A35. INTERCONNECTION OF MOBILE SERVICES

A35.1 Mobile Services (Cont'd)

A35.1.4 BellSouth CMRS Type 2 Interconnection (Cont'd)

K. Conversion from BellSouth CMRS Type 1 Interconnection to BellSouth CMRS Type 2A-SS7

1. If the CMRS subscribes to DS1 transport service and converts from BellSouth CMRS Type 1 interconnection to BellSouth CMRS Type 2A-SS7 interconnection with a minimum service period of 48 months, the Company will waive all nonrecurring charges associated with re-homing the existing DS1 transport facilities to our tandem office. The Company will also waive the nonrecurring charges associated with the required movement of dedicated NXXs in this conversion.
2. If the CMRS subscribes to DS1 transport service and converts from BellSouth CMRS Type 1 interconnection to BellSouth CMRS Type 2A-SS7 interconnection with a minimum service period of 24 months, the Company will waive 50 percent of the nonrecurring charges associated with re-homing the existing DS1 transport facilities to our tandem office. The Company will also waive 50 percent of the nonrecurring charges associated with the required movement of dedicated NXXs in this conversion.
3. To receive this waiver of nonrecurring charges, CMRS's that are technically able to establish a connection to a Company tandem via BellSouth CMRS Type 2A-SS7 service must place an order for this conversion within 120 days of August 29, 1995 with implementation completed within six months of the request.

CMRS's that are not technically able to establish a connection to a Company tandem via BellSouth CMRS Type 2A-SS7 service, due to the type of equipment they utilize, must provide the Company a Letter of Intent within 120 days of August 29, 1995. The Letter of Intent should state that they will place an order for this connection and should include an explanation of why their equipment is currently not able to interconnect with the Company via BellSouth CMRS Type 2A-SS7. The CMRS must then place a firm order for this conversion within 120 days after the date of the Letter of Intent with implementation completed within six months of the firm order.

4. The BellSouth CMRS Type 2A-SS7 service, provisioned in this manner, will be subject to any approved rate adjustments during this minimum service period.
 5. In the event that all or any part of the CMRS's BellSouth CMRS Type 2A-SS7 service converted in this manner is disconnected at the CMRS's request prior to expiration of this minimum service period, the CMRS will be required to pay a termination charge.
 6. The termination charge is applicable at the date of termination. The charge depends on the minimum service period chosen and will be equal to the number of months remaining in the minimum service period times the CMRS's monthly facility rates for this service.
- L.** When BellSouth CMRS Type 2A-SS7 service is in use, all Public Service Commission and/or legislative requirements for blocking of Calling Party Number and/or Automatic Number Identification becomes the responsibility of the subscribing CMRS. Any failure of the CMRS to implement appropriate blocking measures will be considered cause for the Company to immediately disconnect the BellSouth CMRS Type 2A-SS7 service.
- M.** Type BellSouth CMRS Type 2A-SS7 service allows the CMRS to subscribe to CCSIMT service from Section A35. in order to connect the CMRS's signaling network to the Company's signaling network.
- N.** BellSouth CMRS Type 2C interconnection is a connection between a Company E911 tandem and the CMRS's point of termination. This connection type provides a route to allow the CMRS's subscriber to place E911 calls. This connection type does not apply when the Public Safety Answering Point (PSAP) is IP-enabled.
