A112.12.15 ESSX Customer Administration Service

- A. General
1. The ESSX Customer Administration Service (ECAS) feature permits ESSX customers to activate/deactivate selected optional features, change certain service options, and change feature configurations on predesignated ESSX station lines. Customer provided terminal equipment is required for the operation of the ECAS feature.
 2. For ECAS equipped station lines, ECAS allows the customer to verify and/or display the assignment of features on a single station line, range of station lines or all station lines to determine which station or stations have a particular feature or service option.
 3. Certain ESSX station lines may be specified by the customer to be exempt from this feature. Additionally, the Company reserves the right to make station lines inaccessible for ECAS.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(T)

A112.12 ESSX Small, Medium and Large Service - 85 (Cont'd)

A112.12.15 ESSX Customer Administration Service (Cont'd)

A. General (Cont'd)

4. Changing the status of a station line from accessible to ECAS to inaccessible or vice versa, must be done by the Company via a Service Order request. Appropriate Service Order charges specified in Section A4. apply.
5. The Company has made the following provisions to protect the integrity of the switching system database and to ensure the security of ECAS changes.
 - a. An ECAS customer's change, display or verify capabilities are restricted to that particular customer's own ESSX system.
 - b. All changes are audited as they are entered by the ECAS customer. Invalid changes will not be accepted. An error message detailing which command is in error will be given.
 - c. Customer access to the database is protected using dialup, login, password/dialback arrangement.
6. An ECAS customer can schedule changes (individual or bulk) for completion by the next day or for a future day. Additionally priority changes may be requested and the changes completed the same day subject to *terms and conditions* in A112.12.15. (T)
7. Definitions pertaining to ECAS/ESSX features are specified in Section A112.26.3. (T)
8. The ECAS feature allows the customer to perform the following transactions from the customer provided terminal:
 - a. Change particular service options on a per station basis and exchange station telephone numbers (TNs). The change capabilities are:
 - (1) Line Status (Active/Inactive)¹ (T)
 - (2) CAT Code
 - (3) Ringing Cycles for CFDA
 - (4) Call Pickup Group: The call pickup group to which a station is assigned can be changed on a per station basis.
 - (5) The Forward to Number can be changed for a station line with CFBL and/or CFDA assigned.
 - (6) Speed Call Group: The Speed Call group to which a station is assigned can be changed on a per-station basis.
 - (7) Series Completion "Hunt To" Telephone Number (TN): The "hunt to" TN assigned to a station line can be changed on a per station basis² (T)
 - (8) Station TN Rearrangement: Swap TNs from one location to another
 - (9) Facility Restriction Levels
 - (10) Access Line Class of Service (M)
 - (11) Add/Change Customer Entered Listing Information (M)

Note 1: Station lines made inactive using ECAS will continue to be billed at the *guidebook* rates. (T)

Note 2: All numbers in series completion hunt must be in the same common block. (T)

A112.12 ESSX Small, Medium and Large Service - 85 (Cont'd)

A112.12.15 ESSX Customer Administration Service (Cont'd)

A. General (Cont'd)

8. The ECAS feature allows the customer to perform the following transactions from the customer provided terminal:
(Cont'd)

(M)

b. Activate/deactivate the following features and service options on a single station line basis:

- (1) Automatic Callback Calling
- (2) Call Forwarding Busy Line
- (3) Call Forwarding Don't Answer
- (4) Call Forwarding Variable
- (5) Call Forwarding Variable - Outside
- (6) Call Hold
- (7) Call Pickup
- (8) Call Waiting Originating
- (9) Call Waiting Terminating
- (10) Dial Call Waiting
- (11) Directed Call Pickup - Barge In
- (12) Directed Call Pickup - Non Barge In
- (13) Speed Calling - 6
- (14) Speed Calling - 30
- (15) Basic Station Line Hunting (Series Completion)¹
- (16) Inhibit ETS queuing

(T)

c. The following information can be displayed to aid in system management.

- (1) The configuration of a single ESSX station line (i.e., service options and active station line features)
- (2) The number of stations having or not having a particular feature
- (3) Pending TN swaps
- (4) The series completion sequence of a station line

Note 1: Deactivating Basic Station Line Hunting may disrupt the normal completion order of a Hunt Group.

A112.12 ESSX Small, Medium and Large Service - 85 (Cont'd)

A112.12.15 ESSX Customer Administration Service (Cont'd)

A. General (Cont'd)

8. The ECAS feature allows the customer to perform the following transactions from the customer provided terminal: (Cont'd)
 - c. The following information can be displayed to aid in system management. (Cont'd)
 - (5) Selected Company entered information affecting customer station lines
 - (6) Customer Entered Listing Information
 - (7) The number of call pickup groups in the system
 - d. An ECAS customer may also print the following administrative reports.
 - (1) Configuration (i.e., service options, station features) for a single station line or span of ESSX station lines.
 - (2) A listing of all pending changes including the type of change and the scheduled effective date.
 - (3) Customer Entered Listing Information

The following information is included on all ECAS changeable station lines.

- Station Telephone Number
- Name^f
- Organization^f
- Location^f

(T)
(T)
(T)

- e. Initial training of the customer for up to four (4) system managers in the use of this feature is included at the time the feature is put into service. Communication counselor training is a prerequisite to the ECAS system manager training. Any customer training or subsequent assistance necessary after the initial establishment of the feature is at the option of the customer and a Subsequent Training Charge applies per hour where such training is provided.

B. Terms and Conditions

(T)

1. ECAS is provided only with ESSX systems served from a No. 1/1A ESS central office and is furnished subject to the availability of facilities.
2. Customers equipped for ECAS must order via a service order² ECAS changeable features in groups of five (5) at the rates specified in A112.12.15.
3. Non-ECAS changeable features with the exception of Three-Way Calling, Consultation Hold, Call Transfer All Calls will be added subject to the specifications and rates in A112.12.8, A112.12.9 or A112.12.10 as appropriate. Three-Way Calling, Consultation Hold, Call Transfer All Calls is offered in groups of five (5) at the rates specified in A112.12.15.

(T)

Note 1: The ECAS customer is responsible for entering and updating the information contained in this field.

(T)

Note 2: Appropriate Service Order charges specified in Section A4. will apply.

(T)

(T)

A112.12 ESSX Small, Medium and Large Service - 85 (Cont'd)

A112.12.15 ESSX Customer Administration Service (Cont'd)

B. *Terms and Conditions* (Cont'd)

(T)

4. Features for ECAS exempt station lines must be requested via a Service Order¹ and added by the Company. Rates and Charges for the features specified in A112.12.8, A112.12.9 or A112.12.10 apply as appropriate. (T)
5. The customer provided ECAS terminal equipment requires an ESSX main station line. Rates and charges in A112.12.8, A112.12.9 and A112.12.10 apply as appropriate.
6. ECAS changes must be entered prior to a time to be designated by the Company to be completed as priority changes or by the next day as requested by the customer.
7. An ECAS customer cannot activate features in excess of the quantity that has been ordered from the Company. The customer will receive an indication when 100% utilization of a feature is reached. Additional quantities of features may be added subject to *Terms and Conditions*. (T)
8. Contractual obligations and End User Common Line charges will be billed to the location where originally installed and will not transfer with a station number rearrangement.
9. If the Company is requested to load ECAS changeable features for new ESSX/ECAS customers, Installation Charges specified in A112.26.15 apply per ECAS feature added.
10. The following types of lines will be restricted from Station TN Rearrangement capability. Service options and feature change capabilities will still be available except on lines assigned to multiline hunt groups.
 - Station lines assigned to multiline hunt groups
 - Attendant Lines
 - Any ESSX line which as a special hardware configuration (e.g., ground start lines and lines having SCAN points or signal distribution points)
 - Manual lines (e.g., station lines with full originating and/or terminating restrictions)
11. ECAS functions performed by the Company at the customer's request subsequent to the initial installation will be subject to the nonrecurring charge specified in A112.26.15.
12. The Per System charges specified in A112.12.15.C. apply when a feature is initially activated in a Common Block.
13. Any required changes in customer provided equipment as a result of growth, desired enhancements or technological advancement, will be the responsibility of the ECAS customer. Compatibility with customer provided station terminal equipment is not guaranteed.
14. The ECAS customer is responsible for assigning and maintaining a record of station feature assignments. The ECAS customer also agrees to provide the Company with a central point of contact for inquiries and/or trouble reports involving station features.
15. ECAS customers will be responsible for initiating a Service Order to correct any information pertaining to Directory Listings that changed as a result of an ECAS TN swap. The appropriate Service Order charges specified in Section A4. apply.

Note 1: Appropriate Service Order charges specified in Section A4. will apply.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.13 Digital ESSX Service - 85

(Obsoleted 05-30-96, Type 4) Service rates and charges in this section are available for inward activity of existing subscribers only as specified following. Not available for new service or entire moves of existing service to new locations.

