A112.26.12 Optional Service Features (Cont'd)

K. Miscellaneous Features (Cont'd)

1. Rates and Charges (Cont'd)

a. An additional common block may be required if certain feature parameters are exceeded. (Cont'd)

(22) Split Service

	Installation Charge	1 Month	Term Payment Plan Monthly Rate			USOC
			36 Months	60 Months	84 Months	
(a) Each additional Common Block	\$605.00	\$95	\$90	\$85	\$80	EBS
(23) Station Dial Code Screening ¹ Arrangement I						
(a) Per Main Station Line Equipped	6.80	.35	.30	.30	.30	SCR
(b) Per group with same Screening arrangements	320.80	62.00	56.00	55.00	54.00	SCW
(c) Per NPA (exclude HNPA) with C.O. code screening Initial Service	395.00	1.10	1.05	1.00	.95	SCY
(d) Additions to NPA or C.O. Code Group					Installation Charge \$152.00	USOC NA
(e) Deletions from NPA or C.O. Code Group					152.00	NA
(f) Rearrangement from one Screening arrangement to a different Screening arrangement per main station line or group of lines changed at the same time without main station line number change. ²					91.00	NA

Note 1: Except where all ESSX service main station lines have the same Arrangement, each main station line or group of main station lines requires a Split Service Offering Feature at the rate and charges as specified in this Section. This feature is not available on International Direct Distance Dialed (IDDD) calls. The provision of this feature will not affect the local or toll billing for any completed call. (T)

Note 2: Main Station line calling arrangement restrictions are not assured. This feature is intended to limit main station line direct dialed outgoing calls, but such calls may in certain circumstances, be completed and will be charged for as specified in other sections of this *Guidebook*. Main station lines with Station Dial Code Screening are assigned to a specific code screening arrangement by main station line number. Removal of the code screening arrangement from a main station line number(s) or changing the main station line number(s) from one code screening arrangement to a different code screening, requires a main station line number rearrangement. (T)

(24) Station Dial Code Screening, Arrangement II¹ (T)

		Term Payment Plan						
		Monthly Rate						
		Installation	1	36	60	84		
		Charge	Month	Months	Months	Months	USOC	
(a)	Per Main Station Line Equipped	\$6.80	\$-	\$-	\$-	\$-	SCG	
(b)	Per group with same screening arrangement and same access code	320.80	-	-	-	-	SCZ	
(c)	Per NPA with C.O. code Screening	370.00	-	-	-	-	SC1	
		Installation					USOC	
		Charge					NA	
(d)	Additions/Deletions to NPA Central Office Code, each						\$152.00	
(e)	Rearrangement from one Screening arrangement to a different Screening arrangement per main station line or group of lines changed at the same time without main station line number change. ²						91.00	NA (T)

Note 1: Arrangement II is available only with access to channels associated with private line networks and requires the associated facilities to be senderized and equipped with uniform numbering. (T)

Note 2: Main Station line calling arrangement restrictions are not assured. This feature is intended to limit main station line direct dialed outgoing calls, but such calls may in certain circumstances, be completed and will be charged for as specified in other sections of this *Guidebook*. Main station lines with Station Dial Code Screening are assigned to a specific code screening arrangement by main station line number. Removal of the code screening arrangement from a main station line number(s) or changing the main station line number(s) from one code screening arrangement to a different code screening, requires a main station line number rearrangement. L. Station Message Detail Recording - Premises (Obsoleted, See Section A112.)³ (T)

M. Station Message Detail Recording

1. General

a. Station Message Detail Recording (SMDR) is a feature that provides a record, by main station line number, of originating traffic routing over local lines, tie lines, WATS, Interexchange Carrier access lines and/or the toll network. The SMDR content may vary depending upon the switching technology from which the call record is generated.

b. The station message detail may include, but is not limited to, the calling main station line number, the called number, connect time and date, call duration, facility used, disconnect time, digits outpulsed by switch, and end of dialing. SMDR data provided to customers using the ETS feature may include, but is not limited to, incoming call identification, outgoing facility used, midnight passed, prefix digits, interLATA carrier, and call event code where these features are offered.

c. Station Message Detail Recording (SMDR) is designed for either an ETS or non-ETS ESSX service customer.

d. For SMDR data delivery rates and charges, see Network Usage Information Service in Section A32. (T)

e. SMDR as shown in this section is required for the activation of SMDR for ESSX service.

2. **Terms and Conditions** (T)

a. The Station Message Detail Recording (SMDR) may be offered on ESSX service main station lines of customers where facilities and technology permit.

b. SMDR is not represented to be a provision of billing detail.

Note 1: This feature is provided subject to the availability of facilities. (T)

Note 2: Requires customer provided terminal equipment. (T)

Note 3: Material previously found in this section has been obsoleted. A new SMDR feature is available in A112.26.12.M. (T)

A112.26.13 Customer Management Features (Obsoleted, See A112.11.1)

A112.26.14 (Obsoleted, See Section A112.)

A112.26.15 Customer Management Features

A. ESSX Customer Administration Service

1. General

- a. The ESSX Customer Administration Service (ECAS) feature permits ESSX service customers to activate/deactivate selected optional features, change certain service options, and change feature configurations on predesignated ESSX service station lines. Customer provided terminal equipment is required for the operation of the ECAS feature.
- b. For ECAS equipped station lines, ECAS allows the customer to verify and/or display the assignment of features on a single station line, range of station lines or all station lines to determine which station or stations have a particular feature or service option.
- c. Certain ESSX service station lines may be specified by the customer to be exempt from this feature. Additionally, the Company reserves the right to make station lines inaccessible for ECAS.
- d. Changing the status of a main station line from accessible to ECAS to inaccessible or vice versa, must be done by the Company via a Service Order request. Appropriate Service Order charges specified in Section A4. apply. (T)
- e. The Company has made the following provisions to protect the integrity of the switching system database and to ensure the security of ECAS changes.

Note 1: Requires appropriate rates and charges associated with Network Usage Information Service in Section A32. (T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(T)

A112.26 ESSX Service - Vintage II (Cont'd)

A112.26.15 Customer Management Features (Cont'd)

A. ESSX Customer Administration Service (Cont'd)

1. General (Cont'd)

- e. The Company has made the following provisions to protect the integrity of the switching system database and to ensure the security of ECAS changes. (Cont'd)
 - (1) An ECAS customer's change, display or verify capabilities are restricted to that particular customer's own ESSX service system.
 - (2) All changes are audited as they are entered by the ECAS customer. Invalid changes will not be accepted. An error message detailing which command is in error will be given.
 - (3) Customer access to the database is protected using dialup, login, password/dialback arrangement.
 - f. An ECAS customer can schedule changes (individual or bulk) for completion by the next day or for a future day. Additionally priority changes may be requested and the changes completed the same day subject to ***Terms and Conditions*** in this ***Guidebook***. (T)
 - g. Definitions pertaining to ECAS/ESSX service features are specified in A112.26.3. (T)
 - h. The ECAS feature allows the customer to perform the following transactions from the customer provided terminal:
 - (1) Change particular service options on a per station basis and exchange station telephone numbers (TNs). The change capabilities are:
 - Line Status (Active/Inactive)¹ (T)
 - CAT Code
 - Ringing Cycles for CFDA
 - Call Pickup Group: The call pickup group to which a station is assigned can be changed on a per station basis.
 - The Forward to Number can be changed for a station line with CFBL and/or CFDA assigned.
 - Speed Call Group: The Speed Call group to which a station is assigned can be changed on a per-station basis.
 - ~H~Series Completion "Hunt To" Telephone Number (TN): The "hunt to" TN assigned to a station line can be changed on a per station basis² (T)
 - Station TN Rearrangement: Swap TNs from one location to another³ (T)
- Note 1:** Station lines made inactive using ECAS will continue to be billed at the ***guidebook*** rates. (T)
Note 2: All numbers in series completion hunt must be in the same common block. (T)
Note 3: Rearranged station telephone numbers carry all features and characteristics to their new location unless the common block is also changed. (T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service - Vintage II (Cont'd)

A112.26.15 Customer Management Features (Cont'd)

A. ESSX Customer Administration Service (Cont'd)

1. General (Cont'd)

h. The ECAS feature allows the customer to perform the following transactions from the customer provided terminal: (Cont'd)

(1) Change particular service options on a per station basis and exchange station telephone numbers (TNs). The change capabilities are: (Cont'd)

- Facility Restriction Levels
- Access Line Class of Service
- Add/Change Customer Entered Listing Information
- The common block to which a station line is assigned when a customer has split service can be changed on a per station basis.

(2) Activate/deactivate the following features and service options on a single station line basis:

- Automatic Callback Calling
- Call Forwarding Busy Line
- Call Forwarding Don't Answer
- Call Forwarding Variable
- Call Forwarding Variable - Outside
- Call Hold
- Call Pickup
- Call Waiting Originating
- Call Waiting Terminating
- Dial Call Waiting
- Directed Call Pickup - Barge In
- Directed Call Pickup - Non Barge In
- Speed Calling - 6
- Speed Calling - 30
- Basic Station Line Hunting (Series Completion)^f
- Inhibit ETS queuing
- TouchTone

(T)

Note I: Deactivating Basic Station Line Hunting may disrupt the normal completion order of a Hunt Group.

A112.26 ESSX Service - Vintage II (Cont'd)

A112.26.15 Customer Management Features (Cont'd)

A. ESSX Customer Administration Service (Cont'd)

1. General (Cont'd)

h. The ECAS feature allows the customer to perform the following transactions from the customer provided terminal:
(Cont'd)

(2) Activate/deactivate the following features and service options on a single station line basis: (Cont'd)

- Distinctive Ring/Call Waiting Tone
- Conference Calling - 6 way

(3) The following information can be displayed to aid in system management.

- The configuration of a single ESSX service station line (i.e., service options and active station line features)
- The number of stations having or not having a particular feature
- Pending TN swaps
- The series completion sequence of a station line
- Selected Company entered information affecting customer station lines
- Customer Entered Listing Information
- The number of call pickup groups in the system

(4) An ECAS customer may also print the following administrative reports.

- Configuration (i.e., service options, station features) for a single station line or span of ESSX service station lines.
- A listing of all pending changes including the type of change and the scheduled effective date.
- Customer Entered Listing Information

The following information is included on all ECAS changeable station lines.

- Station Telephone Number
- Name^I
- Organization^I
- Location^I

(T)

(T)

(T)

Note I: The ECAS customer is responsible for entering and updating the information contained in this field.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(T)

A112.26 ESSX Service - Vintage II (Cont'd)**A112.26.15 Customer Management Features (Cont'd)****A. ESSX Customer Administration Service (Cont'd)****1. General (Cont'd)**

h. The ECAS feature allows the customer to perform the following transactions from the customer provided terminal: (Cont'd)

(5) Initial training of the customer for up to four system managers in the use of this feature is included at the time the feature is put into service. Communication counselor training is a prerequisite to the ECAS system manager training. Any customer training or subsequent assistance necessary after the initial installation of the feature is at the option of the customer and a Subsequent Training Charge applies per hour where such training is provided.

i. An ECAS customer can add, change and delete authorization codes.

j. ESSX service main station lines reserved for future use via DialTone provisioning include preassigned telephone numbers and the facilities required. Such telephone numbers and facilities will be removed from reserved status and assigned as active main station lines as requested by the customer.

k. The assignment of reserved ESSX service main station line facilities and the sequence of numbers for DialTone provisioning assigned to a subscriber's system is made at the discretion of the Company.

l. DialTone provisioning is furnished subject to the availability of facilities and telephone numbers.

m. Calls to telephone numbers reserved (but not activated) via DialTone provisioning will be routed to intercept over ESSX service common recorded announcement facilities as specified in A112.26.1. (T)

n. Telephone numbers and telephone facilities for ESSX service main station lines furnished via DialTone provisioning while in reserved status will be billed at 60 percent of the ESSX service main station line rate (Intercom and Wire Center Line charges).

o. Telephone numbers and telephone facilities for ESSX service main station lines furnished via DialTone provisioning retain their reserved status until assigned to a main station line at which time the service assumes rates and charges applicable to an ESSX service main station line.

p. ESSX service main station lines reserved via DialTone provisioning will be included in the determination of System Size (Small, Medium or Large).

q. To gain access to the Company's Dial Access network, the subscriber must have one Security Card for each System Manager accessing the ECAS Database. Subscribers under an existing ECAS contract will be issued up to (not to exceed) three (3) Security Cards at no additional charge when required by the Company to use a Security Card to access the Company's network.

