A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.1 Reserved for Future Use

A112.2 Prestige Deluxe Service

(Obsoleted 09/28/92, Type 4) Not available for new installations or on transfers of service to a new location. Existing customers may request changes and additions at the rates specified in this Section. (T)

A112.2.1 General

- A. Prestige Deluxe Service is an expanded group of central office features that may be provided in association with individual Flat Rate or Message Rate Business exchange lines served by electronic switching equipment located in Company buildings.
- B. Prestige Deluxe Service is offered to subscribers having a minimum of two and a maximum of thirty Individual Business exchange access lines.
- C. Prestige Deluxe Service is offered subject to the availability of facilities. The rates and charges for Prestige Deluxe, as applicable, are in addition to rates and charges for the individual exchange access lines in Section A3. (T)
- D. Exchange Access lines terminating at different Prestige Deluxe locations may be combined into a single Prestige Deluxe arrangement for the same customer if the lines are all served by the same central office.
- E. Prestige Deluxe lines will utilize Touch-Tone signaling. The rates and charges for Touch-Tone service will apply as appropriate in Section A13. (T)
- F. The billing record of toll calls on lines using Prestige Deluxe Service will not be affected by the application of the features of this Service.
- G. Prestige Deluxe standard and optional station features, and optional system features are not permitted on the same line with existing Prestige, Custom Calling Service, or Customized Dialing Package Service described in other sections of this *Guidebook*. (T)
- H. Service availability and/or operation may vary depending upon the type of central office serving the Prestige Deluxe arrangement, and the capabilities of that office. In addition, those features which require activation by switchhook flash may conflict with the operation of customer owned electronic key premises equipment.
- I. Suspension of Prestige Deluxe Service is not permitted. The Business exchange lines may be suspended as addressed in Section A2. The Prestige Deluxe Service associated with those lines must be disconnected or billed at full rate. (T)
- J. The quality of transmission for calls utilizing Prestige Deluxe Call Forwarding Variable or Conferencing may vary depending on the distance and routing involved. The Company makes no representation as to the quality of the transmission on such calls.
- K. All calls from within the Prestige Deluxe arrangement to destinations outside the Prestige Deluxe arrangement must be preceded by a one digit access code. This includes calls to O (Operator) and 911 (emergency).
- L. The Company shall not be liable to any person for damages of any nature or kind arising out of, or resulting from, or in connection with the provision of Prestige Deluxe Service offered herein, including, without limitation, the inability of the station user, with or without dialing the one digit access code, to reach the operator, 911, or other emergency services.
- M. The features as listed following will be offered as standard station features. Each line terminated in a Prestige Deluxe Service arrangement will have access to these features.
 - Call Hold
 - Conferencing
 - Station-to-Station Calling
 - User Transfer
- N. In addition to the standard station features, certain features will be offered as optional station features and will be offered on a per line equipped basis. Optional station features do not have to be assigned to all lines in a Prestige Deluxe Service Arrangement.
- O. Station User Dial Access may be provided via Optional System features to certain miscellaneous lines (WATS, Tie, FX) and other customer oriented facilities (Loudspeaker Paging).

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.2 Prestige Deluxe Service (Cont'd)

(M)(T)

A112.2.2 Service Description

(M)(T)

A. Standard Station Features

(M)

1. Call Hold

(M)

The user of an exchange line equipped with this feature can place any established call on hold by flashing the switchhook and dialing a specified code. The user can originate another call or use the optional Call Pickup feature.

(M)

2. Conferencing

(M)

The user of an exchange line equipped with this feature can hold an in-progress call and complete a second call while maintaining privacy from the held call. In addition, the user may add the held call onto a three-way conference.

(M)

3. Station-to-Station Calling

(M)

The user of an exchange line equipped with this feature can call other lines in the same Prestige Deluxe arrangement by dialing four or five digits (the dialing plan is to be determined by the Company). Two user stations on the same line (same telephone number) cannot access each other via this feature.

(M)

4. User Transfer

(M)

The user of an exchange line equipped with this feature can transfer a call to another line within or outside the Prestige Deluxe arrangement.

(M)

B. Optional Station Features

(M)

1. Alternate Answering

(M)

This feature automatically transfers incoming calls that encounter a don't answer condition after a preselected number of rings (from 1 to 7) on the subscribing Prestige Deluxe line to an alternate designated line within the Prestige Deluxe arrangement. Because of technical limitations, the actual number of ring cycles before a don't answer call is transferred may vary slightly from the preset number. The destination telephone number and the approximate number of ring cycles before the call is transferred are specified by the customer at the time this feature is ordered. This feature is in operation on a continuous basis and cannot be activated or deactivated by the customer. Changes to the feature must be requested from the Company by service order.

(M)

2. Automatic Callback

(M)

This feature permits an exchange line user who attempts a Station-to-Station (standard feature) dialed call to a busy exchange line to be automatically connected to that line when both called and calling lines are subsequently idle. The originator activates a request by dialing a specified code after a busy tone is encountered. Automatic Callback applies only to Station-to-Station dialed calls between exchange lines in the same Prestige Deluxe arrangement. A calling exchange line is permitted only one Automatic Callback request at a time, as well. Once activated, an Automatic Callback request remains in effect for a period of approximately 30 minutes unless it is deactivated by the calling exchange line. The request may be deactivated by dialing a specified code. Availability is subject to the type of central office and/or the current program operating in that central office.

(M)

3. Call Forwarding - Busy Line

(M)

This feature automatically re-routes calls intended for an equipped exchange line when that line is busy. The calls are routed to a preselected exchange line (destination) within the Prestige Deluxe arrangement. The destination telephone number is specified by the customer at the time this feature is ordered. A change in the destination telephone number must be requested from the Company by service order.

(M)

4. Call Forwarding Variable

(M)

This feature automatically transfers all calls made to the subscribing line to any other line, within or outside the Prestige Deluxe arrangement.

(M)

5. Call Forwarding Variable With Ring Reminder

(M)

This feature automatically transfers all calls made to the subscribing line to any other line, within or outside the Prestige Deluxe arrangement. Ring reminder provides a short burst of ringing on a line when that line is in the call forwarded state and a call is placed to that line.

(M)

6. Call Pickup

(M)

This feature allows an exchange line user, by dialing a specified answer code, to pick up an unanswered call to another exchange line in the same Call Pickup group. If the exchange line being rung has already answered, busy tone will be returned to the line user dialing the answer code.

(M)

EFFECTIVE: February 28, 2006

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.2 Prestige Deluxe Service (Cont'd)

(M)(T)

A112.2.2 Service Description (Cont'd)

(M)(T)

B. Optional Station Features (Cont'd)

(M)

7. Call Waiting Terminating

(M)

When a Prestige Deluxe station user is on an existing call, this feature provides a tone burst alert indicating that a call is waiting. Call Waiting may not be provided on an individual line that is in rotary (arranged for hunting) unless the line is the last line in a rotary hunt group.

(M)

8. Cancel Call Waiting

(M)

This feature allows the customer with Call Waiting (Terminating) service to inhibit the operation of call waiting for one call. The customer dials the Cancel Call Waiting code, obtains recall dial tone, and places a call normally. During this call, Call Waiting service will be inactive. Anyone calling the Call Waiting customer will receive the normal busy treatment, and no Call Waiting tones will interrupt the customer's call.

(M)

9. Distinctive Ringing and Call Waiting Tone

(M)

Distinctive Ringing and Call Waiting Tone are furnished in two classes which permit a Prestige Deluxe exchange line user to identify the source of a call:

(M)

- Intercommunication (call from within the Prestige Deluxe system originated via the Station-to-Station Dialing feature).

(M)

- Direct Inward Dialed local and toll (call from outside the Prestige Deluxe System or non station-to-station dialed call originated within the Prestige Deluxe System).

(M)

Distinctive ringing is furnished to indicate the source of calls to idle exchange lines. Distinctive tone is furnished to indicate the source of calls to busy exchange lines equipped for the optional Call Waiting feature.

(M)

A distinctive ring or tone is furnished for each class and is used to identify all call sources within that class.

(M)

10. Ring Reminder - Inhibit

(M)

Ring Reminder - Inhibit will prohibit a short burst or ringing on a line when that line is in the call forwarded state and a call is placed to that line.

(M)

11. Speed Call Short, Customer Changeable List

(M)

This feature allows the Prestige Deluxe station user to place a call by dialing a one digit code to any one of six telephone numbers listed by the customer. The station user can change the telephone numbers on the list by dialing a specified code plus the new telephone number desired. Each telephone number on the list is limited to a maximum of 16 digits including access and routing codes.

(M)

12. Speed Call 30, Individual, Customer Changeable List

(M)

This feature allows the individual Prestige Deluxe station user to place a call by dialing a two digit code to any one of 30 telephone numbers listed by the customer. The station user can change the telephone numbers on the list by dialing a specified code plus the new telephone number desired. Each telephone number on the list is limited to a maximum of 16 digits including access and routing codes. This optional feature may not be available in all central offices.

(M)

13. Speed Call 30, Group, Customer Changeable List

(M)

This feature allows the individual Prestige Deluxe station user, in a group, to place a call by dialing a two digit code to any one of 30 telephone numbers listed by the group of customers. The controlling line can change the telephone numbers on the list by dialing a specified code plus the new telephone number desired. Each telephone number on the list is limited to a maximum of 16 digits including access and routing codes. Either Speed Call 30, Individual or Group, will be available to the customers, not both on the same line.

(M)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.2 Prestige Deluxe Service (Cont'd)

A112.2.2 Service Description (Cont'd)

C. Optional System Features

1. Loudspeaker Paging Access

The Loudspeaker Paging feature, where facilities are available, allows Prestige Deluxe station users to dial access loudspeaker paging equipment. Capabilities are provided to allow multizone paging where a separate access code is provided for each zone within the customer's location. The customer is responsible for providing all paging equipment, including the paging interface that may be required on the premises.

2. Miscellaneous Line Terminations

The Miscellaneous Line Termination feature provides station user dial access to such lines as WATS, FX and Tie Lines. The Inward Only Termination Feature allows an Inward Only Line ('800' Service) to be assigned in the standard Prestige Features.

3. Prestige Access Management

This feature allows the station user dial access to certain miscellaneous lines and other customer oriented facilities by means of treatment codes. The feature does not prevent intra-Prestige Deluxe station calling.

4. Prestige Conference

The Prestige Conference feature will allow a Prestige Deluxe line to establish a conference of up to six conferees including the originator.

A112.2.3 Rates and Charges

A. The following rates and charges are for Prestige Deluxe service only and are in addition to the applicable service charges, monthly rates and nonrecurring charges for exchange access lines and other services or equipment with which they may be associated.

B. Feature Establishment Charges will apply as specified, when an optional feature is entered or changed. These charges apply in addition to other applicable nonrecurring charges.

1. Prestige Deluxe Basic Service

a. Initial Service Establishment

(1) Common Equipment, includes one code

	Service Establishment Charge	Monthly Rate	USOC
(a) Per Business System	\$500.00	\$1.95	PCV49
2. Prestige Deluxe Exchange Access Lines			
(a) Per Business Line ¹	-	-	NA
3. Standard Station Feature (Each Exchange Line terminated in a Prestige Deluxe Service Arrangement)			
	Feature Establishment Charge	Monthly Rate	USOC

A112.5 ESSX Service Vintage 2 Feature Simplified Message Desk Interface (SMDI)

(Obsoleted 09-28-92. Type 4) Service and rates in this section are available for existing customers at existing locations only. Not available for new service, additions to existing service, or moves of existing service to new locations.

A112.5.1 General

- A. The definitions, *terms and conditions* in Section A12. for Digital ESSX service apply to these offerings except as stated following. (T)
- B. This feature will not be available for additions to existing Vintage 2 Digital ESSX service. The SMDI features in Section A12. will be utilized for any such additions.
- C. Existing subscribers to this feature may convert to the SMDI features in Section A12. For such conversions, neither the termination charges for the feature in this Section nor the installation charges for those features in Section A12. will apply. Existing customers may recast this feature at these rates only once.

A112.6 Customized Dialing Package (CDP)

A112.6.1 General

(Obsoleted 12-17-93, Type 3) Rates and services in this *Guidebook* are available only to existing customers at existing locations. Existing customers will be required to discontinue service when the customer's serving central office is converted to new technology. (T)

- A. A Customized Dialing Package (CDP) is a group of expanded central office features provided in association with individual flat rate Business and Residence exchange lines served by electronic switching equipment located in Company buildings. It is offered as a customer option and may be provided subject to the availability of facilities. A combination of Business and Residence lines in a CDP service arrangement is allowed. CDP rates and charges, as applicable, are in addition to rates and charges for individual exchange access line.
- B. CDP service is offered to customer groups having a minimum of 10 Individual Business and/or Residence exchange access lines. The billing record of toll calls on lines using CDP service will not be affected by the application of the features of this service.
- C. Exchange access lines terminating at different locations may be combined into a single CDP arrangement. All exchange access lines terminating in a CDP arrangement, however, must be served by the same central office. Admission to the CDP arrangement is granted by the authorizing agent as specified in K. following.
- D. CDP lines may utilize Dial Pulse or Touch-Tone® signaling. The rates and charges for Touch-Tone® service apply as appropriate in addition to CDP rates and charges.
- E. Service availability and/or operation may vary depending upon the type of central office and/or the current generic program operating in that central office.
- F. CDP standard and optional features are not permitted on the same line with existing Prestige or Custom Calling Services described in other sections of this *Guidebook*. (T)
- G. A telephone number change will be required in order for a customer to subscribe to CDP service. Upon disassociating the exchange access line from the CDP arrangement, a telephone number change will be required. When a telephone number change is required, the Line Change Charge in Section A4. will apply. (T)
- H. Suspension of exchange line service will result in suspension of CDP service. Suspension of CDP service only is not permitted. Suspension is addressed in Section A2. (T)
- I. The quality of transmission for calls utilizing CDP Call Forwarding Variable or Conferencing may vary depending on the distance and routing involved. The Company makes no representation as to the quality of the transmission on such calls.
- J. Calls forwarded from CDP lines via the Call Forwarding Busy Line feature or the Alternate Answering feature can be routed to a specified CDP line which may be established by the Authorizing Agent to serve as a common call answering point.
- K. The Authorizing Agent is responsible for allowing admission of subscribers to the CDP arrangement. The Authorizing Agent shall do so by providing the potential subscriber with a letter of admission which in turn is presented to the Company. The Authorizing Agent is responsible for paying the rates and charges applicable to the Authorizing Agent as discussed following under "Rates and Charges". The Authorizing Agent title may be transferred from an existing holder to a new party. (See Section A2. for applicable procedures and charges.) If the Authorizing Agent of a CDP arrangement ceases to exist, no new subscribers will be added to that CDP arrangement. Existing service, as established, would be allowed to continue. (T)
- L. A subscriber has no responsibility to the Authorizing Agent. Each subscriber is responsible for paying to the Company all rates and charges, as applicable, associated with his service.
- M. All calls from within the CDP arrangement to destinations outside the CDP arrangement must be preceded by a one digit access code. This includes calls to 0 (Operator) and 911 (emergency). It shall be the Authorizing Agent's responsibility to notify all CDP subscribers in writing that the access code is required.
- N. The Company shall not be liable to any person for damages of any nature or kind arising out of, resulting from, or in connection with the provision of Customized Dialing Package service offered herein, including, without limitation, the inability of the station user, with or without dialing the one digit access code, to reach the operator, 911, or other emergency services for any purpose.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.6 Customized Dialing Package (CDP) (Cont'd)

(M)(T)

A112.6.2 Service Description

(M)(T)

A. Standard Features

(M)

1. Speed Dial

(M)

A user of a CDP equipped line can call other lines in the same CDP arrangement by dialing four or five digits. (The dialing plan is to be determined by the Company.) Two user stations on the same line (same telephone number) cannot access each other via the speed dial feature.

(M)

2. Call Hold

(M)

A user of a CDP equipped line can place any established call on hold by flashing the switchhook and dialing a code. This frees the line to originate another call or to use the optional Call Pickup feature.

(M)

3. Speed Call 6, Customer Changeable List

(M)

This feature enables the CDP station user to place a call, by dialing a one digit code, to any one of six telephone numbers listed by the customer. The station user can change the telephone numbers on the list by dialing a specified code plus the new telephone number desired. Each telephone number on the list is limited to a maximum of 16 digits including access and routing codes.

(M)

4. User Transfer

(M)

A user of a CDP equipped line can transfer a call to another line within or outside the CDP arrangement.

(M)

5. Conferencing

(M)

A user of a CDP equipped line can hold an in-progress call and complete a second call while maintaining privacy from the first call. In addition, the user of the CDP equipped line can add the held call onto a three-way conference.

(M)

B. Optional Features

(M)

1. Call Waiting¹

(M)

When a CDP station user is on an existing call, this feature provides a tone burst alert indicating that a call is waiting. Call Waiting may not be provided on an individual line that is in rotary (arranged for hunting) unless this line is the last line in a rotary hunt group.

(M)

2. Call Forwarding Variable

(M)

This feature automatically transfers all calls made to the subscribing line to any other line within or outside the CDP arrangement.

(M)

3. Call Forwarding Busy Line¹

(M)

This feature automatically routes indialed calls to a preselected exchange line within the CDP arrangement when the called exchange line is busy. The destination telephone number is specified by the customer at the time this feature is ordered. A change in the destination telephone number must be requested from the Company by service order. The destination telephone number for this feature and the destination telephone number for the Alternate Answering feature must be the same telephone number.

(M)

4. Alternate Answering

(M)

This feature automatically transfers incoming calls that encounter a don't answer condition after a preselected number of rings (from 1 to 7) on the subscribing CDP equipped line to an alternate designated line within the CDP arrangement. Because of technical limitations, the actual number of ring cycles before a don't answer call is transferred may vary slightly from the preset number. The destination telephone number and the approximate number of ring cycles before a don't answer call is transferred are specified by the customer at the time the feature is ordered. The destination telephone number for this feature and the destination telephone number for the Call Forwarding Busy Line feature must be the same telephone number. This feature is in operation on a continuous basis and cannot be activated or deactivated by the customer. Changes to the feature must be requested from the Company by service order. A business line may be an alternate answering point for both residence and business exchange access lines. A residence line may be an alternate answering point for only residence exchange access lines.

(M)

Note 1: Call Waiting and Call Forwarding Busy Line are incompatible and are not permitted as features on the same line.

(M)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.6 Customized Dialing Package (CDP) (Cont'd)

(M)(T)

A112.6.2 Service Description (Cont'd)

(M)(T)

B. Optional Features (Cont'd)

(M)

5. Call Pickup

(M)

The Call Pickup feature allows a CDP main station line user to pick up an unanswered call to another main station line in the same Call Pickup group by dialing a specified answer code. If the exchange line being rung has already answered, busy tone will be returned to the station user dialing the answer code. Business and residence lines may not be in the same Call Pickup group.

(M)

6. Speed Call 30, Individual Customer Changeable List

(M)

This feature enables the individual CDP station user to place a call, by dialing a two digit code, to any one of 30 telephone numbers listed by the customer. The station user can change the telephone numbers on the list by dialing a specified code plus the new telephone number desired. Each telephone number on the list is limited to a maximum of 16 digits including access and routing codes.

(M)

7. Automatic Call Back

(M)

Automatic Callback permits an exchange line user who attempts a Speed Dial (standard feature) call to a busy exchange line to be automatically connected to that line when both called and calling lines are subsequently idle. Automatic Callback is only operational for Speed Dial calls between exchange lines served by the same CDP equipped customer group.

(M)

A calling exchange line is permitted only one Automatic Callback request at a time. The called exchange line is limited to one request at a time for Automatic Callback. Once requested, Automatic Callback will remain active for a period not to exceed thirty minutes unless deactivated by the calling exchange line.

(M)

8. Incoming Restriction¹

(M)

Incoming Restriction allows the CDP exchange line to receive only intra-CDP calls. In-dialed calls from the exchange network are routed to intercept.

(M)

9. Outgoing Restriction¹

(M)

Outgoing Restriction allows the CDP exchange line to originate only intra-CDP calls. Other call attempts are routed to intercept.

(M)

10. Distinctive Ringing and Call Waiting Tone

(M)

Distinctive Ringing and Call Waiting Tone are furnished in two classes which permit a CDP exchange line user to identify the source of a call:

(M)

Class	Call Source	
A	Intercommunication (call from within the CDP originated via the Speed Dial feature)	(M)
B	Direct inward dialed local and toll (call from outside the CDP or non-Speed Dial call originated within the CDP)	(M)

Distinctive ringing is furnished to indicate the source of calls to idle exchange lines. Distinctive tone is furnished to indicate the source of calls to busy exchange lines equipped for the optional Call Waiting feature.

(M)

A distinctive ring or tone is furnished for each class and is used to identify all call sources within that class.

(M)

11. Loudspeaker Paging Access

(M)

The Loudspeaker Paging feature allows CDP station users to dial access loudspeaker paging equipment. Capabilities are provided to allow multizone paging where a separate access code is provided for each zone within the customer's location. Optional arrangement may be provided to allow the paged party to be connected to the calling party by dialing an answer code from any exchange line within the CDP arrangement. The customer is responsible for providing all paging equipment.

(M)

Note 1: This feature is for use with remote door or gate operation only, as established by the Authorizing Agent. This feature is not available to individual subscribers. The customer is responsible for providing all equipment for remote door or gate operation.

A112.7 ESSX-1 Auxiliary Station Line Service

(Obsolated June 20, 1985, Type 4) This service will be continued at existing service areas (i.e., Atlanta Airport) under the following *guidebook*. Normal station activity such as additions, rearrangements, changes or moves is allowed at existing service areas subject to the availability of facilities and central office equipment. Not available for new service area installations on or after the obsolated date. (T)

A112.7.1 General

- A. ESSX-1 Auxiliary Station Line Service is classified as a flat rate business service and provided only in connection with other specified basic exchange services furnished from No. 1 ESS central offices. This service may be furnished only under the conditions following and in compliance with all *terms and conditions* in A112.7.3 following. (T)
1. Each customer is a member of a group of customers situated on the connecting premises and/or nearby properties of a common geographical location, such as an airport complex, joint medical college/hospital institutions, complex of government agencies, etc.
 2. Each customer is a member of a group of customers engaged in the conduct of interacting business or governmental activities which, by the nature of their common business interests, have a need for large amounts of communications service between station lines and/or systems of the interacting group, and such a service arrangement would be beneficial to the general business or industrial community.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.7 ESSX-1 Auxiliary Station Line Service (Cont'd)

A112.7.1 General (Cont'd)

A. (Cont'd)

3. Each customer's ESSX-1 Auxiliary Station Line Service is served by the same central office dial switching equipment which serves the ESSX-1 System of at least one other customer at the common location.
4. Each ESSX-1 System at the common location associated with this ESSX-1 Auxiliary Line Service must be arranged for the optional Group Use feature at rates and charges specified in A112.8.8.B.6.. (T)
5. Station lines may be provided in Foreign Exchange and Foreign Central Office serving areas only when the individual customer is eligible for and subscribes to one or more ESSX-1 Auxiliary Station Line Service Station Lines at the designated common location.

A112.7.2 Definitions

A. Nonrestricted ESSX-1 Auxiliary Station Line Service

1. Provides communication between station lines of all ESSX-1 Systems and all ESSX-1 Auxiliary Station Line Services served from the same Centrex Master Complex of a No. 1 ESS.
2. Each basic exchange line arranged to also provide Nonrestricted ESSX-1 Auxiliary Station Line Service can originate and receive local and long distance calls directly and is provided with the same basic service features as a nonrestricted ESSX-1 main station line plus Group Use.

B. Interior ESSX-1 Auxiliary Station Line Service

1. Provides communication between station lines of all ESSX-1 Systems and all ESSX-1 Auxiliary Station Line Services served from the same Centrex Master Complex of a No. 1 ESS.
2. Each Interior ESSX-1 Auxiliary Station Line Service line provides the same basic service features as a fully-restricted ESSX-1 main station line plus Group Use, and cannot originate and/or receive local and long distance calls.

A112.7.3 Terms and Conditions

- A.** ESSX-1 Auxiliary Station Line Service is provided only within the service conditions specified in A112.7.1 preceding, and only when a definite requirement for direct communications exists with other customers, including at least one ESSX-1 subscriber, all of whom are engaged in the conduct of interacting business.
- B.** ESSX-1 Auxiliary Station Line Service is offered subject to the availability of facilities and where, in the judgment of the Company, service may be provided by the use of service arrangements, equipment and facilities in quantities and types regularly furnished by the Company.
- C.** Each customer furnished with this service is responsible and will be billed for the service(s) and feature(s) provided, and the autonomy of each subscriber's service must be maintained.
- D.** One or more Interior ESSX-1 Auxiliary Station Lines may be furnished to a customer.
- E.** A maximum of four Nonrestricted ESSX-1 Auxiliary Station Lines may be furnished to a customer.
- F.** Nonrestricted ESSX-1 Auxiliary Station Line(s) may not be terminated as trunks in PBX and/or ACD Systems.
- G.** ESSX-1 Auxiliary Station Line Service may be extended beyond the boundary of the common geographical location only when the main location of the service is the designated common geographical location.
- H.** Minimum monthly Charges, *Terms and Conditions* as specified for ESSX-1 service in A112.7.3 do not apply to ESSX-1 Auxiliary Station Line Services. (T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.7 ESSX-1 Auxiliary Station Line Service (Cont'd)

A112.7.3 Terms and Conditions (Cont'd)

- I. Termination Charges, Terms and Conditions as specified for ESSX-1 service in A112.8.2.A.3.c.(2) do not apply to ESSX-1 Auxiliary Station Line Services.
- J. Interior ESSX-1 Auxiliary Station Line Service customers must be subscribers for other telephone service(s) with access to the exchange network.