Obsolescence Rules

1. Inward activity for Digital ESSX service - 85 will only be allowed under a Term Payment Plan.
2. Digital ESSX service - 85 subscribers who have their entire account under a month-to-month payment option will be allowed to maintain their Digital ESSX service - 85 at month-to-month rates.
3. Digital ESSX service - 85 subscribers who have a portion of their existing service under a month-to-month payment option and a portion of their existing service under a Term Payment Plan may remain under the rates and charges outlined in this Section until such a time that the Term Payment Plan associated with the Common equipment expires. Upon expiration of the Term Payment Plan associated with the Common Equipment, the Company reserves the right to convert all or part of the subscriber's account to the month-to-month rates and charges as outlined in this *Guidebook*. (T)
4. Digital ESSX service - 85 subscribers under a Term Payment Plan will be allowed to maintain their Digital ESSX service - 85 until the expiration date associated with the Common Equipment of their contract. Upon expiration of the Term Payment Plan associated with the Common Equipment, the Company reserves the right to convert all or part of the subscriber's account to the month-to-month rates and charges as outlined in this *Guidebook*. (T)
5. Digital ESSX service - 85 subscribers under a Term Payment Plan will have until 11/30/96 to exercise the recast option and subscribe to Digital ESSX service - Vintage II, as described in A112.28, for a Term Payment Plan of not greater than 84 months in length. Digital ESSX service - 85 subscribers under a month-to-month payment option will have until 11/30/96 to convert to a Digital ESSX service - Vintage II Term Payment Plan of not greater than 84 months in length.
6. Conversions from ESSX-1 service to Digital ESSX service - 85 will not be allowed under this *Guidebook*. (T)
7. Existing Digital ESSX service - 85 subscribers who are under a Term Payment Plan may add a new secondary location (SLA) or move an existing SLA of their existing service. (T)

Vintaged November 22, 1988, Type 4. This service is not offered for new installations after November 22, 1988, except where a letter of intent was signed prior to November 22, 1988 and the service is to be installed on or before May 22, 1989. Subsequent additions to an existing system, under contract, are permitted. Additionally, a system under contract may be moved to another *Company* location within the State of Florida. Customers paying vintaged rates and charges will continue to pay vintaged rates and charges until their payment period expires. (T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.13 Digital ESSX Service - 85 (Cont'd)

A112.13.1 General

- A.** Digital ESSX service is furnished from Digital Central Office equipment located on Company premises and associated facilities so arranged as to provide the following basic service features:
1. Direct Inward Dialing (DID) and Direct Outward Dialing (DOD) of exchange and long distance message network calls to and from stations and attendant positions of a Digital ESSX service system.
 2. Intercommunication calls between stations of the same Digital ESSX service system.
 3. Identified Outward Dialing (IOD), by station number of outgoing long distance message calls dialed by a station. Only calls billed to the subscriber by this Company will be provided this identification.
 4. Common recorded announcement interception of calls to unassigned station numbers.
 5. Basic Station Line Hunting.
 6. Touch-Tone Service
- B.** Digital ESSX service will be furnished in three categories, based on the size of the subscriber's system.
1. Digital ESSX service-S will serve systems with 1-200 Main Station Lines.
 2. Digital ESSX service-M will serve systems with 201-600 Main Station Lines.
 3. Digital ESSX service-L will serve systems with more than 600 Main Station Lines.
- C.** A Digital ESSX service system may be comprised of the following components:
- Common Equipment¹
 - Network Access¹
 - Main Station Lines¹
 - Terminating Arrangements
 - Features

The Common Equipment and Terminating Arrangements will be at the rates and charges as specified in A112.13.7. The Network Access Limiter and Network Access Registers will be at the rates and charges specified in A112.28.7. (T)

Main Station Line rates will consist of the intercom charge and the appropriate wire center line charge. These charges will be located in A112.13.8, A112.13.9, and A112.13.10 for Digital ESSX service-S, Digital ESSX service-M, and Digital ESSX service-L respectively.

Digital ESSX Line and Service Features will be grouped as follows:

- A Line Features Grouped
- A Line Features Individual
- B Line Features
- Optional Service Features

A Line Features will be offered on a grouped basis to Digital ESSX service subscribers who have selected an ESSX Term Payment Plan of 36, 60 or 84 months. Subscribers selecting the month to month payment option will be offered the Group A Line features on an individual basis only.

Note 1: Every system will include these components.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(T)

A112.13 Digital ESSX Service - 85 (Cont'd)

A112.13.1 General (Cont'd)

- C. A Digital ESSX System may be comprised of the following components: (Cont'd)

B Line Features and Optional Service Features will be offered to Digital ESSX subscribers under all payment plan options subject to the specific requirements within each arrangement.

A Digital ESSX-S subscriber will select A & B Features in A112.13.8.

(T)

A Digital ESSX-M subscriber will select A & B Features in A112.13.9.

(T)

A Digital ESSX-L subscriber will select A & B Features in A112.13.10.

(T)

Optional Service Features will be offered to all Digital ESSX subscribers in A112.13.11.

(T)

A112.13.2 Terms and Conditions

(T)

- A. Digital ESSX service is furnished subject to the availability of facilities and features from Digital Central Office equipment, located in a central office building owned or leased by the Company. The service allows for normal station activity including incidental additions and deletions. Major additions to and or major relocations of Digital ESSX systems are subject to the same **terms and conditions** as initial installations.

(T)

- B. Certain Auxiliary Services are available on an individual main station line basis and are subject to the capabilities of the serving central office.

- C. Optional Service Features as listed in A112.13.11 include Attendant Features and Auxiliary Attendant Features. These features may require customer provided compatible terminal equipment.

- D. All console functions by the attendants at the subscriber's premises are performed at the expense of the subscriber and must conform with the operating practices and procedures of the Company to maintain a proper standard of service.

- E. All Digital ESSX main station lines must be associated with the main switching equipment. Satellite switching equipment is not offered with Digital ESSX service.

- F. Tie lines for direct connections between a basic Digital ESSX system and other systems are provided primarily for communication between stations of the two systems. In such cases, rates and charges for tie line service as specified in A13. and miscellaneous line termination charges apply. In addition, these tie line connections may be arranged to provide completion of incoming or outgoing local and long distance calls through the Digital ESSX system to or from other systems (Digital ESSX or non-Digital ESSX) provided such connections to the exchange or long distance network are only made at one system at a time.

(T)

- G. Where completion of incoming and outgoing local and long distance calls through a Digital ESSX system is furnished to or from main station lines of a separate Digital ESSX system in another exchange or a non-Digital ESSX system in the same or different exchange, the charges applicable for the following features apply in addition to the regular charges for the facilities connecting the systems except for Subsidiary System Arrangements furnished under the **terms and conditions** specified in A112.13.11.

(T)

1. Rates and charges as specified in Section B3. of the Private Line *Guidebook* apply to miscellaneous lines furnished with unique access codes (trunk level access) except for tie lines furnished in connection with Subsidiary System Arrangements as specified in A112.13.11.

(T)

2. Digital ESSX optional feature charges as outlined in Section A112.13.8, 9 and 10 apply for each trunk terminated main station line as offered in Section A112.13.7, as appropriate.

(T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(T)

A112.13 Digital ESSX Service - 85 (Cont'd)**A112.13.2 Terms and Conditions (Cont'd)**

(T)

- H.** Dormitory service is furnished in accordance with the *terms and conditions* for Dormitory Communications Service specified in Section A13. (T)
- I.** A system may not be provided for Intercommunication (standalone) service only. Access to the Exchange Network must be provided.
- J.** A mixture of Flat Rate and Message Rate Service will not be allowed within a single customer system.
- K.** Suspension of Service
With the exception of Network Access Registers, suspension of Digital ESSX Service is not permitted.
- L.** A twelve month minimum service period shall be required if the subscriber's system is a Digital ESSX-M or L. The normal minimum service period as specified in Section A2. will be applicable to Digital ESSX-S systems. (T)
- M.** Touch-Tone service will be furnished subject to the *terms and conditions* specified in Section A13. The rates and charges for Digital ESSX station lines include the provision of Touch-Tone service. Rates and charges for Touch-Tone service as specified in Section A13. do not apply for the provision of Touch-Tone service to Digital ESSX Service. (T)
- N.** Directory Listings will be furnished subject to the rates, *terms and conditions* specified in Section A6. (T)
- O.** The number of simultaneous exchange and toll network calls to and from main station lines and attendant positions of a Digital ESSX system is limited by the number of Network Access Registers subscribed to by the customer. Each Network Access Register may be arranged for two-way, one-way incoming or one-way outgoing operation depending upon the option of the customer at the time the Network Access Register is installed. When a change in the type of operation is requested by the customer, the appropriate Service Charges as specified in Section A4. apply per Network Access Register affected. (T)
- P.** Service charges, as specified in Section A4, apply to all Digital ESSX systems except as provided in A112.13.5. (T)
- Q.** Digital ESSX installation charges are due on initial installation or subsequent additions unless deferred over a predetermined period of time as specified in Section A122. (T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.13 Digital ESSX Service - 85 (Cont'd)

A112.13.2 Terms and Conditions (Cont'd)