Once the first three (3) Security Card(s) have been issued, the subscriber must pay for any subsequent Security Cards. Should the subscriber require more Security Cards, they may be ordered from 3. following.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(T)

A112.26 ESSX Service - Vintage II (Cont'd)

A112.26.15 Customer Management Features (Cont'd)

A. ESSX Customer Administration Service (Cont'd)

1. General (Cont'd)

- r. The Security Card rate element will provide for the issuance of a card for each System Manager or for the replacement of lost, stolen or expired cards. If the subscriber has purchased a Security Card in conjunction with another feature or service offered by the Company, that Security Card may also be used in conjunction with Customer Control. It is up to the subscriber to notify the Company of an existing Security Card so the Company can ensure that the card is validated for ECAS.

2. *Terms and Conditions*

- a. ECAS is provided only with ESSX service served from a No. 1/1A ESS central office and is furnished subject to the availability of facilities. (T)
- b. Customers equipped for ECAS must order via a service order¹ ECAS changeable features in groups of five (5), except as noted, at the rates specified in this *Guidebook*. (T)
- c. Non-ECAS changeable features with the exception of Three-Way Calling, Consultation Hold, Call Transfer (all calls) will be added subject to the specifications and rates in A112.26.8, A112.26.9, A112.26.10 or A112.26.12 as appropriate. Three-Way Calling, Consultation Hold, Call Transfer (all calls) is offered in groups of five (5) at the rates specified in this *Guidebook*. (T)
- d. Features for ECAS exempt station lines must be requested via a Service Order¹ and added by the Company. Rates and Charges for the features specified in A112.26.8, A112.26.9, A112.26.10 or A112.26.12 apply as appropriate. (T)
- e. The customer provided ECAS terminal equipment requires an ESSX service main station line. Rates and charges in A112.26.8, A112.26.9 and A112.26.10 apply as appropriate.
- f. ECAS changes must be entered prior to a time to be designated by the Company to be completed as priority changes or by the next day as requested by the customer.
- g. An ECAS customer cannot activate features in excess of the quantity that has been ordered from the Company. The customer will receive an indication when 100% utilization of a feature is reached. Additional quantities of features may be added subject to *Terms and Conditions*. (T)
- h. Contractual obligations and End User Common Line charges will be billed to the location where originally installed and will not transfer with a station number rearrangement.
- i. If the Company is requested to load ECAS changeable features for new ESSX service/ECAS customers, Installation Charges specified in 3. following applies per ECAS feature added.
- j. The following types of lines will be restricted from Station TN Rearrangement capability. Service options and feature change capabilities will still be available except on lines assigned to multiline hunt groups.
- Station lines assigned to multiline hunt groups
 - Attendant Lines (M)
 - Any ESSX service line which as a special hardware configuration (e.g., ground start lines and lines having signal distribution points) (M)
 - Manual lines (e.g., station lines with full originating and/or terminating restrictions) (M)

Note 1: Appropriate Service Order charges specified in Section A4. will apply.

2. *Terms and Conditions* (Cont'd)

(T)

(M)

- k. ECAS functions performed by the Company at the customer's request subsequent to the initial installation will be subject to the nonrecurring charge specified in 3. following.
- l. The Per System charges specified in 3. following apply when a feature is initially activated in a Common Block.
- m. Any required changes in customer provided equipment as a result of growth, desired enhancements or technological advancement, will be the responsibility of the ECAS customer. Compatibility with customer provided station terminal equipment is not guaranteed.
- n. The ECAS customer is responsible for assigning and maintaining a record of station feature assignments. The ECAS customer also agrees to provide the Company with a central point of contact for inquiries and/or trouble reports involving station features.
- o. ECAS customers will be responsible for initiating a Service Order to correct any information pertaining to Directory Listings that changed as a result of an ECAS TN swap. The appropriate Service Order charges specified in Section A4. apply.
- p. The number of TN swaps that can be requested as priority changes will be determined by the Company when ECAS is ordered.
- q. When required by the Company to use a Security Card, the ECAS subscriber will be required to authenticate with the card before network access is permitted. The network access security system validates the user, and establishes the call across the network to the ECAS host computer. In conjunction with the Security Card, the Company will provide a login and password in order to maintain secure access and an audit trail. Rates for the Security Card are outlined in 3. following.

3. Rates and Charges

ESSX service-L customers will have the option of paying for ECAS on either a per system or a per line basis. Customers choosing to pay on a per system or a per line basis will be subject to the rates specified in this *Guidebook*. The installation charge will be reapplied if an ESSX service-L customer changes their ECAS billing arrangement subsequent to the installation of the ECAS feature.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service - Vintage II

(Obsoleted 05-30-96, Type 4) Service rates and charges in this section are available for inward activity of existing subscribers only as specified following. Not available for new service or entire moves of existing service to new locations.

Obsolescence Rules

1. Inward activity for Digital ESSX service - Vintage II will be allowed.
2. Digital ESSX service - Vintage II subscribers under the month-to-month payment option will be allowed to maintain their service at month-to-month rates.
3. Digital ESSX service - Vintage II subscribers who have a portion of their existing service under a month-to-month payment option and a portion of their existing service under a Term Payment Plan may remain under the rates and charges outlined in this Section until such a time that the Term Payment Plan associated with the Common equipment expires. Upon expiration of the Term Payment Plan associated with the Common Equipment, the Company reserves the right to convert all or part of the subscriber's account to the month-to-month rates and charges as outlined in this **Guidebook**. (T)
 The subscriber can place their month-to-month rates under rates and charges equivalent to their Common Equipment Term Payment Plan.
 Should the subscriber elect not to convert their month-to-month rates and charges to the Term Payment Plan, they may remain on the month-to-month rates and charges.
4. Digital ESSX service - Vintage II subscribers under a Term Payment Plan will be allowed to maintain their Digital ESSX service - Vintage II until the expiration date associated with the Common Equipment of their contract. Upon expiration of the Term Payment Plan associated with the Common Equipment, the Company reserves the right to convert all or part of the subscriber's account to the month-to-month rates and charges as outlined in this **Guidebook**. (T)
5. Digital ESSX service - Vintage II subscribers under a Term Payment Plan will have until 11-30-96 to exercise the recast as described in A112.28.6, for a Term Payment Plan of not greater than 84 months in length. Digital ESSX - Vintage II service subscribers under a month-to-month payment option will have until 11-30-96 to convert to a Term Payment Plan of not greater than 84 months in length.
6. Existing Digital ESSX service - Vintage II subscribers who are under a Term Payment Plan may add a new secondary location (SLA) or move an existing SLA of their existing service.
7. Conversions from ESSX-1 service to Digital ESSX service - Vintage II will not be allowed under this **Guidebook**. (T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service - Vintage II (Cont'd)

A112.28.1 General

- A. Digital ESSX service is furnished from Digital Central Office equipment located on Company premises and associated facilities so arranged as to provide the following basic service features:
 1. Direct Inward Dialing (DID) and Direct Outward Dialing (DOD) of exchange and long distance message network calls to and from stations and attendant positions of a subscriber's digital system.
 2. Intercommunication calls between stations of the same subscriber's digital system.
 3. Identified Outward Dialing (IOD), by station number of outgoing long distance message calls dialed by a station. Only calls billed to the subscriber by this Company will be provided this identification.
 4. Common recorded announcement interception of calls to unassigned station numbers.
 5. Basic Station Line Hunting.
- B. Digital ESSX service will be furnished in four categories, based on the size of the subscriber's system.
 1. Digital ESSX service-VS will serve systems with 1-24 Main Station Lines.
 2. Digital ESSX service-S will serve systems with 25 -200 Main Station Lines.
 3. Digital ESSX service-M will serve systems with 201-600 Main Station Lines.
 4. Digital ESSX service-L will serve systems with more than 600 Main Station Lines.
- C. A subscriber's system derived from Digital ESSX service may be comprised of the following components:
 - Common Equipment¹
 - Network Access¹
 - Main Station Lines¹
 - Terminating Arrangements
 - Features

The Common Equipment, Network Access and Terminating Arrangements will be at the rates and charges as specified in A112.28.7. (T)

Main Station Line rates will consist of the intercom charge and the appropriate wire center line charge or equivalent. These charges will be located in A112.28.8, A112.28.9, and A112.28.10 for Digital ESSX service (Very Small, Small, Medium and Large) respectively.

Note 1: Every system will include these components.

A112.28 Digital ESSX Service - Vintage II (Cont'd)

A112.28.1 General (Cont'd)

- C. A subscriber's system derived from Digital ESSX service may be comprised of the following components: (Cont'd)

Line and System Features for Digital ESSX service will be grouped as follows:

A Line Features Grouped

A Line Features Individual

Optional Service Features

Customer Management Features¹

(T)

A Line Features will be offered on a grouped basis to subscribers of Digital ESSX service who have selected a Term Payment Plan of 36, 60 or 84 months. Subscribers selecting the one month payment option will be offered the Group A Line features on an individual basis only.

Optional System Features and the Customer Management Features will be offered to subscribers of Digital ESSX service under all payment plan options subject to the specific requirements within each arrangement.

A Digital ESSX service-VS or S subscriber will select Group A Features in A112.28.8.

(T)

A Digital ESSX service-M subscriber will select Group A Features in A112.28.9.

(T)

A Digital ESSX service-L subscriber will select Group A Features in A112.28.10.

(T)

Optional Service Features will be offered to all subscribers of Digital ESSX service in A112.28.11.

(T)

Customer Management Features will be offered to all subscribers of Digital ESSX service in A112.28.13.

(T)

A112.28.2 Terms and Conditions

(T)

- A. Digital ESSX service is furnished subject to the availability of facilities and features from Digital Central Office equipment, located in a central office building owned or leased by the Company. The service allows for normal station activity including incidental additions and deletions. Major additions to and or major relocations of a subscriber's Digital system are subject to the same *terms and conditions* as initial installations.
- B. Certain Auxiliary Services are available on an individual main station line basis and are subject to the capabilities of the serving central office.
- C. Optional Service Features as listed in A112.28.11 include Attendant Features and Auxiliary Attendant Features. These features may require customer provided compatible terminal equipment.
- D. All console functions by the attendants at the subscriber's premises are performed at the expense of the subscriber and must conform with the operating practices and procedures of the Company to maintain a proper standard of service.

(T)

Note 1: Systems subscribing to the DECAS Feature in A112.28.13 must select DECAS Changeable Features subject to the rates, *terms and conditions* in A112.28.13.