A112.7.4 Rates and Charges

A. General

- 1. Rates quoted herein consist of switching facilities located on Company premises and connected by main station lines terminated on the subscriber's premises.
- 2. The minimum revenue guarantee period for each ESSX-1 Auxiliary Station Line provided is one month.
- 3. The following nonrecurring charges are in addition to any applicable regular service and installation charges provided for in other sections of this Guidebook.

B. Nonrecurring Charges

- 1. Service Establishment Charge

Nonrecurring Charge	USOC
\$40.00	NA

(a) Per main station line¹

- 2. Service Charges

Service charges as specified for business service in Section A4. are applicable for ESSX-1 Auxiliary Station Line and extension station lines provided.

C. Recurring Charges

- 1. Nonrestricted ESSX-1 Auxiliary Station Line Service,² per line

Monthly Rate	USOC
\$-	CU1

(a) When terminated in a single or multibutton telephone set (maximum of 4 lines per customer)³

(b) **(DELETED)**

(D)

Note 1: One Service Establishment Charge applies when any number of main station lines of the same type are installed at the same time for the same customer.

Note 2: Includes USOC EGR.

Note 3: Monthly rate is 125 percent of Business Individual Line Flat Rate.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.7.4 Rates and Charges (Cont'd)

C. Recurring Charges (Cont'd)

2. Interior ESSX-1 Auxiliary Station Line Service,¹ per line

	Monthly Rate	USOC C1B
(a) When terminated in a single or multibutton telephone set ²	\$-	
(b) When two or more lines have rotary features ³	-	C12
(c) When terminated as a trunk in a PBX, ACD, etc. ³	-	CTK
3. Extension Station Lines		
a. Each Extension Station Line as specified in A112.8.7.C.4.(c).		(T)
4. Optional Features ⁴		
a. Each Optional Feature; apply same rates, <i>terms and conditions</i> as specified in A112.8.8.C. for ESSX-1 Optional Features as appropriate.		(T)
5. Distance Charges		
a. Distance Charges for each ESSX-1 Auxiliary Station Line Service will apply for each circuit required to provide service located in excess of one mile (Airline Distance) from the central office. Apply same rates, <i>terms and conditions</i> as specified in Section A112.8.5 for ESSX-1 Distance Charges.		(T)

A112.8 ESSX-1 Service

(Obsoleted 10-08-95, Type D) Service rates and charges in this Section are not available for new installations, moves, transfers of service, or replacements of existing service.

Obsolescence Rules

1. ESSX-1 service subscribers under a month-to-month payment option will be allowed to maintain their ESSX-1 service at month-to-month rates.
2. ESSX-1 service subscribers under contract will be allowed to maintain their ESSX-1 service until the expiration date associated with the Common Equipment of their contract. Upon expiration of the contract associated with the Common Equipment, the Company reserves the right to convert all or part of the subscriber's account to the month-to-month rates and charges as outlined in this *Guidebook*. (T)

(Obsoleted 6-14-85, Type 4) Provided only to those systems already in service or to those systems for which firm orders were received by the Company prior to this date. Additions, deletions and/or rearrangements to an existing system can be made subject to the capacity of the central office from which it is provided.

Note 1: Includes USOC's EGR and ERSVC.

Note 2: Monthly rate is 125 percent of ESSX-1 Group "B" Main Station Line Rate.

Note 3: Monthly rate is 175 percent of ESSX-1 Group "B" Main Station Line Rate.

Note 4: The provision of certain optional features with ESSX-1 Auxiliary Station Line Service may be technically prohibitive, and the availability of the feature(s) desired must be ascertained prior to a firm commitment being made to the customer.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS**A112.8 ESSX-1 Service (Cont'd)****A112.8.1 General (Cont'd)**

- A. ESSX-1 service provides an electronic switching service for intercommunicating purposes between main station lines of a subscriber and for connection through the local and long distance telephone network to other subscribers on a dial basis without intermediate handling by an attendant. The scope of basic ESSX-1 service comprises: (Cont'd) (M)
1. Direct Inward Dialing (M)
 2. Direct Outward Dialing (M)
 3. Intercept (M)
 4. Station Identification (M)
 5. Basic Station Line Hunting (M)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.8 ESSX-1 Service (Cont'd)

A112.8.1 General (Cont'd)

- A. (Cont'd)
 - 6. Touch-Tone® or Rotary Dial
- B. ESSX-1 service is furnished, subject to the availability of facilities and features from a No. 1 or 1A Electronic Switching System located in a central office building owned or leased by the Company from which the service is provided. The service allows for normal station line activity including incidental additions and deletions. Major additions to and/or major relocations of ESSX-1 systems are subject to the same *terms and conditions* as initial installations. (T)
- C. The ESSX-1 Primary Service Feature Package is provided on an optional basis for individual main station lines except for main station lines terminating in attendant consoles or telephone sets used as consoles which require the Primary Service Feature Package on a non-optional basis.
- D. Certain ESSX-1 Auxiliary Services and secondary service features are available on an individual main station line basis, and are subject to the capabilities of the serving ESS central office.
- E. Auxiliary Services, as specified herein, may be offered for use with compatible customer-provided consoles.
- F. Suitable building space and commercial power, including outlets, required for the operation of key telephone equipment, console(s), and other station apparatus at the subscriber's premises will be furnished by the subscriber.
- G. All console functions by the attendant at the subscriber's premises are performed at the expense of the subscriber and must conform with the operating practices and procedures of the Company to maintain a proper standard of service.
- H. All ESSX-1 main station lines must be associated with the main switching equipment. Subsidiary System Arrangements utilizing satellite switching equipment are offered only with ESSX-1 service as outlined in A112.8.8.G. (T)
- I. Tie lines for direct connections between a basic ESSX-1 system and other systems are provided primarily for communication between main station lines of the two systems. In addition these tie line connections may be arranged to provide completion of incoming or outgoing local and long distance calls through the ESSX-1 system to or from the other system (ESSX-1 or non-ESSX-1) provided such tie lines are equipped with the Dial Cut-through Arrangement; USOC:ETM, necessary for tandem tie line operation.
- J. Where completion of incoming and outgoing local and long distance calls through an ESSX-1 system is furnished to or from main station lines of a separate ESSX-1 system in another exchange or a non-ESSX-1 system in the same or different exchange, the charges applicable for the following features, apply in addition to the regular charges for the facilities connecting the systems, except for Subsidiary System Arrangements furnished under the *terms and conditions* specified in A112.8.8.G. (T)
 - 1. Miscellaneous Line Termination charges as outlined in A112.8.8.D apply for each miscellaneous line that is terminated as a trunk in an ESSX-1 system.
 - 2. ESSX-1 main station line charges apply to miscellaneous lines furnished with unique access codes (trunk level access), except for tie lines furnished in connection with Subsidiary System Arrangements as specified in A112.8.8.G. (T)
 - 3. ESSX-1 optional feature charges as outlined in A112.8.8.C apply for each trunk terminated main station line as offered in A112.8.7.C.5, as appropriate. (T)
- K. Dormitory service is furnished in accordance with the *terms and conditions* for Dormitory Communications Service specified in Section A13.4. (T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.8 ESSX-1 Service (Cont'd)

A112.8.1 General (Cont'd)

- L.** A single ESSX-1 system may be provided for the common use of city and county government functions located in the same exchange area. Either the city or the county may subscribe for the service and the subscriber shall be responsible for all charges for the service. The subscriber may prorate the charges for the other user, but shall not make any additional charges in connection with use of the service. (O)
- M.** An ESSX-1 system may not be provided for Intercommunications (stand alone) service only. Main Station Lines and Exchange Access Trunks are required for each ESSX-1 system. (O)
- N.** Suspension of service is not permitted with ESSX-1 service. (O)
- O.** Definitions (O)
1. Basic ESSX-1 Service Features (O)
 - a. ESSX-1 System (O)

An ESSX-1 System consists of electronic switching equipment connected by ESSX-1 main station lines. A system includes only those main station lines whose inward exchange and toll service is through a main ESS switching location via a single central office code. (O)

 - (1) Basic Station Line Hunting (O)

Basic station line hunting service is usually a group of ESSX-1 main station lines associated with one directory number. A call completing to the directory number will hunt over the lines in a group until an idle line is found. Each main station line in the group is associated with a terminal number. When a main station line number of the group is dialed, the hunt begins at this point and continues until an idle terminal is found or until the end of the multiline hunt group is found. The Company may, at its option, provide station hunting arrangements by the use of either multiline hunt groups or series completion or both. (O)

Certain optional features are common to each main station line in a multiline hunt group. In such cases, rates and charges applicable for the optional feature apply to every main station line in the multiline hunt group. (O)
 - (2) Direct Inward Dialing (O)

Incoming calls from the exchange or toll network may be dialed directly to completion to any called main station line served by the ESSX-1 main switching equipment without the help of an attendant. (O)
 - (3) Direct Outward Dialing (O)

Outward calls may be dialed directly to completion from any unrestricted main station line served by the ESSX-1 main switching equipment without the help of an attendant. (O)
 - (4) Intercept (O)

Intra-ESSX-1 and incoming network calls dialed to unassigned numbers are routed to different common recorded announcements. (O)
 - (5) Station Line Identification (O)

An itemized list of toll calls is shown on the bill with the number of each originating main station line. (O)
 - (6) Touch-Tone® or Rotary Dial (O)

Main station lines and attendant access lines may be equipped for Touch-Tone® and/or Rotary Dial operation where facilities permit. (O)
 - (7) Station Line to Station Line Calling (O)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.8 ESSX-1 Service (Cont'd)

A112.8.1 General (Cont'd)

O. Definitions (Cont'd)

1. Basic ESSX-1 Service Features (Cont'd)

a. ESSX-1 System (Cont'd)

Calls may be dialed directly to completion between any two main station lines of an ESSX-1 system.

2. Auxiliary Services

a. Attendant Service

Incoming calls to the main listed number are answered by an attendant, who may complete the call to the desired main station line by means of the Call Transfer feature provided with an ESSX-1 Primary Feature Package as specified in A112.8.8.C.1.b.(1). (T)

An unrestricted and semirestricted main station line user may dial the attendant over attendant lines to secure help in the completion of an outgoing call by means of the Dial "0" calling auxiliary attendant feature as offered in A112.8.8.B.4. (T)

3. Auxiliary Attendant Services

a. Access Lines to Customer Oriented Facilities

Allows dial access from ESSX-1 service for connection to customer oriented facilities (Recorded Telephone Dictation, Dial Code Sending Equipment and Loudspeaker Paging).

(1) Recorded Telephone Dictation Feature

Permits access to a control of customer-owned telephone dictating equipment by main station lines, tie trunks, and attendants within the ESSX-1 system. Main station line, attendant and tie trunk access must be via Touch-Tone®.

(2) Dial Code Sending (Code Calling) Feature

Code Calling provides dial access to customer-premises located code calling equipment by main station line, attendant access and tie lines of an ESSX-1 system. The dialed two or three digit code activates signaling devices on the customer's premises to produce a coded signal corresponding to the dialed code. The called party, upon recognition of the signal, is automatically connected to the calling party by dialing a special code from any main station line in the ESSX-1 system.

(3) Loudspeaker Paging Feature

Allows ESSX-1 attendants and main station line users to dial access loudspeaker paging equipment. Capabilities are provided to allow multizone paging where a separate access code or directory number is provided for each zone within a customer's location. Optional arrangements may be provided to allow the paged party to be connected to the calling party by dialing an answering code from any main station line within the ESSX-1 system.

b. Attendant Call Thru Test on Tie Trunks

Attendant Call Thru Test on Tie Trunks is a Data Link console attendant position optional service arrangement which permits the ESSX-1 system attendant to select a specific trunk within a trunk group for the purpose of verifying that the trunk is in working order. As used herein, the terms "Trunk" and "Trunk Groups" apply to Tie Lines, Tandem Tie Lines, and SCAN access lines.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.8 ESSX-1 Service (Cont'd) (O)

A112.8.1 General (Cont'd) (O)

O. Definitions (Cont'd) (O)

3. Auxiliary Attendant Services (Cont'd) (O)

c. Attendant Camp-On and Camp-On MODE Options (O)

This feature allows incoming listed number calls, which the attendant attempts to complete to a busy main station line, to be held waiting and then automatically connected when the called main station line becomes available. An indication of camp-on (tone) will be given to the busy main station line each time the attendant attempts a completion. (O)

Attendant Camp-On options are available as follows: Audible Ringing (no additional charge), Silence, Music, and Recorded Announcement. (O)

d. Attendant Conference (O)

Using a six-port conference circuit, an attendant may interconnect up to five conferees on one call. The sixth port is required for attendant access. Main station lines that are permitted dial access to the Attendant Console equipped with the conference feature are the only main station lines that can initiate this feature. (O)

e. Attendant Control of Facilities (O)

Attendant Control of Facilities is a console attendant position optional service arrangement which permits the ESSX-1 system attendant to restrict the dial access of all main station lines to FX, WATS, CCSA, SCAN, EPSCS, ETS, and tie line terminations associated with that system. When such restriction is in effect, attempted outward dialed calls will be routed to the attendant. (O)

f. Attendant Emergency Override (O)

This ESSX-1 feature allows an attendant to override a main station line busy condition set by a make busy key. The attendant dials an access code plus the extension number and will terminate to the specific main station line dialed, regardless of call forwarding, series completion or multiline hunt arrangements. (O)

g. Centralized Attendant Service (CAS) (O)

CAS allows a customer having an ESSX-1 with data link console(s) and a number of remote PBX's and/or ESSX systems to concentrate all attendants at one location. In addition to decreasing the number of attendants required, CAS should also result in better service and administrative control. (O)

h. Customer Controlled Station Restriction (O)

Permits the customer to change the calling arrangement of selected main station lines to four different restrictions as follows: (O)

(1) Outgoing Call Restriction (O)

Calls dialed, other than intercommunication calls, will be routed to a tone. (O)

(2) Incoming Call Restriction (O)

Calls from outside the ESSX-1 system direct dialed to selected main station lines, will be routed to the attendant or to an announcement. Calls to the attendant and intercommunication calls are not restricted. (O)

(3) Station-to-Station Call Restriction (O)

All calls dialed to select main station lines, other than attendant calls, will be routed to an announcement. (O)

EFFECTIVE: February 28, 2006

O. Definitions (Cont'd) (O)

3. Auxiliary Attendant Services (Cont'd) (O)

h. Customer Controlled Station Restriction (Cont'd) (O)

(4) Total Restriction (O)

All calls dialed to or dialed from selected main station lines will be routed to the attendant or to an announcement, and outgoing call attempts will receive a tone. (O)

i. Dial "0" Calling (O)

Dial "0" Calling permits a main station line user to reach the attendant by dialing the single digit "0". The call is routed to the attendant over the same console access loops as provided for other incoming calls unless the position is furnished with discrete identification. If discrete identification for Dial "0" calls is provided, rates and charges for Attendant Access Circuits, Console Access loops and other related services apply. (O)

j. Dial Thru Attendant (DTA) (O)

The ESSX-1 DTA feature allows main station line users to complete dialing on other than station-to-station calls after the attendant selects the trunk facility on attendant-handled outgoing calls. (O)

k. Electronic Message Registration Service (O)

Provides for automatic counting, storage and display of stored message unit count for local message units generated from individual main station lines arranged for this feature. An Inquiry and Display Console (IDC) is used to retrieve and display message unit usage. An optional tape printer is available where printed tape is desired in addition to the visual display. (O)

l. Flexible Incoming Call Restriction (O)

Permits the customer to route incoming calls for preselected main station lines to the attendant, to an announcement, or to a designated main station line. This feature may be activated by the attendant or by a control key. (O)

m. Group Use Service (O)

Group Use Service is an optional service feature whereby different ESSX-1 systems which are served by the same central office equipment may be arranged for intercommunication calling between main station lines and attendant positions of those systems. (O)

n. Outgoing Trunk Queuing - WATS (OTQ) - Phase I (O)

Outgoing Trunk Queuing - WATS is an ESSX-1 optional feature, available where facilities permit, that allows main station line users, by dialing a preselected code, to have their call held in queue (stored), if all the associated WATS facilities are in use for prior calls. The call is completed, without further dialing, when a facility becomes available; or on reaching the time limit in queue, is advanced to the preselected option. The calling main station line must remain off-hook to retain the call in queue. Where compatible, time trunks may be given access to queuing. (O)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.8 ESSX-1 Service (Cont'd)

A112.8.1 General (Cont'd)

O. Definitions (Cont'd)

3. Auxiliary Attendant Services (Cont'd)

n. Outgoing Trunk Queuing - WATS (OTQ) - Phase I (Cont'd)

Options available with OTQ-WATS Phase I are:

- (1) Customer specified time limit in queue,
- (2) Overflow calls routed to the Messge Telecommunications System Toll or to overflow tone,
- (3) Routing calls to the optional feature of Automatic Route Selection (ARS) Basic before routing to OTQ-WATS,
- (4) Recorded announcements to calls held in queue, or
- (5) Music (customer-supplied) to the calls held in queue, or
- (6) Silence to calls held in queue,
- (7) Priority queuing, on an individual station basis,
- (8) Attendant control of calls where two or more separate queues are provided (Inflow/Outflow).

o. Selected Customer Control of Facilities

Selected Customer Control of Facilities is an optional feature which allows an ESSX-1 attendant to control dial access to an individual facility group. The facility group may be real or simulated facilities. Attendant Control of Facilities, a previously developed feature, allows for attendant control of all facilities accessed through a particular IXX code. The attendant can access the facilities for completion of selected calls. In contrast, Selective Customer Control of Facilities allows an attendant to control access to a particular facility group through activation and deactivation of a key connected to the Master Scan Point of the facility group. One key is associated with one facility group. All traffic, regardless of source, is denied access to the affected facility group once Selected Customer Control of Facilities is activated. When the facility group is part of an Automatic Route Selection - Basic or ARS - Deluxe route pattern, calls will automatically route to the next facility group in the routing pattern. If there is no alternate route, the call will receive normal reorder treatment.

p. Source Billing of Attendant Handled Calls

The Source Billing of Attendant Handled Calls feature causes the attendants billing directory number to be replaced with the source party's billing directory number in all Automatic Message Accounting records which result from ESSX-1 Attendant extending a call. This change in billing directory numbers in the Automatic Message Accounting record only occurs if the source party belongs to the same master ESSX-1 as the attendant.

q. Station Direct Inward Dialing Restriction

Permits the customer to have selected main station lines restricted from receiving Direct In-Dialed calls from the MTS network. Direct In-Dial call attempts will be routed to the attendant.

r. Station Number Correlation

Permits main station line numbers to be the same as numeric room numbers, where facilities permit.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.8 ESSX-1 Service (Cont'd)

A112.8.1 General (Cont'd)

O. Definitions (Cont'd)

4. Optional Features

a. ESSX-1 Primary Feature Packages

- (1) Three-way calling, consultation hold and call transfer. An ESSX-1 main station line user can, by flashing while on a 2-party call, effect a 3-way conference and/or transfer. After flashing, the main station line user dials the third party for private consultation while the second party is held. By flashing a second time, the second party is added on and a 3-way conference is effected. Subsequently, a transfer is accomplished when the original main station line user goes on-hook. At least one of the parties remaining on a transferred call must be an ESSX-1 main station line user.

This Primary Feature Package is provided with either of the following options¹:

-Three-Way Calling, Consultation Hold and Call Transfer - INDIVIDUAL. This option allows Three-Way Conference Transfer on incoming calls only.

-Three-Way Calling, Consultation Hold and Call Transfer - ALL CALLS.² This option allows Three-Way Conference Transfer on both incoming and outgoing calls.

- (2) Call Forwarding Variable, Call Forwarding Busy Line, Call Forwarding Don't Answer, Call Hold, Call Pickup and Speed Calling 6 Customer Changeable List.³

5. Secondary Optional Features

a. Automatic Callback

Automatic Callback permits a main station line user who attempts an intercommunication call to a busy main station line to be automatically connected to that line when both called and calling lines are subsequently idle. Automatic Callback is only operational for intercommunication calls between main station lines served by the same No. 1 or 1A ESS customer group.

A calling main station line is permitted only one Automatic Callback request at a time. The called main station line is limited to only one request at a time for Automatic Callback. Once requested, Automatic Callback will remain active for a period not to exceed thirty minutes unless deactivated by the calling main station line.

Note 1: Consultation Hold and Call Transfer - INDIVIDUAL may not be furnished to any ESSX-1 system having main station lines arranged for Consultation Hold and Call Transfer - ALL CALLS unless such main station lines are segregated by the Split Service Feature (USOC EBS).

Note 2: An ESSX-1 system or split service group of an ESSX-1 system arranged for Call Transfer - ALL CALLS and served by a central office equipped with the appropriate generic program may subscribe to the Added Call Transfer Option feature. Added call transfer option provides the capability on an ESSX-1 group basis to allow any main station line, non Data Link Attendant, trunk dial transfer tie trunks and release link lines/trunks with originating major class to extend direct inward dialed (DID) to direct outward dialed (DOD) calls.

Note 3: For this feature package capability see definitions for individual features as specified herein.

EFFECTIVE: February 28, 2006

A112.8 ESSX-1 Service (Cont'd)

A112.8.1 General (Cont'd)

O. Definitions (Cont'd)

5. Secondary Optional Features (Cont'd)

b. Call Forwarding - Variable¹

When activated by a main station line user, automatically routes calls intended for his main station line to any other main station line selected within the same ESSX-1 system or optionally outside² the ESSX-1 system. The main station line selected may also be the attendant. The attendant may also activate call forwarding for a main station line.

c. Call Forwarding - Don't Answer

Automatically routes indialed calls to the attendant or preselected main station line when the called main station line doesn't answer within the ringing cycle. The selection of Ringing Cycle options is available on a per main station line basis and may be changed by Service Order.

d. Call Forwarding - Busy Line

Automatically routes indialed calls to the attendant or preselected main station line when the called main station line is busy.

e. Call Forwarding over Private Facilities¹

f. Call Pickup

Allows a main station line user to answer calls directed to another main station line within the same present call Pickup group.

g. Call Transfer Inter-ESSX-1 Screening

Call Transfer Inter-ESSX-1 Screening is an extension of ESSX-1 Dial Transfer Screening which may be used in ESSX-1 complexes that may have overlapping extension ranges. With this feature it is possible to optionally restrict transfers of external calls to main station lines outside the customer group of the controller party.

h. Call waiting - Terminating

Informs a busy main station line, when the main station line is so equipped, that an incoming call is waiting (burst of tone), and permits holding the present connection while answering the new call and return to the original connection.

i. Call Waiting - Originating

Allows the application of the Call Waiting tone from the originating main station line to any busy main station line in the same ESSX-1 system.

Call Waiting-Originating options are available as follows: audible ringing (no additional charge), music, and recorded announcement.

Note 1: Call Forwarding Reminder Ring Option is an enhancement to Call Forwarding - Variable and Call Forwarding over Private Facilities and is optionally available on a per main station line basis. It may be ordered through a Service Order. Call Forwarding Reminder Ring option provides a reminder ring at the forwarding station prior to the forwarding of a call to the distant location. Call Forwarding, Reminder Ring Option is a 1E6 base generic feature and is offered at no additional monthly rate.

Note 2: Call Forwarding "outside" option is a 1E5 base generic feature and is offered at no additional monthly rate.

EFFECTIVE: February 28, 2006

A112.8 ESSX-1 Service (Cont'd)

A112.8.1 General (Cont'd)

O. Definitions (Cont'd)

5. Secondary Optional Features (Cont'd)

j. Call Waiting - Dial (DCW)

The Dial Call Waiting (DCW) feature provides the ability for originating ESSX-1 main station lines to invoke call waiting service on selected intragroup calls by dialing the dial call waiting access code followed by the extension number of the main station line to be call waited. Call Waiting-Dial also includes the features of Call Waiting-Originating. Call Waiting-Originating options may be provided with Call Waiting-Dial feature.

k. Call Waiting - Intragroup

Permits intragroup calls to a busy main station line equipped with the feature to be answered while the existing call is held. Call Waiting-Intragroup also includes the features of Call Waiting-Terminating.

l. Call Hold

Allows a main station line user to place any call involving his main station line on hold by flashing and dialing a special code. The main station line is then free to originate another call. The first call is retrieved by dialing the hold code a second time.

m. Code Restriction Arrangements

A Code Restriction Arrangement automatically denies a portion or all main station lines of an ESSX-1 system direct outward dialing access to one or more three-digit. Company central office and/or service codes within the local exchange service calling area in which the ESSX-1 system is located. Code restriction provides a distinctive tone to indicate that access is not permitted on call attempts.

(1) The three-digit central office and service codes which may be restricted constitute those codes to which Public Announcement and Directory Assistance Services are assigned. The term "Public Announcement Services" as used herein are those services which, in the judgment of the Company, furnish advertised recorded announcement messages to the general public (e.g., time, weather, sport scores and stock market reports). The Public Announcement Service central office codes arranged for code restriction will be determined by the Company and will be commonly denied access in the central office serving ESSX-1 systems subscribing to this service arrangement.

(2) At the time a code restriction arrangement is installed, the ESSX-1 system will be arranged for the code restriction specified by the customer and the main station lines designated by the customer will be so equipped. When the customer requests the subsequent addition or removal of code restriction on a main station line, the appropriate Service Charge as specified for a change in line termination applies per main station line affected except that no such charge applies when the code restriction arrangement is disconnected in its entirety.

(3) Code restriction is not furnished in connection with the attendant access lines of an ESSX-1 system.

