special Access services are provided over the same analog or digital high capacity facility or SONET based service through a common interface. The regulations governing the provision of Shared Use are set forth in 6.8.12, preceding.

While Shared Use of SONET facilities (i.e., Dedicated SONET Ring Service) for Switched Access Transport is permitted, the SONET Special Access facilities continue to be rated as Special Access.

(This page filed under Transmittal No. 2855)

Issued: January 16, 2001

Effective: January 31, 2001

One Bell Plaza, Dallas, Texas 75202

ACCESS SERVICE

29. Dedicated SONET Ring Service (Cont'd)29.3 Rate Regulations (Cont'd)(I) Re-Map Service

Re-Map Service is provided in conjunction with Dedicated SONET Ring Service and allows for a pre-defined set of services to be rerouted by the Telephone Company from one customer premises node to another customer premises node (defined as a "Re-Map node") in the event of a customer premises disaster. Re-Map Service will be tested at initial installation and once each year thereafter. Additional testing can be requested and will be charged on a per test basis. Activation upon customer request in the event of an emergency will be charged on a per occurrence basis.

Once the customer notifies the Telephone Company that they are ready to receive signals to the re-map node site the Telephone Company will re-map up to 50 circuits within the initial hours and 20 circuits every hour thereafter. The Emergency Activation Nonrecurring Charge will not be applied if the first 50 circuits are not remapped within 4 hours due to a Telephone Company caused delay.

Re-Map testing or activation for OC-3 or OC-12 DDN service requires a minimum of one DS1 (VT1.5), or 1 DS3 (STS-1) between one customer premises node and the Re-Map node. Re-Map testing or activation for OC-12 or OC-48 service requires a minimum incremental group from 1 to 28 DS1s or one DS3 (equals one STS-1) between one customer premises node and the Re-Map node.

The emergency Re-Map activation configuration will be maintained for up to 30 days. After 30 days, if the customer wishes to maintain the emergency configuration, the emergency activation NRC will be applied once for each 30 day additional period.

(J) Ethernet over SONET (EoS)

Effective September 5, 2003, new orders for Dedicated SONET Ring Service with the EoS enhancement will be served by different equipment than the equipment used for customers who placed Dedicated SONET Ring Service orders that were completed prior to September 5, 2003. Customers subscribing to Dedicated SONET Ring Service prior to September 5, 2003 requesting a change to the new equipment will incur termination liability charges for their existing service. Disconnect of the existing Dedicated SONET Ring Service and placement of an order for new Dedicated SONET Ring Service with the EoS enhancement is required. The monthly rates for the new service(s) shall be those rates in effect at the time the new service(s) are installed.
