N8.4 Emergency Service Provider Data Service (ESPDS) (Cont'd)

N8.4.3 Terms and Conditions

- A.** Public safety agency customers requesting this service must meet the current network standards and must cooperate with the *Company's* Network Organization to avoid network problems associated with the use of data obtained through this service. (M)
- 1.** Geographically focused calling patterns that result from the use of the data provided hereunder may cause problems, including congestion, in *the Company's* network. One or more of the following must be used by the ESPDS customer to prevent network congestion problems: (T)(M)
- a.** The ESPDS customer's calling platforms must be equipped with reorder tone (RO) and "No Circuit Available" (NCA) announcement detection capability. Each platform should provide the capability to automatically throttle back call origination when a threshold of RO and NCA is reached. The throttling algorithm should allow for reduction of call origination to the point where 99 percent of call origination reaches neither NCA nor RO. (M)
 - b.** The ESPDS customer's calling platforms must be designed with a call gapping mechanism to allow specification of, at most, one originating call per a specified time interval to any specific NPA-NXX code. The gap should be capable of any time interval between 0 and 10 seconds. This is intended to give the ESPDS subscriber the capability of preventing excessive simultaneous call origination. (M)
 - c.** If the *Company's* Network Management Center (NMC) determines that the call volume is having a negative impact on the *Company's* network, the NMC will request the ESPDS customer to throttle the outgoing calls generated by the event to a specified number of simultaneous calls. The ESPDS customer must implement each request within ten minutes of receipt from the NMC. (T)(M)
- B.** The Network Management Center must be notified of the target location and the size of the event at the launch of an emergency call origination exceeding 1000 calls. *The Company* will provide a contact number to the ESPDS customer for this purpose. The subscriber will also provide the name(s) of the carrier(s) which will be utilized by the customer for the emergency call origination and the number of simultaneous calls. (T)(M)
- C.** Each ESPDS customer must provide the Network Management Center up-to-date contact information for 7 days per week, 24 hours per day, and contact information for 3 levels of management escalation. (T)(M)
- D.** The ESPDS customer agrees to work cooperatively with the Network Management Center in order to avoid network congestion that may affect the ability of customers to call out of an affected area. This includes implementation of call gaps on the calling platform at intervals recommended by the Network Management Center. (T)(M)
- E.** The Network Management Center will utilize protective controls including those outlined in E2.1.12 of *the Company's* Intrastate Access Service Tariff, in order to minimize congestion and to allow customers the ability to call out of an affected area. The traffic originated based upon the ESPDS customer's use of the data provided hereunder may be affected by these controls. *The Company* will not be liable for the intentional or unintentional blockage of any traffic in any way related to the ESPDS customer's use, or the use by its agents or contractors, of the data provided hereunder. (T)(M)
- F.** *The Company* does not guarantee the completion of mass calling traffic on its network. (T)(M)
- G.** With respect to the database extract file provided by this service, the public safety agency ESPDS customer, their agent, and their employees shall: (M)