(4) Where code restriction applies to a particular central office code, direct outward dialed main station line access is denied to telephone numbers associated with that central office code.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.8 ESSX-1 Service (Cont'd)

A112.8.1 General (Cont'd)

O. Definitions (Cont'd)

5. Secondary Optional Features (Cont'd)

n. Conference Calling - Station

Allows a main station line user to establish a conference connection of up to six conferees (including the originator) without the aid of the attendant.

o. Directed Call Pickup

Allows calls directed to a main station line with the Directed Call Pickup feature to be answered by any main station line in the ESSX-1 group. This is accomplished by dialing an access code followed by the extension number of the main station line to which the call was directed. If the main station line has already answered, a three-way connection is established. To be arranged for Directed Call Pickup, the main station line also must be arranged for regular Call Pickup. Directed Call Pickup may be used for Trunk Answer Any Station purposes. Charges for Directed Call Pickup are applicable to the terminating or "called" main station line.

p. Directed Call Pickup - Nonbarge-In

The Directed Call Pickup-Nonbarge-In feature allows an ESSX-1 main station line user to pick up an unanswered call to another ESSX-1 main station line, equipped with Directed Call Pickup by dialing a special answer code plus the number of the main station line being rung. If the main station line being rung has already answered, busy tone will be returned to the main station line user dialing the answer code and station line number. To be arranged for Directed Call Pickup-Nonbarge-In, the main station line does not have to be arranged for regular Call Pickup or Directed Call Pickup. Charges for Directed Call Pickup-Nonbarge-In are applicable to the originating or "calling" main station line.

q. Distinctive Ringing and Call Waiting Tone

Distinctive Ringing and Call Waiting Tone are furnished in different classes which permit main station line users to identify the source of calls. These three classes identify:

Class	Call Source
A	Intercommunication
B	Direct inward dialed local and toll Attendant completed CCSA access line Tie Line
C	Preemptible SCAN access line Dial Call Waiting Call Waiting-Originating Data Link Console night service arrangement

Distinctive ringing is furnished to indicate the source of calls to idle main station lines. Distinctive tone is furnished to indicate the source of calls to busy main station lines equipped for Call Waiting optional service features.

A distinctive ringing/tone is furnished to each class and is used to identify all call sources within each class.

Class A ringing/tone is not furnished separately and is included at no additional charge to main station lines arranged for Class B ringing/tone. Class C ringing/tone may be furnished separately or in association with Class B ringing/tone.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.8 ESSX-1 Service (Cont'd)

A112.8.1 General (Cont'd)

O. Definitions (Cont'd)

5. Secondary Optional Features (Cont'd)

q. Distinctive Ringing and Call Waiting Tone (Cont'd)

Class C tone associated with Call Waiting-Originating or Dial Call Waiting will only be provided where all such main station lines in the same No. 1 ESS customer group are commonly arranged for Class C tone.

Where a customer's system is equipped with a Data Link Console and is arranged for Class B ringing/tone, Class C ringing will be provided to identify night service arrangement extended calls to main station lines at no additional charge.

r. Single Digit Dialing or Abbreviated Dialing for Services

Provides ESSX-1 main station lines the ability to dial a one- or two-digit code to reach selected lines within the ESSX-1 system. Also provides the ability to use variable length codes by means of timing. Abbreviated dialed calls are completed to predesignated ESSX-1 administrative main station lines. This feature may also be used to reach particular internal facilities such as dial dictation equipment. Abbreviated dialing is not required where regular "1XX" or "level" access codes are utilized without conflict in the numbering plan.

s. Speed Calling

Lets the main station line user place calls to a list of frequently called telephone numbers by dialing fewer digits than the complete directory number. Telephone numbers, including routing codes, are limited to a maximum of sixteen digits. The service is offered in repertory sizes of six and thirty. With the six list, the user will dial a one-digit code; with the thirty number list, the main station line user will dial a two-digit code.

t. Split Service Offering

This feature permits segregation of ESSX-1 main station lines for a customer into separate groups, thereby enabling each group to have a different set of common features. In a hotel this arrangement is quite valuable in that the administrative telephones have usage characteristics and feature requirements similar to basic ESSX-1 main station lines. Typically administrative telephones will utilize DID, AIOD, consultation hold, add-on and call forwarding features. The guest room telephones usually will not be equipped with these features and a split service offering should be used at appropriate rates. Splitting the service in this manner allows all other No. 1 ESS main station line user features on an optional basis, thus enhancing the versatility of the administrative telephones and reducing the need for key telephones and equipment.

(T)

u. Station Dial Code Screening

Station Dial Code Screening permits designated ESSX-1 main station lines to be used to originate calls to specified Message Telecommunications System (MTS) telephoned in Number Plan Areas and Central Office Codes within the continental U.S., and restricts these main station lines from originating calls to other MTS telephones. Three- or six-digit screening is provided.

EFFECTIVE: February 28, 2006

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.8 ESSX-1 Service (Cont'd) (O)

A112.8.1 General (Cont'd) (O)

O. Definitions (Cont'd) (O)

5. Secondary Optional Features (Cont'd) (O)

u. Station Dial Code Screening (Cont'd) (O)

Two arrangements are available: (O)

- (1) Arrangement I permits main station line originated calls to be completed to telephone numbers with selected Central Office Codes (NNXs) in the Home Numbering Plan Area (HNPA) or other Numbering Plan Areas (NPAs) using the Message Telecommunications Network (MTS). (O)
- (2) Arrangement II permits main station line originated calls to be completed via private network facilities which have been arranged for uniform numbering, senderized operation and other network main station lines and offnet to telephone numbers with selected NPA and Central Office Codes. (O)

v. Station Hunting Arrangements (O)

Circular Hunt, Uniform Call Distribution and Preferential Hunt are optional main station line hunt arrangements for searching over and distributing calls in a hunt group. These hunts are extensions of the basic multiline hunting feature included in basic ESSX-1 service. (O)

- (1) Circular Hunt permits a complete hunt over all the terminals in the group starting with the dialed number. (O)
- (2) Uniform Call Distribution provides an even distribution of incoming network and intercom calls among the individual main station lines of a hunt group and includes Circular Hunt. (O)
 - Call Queuing is an option that may be added to the UCD arrangement. Queuing permits calls, in excess of main station lines in a UCD group, to be held in the central office and distributed in their order of arrival to main station lines in the UCD group as the main station lines become available. (O)
- (3) Preferential Hunt permits a prehunt over a subset or preferential group of main station lines before hunting through the entire group. The hunt through the group may be a regular or circular hunt. Each main station line may have its own preferential group or list. (O)
- (4) Make-Busy Arrangement allows terminals (main station lines) to appear busy to incoming calls by the use of control keys, and still allow the main station line to originate calls. (O)
 - A terminal make-busy arrangement functions on individual main station lines. (O)
 - A group make-busy arrangement functions on all main station lines in the hunt group. (O)
 - A random make-busy arrangement functions only on selected main station lines in the hunt group. (O)
 - A stop hunt arrangement (break in Rotary) functions to prohibit incoming calls to terminals beyond a specified point in a hunt group. (O)

A112.8.1 General (Cont'd)

O. Definitions (Cont'd)

5. Secondary Optional Features (Cont'd)

w. Station Restriction

Various types of restrictions may be assigned as options to **ESSX-1** main station lines. An ESSX-1 main station line may be provided with a combination of the various types of main station line restrictions available.

(1) Full Restriction

- **From** Incoming Calls Only

Allows the main station line to receive only intra-ESSX-1 (including tie line and other customer oriented facilities) calls, except from the attendant. In-dialed calls from the exchange network are routed to intercept.

- **From** Outgoing Calls Only

Allows the main station line user to originate calls to ESSX-1 main station lines, tie lines, and FX lines, but cannot call the attendant or use the Call Transfer feature.

- **From** Incoming and Outgoing Calls

Combination of the above, and in effect, Interior Service without attendant access capability.

(2) Semi-restriction

- **From** Incoming Calls Only

Allows the main station line to receive only intra-ESSX-1 (including tie line and other customer-oriented facilities) calls, including calls from the attendant. In-dialed calls from the exchange network are routed to intercept.

- **From** Outgoing Calls Only

Allows the main station line user to originate calls to ESSX-1 main station lines, tie lines, and FX lines, including calls to the attendant.

- **From** Incoming and Outgoing Calls

Combination of the above, and in effect, Interior Service with attendant access capability.

(3) Denied Service

- **From** Incoming Calls Only

The main station line is used for outgoing calls only and cannot receive calls. All incoming calls are routed to common intercept announcement.

- **From** Outgoing Calls Only

The main station line is used for incoming calls only and no outgoing calls can be originated from the main station line.

A112.8 ESSX-1 Service (Cont'd)

A112.8.1 General (Cont'd)

O. Definitions (Cont'd)

5. Secondary Optional Features (Cont'd)

w. Station Restriction (Cont'd)

(4) Denied Access to ESSX-1 Facilities with Unique Access Codes (trunk level access)

This feature prevents the main station line user from dial access to certain miscellaneous lines and other customer-oriented facilities by means of treatment codes. An ESSX-1 system is limited to a maximum of eight treatment codes. This feature does not prevent intra- ESSX-1 main station line calling.

x. Station Toll Diversion

This feature prevents the main station line user from placing calls over the toll network. The calling attempt is diverted to the ESSX-1 attendant.

y. Station Toll Restriction

This feature prevents the main station line user from placing calls over the toll network. The calling attempt is not sent to the attendant or operator; it is routed to reorder tone.

z. Manual Originating Line Feature

The manual originating line feature is for ESSX main station(s) used with Electronic Tandem Switching (ETS). This feature implies a dialed digit for access to ETS Automatic Route Selection (ARS) dial tone. No access to local exchange service or ESSX features is provided. An additional split service common block is required for each ESSX system using this feature.

6. Miscellaneous Line Terminations

a. Miscellaneous lines are those lines not basic to the ESSX-1 system; such as, Tie Lines, WATS, Foreign Exchange, CCSA, etc., which require ESSX-1 switching capabilities in order to function with ESSX-1 service.

(1) Trunk Equipment

Provides access to the ESSX-1 system by means of a simulated facilities group and permits dialing of calls over miscellaneous lines to and from ESSX-1 main station lines.

(2) Basic Terminations

Provides terminations (senderized) for miscellaneous lines interconnecting an ESSX-1 system to distant switching systems and access to Foreign Exchange and WATS lines, etc. This arrangement does not provide for switching (Tandem) through the ESSX-1 for connection to miscellaneous lines of the distant switching system.

(3) Optional Dial Cut-Through Arrangements (Tandem)

Provides for the switching (nonsenderized) of calls which either originate within the ESSX-1 system and terminate in distant systems over certain miscellaneous lines, and/or switch tandem through the ESSX-1 between certain miscellaneous lines where the digits dialed by the calling party are transmitted to the distant system directly as they are dialed by the calling party.

6. Miscellaneous Line Terminations (Cont'd)

a. (Cont'd)

(4) Advanced Private Line Termination (APLT)

The APLT unit is used to terminate tie lines, private line facilities and access lines from switched private line services, such as Enhanced Private Switched Communications Service (EPSCS), and access lines furnished by Other Common Carriers to the ESSX-1 dial switching equipment.

The following service features will be obtained when a facility is terminated on an APLT unit only if these features are subscribed to by the customer as part of the ESSX-1 service and/or the facility involved.

Cut-through operation

Variable digit outpulsing

Use of switched private line authorization codes

Call tandem via the ESSX-1 switcher

Call Transfer - Individual

Call Transfer - Individual - All Calls

Attendant call transfer¹

Attendant completion

Automatic Calling Station Identity on access lines to Enhanced Private Line Switched Communications Systems.

A112.8.2 ESSX-1 Payment Schedules

A. ESSX Term Payment Plan (ETPP)

1. The following services will be furnished under the ESSX Term Payment Plan (ETPP).

- a. ESSX-1 Group "A" and "B" main station lines
- b. ESSX-1 Group "B" main station line Distance Charges
- c. Extension Station Lines
- d. Primary Feature Packages

2. ESSX-1 service will be furnished under the ESSX Term Payment Plan (ETPP) as specified in this *Guidebook*. The ETPP rates are payable over a period selected by the customer from those available. All *terms and* conditions pertaining to the ETPP are included in Section A122., except as specified in 2. following.

(T)

Note 1: On calls incoming to station only.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.8 ESSX-1 Service (Cont'd)

A112.8.2 ESSX-1 Payment Schedules (Cont'd)

A. ESSX Term Payment Plan (ETPP) (Cont'd)

3. Options and Conditions under ETPP

a. Additions

- (1) Equipment can be added to an existing system at the customer's option, and the payment of rates and charges in the currently effective *guidebooks* for such service will be applied. (T)
- (2) At the customer's option, additions may be paid for over the remainder of the existing system's payment period, and be added onto the existing agreement, providing at least 30 days remain in the customer's existing payment period. The addition and installed system payment periods will then have a common expiration date. The charge(s) for the addition(s) will be the current filed rate(s) for the equipment for the same payment period as the installed system's existing payment period. If the installed system's payment period is not in the current *guidebook*, the rate charged for the addition will be that of the next shorter filed payment period. If less than 30 days remain in the current payment period, additions may only be placed on the one-month payment period at the current rates in effect for the one-month period. (T)
- (3) If the coterminus option for additions (described in (2) preceding) is not elected by the customer, additions may only then be placed on the one-month payment period at the current rates in effect for the one-month period.

b. Disconnects

- (1) When equipment and/or facilities i.e., station lines, etc., are disconnected from a system for which the current payment period is longer than one month, the expiration date of the remaining equipment and service will not be affected.
- (2) Equipment and/or facilities disconnected from a system prior to the expiration date of the payment period for such equipment, will require termination charges for premature disconnection if applicable.

c. Termination Liability

The Termination Liability applicable to ESSX-1 service is dependent upon the payment period selected by the customer. Termination for the optional payment periods is as follows:

(1) 1-Month Term Option

Main Station Lines, Extension Station Lines, Distance Charges and Primary Feature Packages - No Termination Liability

(2) 36-Month Term Option

Main Station Lines and Distance Charges - 90% of the remaining amount due for each main station line disconnected when the customer's total main station line count falls below 80% of the total main station lines initially installed or of the annually adjusted total.

Extension Station Lines and Primary Feature Packages - No Termination Liability

B. Conventional Payment Plan

1. All other ESSX-1 services/features offered in Section A112. will be furnished under the Conventional Payment Plan. (T)
2. The Initial Service Period for all conventional rated ESSX-1 services/features is one month.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.8 ESSX-1 Service (Cont'd)

A112.8.3 ESSX-1 Minimum Monthly Charges

- A. A minimum charge for 10 main station lines, equivalent main station lines, or Telephone Numbers Reserved for Future Use applies for each ESSX-1 system. Main station lines of the ESSX-1 system may be provided at different locations. Such main station lines, however, must be routed to the ESS central office from which the switching capability for the ESSX-1 system is provided.

A112.8.4 (DELETED)

(D)

A112.8.5 Distance and/or Mileage Charges

- A. Distance Charges applicable to ESSX-1 main station lines or Zone Charges applicable to PBX trunk lines do not apply to ESSX-1 Network Access Registers.
- B. Group "A" Station Lines only
 - 1. "On-premises" extension line mileage charges as outlined in Section A13.1, "Extension Line Mileage", apply to each station line at the principal or secondary location not located in the same building as the central measuring point which, at both the principal and secondary locations, shall be the principal cable distribution point.
 - 2. "Off-premises" extension line mileage charges do not apply to stations at secondary locations, however, where service involves locations in more than one central office area of an exchange "Foreign Central Office" mileage applies to each circuit required, measured between the central offices involved. Off-premises extension station lines may be provided where facilities permit at Group "B" ESSX-1 main station line rates.
 - 3. Zone Charges as for individual line service apply for each circuit required to provide service outside the base rate area of the exchange for the principal location. For secondary locations, outside the base rate area, zone charges as for individual line service apply for each circuit required.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.8 ESSX-1 Service (Cont'd)

A112.8.5 Distance and/or Mileage Charges (Cont'd)

C. Group "B" Station Lines only

"On-premises" extension line mileage and local channel charges as outlined in Section A13.1, "Extension Line Mileage", apply to each extension station line not located in the same building as the ESSX-1 main station line.

"Off-premises" extension station lines may be provided, where facilities permit, at Group "B" main station line rates.

Distance Charges for each Console Access Loop, ESSX-1 main station line and Off-premises extension station line will apply for each circuit required to provide service located in excess of one mile (airline distance) from the central office.

The Basic ESSX-1 Service Area is located within the local exchange Base Rate Area (BRA) and comprises the geographical area situated within a one-mile radius of the serving ESS central office location and within the fundamental serving area of the ESS central office. Mileage for each circuit and/or subscriber loop is measured (airline distance) between the station line location on the customer's premises and the normal serving central office.

1. Within the same exchange

a. Within the same ESS central office fundamental serving area

Basic main station line charge for ESSX-1 service includes locations within a distance of one airline mile of the serving ESS central office.

A monthly Distance Charge in addition to the basic main station line charge applies to each circuit and/or ESSX-1 loop termination located outside the Basic ESSX-1 Serving Area.

(1) First one-mile band within serving ESS central office, per ESSX-1 main station line - No additional rate.

(2) Next two-mile band, per ESSX-1 main station line

ESSX Term Option			
36 Month			
	Monthly Rate	Monthly Rate	USOC
(a) First 1/2 mile or fraction thereof	\$4.25	\$4.75	1LVF+
(b) Each additional 1/2 mile or fraction thereof	6.65	7.55	1LVG+

(3) Beyond three-mile band, per ESSX-1 main station line

(a) Each additional 1/2 mile or fraction thereof	4.60	5.15	1LVH+
--	------	------	-------

(4) Hartsfield International Airport (Atlanta)

In lieu of the distance and mileage charge specified in (1), (2), and (3) preceding the rates shown following shall apply to each ESSX-1 main station line located within the confines of the Hartsfield International Airport premises.

(a) Per main station line	8.20	9.30	1LV3J
---------------------------	------	------	-------

b. In a different central office serving area of multioffice exchange

(1) The rate of ESSX-1 service in a foreign central office area is the monthly rate for the ESSX-1 service desired, plus a foreign central office mileage charge and a distance charge.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.8 ESSX-1 Service (Cont'd)

A112.8.5 Distance and/or Mileage Charges (Cont'd)

- C. Group "B" Station Lines only (Cont'd)
 - 1. Within the same exchange (Cont'd)
 - b. In a different central office serving area of multioffice exchange (Cont'd)
 - (2) When ESSX-1 main station lines are connected by facilities which are routed between two or more central offices in the same exchange the foreign central office mileage charge is computed separately on an airline basis between the ESS central office from which the ESSX-1 system is served and the central office from which exchange service normally would be rendered.
 - (3) Between ESSX-1 central office and the central office from which the subscriber location would normally be served, for each interoffice channel charges apply as specified in Section A9. for Foreign Central Office service. (T)
 - (4) Between subscriber's location and the central office which normally would provide telephone service at the location, no additional rate applies for the first one mile. For each one-half mile or fraction in excess of the first one mile, charges apply as shown in A112.8.5.C.1.a.
 - c. The rates specified above are based upon the utilization of two-wire, voice grade exchange facilities. When the Company incurs additional expenses in order to provide adequate transmission due to the remote location of the customer or due to the requirement for specially constructed facilities or high cost facilities, charges based on costs may apply.
 - 2. In a Different Exchange
 - a. The rate of ESSX-1 service in a foreign exchange service area is the monthly rate for the ESSX-1 service desired, plus a foreign exchange mileage charge as specified in Section A9.. (T)

A112.8.6 Classification of Basic ESSX-1 Service

- A. ESSX-1 Intercommunication
 - 1. Main Station Line - Intercommunication between all main station lines of the same ESSX-1 system. Main station lines may be arranged to originate or receive local and long distance calls directly, or through the attendant when console operation is provided.
 - 2. Extension Station Line - An additional station line on an ESSX-1 main station line.
 - 3. Console Access Loop - A main station line equivalent to an ESSX-1 Main Station Line that terminates in Attendant Console(s) or telephone set(s) used as consoles.
- B. ESSX-1 Exchange Access

Exchange access is provided each ESSX-1 system by means of Network Access Registers, utilizing software and simulated facilities of the ESS central office from which the ESSX-1 system is served. Network Access Registers simulate physical hardware facilities and may be arranged individually or in groups with the same options available to PBX trunks.
- C. Dormitory Stations

(Refer to Dormitory Communications Service as offered in Section A13.). (T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.8 ESSX-1 Service (Cont'd)

A112.8.7 Rates

A. General

The rate elements for ESSX-1 service are exchange access, intercommunication and main station line, extension station line and station set.

1. ESSX-1 Stations

- a. The rates and charges specified herein for ESSX-1 main stations provide for an ESSX-1 main station line component. The ESSX-1 main station line consists of all facilities, including intercommunication and outside plant facilities from the ESSX-1 system dial switching equipment to the Network Interface of the main ESSX-1 station location.
- b. The rates and charges specified herein for ESSX-1 extension stations provide for an ESSX-1 extension line component. The ESSX-1 extension station line consists of usage of traffic sensitive central office equipment.
- c. The rates and charges specified herein for ESSX-1 main station lines and extension station lines are applicable to each ESSX-1 main station location and an ESSX-1 extension station location, respectively, to which a customer-provided instrument can be connected.
- d. Time and Material Charges apply to all customer-requested maintenance of premises wiring performed by the Company on the customer's premises.
- e. End User charges as specified in the End User Access Service Section of the Intrastate and Interstate Access Service Tariffs apply as appropriate.
- f. Monthly net billing for interstate end user access charges will be equal to the interstate business end user access charge times the number of Network Access Registers provided each subscriber.
- g. Presubscription of a Carrier of Preference is required as specified in Section E13 of the Intrastate Access Service Tariff and Section 13 of the Interstate Access Service Tariff.

2. ESSX-1 Exchange Access

- a. ESSX-1 Exchange Access is provided by means of Network Access Registers which are furnished at the rates, *terms and conditions* specified in Section A3. for PBX trunks. (T)

B. Nonrecurring

- 1. The following nonrecurring charges for ESSX-1 service are in addition the any applicable regular service and installation charges provided for in other sections of this *Guidebook*. (T)

a. Service Establishment Charge

- (1) Initial Service Establishment Charge

- (a) Each system

Nonrecurring

(c)	Located on different premises from main station line on same continuous property ² , each	3.35	3.35	EX5

5. Main Station Lines Terminated as Trunks

a. Where a ESSX-1 main station line terminates as a trunk in a PBX system, order turret, automatic call distributor or similar concentrating device, rates and charges apply as set forth below:

- (1) ESSX-1 Group "B" month-to-month main station line rates, distance charges and optional feature charges apply as appropriate.
- (2) All PBX equipment associated with "PBX behind ESSX-1 service " will be rated at rates and charges as set forth in Section A3. (T)

6. ESSX-1 Telephone Numbers Reserved for Future Use

a. General

- (1) ESSX-1 Telephone Numbers and Facilities Reserved for Future Use service include the common equipment, including preassigned telephone numbers, and facilities necessary to expand the customer's ESSX-1 system in size to meet his specified growth requirements at specific locations. Such common equipment, including telephone numbers, and facilities will be removed from the reserved status and assigned as active ESSX-1 main station lines upon request from the customer.
- (2) The service is provided on the condition that the customer subscribes to sufficient reserved numbers to adequately handle his foreseen growth and main station line requirements. In the event the customer elects not to be provided with ESSX-1 Telephone Numbers Reserved for Future Use, timely main station line additions cannot be assured and facilities necessary for his growth requirements will be provided only within normal engineering and construction intervals.

Note 1: ESSX-1 Group "B" main station line charges apply.

Note 2: Apply rates and charges specified in this *Guidebook* for extension line mileage. (T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.8 ESSX-1 Service (Cont'd)

A112.8.7 Rates (Cont'd)

C. Recurring (Cont'd)

6. ESSX-1 Telephone Numbers Reserved for Future Use (Cont'd)

a. General (Cont'd)

- (3) The assignment of telephone numbers and the sequence of numbers assigned to an ESSX-1 System is made at the discretion of the Company. Where telephone numbers or blocks of numbers are held in reserve for future use and/or where ESSX-1 main station lines (telephone numbers) are disconnected and the numbers are held in reserve for future assignment within the same System, all such unassigned telephone numbers are subject to rates and charges specified following for telephone numbers reserved for future use.
- (4) The service is furnished subject to the availability of facilities and telephone numbers.
- (5) Calls to reserved (unassigned) telephone numbers will be routed to intercept over ESSX-1 common recorded announcement facilities.
- (6) Telephone numbers furnished herein retain their reserve status until assigned to a main station line at which time the service assumes rates and charges applicable to an ESSX-1 main station line.
- (7) Monthly credit is allowed for the accrued period of time ESSX-1 Telephone Numbers Reserved for Future Use is billed toward satisfying the specified Minimum Service Period requirements for ESSX-1 main station lines, provided continuous monthly billing for the telephone numbers, either assigned or unassigned, is maintained.
- (8) Rates as specified below apply to each reserved telephone number regardless of the size of block or quantity of numbers held in reserve.

A112.8.8 Auxiliary Services

A. Attendant Service

Central Office Attendant console operation is offered as an auxiliary service with ESSX-1 service.

The Call Transfer-Attendant feature is furnished with non-Data Link or Data Link Console operation.

As an alternative, the subscriber may designate a selected station or stations to perform attendant functions. Incoming calls to the listed directory number are connected to the selected station and then completed to the desired party by operation of the Call Transfer feature as offered in the ESSX-1 Primary Feature Package in A112.8.8.C.1.b.(1) following.