(T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service - Vintage II (Cont'd)

A112.28.2 Terms and Conditions (Cont'd)

- E.** All Digital ESSX service main station lines must be associated with the main switching equipment. Satellite switching equipment is not offered with Digital ESSX service. (T)
- F.** Tie lines for direct connections between a basic subscriber's Digital system and other systems are provided primarily for communication between stations of the two systems. In such cases, rates and charges for tie line service as specified in Section A13. and miscellaneous line termination charges apply. In addition, these tie line connections may be arranged to provide completion of incoming or outgoing local and long distance calls through the subscriber's Digital system to or from other systems (Digital ESSX service or non-Digital ESSX service) provided such connections to the exchange or long distance network are only made at one system at a time. (T)
- G.** Where completion of incoming and outgoing local and long distance calls through a subscriber's Digital system is furnished to or from main station lines of a separate subscriber's Digital system in another exchange or a subscriber's non-Digital system in the same or different exchange, the charges applicable for the following features apply in addition to the regular charges for the facilities connecting the systems except for Subsidiary System Arrangements furnished under the *terms and conditions* specified in A112.28.11. (T)
 - 1. Rates and charges as specified in Section B3. of the Private Line *Guidebook* apply to miscellaneous lines furnished with unique access codes (trunk level access) except for tie lines furnished in connection with Subsidiary System Arrangements as specified in A112.28.11. (T)
 - 2. Digital ESSX service optional feature charges as outlined in Section A112.28.8, 9 and 10 apply for each trunk terminated main station line as offered in Section A112.28.7, as appropriate. (T)
- H.** Dormitory service is furnished in accordance with the *terms and conditions* for Dormitory Communications Service specified in Section A13. (T)
- I.** A system may not be provided for Intercommunication (standalone) service only. Access to the Exchange Network must be provided.
- J.** A mixture of Flat Rate and Message or Measured Rate Service will not be allowed within a single customer system except where that single customer system serves a hotel/motel or hospital. For hotel/motel and hospital application, Message or Measured Rate Service, if provided for guest/patient service, must have a separate dial access code from the flat rate service provided for administrative stations and be restricted from use of the administrative flat rate service.
- K.** Suspension of Service
With the exception of Network Access Registers, suspension of Digital ESSX service is not permitted.
- L.** A twelve month minimum service period shall be required if the subscriber's system is a Digital ESSX service -M or L. The normal minimum service period as specified in Section A2. will be applicable to Digital ESSX service -VS or S. (T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service - Vintage II (Cont'd)

A112.28.2 Terms and Conditions (Cont'd)

- M. Directory Listings will be furnished subject to the rates, *terms and conditions* specified in Section A6. (T)
- N. The number of simultaneous exchange and toll network calls to and from main station lines and attendant positions of a subscriber's Digital system is limited by the number of Network Access Registers subscribed to by the customer. Each Network Access Register may be arranged for two-way, one-way incoming or one-way outgoing operation depending upon the option of the customer at the time the Network Access Register is installed. When a change in the type of operation is requested by the customer, the appropriate Service Charges as specified in Section A4. apply per occasion. The Central Office Line Charge (COLC) in Section A4. is applicable only to Digital ESSX service main station lines. (T)
- O. Service charges, as specified in Section A4, apply to all subscriber's of Digital systems except as provided in A112.28.5. (T)
- P. Digital ESSX service installation charges are due on initial installation or subsequent additions unless deferred over a predetermined period of time as specified in this Section. (T)
- Q. If the subscriber of Digital ESSX service elects a Message or Measured Rate Service option, Message or Measured Rate Service usage charges specified in Section A3. are applicable on calls to locations outside the subscriber's Digital system in addition to rates and charges in this and other *guidebook* sections for Digital ESSX service and other associated services. Usage charges are not applicable on calls originated and terminated within the same subscriber's Digital system. (T)
- R. Digital ESSX service main station lines may be restricted from dialing three-digit central office and service codes by applying Code Restriction to the line. The three-digit codes which may be restricted constitute those codes to which Public Announcement, Directory Assistance or Dial-It¹ Services (e.g., 900, 976, 211, 311, 511, 711, and 811 calls) are assigned which could generate billing to the originating main station line. Code Restriction arrangements may also be used to prohibit toll calls to a carrier other than the Presubscribed Interexchange Carrier (dialed 10XXX). InterLATA calls dialed 0- (operator handled) calls cannot be restricted. The term "Public Announcement Services" as used herein are those services which, in the judgement of the Company, furnish advertised recorded announcement messages to the general public (e.g., time, weather, sport scores and stock market reports). The Public Announcement Service central office codes will be determined by the Company and will be commonly denied access in the central office serving the subscriber's Digital systems subscribing to this service arrangement. (T)
 - 1. At the time a Code Restriction arrangement is installed, the subscriber's Digital system will be arranged for the Code Restriction specified by the customer and the main station lines designated by the customer will be so equipped. When the customer requests the subsequent addition or removal of code restriction on a main station line, the Service Order No Premises Visit (SONPV) charge as specified in Section A4. for a change in line termination applies per main station line affected except that no such charges apply when the code restriction arrangement is disconnected in its entirety. (T)
 - 2. Where Code Restriction applies to a particular central office code, direct outward dialed main station line access is denied to telephone numbers associated with that central office code.
 - 3. Code Restriction Arrangements to deny access to Directory Assistance and/or Public Announcement Services are not assured. These features are intended to limit main station line direct dialed outgoing calls, but such calls may, in certain circumstances, be completed and will be charged for in the normal manner.

Note 1: Dial-It is a service of AT&T.

(T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service - Vintage II (Cont'd)

A112.28.2 Terms and Conditions (Cont'd)

- S. For purposes of application of End User Access Charges only, as set forth in BellSouth F.C.C. No. 4, Digital ESSX service main station lines for use by residents of dormitory living quarters will be considered residential service. Main station lines terminated in dormitory housing for administrative or other business use will not fall in this classification. (T)
 - T. Digital ESSX Customer Administration Service (DECAS) may be provided with Digital ESSX service where facilities permit.
 - U. The first system established per customer within a Local Calling Area must consist of a minimum of one (1) Main Station Line. Systems installed or ordered prior to December 24, 1991 are not subject to this *term and condition*. Small systems installed or ordered prior to December 24, 1991 may have less than 25 main station lines. (T)
 - V. Digital ESSX service subscribers with rates and charges applicable out of the Vintaged Section A112.13 may subscribe to features found in A112.28 but not offered in A112.13. (T)
 - W. Digital ESSX service subscribers with rates and charges applicable out of the Vintaged Section A112.13 wishing to add or change features must apply nonrecurring charges as indicated in A112.28. (T)
 - X. Features followed with I are unique to the DMS-100 switch and those with II are unique to the 5ESS switch.
 - Y. Call Return, Call Tracing, Repeat Dialing, Calling Name Display, Caller ID and Calling Number Delivery Blocking are Optional Service Features listed in A112.28.12. These features require the implementation of Common Channel Signaling System #7 (CCS7) into the network and may have limited availability. These features will only operate interoffice on local calls originating and terminating within Central Offices equipped with CCS7. These features will operate intraoffice prior to implementation of CCS7. These features will not work on an originating basis with party-line service, Toll Terminals, Trunks, and some Remote Switching Locations.
- The Company will deliver all numbers, subject to technical limitations, including telephone numbers associated with Non-published Listing Service as described in Section A6. (T)
- Calling Number Delivery Blocking - Permanent is available upon request, at no charge, to the following entities: (a) established shelters of private, non-profit and publicly funded domestic violence intervention agencies; and (b) federal, state, and local law enforcement agency offices.
- Calling Number Delivery Blocking - Per Call is provided subject to availability of facilities where technically feasible. The Company assumes no liability for and will be held harmless from any incompatibility of the customer's CPE to perform satisfactorily with the network feature described herein.
- The Company's liability arising out of the provision of these features, including but not limited to the delivery or non-delivery of calling numbers, or the provision of other anonymity options to law enforcement agencies, is limited as set forth in A2.5.1. (T)
- Caller ID is available on Electronic Telephone Sets in A112.28.11. (T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(T)

A112.28 Digital ESSX Service - Vintage II (Cont'd)

A112.28.2 Terms and Conditions (Cont'd)

(T)

- Z.** Digital ESSX service subscribers ordering "Assumed Dial '9'" must use station terminal equipment that utilizes dual tone multi-frequency (DTMF) signaling.
- AA.** For every Digital ESSX service main station line extended into a Foreign Exchange the Digital ESSX service subscriber must terminate a Digital ESSX service main station line in the exchange in which their common equipment is located. Digital ESSX service main station lines extended into a Foreign Exchange do not apply toward the four line minimum.
- AB.** Restriction of Calls to the Expanded Local Calling Area will not be available to Hotels, Motels, Hospitals, Pay telephone providers and others who provide telephone service to the transient public.

A112.28.3 Definitions

ACCESS CODE RESTRICTION GROUP (ACRG) (CAT CODES)

An ACRG will allow Stations (assigned to that ACRG) access to predefined facilities. Station access to facilities is restricted by the station ACRG assignment to the predefined facilities. Up to eight ACRGs can be established by the Company for each group.

ACCESS LINES TO CUSTOMER PROVIDED FEATURES

Allows dial access from Digital ESSX service for connection to customer provided features. (Recorded Telephone Dictation, Dial Code Sending Equipment and Loudspeaker Paging).

ADDITIONAL ANNOUNCEMENT

Second or third announcement available with Automatic Call Distribution or Uniform Call Distribution.

ADDITIONAL DIRECTORY NUMBERS

An assigned Directory Number other than the Primary Number on an Electronic Business Set (EBS).

ANONYMOUS CALL REJECTION (ACR)

This feature allows customers to automatically reject incoming calls when the call originates from a telephone number which has invoked a privacy feature that prevents the delivery of their number to the called party. When Anonymous Call Rejection is activated on the customer's line and an incoming call marked private is received, the called party's telephone will not ring. The call will be routed to an announcement and subsequently terminated. The announcement informs the calling party that the person he or she is trying to reach will not accept the call as long as the calling number is private. Incoming calls are checked for acceptance or rejection by Anonymous Call Rejection regardless of the current state of the ACR customer's line (e.g. off hook or idle).

ASSUMED DIAL '9'

Utilizes central office capabilities to allow the main station line equipped to access the network without dialing '9'.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(T)

A112.28 Digital ESSX Service - Vintage II (Cont'd)**A112.28.3 Definitions (Cont'd)****ATTENDANT ACCESS LINE**

An attendant access line connects customer provided attendant terminal equipment to the serving central office. These lines are used for the completion of calls directed to the attendant, extension of those calls to stations and attendant assistance for stations.

ATTENDANT ACTIVATION/DEACTIVATION OF CALL FORWARDING

Allows a console attendant to program, activate and/or deactivate Call Forwarding for stations assigned Call Forwarding - Variable.

ATTENDANT ACTIVATION/DEACTIVATION OF MESSAGE WAITING

Permits an attendant to activate/deactivate Message Waiting for Message Waiting equipped main station lines.

ATTENDANT CALL TRANSFER

This feature allows the attendant to transfer a call to another Directory Number (DN) or another attendant position.

ATTENDANT AUTODIAL

This feature permits an attendant to dial frequently called numbers by depressing the Autodial feature key, which is programmed with the number.

ATTENDANT CAMP-ON AND CAMP-ON MODE OPTIONS

This feature allows incoming listed number calls, which the attendant attempts to complete to a busy main station line, to be held waiting and then automatically connected when the called main station line becomes available. An indication of camp-on will be given to the busy main station line each time the attendant attempts a completion.

ATTENDANT CAMP-ON WITH DISTINCTIVE TONE

This feature allows incoming listed number calls, which the attendant attempts to complete to a busy main station line, to be held waiting and then automatically connected when the called main station line becomes available. An indication of the distinctive tone will be given to the busy main station line.

ATTENDANT CONFERENCE

Using a six-port conference circuit, an attendant may interconnect up to five conferees on one call. The sixth port is required for attendant access.

ATTENDANT CONTROL OF FACILITIES

Attendant Control of facilities (ACOF) permits an attendant to restrict dial access by all stations to tie lines, FX lines and WATS lines. This feature can also be used to restrict access to any dial access code activatable feature. It does so by establishing groups of facilities and/or features that simultaneously will be activated. This feature can be accessed via key or a dial access code.

ATTENDANT GROUP TRUNK ACCESS CONTROL

This feature utilizes special keys on the customer provided attendant console to serve as a common interface for trunk group busy and trunk group access for all trunk groups allocated to the customer group.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(T)

A112.28 Digital ESSX Service - Vintage II (Cont'd)**A112.28.3 Definitions (Cont'd)****ATTENDANT POSITION**

Customer provided terminal equipment utilized for attendant control and call connecting functions.

ATTENDANT RECALL TIMER

This feature returns attendant-extended calls to a main station to the attendant after a prescribed waiting period if the main station user is unable to answer.

ATTENDANT SERVICE

Incoming calls to the main listed number are answered by an attendant, who may complete the call to the desired main station line by means of the Call Transfer feature. An unrestricted or semirestricted main station line user may dial the attendant over attendant lines to secure help in the completion of an outgoing call by means of Dial "0" calling.

ATTENDANT SPEED CALLING

Allows an attendant to dial frequently dialed numbers by depressing a speed call key and dialing one or two digits instead of all the digits in the number.

ATTENDANT/STATION CONTROLLED OUTGOING RESTRICTIONS

Allows the attendant or designated station to place restrictions on call origination for individual directory numbers or groups of directory numbers.