- (T)
- R.** If the Digital ESSX subscriber elects a Message Rate Service option, Message Rate Service usage charges specified in Section A3 are applicable on calls to locations outside the subscriber's Digital ESSX system in addition to rates and charges in this and other *guidebook* sections for Digital ESSX service and other associated services. Usage charges are not applicable on calls originated and terminated within the same Digital ESSX system. (T)
- S.** Digital ESSX main station lines may be restricted from dialing three-digit central office and service codes by applying Code Restriction to the line. The three-digit codes which may be restricted constitute those codes to which Public Announcement, Directory Assistance or Dial-It¹ Services (e.g., 900 calls) are assigned which could generate billing to the originating main station line. Code Restriction arrangements may also be used to prohibit toll calls to a carrier other than the Presubscribed Interexchange Carrier (dialed 10XXX). InterLATA calls dialed 0- (operator handled) calls cannot be restricted. The term "Public Announcement Services" as used herein are those services which, in the judgement of the Company, furnish advertised recorded announcement messages to the general public (e.g., time, weather, sport scores and stock market reports). The Public Announcement Service central office codes will be determined by the Company and will be commonly denied access in the central office serving the Digital ESSX systems subscribing to this service arrangement.
1. At the time a Code Restriction arrangement is installed, the Digital ESSX system will be arranged for the Code Restriction specified by the customer and the main station lines designated by the customer will be so equipped. When the customer requests the subsequent addition or removal of code restriction on a main station line, the appropriate Service Charges as specified for a change in line termination apply per main station line affected except that no such charges apply when the code restriction arrangement is disconnected in its entirety.
 2. Where Code Restriction applies to a particular central office code, direct outward dialed main station line access is denied to telephone numbers associated with that central office code.
 3. Code Restriction Arrangements to deny access to Directory Assistance and/or Public Announcement Services are not assured. These features are intended to limit main station line direct dialed outgoing calls, but such calls may, in certain circumstances, be completed and will be charged for in the normal manner.
- T.** The list of Wire Center Density Classifications by Exchange as specified in Section A112.12.4 shall be used in determining the density of a particular serving wire center. Whenever the density group designation of a serving wire center is reclassified, Digital ESSX customers are subject to the following: (T)
1. Charges for main station lines under contract via the ESSX Term Payment Plan shall not change for the remainder of the contract.
 2. Upon expiration of the existing contract, the new rate will be based on the wire center density group as reclassified.
 3. Charges for main station lines not under contract (Month-to-Month), including minimum service period shall be adjusted if the reclassification would result in a lower rate.

Note 1: Dial-it is a service of AT&T.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.13 Digital ESSX Service - 85 (Cont'd)

A112.13.2 Terms and Conditions (Cont'd)

- U. Customer Station Rearrangement (CSR) may be provided with Digital ESSX service where facilities permit. Rates and charges for CSR will be developed on an individual case basis and will be based on the estimated costs to provide this service. (T)
- V. The first system established per customer within a Local Calling Area must consist of a minimum of one (1) Main Station Line. (T)
- W. Digital ESSX service subscribers with rates and charges applicable out of the Obsolete Section A112.13 may subscribe to features found in A112.28 but not offered in A112.13. (T)
- X. Digital ESSX service subscribers with rates and charges applicable out of the Obsolete Section A112.13 wishing to add or change features must apply nonrecurring charges as indicated in A112.28. (T)

A112.13.3 Definitions

WIRE CENTER DENSITY

Refers to the average number of main stations (MS) and equivalent main stations (EQ. MS) per square mile in the serving wire center area. Wire Center Density Groups are designated "A" and "B" with group "A" having the least density and group "B" having the highest.

OTHER DEFINITIONS - SEE A112.28.3

A112.13.4 Intercept of Calls to Unassigned Station Lines

- A. Incoming calls from the exchange and toll networks to unassigned station lines are intercepted by the same standard central office recorded announcement equipment used to intercept such calls for exchange services. The announcement provided states that the number called is not in service.
- B. Intercommunicating calls to unassigned station lines are intercepted by central office recorded announcement equipment which is common to all Digital ESSX service systems served out of the same office. The announcement states that the number is not in service and advises that the attendant or the directory of the caller's system should be consulted.

A112.13.5 Conversion

- A. Replacement of Central Office Equipment
 - 1. The rates and charges in this and other *guidebook* sections for Digital ESSX service and the associated features and services will continue to apply to Digital ESSX service subscribers served at a location that is converted through no desire or fault of the subscriber to Digital central office equipment. Should one of the aforementioned existing subscribers wish to utilize features and/or services specific to the Digital central office equipment, the billing for that customer's system will be converted to charges appropriate for the central office equipment providing his service. (T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(T)

A112.13 Digital ESSX Service - 85 (Cont'd)

A112.13.5 Conversion (Cont'd)

- B.** Conversion of Centrex or ESSX Service^I to Digital ESSX Service (T)
1. When a customer whose present Centrex or ESSX Service elects to convert to Digital ESSX Service, installation and service connection charges do not apply to Common Equipment, in-service station lines, terminating arrangements, toll diversion and toll restriction equipped station lines, conference arrangements and other optional features and/or services provided each of the following conditions are met:
 - a. The Customer's system must continue to be served by the same central office equipment or the customer is moved to other central office equipment at the Company's instance.
 - b. There must be no interruption of service, and
 - c. There are no moves, changes or additions in existing station lines, terminating arrangements, or optional features requested by the customer.
 2. Centrex or ESSX Services converting to Digital ESSX Service must elect one of the following options:
 - a. Month to Month Payment Plan
 - b. ESSX Term Payment Plan of 36, 60 or 84 months^I (T)
 3. Where the customer elects an ESSX Term Payment Plan of 36, 60 or 84 months and wishes to add to his system the following shall apply:
 - a. Such additions shall be made within a scheduled period after the conversion at the rates and charges in this and other *guidebook* sections for Digital ESSX Service and the associated Features and Services. (T)
 4. Where an ESSX customer converts to Digital ESSX the service establishment charge shall not apply if the same customer category, (Small, Medium or Large) is maintained. If the ESSX customer has a current ESSX Term Payment Plan, an ESSX Term Payment Plan for Digital ESSX must be selected that is equal to or longer than the unexpired portion of the current plan.
 5. Where an ESSX customer converts to Digital ESSX and changes customer category (Small to Medium, Medium to Large, Small to Large) the Service Establishment Charge applied shall be equal to the appropriate Digital ESSX Service Establishment Charge (of the category the customer is going to) less the ESSX Service Establishment (of the category the customer is coming from) Charge.
 6. Where an ESSX customer converts to Digital ESSX and downgrades from Large to Medium, Medium to Small, or Large to Small, no service charge shall apply. Termination charges will apply as specified in A112.12.6. (T)
 7. Where a Digital ESSX customer converts to ESSX such conversions shall also be made in accordance with paragraphs 3, 4, 5 & 6 preceding.

Note I: Denotes ESSX-1 Service or ESSX-S, M, L Service.

(T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(T)

A112.13 Digital ESSX Service - 85 (Cont'd)

A112.13.6 Payment Schedules

A. General

1. Digital ESSX service is offered as follows.
 - a. The contract periods are:
 - Month to Month Payment Plan
 - 36 Month ESSX Term Payment Plan
 - 60 Month ESSX Term Payment Plan
 - 84 Month ESSX Term Payment Plan
 - b. Items that may be placed under the ESSX Term Payment Plan¹
 - (1) Main Station Lines
 - (2) Extension Station Lines
 - (3) Line Feature Options
 - (4) Optional Service Features
 - (5) System Common Equipment
 - (6) Terminating Arrangements
2. The monthly rate for Digital ESSX service is dependent upon the payment period selected by the customer.
3. The monthly rate for Digital ESSX service under the ESSX Term Payment Plan for the periods of 36, 60 or 84 months is not subject to Company initiated rate increases.
4. Digital ESSX-S service will be offered to subscribers having 15 -200 main station lines under any of the payment options offered.
 - a. A Digital ESSX-S subscriber may elect a 36, 60 or 84 month payment period for any portion or all of the total system size with the remainder to be under the month to month payment option.
 - (1) Group A and B line features may be added under any of the payment plan options.
 - (2) Auxiliary Attendant Features or Optional Service Features may be added under any of the payment plans provided that they are not added for a payment period of shorter duration than that associated with the Digital ESSX common equipment.
 - b. A Digital ESSX-S subscriber may add station lines up to 220 Lines, and:
 - (1) Add those lines and associated Group "A" and "B" line features at the month-to-month rate specified for Digital ESSX-S or,
 - (2) Resubscribe the entire system under the payment periods offered for Digital ESSX-M.¹
 - (3) There will be no termination liability.
 - (4) Digital ESSX-S Subscribers will be liable for the difference in service establishment charges between Digital ESSX-S and Digital ESSX-M.