Note 1: Apply 60 percent of the month-to-month rate applicable for an ESSX-1 Group "B" Main Station Line (USOC: EXM), as specified preceding for a main station line.

1. Central Office Rates and Charges For Non-Data Link Console Operations

a. General

- (1) Consoles may be provided only where the central office serving the ESSX-1 system has been arranged for use with such consoles.
- (2) (DELETED)
- (3) Each Attendant Access Line terminating on the console requires an Attendant Access Circuit (USOC EAS).
- (4) Attendant Access lines are required between the No. 1 ESS serving the ESSX-1 system and the console location. These facilities are used to complete incoming calls for the listed directory number and may be arranged for completing Dial "O" traffic. In addition, Attendant Access Lines have the same capabilities as ESSX-1 station lines. Attendant Access Lines terminate directly on apparatus of a specific console. Multiple appearances of an Attendant Access Line are not provided.
- (5) The ESSX-1 Primary Feature Package, at rates as specified in Section A112.8.8.C.1.b.(1), is required with each ESSX-1 circuit designated as an Attendant Access Line. (T)
- (6) Night Service is provided by use of the Directed Call Pickup optional feature of the ESSX-1 system on the listed directory number.
- (7) Control channels are required for various console optional features as indicated and are provided at the appropriate rates and charges as specified.

a. Rates

(1) Central Office Common Equipment for Consoles

	Installation Charge	Monthly Rate	USOC
(a) Attendant access circuit (one required per Attendant Access Line), each	\$-	\$4.50	EAS
(2) Attendant Access Line			
(a) Each ¹	-	-	EAR
(3) Common Equipment for Optional Features			
(a) Position busy ² (position busy may not be provided for a one position arrangement), per console.	-	4.25	CXJ

Note 1: ESSX-1 Group "B" month-to-month main station line charges apply. Long Distance charges will also apply where appropriate. In addition, see A112.8.8.C.1 for charges applicable for associated ESSX-1 Primary Feature Package and optional features.

Note 2: See *the Private Line Guidebook* for charges applicable for associated Supervisory Control Channel. (T)

b. Non-Data Link Customer Premises Equipment, Consoles, etc.

Rates and charges as specified in Section A114.3 apply as appropriate. (T)

3. Central Office Components Rates and Charges for Universal -Data Link Console Operations .

a. General

(1) Data Link Console operation utilizes universal cordless telephone consoles and is provided only where the central office serving the ESSX-1 system has been arranged for use with such console operation.

(2) Console Access Loops are required for each ESSX-1 system equipped for data link console operation. These facilities are used to complete incoming calls for the listed directory number and may be arranged for completing Dial "0" traffic. In addition, Console Access Loops have the same capabilities as ESSX-1 station lines. Console Access Loops terminate on the Data link common equipment.

(3) The ESSX-1 Primary Feature Package at rates as specified in Section A112.8.8.C.1. b.(1) is required with each ESSX-1 circuit designated as a Console Access Loop. (T)

(4) (DELETED)

(5) The Night Service feature is provided by means of a Night Key on the console.

(6) The console can be made to appear busy on incoming calls by the operation of the busy key on the console or by the removal of the attendant headset.

(7) Busy Verification is a console attendant position optional service arrangement which permits the ESSX-1 system attendant to verify the status of main station lines and CCSA, SCAN, EPSCS, ETS and tie line terminations associated with that system.

Note 1: See *the* Private Line *Guidebook* for charges applicable for associated Supervisory Control Channel. (T)

Note 2: As specified in A112.8.8.B. (T)

c. Customer Premises Equipment, Consoles, etc.

(1) Rates and charges as specified in Section A14. or A114. apply as appropriate. (T)

4. Use of NonKey Telephone Set or Key Telephone System in lieu of Control Operation

a. General

(1) NonKey Telephone Sets or Key Telephone Systems may be used for attendant operations. Each access line terminated for attendant use must be provided with the ESSX-1 Primary Feature Package at rates as specified in Section A112.8.8.C.1.b.(1). (T)

(2) Each ESSX-1 circuit, designated as an Attendant Access Loop, terminating in a Key Telephone System requires a Line Termination in the Key System.

(3) Attendant Access Loops are required between the No. 1 ESS serving the ESSX-1 system and the answering location. These facilities are used to complete incoming calls for the listed directory number and may be arranged for completing Dial "O" traffic. In addition, Attendant Access Loops have the same capabilities as ESSX-1 station lines. Access Loops terminate in the Key System and multiple appearances of an Access Loop may be provided within the limits of the associated Key Telephone System.

(4) Recorded intercept is provided utilizing common announcement facilities located within the Central Office.

b. Rates

(1) Key Telephone System Access Loop

	Feature Establishment Charge	Monthly Rate	USOC EAL
(a) Each ¹	\$-	\$-	

B. Auxiliary Attendant Features

1. Attendant Control of Facilities²

(a) Non-Data Link Consoles, per group of lines to which access is denied	235.00	6.70	CFC
(b) Data Link Consoles, per group of lines to which access is denied	235.00	6.70	CFU

Note 1: The monthly rate is the same as the ESSX-1 Group "B" month-to-month main station line charge.

Note 2: In addition, apply same rates and charges as specified for a Series 1000 Local Channel between the serving central office and the customer premises and for the Key Telephone Service transfer key associated with that channel.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

(a) Each	250.00	42.00	EWA
(2) Per Additional line equipped			
(a) Each ⁶	160.00	42.00	EWB
b. Access to Dial Code Sending Equipment			
(1) Code Calling			
(a) Per customer premises location	200.00	129.00	PLC
c. Access to Loudspeaker Paging Equipment			
(1) Loudspeaker paging origination, for dial access to paging equipment, per line equipped with access code			
(a) Each	233.00	62.00	EWJ
(2) Additional for zone paging option			
(a) Per zone	-	2.40	EWG
(3) Loudspeaker paging answer, per line equipped with access code			
(a) Each ⁶	145.00	9.00	EWK

Note 1: Applicable to each main station line of the System or Common Block.

Note 2: ESSX-1 main station line charges also apply to each access line or access code arranged (originate or answer) for connection to customer oriented facilities.

Note 3: All rates and charges for the above features are in addition to existing rates and charges for ESSX-1 and other services with which they are associated.

Note 4: See Private Line *Guidebook* for rates and charges applicable for control channels when required for supervisory purposes with equipment and/or apparatus located on customer premises. (T)

Note 5: The above items are required whether access lines and access codes are connected to terminal equipment provided by the customer or by the Company.

Note 6: Feature Establishment Charge applicable only when provided subsequent to the provision of the initial arrangement.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.8 ESSX-1 Service (Cont'd)

A112.8.8 Auxiliary Services (Cont'd)

B. Auxiliary Attendant Features (Cont'd)

9. Centralized Attendant Service

a. General

(1) Description

Centralized Attendant Service (CAS) allows a customer with a number of locations that are served by either a PBX or ESSX-1 system to concentrate all attendants at a single centralized location (MAIN). Incoming calls over a local exchange trunk to an unattended location (BRANCH) are routed to the main location, via a Release Link Trunk (RLT), where a CAS attendant completes the call by dialing the called party's extension number over the same Release Link Trunk facilities. (C)

b. Types of Equipment with which CAS is Associated

The main location must be an ESSX-1 system that is equipped for this service, and utilizes Data Link Console operation.

The branch locations must be one of the following:

(1) An ESSX-1 system

(2) (DELETED) (D)

(3) A location that has switching equipment that is customer-provided or is in an area that is served by another telephone company can be interconnected as a branch location only if the switching equipment is compatible with the Company's.

c. Basic Service Features

(1) Incoming Call Identification Lamp (ICL) - a visual indication will be given for the source of all calls directed to the attendant.

(2) Remote Hold - enables the attendant to hold a call without holding an RLT. The call is temporarily placed on hold at the originating PBX and automatically routed to an attendant after approximately 30 seconds.

(3) Customer Testing of Release Link Trunks - permits each RLT to a PBX branch to be dial accessed by the centralized attendant to insure it is in service and that the transmission performance is adequate.

(4) Attendant Call Distribution - queues and distributes calls to the CAS attendants. This provides administrative control over the team of attendants and enables the calls from the branch locations to be handled in their approximate order of arrival, as attendant positions become available.

(5) Attendant Recall on "Station Don't Answer" - all PBX type branch locations provide a timed reminder, generally after 30 seconds, to automatically recall the attendant if a called main station line does not answer.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.8.8 Auxiliary Services (Cont'd)

B. Auxiliary Attendant Features (Cont'd)

9. Centralized Attendant Service (Cont'd)

d. Rates and Charges

(1) Release Link Trunk Terminal Equipment, Main Location

	Feature Establishment Charge	Monthly Rate	USOC
(a) Per ESSX-1 system	\$185.00	\$-	NA
(b) Per release link trunk group ¹	50.00	-	NA
(c) Release link trunk, each termination	20.00	140.00	EC6
(2) Release Link Trunk Terminal Equipment, Branch Location			
(a) Per ESSX-1 system	365.00	-	NA
(b) Per release link trunk group ¹	50.00	-	NA
(c) Release link trunk, first two terminations	40.00	38.00	EC4
(d) Release link trunk, additional terminations after the first two, each	20.00	19.00	EC5

Each of the above rate elements provide only the basic release link trunk termination equipment facilities located at the central office where the basic ESSX-1 service is provided and is in addition to other rates and charges applicable for the associated ESSX-1 service and Private Line Service and Channels.

Each Release Link Trunk termination requires 2 channels between the Main and Branch locations.

Release Link Trunk Termination Equipment charges are in lieu of Tie Line and Miscellaneous Line Termination charges.

(3) CAS Attendant

Console Equipment as specified in Section A112.8.8.A. for Data Link Console(s).

(T)

(4) Uniform Numbering

(a) Per ESSX-1 location	16.00	-	NA
(b) Each 100 numbers or fraction thereof	11.00	-	NA

10. Dial Thru Attendant, per ESSX-1 System

(a) Data link console operation	65.00	8.60	EWM
(b) Non-Data Link Console or key telephone system operation arranged for attendant use	65.00	7.60	EWP

Note 1: One Feature Establishment Charge applies when any number of release link trunk groups of the same type are installed at the same time at the same location.

A112.8 ESSX-1 Service (Cont'd)

A112.8.8 Auxiliary Services (Cont'd)

C. Optional Features

1. ESSX-1 Primary Feature Packages¹

a. General

- (1) The ESSX-1 Primary Feature Package as specified in A112.8.8.C.1.b.(1) is required with each listed Directory Number and/or each ESSX-1 circuits or Line Equipment Number designated as a Console Access Loop or terminated in telephone sets used as attendant consoles.
- (2) ESSX-1 Primary Feature Packages are optional on an individual main station line basis.
- (3) The ESSX-1 Primary Feature Packages comprise the necessary equipment and facilities to provide the following service features in addition to those listed in A112.8.1.A. basic to ESSX-1 service.
- (4) Added Call Transfer Option is available only to ESSX-1 Systems or Split Service groups of a ESSX-1 System arrangement for call transfer-ALL CALLS.

b. Rates

- (1) Per Number Listed in the Directory and/or all main station lines terminating in attendant consoles, or in telephone sets used as consoles and those lines that hunt with the above, each.

		ESSX Term Option				
		Feature Establishment Charge	36 Month Monthly Rate	Monthly Rate	USOC	
(a)	Three-way calling, consultation hold and call transfer-INDIVIDUAL ²	\$2.85	\$1.75	\$2.25	EE8	(1)
(b)	Three-way calling, consultation hold and call transfer-ALL CALLS ²	2.85	2.50	3.00	EE9	(1)
(2)	Per ESSX-1 Main Station line, so equipped					
(a)	Three-way calling, consultation hold and call transfer-INDIVIDUAL ²	2.85	1.75	2.25	E8A	(1)
(b)	Three-way calling, consultation hold and call transfer-ALL CALLS ²	2.85	2.50	3.00	E9A	(1)

Note 1: The 36 month monthly rate for a primary feature package may be offered only to station lines under the 36 month contractual rate.

Note 2: An ESSX-1 System may be provided with only one type of Call Transfer capability without using the Split Service feature. If more than one type of Call Transfer is provided within the same ESSX-1 System, the Split Service feature as specified under Secondary Optional Features following is required.

1. ESSX-1 Primary Feature Packages¹ (Cont'd)

b. Rates (Cont'd)

(3) Added Call Transfer -ALL CALLS Option

	ESSX Term Option			
	Feature	36 Month	Monthly	Monthly
	Establishment	Rate	Rate	USOC
	Charge	Rate	Rate	CTP
(a) Change in call transfer capabilities, per rearrangement, per system	\$164.00	\$-	\$-	
(4) Call forwarding variable, call forwarding busy line, call forwarding don't answer, call hold, call pickup and speed -calling-6 customer changeable list				
(a) Per preset pickup group	10.75	1.90	1.90	E3N
(b) Per main station line so equipped ²	13.20	3.85	4.45	EBL

2. Secondary Optional Features

a. General

(1) ESS Optional Feature Service is furnished from No. 1. Electronic Switching System (ESS) central office equipment located on Company premises and may be provided, subject to the availability of facilities, to Centrex Type Services which are served by the same such equipment.

(2) A **Secondary Service Charge** as specified in Section A4. will apply for features added or changed subsequent to the initial installation of a station line. (T)

b. Rates

(1) Automatic Callback

	Feature			
	Establishment	Monthly		
	Charge	Rate		USOC
(a) Common equipment, per system	\$690.00	\$34.00		ACY
(b) Per main station line equipped	2.30	.90		SAK

Note 1: The 36 month monthly rate for a primary feature package may be offered only to station lines under the 36 month contractual rate.

Note 2: All features in this package must be installed.

A112.8.8 Auxiliary Services (Cont'd)

- C. Optional Features (Cont'd)
 - 2. Secondary Optional Features (Cont'd)
 - b. Rates (Cont'd)
 - (2) Call Forwarding

	Feature Establishment Charge	Monthly Rate	USOC	
(a) Variable, per main station line ¹	\$1.85	\$1.70	EAT	(1)
(b) Don't answer, per main station line ²	1.85	1.00	E9G	
(c) Busy line, per main station line	-	1.00	E6G75	
(3) Call Forwarding Over Private Facilities ³				
(a) Common equipment, per system	100.00	97.00	EAY	
(b) Per main station line equipped ¹	2.30	5.25	EAP	
(4) Distinctive Ringing and Call Waiting Tone ⁴				
(a) Common equipment for either or both Class B and C ringing/tone, per system	185.00	31.00	DRR	
(b) Class B ringing/tone, per main station line equipped	1.50	1.50	BRT	
(c) Class C tone per main station line equipped with Call Waiting-Originating or Dial Call Waiting	1.50	.85	ODT	

Note 1: Where facilities permit, includes reminder ring which provides for a distinctive ringing signal to be furnished to a Call Forwarding. Variable or Call Forwarding Over Private Facilities equipped main station line at the time a call is forwarded.

Note 2: At the time a main station line is initially equipped for Call Forwarding - Don't Answer, it will be arranged for a predetermined number of ringing cycles to be completed prior to the incoming call being forwarded.

Note 3: In the initial implementation, CFPF cannot be activated to ETS or EPSCS facilities. Subsequent development in the 1E7 generic will provide these capabilities. Also CFPF cannot be provided to any customer for use with any facility, ARS Pattern or switched service network involving Foreign Exchange Services. Subsequent development will remove this administrative control.

Note 4: Prior to 1E6 generic, only standard ringing and standard call waiting tones are available to users. With this optional feature development in 1E6, two classes of distinctive ringing in addition to standard ringing will be available to users to identify the source of incoming calls to the main station line. The development also includes distinctive tones to be associated with Call Waiting features. Three classes of ringing and tones will be available to the ESSX-1 user.

3. Optional Dial Cut-through Arrangement (Tandem)			
(a) Additive for each Tie Line Termination (USOC ESJ), per tie line so arranged	65.00	10.40	ETM
4. Advanced Private Line Terminations (APLT) ⁴			

	Service Establishment Charge	Installation Charge	Monthly Rate	USOC
(a) Each termination ⁵	\$153.00	\$105.00	\$116.00	PLS
5. SCAN Terminations (AUTOVON Interface)				

(Apply rates and charges as specified for Switched Circuit Automatic Network (SCAN) Access Line Terminations in Section A112.8.8.H.) (T)

Note 1: Each of the rate elements shown provide only the basic auxiliary line termination equipment and facilities located at the central office where the basic ESSX-1 service is provided and is in addition to other rates and charges applicable for the associated ESSX-1 services, Private Line Service and Channels, WATS, FX, etc.

Note 2: One Feature Establishment Charge applies when any number of miscellaneous lines of the same type are installed at the same time.

Note 3: An ETS-type tie line termination is provided in association with the ETS features of Automatic Route Selection-Deluxe and/or Uniform Numbering/Automatic Alternate Routing specified in Section A12.5. (T)

Note 4: The Advanced Private Line Termination (APLT) unit may be provided only when the equipment and features of the associated No. 1 ESS Equipment will permit its use (requires 1E6 or later generic program).

Note 5: The Service Establishment Charge is applicable only to the initial APLT provided for each ESSX-1 System.

A112.8 ESSX-1 Service (Cont'd)

A112.8.8 Auxiliary Services (Cont'd)

E. Automated Attendant Services

1. Automatic Route Selection - Basic (ARS-B)

a. General

(1) Automatic Route Selection - Basic (ARS-B) is a ESSX-1 optional feature, available where facilities permit, that allows main station line users, by dialing a preselected code, to automatically select the preferred route subscribed for by a customer, for network calls. Alternate routing to other facilities, subscribed for by the customer, is also provided. This arrangement, is available for use with Foreign Exchange, WATS, CCSA off-net, tie lines¹ and Other Common Carrier (OCC) access lines² which are compatible with ARS and the MTS Network facilities.

(2) Automatic Route Selection-Basic is accessed by dialing a single code (1,2 or 3 digits) which automatically selects the appropriate route (FX, WATS, CCSA off-net, tie line, OCC access line or the MTS Network) to complete the call. If all facilities in the initial route selected are busy, the call will advance to other routes in the selected pattern. Patterns may consist of up to four (4) private routes. If no route is available, the call will route to the MTS Network or overflow tone (customer option). All patterns accessed by a single access code will have the same final route, either the MTS Network or overflow tone.

(3) For calls using FX, WATS, CCSA off-net or OCC access line facilities, the routing may be based on a Number Plan Area (NPA) and limited to specified Central Office Codes within the NPA as designated by the customer. This is referred to as Foreign Area Discrete Translation.

(4) Automatic Route Selection - Basic is a call routing capability and, therefore, all codes must be in a route for selection. Code blocking is not provided by this feature.

b. Definitions

(1) Facility - A facility denotes a specific FX, CCSA, WATS circuit, tie line, or OCC access line circuit.

(2) Route - A route is a group of one or more facilities of the same type used to complete 7 or 10 digit calls between the same points.

(3) Route Selection - The automatic selection of the preferred route as predetermined by the customer, upon dialing of an access code by the station user.

(4) Pattern - A group of routes arranged to be selected in a sequence specified by the customer.

(5) Area Code - An Area Code is a three numeral code to designate the geographical numbering plan area used in network dialing.

Note 1: Requires senderized operation and uniform numbering compatible with the MTS network.

Note 2: Each of the rate elements shown provide only the basic auxiliary line termination equipment and facilities located at the central office where the basic ESSX-1 service is provided and is in addition to other rates and charges applicable for the associated ESSX-1 services, Private Line Service and Channels, WATS, FX, etc.

E. Automated Attendant Services (Cont'd)

1. Automatic Route Selection - Basic (ARS-B) (Cont'd)

b. Definitions (Cont'd)

- (6) Foreign Area Discrete Translation - Foreign Area Discrete Translation is the screening of a specific group of digits by the ESS switcher to determine proper call routing.

c. *Terms and Conditions*

- (1) Automatic Route Selection - Basic is provided only in association with ESSX-1 Service furnished from No. 1 Electronic Switching System (ESS) central office equipment located on Company premises and may be provided, subject to the availability of facilities, to ESSX-1 systems which are served by the same such equipment.
- (2) Preferred routes and alternate routing patterns will be specified by the customer.
- (3) All rates and charges specified for Automatic Route Selection - Basic are in addition to the rates and charges for associated facilities.
- (4) The number of patterns required by a customer are governed by the type and variety of facilities to which the customer subscribes.
- (5) A single rate per facility will apply regardless of the number of patterns having access to that facility. The monthly rate specified is applicable to each facility available to the patterns.
- (6) Patterns without final route to the DDD Network may be offered only if a customer subscribes to a sufficient number of facilities which, in the judgment of the Company, provide an adequate level of service so as to avoid interfering with the service of others or to prevent others from making or receiving calls over their telephone service.
- (7) Where a route is used in one pattern (pattern reached by one access code) only one translation may be provided per route. Where a route is used in two or more patterns (each pattern is accessed by different access codes) one translation per pattern may be provided subject to the appropriate charges as specified in E.1.d. following. Where central office code translation is required for more than one Numbering Plan Area (NPA) per single facility group or route, rates and charges as specified in E.d.(2)(d) and (e) following should be applied for each NPA translated.
- (8) A group of patterns may have either the DDD Network as a final route or overflow tone. A combination of both within the same pattern group is not permitted. Dial "9" may be used as an access code only if the patterns accessed have the DDD Network as a final route.
- (9) Where toll restricted main station lines have access to ARS patterns with final route to the DDD Network, apply charge and rate as specified for patterns with overflow to tone in lieu of the charge and rate specified for final route to the DDD Network.

2. Station Message Detail Recording

a. General

- (1) Station Message Detail Recording (SMDR) is an arrangement to provide a record, by main station line number, of originating intercity traffic routing over dial type tie lines, FX, WATS, CCSA, Other Common Carrier access line and/or the MTS Network (Toll) and at the customer's option, on certain incoming calls¹ that the attendant extends to a main station line or tie line within the customer's ESSX-1 group.
- (2) The station message detail will include the calling main station line number, the called number, date, time of day, duration of call and the type of facility used. The record will be provided, on magnetic tape, to customers requiring message detail for cost allocation and telecommunications system management purposes. The detail will be provided on all facilities in routes selected by the customer for Station Message Detail Recording.

b. Terms and Conditions

- (1) Station Message Detail Recording (SMDR) may be offered to main station lines of ESSX-1 customers where facilities permit and where the Company's message billing process has been arranged to provide this optional feature.
- (2) Station Message Detail Recording is not represented to be a provision of billing detail. Where Tie Line, Other Common Carrier access line, and Foreign Exchange facilities are involved, all such call attempts, whether completed or not, will appear in the SMDR.
- (3) Station Message Details will be provided on magnetic tape. The tape density and number of tracks will be that used by the program and data processing system in use by the Company's accounting center furnishing the tape. The format may be changed to serve Company purposes and the customer will be responsible for making the tape compatible with his data processing equipment.
- (4) A magnetic tape will be provided by the Company on each occasion Station Message Detail Recording is furnished to the customer. The tape becomes the property of the customer on a "no exchange" basis and the tape may not be returned to the Company for reuse.
- (5) Station Message Details may be provided on all facilities subscribed for by the customer, including the Network (Toll), but will not include intercom calls originated by main station line users. The customer may designate the group or groups of facilities on which SMDR is to be provided. Where the facility designated by the customer is the toll network, the magnetic tape file will include a record of each message itemized on the customer's bill. (C)
- (6) Directory Assistance (DA) call detail may be provided on the magnetic tape (customer option).

Note 1: SMDR detail on incoming calls does not include the calling number or the type of facility used.

F. Touch-Tone® Calling Service

1. Main station lines and attendant access lines may be equipped where facilities permit with Touch-Tone® operation at no additional charge.

G. Subsidiary System Arrangements

1. General

- a. Subsidiary System

A Subsidiary System of an ESSX-1 system is a customer-provided equipment system which is furnished PBX trunks from the central office serving the customer's ESSX-1 system and which is connected by tie lines to that ESSX-1 system.

A Subsidiary System Arrangement provides main station line numbers, which are in sequence with the main station line numbers of the customer's ESSX-1 system, to the main station lines of one or more subsidiary systems.

2. **Terms and Conditions**

- a. Subsidiary System Arrangement (SSA) main station line numbers are provided by the same central office equipment and facilities which furnish Direct-Inward-Dialing (DID) service and will only be furnished where adequate DID facilities are available in the central office serving the customer's ESSX-1 system and where the subsidiary system is properly equipped for DID Service.
 - b. The PBX trunks of the subsidiary system are provided at the same rates and charges as specified for such trunks furnished from the central office serving the customer's ESSX-1 system. In addition foreign central office or foreign exchange mileage charges are applicable to those trunks when the subsidiary system is located outside the area of that serving central office.
 - c. The same rates and charges as specified for DID Service apply for SSA main station line numbers. Where more than one subsidiary system is involved, each subsidiary system is considered a separate service and the count of main station line numbers furnished will commence anew at each such system for the purpose of determining the applicable rates and charges.
 - d. Tie lines connecting the ESSX-1 and subsidiary systems are provided at the same rates and charges as specified for ESSX-1 tie line terminals, tie lines, and tie line terminals in a customer-provided equipment system.