AUTOMATIC CALL DISTRIBUTION I (ACD)

Automatic Call Distribution (ACD) features provide advanced call distribution and queuing capabilities as an integrated function of Digital ESSX service. The ACD features are grouped into two sets: ACD Basic, without Network Management Reports (NMR) and ACD with NMR.

AUTOMATIC CALLBACK/RING AGAIN

Automatic Callback permits a main station line user who attempts an intercommunication call to a busy main station line to be automatically connected to that line when both called and calling lines are subsequently idle.

AUTOMATIC LINE

Station specially programmed to dial specific internal station number or "0" for the attendant when the station user goes off-hook.

AUTOMATIC ROUTE SELECTION

Automatic Route Selection is an optional feature, available where facilities permit, that allows station users, by dialing a preselected code to automatically select the preferred route subscribed for by a customer for network calls. Alternate routing to other facilities, subscribed to by the customer, is also provided. This arrangement is available for use with Foreign Exchange (FX), WATS, CCSA off-net, tie lines and Interexchange Carrier (IC) access lines which are compatible with ARS and toll network facilities.

BASIC TERMINATIONS

See Miscellaneous Line Terminations

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(T)

A112.28 Digital ESSX Service - Vintage II (Cont'd)**A112.28.3 Definitions (Cont'd)****BUSINESS SET INTERCOM**

Places an intercom call between two Electronic Business Set stations automatically when a designated button is depressed.

CALL-BACK QUEUE

See Queuing

CALL FORWARDING - BUSY LINE

Automatically routes calls to the attendant or preselected main station line when the called main station line is busy. This feature may be either fixed (changeable by service order only) or programmable (customer changeable) by station user via feature activation code.

CALL FORWARDING - DON'T ANSWER

Automatically routes calls to the attendant or preselected main station line when the called main station line doesn't answer within the preset ringing cycle. This feature may be either fixed (changeable by service order only) or programmable (customer changeable) by station user via feature activation code.

CALL FORWARDING - VARIABLE

When activated by a main station line user, automatically routes calls intended for his main station line to any other main station line selected within the same system or optionally outside the subscriber's Digital system. The main station line selected may also be the attendant. The attendant may also activate call forwarding for a main station line.

CALL HOLD

Allows a main station line user to place any call involving their main station line on hold by flashing and dialing a special code. The main station line is then free to originate another call. The first call is retrieved by dialing the hold code a second time.

CALL PARK

Call Park allows the attendant to park calls against any directory number in the attendant customer group or allows station users to park calls against their own directory number. The parked call may be retrieved from any station by dialing the feature access code for retrieval plus the directory number.

CALL PICKUP

Allows a main station line user to answer calls directed to another main station line within the same preset call pick-up group.

CALL RETURN

This feature enables a customer to place a call to the telephone number associated with the most recent call received, whether or not the call was answered or the number is known. The customer can dial a code to request that the network place the call.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(T)

A112.28 Digital ESSX Service - Vintage II (Cont'd)**A112.28.3 Definitions (Cont'd)****CALL RETURN (Cont'd)**

If the called line is not busy, the call is placed. If the called line is busy, a confirmation announcement is heard. Once the customer hangs up, the network will monitor the busy/idle status of both lines every forty-five seconds for up to thirty minutes. If during the queuing process both lines become idle, the customer is notified, via a distinctive ring (short, short, long), that the network is ready to place the call. When the customer picks up the telephone, the call will automatically be placed. If unanswered by the customer, the distinctive ring will repeat every five minutes until answered, or for the remainder of the thirty minute monitoring interval. Multiple numbers may be placed in queue. The first idle number will be connected first. Both the customer and the called party may originate and receive calls without affecting the call return feature status.

CALL TRACING

Call Tracing enables the customer to initiate an automatic trace of the last call received.

Upon activation by the customer, the network automatically sends a message to the Company's Security Department indicating the calling number, the time the call was received, and the time the trace was activated. The customer using this feature would be required to contact the local business office or Annoyance Call Center for further action. The customer is not provided the traced number. At the customer's request, the Company will provide assistance and support. If the customer pursues with law enforcement, the Company will provide the call tracing information to law enforcement.

Only calls within central offices equipped with CCS7 are traceable using Call Tracing.

This feature will not work if the incoming call is from a telephone number in a multi-line hunt group, unless the telephone number is the main telephone number in the hunt group or is Telephone Number identified.

If the customer receives another call after hanging up from the annoying call, prior to activating the trace, Call Tracing will not record the correct number.

Call Tracing is available as follows: (a) monthly subscription, or (b) per Successful Trace. If the customer elects to subscribe to Call Tracing on a monthly basis, unlimited access to the feature is provided with no additional charge for each activation. Optionally, where facilities permit, any customer may utilize Call Tracing on a non-subscription basis with a per occasion charge for each successful activation of the feature.

Based on availability of facilities, access to Call Tracing - Per Successful Trace can be restricted at the customer's request. A secondary service order charge is applicable on orders involving this capability if no other work is being performed, except in the following cases: a) the first ninety (90) days following introduction of usage based Call Tracing in each area or, b) ninety (90) days following a new customer's connection date.

CALL TRANSFER

Call Transfer provides for the transfer of calls by a Digital ESSX service main station line. The Call Transfer feature is needed in addition to Three-way Calling if the station's type of call transfer is different from the call transfer type selected for the customer's group.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(T)

A112.28 Digital ESSX Service - Vintage II (Cont'd)**A112.28.3 Definitions (Cont'd)****CALL WAITING - TERMINATING**

Informs a busy main station line, when the main station line is so equipped, that an incoming call is waiting (burst of tone), and permits holding the present connection while answering the new call and return to the original connection.

CALL WAITING - EXEMPT

Call Waiting-Exempt allows a called station to be exempt from Dial Call Waiting and Call Waiting-Originating.

CALL WAITING - ORIGINATING

Allows an equipped main station line to send the Call Waiting tone to any busy main station line in the same system.

CALL WAITING INDICATION

This feature is installed at the MLHG (Multi Line Hunt Group) customer premises. Customer provided equipment is also required to provide an indication of the call delay experiences by callers that are waiting on queue to be answered.

CALL WAITING - INTRAGROUP

Permits intragroup calls to a busy main station line equipped with the feature to be answered while the existing call is held.

CALL WAITING RINGBACK ALERT

A terminating main station line feature that provides a distinctive alert which indicates to the caller that a called main station line is busy but has received a Call Waiting indication.

CALLER ID

This feature enables the customer to view on a display unit the Directory Number (DN) on incoming telephone calls.

When Caller ID is activated on a customer's line, the Directory Numbers of incoming calls are displayed on the called CPE during the first long silent interval of the ringing cycle.

Any customer subscribing to Caller ID will be responsible for the provision of a display device which will be located on the customer's premises. The installation, repair, and technical capability of that equipment to function in conjunction with the feature specified herein will be the responsibility of the customer. The Company assumes no liability and will be held harmless for any incompatibility of this equipment to perform satisfactorily with the network features described herein.

If the incoming call is from a caller served by a PBX, only the main number of the PBX is transmitted and available for display.

If the incoming call originates from a multi-line hunt group, the telephone number transmitted will always be the main number of the hunt group unless the line is Telephone Number (TN) identified.

Caller ID is not available on operator handled calls.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(T)

A112.28 Digital ESSX Service - Vintage II (Cont'd)**A112.28.3 Definitions (Cont'd)****CALLING NUMBER DELIVERY BLOCKING - PERMANENT**

This feature enables certain customers as described in A112.28.2 to prevent the transmission of their Directory Number and/or Directory Name on all outgoing calls placed from the customer's line. Calling Number Delivery Blocking - Permanent is in operation on a continuous basis. A service order is required to establish or remove this feature.

If the preassigned access code for Calling Number Delivery unblocking - Per Call is dialed on a line that is provisioned with Calling Number Delivery - Permanent, the Directory Number and/or Directory Name will be delivered.

CALLING NUMBER DELIVERY BLOCKING - PER CALL

This feature allows a customer to temporarily prevent the transmission of that customer's Directory Number and/or Directory Name and thus control it's availability to the called party.

The transmission of the Directory Number and/or Directory Name can be temporarily prevented on an as needed basis by dialing a preassigned access code prior to making a call. This action must be repeated each time a call is made to prevent the transmission of the Directory Number and/or Directory Name.

CALLING NAME DISPLAY

This feature enables the name of the calling or called party to be displayed on incoming and outgoing calls, respectively. The names display are those datafilled through service order to correspond to particular Directory Numbers (DNs). This feature is restricted to calls within a customer group.

CATEGORY (CAT) CODES

See Access Code Restriction Group and Network Class of Service.

CODE CALLING ANSWER

This feature allows the code call signals to be answered from any station within the Digital ESSX service group via dial access code.

CODE RESTRICTION ARRANGEMENTS

A Code Restriction Arrangement automatically denies a portion of all main station lines of a subscriber's Digital system direct outward dialing access to one or more three-digit codes within the local calling area in which the system is located. Code restriction provides a distinctive tone to indicate that access is not permitted on call attempts.

CONFERENCE CALLING - STATION

Allows a main station user to establish a conference connection of up to six conferees (including the originator) without the aid of the attendant.

CONSULTATION HOLD-ALL CALLS

Allows a main station user to place a call on hold by depressing the switchhook, at which time dial tone is returned. The station user may then proceed to establish connection with another internal station or outside party, and after speaking with the "consulted" party, the station user may (1) return to the call initially held, (2) depress the switchhook thereby effecting Add-On Conference or (3) hang up and effect transfer of the initial call to the consulted party.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(T)

A112.28 Digital ESSX Service - Vintage II (Cont'd)**A112.28.3 Definitions (Cont'd)****CUSTOMER GROUP**

A Customer Group is that portion of the memory storage in the serving central office that contains the features for a specific system.

CUSTOMER GROUP TRANSPARENCY

Allows customers with separate entities to establish a separate Digital ESSX service for each of their entities but still have a certain degree of feature transparency between them. Digital ESSX service within the same DMS-100 may be grouped by translations into a "Family".

DATA CALL PROTECTION

Data Call Protection prevents calls from being interrupted by call waiting tones, testing or busy verification attempts. Data call protection is not customer changeable and lines assigned this feature may not utilize call transfer or conference capabilities.

DIAL "0" CALLING

Dial "0" Calling permits a main station line user to reach an attendant position by dialing the single digit "0".

DIAL CALL WAITING

The Dial Call Waiting (DCW) feature provides the ability for originating main station lines to invoke call waiting service on selected intragroup calls by dialing an access code followed by the extension number of the main station line to be call waited.

DIAL CODE SENDING (CODE CALLING) FEATURE

Code Calling provides dial access to customer-premises located code calling equipment by main station line, attendant access and tie lines of a subscriber's Digital system. The dialed two or three digit code activates signaling devices on the customer's premises to produce a coded signal corresponding to the dialed code. The called party, upon recognition of the signal, is automatically connected to the calling party by dialing a special code from any main station line in the system.

DIAL THRU ATTENDANT (DTA)

The DTA feature allows main station line users to complete dialing on other than station-to-station calls after the attendant selects the trunk facility.

DIALTONE PROVISIONING (DialTone II)

This feature will provide DECAS customers with the capability of requesting new service on stations through DECAS as well as the ability to disconnect service on existing stations.

Two Options are available.

Option 1 - allows the customer to subscribe to reserved loop facilities as described in A112.28.13.

(T)

Option 2 - the DECAS customer has no reserved facilities and simply places an order via DECAS for new service.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(T)

A112.28 Digital ESSX Service - Vintage II (Cont'd)**A112.28.3 Definitions (Cont'd)****DIGITAL ESSX CUSTOMER ADMINISTRATION SERVICE (DECAS)**

Provides the customer with the capability to activate/deactivate specific optional Digital ESSX service features, change service options, and display and verify the features and service options on a per main station basis.

DIGITAL FAMILY

A number of Digital ESSX services with a certain degree of dialing and feature operation transparency existing between them.

DIRECT INWARD DIALING

Incoming calls from the exchange or toll network may be dialed directly or any called main station line served by the Digital ESSX service main switching equipment without the help of an attendant.

DIRECT OUTWARD DIALING

Outward calls may be dialed directly from any unrestricted main station line served by the Digital ESSX service main switching equipment without the help of an attendant.

