E. Residential Online Service Connection Charge Waiver

Service Connection Charges (such as the Line Connection Charge – First Line or Additional Line) may be waived for residential customers who order new local service or transfer service on att.com and who are in AT&T Southeast territory for local service. This waiver of charges is available on up to three (3) lines. The subscriber must purchase a minimum of AT&T local service and at least two (2) non-zero rated features or a package of local service containing in its price at least two (2) qualifying features.

F. Residential Service Connection Charge Waiver

Service Connection Charges (such as the Line Connection Charge – First Line or Additional Line) may be waived for residential customers. This waiver is valid for only one (1) service line at the intended local service address. The customer must place the order through an AT&T business office or outbound telemarketing vendor. This waiver is not valid for existing AT&T customers or out of region customers who are new to AT&T. Residential customers who are currently not subscribing to AT&T for local service may be eligible for this waiver. The customer must have at least one (1) wireline local service or equivalent (wireless in lieu of wireline) with a provider other than AT&T at a local service address within AT&T territory. The customer must request the qualifying service at the same address and in the same name as the existing service, unless the customer is planning an imminent move from an address in AT&T territory to another address within thirty (30) days of responding to this offer. In the case of an imminent move, AT&T may offer the customer the waiver of charges and place the order at the new address. The customer must not have had local service with AT&T within ten (10) days prior to the new service connection date.

G. Residential Mobility-National Retail Service Connection Charge Waiver

The Line Connection Charge may be waived for residential customers who order new local service (N Order) or move existing service (T Order) in a mobility store or national retail partner and also order a minimum of two (2) non-zero rated vertical features. To be eligible, customers must place their order in person at the retail location and select the Company as their local service provider. This offer may be combined with promotional offers for which the customer qualifies, unless specifically excluded. The Company reserves the right to prohibit the combination of this offer with any other offer at the Company's sole discretion and/or discontinue or modify this offer at any time without notice. Company employees are not eligible for this offer.

Note 1: Effective March 1, 2018, Privacy Manager is no longer available for new residence subscribers.

A13.70 Privacy Manager Service (*Obsoleted, See Section A113*)

(O)

A13. MISCELLANEOUS SERVICE ARRANGEMENTS**A13.70 Privacy Manager Service (*Obsoleted, See Section A113*) (Cont'd)**

(O)

A13.71 Reserved for Future Use**A13.72 Inter-Switch Simplified Message Desk Interface****A13.72.1 General**

- A. Inter-Switch Simplified Message Desk Interface (ISMDI) provides subscribers the ability to route calls and associated call information across the Public Switched Telephone Network between the end office serving the subscriber's voice/text messaging system and the end offices serving the subscriber's clients. A station user may have incoming calls forwarded to the voice/text messaging system when that person's station line is busy or when calls cannot be answered. Call information is transported to the voice/text messaging equipment at the subscriber's premises. The information transported includes the number called, the type of incoming call (direct or forwarded due to busy or don't answer), and the calling number.
- B. ISMDI has the capability to activate and deactivate a Message Waiting Indication (MWI) feature on an end user's line, if the end user's line is equipped with MWI.
- C. The subscriber had the option of specifying an SS7 Point Code to which MWI messages are to be routed.

A13.72.2 Terms and Conditions

- A. ISMDI is furnished only from central offices which have been equipped and arranged to provide this service.
- B. Compatible private facilities, such as Private Line Service or SynchroNet service, are required as a data link between the serving central office and the subscriber's equipment. Rates and charges for these facilities are as specified in the Private Line Service Guidebook.
- C. In addition to the ISMDI data link, a voice level hunt group is required between the ISMDI host office and the voice/text messaging system at the subscriber's premises at the rates and charges specified in other sections of this document. The lead telephone number associated with this hunt group must be used for any voice/text messaging systems that utilize a data link sanity check or "heartbeat" capability. The lead telephone number should not be equipped with Message Waiting Indication (MWI) capability, and the activate MWI message should be programmed in the voice/text messaging system for the purpose of executing the sanity check capability.
- D. Network errors generated by voice/text messaging systems attempting to activate or deactivate MWI to invalid telephone numbers or to telephone numbers that are not equipped with the MWI capability, other than the lead telephone number used for the sanity check, may be cause for suspension of service until the problem is corrected. The voice/text messaging service provider will be notified as soon as possible upon detection of excessive network errors and must take immediate corrective action to avoid suspension of service.
- E. A subscriber to this service is obligated for a minimum service period of 12 months.
- F. If the SS7 Point Code for MWI option is requested, the subscriber is required to provide a list of the NPA-NNXs to which MWI messages will be routed. The NPA-NNXs provided must belong to the carrier with which the subscriber has an arrangement. The destination carrier must have an SS7 interconnection with the AT&T network. The MWI messages are ANSI SS7 TCAP Inter-Switch Voice Mail (ISVM) messages. The nonrecurring charge in A13.72.3.B.3 will be applicable for establishing new service, for modification of existing service, and for verification of existing service.

A113.70 Privacy Manager Service

(T)(O)

Effective March 1, 2018, Privacy Manager is no longer available to new residence customers. Current subscribers may continue the service until they move or make any changes to their service, or until November 1, 2018 at which time the service will be discontinued.

(N)

A113.70.1 Definition of Feature Offering

(T)(O)

- A. Privacy Manager service will provide Caller ID subscribers with the ability to identify unavailable, unknown, blocked and private numbers. Privacy Manager service will intercept all unidentified calls before the subscribers telephone rings. If the call is marked private, the caller will be asked to press 1 to deliver his/her calling information. On unavailable or unknown numbers, the caller will be asked to state their name. Once the calling party is identified, the service will ring the subscriber and announce the calling party's information. The subscriber has the option to accept the call, reject the call, or send a "Do Not Solicit" message to a telemarketer. Privacy Manager service allows the subscriber to assign a special passcode giving callers of his/her choice the ability to bypass Privacy Manager service. Subscribers may also switch Privacy Manager service on or off from his/her own phone.

(O)