(T)

A112.8 ESSX-1 Service (Cont'd)

A112.8.8 Auxiliary Services (Cont'd)

G. Subsidiary System Arrangements (Cont'd)

2. *Terms and Conditions* (Cont'd)

- (T)
- e. SSA main station line numbers are furnished subject to the condition that all inward and outward local and toll network calling by subsidiary system main station lines be via the central office serving the customer's ESSX-1 system.
 - (1) Where subsidiary system main station line's outward local and toll network calls are placed via tie lines and the network access registers of the ESSX-1 system, the charges for such calls are identified and billed as primary directory listing calls of the ESSX-1 system.
 - (2) Where subsidiary system main station line's outward local and toll network calls are placed via PBX trunks, the charges for such calls are identified and billed as primary directory listing calls of the subsidiary system except as specified in f. following.
 - f. At the option of the customer, identification and billing of outgoing toll network calls by SSA main station line number will be provided at the same rates and charges as specified for Identified-Outward-Dialing (IOD) Service subject to the following conditions:
 - (1) The identification and billing of outgoing toll calls by SSA main station line number will only be provided on calls routed via PBX trunks.
 - (2) Where more than one subsidiary system is arranged for the identification and billing of outgoing toll calls by SSA main station line number, each system shall be considered a separate service and the count of connecting channels which serve as IOD trunks will commence anew at each system for the purpose of determining the applicable rates and charges.
 - g. The ESSX-1 subsidiary system arrangement is provided solely for the furnishing of SSA main station line numbers to subsidiary systems for local and toll network and intercommunication calling and does not provide any of the basic or optional service features of ESSX-1 Service to main station lines of the subsidiary systems.
3. Rates and Charges
- a. Each Subsidiary System Arrangement¹
 - (1) Direct-Inward-Dialing²
 - (2) Identified-Outward-Dialing³
 - (3) Exchange Access, per trunk⁴

Note 1: PBX Equipment associated with Subsidiary System Arrangements will be furnished at Rates and Charges as set forth in Section A11. (T)

Note 2: Apply Rates and Charges as specified in Section A12.7 for DID service. (T)

Note 3: Apply Rates and Charges as specified in Section A12.8 for IOD service. (T)

H. Switched Circuit Automatic Network Access Line Terminations

1. General

Switched Circuit Automatic Network (SCAN) access line terminations provide for the ESSX-1 system termination of access lines to SCAN switching centers furnished by F.C.C. Tariff No. 260.

2. *Terms and Conditions*

a. Explanation of Terms

(1) SCAN

SCAN is a private switched service which provides the Automatic Voice Network (AUTOVON) to various authorized agencies of the federal government. Both routine and priority calls are handled by AUTOVON. Within that network are five levels (0 through 4) of precedence for AUTOVON calls. Level 4 is a routine call and levels 0 through 3 are priority call levels with 0 being the highest priority. This precedence scheme allows priority calls to preempt, when necessary, routine and lower level priority calls.

(2) Preemptible SCAN Access Line Terminal

A Preemptible SCAN Access Line Terminal is arranged for the completion of incoming and outgoing priority or routine calls.

(3) Non-Preemptible SCAN Access Line Terminal

A Non-Preemptible SCAN Access Line Terminal is arranged for the completion of incoming and outgoing routine calls.

(4) Main AUTOVON Location

A Main AUTOVON Location is a ESSX-1 system at which SCAN access lines terminate.

(5) Satellite AUTOVON Location

A Satellite AUTOVON Location may be an ESSX-1, ESSX-5, P.B.X., or customer-provided equipment system which is connected to the main AUTOVON location by tie lines or to which incoming priority calls may be routed via the main AUTOVON location over the local and toll network by the main-satellite AUTOVON compatibility PID option.

Note 1: PBX Equipment associated with Subsidiary System Arrangements will be furnished at Rates and Charges as set forth in Section A11. (T)

Note 2: Apply Rates and Charges as specified in other sections of this *Guidebook* for tie-line terminations, tie-line mileage, etc., as appropriate. (T)

Note 3: Apply Rates and Charges as specified in A112.8.8.D.1. or USOC: ETM. (T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.8 ESSX-1 Service (Cont'd)

A112.8.8 Auxiliary Services (Cont'd)

H. Switched Circuit Automatic Network Access Line Terminations (Cont'd)

2. *Terms and Conditions* (Cont'd)

a. Explanation of Terms (Cont'd)

(6) Main-Satellite AUTOVON Compatibility Options

Main-Satellite AUTOVON Compatibility Options may be furnished in association with preemptible SCAN access line terminals at the main AUTOVON location.

Immediate Diversion Network In-Dialing (INID) Option

--The INID option provides for the intercept and rerouting of incoming priority calls directed to AUTOVON satellite locations.

Precedence Network In-Dialing (PID) Option

--The PID option provides for the routing, via either tie lines or the local and toll network, of incoming priority calls directed to AUTOVON satellite locations.

- b. SCAN access line terminations provide for the direct inward and outward dialing of AUTOVON calls. Outgoing priority calls are completed only via preemptible SCAN access line terminals. Incoming priority call precedence is only furnished when that call is completed via a preemptible SCAN access line terminal. When an incoming priority call is completed via a non-preemptible SCAN access line terminal, the call is processed in the same manner as a routine call without any precedence recognition. Incoming and outgoing routine calls may be completed via either preemptible or non-preemptible SCAN access line terminals.
- c. The origination of priority calls requires 16-button Touch-Tone[®] dial telephone equipment associated with attendant positions and main station lines.
- d. Preemptible SCAN access line terminals are only furnished where the customer's system is equipped with Data Link Console attendant position equipment.
- e. Where the tie lines are furnished between a main AUTOVON location and a satellite AUTOVON location, those tie lines may be used to extend incoming priority and routine calls to the satellite location. Satellite AUTOVON location station line users may originate routine calls via such tie lines and the main AUTOVON location. Where a satellite AUTOVON location station line user desires to originate a priority call via such tie lines and the main AUTOVON location, the attendant at the main location may complete the desired priority call for the satellite location station line user.
- f. At the option of the customer, main-satellite AUTOVON compatibility may be furnished on either an INID or PID option basis, but a mix of the two on the same system is not permitted. Furthermore, where the PID option is furnished, the option must be arranged for routing via either tie lines or the local and toll networks, and a mix of the two routing methods on the same system is not permitted.
- g. When a main-satellite AUTOVON compatibility PID option routed call to a satellite AUTOVON location is not answered within approximately three ringing cycles, that call will be rerouted to the attendant position of the main AUTOVON location.

A112.11.1 Customer Management Features

Obsoleted 01-09-87, Type 3. Not offered for new installations on and after the specified obsolete date.

A. Customer Station Rearrangement

1. General

- a. The Customer Station Rearrangement (CSR) feature permits ESSX-1 and ESSX customers to activate/deactivate selected optional features, change certain service options, and change feature configurations on predesignated ESSX station lines.
- b. For CSR equipped station lines, CSR allows the customer to verify and/or display the assignment of features on a single station line, range of station lines or all station lines to determine which station or stations have a particular feature or service option.
- c. Certain ESSX station lines may be specified by the customer to be exempt from this feature. Additionally, the Company reserves the right to make station lines inaccessible to CSR.
- d. Changing the status of a station line from accessible to CSR to inaccessible or vice versa, must be done by the Company via a service request. Service Charges, as specified in Section A4. will apply.
- e. CSR transactions will not require a service order.
- f. The Company has made the following provisions to protect the integrity of the switching system database and to ensure the security of CSR changes.
 - (1) A CSR customer's change, display or verify capabilities are restricted to that particular ESSX system to which the customer subscribes.
 - (2) All changes are audited as they are entered by the CSR customer. Invalid changes will not be accepted. An error message detailing which command is in error will be given.
 - (3) Customer access to the database is password protected.

A112.11.1 Customer Management Features (Cont'd)

A. Customer Station Rearrangement (Cont'd)

1. General (Cont'd)

g. A CSR customer can schedule changes (individual or bulk) for completion by the next business day or for a future business day.

h. Definitions pertaining to CSR/ESSX features are specified in A112.26.3. (T)

i. The CSR feature allows the customer to perform the following transactions from the customer provided terminal:

(1) Change particular service options on a per station basis and exchange station telephone numbers (TNs). The change capabilities are:

Common Equipment Group Number (Common Block)

CAT Code

Ringing Cycles for CFDA

Call Pickup Group: The call pickup group to which a station is assigned can be changed on a per station basis. The Forward to Number can be changed for a station line with CFBL and/or CFDA assigned.

Speed Call Group: The Speed Call group to which a station is assigned can be changed on a per-station basis.

Series Completion "Hunt To" Telephone Number (TN): The "hunt to" TN assigned to a station line can be changed on a per-station basis¹

Station TN Rearrangement: Swap TNs from one location to another²

(2) Activate/deactivate the following features and service options on a single station line basis:

Automatic Callback Calling

Call Forwarding Busy Line

Call Forwarding Don't Answer

Call Forwarding Variable

Call Forwarding Unrestricted

Call Hold

Call Pickup

Call Waiting Originating

Call Waiting Terminating

Dial Call Waiting

Directed Call Pickup - Barge In

Directed Call Pickup - Non Barge In

Speed Calling - 6

Speed Calling - 30

Basic Station Line Hunting (Series Completion)

Note 1: All numbers in series completion hunt must be in the same common block.

Note 2: Rearranged station TNs carry all features and characteristics to their new location unless the Common Equipment Group (Common Block) is also changed.

1. General (Cont'd)

i. (Cont'd)

- (3) Display and/or print the status (active or inactive) of features and service options previously listed in a and b and other related information for either a single station line, range of station lines, or all station lines. The other related information provided includes:

Line Equipment Number (OE)
 Common Equipment Group Number (Common Block)
 Master Complex Number
 CAT Code Assignment
 Multiline Hunt Group (MLH) TN assigned to
 Terminal assignment in MLH
 Call Pickup Group - Station TN assigned to
 Speed Call - 30 Group - Station TN assigned to
 Forward to Station TN for CFBL and/or CFDA
 "Hunt to" Station TN
 Outward Trunk Queuing (OTQ) (active/inactive)
 TouchTone (equipped for/not equipped for)
 Group Start (equipped for/not equipped for)

- (4) A CSR customer may also display and/or print the following administrative reports:

Call Pickup Groups

- A list of all call pickup groups and the station TNs associated with each.
- A list of all station TNs associated with a particular multiline hunt group.

Multi-Line Hunt Groups

- A list of all multi-line hunt groups and the station TNs associated with each.
- A list of all station TNs associated with a particular multiline hunt group.

Speed Call Groups

- A list of all speed call groups and the station TNs associated with the control station identified for each group.
- A list of all station TNs with the control station identified for a particular speed call group.

Pending Changes

- A list of all CSR changes entered pending a future completion date.

Listing

- Listing of all CSR changeable station lines which includes the following information:

Station Telephone Number

Name¹

Department¹

Location¹

2. *Terms and Conditions*

- a. CSR is provided only with ESSX-1 and ESSX[®] systems served from a No. 1 or 1A ESS central office and is furnished subject to the availability of facilities. (T)
- b. ESSX-S, M or L customers equipped for CSR must order via a service order² CSR changeable features in groups of five (5) at the rates specified in A112.11.1.A.3.(b) following. ESSX-1 customers must order via a service order CSR changeable features at rates and charges specified in Section A112. (T)
- c. Non-CSR changeable features will be added subject to the specifications and rates in A112. as appropriate.
- d. Features for CSR exempt station lines must be requested via a Service Order² and added by the Company. Rates and Charges for the features specified in A112.26.8, A112.26.9 or A112.26.10 apply as appropriate.
- e. The customer provided CSR terminal equipment requires an exchange access line ESSX-1 or ESSX main station line. Rates and charges in Sections A3. or A112. apply as appropriate.
- f. CSR changes must be entered prior to a time to be designated by the Company to be completed by the next business day.
- g. A CSR customer cannot activate features in excess of the quantity that has been ordered from the Company. The customer will receive an indication on the terminal screen when 100% utilization of a feature is reached. To add additional quantities will require a service order.
- h. Contractual obligations and End User Common Line Charges will be billed to the location where originally installed and will not transfer with a station line number rearrangement.
- i. The following types of lines will be restricted from Station TN Rearrangement capability. Service option and features change capabilities are still available.
 - (1) Station lines equipped for dial pulse service
 - (2) Station lines assigned to Multi-Line Hunt Groups

Note 1: The CSR customer is responsible for entering and updating the information contained in this field.

Note 2: Appropriate Service Charges as specified in Section A4. will apply. (T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.11 ESSX Small, Medium and Large Service and ESSX-1 (Cont'd)

A112.11.1 Customer Management Features (Cont'd)

B. Advanced Communications Package

1. General

- a. Advanced Communications Package (ACP) features are provided only in association with ESSX Service furnished from No. 1/1A Electronic Switching System (ESS) central office equipment located on company premises and may be provided, subject to the availability of facilities, to ESSX systems which are served by the same such equipment.
- b. The ACP features are designed to meet the needs of those customers who have large numbers of WATS, FX and other services. The ACP features are designed to streamline communications and offer a customer increased control over those communications and offer a customer increased control over those communications. The ACP features will be used to monitor and control facilities in applications such as stand-alone ESSX configurations, Electronic Tandem Network Configurations with ESSX tandems etc.

2. Explanation of Terms

- a. ACP features are optional ESSX features which are specified following:

Advanced Station Message Detail Recording (ASMDR)
Customer Station Rearrangement (CSR)
Facilities Management System (FMS)

- b. ASMDR data include records for Electronic Tandem Switched (ETS) calls originating over FX, WATS, CCSA and the toll network. This feature also adds the capability of recording non-ETS call types (such as dial '9' or "IXX" calls) originated by stations, attendants and ESSX Tie Trunks.
- c. The CSR feature allows the ESSX customer to change and verify their own station assignments for specified stations without requiring a service order.
- d. The Facilities Management feature provides real time access to facilities data and allows customer control of ARS pattern groups, FRL's, Queues, and authorization codes.

3. *Terms and Conditions*

- a. ASMDR will require that the central office be capable of providing SMDR via the 1AE6/1E6 generic or higher. ASMDR is not represented to be a provision of billing detail.
ASMDR records will be provided on customer provided compatible terminal equipment located at the customers' premises.
The customer must designate all station lines and/or selected facility groups on which ASMDR originating and terminating records are to be provided.
ASMDR will include the recording of Authorization codes where these optional features are provided at the rates and charges specified in A112.27.
- b. CSR will be provided at the Rates and Charges as specified in A112.
- c. FMS requires the use of ARS-Deluxe at the rates and charges as specified in A112.27 FMS provides the individual features of Facility Administration and Control, Traffic Data to Customer (Pollable).
- d. All ACP features require the use of customer provided compatible terminal equipment.
- e. Rates and charges for ACP will be developed on an individual case basis and will be based on the estimated costs to provide this service.

(T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.12 ESSX Small, Medium and Large Service - 85

(Obsoleted 10-26-95, Type D) Service rates and charges in this Section are available for inward activity of existing subscribers only as specified following. Not available for new service or entire moves of existing service to new locations.

Obsolescence Rules

1. Inward activity for ESSX service - 85 will only be allowed under a Term Payment Plan.
2. ESSX service - 85 subscribers who have their entire account under a month-to-month payment option will be allowed to maintain their ESSX service - 85 at month-to-month rates.
3. ESSX service - 85 subscribers who have a portion of their existing service under a month-to-month payment option and a portion of their existing service under a Term Payment Plan may remain under the rates and charges outlined in this Section until such a time that the Term Payment Plan associated with the Common Equipment expires. Upon expiration of the Term Payment Plan associated with the Common Equipment, the Company reserves the right to convert all or part of the subscriber's account to the month-to-month rates and charges as outlined in this *Guidebook*. (T)
4. ESSX service - 85 subscribers under a Term Payment Plan will be allowed to maintain their ESSX service - 85 until the expiration date associated with the Common Equipment of their contract. Upon expiration of the Term Payment Plan associated with the Common Equipment, the Company reserves the right to convert all or part of the subscriber's account to the month-to-month rates and charges as outlined in this *Guidebook*. (T)
5. ESSX service - 85 subscribers under a Term Payment Plan will have until 02/28/96 to exercise the recast option and subscribe to ESSX service - Vintage II, as described in A112.26, for a Term Payment Plan of not greater than 36 months in length. ESSX service - 85 subscribers under a month-to-month payment option will have until 02/28/96 to convert to a ESSX service - Vintage II Term Payment Plan of not greater than 36 months in length.
6. Conversions from ESSX-1 service to ESSX service - 85 will not be allowed under this *Guidebook*. (T)
7. Existing ESSX service - 85 subscribers who are under a Term Payment Plan may add a new Secondary Location (SLA) or move an existing SLA of their existing service. (T)

Vintaged 07-10-89, Type 4. This service is not offered for new installations after 07-10-89, except where a letter of intent was signed prior to 07-10-89 and the service is to be installed on or before 01-10-90. Subsequent additions to an existing system, under contract, are permitted. Additionally, a system under contract may be moved to another *Company* location within the State of Georgia. Customers paying vintaged rates and charges will continue to pay vintaged rates and charges until their payment period expires. (T)

A112.12.1 General

- A. ESSX Small (S), Medium (M) and Large (L) Service is furnished from No. 1 and 1A Electronic Switching System (ESS) Central Office equipment located on Company premises and associated facilities so arranged as to provide the following basic service features:
 1. Direct Inward Dialing (DID) and Direct Outward Dialing (DOD) of exchange and long distance message network calls to and from stations and attendant positions of an ESSX system.
 2. Intercommunication calls between stations of the same ESSX system.
 3. Identified Outward Dialing (IOD), by station number of outgoing long distance message calls dialed by a station. Only calls billed to the subscriber by the Company will be provided this identification.
 4. Common recorded announcement interception of calls to unassigned station numbers.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.12 ESSX Small, Medium and Large Service - 85 (Cont'd)

A112.12.1 General (Cont'd)

- A. (Cont'd)
5. Trunk answer any station of incoming primary directory listing calls.
 6. Basic Station Line Hunting
 7. Touch-Tone Service
- B. ESSX service will be furnished in three categories based on the size of the subscribers system.
1. ESSX service-S will serve systems with 1-200 main station lines.
 2. ESSX service-M will serve systems with 201-600 main station lines.
 3. ESSX service-L will serve systems with more than 600 main station lines.
- C. An ESSX service system may be comprised of the following components:
- Common Equipment¹
 - Network Access¹
 - Main Station Lines¹
 - Terminating Arrangements
 - Features
1. The Common Equipment and Terminating Arrangements will be at the rates and charges as specified in A112.12.7. The Network Access Limiter and Network Access Registers will be at the rates and charges as specified in A12.12.7. (T)
 2. Main Station Line rates will consist of the intercom charge and the appropriate wire center line charge. These charges will be located in A112.12.8, A112.12.9, and A112.12.10 for ESSX service-S, ESSX service-M, and ESSX service-L respectively.
 3. ESSX service Line and System Features will be grouped as follows:
 - Group A Line Features
 - Group B Line Features
 - Group B System Features
 - Optional System Features
 - Customer Management Features

Note 1: Every system will include these components.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.12 ESSX Small, Medium and Large Service - 85 (Cont'd)

A112.12.1 General (Cont'd)

- C. An ESSX System may be comprised of the following components: (Cont'd)
 - 3. ESSX Line and System Features will be grouped as follows: (Cont'd)
 - Customer Management Features¹
 - a. Group A Line Features will be offered on a grouped basis to ESSX subscribers who have selected an ESSX Term Payment Plan of 36, 60 or 84 months. Subscribers selecting the month-to-month payment option will be offered the Group A Line Features on an individual basis only.
 - b. Group B Line Features, Group B System Features, Optional System Features and the Customer Management Features will be offered to ESSX subscribers under all payment plan options subject to the specific requirements within each arrangement.
 - c. An ESSX-S subscriber will select Group A and B features in A112.12.8.¹ (T)
 - d. An ESSX-M subscriber will select Group A and B features in A112.12.9.¹ (T)
 - e. An ESSX-L subscriber will select Group A and B features in A112.12.10.¹ (T)
 - f. Optional Service Features will be offered to all ESSX subscribers in A112.12.12. (T)
 - g. Customer Management Features will be offered to all ESSX subscribers in A112.12.13.¹ (T)

A112.12.2 Terms and Conditions

- A. ESSX Small, Medium and Large service is furnished subject to the availability of facilities and features from a No. 1 or 1A Electronic Switching System located in a central office building owned or leased by the Company. The service allows for normal station activity including incidental additions and deletions. Major additions to and or major relocations of ESSX systems are subject to the same *terms and conditions* as initial installations. (T)
- B. Certain Auxiliary Services are available on an individual main station line basis and are subject to the capabilities of the serving ESS central office.
- C. Optional Service Features as listed in A112.12.12 include Attendant Features and Auxiliary Attendant Features. These Features may require customer provided compatible terminal equipment.
- D. All console functions by the attendants at the subscriber's premises are performed at the expense of the subscriber and must conform with the operating practices and procedures of the Company to maintain a proper standard of service.
- E. All ESSX main station lines must be associated with the main switching equipment. Satellite switching equipment is not offered with ESSX service.
- F. Tie lines for direct connections between a basic ESSX system and other systems are provided primarily for communication between stations of the two systems. In such cases, rates and charges for tie line service as specified in Section A13. and miscellaneous line termination charges apply. In addition, these tie line connections may be arranged to provide completion of incoming or outgoing local and long distance calls through the ESSX system to or from other systems (ESSX or non ESSX) provided such connections to the exchange or long distance network are only made one system at a time. (T)

Note 1: ESSX systems subscribing to the CSR feature in A112.12.13 must select CSR Changeable Features subject to the rates, *terms and conditions* in A112.12.13. (T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS**A112.12 ESSX Small, Medium and Large Service - 85 (Cont'd)****A112.12.2 Terms and Conditions (Cont'd)**

- G.** Where completion of incoming and outgoing local and long distance calls through an ESSX system is furnished to or from main station lines of a separate ESSX system in another exchange or a non ESSX system in the same or different exchange, the charges applicable for the following features apply in addition to the regular charges for the facilities connecting the systems except for Subsidiary System Arrangements furnished under the terms and conditions specified in A112.12.12.
 - 1. Rates and charges as specified in Section B3. of the Private Line Guidebook apply to miscellaneous lines furnished with unique access codes (trunk level access) except for tie lines furnished in connection with Subsidiary System Arrangements as specified in A112.12.12.
 - 2. ESSX optional features charges as outlined in Section A112.12.12 apply for each trunk terminated main station line as offered in Section A112.12.7, as appropriate.
- H.** Where the lines are arranged to switch calls through the System to or from one or more tie lines or private lines, charges for Dial Cut-Through Arrangement as specified in A112.12.7 shall apply per tie line so equipped. The charge is in addition to the regular charges for the facilities connecting the systems.
- I.** Dormitory service is furnished in accordance with the terms and conditions for Dormitory Communications Service specified in Section A13.
- J.** A system may not be provided for Intercommunication (standalone) service only. Access to the exchange network must be provided.
- K.** A mixture of Flat Rate and Message Rate Service will not be allowed within a single customer system.
- L.** Suspension of Service - With the exception of Network Access Registers, suspension of ESSX Service is not permitted.
- M.** A twelve month minimum service period shall be required for subscription to ESSX-M or ESSX-L Service. The minimum service period as specified in Section A2. applies for ESSX-S Service.
- N.** Touch-Tone service will be furnished subject to the terms and conditions, specified in Section A13. The rates and charges for ESSX-S, ESSX-M and ESSX-L Service include the provision of Touch-Tone Service. Rates and charges as specified in Section A13. do not apply for the provision of Touch-Tone Service to ESSX-S, ESSX-M and ESSX-L Service.
- O.** Listings will be furnished subject to the rates, terms and conditions specified in Section A6. (T)
- P.** The number of simultaneous exchange and toll network calls to and from main station lines and attendant positions of an ESSX system is limited by the number of Network Access Registers subscribed to by the customer. Each Network Access Register may be arranged for two-way, one way incoming or one-way outgoing operation depending upon the option of the customer at the time the network access register is installed. When a change in the type of operation is requested by the customer, the appropriate Service Charge as specified in Section A4. will apply per Network Access Register affected.
- Q.** Service charges, as specified in Section A4., apply to all ESSX systems except as provided in A112.12.5.
- R.** ESSX installation charges due on an initial installation or subsequent addition may be paid in full at the time of installation or deferred over a predetermined period of time as specified in Section A122.
- S.** If the ESSX subscriber elects a Message Rate Service option, Message Rate Service usage charges specified in Section A3 are applicable on calls to locations outside the subscriber's ESSX system in addition to rates and charges in this and other guidebook sections for ESSX service and other associated services. Usage charges are not applicable on calls originated and terminated within the same ESSX system.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.12 ESSX Small, Medium and Large Service - 85 (Cont'd)

A112.12.2 Terms and Conditions (Cont'd)

- T. ESSX service main station lines may be restricted from dialing three-digit central office and service codes by applying Code Restriction to the line. The three-digit codes which may be restricted constitute those codes to which Public Announcement, Directory Assistance or Dial-It Services¹ (e.g. 900 calls) are assigned which could generate billing to the originating main station line. Code Restriction arrangements may also be used to prohibit toll calls to a carrier other than the Presubscribed Interexchange Carrier (dialed 10XXX and 101XXXX). InterLATA calls dialed 0- (operator handled) calls cannot be restricted. The term "Public Announcement Services" as used herein are those services which, in the judgement of the Company, furnish advertised recorded announcement messages to the general public (e.g., time, weather, sport scores and stock market reports). The Public Announcement Service central office codes will be determined by the Company and will be commonly denied access in the office serving the ESSX systems subscribing to this service arrangement. (T)
1. At the time a Code Restriction Arrangement is installed, the ESSX service system will be arranged for the code restriction specified by the customer and the main station lines designated by the customer will be so equipped. When the customer requests the subsequent addition or removal of code restriction on a main station line, the Line Change Charge in Section A4. applies per main station line affected except that no such charge applies when the Code Restriction Arrangement is disconnected in its entirety. (T)
 2. Where Code Restriction applies to a particular central office code, direct outward dialed main station line access is denied to telephone numbers associated with that central office code.
 3. Code Restriction Arrangements to deny access to Directory Assistance and/or Public Announcement Services are not assured. These features are intended to limit main station line direct dialed outgoing calls but such calls may, in certain circumstances be completed and charges will apply as specified elsewhere in this *Guidebook*. (T)
- U. The list of Wire Center Density Classifications by Exchange as specified in A112.12.14 shall be used in determining the density of a particular serving wire center. Whenever the density group designation of a serving wire center is reclassified, ESSX service customers are subject to the following:
1. Charges for main station lines under contract via the ESSX service Term Payment Plan shall not change for the remainder of the payment period.
 2. Upon expiration of the existing contract, the new rate will be based on the wire center density group as reclassified.
 3. Charges for main station lines not under contract (Month-to-Month), including minimum service period shall be adjusted as appropriate in those situations where the reclassification will result in a lower rate.
- V. The first system established per customer within a Local Calling Area must consist of a minimum of one (1) Main Station Line. Systems installed or ordered prior to December 16, 1985 are not subject to this *term and condition*. (T)
- W. ESSX service subscribers with rates and charges applicable within A112.12 may subscribe to features found in A112.26 but not offered in A112.12. (T)
- X. ESSX service subscribers with rates and charges applicable within A112.12 wishing to add or change features must apply nonrecurring charges as indicated in A112.26. (T)

Note 1: Dial-It is a service of AT&T.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS**A112.12 ESSX Small, Medium and Large Service - 85 (Cont'd)****A112.12.3 Definitions****WIRE CENTER DENSITY**

Refers to the average number of main stations (MS) and equivalent main stations (EQ. MS) per square mile in the serving wire center area. Wire Center Density Groups are designated "A" and "B" with group "A" having the least density and group "B" having the highest.