DIRECTED CALL PICK-UP - BARGE-IN

Allows calls directed to a main station line with the Directed Call Pick-Up feature to be answered by any main station line in the group. This is accomplished by dialing an access code followed by the extension number of the main station line to which the call was directed. If the main station line has already answered, a three-way connection is established.

DIRECTED CALL PICK-UP - BARGE-IN EXEMPT

Directed Call Pick-up with Barge-In Exempt allows a called station to be exempt from Directed Call Pick-Up with Barge-In.

DIRECTED CALL PICK-UP - BARGE-IN TERMINATING

This feature must be assigned to the main station line that is being answered via Directed Call Pick-Up - Barge-In.

DIRECTED CALL PICK-UP - NON BARGE-IN

The Directed Call Pick-Up-Nonbargo-In feature allows a Digital ESSX service main station line user to pick up an unanswered call to another main station line equipped with Directed Call Pick-Up by dialing a special answer code plus the number of the main station line being rung. If the main station line being rung has already answered, busy tone will be returned to the main station line user dialing the answer code and station line number.

DIRECTED CALL PICK-UP - NON BARGE-IN EXEMPT

Directed Call Pick-Up - Nonbargo-In Exempt allows a station to be exempt from Directed Call Pick-Up - Non Bargo-In.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(T)

A112.28 Digital ESSX Service - Vintage II (Cont'd)**A112.28.3 Definitions (Cont'd)****DIRECTED CALL PICK-UP - NON BARGE-IN ORIGINATING**

This feature enables a Digital ESSX service station user to answer calls directed to station lines in any pickup group in the same Digital ESSX service group. If a connection is established (prior to the pickup code being dialed,) the station dialing the code will receive busy treatment.

DIRECTED CALL PICK-UP - NON BARGE-IN TERMINATING

This feature must be assigned to the main station line that is being answered via Directed Call Pickup - Non Barge-In.

DIRECTORY NUMBER HUNTING

See Station Hunting Arrangements

DISTINCTIVE RINGING

Distinctive ringing is furnished to indicate the source of calls to idle main station lines.

DISTRIBUTED LINE HUNTING

See Station Hunting Arrangements

ELECTRONIC BUSINESS SET (EBS) FEATURES

Central Office features associated with one or more Electronic Business Sets used in conjunction with Digital ESSX service.

EXECUTIVE BUSY OVERRIDE (EBO)

EBO Allows a station user to gain access to a busy station within the same system. An EBO warning tone is transmitted to the called station and then a three-way call is established.

EXECUTIVE CONFERENCE

Permits a Digital ESSX service customer to have access to a dialable conference with a maximum of 150 conferences.

FACILITY GROUPS (FG)

Provides simulated trunk group access for miscellaneous line terminations. A FG may be one-way (incoming or outgoing) or two-way operational.

FIXED NIGHT SERVICE

This feature provides for the routing arrangements to be made by the Company and may be changed only by service order.

GROUP BUSY INDICATION

This feature has the capability to let the attendant know via a lamp on the console that all the facilities in that particular facility group are busy.

GROUP INTERCOM

Allows abbreviated dialing between stations in the same group all of which are equipped with the Group Intercom feature.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(T)

A112.28 Digital ESSX Service - Vintage II (Cont'd)**A112.28.3 Definitions (Cont'd)****HOSPITAL COMMUNICATIONS FEATURES****Do Not Disturb (DND)**

Permits stations to be denied from receiving Direct Inward Dialing (DID) and station-to-station calls.

HOT LINE STATION

See Automatic Line

INTERCEPT

Intrasystem and incoming network calls dialed to unassigned numbers are routed to common recorded announcements.

INTERCOM

Provides station to station calling for the customer within the subscriber's system without utilizing Network Access Registers, but does require additional central office equipment.

INTERPOSITION TRANSFERS

This feature allows an attendant to call and speak to another attendant and to transfer a call to another attendant.

LAST NUMBER REDIAL

Allows a station user the ability to redial the last number called by depressing one or two keys rather than the entire number.

LOUDSPEAKER PAGING ANSWER

Provides that loudspeaker paging may be answered from any station within the business customer group via a dialed access code.

MAIN STATION EXTENSION SERVICE

Main station extension service consists of an additional station or stations on the same station circuit as the associated main station.

MAIN STATION LINE

A main station line connects customer provided terminal equipment to the serving central office.

MAKE BUSY ARRANGEMENTS

This is a key activated feature which permits a line associated with a Multi Line Hunt Group (MLHG) to busy their position to prevent incoming calls from being directed to a vacant position on a per line basis. In a group arrangement this key activated feature allows a user to busy out all positions associated with a MLHG.

MAKE LINE BUSY

Provides the individual station user with the option of making the line or directory number appear busy/unavailable to incoming calls. The All Calls feature enables the user to make the line appear busy to all types of incoming calls. The Intragroup feature makes the line appear busy to intragroup calls with external calls not blocked.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(T)

A112.28 Digital ESSX Service - Vintage II (Cont'd)**A112.28.3 Definitions (Cont'd)****MISCELLANEOUS LINE TERMINATIONS**

Miscellaneous lines are those lines not basic to the system; such as Tie Lines, WATS, Foreign Exchange, CCSA, etc., which require Digital ESSX service switching capabilities in order to function with Digital ESSX service.

MULTI-LINE HUNT GROUP (BASIC)

See Station Hunting Arrangements

MULTIPLE APPEARANCE DIRECTORY NUMBER (MADN) CONFERENCING

After an incoming call or an outgoing call is in progress, a MADN member can bridge into the call by pressing the MADN key or going off-hook.

MULTIPLE APPEARANCE DIRECTORY NUMBER (MADN) RING FORWARD

Permits a Digital ESSX service station user to forward the ringing on their MADN to another appearance of the same MADN. This forwarding can take place automatically or upon the manual activation of a button on an Electronic Business Set.

MULTIPLE APPEARANCE DIRECTORY NUMBER (MADN) SINGLE CALL ARRANGEMENT WITH CONFERENCING

Conferencing allows additional members of the MADN group to bridge onto a call. If the conference is initially set up as private, the user must have the Privacy Release feature to enable bridging. If the conference is initially set up as not private, the user must have the Privacy Enable feature to activate privacy.

MULTIPLE CALL ARRANGEMENT

Allows each group member to be simultaneously active on a call with a different external party.

MUSIC/ANNOUNCEMENT ON HOLD

Allows the Digital ESSX service to provide music and/or announcement to a calling line that has been placed on certain types of hold or has entered a queue for certain Digital ESSX service features. It may be used for Attendant Camp-On, Attendant Hold, Call Hold, Call Park, and Permanent Hold.

NETWORK ACCESS REGISTER

The Network Access Register provides for exchange and long distance message network calling to and from main stations and attendant positions of a subscriber's Digital system.

NETWORK CLASS OF SERVICE

This feature provides the capability to allow or deny types of calls to a station on both an incoming and an outgoing basis.

OFF-HOOK QUEUE

See Queuing.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(T)

A112.28 Digital ESSX Service - Vintage II (Cont'd)**A112.28.3 Definitions (Cont'd)****OPTIONAL DIAL CUT THRU ARRANGEMENT**

Provides for the switching of calls which either originate within the Digital ESSX service and terminate in distant systems over certain miscellaneous lines and/or switch tandem through the system between certain miscellaneous lines where the digits dialed by the called party are transmitted to the distant end directly as they are dialed by the calling party.

OVERFLOW MESSAGE INFORMATION

This feature allows the system to increment an overflow message register located on the subscriber premises when calls to a MLHG encounter a busy group.

PERMANENT HOLD

Allows a main station user to place any call involving his main station line on hold by flashing the switchhook and dialing a special code. When Permanent Hold is activated no calls can be originated or terminated from the main station line. The first call is retrieved by going off-hook. If the call is not retrieved within a time designated by the customer, the station line will ring and the held call will be returned.

PERSONAL CALL SCREENING

Allows the calls that have been forwarded via Call Forwarding - Variable to be transferred back to any base station in the call forwarding chain.

POSITION BUSY

A key activated feature that allows an attendant to busy out his position to prevent incoming calls from being directed to that particular attendant position.

PREFERENTIAL HUNT

See Station Hunting Arrangements.

PRIVACY ENABLE

Privacy Enable is used to exclude other members of a MADN group from using MADN Conferencing to join a call.

PRIVACY RELEASE

Privacy Release is used to allow other members of a MADN group to use MADN Conferencing to join a call.

PROGRAMMABLE LINE SELECTION

An Electronic Business Set option that provides the ability for originating and/or terminating line selection.

QUERY BUSY STATION

Permits a designated Electronic Business Set to query the busy status of other Digital ESSX service stations. Digital ESSX service stations to be monitored are assigned a key on the EBS. Depression of the key will provide a visual and audible indication of the busy status of the queried station.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(T)

A112.28 Digital ESSX Service - Vintage II (Cont'd)**A112.28.3 Definitions (Cont'd)****QUEUING**

Queuing permits station users to be placed in a queue whenever the first choice route for completing a particular call is already in use. Two queuing arrangements are available:

A Call-Back Queue (CBQ), in which case the calling station goes on-hook and is called back when a facility becomes available.

An Off-Hook Queue (OHQ), in which case the calling station remains off-hook and is held in queue until a facility becomes available.

REPEAT DIALING

Repeat Dialing, when activated, automatically redials the last number the customer attempted to call. If the called line is not busy, the call will be placed.

If the called line is busy, a confirmation announcement is heard, the customer hangs up and a queuing process begins. For the next thirty minutes, both the calling and called lines are checked periodically for availability to complete the call. If during this queuing process the called line becomes idle, the customer is notified, via a distinctive ring, that the network is ready to place the call. When the customer picks up the telephone, the call will automatically be placed.

RING AGAIN

See Automatic Callback.

SHORT HUNT - BUSINESS SET

Provides the capability for incoming calls to hunt over a set of directory number appearances on a Business Set in search of an idle directory number on which to terminate.

SIMPLIFIED MESSAGE DESK INTERFACE I (SMDI)

Simplified Message Desk Interface provides customers the ability to route called number identification to a centralized point using a customer provided voice/text messaging system. A Digital ESSX service station user may have incoming calls forwarded to that centralized point when that person's station is busy or when he is not available to answer the calls. Through the use of an I/O (input/output) channel, call information is transported from the central office to the centralized point at the customer's premises. This information includes the number called, the reason for the forwarding of the call (busy or don't answer), and for intra-central office calls the calling number. That centralized point, using an optional capability, may activate a signal to the called station to give an alert that a message is waiting.

SINGLE CALL ARRANGEMENT

Allows each Multiple Appearance Directory Number group only one active call with an external party.

SPEED CALLING

Lets the main station line user place calls to a list of frequently called telephone numbers by dialing fewer digits than the complete directory number.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(T)

A112.28 Digital ESSX Service - Vintage II (Cont'd)**A112.28.3 Definitions (Cont'd)****STATION DIRECT INWARD DIALING RESTRICTION**

Permits the customer to have selected main station lines restricted from receiving Direct In-Dialed calls from the MTS network. Direct In-Dial call attempts will be routed to the attendant.

STATION HUNTING ARRANGEMENTS

Directory Number Hunt, Distributed Line Hunt, Uniform Call Distribution and Preferential Hunt are optional main station line hunt arrangements for searching over and distributing calls in a hunt group. These hunts are extensions of the basic multiline hunting feature included in Digital ESSX service.

Directory Number Hunting (DNH)

Each line in a DNH group has its own unique directory number. The hunt group is accessed by dialing any number in the hunt group. The number of lines hunted depends on the hunting option (i.e., circular or sequential assigned to the DNH group).

- Circular hunt permits a complete hunt over all the terminals in the group starting and ending with the dialed number.

- Sequential hunting starts at the number dialed and ends at the last number in the group.

Distributed Line Hunting (DLH)

With DLH hunting starts after the first idle line found by the previous hunt and continues until the starting point is reached. DLH provides for an equal distribution of calls.

Multi-Line Hunt Group (Basic)

When a call is originated to a busy station line in a basic multi-line hunting group, the call hunts once in a prearranged order for an idle station through all remaining station lines in that group.

Preferential Hunt

Preferential Hunt permits a prehunt over a subset or preferential group of main station lines before hunting through the entire Multiline hunt group. The hunt through the group may be a regular or circular hunt. Each main station line may have its own preferential group or list.