Note 1: *Terms and Conditions* concerning the ESSX Term Payment Plan are specified in Section A122. (T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(T)

A112.13 Digital ESSX Service - 85 (Cont'd)

A112.13.6 Payment Schedules (Cont'd)

A. General (Cont'd)

5. Digital ESSX-M service will be offered to subscribers with 201-600 main station lines under month to month, 36 months, 60 months or 84 month payment options.
 - a. A Digital ESSX-M subscriber may elect a 36, 60 or 84 month contract period for any portion or all the total system size with the remainder to be under the month to month payment option.
 - (1) Group "A" and "B" line features may be added under any of the payment plan options.
 - (2) Auxiliary Attendant Features, or Optional service features may be added under any of the payment plans provided that they are not added for a payment period of shorter duration than the contract period associated with the Digital ESSX common equipment.
 - b. A Digital ESSX-M subscriber may add station lines up to the 660 Lines and:
 - (1) Add those lines and associated Group "A" and "B" features at the month to month rate specified for Digital ESSX-M or,
 - (2) Resubscribe the entire system under the payment periods as offered for Digital ESSX-L.
 - (3) There will be no termination liability.
 - (4) Digital ESSX-M Subscribers will be liable for the difference in service establishment charges between Digital ESSX-M and Digital ESSX-L.
6. Digital ESSX-L service will be offered to subscribers with more than 600 main station lines under month to month, 36 month, 60 month and 84 month payment options.
 - a. A Digital ESSX-L subscriber may elect a 36, 60 or 84 month payment period for any portion or all of his total system size with the remainder to be under the month to month payment option.
 - (1) Group "A" and "B" line features may be added under any of the payment plan options.
 - (2) Auxiliary Attendant Features, or Optional service features may be added under any of the payment plans provided that they are not added for a contract period of shorter duration than the remaining contract period associated with the Digital ESSX common equipment.

B. Expiration of Contract Period

1. Digital ESSX-S, M and L customers must upon the expiration of their contract:
 - a. Select a new contract period as offered in the current *guidebook* or, (T)
 - b. Revert to the current *guidebook* rates for the month to month payment option. (T)
2. A Digital ESSX-S, M or L customer whose service is provided under rates, *terms and conditions* found in Section A112. may at any time during his selected payment period resubscribe for an equal or longer payment period at the current *guidebook* rates subject to the following conditions. (T)
 - a. No credit will be given for payments made during the formerly selected period. Nonrecurring charges will not be reapplied.
 - b. The new payment period begins with the billing date following the date the new payment period is requested.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(T)

A112.13 Digital ESSX Service - 85 (Cont'd)

A112.13.6 Payment Schedules (Cont'd)

B. Expiration of Contract Period (Cont'd)

2. (Cont'd)

- c. No termination charge applies for the former payment period.
- d. A Secondary Service Ordering charge as specified in Section A4. will apply. (T)
- e. Subscriber has not previously exercised the option to resubscribe after the effective date of this *Guidebook*. (T)
- 3. A Digital ESSX S, M or L customer whose services is provided under rates, *terms and conditions* found in Section A112, may at any time during his selected payment period resubscribe for a payment period, shorter in length than the time remaining in the existing service agreement, subject to the following conditions: (T)
 - a. No credit will be given for payments made during the formerly selected period. However, nonrecurring charges will not be reapplied.
 - b. The new payment period begins with the date requested.
 - c. A termination charge applies to the former payment period.
 - d. A Secondary Service Ordering charge as specified in Section A4. will apply. (T)

C. Termination Liability

The Termination Liability applicable to Digital ESSX service is dependent upon the payment period selected by the customer. Termination charges for the optional payment periods are as follows:

1. Month-to-Month Payment Plan

- a. Digital ESSX-S Customers - No Termination Liability will be applicable.
- b. Digital ESSX-M Customers
 - (1) Within 12 months of date of installation - If a customer's Main Station Line count falls below 75% of the total main station lines initially installed, they will be charged 90% of the amount due for the period remaining up to 12 months from the date of installation for each line disconnected thereafter.
 - (2) Beyond 12 months of date of installation - No Termination Liability will be applicable.
- c. Digital ESSX-L Customers
 - (1) Within 12 months of date of installation - If a customer's main station line count falls below 90% of the total main station lines initially installed, they will be charged 90% of the amount due for the period remaining up to 12 months from the date of installation for each line disconnected thereafter.
 - (2) Beyond 12 months of date of installation - No Termination Liability will be applicable.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(T)

A112.13 Digital ESSX Service - 85 (Cont'd)

A112.13.6 Payment Schedules (Cont'd)

C. Termination Liability (Cont'd)

2. ESSX Term Payment Plan Option

a. Digital ESSX-S, M and L customers that contract a portion of their system under the ESSX Term Payment Plan Option are subject to the following liability charges.

(1) Main Station Lines under contract - 90% of the remaining amount due for each main station line disconnected after the customer's total main station line count falls below 90% of the total main station lines initially installed or of the annually adjusted total.

(2) All non-contracted items - No Termination Liability will be applicable.

3. When a subscriber's Digital ESSX service under a Term Payment Plan is disconnected prior to the expiration of the selected service period as a result of a subscriber requested change to one of the separately *available* services listed following, termination charges will not apply when: (T)

a. the completed service period is 12 months, and

b. the service period of the new arrangement for the separately *available* service equals or exceeds the remaining service period of the disconnected service, and (T)

c. the service orders to install the separately *available* service and disconnect the existing service are related together and there is no lapse in service between installation of the separately *available* service and disconnection of the existing service, and (T)

d. the service orders are for the same subscriber at the same location.

For the purposes of determining the separately *available* services to which the preceding conditions apply, the following list will be used: (T)

- MegaLink Service

- MegaLink Channel Service

- MegaLink ISDN Service

- LightGate Service

A112.13.7 Common Rates and Charges

A. General

1. Station Lines

a. The rates and charges specified herein for main station lines provide for main station line components. The main station line consists of all facilities including intercommunication outside plant facilities from the system dial switching equipment to the Network Interface of the main station line.

b. The rates and charges specified herein for main station and extension station lines are applicable to each main station location and extension station location respectively to which a customer-provided instrument can be connected.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS (T)

A112.13 Digital ESSX Service - 85 (Cont'd)

A112.13.7 Common Rates and Charges (Cont'd)

A. General (Cont'd)

1. Station Lines (Cont'd)

- c. Service Charges as specified in Section A4. apply to all customer-requested moves, changes, removals, rearrangements and maintenance of premises wiring performed by the Company on the customer's premises. (T)
- d. End User charges as specified in the End User Common Access Service Section of FCC Tariff Number 61 apply as appropriate.
- e. Rates for the main station lines of Digital ESSX-S, M and L customers will be based on the following criteria:
 - (1) Main Station Group Size
 - (2) Wire Center Density Group
 - (3) Distance from the Serving Central Office
 - (4) The type of payment plan selected by the customer.
- f. The total main station group size will consist of main station lines and attendant access lines for all locations served by the same Digital ESSX system.
- g. Wire center density is based on the number of main stations and equivalent main stations per square mile served by that wire center.
- h. Wire center density groups are designated "A" and "B" with group "A" having the least density and "B" have the most density.

"A"	0 - 1200 Mains and equivalents/square mile
"B"	Over 1200 Mains and equivalents/square mile
- i. The distance band will be based on airline mileage from the serving central office to the Network Interface Location at the customer's premises.
 - (1) Where main stations are in a foreign exchange (FX) or a foreign central office (FCO) area the distance band will be calculated from the FX or the FCO to the Network Interface Location serving those main stations.
 - (2) Systems with more than one location served by the same Digital ESSX control group will calculate the distance band per location.
- j. In a different central office serving area of a multi-office exchange:
 - (1) The rate of Digital ESSX Service in a FX or FCO area is the monthly rate for the Digital ESSX service desired, plus a FX or FCO mileage charge as specified in Section A9. (T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS (T)

A112.13 Digital ESSX Service - 85 (Cont'd)

A112.13.7 Common Rates and Charges (Cont'd)

A. General (Cont'd)

1. Station Lines (Cont'd)

j. In a different central office serving area of a multi-office exchange: (Cont'd)

(2) When Digital ESSX main station lines are connected by facilities which are routed between two or more central offices in the same exchange, the foreign central office mileage charge is calculated separately on an airline basis between the ESS central office from which the Digital ESSX system is served and the central office from which exchange service normally would be rendered.

k. Rates, charges, liabilities and additional *terms and conditions* if applicable may be developed on an individual basis for main station lines exceeding four (4) airline miles from the serving central office. (T)

l. Exchange Access

(1) Exchange Access is provided by means of Network Access Registers.

(2) Presubscription of a Carrier of Preference is specified in Section A13. of the Interstate Access Service Tariff.

m. Subsequent Training

After the initial installation of the subscriber's system, subsequent training will be provided at the charges indicated in Section A12.20.8.D. (T)

B. Nonrecurring Charges

1. The following nonrecurring charges for service are in addition to any applicable service connection, move, change and installation charges provided for in other section of this *Guidebook*. (T)

a. Service Establishment Charge (See A112.28.7)

b. Feature Establishment Charges (See A112.28.7)

c. Installation Charges (See A112.28.7)

d. Service Connection Charges (See A112.28.7)

C. Recurring Charges

1. Common Equipment

		ESSX Term Option				Month

B. Features (T)

1. General (T)

- a. The features offered for Digital ESSX-L customers are "A" Line Features-Grouped, "A" Line Features - Individual, "B" Line Features and Optional Service Features. (M)
- b. Digital ESSX-L customers may add features on a per line basis from "A" Line Features-Grouped at the rates shown in 2.a. following if an ESSX Term Payment Plan of 36, 60 or 84 months is selected. (M)
- c. Digital ESSX-L customers may add features on a per system basis from "A" Line Feature Individual at the rates shown in 2.b. following if a term payment plan of 36, 60, 84 months is selected. If a feature is selected on a per system basis than any or all lines may be equipped with that feature at the system recurring rate. The feature establishment charge will apply per line.
- d. Digital ESSX-L customers choosing the month to month payment plan may add features from "A" Line Features-Individual at the rates shown in 2.b. following. These features will be offered on a per line basis only.
- e. "B" Line Features will be offered to Digital ESSX-L customers on a per line basis at rates shown in 2.c. following.
- f. The features are offered where facilities permit. This will be dependent on the serving central office.
- g. All features may not be offered from all central offices.
- h. Feature operation may vary based on the serving central office.