OTHER DEFINITIONS - See A112.26.3

A112.12.4 Intercept Of Calls To Unassigned Station Lines

- A. Incoming calls from the exchange and toll networks to unassigned station lines are intercepted by the same standard central office recorded announcement equipment used to intercept such calls for exchange services. The announcement provided states that the number called is not in service.
- B. Intercommunicating calls to unassigned station lines are intercepted by central office recorded announcement equipment which is common to all ESSX systems served out of the same office. The announcement states that the number is not in service. (C)

A112.12.5 Conversion

- A. (DELETED)
- B. Conversion of ESSX-1 Service to ESSX-S, M and L Service
 - 1. When a customer whose present ESSX-1 Service elects to convert to ESSX-S, M or L Service, installation and service connection charges do not apply to Common Equipment, in-service station lines, terminating arrangements, toll diversion and toll restriction equipped station lines, conference arrangements and other optional features and/or services provided that all of the following conditions are met:
 - a. The customer's system must continue to be served by the same central office equipment,
 - b. There must be no interruption of service, and
 - c. There are no moves, changes or additions in existing station lines, terminating arrangements, or optional features requested by the customer.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.12 ESSX Small, Medium and Large Service - 85 (Cont'd)

A112.12.5 Conversion (Cont'd)

- B. Conversion of ESSX-1 Service to ESSX-S, M and L Service (Cont'd)
 - 2. Customers with ESSX-1 Service converting to ESSX-S, M or L Service must elect a payment period equal to or greater than the unexpired portion of their current payment plan. The following options are available.
 - a. Month-to-Month Payment Plan
 - b. ESSX Term Payment Plan of 36, 60 or 84 months
Terms and Conditions concerning the ESSX Term Payment Plan are specified in Section A122. (T)
- C. Replacement of Number 1/1A ESS Central Office Equipment
 - 1. The rates and charges in this and other Sections for ESSX Service and the associated features and services will continue to apply to existing ESSX subscribers served at a location that is converted through no desire or fault of the subscriber to other than Number 1/1A ESS central office equipment. Should one of the aforementioned existing subscribers wish to utilize features and/or services specific to the non-Number 1/1A ESS equipment, the billing for the customer's system will be converted to rates and charges appropriate for the central office equipment providing his service. (T)

A112.12.6 Payment Schedules

- A. General
 - 1. ESSX service is offered as follows
 - a. The Payment periods are:
 - Month to Month Payment Plan
 - 36 Month ESSX Term Payment Plan
 - 60 Month ESSX Term Payment Plan
 - 84 Month ESSX Term Payment Plan
 - b. Items that may be placed under the ESSX Term Payment Plan
 - Main Station Lines
 - Extension Station Lines
 - Group A Features
 - Group B Features
 - Optional Service Features
 - System Common Equipment
 - Line Terminating Arrangements
- 2. The monthly rate for ESSX service is dependent upon the payment period selected by the customer. (T)
- 3. The monthly rate for ESSX service under the ESSX Term Payment Plan for the periods of 36, 60, or 84 months is not subject to Company initiated rate increases.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.12 ESSX Small, Medium and Large Service - 85 (Cont'd)

A112.12.6 Payment Schedules (Cont'd)

A. General (Cont'd)

4. ESSX-S service will be offered to subscribers having 15 -200 main station lines under any of the payment options offered.
 - a. An ESSX-S subscriber may elect a 36, 60 or 84 month payment period for any portion or all of the total system size with the remainder to be under the month to month payment option.
 - (1) Group A and B line features may be added under any of the payment plan options.
 - (2) Group B System Features, Auxiliary Attendant Features, or Optional service features may be added under any of the payment plans provided that they are not added for a payment period of shorter duration than the contract period associated with the ESSX common equipment.
 - b. An ESSX-S subscriber may add station lines up to 220 Lines, and:
 - (1) Add those lines and associated Group A & B Line features at the month to month rate specified for ESSX-S or,
 - (2) Resubscribe the entire system under the payment periods as offered for ESSX-M.¹
There will be no termination liability.
ESSX-S Subscribers will be liable for the difference in Service Establishment charges between ESSX-S and ESSX-M.
5. ESSX-M service will be offered to subscribers with 201-600 main station lines under month to month, 36 months, 60 months or 84 month payment options.
 - a. An ESSX-M subscriber may elect a 36, 60 or 84 month payment period for any portion or all the total system size with the remainder to be under the month to month payment option.
 - (1) Group A and B line features may be added under any of the payment plan options.
 - (2) Group B System Features, Auxiliary Attendant Features, or Optional service features may be added under any of the payment plan options provided that they are not added for a payment period of shorter duration than the contract period associated with the ESSX common equipment.
 - b. An ESSX-M subscriber may add station lines up to the 660 Lines and:
 - (1) Add those lines and associated Group A & B features at the month to month rate specified for ESSX-M or,
 - (2) Resubscribe the entire system under the payment periods as offered for ESSX-L.¹
There will be no termination liability.
ESSX-M Subscribers will be liable for the difference in Service Establishment charges between ESSX-M and ESSX-L.
6. ESSX-L service will be offered to subscribers with more than 600 main station lines under month to month, 36 month, 60 month and 84 month payment options.
 - a. An ESSX-L subscriber may elect a 36, 60 or 84 month payment period for any portion or all of the total system size with the remainder to be under the month to month payment option.
 - (1) Group A and B line features may be added under any of the payment plan options.

Note 1: *Terms and conditions* concerning the ESSX Term Payment Plan are specified in Section A122.

a. (Cont'd)

- (2) Group B System Features, Auxiliary Attendant Features, or Optional service features may be added under any of the payment plan options provided that they are not added for a contract period of shorter duration than the contract period associated with the ESSX common equipment.

B. Expiration of Contract Period

1. ESSX-S, ESSX-M and ESSX-L customers must upon the expiration of their contract:

a. Select a new payment period as offered in the current *guidebook* or, (T)

b. Revert to the current *guidebook* rates for the month to month payment option. (T)

2. An ESSX-S, ESSX-M or ESSX-L customer whose service is provided under rates, *terms and conditions* found in Section A112. may at any time during his selected contract period resubscribe for an equal or longer contract period at the current rates subject to the following conditions: (T)

a. No credit will be given for payments made during the formerly selected period. Non-recurring charges will not be reapplied.

b. The new payment period begins with the billing date following the date the new payment period is requested.

c. No termination charge applies for the former payment period.

d. A Secondary Service Charge as specified in Section A4. will apply. (T)

e. Subscriber has not previously exercised the option to resubscribe after the effective date of this *Guidebook*.

3. An ESSX-S, ESSX-M or ESSX-L customer whose service is provided under rates, *terms and conditions* found in Section A112., may at any time during his selected contract period resubscribe for a contract period shorter in length than the time remaining in the existing service agreement, subject to the following conditions: (T)

a. No credit will be given for payments made during the formerly selected period. However, nonrecurring charges will not be reapplied.

b. The new payment period begins with the date requested.

c. A termination charge applied to the former payment period.

d. A Secondary Service Charge as specified in Section A4. will apply. (T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.12 ESSX Small, Medium and Large Service - 85 (Cont'd)

A112.12.6 Payment Schedules (Cont'd)

C. Termination Liability

The Termination Liability applicable to ESSX service is dependant upon the payment period selected by the customer. Termination charges for the optional payment periods are as follows:

1. Month-to-Month Payment Plan
 - a. ESSX-S Customers - No Termination Liability will be applicable.
 - b. ESSX-M Customers
 - (1) Within 12 months of date of installation - If a customer's Main Station Line count falls below 75% of the total main station lines initially installed, they will be charged 90% of the amount due for the period remaining up to 12 months from the date of installation for each line disconnected thereafter.
 - (2) Beyond 12 months of date of installation No Termination Liability will be applicable.
 - c. ESSX-L Customers
 - (1) Within 12 months of date of installation - If a customer's main station line count falls below 90% of the total main station lines initially installed, they will be charged 90% of the amount due for the period remaining up to 12 months from the date of installation for each line disconnected thereafter.
 - (2) Beyond 12 months of date of installation - No Termination Liability will be applicable.
2. ESSX Term Payment Plan Option
 - a. ESSX-S, ESSX-M and ESSX-L customers that contract a portion of their system under the ESSX Term Payment Plan Option are subject to the following liability charges.
 - (1) Main Station Lines, Group A Features, Group B Features, System Features under contract - 90% of remaining amount due for each main station line disconnected after the customer's total main station line count falls below 90% of the total main station lines initially installed or of the annually adjusted total.
 - (2) All non-contracted items - No Termination Liability will be applicable.
3. When a subscriber's ESSX service under a Term Payment Plan is disconnected prior to the expiration of the selected service period as a result of a subscriber requested change to one of the separately *available* services listed following, termination charges will not apply when:
 - a. the completed service period is 12 months, and
 - b. the service period of the new arrangement for the separately *available* service equals or exceeds the remaining service period of the disconnected service, and
 - c. the service orders to install the separately *available* service and disconnect the existing service are related together and there is no lapse in service between installation of the separately *available* service and disconnection of the existing service, and
 - d. the service orders are for the same subscriber at the same location.

For the purposes of determining the separately *available* services to which the preceding conditions apply, the following list will be used:

 - MegaLink Service
 - MegaLink Channel Service
 - MegaLink ISDN Service
 - LightGate Service

A112.12.7 Common Rates and Charges

A. General

1. Station Lines
 - a. The rates and charges specified herein for main station lines provided for main station line components. The main station line consists of all facilities including intercommunication outside plant facilities from the system dial switching equipment to the Network Interface of the main station line.
 - b. The rates and charges specified herein for extension stations provide for an extension station line component. The extension station line consists of usage of traffic sensitive Central Office equipment.
 - c. The rates and charges specified herein for main and extension station lines are applicable to each main station location and extension station location respectively to which a customer-provided instrument can be connected.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.12 ESSX Small, Medium and Large Service - 85 (Cont'd)

A112.12.7 Common Rates and Charges (Cont'd)

A. General (Cont'd)

1. Station Lines (Cont'd)

d. (DELETED)

e. End User charges as specified in the End User Access Service Section of FCC Tariff Number 61 apply as appropriate.

f. Rates for the main station lines of ESSX-S, M and L customers will be based on the following criteria:

Main Station Group Size

Wire Center Density Group

Distance from the Serving Central Office

The type of payment plan selected by the customer

g. The total main group size will consist of main station lines and attendant access lines for all locations served by the same ESSX system.

h. Wire center density is based on the number of main stations and equivalent main stations per square mile served by that wire center.

i. Wire center density groups are designated "A" and "B" with group "A" having the least density and "B" having the most density.

"A"

0 - 1200 Mains and equivalents/square mile

"B"

Over - 1201 Mains and equivalents/square mile

j. The distance band will be based on airline mileage from the serving central office to the Network Interface Location at the customer's premises.

Where main stations are in a foreign exchange (FX) or a foreign central office (FCO) area the distance band will be calculated from the FX or the FCO to the Network Interface Location serving those main stations.

Systems with more than one location served by the same ESSX control group will calculate the distance band per location.

k. In a different central office serving area of a multi-office exchange:

The rate of ESSX Service in a FX or FCO area is the monthly rate for the ESSX service desired, plus an FX or FCO mileage charge as specified in Section A9. (T)

When ESSX main station lines are connected by facilities which are routed between two or more central offices in the same exchange the foreign central office mileage charge is calculated separately on an airline basis between the ESS central office from which the ESSX system is served and the central office from which exchange service normally would be rendered.

l. Rates, charges, liabilities and additional *terms and conditions* if applicable may be developed on an individual case basis for main station lines exceeding four (4) airline miles from the serving central office. (T)

(d) Additions to NPA or C.O. Code Group	-	-	-	-	NA
(e) Deletions from NPA or C.O. Code Group	-	-	-	-	NA
(f) Rearrangement from one Screening arrangement to a different Screening arrangement per main station line or group of lines changed at the same time without main station line number change. ²	-	-	-	-	NA

Note 1: Except where all ESSX main station lines have the same Arrangement, each main station line or group of main station lines requires a Split Service Offering Feature at the rate and charge as specified in A112.12.8. This feature is not available on International Direct Distance Dialed (IDDD) calls. The provision of this feature will not affect the local or toll billing for any completed call. (T)

Note 2: Main station line calling arrangement restrictions are not assured. This feature is intended to limit main station line direct dialed outgoing calls, but such calls may in certain circumstances, be completed and will be charged for as specified in other sections of this *Guidebook*. Main station lines with Station Dial Code Screening are assigned to a specific code screening arrangement by main station line number. Removal of the code screening arrangement from a main station line number(s) or changing the main station line number(s) from one code screening arrangement to a different code screening, requires a main station line number rearrangement. (T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.12 ESSX Small, Medium and Large Service - 85 (Cont'd)

(O)(T)

A112.12.10 ESSX-L Service (Cont'd)

(O)

B. Group A Line Features

(O)

1. General

(O)

ESSX-L Service customers may add features from Group A at the rates shown in a. following if a payment period of three, five or seven years is selected. ESSX-L Customers choosing month-to-month payment may add features from b. following for Group A features.

(O)

All features in Group B apply to ESSX-L customers selecting 3, 5 or 7 years or month-to-month payment plans.

(O)

a. Group A Line Features

(O)

The following ESSX-L Group A features are available.

(O)

There is no minimum number of features or grouping of features that must be obtained unless specified by the feature.

(O)

(1) Three-Way Calling, Consultation Hold, Call Transfer - Individual^{1,2}

(O)

(2) Three-Way Calling, Consultation Hold, Call Transfer - All Calls²

(O)

(3) Call Forwarding - Busy Line

(O)

(4) Call Forwarding - Don't Answer

(O)

(5) Call Forwarding - Variable

(O)

(6) Call Forwarding - Variable (Outside)

(O)

(7) Call Hold

(O)

(8) Call Pickup

(O)

(9) Call Waiting Terminating

(O)

(10) Call Waiting Originating

(O)

(11) Speed Call (6) Customer Changeable

(O)

Note 1: An ESSX-L System may be provided with only one type of call transfer capability without using the Split Service feature. The Split Service feature in D. following is required to provide more than one type call transfer within the same ESSX-L system.

(O)

Note 2: Either 1. or 2. is required with each Listed Directory Number (LDN), numbers arranged for hunt with Listed Directory Numbers, and/or each ESSX-L main station line or line equipment number designated as a Console Access Loop or terminated in telephone sets used as Attendant Consoles.

(O)

1. Rates and Charges (Cont'd)

a. (Cont'd)

(5) Station Dial Code Screening,¹ Arrangement I (Cont'd)

Deletions from NPA or C.O. Code Group (See A12.1.10)

Rearrangement from one screening arrangement to a different screening arrangement per main station line or group of lines changed at the same time without main station line number change² (See A12.1.10)

(6) Station Dial Code Screening, Arrangement II³

	ESSX Term Option				Month
	To Month	36 Months	60 Months	84 Months	
(a) Per Main Station Line Equipped	\$.25	\$.20	\$.20	\$.20	SCG
(b) Per group with same screening arrangement and same access code	44.95	44.70	44.60	44.40	SCZ
(c) Per NPA with C.O. code screening	1.30	1.25	1.25	1.25	SC1

Note 1: Except where all ESSX main station lines have the same arrangement, each main station line or group of main station lines requires a Split Service Offering Feature at the rate and charge as specified in A112.12.8.D. This feature is not available on International Direct Distance Dialed (IDDD) calls. The provision of this feature will not affect the local or toll billing for any completed call. (T)

Note 2: Main station line calling arrangement restrictions are not assured. This feature is intended to limit main station line direct dialed outgoing calls, but such calls may in certain circumstances, be completed and will be charged as specified in other sections of this *Guidebook*. Main station lines with Station Dial Code Screening are assigned to a specific code screening arrangement by main station line number. Removal of the code screening arrangement from a main station line number(s) or changing the main station line number(s) from one code screening arrangement to a different code screening, requires a main station line number rearrangement. (T)

Note 3: Arrangement II available only with access to channels associated with private line networks and requires the associated facilities to be senderized and equipped with uniform numbering.

A112.12.11 Telephone Numbers and Facilities Reserved for Future Use (See A12.1.11)

A112.12.12 Optional Service Features

A. Attendant Service

Central office attendant console operation is offered as an auxiliary service with ESSX service.

The Call Transfer-Attendant feature is furnished with Non-Data Link or Data Link Console operation.

As an alternative the subscriber may designate a selected station or stations to perform attendant functions. Incoming calls to the listed directory number are connected to the selected station and then completed to the desired party by operation of the Call Transfer feature.

1. Central Office Components for Non-Data Link Consoles Operations

a. General

(1) Customer provided compatible consoles may be provided only where the central office serving the ESSX system has been arranged for use with such consoles.

(2) Control channels are required for various console optional features as indicated and are provided at the appropriate rates and charges as specified in Section B3. of the Private Line *Guidebook*. (T)

Note 1: All main station lines in the same customer group must be commonly equipped for Call Transfer Inter ESSX screening.

C. Centralized Attendant Service

Centralized Attendant Service (CAS) allows a customer with a number of locations that are served by either a PBX or ESSX system to concentrate all attendants at a single centralized location (Main). Incoming calls over a local exchange trunk to an unattended location (Branch) are routed to the main location via a Release Link Trunk (RLT), where a CAS attendant completes the call by dialing the called party's extension number over the same Release Link Trunk facilities.

1. Types of Equipment With Which CAS is Associated

The main location must be an ESSX system that is equipped for this service, and utilizes customer provided compatible terminal equipment.

The branch locations must be one of the following:

- a. An ESSX system

Note 1: In addition apply rates and charges as specified in Section B3. of the Private Line *Guidebook* for a private line channel between the serving central office and the customer premises and for customer provided equipment associated with that charge. (T)

Note 2: Apply recurring charges for initial installation.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.12.12 Optional Service Features (Cont'd)

C. Centralized Attendant Service (Cont'd)

1. Types of Equipment With Which CAS is Associated (Cont'd)

b. (DELETED) (D)

c. A location that has switching equipment that is customer-provided or is in an area that is served by another telephone company can be interconnected as a branch location only if the switching equipment is compatible with the Company's.

2. Basic Service Features

a. Remote Hold - enables the attendant to hold a call without holding an RLT. The call is temporarily placed on hold at the originating system and automatically routed to an attendant after approximately 30 seconds.

b. Customer Testing of Release Link Trunks - permits each RLT to a PBX branch to be dial accessed by the centralized attendant to insure it is in service and the the transmission performance is adequate.

c. Attendant Call Distribution - queues and distributes calls to the CAS attendants. This provides administrative control over the team of attendants and enables the calls from the branch locations to be handled in their approximate order of arrival, as attendant positions become available.

d. Attendant Recall on "Station Don't Answer" - all PBX type branch locations provide a timed reminder generally after 30 seconds, to automatically recall the attendant if a called station does not answer.

3. Rates and Charges

(8) Uniform Numbering, 100 numbers or fraction thereof					
(a) Each	-	-	-	-	UNZ

D. Automatic Route Selection - Basic (ARS-B)

- 1. General
 - a. Automatic Route Selection - Basic (ARS-B) is an optional feature, available where facilities permit that allows station users, by dialing a preselected code to automatically select the preferred route subscribed to by a customer for network calls. Alternate routing to other facilities subscribed to by the customer is also provided. This agreement is available for use with Foreign Exchange, WATS, CCSA off-net tie lines and Interexchange Carrier (IC) access lines which are compatible with ARS and the MTS network facilities.
 - b. Automatic Route Selection - Basic is accessed by dialing a single code (1, 2 or 3 digits) which automatically selects the appropriate route (FX, WATS, CCSA off-net, tie line, IC access line or the MTS Network) to complete the call. If all facilities in the initial route selected are busy, the call will advance to other routes in the selected pattern. Patterns may consist of up to four (4) private routes. If no route is available, the call will route to the MTS network or overflow tone (customer option). All patterns accessed by a single access code will have the same final route, either the MTS network or overflow tone.

Note 1: Rates and charges as specified in Section A112.12.12.A.1 for equipment is required.

(T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.12 ESSX Small, Medium and Large Service - 85 (Cont'd)

A112.12.12 Optional Service Features (Cont'd)

D. Automatic Route Selection - Basic (ARS-B) (Cont'd)

1. General (Cont'd)

- c. For calls using FX, WATS, CCSA off-net or IC access line facilities, the routing may be based on a Number Plan Area (NPA) and limited to specified central office codes within the NPA as designated by the customer. This is referred to as Foreign Area Discrete Translation.
- d. Automatic Route Selection - Basic is a call routing capability and, therefore, all codes must be in a route for selection. Code blocking is not provided by this feature.

2. *Terms and Conditions*

- a. Automatic Route Selection - Basic is provided only in association with ESSX Service furnished from No. 1 Electronic Switching System (ESS) central office equipment located on Company premises and may be provided, subject to the availability of facilities to ESSX systems which are served by the same such equipment.
- b. Preferred routes and alternate routing patterns will be specified by the customer.
- c. All rates and charges specified for Automatic Route Selection - Basic are in addition to the rates and charges for associated facilities.
- d. The number of patterns required by a customer are governed by the type and variety of facilities to which the customer subscribes.
- e. A single rate per facility will apply regardless of the number of patterns having access to the facility. The monthly rate specified is applicable to each facility available to the patterns.
- f. Patterns without final route to the DDD Network may be offered only if a customer subscribes to a sufficient number of facilities which, in the judgment of the Company, provide an adequate level of service so as to avoid interfering with the service of others or to prevent others from making or receiving calls over their telephone service.
- g. Where a route is used in one pattern (pattern reached by one access code) only one translation may be provided per route. Where a route is used in two or more patterns (each pattern is accessed by different access codes). One translation per pattern may be provided subject to the appropriate charges as specified in paragraph E.1.d. following. Where central office code translation is required for more than one Numbering Plan Area (NPA) per single facility group or route, rates and charges as specified should be applied for each NPA translated.
- h. A group of patterns may have either the DDD Network as a final route or overflow tone. A combination of both within the same pattern group is not permitted. Dial "9" may be used as an access code only if the patterns accessed have the DDD Network as a final route.
- i. Where toll restricted main station lines have access to ARS-Basic patterns with final route to the DDD Network, apply charges and rates as specified for patterns with overflow to tone in lieu of the charge and rate specified for final route to the DDD Network.

E. Station Message Detail Recording

1. General

- a. Station Message Detail Recording (SMDR) is an arrangement to provide a record, by main station line number, of originating intercity traffic routing over dial type tie lines, FX, WATS, CCSA, Interexchange Carrier access lines and or the MTS Network (Toll) and at the customer's option on certain incoming calls² that the attendant extends to a station or the line within the customer's ESSX group.
- b. The station message detail will include the calling main station line number, the called number, date, time of day, duration of call and the type of facility used. The record will be provided on magnetic tape, to customers requiring message detail for cost allocation and telecommunications system management purposes. The detail will be provided on all facilities in routes selected by; the customer for Station Message Detail Recording.

2. **Terms and Conditions**

- a. Station Message Detail Recording (SMDR) may be offered to main station lines of customers where facilities permit and where the Company's message billing process has been arranged to provide this optional feature.

Note 1: Each WATS band is treated as a separate route.

Note 2: SMDR detail on incoming calls does not include the calling number or the type of facility used.

E. Station Message Detail Recording (Cont'd)

2. Terms and Conditions (Cont'd)

- b. Station Message Detail Recording is not represented to be a provision of billing detail. Where tie line, Interexchange Carrier access line, and Foreign exchange facilities are involved all such call attempts, whether completed or not, will appear in the SMDR.
- c. Station Message details will be provided on magnetic tape. The tape density and number of tracks will be that used by the program and data processing system in use by the Company's accounting center furnishing the tape. The customer will be responsible for making the tape format compatible with his data processing equipment.
- d. A magnetic tape will be provided by the Company on each occasion Station Message Detail Recording is furnished to the customer. The tape becomes the property of the customer on a "no exchange" basis and the tape may not be returned to the Company for reuse.
- e. Station Message details may be provided on all facilities subscribed for the customer including the Network (Toll), but will not include intercom calls originated by station users. The customer may designate the group or groups of facilities on which SMDR is to be provided. Where the facility designated by the customer is the toll network, the magnetic tape file will include a record of each message itemized on the customer's bill.
- f. Directory Assistance (DA) call detail may be provided on the magnetic tape (customer option).