Series Non-Sequential

When a call is originated to a busy station in a series non-sequential hunting group, the call hunts for an idle station in that group in a prearranged numerical sequence. A number may not hunt to any number which would hunt back to the original number dialed. Each line can hunt to and/or be hunted from only one number.

Series Sequential

When a call is originated to a busy station in a series sequential station hunting group, the call hunts for an idle station in that group in an ascending numerical sequence. A number may not hunt to any number which would hunt back to the original number dialed. Each line can hunt to and/or be hunted from only one number.

Uniform Call Distribution

Uniform Call Distribution provides an even distribution of incoming network and intercom calls among the individual main station lines of a hunt group and includes Circular Hunt.

- Call Queuing is an option that may be added to the UCD arrangement. Queuing permits calls, in excess of main station lines in a UCD group, to be held in the central office and distributed in their order of arrival to main station lines in the UCD group as the main station lines become available.

(M)

(T)

A112.28 Digital ESSX Service - Vintage II (Cont'd)**A112.28.3 Definitions (Cont'd)**

(M)

STATION IDENTIFICATION

An itemized list of toll calls is shown on the toll bill with the number of each originating main station line.

STATION MESSAGE DETAIL RECORDING

Station Message Detail Recording (SMDR) is a feature that provides a record, by main station line number, of originating traffic routing over local lines, tie lines, WATS, Interexchange Carrier access lines and/or the toll network.

STATION MESSAGE DETAIL RECORDING - RAO

Station Message Detail Recording (SMDR) - RAO is an arrangement to provide a record by main station line number of originating intercity traffic routing over dial type tie lines, WATS, CCSA, interexchange carrier access lines and/or the Toll Network.

The station message detail will include the calling main station line number, the called number, date, time of day, duration of call and the type of facility used. The record will be provided on magnetic tape to customers requiring message detail for cost allocation and telecommunications system management purposes. The detail will be provided on all facilities in routes selected by the customer for Station Message Detail Recording - RAO.

STATION MESSAGE WAITING

Allows station users to activate message waiting against another station. A Stuttered Dial Tone (for stations without message waiting lamps) or Message Waiting Lamp may be used to provide indication of a waiting message. A designated code is used to access the station user who left the message.

STATION NUMBER CORRELATION

Permits main station line numbers to be the same as numeric room numbers, where facilities permit.

STATION-TO-STATION CALLING

Calls may be dialed directly to completion between any two main station lines of a subscriber's Digital system.

SUBSCRIBER'S DIGITAL SYSTEM

A subsidiary system of a subscriber's Digital system consists of all stations of a customer with the same primary directory listing which is served by the same digital central office equipment.

SUBSIDIARY SYSTEM ARRANGEMENTS

A Subsidiary System of a subscriber's Digital system is a customer-provided equipment system which is furnished PBX trunks from the central office serving the customer's Digital system and which is connected by the trunks to that system.

A Subsidiary System Arrangement provides station numbers, which are in sequence with the main station line numbers of the customer's Digital system to the stations of one or more subsidiary systems.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(T)

A112.28 Digital ESSX Service - Vintage II (Cont'd)**A112.28.3 Definitions (Cont'd)****THREE-WAY CALLING**

Allows a station user to add a third party to an existing two-party conversation.

TOLL DIVERSION

Toll Diversion automatically denies a subscriber's Digital station direct dialing access to the long distance message network. Station users attempting to place such calls are diverted to the attendant.

TOLL RESTRICTION

Toll restriction automatically denies a subscriber's Digital station direct dialing access to the long distance message network. Station users attempting to place such calls will receive an announcement to indicate that access is denied.

Toll Restriction with Restriction of Calls to the Expanded Local Area is available to those customers who have a need to also restrict chargeable calls to an Expanded Local Calling Area.

TRUNK EQUIPMENT

See Miscellaneous Line Termination.

TRUNK VERIFICATION FROM STATION

Permits a designated Digital ESSX service station to verify the condition of the trunks in the Digital ESSX service by dialing a predefined access code, the trunk group access code and the member number of the trunk to be verified.

UNIFORM CALL DISTRIBUTION (UCD)

See Station Hunting Arrangements

A112.28.4 Intercept Of Calls To Unassigned Station Lines

- A.** Incoming calls from the exchange and toll networks to unassigned station lines are intercepted by the same standard central office recorded announcement equipment used to intercept such calls for exchange services. The announcement provided states that the number called is not in service.
- B.** Intercommunicating calls to unassigned station lines are intercepted by central office recorded announcement equipment which is common to all subscriber's Digital systems served out of the same office. The announcement states that the number is not in service and advises that the attendant or the directory of the caller's system should be consulted.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(T)

A112.28 Digital ESSX Service - Vintage II (Cont'd)

A112.28.5 Conversion

A. Replacement of Central Office Equipment

1. The rates and charges in this and other *guidebook* sections for ESSX service and the associated features and services will continue to apply to ESSX service subscribers served at a location that is converted through no desire or fault of the subscriber to Digital central office equipment. Should one of the aforementioned existing subscribers wish to utilize features and/or services specific to the Digital central office equipment, the billing for that customer's system will be converted to charges appropriate for the central office equipment providing his service. (T)

B. Conversion of Centrex or ESSX service¹ to Digital ESSX service

(T)

1. When a customer whose present Centrex or ESSX service elects to convert to Digital ESSX service, installation and service connection charges do not apply to Common Equipment, in-service station lines, terminating arrangements, toll diversion and toll restriction equipped station lines, conference arrangements and other optional features and/or services provided each of the following conditions are met:
 - a. The Customer's system must continue to be served by the same central office equipment or the customer is moved to other central office equipment at the Company's instance.
 - b. There must be no interruption of service, and
 - c. There are no moves, changes or additions in existing station lines, terminating arrangements, or optional features requested by the customer.
 - d. A Service Ordering Charge as specified in Section A4. will apply. (T)
2. Centrex or ESSX services converting to Digital ESSX service must elect one of the following options:
 - a. Month to Month Payment Plan (One month option)
 - b. Term Payment Plan of 36, 60 or 84 months
3. Where the customer elects a Term Payment Plan of 36, 60 or 84 months and wishes to add to his system the following shall apply:
 - a. Such additions shall be made within a scheduled period after the conversion at the rates and charges in this and other *guidebook* sections for Digital ESSX service and the associated Features and Services. (T)
4. Where an ESSX service customer converts to Digital ESSX service the service establishment charge shall not apply if the same customer category, (Very Small, Small, Medium or Large) is maintained. If the ESSX service customer has a current Term Payment Plan, a Term Payment Plan for Digital ESSX service must be selected that is equal to or longer than the unexpired portion of the current plan.
5. Where an ESSX service customer converts to Digital ESSX service and changes customer category (Very Small to Small, Small to Medium, Medium to Large, Small to Large) the Service Establishment Charge applied shall be equal to the appropriate Digital ESSX service Establishment Charge (of the category the customer is going to) less the ESSX service Establishment (of the category the customer is coming from) Charge.

Note 1: Denotes ESSX-1 service or ESSX service-VS, S, M, L.

(T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(T)

A112.28 Digital ESSX Service - Vintage II (Cont'd)

A112.28.5 Conversion (Cont'd)

- B. Conversion of Centrex or ESSX service¹ to Digital ESSX service (Cont'd) (T)
 - 6. Where an ESSX service customer converts to Digital ESSX service and downgrades from Large to Medium, for example, no service charge shall apply. Termination charges will apply as specified in A112.26.6. (T)
 - 7. Where a Digital ESSX service customer converts to ESSX service such conversions shall also be made in accordance with paragraphs 3, 4, 5, and 6 preceding.
- C. Conversion of Digital ESSX service - Vintaged to Digital ESSX service
 - 1. Digital ESSX service - vintaged consists of those rates and charges moved to Section A112. and applicable to subscribers of Digital ESSX service as of November 22, 1988. (T)
 - 2. Customers with Digital ESSX service under the Vintaged Section A112. may select a payment period under Section A12. providing the following conditions are met: (T)
 - a. The customer's selected payment period under Section A112. has expired, or (T)
 - b. The customer's selected payment period under Section A112. has not expired but the customer desires to select a payment period under Section A112. equal to or exceeding the unexpired portion of his current payment period. (T)
 - (1) Charges as described under Termination Liability in A112.28.6.C. will not apply. (T)
 - c. A Service Ordering Charge as specified in Section A4. will apply. (T)

A112.28.6 Payment Schedules

- A. General
 - 1. Digital ESSX service is offered as follows.
 - a. The contract periods are:
 - Month to Month Payment Plan (One month option)
 - 36 Month Term Payment Plan
 - 60 Month Term Payment Plan
 - 84 Month Term Payment Plan
 - b. Digital ESSX service subscribers may select variable payment periods under the Term Payment Plan as follows.
 - (1) 36 Month Term Payment Plan - payment periods may be selected from 24 months to 48 months in length at 36 month rates and charges.
 - (2) 60 Month Term Payment Plan - payment periods may be selected from 49 months to 72 months in length at 60 month rates and charges.
 - (3) 84 Month Term Payment Plan - payment periods may be selected from 73 months to 96 months in length at 84 month rates and charges. (M)
- Rate stability for other payment periods will be handled on an individual case basis. (M)

(T)

A112.28 Digital ESSX Service - Vintage II (Cont'd)

A112.28.6 Payment Schedules (Cont'd)

A. General (Cont'd)

1. Digital ESSX service is offered as follows. (Cont'd)
 - c. Items that may be placed under the Term Payment Plan
 - (1) Main Station Lines
 - (2) Extension Station Lines
 - (3) Line Feature Options
 - (4) Optional Service Features
 - (5) System Common Equipment
 - (6) Terminating Arrangements
2. The monthly rate for Digital ESSX service is dependent upon the payment period selected by the customer.
3. The monthly rate for Digital ESSX service under the ESSX service Term Payment Plan for the periods of 36, 60 or 84 months is not subject to Company initiated rate increases.
4. Digital ESSX service-VS and S will be offered to subscribers having 4-200 main station lines under any of the payment options offered.
 - a. A Digital ESSX service-VS or S subscriber may elect a 36, 60 or 84 month payment period for any portion or all of the total system size with the remainder to be under the one month payment option.
 - (1) Group A line features may be added under any of the payment plan options.
 - (2) Auxiliary Attendant Features, or Optional service features may be added under any of the payment plans provided that they are not added for a payment period of shorter duration than that associated with the Digital ESSX service common equipment.
 - b. A Digital ESSX service-VS subscriber may add station lines up to 30 lines and:
 - (1) Add those lines and associated Group "A" line features at the one month rate specified for Digital ESSX service-VS or,
 - (2) Resubscribe the entire system under the payment periods offered for Digital ESSX service-S.
 - (3) There will be no termination liability.
 - (4) Digital ESSX service-VS subscribers will be liable for the difference in service establishment charges between Digital ESSX service-VS and S.

(T)

A112.28 Digital ESSX Service - Vintage II (Cont'd)**A112.28.6 Payment Schedules (Cont'd)****A. General (Cont'd)**

4. Digital ESSX service-VS and S will be offered to subscribers having 4-200 main station lines under any of the payment options offered. (Cont'd)
 - c. A Digital ESSX service-S subscriber may add station lines up to 220 Lines, and:
 - (1) Add those lines and associated Group "A" line features at the one month rate specified for Digital ESSX service-S or,
 - (2) Resubscribe the entire system under the payment periods offered for Digital ESSX service-M.
 - (3) There will be no termination liability.
 - (4) Digital ESSX service-S Subscribers will be liable for the difference in service establishment charges between Digital ESSX service-S and M.
5. Digital ESSX service-M will be offered to subscribers with 201-600 main station lines under one month, 36 months, 60 months or 84 months payment options.
 - a. A Digital ESSX service-M subscriber may elect a 36, 60 or 84 month payment period for any portion or all the total system size with the remainder to be under the one month payment option.
 - (1) Group "A" line features may be added under any of the payment plan options.
 - (2) Auxiliary Attendant Features, or Optional Service Features may be added under any of the payment plans provided that they are not added for a payment period of shorter duration than the payment period associated with the Digital ESSX service common equipment.
 - b. A Digital ESSX service-M subscriber may add station lines up to the 660 Lines and:
 - (1) Add those lines and associated Group "A" features at the one month rate specified for Digital ESSX service-M or,
 - (2) Resubscribe the entire system under the payment periods as offered for Digital ESSX service-L.
 - (3) There will be no termination liability.
 - (4) Digital ESSX service-M Subscribers will be liable for the difference in service establishment charges between Digital ESSX service-M and L.
6. Digital ESSX service-L will be offered to subscribers with more than 600 main station lines under one month, 36 month, 60 month and 84 month payment options.
 - a. A Digital ESSX service-L subscriber may elect a 36, 60 or 84 month payment period for any portion or all of his total system size with the remainder to be under the one month payment option.
 - (1) Group "A" line features may be added under any of the payment plan options.
 - (2) Auxiliary Attendant Features, or Optional Service Features may be added under any of the payment plans provided that they are not added for a payment period of shorter duration than the remaining payment period associated with the Digital ESSX service common equipment.