2. Rates and Charges

a. "A" Line Features – Grouped¹ (T)

(1) The "A" Line Features - will be offered grouped per line at the rates shown in (2) following.

B. Attendant Features - Data Link Console Operation¹ (Cont'd) (T)

1. General (Cont'd)

Customer provided compatible consoles may be provided only where the serving central office serving the Digital ESSX has been arranged for use with such consoles.

Control channels are required for various console optional features as indicated and are provided at the rates and charges specified in Section B3. of the Private Line *Guidebook*. (T)

The service establishment charge for Data Link Console operation includes the following attendant features provided the customer provided compatible terminal equipment meets the technical specifications as outlined for interface with the DMS 100.

- Attendant To Recorded Announcement
- Automatic Recall
- Call Hold
- Call Transfer
- Distribution of Calls
- Camp-On
- Flexible Console Alerting
- Lockout
- Secrecy
- Serial Call
- UCD/Console
- Interposition Transfer

The console subgroup service establishment charge for Data Link Console operation includes the following attendant features provided the customer provided compatible terminal equipment meets the technical specifications as outlined for interface with the DMS 100.

- Console Queue
- BusyTone/Announcement
- Multiple Console Operation

G. Station Message Detail Recording Via Revenue Accounting Office (RAO)

- 1. **General**
 - a. Station Message Detail Recording (SMDR) - RAO is an arrangement to provide a record, by main station line number, or originating intercity traffic routing over dial type tie lines, WATS, CCSA, other Common Carrier access lines and/or the MTS Network (Toll).
 - b. The station message detail will include the calling main station line number, the called number, date, time of day, duration of call and the type of facility used. The record will be provided on magnetic tape, to customers requiring message detail for cost allocation and telecommunications system management purposes. The detail will be provided on all facilities in routes selected by the customer for Station Message Detail Recording - RAO.

2. **Terms and Conditions**

- a. Station Message Detail Recording (SMDR) - RAO may be offered to main station lines of customers where facilities permit and where the Company's message billing process has been arranged to provide this optional feature.
- b. Station Message Detail Recording is not represented to be a provision of billing detail.
- c. Station message details will be provided on magnetic tape. The tape density and number of tracks will be that used by the program and data processing system in use by the Company's accounting center furnishing the tape. The format may be changed to serve Company purposes and the customer will be responsible for making the tape compatible with his data processing equipment.
- d. Station message details may be provided on all facilities subscribed to by the customer including Message Telecommunications Service (MTS), but will not include intercom calls originated by the station users. The customer may designate the group or groups of facilities on which SMDR - RAO is to be provided. Where the facility designated by the customer is the MTS network, the magnetic tape file will include a record of each message itemized on the customer's bill; e.g., messages received collect or billed to third number will be on the tape file in addition to DDD messages originated by the station user.

I. Subsidiary System Arrangements

1. General

A Subsidiary System of a Digital ESSX system is a customer-provided system which is furnished PBX trunks from the central office serving the customer's Digital ESSX system and which is connected by the lines to that Digital ESSX system.

A Subsidiary System Arrangement provides station numbers which are in sequence with the main station line numbers of the customer' Digital ESSX system to the stations of one or more subsidiary systems.

2. **Terms and Conditions**

(T)

a. Subsidiary System Arrangement (SSA) station numbers are provided by the same central office equipment and facilities which furnish Direct-Inward-Dialing (DID) service and will only be furnished where adequate DID facilities are available in the central office serving the customer's system and where the subsidiary system is properly equipped for DID service.

b. The PBX trunks of the subsidiary system are provided at the same rates and charges as specified for such trunks furnished from the central office serving the customer's Digital ESSX system. In addition, foreign central office or foreign exchange mileage charges are applicable to those trunks when the subsidiary system is located outside the area of that serving central office.

(T)

A112.13 Digital ESSX Service - 85 (Cont'd)

A112.13.11 Optional Service Features (Cont'd)

I. Subsidiary System Arrangements (Cont'd)

2. *Terms and Conditions* (Cont'd)

(T)

- c. The same rates and charges specified for DID service apply for SSA station numbers. Where more than one subsidiary system is involved, each subsidiary system is considered a separate service and the count of station numbers furnished will commence anew at each such system for the purpose of determining the applicable rates and charges.
- d. Tie lines connecting the Digital ESSX and subsidiary systems are provided at the same rates and charges as specified for Digital ESSX tie line terminals, tie lines, and tie line terminals in a customer-provided equipment system.
- e. SSA station numbers are furnished subject to the condition that all inward and outward local and toll network calling by subsidiary system stations be via the central office serving the customer's Digital ESSX system.
 - (1) Where the subsidiary system station's outward local and toll network calls are placed via tie lines and the network access registers of the Digital ESSX system, the charges for such calls are identified and billed as primary directory listing calls of the Digital ESSX system.
 - (2) Where the subsidiary system station's outward local and toll network calls are placed via PBX trunks, the charges for such calls are identified as primary directory listing calls of the Digital ESSX system.
- f. At the option of the customer, identification of outgoing toll network calls by SSA station number will be provided at the same rates and charges as specified for Identified-Outward-Dialing (IOD) service subject to the following conditions:
 - (1) The identification of outgoing toll calls by SSA station number will only be provided on calls routed via PBX trunks.
 - (2) Where more than one subsidiary system is arranged for the identification of outgoing toll calls by SSA station number, each system shall be considered a separate service and the count of connecting channels which serve as IOD trunks will commence anew at each system for the purpose of determining the applicable rates and charges.
- g. The Digital ESSX subsidiary system arrangement is provided solely for the furnishing of SSA station numbers to subsidiary systems for local and toll network and intercommunication calling and does not provide any of the basic or optional service features of Digital ESSX service to stations of the subsidiary systems.

J. Automatic Route Selection - Basic

1. General

a. Automatic Route Selection - Basic (ARS-B) is an optional feature, available where facilities permit that allows station users, by dialing a preselected code to automatically select the preferred route subscribed to by a customer for network calls. Alternate routing to other facilities subscribed to by the customer is also provided. This agreement is available for use with Foreign Exchange, WATS, CCSA off-net tie lines and Interexchange Carrier (IC) access lines which are compatible with ARS and the MTS network facilities.

b. Automatic Route Selection - Basic is accessed by dialing a single code (1, 2 or 3 digits) which automatically selects the appropriate route (FX, WATS, CCSA off-net, tie line, IC access line or the MTS Network) to complete the call. If all facilities in the initial route selected are busy, the call will advance to other routes in the selected pattern. Patterns may consist of up to eight (8) private routes.

c. For calls using FX, WATS, CCSA off-net or IC access line facilities, the routing may be based on a Number Plan Area (NPA) and limited to specified central office codes within the NPA as designated by the customer. This is referred to as Foreign Area Discrete Translation.

d. Automatic Route Selection - Basic is a call routing capability and, therefore, all codes must be in a route for selection. Code blocking is not provided by this feature.

2. *Terms and Conditions*

(T)

a. Automatic Route Selection - Basic is provided only in association with Digital ESSX Service central office equipment located on Company premises and may be provided, subject to the availability of facilities to ESSX systems which are served by the same such equipment.

b. Preferred routes and alternate routing patterns will be specified by the customer.

c. All rates and charges specified for Automatic Route Selection - Basic are in addition to the rates and charges for the associated facilities.

Note 1: Apply rates and charges as specified in Section A3. for PBX trunks.

(T)

Note 2: Apply rates and charges as specified in other sections of this *Guidebook* for tie line terminations tie line mileage, etc., as appropriate.

(T)

Note 3: Apply rates and charges as specified in Section A112.12.7 for USOC: ETM.

K. Queuing

1. General

- a. Queuing permits main station line users to be placed in a queue whenever the first choice route for completing a particular call is already in use. Two queuing arrangements are available.
 - (1) Off-Hook Queuing (OHQ), the calling main station line remains off-hook and is held in queue until a facility becomes available.
 - (2) Call-Back Queuing (CBQ), the calling main station line goes on-hook and is called back when a facility becomes available.