G. Subsidiary System Arrangements

1. Subsidiary System

A Subsidiary System of an ESSX system is a customer-provided equipment system which is furnished PBX trunks from the central office serving the customer's ESSX system and which is connected by tie lines to that ESSX system.

A Subsidiary System Arrangement provides station numbers which are in sequence with the main station line numbers of the customers' ESSX system to the stations of one or more subsidiary systems.

2. *Terms and Conditions*

- a. Subsidiary System Arrangement (SSA) station numbers are provided by the same central office equipment and facilities which furnish Direct-Inward-Dialing (DID) service and will only be furnished where adequate DID facilities are available in the central office serving the customer's system and where the subsidiary system is properly equipped for DID service.
- b. The PBX trunks of the subsidiary system are provided at the same rates and charges as specified for such trunks furnished from the central office serving the customer's ESSX system. In addition, foreign central office or foreign exchange mileage charges are applicable to those trunks when the subsidiary system is located outside the area of that serving central office.
- c. The same rates and charges as specified for DID service apply for SSA station numbers. Where more than one subsidiary system is involved, each subsidiary system is considered a separate service and the count of station numbers furnished will commence anew at each such system for the purpose of determining the applicable rates and charges.
- d. Tie lines connecting the ESSX and subsidiary systems are provided at the same rates and charges as specified for ESSX tie line terminals in a customer-provided equipment system.
- e. SSA station numbers are furnished subject to the condition that all inward and outward local and toll network calling by subsidiary system stations be via the central office serving the customer's ESSX system.

2. *Terms and Conditions* (Cont'd)

(T)

e. (Cont'd)

- (1) Where subsidiary system station's outward local and toll network calls are placed via tie lines and the network access registers of the ESSX system, the charges for such calls are identified and billed as primary directory listing calls of the ESSX system.
 - (2) Where subsidiary system station's outward local and toll network calls are placed via PBX trunks, the charges for such calls are identified as primary directory listing calls of the subsidiary system except as specified in f. following.
- f. At the option of the customer, identification of outgoing toll network calls by SSA station number will be provided at the same rates and charges as specified for Identified-Outward-Dialing (IOD) service subject to the following conditions.
- (1) The identification of outgoing toll calls by SSA station number will only be provided on calls routes via PBX trunks.
 - (2) Where more than one subsidiary system is arranged for the identification of outgoing toll calls by SSA station number, each system shall be considered a separate service and the count of connecting channels which serve as IOD trunks will commence anew at each system for the purpose of determining the applicable rates and charges.
- g. The ESSX subsidiary system arrangement is provided solely for the furnishing of SSA station numbers to subsidiary systems for local and toll network and intercommunication calling and does not provide any of the basic optional service features of ESSX service to stations of the subsidiary systems.

3. Rates and Charges

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.12 ESSX Small, Medium and Large Service - 85 (Cont'd)

A112.12.12 Optional Service Features (Cont'd)

J. Access to Customer Provided Features¹

1. General

Rates and charges for the appropriate channels as specified in Section B3. of the Private Line *Guidebook* apply to each access code arranged (originate or answer) for connection to customer provided features. (T)

All rates and charges specified herein are in addition to existing rates and charges for ESSX and other services with which they are associated.

For rates and charges applicable for control channels when required for supervision purposes with equipment and/or apparatus located on customer premises, see Section A13.1. (T)

2. Rates and Charges

a. Access to Recorded Telephone Dictation Equipment

(1) Dial Access for

	ESSX Term Option				Month
	To	36	60	84	
	Month	Months	Months	Months	USOC
(a) 1st Trunk	\$110.60	\$110.15	\$109.70	\$109.25	EWA
(2) Additional trunks equipped					
(a) Each	110.60	110.15	109.70	109.25	EWB
b. Access to Dial Code Sending Equipment					
(1) Code Calling					
(a) Per customer premises location ²	123.15	122.65	122.15	121.65	PLC
c. Access to Loudspeaker Paging origination					
(1) Loudspeaker paging origination for dial access to paging trunk equipped with access code					
(a) Each	79.55	79.25	78.95	78.50	EWJ
(2) Answer back Option for loudspeaker paging					
(a) Per zone	10.60	10.55	10.50	10.45	EWY

K. Station Message Detail Recording - Premises

(Obsoleted 10-05-92, Type 4) Not available for new subscribers to this feature. Subsequent additions, deletions, and/or rearrangements to an existing system under contract are permitted, subject to the capacity of the central office from which it is provided. Customers paying obsoleted contract rates and charges may continue to do so until their contract period expires or they subscribe to the new restructured Station Message Detail Recording (SMDR) feature located in Section A12. and new Station Message Detail - Premises function located in Section A32. Customers paying obsoleted month-to-month rates and charges may do so until they subscribe as detailed above or until May 1, 1994, at which time they must subscribe to the new offerings. (T)

Note 1: This feature provides for access only to customer provided features which may require customer provided compatible terminal equipment.

Note 2: In addition, apply rates and charges applicable for 3.A Code Calling and Auxiliary Signal Equipment as specified in Section A14. (T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.12 ESSX Small, Medium and Large Service - 85 (Cont'd)

A112.12.12 Optional Service Features (Cont'd)

K. Station Message Detail Recording - Premises (Cont'd)

1. General

- a. Station Message Detail Recording - Premises (SMDR-P) is an arrangement to provide a record, by main station line number, of originating traffic routing over local lines, tie lines, WATS, Interexchange Carrier access lines and/or the toll network.
- b. The station message detail will include the calling main station line number, the called number, connect time and date, call duration, facility used, disconnect time, digits outpulsed by switch, and end of dialing. SMDR-P data provided to customers using the ETS feature will include incoming facility identification, outgoing facility used, midnight passed, prefix digits, interLATA carrier, ARS, ARS-D, or ARS-B pattern group, and call event code where these features are *available via guidebook*. (T)
- c. Station Message Detail Recording - Premises (SMDR-P) is designed for either an ETS or non-ETS ESSX service customer.
- d. The SMDR-P data may be delivered as Dial-In/Dial-Out, asynchronous or synchronous, or Direct Output. In Dial-In/Dial-Out asynchronous, the data may be delivered to a customer's collection device via DDD facilities or an ESSX service main station line. The delivery can be initiated by a customer call or can be initiated by the application processor software as specified by the customer. In Dial-In/Dial-Out synchronous, the data may be delivered to a customer's collection device over DDD facilities or an ESSX service main station line. The two methods of delivery are Direct File Transfer and Remote Job Entry.
Direct Output is similar to Dial-In/Dial-Out in delivery modes. The Direct Output requires a dedicated port on the application processor and a dedicated modem. Also, a two or four wire facility will be required.
- e. The SMDR-P data provided will be delivered to the customer as raw data.
- f. It should be noted that this feature was shown as part of the ETS A12.5.3.D. which has been deleted.

2. *Terms and Conditions*

- a. The Station Message Detail Recording - Premises (SMDR-P) may be offered on ESSX service main station lines of customers where facilities and technology permit. (T)
- b. Customer provided premises equipment is required. Channel charges specified in the Private Line *Guidebook* for a Voice Grade Local Channel also may apply. (T)
- c. Station message detail will be provided through the use of telephone central office equipment that will interface with the appropriate type line connections as specified by the customer.
- d. During collection or distribution of the customer's SMDR-P data, if data is destroyed, the Company shall not be liable, directly or indirectly, for damages, unless caused by the negligence of the Company in failing to maintain reasonable standards of maintenance and inspection and to exercise reasonable supervision.

A112.12.15 ESSX Customer Administration Service

A. General

1. The ESSX Customer Administration Service (ECAS) feature permits ESSX customers to activate/deactivate selected optional features, change certain service options, and change feature configurations on predesignated ESSX station lines. Customer provided terminal equipment is required for the operation of the ECAS feature.
2. For ECAS equipped station lines, ECAS allows the customer to verify and/or display the assignment of features on a single station line, range of station lines or all station lines to determine which station or stations have a particular feature or service option.
3. Certain ESSX station lines may be specified by the customer to be exempt from this feature. Additionally, the Company reserves the right to make station lines inaccessible for ECAS.
4. Changing the status of a station line from accessible to ECAS to inaccessible or vice versa, must be done by the Company via a Service Order request. A **Secondary Service Charge** as specified in Section A4 applies. (T)
5. The Company has made the following provisions to protect the integrity of the switching system database and to ensure the security of ECAS changes.
 - a. An ECAS customer's change, display or verify capabilities are restricted to that particular customer's own ESSX system.
 - b. All changes are audited as they are entered by the ECAS customer. Invalid changes will not be accepted. An error message detailing which command is in error will be given.
 - c. Customer access to the database is protected using dialup, login, password/dialback arrangement.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.12 ESSX Small, Medium and Large Service - 85 (Cont'd)

A112.12.15 ESSX Customer Administration Service (Cont'd)

A. General (Cont'd)

6. An ECAS customer can schedule changes (individual or bulk) for completion by the next day or for a future day. Additionally priority changes may be requested and the changes completed the same day subject to ***Terms and Conditions*** in A112.12.15. (T)
7. Definitions pertaining to ECAS/ESSX features are specified in Section A12.1.3. (T)
8. The ECAS feature allows the customer to perform the following transactions from the customer provided terminal:
 - a. Change particular service options on a per station basis and exchange station telephone numbers (TNs). The change capabilities are:
 - (1) Line Status (Active/Inactive)¹
 - (2) CAT Code
 - (3) Ringing Cycles for CFDA
 - (4) Call Pickup Group: The call pickup group to which a station is assigned can be changed on a per station basis.
 - (5) The Forward to Number can be changed for a station line with CFBL and/or CFDA assigned.
 - (6) Speed Call Group: The Speed Call group to which a station is assigned can be changed on a per-station basis.
 - (7) Series Completion "Hunt To" Telephone Number (TN): The "hunt to" TN assigned to a station line can be changed on a per station basis²
 - (8) Station TN Rearrangement: Swap TNs from one location to another
 - (9) Facility Restriction Levels
 - (10) Access Line Class of Service
 - (11) Add/Change Customer Entered Listing Information
 - b. Activate/deactivate the following features and service options on a single station line basis:
 - (1) Automatic Callback Calling
 - (2) Call Forwarding Busy Line
 - (3) Call Forwarding Don't Answer
 - (4) Call Forwarding Variable
 - (5) Call Forwarding Variable - Outside
 - (6) Call Hold
 - (7) Call Pickup
 - (8) Call Waiting Originating
 - (9) Call Waiting Terminating

Note 1: Station lines made inactive using ECAS will continue to be billed at the ***guidebook*** rates. (T)

Note 2: All numbers in series completion hunt must be in the same common block.

(O)

- Name²- Organization²- Location²

Note 1: Deactivating Basic Station Line Hunting may disrupt the normal completion order of a Hunt Group.

(O)

Note 2: The ECAS customer is responsible for entering and updating the information contained in this field.

(O)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.12 ESSX Small, Medium and Large Service - 85 (Cont'd)

A112.12.15 ESSX Customer Administration Service (Cont'd)

A. General (Cont'd)

8. (Cont'd)

- e. Initial training of the customer for up to four (4) system managers in the use this feature is included at the time the feature is put into service. Communication counselor training is a prerequisite to the ECAS system manager training. Any customer training or subsequent assistance necessary after the initial establishment of the feature is at the option of the customer and a Subsequent Training Charge applies per hour where such training is provided.

B. *Terms and Conditions*

1. ECAS is provided only with ESSX systems served from a No. 1/1A ESS central office and is furnished subject to the availability of facilities.
2. Customers equipped for ECAS must order via a service order¹ ECAS changeable features in groups of five (5) at the rates specified in A112.12.15.
3. Non-ECAS changeable features with the exception of Three-Way Calling, Consultation Hold, Call Transfer All Calls will be added subject to the specifications and rates in A112.12.8, A112.12.9 or A112.12.10 as appropriate. Three-Way Calling, Consultation Hold, Call Transfer All Calls is offered in groups of five (5) at the rates specified in A112.12.15.
4. Features for ECAS exempt station lines must be requested via a Service Order¹ and added by the Company. Rates and Charges for the features specified in A112.12.8, A112.12.9 or A112.12.10 apply as appropriate.
5. The customer provided ECAS terminal equipment requires an ESSX main station line. Rates and charges in A112.12.8, A112.12.9 and A112.12.10 apply as appropriate.
6. ECAS changes must be entered prior to a time to be designated by the Company to be completed as priority changes or by the next day as requested by the customer.
7. An ECAS customer cannot activate features in excess of the quantity that has been ordered from the Company. The customer will receive an indication when 100% utilization of a feature is reached. Additional quantities of features may be added subject to *Terms and Conditions*. (T)
8. Contractual obligations and End User Common Line charges will be billed to the location where originally installed and will not transfer with a station number rearrangement.
9. If the Company is requested to load ECAS changeable features for new ESSX/ECAS customers, Installation Charges specified in A12.1.15 applies per ECAS feature added.
10. The following types of lines will be restricted from Station TN Rearrangement capability. Service options and feature change capabilities will still be available except on lines assigned to multiline hunt groups.
 - Station lines assigned to multiline hunt groups
 - Attendant Lines
 - Any ESSX line which as a special hardware configuration (e.g., ground start lines and lines having SCAN points or signal distribution points)
 - Manual lines (e.g., station lines with full originating and/or terminating restrictions)
11. ECAS functions performed by the Company at the customer's request subsequent to the initial installation will be subject to the nonrecurring charge specified in A12.1.15.

Note 1: Appropriate Service Charges specified in Section A4. will apply.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.12 ESSX Small, Medium and Large Service - 85 (Cont'd)

A112.12.15 ESSX Customer Administration Service (Cont'd)

B. Terms and Conditions (Cont'd)

- 12. The Per System charges specified in A112.12.15.C. apply when a feature is initially activated in a Common Block.
- 13. Any required changes in customer provided equipment as a result of growth, desired enhancements or technological advancement, will be the responsibility of the ECAS customer. Compatibility with customer provided station terminal equipment is not guaranteed.
- 14. The ECAS customer is responsible for assigning and maintaining a record of station feature assignments. The ECAS customer also agrees to provide the Company with a central point of contact for inquiries and/or trouble reports involving station features.
- 15. ECAS customers will be responsible for initiating a Service Order to correct any information pertaining to Listings that changed as a result of an ECAS TN swap. The Secondary Service Charge specified in Section A4. applies. (T)

C. Rates and Charges

1. ECAS Capability

ESSX-L customers will have the option of paying for ECAS on either a per system or a per line basis. Customers choosing to pay on a per system or a per line basis will be subject to the rates specified in A112.12.15.C. The installation charge will be reapplied if an ESSX-L customer changes their ECAS billing arrangement subsequent to the installation of the ECAS feature.

A112.13 Digital ESSX Service - 85 (Cont'd)

3. Digital ESSX service - 85 subscribers who have a portion of their existing service under a month-to-month payment option and a portion of their existing service under a Term Payment Plan may remain under the rates and charges outlined in this Section until such a time that the Term Payment Plan associated with the Common Equipment expires. Upon expiration of the Term Payment Plan associated with the Common Equipment, the Company reserves the right to convert all or part of the subscriber's account to the month-to-month rates and charges as outlined in this *Guidebook*. (T)
4. Digital ESSX service - 85 subscribers under a Term Payment Plan will be allowed to maintain their Digital ESSX service - 85 until the expiration date associated with the Common Equipment of their contract. Upon expiration of the Term Payment Plan associated with the Common Equipment, the Company reserves the right to convert all or part of the subscriber's account to the month-to-month rates and charges as outlined in this *Guidebook*. (T)
5. Digital ESSX service - 85 subscribers under a Term Payment Plan will have until 02/28/96 to exercise the recast option and subscribe to Digital ESSX service - Vintage II, as described in A112.28, for a Term Payment Plan of not greater than 36 months in length. Digital ESSX service - 85 subscribers under a month-to-month payment option will have until 02/28/96 to convert to a Digital ESSX service - Vintage II Term Payment Plan of not greater than 36 months in length.
6. Conversions from ESSX-1 service to Digital ESSX service - 85 will not be allowed under this *Guidebook*. (T)
7. Existing Digital ESSX service - 85 subscribers who are under a Term Payment Plan may add a new Secondary Location (SLA) or move an existing SLA of their existing service. (T)

Vintaged 07-10-89, Type 4. This service is not offered for new installations after 07-10-89, except where a letter of intent was signed prior to 07-10-89 and the service is to be installed on or before 01-10-90. Subsequent additions to an existing system, under contract, are permitted. Additionally, a system under contract may be moved to another *Company* location within the State of Georgia. Customers paying vintaged rates and charges will continue to pay vintaged rates and charges until their payment period expires. (T)

A112.13.1 General

- A. Digital ESSX Service is furnished from Digital Central Office equipment located on Company premises and associated facilities so arranged as to provide the following basic service features:
 1. Direct Inward Dialing (DID) and Direct Outward Dialing (DOD) of exchange and long distance message network calls to and from stations and attendant positions of a Digital ESSX system.
 2. Intercommunication calls between stations of the same Digital ESSX system.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.13 Digital ESSX Service - 85 (Cont'd)

A112.13.1 General (Cont'd)

A. (Cont'd)

3. Identified Outward Dialing (IOD), by station number of outgoing long distance message calls dialed by a station. Only calls billed to the subscriber by this Company will be provided this identification.
4. Common recorded announcement interception of calls to unassigned station numbers.
5. Basic Station Line Hunting.
6. Touch-Tone Service

B. Digital ESSX service will be furnished in three categories, based on the size of the subscriber's system.

1. Digital ESSX service-S will serve systems with 1-200 Main Station Lines.
2. Digital ESSX service-M will serve systems with 201-600 Main Station Lines.
3. Digital ESSX service-L will serve systems with more than 600 Main Station Lines.

C. A Digital ESSX service system may be comprised of the following components:

- Common Equipment¹
- Network Access¹
- Main Station Lines¹
- Terminating Arrangements
- Features

The Common Equipment and Terminating Arrangements will be at the rates and charges as specified in A112.13.7. The Network Access Limiter and Network Access Registers will be at the rates and charges as specified in A12.13.7. (T)

Main Station Line rates will consist of the intercom charge and the appropriate wire center line charge. These charges will be located in A112.13.8, A112.13.9, and A112.13.10 for Digital ESSX service-S, Digital ESSX service-M and Digital ESSX service-L respectively.

Digital ESSX service Line and System Features will be grouped as follows:

- A Line Features Grouped
- A Line Features Individual
- B Line Features
- Optional Service Features

A Line Features will be offered on a grouped basis to Digital ESSX service subscribers who have selected an ESSX service Term Payment Plan of 36, 60 or 84 months. Subscribers selecting the month to month payment option will be offered the Group A Line features on an individual basis only.

B Line Features and Optional System Features will be offered to Digital ESSX service subscriber under all payment plan options subject to the specific requirements within each arrangement.

A Digital ESSX service-S subscriber will select A & B Features in A112.13.8. (T)

A Digital ESSX service-M subscriber will select A & B Features in A112.13.9. (T)

A Digital ESSX service-L subscriber will select A & B Features in A112.13.10. (T)

Optional Service Features will be offered to all Digital ESSX service subscribers in A112.13.11. (T)

Note 1: Every system will include these components.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.13 Digital ESSX Service - 85 (Cont'd)

A112.13.2 Terms and Conditions

- A. Digital ESSX service is furnished subject to the availability of facilities and features from Digital Central Office equipment, located in a central office building owned or leased by the Company. The service allows for normal station activity including incidental additions and deletions. Major additions to and or major relocations of Digital ESSX systems are subject to the same *terms and conditions* as initial installations.(T)
- B. Certain Auxiliary Services are available on an individual main station line basis and are subject to the capabilities of the serving central office.(T)
- C. Optional Service Features as listed in A112.13.11 include Attendant Features and Auxiliary Attendant Features. These features may require customer provided compatible terminal equipment.
- D. All console functions by the attendants at the subscriber's premises are performed at the expense of the subscriber and must conform with the operating practices and procedures of the Company to maintain a proper standard of service.
- E. All Digital ESSX main station lines must be associated with the main switching equipment. Satellite switching equipment is not offered with Digital ESSX service.
- F. Tie lines for direct connections between a basic Digital ESSX system and other systems are provided primarily for communication between stations of the two systems. In such cases, rates and charges for tie line service as specified in A13 of this *Guidebook* and miscellaneous line termination charges apply. In addition, these tie line connections may be arranged to provide completion of incoming or outgoing local and long distance calls through the Digital ESSX system to or from other systems (Digital ESSX or non-Digital ESSX) provided such connections to the exchange or long distance network are only made at one system at a time.(T)
- G. Where completion of incoming and outgoing local and long distance calls through a Digital ESSX system is furnished to or from main station lines of a separate Digital ESSX system in another exchange or a non-Digital ESSX system in the same or different exchange, the charges applicable for the following features apply in addition to the regular charges for the facilities connecting the systems except for Subsidiary System Arrangements furnished under the *terms and conditions* specified in A112.13.11.(T)
- 1. Rates and charges as specified in Section B3. of the Private Line *Guidebook* apply to miscellaneous lines furnished with unique access codes (trunk level access) except for tie lines furnished in connection with Subsidiary System Arrangements as specified in A112.13.11.(T)
- 2. Digital ESSX optional feature charges as outlined in Section A112.13.8, 9 and 10 apply for each trunk terminated main station line as offered in Section A112.13.7, as appropriate.(T)
- H. Dormitory service is furnished in accordance with the *terms and conditions* for Dormitory Communications Service specified in Section A13.(T)
- I. A system may not be provided for Intercommunication (standalone) service only. Access to the Exchange Network must be provided.
- J. A mixture of Flat Rate and Message Rate Service will not be allowed within a single customer system.
- K. Suspension of Service
With the exception of Network Access Registers, suspension of Digital ESSX Service is not permitted.
- L. A twelve month minimum service period shall be required if the subscriber's system is a Digital ESSX-M or L. The normal minimum service period as specified in Section A2. will be applicable to Digital ESSX-S systems.(T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.13 Digital ESSX Service - 85 (Cont'd)

A112.13.2 Terms and Conditions (Cont'd)

- M. Touch-Tone service will be furnished subject to the terms and conditions, specified in Section A13. The rates and charges for Digital ESSX station lines include the provision of Touch-Tone service. Rates and charges for Touch-Tone service as specified in Section A13. do not apply for the provision of Touch-Tone service to Digital ESSX Service.
- N. Listings will be furnished subject to the rates, terms and conditions specified in Section A6. (T)
- O. The number of simultaneous exchange and toll network calls to and from main station lines and attendant positions of a Digital ESSX system is limited by the number of Network Access Registers subscribed to by the customer. Each Network Access Register may be arranged for two-way, one-way incoming or one-way outgoing operation depending upon the option of the customer at the time the Network Access Register is installed. When a change in the type of operation is requested by the customer, the appropriate Service Charges as specified in Section A4. apply per Network Access Register affected.
- P. Service charges, as specified in Section A4., apply to all Digital ESSX systems except as provided in A112.13.5.
- Q. Digital ESSX installation charges are due on initial installation or subsequent additions unless deferred over a predetermined period of time as specified in Section A122.
- R. If the Digital ESSX subscriber elects a Message Rate Service option, Message Rate Service usage charges specified in Section A3. are applicable on calls to locations outside the subscriber's Digital ESSX system in addition to rates and charges in this and other guidebook sections for Digital ESSX service and other associated services. Usage charges are not applicable on calls originated and terminated within the same Digital ESSX system.
- S. Digital ESSX main station lines may be restricted from dialing three-digit central office and service codes by applying Code Restriction to the line. The three-digit codes which may be restricted constitute those codes to which Public Announcement, Directory Assistance or Dial-It¹ Services (e.g., 900 calls) are assigned which could generate billing to the originating main station line. Code Restriction arrangements may also be used to prohibit toll calls to a carrier other than the Presubscribed Interexchange Carrier (dialed 10XXX and 101XXXX). InterLATA calls dialed 0- (operator handled) calls cannot be restricted. The term "Public Announcement Services" as used herein are those services which, in the judgment of the Company, furnish advertised recorded announcement messages to the general public (e.g., time, weather, sport scores and stock market reports). The Public Announcement Service central office codes will be determined by the Company and will be commonly denied access in the central office serving the Digital ESSX systems subscribing to this service arrangement.
 1. At the time a Code Restriction arrangement is installed, the Digital ESSX system will be arranged for the Code Restriction specified by the customer and the main station lines designated by the customer will be so equipped. When the customer requests the subsequent addition or removal of code restriction on a main station line, the appropriate Service Charges as specified for a change in line termination apply per main station line affected except that no such charges apply when the code restriction arrangement is disconnected in its entirety.
 2. Where Code Restriction applies to a particular central office code, direct outward dialed main station line access is denied to telephone numbers associated with that central office code.
 3. Code Restriction Arrangements to deny access to Directory Assistance and/or Public Announcement Services are not assured. These features are intended to limit main station line direct dialed outgoing calls, but such calls may, in certain circumstances, be completed and will be charged for in the normal manner.