A112.28 Digital ESSX Service - Vintage II (Cont'd)

A112.28.6 Payment Schedules (Cont'd)

B. Expiration of Payment Period

1. Digital ESSX service-VS, S, M and L customers must upon the expiration of their payment period:
 - a. Select a new payment period as offered in the current *guidebook* (a service ordering charge as specified in Section A4. will apply), (T)
 - b. Revert to the current *guidebook* rates for the one month payment option if at the request of the customer (a service ordering charge as specified in Section A4. will apply), or (T)
 - c. Revert to the current *guidebook* rates for the one month payment option if at the instance of the Company (a service ordering charge as specified in Section A4. will apply). (T)
2. A Digital ESSX service-VS, S, M or L customer may at any time during his selected payment period resubscribe for an equal or longer payment period at the current *guidebook* rates subject to the following conditions. (T)
 - a. No credit will be given for payments made during the formerly selected period. Nonrecurring charges will not be reapplied.
 - b. The new payment period begins with the billing date following the date the new payment period is requested.
 - c. No termination charge applies for the former payment period.
 - d. A Service Ordering charge as specified in Section A4. will apply. (T)
3. A Digital ESSX service-VS, S, M or L customer may at any time during his selected payment period resubscribe for a payment period, shorter in length than the time remaining in the existing service agreement, subject to the following conditions:
 - a. No credit will be given for payments made during the formerly selected period. However, nonrecurring charges will not be reapplied.
 - b. The new payment period begins with the date requested.
 - c. A termination charge will be applied to the former payment period.
 - d. A Service Ordering charge as specified in Section A4. will apply. (T)

C. Disconnects

1. When equipment or facilities, e.g., station lines, etc., are disconnected from a system for which the current payment period is longer than one month, the expiration date of the remaining equipment and service will not be affected.
2. Equipment or facilities disconnected from a system prior to the expiration date of the payment period for such equipment will require termination charges for premature disconnection if applicable.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(T)

A112.28 Digital ESSX Service - Vintage II (Cont'd)**A112.28.6 Payment Schedules (Cont'd)****D. Supersedure**

Service may be transferred to a new customer at the same location upon prior written concurrence by the new customer as specified in the products section of the *Guidebook*. The new customer will be subject to all provisions and equipment configurations currently in effect for the previous customer. *Terms and conditions* concerning transfer of service between subscribers as stated in other sections of this *Guidebook* also apply under the Digital ESSX service Term Payment Plan.

(T)

E. Deferred Payment

1. Payment of nonrecurring charges for Digital ESSX service may be deferred over the length of the customer's payment period or a shorter period (in annual increments) subject to the conditions specified in this paragraph.
 - a. The charges to be deferred must be among the following types:
 - (1) Installation
 - (2) Service Establishment
 - (3) Feature Establishment
 - b. The customer must select a payment period longer than one month.
 - c. The total amount of nonrecurring charges as defined preceding may be deferred.
 - d. The minimum amount deferrable per Digital ESSX service System is \$1,000.00.
 - e. Interest on deferred amounts will be calculated at the rate set forth in the deferred payment agreement executed by the customer. The maximum interest rate to be charged is twenty-two percent (22%). The interest rate to be charged on deferred payments will be raised or lowered periodically by the Company. If, in the judgment of the Company, the maximum interest rate allowed by law is insufficient to cover the costs of providing the deferred payment option, the Company will suspend the availability of said option until such time as the costs of providing said option can be recovered through the application of a lawful interest rate. Suspension of the deferred payment option will not affect customers who have executed a deferred payment agreement prior to the effective date of such suspension.
 - f. The deferred charges (including calculated interest) will be prorated on a monthly basis over the selected deferral period length.
 - g. All deferred charges must be paid in full when the customer:
 - (1) Selects a payment period with an expiration date prior to the expiration date of the deferral period.
 - (2) Disconnects service, for the system, prior to expiration of the selected deferral period.
 - (3) Fails to pay a monthly amount hereunder within 30 days of its due date.
 - h. The customer may prepay only the total outstanding deferred charges at any time during the selected deferral period. Customer will be given a credit for the amount of unearned interest. Customer may not prepay less than the total of the outstanding deferred charges.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(T)

A112.28 Digital ESSX Service - Vintage II (Cont'd)**A112.28.6 Payment Schedules (Cont'd)****F. Prepayment**

1. For payment periods longer than one month, the customer may prepay the total outstanding recurring monthly rates. The prepayment of monthly rates in no way constitutes a purchase and the Company retains full ownership of all services covered by the prepayment. The following conditions apply:
 - a. Customers who prepay six months or more will have an allowance applied. A factor of .375 percent will be credited for each month prepaid. This amounts to a discount of 4.5 percent per year.
 - b. Monthly rates for all services covered by a single Letter of Election must be prepaid. Monthly rates must be prepaid for services added subsequently and placed on the same Letter of Election (i.e., customer-elected coterminous option) with a prepaid system.
 - c. Customers who change the length of a prepaid payment period will be credited any unused portion of the prepayment, subject to termination charges as specified in G. following.
 - d. Customers who prematurely disconnect will have termination charges deducted from the prepaid amount and any balance credited to their bill.

G. Termination Liability

The Termination Liability applicable to Digital ESSX service is dependent upon the payment period selected by the customer. Termination charges for the optional payment periods are as follows:

1. One Month Payment Plan
 - a. Digital ESSX service -VS and S Customers - No Termination Liability will be applicable.
 - b. Digital ESSX service-M Customers
 - (1) Within 12 months of date of installation - If a customer's Main Station Line count falls below 75 percent of the total main station lines initially installed, they will be charged 90 percent of the amount due for the period remaining up to 12 months from the date of installation for each line disconnected thereafter.
 - (2) Beyond 12 months of date of installation - No Termination Liability will be applicable.
 - c. Digital ESSX service-L Customers
 - (1) Within 12 months of date of installation - If a customer's main station line count falls below 90 percent of the total main station lines initially installed, they will be charged 90 percent of the amount due for the period remaining up to 12 months from the date of installation for each line disconnected thereafter.
 - (2) Beyond 12 months of date of installation - No Termination Liability will be applicable.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(T)

A112.28 Digital ESSX Service - Vintage II (Cont'd)**A112.28.6 Payment Schedules (Cont'd)****G. Termination Liability (Cont'd)**

2. Digital ESSX service Term Payment Plan Option

a. Digital ESSX service -VS, S, M and L customers that contract a portion of their system under the Term Payment Plan Option are subject to the following liability charges.

(1) Main Station Lines under contract - 90 percent of the remaining amount due for each main station line disconnected after the customer's total main station line count falls below 90 percent of the total main station lines initially installed or of the annually adjusted installed total (whichever is higher). The annually adjusted total is determined every 12 months from date of original installation.

(2) All non-contracted items - No Termination Liability will be applicable.

3. A customer may move a system under a payment plan within the same jurisdiction and will not incur termination charges if existing loops and Central Office equipment are reusable during the current engineering interval. Main station line installation charges will apply as appropriate to all main station lines relocated.

H. Credits and Surcharges

A surcharge that is equivalent to the charge for access to an interexchange carrier over a PBX trunk will apply to each Network Access Register. For each Digital ESSX service line a credit will be applied which, when combined with the preceding surcharge and with charges applied to Digital ESSX service lines for access to interexchange carriers, will provide a monthly net billing equal to the interstate subscriber line charge for a PBX trunk multiplied by the number of subscriber's Network Access Registers.

I. Cancellation Charges

1. Cancellation charges will only apply to subscribers under the Term Payment Plan.

2. Cancellation charges will apply only to the total removal of the subscriber's Digital ESSX service system

3. Cancellation charges will be applied where service provided under a Term Payment Plan is removed prior to the expiration of the subscribers Term Payment Plan.

4. The customer who elects to disconnect their Digital ESSX service prior to the end of their Term Payment Plan period will pay the lower of the Cancellation or Termination Liability charge. To determine which charge is applicable, the Company will calculate the Termination Liability charge and compare this amount to the appropriate Cancellation charge (depending on the customer's size and remaining contract duration). The customer will be billed the lower of the two charges.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS (T)

A112.28 Digital ESSX Service - Vintage II (Cont'd)

A112.28.6 Payment Schedules (Cont'd)

I. Cancellation Charges (Cont'd)

5. The following charges are applied when a total disconnect of a Digital ESSX service system provided under a Rate Stability Plan occurs prior to the expiration of the subscribers Rate Stability Plan and the Company determines that the Cancellation Charge is lower than the Termination Liability charge.

a. Cancellation Charges

(1) Per Very Small (VS) or Small (S) system

(a) Disconnect in month 1-48

(b) Disconnect in month 49 and thereafter

(2) Per Medium (M) or Large (L) System

(a) Disconnect in months 1-48

(b) Disconnect in month 49 and thereafter

Nonrecurring Charge	USOC
\$3,000.00	NRCS1
2,000.00	NRCS2
10,000.00	NRCM1
7,500.00	NRCM2

J. When a subscriber's Digital ESSX service under a Term Payment Plan is disconnected prior to the expiration of the selected service period as a result of a subscriber requested change to one of the separately *available* services listed following, termination or cancellation charges will not apply when:

- the completed service period is 12 months, and

- the service period of the new arrangement for the separately *available* service equals or exceeds the remaining service period of the disconnected arrangement, and (T)

- the service orders to install the separately *available* service and disconnect the existing service are related together and there is no lapse in service between installation of the separately *available* service and disconnection of the existing service, and (T)

- the service orders are for the same subscriber at the same location.

For the purposes of determining the separately *available* services to which the preceding conditions apply, the following list will be used: (T)

- MegaLink Service
- MegaLink Channel Service
- MegaLink ISDN Service
- LightGate Service

(M)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(T)

A112.28 Digital ESSX Service - Vintage II (Cont'd)

A112.28.7 Common Rates And Charges

(T)

A. General

(T)

1. Station Lines

(T)

- a. The rates and charges specified herein for main station lines provide for main station line components. (M)
- b. The rates and charges specified herein for main station and extension station lines are applicable to each main station location and extension station location respectively to which a customer-provided instrument can be connected.
- c. Service Charges as specified in Section A4. apply to all customer-requested moves, changes, removals, rearrangements and maintenance of premises wiring performed by the Company on the customer's premises. (T)
- d. Rates for the main station lines of Digital ESSX service-VS, S, M and L customers will be based on the following criteria:
 - (1) Main Station Group Size
 - (2) Distance from the Serving Central Office
 - (3) The type of payment plan selected by the customer.
- e. The total main station group size will consist of main station lines and attendant access lines for all locations served by the same Digital ESSX service.
- f. The distance band will be based on airline mileage from the serving central office to the Network Interface Location at the customer's premises.
 - (1) Where main stations are in a foreign exchange (FX) or a foreign central office (FCO) area the distance band will be calculated from the FX or the FCO to the Network Interface Location serving those main stations.
 - (2) Systems with more than one location served by the same Digital ESSX service control group will calculate the distance band per location.
- g. In a different central office serving area of a multi-office exchange:
 - (1) The rate of Digital ESSX service in a FX or FCO area is the monthly rate for the Digital ESSX service desired, plus a FX or FCO mileage charge as specified in Section A9. (T)
 - (2) When Digital ESSX service main station lines are connected by facilities which are routed between two or more central offices in the same exchange, the foreign central office mileage charge is calculated separately on an airline basis between the central office from which the Digital ESSX service is served and the central office from which exchange service normally would be rendered.
- h. Rates, charges, liabilities and additional *terms and conditions* if applicable may be developed on an individual basis for main station lines exceeding five (5) airline miles from the serving central office. (T)
- i. Exchange Access
 - (1) Exchange Access is provided by means of Network Access Registers.
 - (2) Presubscription of a Carrier of Preference is specified in Section 13. of the Interstate Access Service Tariff.
- j. Main Station Line Terminated as a PBX Trunk (M1)
 - (1) Where a Digital ESSX service Main Station Line is terminated as a PBX Trunk in customer provided equipment, the appropriate recurring charge specified in A112.28.7.C.6. will apply in addition to the appropriate main station line rate (intercom and mileage). (T)(M1)

2. Subsequent Training

(M1)

- a. After the initial installation of the subscriber's system, subsequent training will be provided at the charges indicated in Section A12.20.8.D. (T)(M1)

B. Nonrecurring

1. The following nonrecurring charges for service are in addition to any applicable service connection, move, change and installation charges provided for in other sections of this *Guidebook*. (T)

a. Service Establishment Charge

(1) Initial Service Establishment Charge

	Nonrecurring Charge	USOC
(a) Each Digital ESSX service-VS system	\$1,000.00	NA
(b) Each Digital ESSX service-S system	1,000.00	NA
(c) Each Digital ESSX service-M system	1,500.00	NA
(d) Each Digital ESSX service-L system	2,000.00	NA

b. Installation Charges

(1) These charges apply as specified, when an optional feature is added or changed. These charges apply in addition to other applicable nonrecurring charges.