A112.13 Digital ESSX Service - 85 (Cont'd)

A112.13.12 Telephone Numbers and Facilities Reserved for Future Use (See A112.28.12)

A112.13.13 Digital ESSX Customer Administration Service

A. General

1. The Digital ESSX Customer Administration Service (DECAS) feature permits Digital ESSX customers to activate/deactivate selected optional features, change certain service options, and change feature configurations on predesignated Digital ESSX station lines. Customer provided terminal equipment is required for the operation of the DECAS feature.
2. For DECAS equipped station lines, DECAS allows the customer to verify and/or display the assignment of features on a single station line, range of station lines or all station lines to determine which station or stations have a particular feature or service option.
3. Certain Digital ESSX station lines may be specified by the customer to be exempt from this feature. Additionally, the Company reserves the right to make station lines inaccessible for DECAS.
4. Changing the status of a station line from accessible to DECAS to inaccessible or vice versa, must be done by the Company via a Service Order request. Appropriate Service Order Charges specified in Section A4 apply.
5. The Company has made the following provision to protect the integrity of the switching system database and to ensure the security of DECAS changes.
 - a. A DECAS customer's change, display or verify capabilities are restricted to that particular customer's own Digital ESSX system.
 - b. All changes are audited as they are entered by the DECAS customer. Invalid changes will not be accepted. An error message detailing which command is in error will be given.
 - c. Customer access to the database is protected using a dialup, login, password/dialback arrangement.
6. A DECAS customer can schedule changes (individual or bulk) for completion by the next business day or for a future business day. Additionally priority changes may be requested and the changes completed the same day subject to **Terms and Conditions** in A112.13.13. (T)
7. Definitions pertaining to DECAS/Digital ESSX features are specified in A112.28.3. (T)
8. The DECAS feature allows the customer to perform the following transactions from the customer provided terminal.
 - a. Change particular service options on a per station basis and exchange station telephone numbers (TNs). The change capabilities are:
 - (1) Line Status (Active/Inactive)^I (T)
 - (2) Call Pickup Group: The call pickup group to which a station is assigned can be changed on a per station basis
 - (3) The Forward to Number can be changed for a station line with CFBL and/or CFDA assigned

Note I: Station lines made inactive using DECAS will continue to be billed at the **guidebook** rates. (T)

A112.13.13 Digital ESSX Customer Administration Service (Cont'd)

B. *Terms and Conditions*

(M)

(T)

1. DECAS is provided only with Digital ESSX systems served from a Digital central office and is furnished subject to the availability of facilities.
2. Customers equipped for DECAS must order via a Service Order¹ DECAS changeable features in groups of five (5) at the rates specified in A112.13.13. (T)
3. Non-DECAS changeable features will be added subject to the specifications and rates in A112.13.8, A112.13.9, or A112.13.10 as appropriate.
4. Features for DECAS exempt station lines must be requested via a Service Order¹ and added by the Company. Rates and Charges for the features specified in A112.13.8, A112.13.9, or A112.13.10 apply as appropriate. (T)
5. The customer provided DECAS terminal equipment requires a Digital ESSX main station line. Rates and charges in A112.13.8, A112.13.9, or A112.13.10 apply as appropriate.
6. DECAS changes must be entered prior to times to be designated by the Company to be completed as priority changes or by the next business day as requested by the customer.
7. A DECAS customer cannot activate features in excess of the quantity that has been ordered from the Company. The customer will receive an indication on the terminal screen when 100 percent utilization of a feature is reached. To add additional quantities will require a Service Order.¹ (T)
8. Contractual obligations and End User Common Line Charges will be billed to the location where originally installed and will not transfer with a station line number rearrangement.
9. If the Company is requested to load DECAS changeable features for new Digital ESSX/DECAS customers, the Installation Charge specified in A112.28.13 applies per feature loaded.
10. The following types of lines will be restricted from Station TN Rearrangement capability. Service options and feature change capabilities will still be available except on lines assigned to multiline hunt groups.
 - Station lines assigned to multiline hunt groups.
 - Attendant Lines
 - Any Digital ESSX line which has a special hardware configuration (e.g., ground start lines and lines having SCAN points or signal distribution points)
 - Manual lines (e.g., station lines with full originating and/or terminating restrictions)

Note 1: Appropriate Service Order charges specified in Section A4. will apply.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.13 Digital ESSX Service - 85 (Cont'd)

A112.13.13 Digital ESSX Customer Administration Service (Cont'd)

B. Terms and Conditions (Cont'd)

11. DECAS changeable features added by the Company at the customer's request will be subject to the appropriate Service Order charges specified in Section A4. and the per line charges specified in A112.13.13.C.
12. Any required changes in customer provided equipment as a result of growth, desired enhancements or technological advancement, will be the responsibility of the DECAS customer. Compatibility with customer provided station terminal equipment is not guaranteed.
13. The DECAS customer is responsible for assigning and maintaining a record of station feature assignments. The DECAS customer also agrees to provide the Company with a central point of contact for inquires and/or trouble reports involving station features.
14. DECAS customers will be responsible for initiating a Service Order to correct any information pertaining to Directory Listings that changed as a result of a DECAS TN swap. The appropriate Service Order charges specified in Section A4 apply.
15. DECAS customers will be limited to one (1) TN swap per day as a priority request. The number of feature changes that can be requested as priority changes will be determined by the Company when DECAS is ordered.

C. Rates and Charges

1. Digital ESSX-L customers will have the option of paying for DECAS on either a per system or a per line basis. Customers choosing to pay on a per system or a per line basis will be subject to the rates specified in A112.13.13.C. The installation charge will be reapplied if a Digital ESSX-L customer changes their DECAS billing arrangement subsequent to the installation of the DECAS feature.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.17 Prestige Communications Package (PCP)

(Obsolete 01-15-90, Type 4)

Obsolete Service Offering, Not available for new installations or on transfers of service to a new location. Existing PCP customers may request feature changes and additions or line additions at the rates specified in this Section. If the customer requires features not found in A112.17 that are available from A12.16, the entire PCP billing will be converted to rates specified in A12.16.

(T)

(M)

(T)(M)

A112.17.1 General

- A.** PCP is a central office communications system package provided in association with individual line exchange Business services furnished from Electronic Central Office equipment located in Company buildings. It is offered as a customer option and may be provided subject to the availability of facilities to individual service lines except services provided through No. 1 or 1A ESS remote switching systems (RSS). All exchange lines in a PCP system must have the same billing arrangement, i.e., must be either flat or measured service.
- B.** PCP service is offered in two categories, PCP I and II. PCP I provides for a system accommodating from two to six central office lines. PCP II provides for a system accommodating from seven to thirty central office lines. PCP II is offered only in conjunction with Individual Business Line service. The billing record of toll calls on lines using PCP service will not be affected by the application of the features of this service. Intercom calls between exchange lines in the same PCP system will not incur local usage charges.
- C.** A customer may choose to combine exchange access lines terminating at different locations into a single PCP system. All exchange access lines terminating in a PCP system, however, must be served by the same central office.
- D.** Six PCP features, Intercom, Call Pickup, Call Hold, Call Waiting, Call Forwarding Variable and Convenience Dialing, are not available to lines utilizing dial pulse signaling. All PCP features are available to lines utilizing Touch-Tone signaling. The rates and charges for Touch-Tone service are in addition to PCP rates and charges.
- E.** The quality of transmission for calls utilizing PCP Call Forwarding Variable or Conferencing may vary depending on the distance and routing involved. The Company makes no representation as to the quality of the transmission on such calls.
- F.** PCP standard and optional features are not compatible with existing Custom Calling Services, described in Section A13.
- G.** An upgrade from PCP I to PCP II service or a downgrade from PCP II to PCP I service is allowed at rates and charges as specified in A112.17.3.C.2. as appropriate. An upgrade from Prestige Single Line service (PSLS) to PCP I or PCP II service or a downgrade from PCP I or PCP II to PSLS is allowed at rates and charges as specified in A112.17.3.C.2. as appropriate.
- H.** Suspension of PCP service is not allowed.
- I.** Feature availability and/or operation may vary depending upon the type of central office serving the PCP system and or the current generic program available in the central office.

A112.17.2 Service Description

A. Standard Features

1. Intercom

A user of a PCP I equipped line can dial up to five other lines in the same PCP system by dialing an access code followed by two digits. A user of a PCP II equipped line can dial up to twenty-nine other lines in the same PCP system by dialing an access code followed by two digits. Two user stations with the same line number cannot access each other utilizing the Intercom feature.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(T)

A112.17 Prestige Communications Package (PCP) (Cont'd)**A112.17.2 Service Description (Cont'd)****A. Standard Features (Cont'd)**

2. Call Hold

A user of a PCP line can place any established call on hold by flashing the switchhook and dialing a code. This frees the line to originate another call or use the call pickup feature.

3. Call Pickup

This feature enables a user of a PCP line to answer a call which has been directed to another line in the PCP system by dialing a code.

If more than one pickup group per PCP system is required, rates and charges as specified in A112.17.3.A.2.d. for additional call pickup groups apply as appropriate.

4. User Transfer

The user of a PCP line can transfer any incoming call or intercom call to another line within or outside the PCP system.

5. Conferencing

The user of a PCP line can hold an in progress call and complete a second call while maintaining privacy from the first call. In addition, the user of a PCP line may choose to add on the previously held call into a three-way conference.

B. Optional Features

1. Call Waiting

This feature provides a tone burst alert to a PCP user who is on an existing call that another call is waiting. Call waiting may be provided on individual lines that are not in rotary (arranged for hunting) or on the last line in a rotary hunt group.

2. Call Forwarding Variable

This feature automatically transfers all calls made to the subscribing line to a different line, within or outside the PCP system.

3. Convenience Dialing

a. PCP I or II Convenience Dialing

This feature allows a user of a PCP line to abbreviate dialing patterns for frequently called and emergency numbers. By dialing an access code followed by one digit, a customer can dial up to 6 preprogrammed numbers. All lines in a PCP system may be provided with their own 6-number list.

C. Service Charges

1. Establishment of Service

- a. When established at the same time as the associated exchange access line(s), no additional service charge is applicable.
- b. When established subsequent to the establishment of the associated exchange access line(s), service charges as specified in Section A4. apply. (T)

2. Feature Changes or Additions

- a. Service charges as specified in Section A4. are applicable to the following changes in an established PCP system. (T)
 - (1) Addition of optional feature(s) to an existing PRESTIGE arrangement.
 - (2) Changes to the customer specified parameters associated with PRESTIGE Alternate Answering.
 - (3) Changing the assignment of Intercom codes.
 - (4) Upgrades from PCP I service to PRESTIGE II service.
 - (5) Downgrades from PCP II service to PCP I service.
 - (6) Upgrades from PSLs to PCP I or PCP II.
 - (7) Downgrades from PCP I or PCP II service to PSLs

(M)

Note 1: The Transitional Charge applies as appropriate in lieu of the Service Establishment Charge per business system when a PSLs customer upgrades to PCP I or PCP II service. (T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.18 Prestige Single Line Service (PSLS)

(T)

(Obsolete 01-15-90, Type 2)

(M)

A112.18.1 General

- A. PSLS provides central office calling features for Business Flat, Measured or Message Rate Services and is furnished only from central offices equipped to provide this service. It is offered only on a single exchange line basis as a customer option and is provided subject to the availability of facilities. PSLS is not available for lines equipped with Rotary (Grouping) arrangements, Centrex Type Services or Coin Telephone Services. Custom Calling Service (CCS) options specified in Section A13 are not compatible with PSLS and may not be combined with PSLS features on the same line.
- B. The billing record of any local or toll calls on lines using PSLS will not be affected by the application of the features of this service.
- C. Four PSLS features: Call Hold, Call Forwarding, Convenience Dialing and Speed Dial-Thirty are not available to lines utilizing dial pulse signaling. All PSLS features are available to lines utilizing Touch-Tone signaling. The rates and charges for Touch-Tone service are in addition to PSLS rates and charges.
- D. The quality of transmission for calls utilizing PSLS's User Transfer, Call Forwarding or Conferencing features may vary depending on the distance and routing of the calls involved. The Company makes no representation as to the quality of the transmission of such calls.
- E. Suspension of PSLS service is not allowed.
- F. The initial service period for PSLS is one month commencing with the date of installation of the service.
- G. Feature availability and/or operation may vary depending upon the type of central office serving PSLS and/or the current generic program available in the serving Electronic Central Office.

A112.18.2 Service Description

A. Standard Features

1. Call Hold

A user of PSLS can place any established call on hold by flashing the switchhook and dialing a code. This frees the line to originate another call.

2. User Transfer

A user of PSLS can transfer an incoming call to another exchange line.

3. Conferencing

The user of PSLS may hold an in-progress call and complete a second call while maintaining privacy from the first call, or may add on the previously held call for a three-way conference.

B. Optional Features

1. Call Waiting

This feature provides a tone burst alert to a PSLS line user who is on an existing call that another call is waiting.

2. Call Forwarding

This feature provides a PSLS user the ability to have all incoming calls forwarded to a different telephone number by dialing a code and the telephone number where calls are to be forwarded.

(M1)

(M1)

3. Convenience Dialing

This feature provides a PSLS user the ability to place a call by dialing a code plus one digit to any one of six telephone numbers preprogrammed by the customer.

(M1)

(M1)

4. Speed Dialing-Thirty

This feature is available in certain offices where PSLS is offered. When available, this feature provides a PSLS user the ability to place a call by dialing a code plus two digits to any one of thirty telephone numbers preprogrammed by the customer.

A112.19 Digital Electronic Business Set Service II

(Obsolated 10-05-92 Type 4) Not available for new installations or on transfers of service to a new location. Existing customers may request changes and additions at the rates specified in this Section.

(T)

A112.19.1 General

- A. Except as stated in this Section, *terms and conditions* in A12.13 apply to this service. (T)
- B. Digital Electronic Business Set (DEBS) service is a voice-only service designed to work with compatible customer-provided premises equipment known as Digital Electronic Business Sets. Digital Electronic Business Sets are electronic telephone sets with optional button activation of features.
- C. Digital Electronic Business Set service allows single button access to timed switchhook flash and to business customer features otherwise accessible only via dialed codes. Status indication and originating and terminating access to multiple Directory Numbers (DNs) and Call Appearances (CAs) are allowed at a single station set regardless of the number of DN appearances the set has. These sets can pick up and originate on DN also appearing on other sets. Each set uses standard wiring (one pair) no matter how many DN are involved.
- D. Feature Function Buttons on the Digital Electronic Business Set can be assigned to activate certain features (any that can be activated by dialing an activation code). Indicator lights show the activation or deactivation status of the features. The number of function buttons may vary dependent on the set design.

A112.19.2 Definitions

ADDITIONAL CALL APPEARANCES

Allows a Digital Electronic Business Set to have more than one DN button assigned to the same DN. Incoming calls for this DN are handled in much the same way as Series Completion; if the first call appearance button is busy, the switch attempts to complete the call to the first idle call appearance for that DN. Also, a call can be originated from any idle call appearance while there is a call on hold on the first call appearance.

AUTOMATIC CALLBACK CALLING

Allows the user to activate this feature by pressing the function button assigned to Automatic Callback when a busy number is dialed. When the busy station becomes idle, a distinctive ring alerts the originating set user. When the set user goes off-hook, the call is placed.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(T)

A112.19 Digital Electronic Business Set Service II (Cont'd)**A112.19.2 Definitions (Cont'd)****CALL FORWARDING**

Separate buttons can be programmed to activate different variations of Call Forwarding:

Call Forwarding-Variable - allows the set user to depress a key then, via feature change code, program the number to which calls are to be forwarded. When the Call Forwarding-Variable button is depressed, the feature is active until the button is depressed again by the user.

Call Forwarding-Busy Line Flexible - allows the set user to depress a key then, via feature change code, program the number to which calls are to be forwarded. When the Call Forwarding-Busy Line Flexible button is depressed, the feature is active until the button is depressed again by the user.

Call Forwarding-Don't Answer Flexible - allows the set user to depress a key then, via feature change code, program the number to which calls are to be forwarded. When the Call Forwarding-Don't Answer Flexible button is depressed, the feature is active until the button is depressed again by the user.

CALL PICKUP

Allows a set user to pick up a call to another set in the group.

CALL RETURN

This feature enables a customer to place a call to the telephone number associated with the most recent call received, whether or not the call was answered or the number is known. The customer can dial a code to request that the network place the call.

If the called line is not busy, the call is placed. If the called line is busy, a confirmation announcement is heard. Once the customer hangs up, the network will monitor the busy/idle status of both lines every forty-five seconds for up to thirty minutes. If during the queuing process both lines become idle, the customer is notified, via a distinctive ring (short, short, long), that the network is ready to place the call. When the customer picks up the telephone, the call will automatically be placed. If unanswered by the customer, the distinctive ring will repeat every five minutes until answered, or for the remainder of the thirty minute monitoring interval. Multiple numbers may be placed in queue. The first idle number will be connected first. Both the customer and the called party may originate and receive calls without affecting the Call Return feature status.

CALL TRACING

Call Tracing enables the customer to initiate an automatic trace of the last call received.

Upon activation by the customer, the network automatically sends a message to the Company's Security Department indicating the calling number, the time the call was received, and the time the trace was activated. The customer using this feature would be required to contact the local business office or Annoyance Call Center for further action. The customer is not provided the traced number. At the customer's request, the Company will provide assistance and support. If the customer pursues with law enforcement, the Company will provide the call tracing information to law enforcement.

Only calls within central offices equipped with CCS7 are traceable using Call Tracing.

This feature will not work if the incoming call is from a telephone number in a multi-line hunt group, unless the telephone number is the main telephone number in the hunt group or is Telephone Number identified.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(T)

A112.19 Digital Electronic Business Set Service II (Cont'd)

A112.19.2 Definitions (Cont'd)

If the customer receives another call after hanging up from the annoying call, prior to activating the trace, Call Tracing will not record the correct number.

Call Tracing is available as follows: (a) monthly subscription, or (b) per Successful Trace. If the customer elects to subscribe to Call Tracing on a monthly basis, unlimited access to the feature is provided with no additional charge for each activation. Optionally, where facilities permit, any customer may utilize Call Tracing on a non-subscription basis with a per occasion charge for each successful activation of the feature.