(2) One or more optional features may be provided at the same time and in such instances the specified installation charge will apply for each feature provided.

c. Service Connection Charges

(1) Service charges as specified for business service in Section A4. are applicable for each main station line, console access loop, extension station line, etc. (T)

B. Features

1. General

a. The features offered for Digital ESSX service-VS and S customers are "A" Line Features-Grouped, "A" Line Features-Individual and Optional Service Features.

b. Digital ESSX service-VS and S customers may add features on a per line basis from "A" Line Features-Grouped at the rates shown in 2.a. following if a Term Payment Plan of 36, 60 or 84 months is selected.

c. Digital ESSX service-VS and S customers may add features on a per system basis from "A" Line Features-Individual at the rates shown in 2.b. following if a Term Payment Plan of 36, 60, 84 months is selected. If a feature is selected on a per system basis then any or all lines may be equipped with that feature at the system recurring rate. The installation charge will apply per line.

d. Digital ESSX service-VS and S customers choosing the one month payment plan may add features from "A" Line Features-Individual at the rates shown in 2.b. following. These features will be offered on a per line basis only.

e. The features are offered where facilities permit. This will be dependent on the serving central office. (M)

f. All features may not be offered from all central offices. (M)

g. Feature operation may vary based on the serving central office. (M)

B. Attendant Features - Data Link Console Operation³ I (T)

1. General

Central office attendant console operation is offered where all console functions are performed at the expense of the subscriber utilizing customer provided compatible terminal equipment.

Customer provided compatible consoles may be provided only where the serving central office serving the Digital ESSX service has been arranged for use with such consoles.

The service establishment charge for Data Link Console operation includes the following attendant features provided the customer provided compatible terminal equipment meets the technical specifications as outlined for interface with the DMS 100.

Note 1: This feature provides for access only to customer provided features which may require customer provided compatible terminal equipment. (T)

Note 2: A separate private line is required. (T)

E. Central Office Features Associated with Customer Provided Electronic Telephone Sets¹ I (Cont'd) (T)

2. *Terms and Conditions* (T)

- a. Each electronic set will require a main station line charge and a line additive charge. The intercom charge from A112.28.8, A112.28.9 and A112.28.10 will also apply. (M)
- b. Main station lines terminated in customer provided electronic telephone sets must be via non loaded facilities. (M)
- c. Each electronic set must have a primary Directory Number associated with it. (M)
- d. An electronic set may have a Private Business Line (PBL) appearing as one of the Directory Number keys.
- e. Rates and Charges for an individual business line service as specified in Section A3. will apply for the Private Business Line. The number assigned to a PBL will be outside the Digital ESSX service station range. The PBL cannot use the code access features available on the main station set. Services such as Custom Calling cannot be assigned to a PBL. (T)
- f. The central office features that are provided only in conjunction with an electronic set will be assigned and billed nonrecurring and recurring charges for those features per A112.28.11.E.
- g. The Digital ESSX service "A" line features that, when assigned to a Primary Directory Number may be activated by all Directory Numbers associated with that set, will be billed the nonrecurring and recurring charges for those features specified in A112.28.8, A112.28.9 and A112.28.10 per main station line designated as the Primary Directory Number. The nonrecurring charges in A112.28.11.E will also apply.
- h. The Digital ESSX service "A" line features that require assignment per Directory Number (primary or additional), are capable of activation and will be billed the nonrecurring and recurring charges for those features as specified in A112.28.8, A112.28.9 and A112.28.10 per set assigned. The nonrecurring charges in A112.28.11.E will also apply.

3. Rates and Charges

a. These rates and charges will apply per electronic set provided.

G. Station Message Detail Recording Via Revenue Accounting Office (RAO)

1. General

a. Station Message detail recording (SMDR) - RAO is an arrangement to provide a record, by main station line number, or originating intercity traffic routing over dial type tie lines, WATS, CCSA, other Common Carrier access lines and/or the MTS Network (Toll).

b. The station message detail will include the calling main station line number, the called number, date, time of day, duration of call and the type of facility used. The record will be provided on magnetic tape, to customers requiring message detail for cost allocation and telecommunications system management purposes. The detail will be provided on all facilities in routes selected by the customer for Station Message Detail Recording - RAO. (M)

G. Station Message Detail Recording Via Revenue Accounting Office (RAO) (Cont'd)

2. *Terms and Conditions*

(M)

(T)

- a. Station Message Detail Recording (SMDR) - RAO may be offered to main station lines of customers where facilities permit and where the Company's message billing process has been arranged to provide this optional feature.
- b. Station Message Detail Recording is not represented to be a provision of billing detail.
- c. Station Message details will be provided on magnetic tape. The tape density and number of tracks will be that used by the program and data processing system in use by the Company's accounting center furnishing the tape. The format may be changed to serve Company purposes and the customer will be responsible for making the tape compatible with his data processing equipment.
- d. Station Message details may be provided on all facilities subscribed to by the customer including Message Telecommunications Service (MTS), but will not include intercom calls originated by the station users. The customer may designate the group or groups of facilities on which SMDR - RAO is to be provided. Where the facility designated by the customer is the MTS network, the magnetic tape file will include a record of each message itemized on the customer's bill; e.g., messages received collect or billed to third number will be on the tape file in addition to DDD messages originated by the station user.

A112.28.11 Optional Service Features (Cont'd)

I. Subsidiary System Arrangements

1. General

A Subsidiary System of a Digital ESSX service system is a customer-provided system which is furnished PBX trunks from the central office serving the subscriber's Digital system and which is connected by the lines to that Digital ESSX® service.

A Subsidiary System Arrangement provides station numbers which are in sequence with the main station line numbers of the subscriber's Digital system to the stations of one or more subsidiary systems.

2. *Terms and Conditions*

(T)

- a. Subsidiary System Arrangement (SSA) station numbers are provided by the same central office equipment and facilities which furnish Direct-Inward-Dialing (DID)/Identified-Outward-Dialing (IOD) service and will only be furnished where adequate DID/IOD facilities are available in the central office serving the customer's system and where the subsidiary system is properly equipped for DID/IOD service.
- b. The PBX trunks of the subsidiary system are provided at the same rates and charges as specified for such trunks furnished from the central office serving the subscriber's Digital system. In addition, foreign central office or foreign exchange mileage charges are applicable to those trunks when the subsidiary system is located outside the area of that serving central office.
- c. The same rates and charges are specified for DID service apply for SSA station numbers. Where more than one subsidiary system is involved, each subsidiary system is considered a separate service and the count of station numbers furnished will commence anew at each such system for the purpose of determining the applicable rates and charges.
- d. Tie lines connecting the Digital ESSX service and subsidiary systems are provided at the same rates and charges as specified for Digital ESSX service tie line terminals, tie lines, and tie line terminals in a customer-provided equipment system.
- e. SSA station numbers are furnished subject to the condition that all inward and outward local and toll network calling by subsidiary system stations be via the central office serving the subscriber's Digital system.
 - (1) Where the subsidiary system station's outward local and toll network calls are placed via tie lines and the network access registers of the Digital ESSX service the charges for such calls are identified and billed as primary directory listing calls of the Digital ESSX service.
 - (2) Where the subsidiary system station's outward local and toll network calls are placed via PBX trunks, the charges for such calls are identified as primary directory listing calls of the Digital ESSX service.
- f. At the option of the customer, identification of outgoing toll network calls by SSA station number will be provided at the same rates and charges as specified for Identified-Outward-Dialing (IOD) service subject to the following conditions:
 - (1) The identification of outgoing toll calls by SSA station number will only be provided on calls routed via PBX trunks.
 - (2) Where more than one subsidiary system is arranged for the identification of outgoing toll calls by SSA station number, each system shall be considered a separate service and the count of connecting channels which serve as IOD trunks will commence anew at each system for the purpose of determining the applicable rates and charges.
- g. The Digital ESSX service subsidiary system arrangement is provided solely for the furnishing of SSA station numbers to subsidiary systems for local and toll network and intercommunication calling and does not provide any of the basic of optional service features of Digital ESSX service to stations of the subsidiary systems.

(T)

J. Automatic Route Selection - Basic

1. General

- a. Automatic Route Selection - Basic (ARS-B) is an optional feature, available where facilities permit that allows station users, by dialing a preselected code to automatically select the preferred route subscribed to by a customer for network calls. Alternate routing to other facilities subscribed to by the customer is also provided. This agreement is available for use with Foreign Exchange, WATS, CCSA off-net and Interexchange Carrier (IC) access lines which are compatible with ARS and the MTS network facilities.

Note 1: Apply rates and charges as specified in this *Guidebook* for DID service.

(T)

Note 2: Apply rates and charges as specified in this *Guidebook* for IOD service.

(T)

Note 3: Apply rates and charges as specified in Section A3. for PBX Trunks.

(T)

Note 4: Apply rates and charges as specified in other sections of this *Guidebook* for tie line terminations, tie line mileage, etc., as appropriate.

(T)

Note 5: Apply rates and charges as specified in A112.28.7.D for USOC: EVK.

(T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(T)

A112.28 Digital ESSX Service - Vintage II (Cont'd)

A112.28.11 Optional Service Features (Cont'd)

J. Automatic Route Selection - Basic (Cont'd)

1. General (Cont'd)

- b. Automatic Route Selection - Basic is accessed by dialing a single code (1, 2 or 3 digits) which automatically selects the appropriate route (FX, WATS, CCSA off-net, IC access line or the MTS Network) to complete the call. If all facilities in the initial route selected are busy, the call will advance to other routes in the selected pattern. Patterns may consist of up to eight (8) private routes.
- c. For calls using FX, WATS, CCSA off-net or IC access line facilities, the routing may be based on a Number Plan Area (NPA) and limited to specified central office codes within the NPA as designated by the customer. This is referred to as Foreign Area Discrete Translation.
- d. Automatic Route Selection - Basic is a call routing capability and, therefore, all codes must be in a route for selection. Code blocking is not provided by this feature.

2. *Terms and Conditions*

- a. Automatic Route Selection - Basic is provided only in association with Digital ESSX service central office equipment located on Company premises and may be provided, subject to the availability of facilities to subscriber systems which are served by the same such equipment.
- b. Preferred routes and alternate routing patterns will be specified by the customer.
- c. All rates and charges specified for Automatic Route Selection - Basic are in addition to the rates and charges for the associated facilities.
- d. The number of patterns required by a customer are governed by the type and variety of facilities to which the customer subscribes.
- e. A single rate per pattern will apply regardless of the number of routes in the pattern or the number of facilities in the route.

(T)