Based on availability of facilities, access to Call Tracing - Per Successful Trace can be restricted at the customer's request. A secondary service order charge is applicable on orders involving this capability if no other work is being performed, except in the following cases: a) the first ninety (90) days following introduction of usage based Call Tracing in each area or, b) ninety (90) days following a new customer's connection date.

CONFERENCE, TRANSFER, HOLD, DROP

Conference - allows the set user to select an idle call appearance for the second leg of a three-way conference.

Drop - allows the set user to drop the last party added to a conference call. For a two-party call, pressing this button disconnects the set from the call.

Hold - allows the set user to place a call on hold by pressing the function button. Any set with the call appearance for the call on hold can pick up the call by pressing the call appearance button.

Transfer - allows the Digital Electronic Business Set user to transfer a call to another DN in the customer group by pressing the transfer button, dialing the DN, and pressing the button again.

DIRECTED CALL PICKUP WITH BARGE IN

Allows a designated set user to enter an existing conversation by depressing a key on a DEBS. Warning tone is provided to the parties on the existing conversation.

INSPECT/DISPLAY

Inspect - is used to retrieve and display which DN or feature is assigned to a DEBS button. This could be the active call, a call on hold, or an alerting call.

Time of Day and Date - display is a feature activated by a user pressing a feature button. When the switch receives a message containing the activation request for this feature, it changes the display mode to miscellaneous and sends the entire contents of the display to the terminal.

Deluxe Display - provides for all of the following (three) features:

- (1) Inspection of calls on hold
- (2) Terminal display of time and date
- (3) Time display of duration of call in progress

INTERCOM

Digital Business Set Intercom - allows the telephone to originate calls to a DN by using only the Intercom feature button.

Group Intercom/One-Digit - allows the telephone to originate a call to a DN by pressing the Intercom feature button and dialing one digit. (M)

Group Intercom/Two-Digit - allows the telephone to originate a call to a DN by pressing the Intercom feature button and dialing two digits. (M)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(T)

A112.19 Digital Electronic Business Set Service II (Cont'd)**A112.19.2 Definitions (Cont'd)**

(M)

MANUAL EXCLUSION

Allows a Digital Electronic Business Set user to inhibit other stations from picking up a call on hold or bridging on to a call that is active at that station. This feature is either activated before or during a call by activating a feature button. If Manual Exclusion is active at the completion of a call, it will automatically be deactivated by the switch.

NON-SHARED SECONDARY-ONLY DN

A secondary DN that appears on only one terminal.

REPEAT DIALING

Repeat Dialing, when activated, automatically redials the last number the customer attempted to call. If the called line is not busy, the call will be placed.

If the called line is busy, a confirmation announcement is heard, the customer hangs up and a queuing process begins. For the next thirty minutes, both the calling and called lines are checked periodically for availability to complete the call. If during this queuing process the called line becomes idle, the customer is notified, via a distinctive ring, that the network is ready to place the call. When the customer picks up the telephone, the call will automatically be placed.

SHARED ANALOG DN

For analog lines, allows an analog station set to share calls with the Digital Business Set station set.

SHARED PRIMARY DIRECTORY NUMBER (PDN)

A PDN that appears on more than one terminal. Up to 16 CAs for a shared PDN may exist.

SHARED SECONDARY-ONLY DN

A secondary DN that appears on more than one terminal but is not the primary DN on any of those terminals.

SIX-WAY CONFERENCE

Allows the set user to set up a conference call. The user presses the button and dials the DN of the party to be added to the conference. Conference calls can include members of the customer group and parties outside the group. Up to six parties can be connected simultaneously.

SPEED CALLING

Allows the user to dial a preassigned number by pressing the button assigned to speed calling and dialing one or two digits. This feature operates with the Call Transfer, Conference Calling, and Call Forwarding features.

A112.19 Digital Electronic Business Set Service II (Cont'd)

A112.19.3 Terms and Conditions (T)

- A. Digital Electronic Business Set service is a voice-only service. (M)
- B. The customer-provided equipment utilized must be compatible with the central office operation of the service.
- C. This service is provided on nonloaded facilities and is subject to the limitations of those facilities and of the central office providing the service.
- D. This service is provided under the *terms and conditions* in this Section and the *terms and conditions* that apply to Digital ESSX service in this and other *Guidebook* sections. (T)
- E. If the Digital Electronic Business Set service customer requires Integrated Digital Services (IDS) capabilities or features when and where available, the customer must convert to IDS service. The termination charges for this service will not apply if the contract period for the IDS service is greater than one month in length.
- F. Rates and charges for a Digital ESSX service main station line apply to each line provided for use by Digital Electronic Business Set service.
- G. The rates and charges in this section apply for the provision of the features listed in this section. Rates and charges located elsewhere in A112.28 for the listed features do not apply, unless otherwise stated. For features not listed in this section, the rates and charges located elsewhere in A112.28 apply, if available. (T)
- H. This service is provided within the Metallic Carrier Service Area only. Service required elsewhere may be provided under a Special Service Arrangement.

A112.21.1 General

- A. Prestige Deluxe Service is an expanded group of central office features that may be provided in association with individual Flat, Measured or Message Rate Business exchange lines served by electronic switching equipment located in Company buildings. (M)
- B. Prestige Deluxe Service is offered to subscribers having a minimum of two and a maximum of thirty Individual Business exchange access lines. (M)
- C. Prestige Deluxe Service is offered subject to the availability of facilities. The rates and charges for Prestige Deluxe, as applicable, are in addition to rates and charges for the individual exchange access lines in Section A3.
- D. Exchange Access lines terminating at different Prestige Deluxe locations may be combined into a single Prestige Deluxe arrangement for the same customer if the lines are all served by the same central office.
- E. Prestige Deluxe lines will utilize Touch-Tone signaling. The rates and charges for Touch-Tone service will apply as appropriate in Section A13. (T)
- F. The billing record of toll calls on lines using Prestige Deluxe Service will not be affected by the application of the features of this Service.
- G. Prestige Deluxe standard and optional station features, and optional system features are not permitted on the same line with existing Prestige, Custom Calling Service, or Customized Dialing Package Service described in other sections of this *Guidebook*. (T)
- H. Service availability and/or operation may vary depending upon the type of central office serving the Prestige Deluxe arrangement, and the capabilities of that office. In addition, those features which require activation by switchhook flash may conflict with the operation of customer owned electronic key premises equipment.
- I. Suspension of Prestige Deluxe Service is not permitted. The Business exchange lines may be suspended as addressed in Section A2. The Prestige Deluxe Service associated with those lines must be disconnected or billed at full rate. (T)
- J. The quality of transmission for calls utilizing Prestige Deluxe Call Forwarding Variable or Conferencing may vary depending on the distance and routing involved. The Company makes no representation as to the quality of the transmission on such calls.
- K. All calls from within the Prestige Deluxe arrangement to destinations outside the Prestige Deluxe arrangement must be preceded by a one digit access code. This includes calls to O (Operator) and 911 (emergency).
- L. The Company shall not be liable to any person for damages of any nature or kind arising out of, or resulting from, or in connection with the provision of Prestige Deluxe Service offered herein, including, without limitation, the inability of the station user, with or without dialing the one digit access code, to reach the operator, 911, or other emergency services.
- M. The features as listed following will be offered as standard station features. Each line terminated in a Prestige Deluxe Service arrangement will have access to these features.
 - Call Hold
 - Conferencing
 - Station-to-Station Calling
 - User Transfer
- N. In addition to the standard station features, certain features will be offered as optional station features and will be offered on a per line equipped basis. Optional station features do not have to be assigned to all lines in a Prestige Deluxe Service Arrangement.
- O. Station User Dial Access may be provided via Optional System features to certain miscellaneous lines (WATS, Tie, FX) and other customer oriented facilities (Loudspeaker Paging). (M1)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(T)

A112.21 Prestige Deluxe Service (Cont'd)

(M)

A112.21.2 Service Description**A. Standard Station Features**

1. Call Hold

The user of an exchange line equipped with this feature can place any established call on hold by flashing the switchhook and dialing a specified code. The user can originate another call or use the optional Call Pickup feature.

2. Conferencing

The user of an exchange line equipped with this feature can hold an in-progress call and complete a second call while maintaining privacy from the held call. In addition, the user may add the held call onto a three-way conference.

3. Station-to-Station Calling

The user of an exchange line equipped with this feature can call other lines in the same Prestige Deluxe arrangement by dialing four or five digits (the dialing plan is to be determined by the Company). Two user stations on the same line (same telephone number) cannot access each other via this feature.

4. User Transfer

The user of an exchange line equipped with this feature can transfer a call to another line within or outside the Prestige Deluxe arrangement.

B. Optional Station Features

1. Alternate Answering

This feature automatically transfers incoming calls that encounter a don't answer condition after a preselected number of rings (from 1 to 7) on the subscribing Prestige Deluxe line to an alternate designated line within the Prestige Deluxe arrangement. Because of technical limitations, the actual number of ring cycles before a don't answer call is transferred may vary slightly from the preset number. The destination telephone number and the approximate number of ring cycles before the call is transferred are specified by the customer at the time this feature is ordered. This feature is in operation on a continuous basis and cannot be activated or deactivated by the customer. Changes to the feature must be requested from the Company by service order.