Note 1: Dial-It is a service of AT&T.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.13 Digital ESSX Service - 85 (Cont'd)

A112.13.2 Terms and Conditions (Cont'd)

- T.** The list of Wire Center Density Classifications by Exchange as specified in A112.12.14 shall be used in determining the density of a particular serving wire center. Whenever the density group designation of a serving wire center is reclassified, Digital ESSX service customers are subject to the following:
 1. Charges for main station lines under contract via the ESSX service Term Payment Plan shall not change for the remainder of the contract.
 2. Upon expiration of the existing contract, the new rate will be based on the wire center density group as reclassified.
 3. Charges for main station lines not under contract (Month-to-Month), including minimum service period shall be adjusted if the reclassification would result in a lower rate.
- U.** Customer Station Rearrangement (CSR) may be provided with Digital ESSX service where facilities permit. Rates and charges for CSR will be developed on an individual case basis and will be based on the estimated costs to provide this service.
- V.** The first system established per customer within a Local Calling Area must consist of a minimum of one (1) Main Station Line.
- W.** Digital ESSX service subscribers with rates and charges applicable out of the Vintaged Section A112.13 may subscribe to features found in A112.28 but not offered in A112.13.
- X.** Digital ESSX service subscribers with rates and charges applicable out of the Vintaged Section A112.13 wishing to add or change features must apply nonrecurring charges as indicated in A112.28.

A112.13.3 Definitions

WIRE CENTER DENSITY

Refers to the average number of main stations (MS) and equivalent main stations (EQ. MS) per square mile in the serving wire center area. Wire Center Density Groups are designated "A" and "B" with group "A" having the least density and group "B" having the highest.

OTHER DEFINITIONS - SEE A12.13.3

A112.13.4 Intercept of Calls to Unassigned Station Lines

- A.** Incoming calls from the exchange and toll networks to unassigned station lines are intercepted by the same standard central office recorded announcement equipment used to intercept such calls for exchange services. The announcement provided states that the number called is not in service.
- B.** Intercommunicating calls to unassigned station lines are intercepted by central office recorded announcement equipment which is common to all Digital ESSX service systems served out of the same office. The announcement states that the number is not in service.

(C)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.13 Digital ESSX Service - 85 (Cont'd)

A112.13.5 Conversion

A. Replacement of Central Office Equipment

1. The rates and charges in this and other *guidebook* sections for Digital ESSX Service and the associated features and services will continue to apply to Digital ESSX subscribers served at a location that is converted through no desire or fault of the subscriber to Digital central office equipment. Should one of the aforementioned existing subscribers wish to utilize features and/or services specific to the Digital central office equipment, the billing for that customer's system will be converted to charges appropriate for the central office equipment providing his service. (T)

B. Conversion of ESSX Service¹ to Digital ESSX Service

1. When a customer whose ESSX Service elects to convert to Digital ESSX Service, installation and service connection charges do not apply to Common Equipment, in-service station lines, terminating arrangements, toll diversion and toll restriction equipped station lines, conference arrangements and other optional features and/or services provided each of the following conditions are met:
 - a. The Customer's system must continue to be served by the same central office equipment or the customer is moved to other central office equipment at the Company's instance.
 - b. There must be no interruption of service, and
 - c. There are no moves, changes or additions in existing station lines, terminating arrangements, or optional features requested by the customer.
2. ESSX Services converting to Digital ESSX Service must elect one of the following options:
 - a. Month to Month Payment Plan
 - b. ESSX Term Payment Plan of 36, 60 or 84 months¹
3. Where the customer elects an ESSX Term Payment Plan of 36, 60 or 84 months and wishes to add to his system the following shall apply:
 - a. Such additions shall be made within a scheduled period after the conversion at the rates and charges in this and other *guidebook* sections for Digital ESSX Service and the associated Features and Services. (T)
4. Where an ESSX customer converts to Digital ESSX the service establishment charge shall not apply if the same customer category, (Small, Medium or Large) is maintained. If the ESSX customer has a current ESSX Term Payment Plan, an ESSX Term Payment Plan for Digital ESSX must be selected that is equal to or longer than the unexpired portion of the current plan.
5. Where an ESSX customer converts to Digital ESSX and changes customer category (Small to Medium, Medium to Large, Small to Large) the Service Establishment Charge applied shall be equal to the appropriate Digital ESSX Service Establishment Charge (of the category the customer is going to) less the ESSX Service Establishment (of the category the customer is coming from) Charge.
6. Where an ESSX customer converts to Digital ESSX and downgrades from Large to Medium, Medium to Small, or Large to Small, no service charge shall apply. Termination charges will apply as specified in A112.13.6. (T)
7. Where a Digital ESSX customer converts to ESSX such conversions shall also be made in accordance with paragraphs 3, 4, 5 & 6 preceding.

Note 1: Denotes ESSX-1 Service or ESSX-S, M, L Service.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.13 Digital ESSX Service - 85 (Cont'd)

A112.13.6 Payment Schedules

A. General

1. Digital ESSX service is offered as follows.
 - a. The contract periods are:
 - Month to Month Payment Plan
 - 36 Month ESSX Term Payment Plan
 - 60 Month ESSX Term Payment Plan
 - 84 Month ESSX Term Payment Plan
 - b. Items that may be placed under the ESSX Term Payment Plan¹
 - (1) Main Station Lines
 - (2) Extension Station Lines
 - (3) Line Feature Options
 - (4) Optional Service Features
 - (5) System Common Equipment
 - (6) Terminating Arrangements
2. The monthly rate for Digital ESSX service is dependent upon the payment period selected by the customer.
3. The monthly rate for Digital ESSX service under the ESSX Term Payment Plan for the periods of 36, 60 or 84 months is not subject to Company initiated rate increases.
4. Digital ESSX-S service will be offered to subscribers having 15 -200 main station lines under any of the payment options offered.
 - a. A Digital ESSX-S subscriber may elect a 36, 60 or 84 month payment period for any portion or all of the total system size with the remainder to be under the month to month payment option.
 - (1) Group A and B line features may be added under any of the payment plan options.
 - (2) Auxiliary Attendant Features, or Optional Service Features may be added under any of the payment plans provided that they are not added for a payment period of shorter duration than that associated with the Digital ESSX common equipment.
 - b. A Digital ESSX-S subscriber may add station lines up to 220 Lines, and:
 - (1) Add those lines and associated Group "A" and "B" line features at the month-to-month rate specified for Digital ESSX-S or,
 - (2) Resubscribe the entire system under the payment periods offered for Digital ESSX-M.¹
 - (3) There will be no termination liability.
 - (4) Digital ESSX-S Subscribers will be liable for the difference in service establishment charges between Digital ESSX-S and Digital ESSX-M.

Note 1: *Terms and conditions* concerning the ESSX Term Payment Plan are specified in Section A122. (T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.13 Digital ESSX Service - 85 (Cont'd)

A112.13.6 Payment Schedules (Cont'd)

A. General (Cont'd)

5. Digital ESSX-M service will be offered to subscribers with 201-600 main station lines under month to month, 36 months, 60 months or 84 month payment options.
 - a. A Digital ESSX-M subscriber may elect a 36, 60 or 84 month contract period for any portion or all the total system size with the remainder to be under the month to month payment option.
 - (1) Group "A" and "B" line features may be added under any of the payment plan options.
 - (2) Auxiliary Attendant Features, or Optional service features may be added under any of the payment plans provided that they are not added for a payment period of shorter duration than the contract period associated with the Digital ESSX common equipment.
 - b. A Digital ESSX-M subscriber may add station lines up to the 660 Lines and:
 - (1) Add those lines and associated Group "A" and "B" features at the month to month rate specified for Digital ESSX-M or,
 - (2) Resubscribe the entire system under the payment periods as offered for Digital ESSX-L.
 - (3) There will be no termination liability.
 - (4) Digital ESSX-M Subscribers will be liable for the difference in service establishment charges between Digital ESSX-M and Digital ESSX-L.
6. Digital ESSX-L service will be offered to subscribers with more than 600 main station lines under month to month, 36 month, 60 month and 84 month payment options.
 - a. A Digital ESSX-L subscriber may elect a 36, 60 or 84 month payment period for any portion or all of his total system size with the remainder to be under the month to month payment option.
 - (1) Group "A" and "B" line features may be added under any of the payment plan options.
 - (2) Auxiliary Attendant Features, or Optional service features may be added under any of the payment plans provided that they are not added for a contract period of shorter duration than the remaining contract period associated with the Digital ESSX common equipment.

B. Expiration of Contract Period

1. Digital ESSX-S, M and L customers must upon the expiration of their contract:
 - a. Select a new contract period as offered in the current *guidebook* or, (T)
 - b. Revert to the current *guidebook* rates for the month to month payment option. (T)
2. A Digital ESSX S, M or L customer whose service is provided under rates, *terms and conditions* found in Section A112. may at any time during his selected payment period resubscribe for an equal or longer payment period at the current rates subject to the following conditions: (T)
 - a. No credit will be given for payments made during the formerly selected period. Nonrecurring charges will not be reapplied.
 - b. The new payment period begins with the billing date following the date the new payment period is requested.
 - c. No termination charge applies for the former payment period.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.13 Digital ESSX Service - 85 (Cont'd)

A112.13.6 Payment Schedules (Cont'd)

B. Expiration of Contract Period (Cont'd)

2. (Cont'd)

- d. A Secondary Service Charge as specified in Section A4. will apply. (T)
- e. Subscriber has not previously exercised the option to resubscribe after the effective date of this *guidebook*. (T)
- 3. A Digital ESSX S, M or L customer whose service is provided under rates, *terms and conditions* found in Section A112., may at any time during his selected payment period resubscribe for a payment period, shorter in length than the time remaining in the existing service agreement, subject to the following conditions: (T)
 - a. No credit will be given for payments made during the formerly selected period. However, nonrecurring charges will not be reapplied.
 - b. The new payment period begins with the date requested.
 - c. A termination charge applies to the former payment period.
 - d. A Secondary Service Charge as specified in Section A4. will apply. (T)

C. Termination Liability

The Termination Liability applicable to Digital ESSX service is dependent upon the payment period selected by the customer. Termination charges for the optional payment periods are as follows:

1. Month-to-Month Payment Plan

- a. Digital ESSX-S Customers - No Termination Liability will be applicable.
- b. Digital ESSX-M Customers
 - (1) Within 12 months of date of installation - If a customer's Main Station Line count falls below 75% of the total main station lines initially installed, they will be charged 90% of the amount due for the period remaining up to 12 months from the date of installation for each line disconnected thereafter.
 - (2) Beyond 12 months of date of installation - No Termination Liability will be applicable.
- c. Digital ESSX-L Customers
 - (1) Within 12 months of date of installation - If a customer's main station line count falls below 90% of the total main station lines initially installed, they will be charged 90% of the amount due for the period remaining up to 12 months from the date of installation for each line disconnected thereafter.
 - (2) Beyond 12 months of date of installation - No Termination Liability will be applicable.

2. ESSX Term Payment Plan Option

- a. Digital ESSX-S, M and L customers that contract a portion of their system under the ESSX Term Payment Plan Option are subject to the following liability charges.
 - (1) Main Station Lines under contract - 90% of the remaining amount due for each main station line disconnected after the customer's total main station line count falls below 90% of the total main station lines initially installed or of the annually adjusted total.
 - (2) All non-contracted items - No Termination Liability will be applicable.

- 3. When a subscriber's Digital ESSX service under a Term Payment Plan is disconnected prior to the expiration of the selected service period as a result of a subscriber requested change to one of the separately *available* services listed following, termination charges will not apply when: (T)
 - a. the completed service period is 12 months, and
 - b. the service period of the new arrangement for the separately *available* service equals or exceeds the remaining service period of the disconnected service, and (T)
 - c. the service orders to install the separately *available* service and disconnect the existing service are related together and there is no lapse in service between installation of the separately *available* service and disconnection of the existing service, and (T)
 - d. the service orders are for the same subscriber at the same location.

A112.13 Digital ESSX Service - 85 (Cont'd)

A112.13.7 Common Rates and Charges

A. General

1. Station Lines

- a. The rates and charges specified herein for main station lines provide for main station line components. The main station line consists of all facilities including intercommunication outside plant facilities from the system dial switching equipment to the Network Interface of the main station line.
- b. The rates and charges specified herein for main station and extension station lines are applicable to each main station location and extension station location respectively to which a customer-provided instrument can be connected.
- c. (DELETED)
- d. End User charges as specified in the End User Common Access Service Section of FCC Tariff Number 61 apply as appropriate.
- e. Rates for the main station lines of Digital ESSX-S, M and L customers will be based on the following criteria:
 - (1) Main Station Group Size
 - (2) Wire Center Density Group
 - (3) Distance from the Serving Central Office
 - (4) The type of payment plan selected by the customer.
- f. The total main station group size will consist of main station lines and attendant access lines for all locations served by the same Digital ESSX system.
- g. Wire center density is based on the number of main stations and equivalent main stations per square mile served by that wire center.
- h. Wire center density groups are designated "A" and "B" with group "A" having the least density and "B" have the most density.

"A"	0 - 1200 Mains and equivalents/square mile
"B"	Over 1200 Mains and equivalents/square mile
- i. The distance band will be based on airline mileage from the serving central office to the Network Interface Location at the customer's premises.
 - (1) Where main stations are in a foreign exchange (FX) or a foreign central office (FCO) area the distance band will be calculated from the FX or the FCO to the Network Interface Location serving those main stations.
 - (2) Systems with more than one location served by the same Digital ESSX control group will calculate the distance band per location.
- j. In a different central office serving area of a multi-office exchange:
 - (1) The rate of Digital ESSX Service in a FX or FCO area is the monthly rate for the Digital ESSX service desired, plus a FX or FCO mileage charge as specified in Section A9. (T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.13 Digital ESSX Service - 85 (Cont'd)

A112.13.7 Common Rates and Charges (Cont'd)

A. General (Cont'd)

1. Station Lines (Cont'd)

j. In a different central office serving area of a multi-office exchange: (Cont'd)

(2) When Digital ESSX main station lines are connected by facilities which are routed between two or more central offices in the same exchange, the foreign central office mileage charge is calculated separately on an airline basis between the ESS central office from which the Digital ESSX system is served and the central office from which exchange service normally would be rendered.

k. Rates, charges, liabilities and additional *terms and conditions*, if applicable, may be developed on an individual basis for main station lines exceeding four (4) airline miles from the serving central office. (T)

l. Exchange Access

(1) Exchange Access is provided by means of Network Access Registers.

(2) Presubscription of a Carrier of Preference is specified in Section A13 of the Interstate Access Service Tariff.

2. Subsequent Training

After the initial installation of the subscriber's system, subsequent training will be provided at the charges indicated in A12.20.8.D. (T)

B. Nonrecurring Charges

1. The following nonrecurring charges for service are in addition to any applicable service connection, move, change and installation charges provided for in other sections of this *Guidebook*. (T)

- a. Service Establishment Charge (See A12.13.7)
- b. Feature Establishment Charges (See A12.13.7)
- c. Installation Charges (See A12.13.7)
- d. Service Connection Charges (See A12.13.7)

C. Recurring Charges

1. Common Equipment

A112.13.11 Optional Service Features

A. Access To Customer Provided Services¹

1. General

Rates and Charges for the appropriate channels as specified in Section B3. of the Private Line *Guidebook* apply to each access code arranged (originate or answer) for connection to customer provided features. (T)

All rates and charges specified herein are in addition to existing rates and charges for Digital ESSX and other services with which they are associated.

For Rates and Charges applicable for control channels when required for supervision purposes with equipment and/or apparatus located on customer premises, refer to Section B3. of the Private Line *Guidebook*. (T)

2. Rates and Charges

a. Access To

(1) Code Calling

	ESSX Term Option				Month

A112.13.11 Optional Service Features (Cont'd)

B. Attendant Features - Data Link Console Operation¹

1. General

Central office attendant console operation is offered where all console functions are performed at the expense of the subscriber utilizing customer provided compatible terminal equipment.

Customer provided compatible consoles may be provided only where the serving central office serving the Digital ESSX has been arranged for use with such consoles.

Control channels are required for various console optional features as indicated and are provided at the rates and charges specified in Section B3. of the Private Line *Guidebook*. (T)

The service establishment charge for Data Link Console operation includes the following attendant features provided the customer provided compatible terminal equipment meets the technical specifications as outlined for interface with the DMS 100.

- Attendant To Recorded Announcement
- Automatic Recall
- Call Hold
- Call Transfer
- Distribution of Calls
- Camp-On
- Flexible Console Alerting
- Lockout
- Secrecy
- Serial Call
- UCD/Console
- Interposition Transfer

The console subgroup service establishment charge for Data Link Console operation includes the following attendant features provided the customer provided compatible terminal equipment meets the technical specifications as outlined for interface with the DMS 100.

- Console Queue
- BusyTone/Announcement
- Multiple Console Operation

G. Station Message Detail Recording Via Revenue Accounting Office (RAO)

1. General

a. Station Message Detail Recording (SMDR) - RAO is an arrangement to provide a record, by main station line number, or originating intercity traffic routing over dial type tie lines, WATS, CCSA, other Common Carrier access lines and/or the MTS Network (Toll).

b. The station message detail will include the calling main station line number, the called number, date, time of day, duration of call and the type of facility used. The record will be provided on magnetic tape, to customers requiring message detail for cost allocation and telecommunications system management purposes. The detail will be provided on all facilities in routes selected by the customer for Station Message Detail Recording - RAO.

2. **Terms and Conditions**

a. Station Message Detail Recording (SMDR) - RAO may be offered to main station lines of customers where facilities permit and where the Company's message billing process has been arranged to provide this optional feature.

b. Station Message Detail Recording is not represented to be a provision of billing detail.

c. Station message details will be provided on magnetic tape. The tape density and number of tracks will be that used by the program and data processing system in use by the Company's accounting center furnishing the tape. The format may be changed to serve Company purposes and the customer will be responsible for making the tape compatible with his data processing equipment.

Note 1: Availability is based on the type of central office serving the subscriber.

I. Subsidiary System Arrangements

1. General

A Subsidiary System of a Digital ESSX system is a customer-provided system which is furnished PBX trunks from the central office serving the customer's Digital ESSX system and which is connected by the lines to that Digital ESSX system.

A Subsidiary System Arrangement provides station numbers which are in sequence with the main station line numbers of the customer' Digital ESSX system to the stations of one or more subsidiary systems.

2. Terms and Conditions

a. Subsidiary System Arrangement (SSA) station numbers are provided by the same central office equipment and facilities which furnish Direct-Inward-Dialing (DID) service and will only be furnished where adequate DID facilities are available in the central office serving the customer's system and where the subsidiary system is properly equipped for DID service.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.13 Digital ESSX Service - 85 (Cont'd)

A112.13.11 Optional Service Features (Cont'd)

I. Subsidiary System Arrangements (Cont'd)

2. *Terms and Conditions* (Cont'd)

- b. The PBX trunks of the subsidiary system are provided at the same rates and charges as specified for such trunks furnished from the central office serving the customer's Digital ESSX system. In addition, foreign central office or foreign exchange mileage charges are applicable to those trunks when the subsidiary system is located outside the area of that serving central office.
- c. The same rates and charges specified for DID service apply for SSA station numbers. Where more than one subsidiary system is involved, each subsidiary system is considered a separate service and the count of station numbers furnished will commence anew at each such system for the purpose of determining the applicable rates and charges.
- d. Tie lines connecting the Digital ESSX and subsidiary systems are provided at the same rates and charges as specified for Digital ESSX tie line terminals, tie lines, and tie line terminals in a customer-provided equipment system.
- e. SSA station numbers are furnished subject to the condition that all inward and outward local and toll network calling by subsidiary system stations be via the central office serving the customer's Digital ESSX system.
 - (1) Where the subsidiary system station's outward local and toll network calls are placed via tie lines and the network access registers of the Digital ESSX system, the charges for such calls are identified and billed as primary directory listing calls of the Digital ESSX system.
 - (2) Where the subsidiary system station's outward local and toll network calls are placed via PBX trunks, the charges for such calls are identified as primary directory listing calls of the Digital ESSX system.
- f. At the option of the customer, identification of outgoing toll network calls by SSA station number will be provided at the same rates and charges as specified for Identified-Outward-Dialing (IOD) service subject to the following conditions:
 - (1) The identification of outgoing toll calls by SSA station number will only be provided on calls routed via PBX trunks.
 - (2) Where more than one subsidiary system is arranged for the identification of outgoing toll calls by SSA station number, each system shall be considered a separate service and the count of connecting channels which serve as IOD trunks will commence anew at each system for the purpose of determining the applicable rates and charges.
- g. The Digital ESSX subsidiary system arrangement is provided solely for the furnishing of SSA station numbers to subsidiary systems for local and toll network and intercommunication calling and does not provide any of the basic of optional service features of Digital ESSX service to stations of the subsidiary systems.

3. Rates and Charges

a. Each Subsidiary System Arrangement

- (1) Direct-Inward-Dialing¹
- (2) Identified-Outward-Dialing²

Note 1: Apply rates and charges as specified in this *Guidebook* for DID service.

Note 2: Apply rates and charges as specified in this *Guidebook* for IOD service.

J. Automatic Route Selection - Basic

1. General

- a. Automatic Route Selection - Basic (ARS-B) is an optional feature, available where facilities permit that allows station users, by dialing a preselected code to automatically select the preferred route subscribed to by a customer for network calls. Alternate routing to other facilities subscribed to by the customer is also provided. This agreement is available for use with Foreign Exchange, WATS, CCSA off-net tie lines and Interexchange Carrier (IC) access lines which are compatible with ARS and the MTS network facilities.
- b. Automatic Route Selection - Basic is accessed by dialing a single code (1, 2 or 3 digits) which automatically selects the appropriate route (FX, WATS, CCSA off-net, tie line, IC access line or the MTS Network) to complete the call. If all facilities in the initial route selected are busy, the call will advance to other routes in the selected pattern. Patterns may consist of up to eight (8) private routes.
- c. For calls using FX, WATS, CCSA off-net or IC access line facilities, the routing may be based on a Number Plan Area (NPA) and limited to specified central office codes within the NPA as designated by the customer. This is referred to as Foreign Area Discrete Translation.
- d. Automatic Route Selection - Basic is a call routing capability and, therefore, all codes must be in a route for selection. Code blocking is not provided by this feature.

2. *Terms and Conditions*

- a. Automatic Route Selection - Basic is provided only in association with Digital ESSX Service central office equipment located on Company premises and may be provided, subject to the availability of facilities to ESSX systems which are served by the same such equipment.
- b. Preferred routes and alternate routing patterns will be specified by the customer.
- c. All rates and charges specified for Automatic Route Selection - Basic are in addition to the rates and charges for the associated facilities.
- d. The number of patterns required by a customer are governed by the type and variety of facilities to which the customer subscribes.

Note 1: Apply rates and charges as specified in Section A3. for PBX trunks.

Note 2: Apply rates and charges as specified in other sections of this *Guidebook* for tie line terminations tie line mileage, etc., as appropriate.

Note 3: Apply rates and charges as specified in Section A112.12.7 for USOC: ETM.

K. Queuing

1. General

a. Queuing permits main station line users to be placed in a queue whenever the first choice route for completing a particular call is already in use. Two queuing arrangements are available.

(1) Off-Hook Queuing (OHQ), the calling main station line remains off-hook and is held in queue until a facility becomes available.

(2) Call-Back Queuing (CBQ), the calling main station line goes on-hook and is called back when a facility becomes available.

2. *Terms and Conditions* (T)

a. Queuing may be provided in conjunction with ARS-Basic or as a stand-alone option for outgoing exchange calls.

b. Queuing will be offered on a per facilities permit basis and may not be available from all central office types.

N. Station Message Detail Recording - Premises

(Obsoleted 10-05-92, Type 4) Not available for new subscribers to this feature. Subsequent additions, deletions, and/or rearrangements to an existing system under contract are permitted, subject to the capacity of the central office from which it is provided. Customers paying obsoleted contract rates and charges may continue to do so until their contract period expires or they subscribe to the new restructured Station Message Detail Recording (SMDR) feature located in Section A12. and new Station Message Detail - Premises function located in Section A32. Customers paying obsoleted month-to-month rates and charges may do so until they subscribe as detailed above or until May 1, 1994, at which time they must subscribe to the new offerings.

(T)

1. General

a. Station Message Detail Recording - Premises (SMDR-P) is an arrangement to provide a record, by main station line number, of originating traffic routing over local lines, tie lines, WATS, Interexchange Carrier access lines and/or the toll network.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.13 Digital ESSX Service - 85 (Cont'd)

A112.13.11 Optional Service Features (Cont'd)

N. Station Message Detail Recording - Premises (Cont'd)

1. General (Cont'd)

- b. The station message detail will include the calling main station line number, the called number, connect time and date, call duration, facility used, disconnect time, digits outpulsed by switch, and end of dialing. SMDR-P data provided to customers using the ETS feature will include incoming facility identification, outgoing facility used, midnight passed, prefix digits, interLATA carrier, ARS, ARS-D, or ARS-B pattern group, and call event code where these features are *available via guidebook*. (T)
- c. Station Message Detail Recording - Premises (SMDR-P) is designed for either an ETS or non-ETS ESSX service customer.
- d. The SMDR-P data may be delivered as Dial-In/Dial-Out, asynchronous or synchronous, or Direct Output. In Dial-In/Dial-Out asynchronous, the data may be delivered to a customer's collection device via DDD facilities or an ESSX service main station line. The delivery can be initiated by a customer call or can be initiated by the application processor software as specified by the customer. In Dial-In/Dial-Out synchronous, the data may be delivered to a customer's collection device over DDD facilities or an ESSX service main station line. The two methods of delivery are Direct File Transfer and Remote Job Entry.

Direct Output is similar to Dial-In/Dial-Out in delivery modes. The Direct Output requires a dedicated port on the application processor and a dedicated modem. Also, a two or four wire facility will be required.

- e. The SMDR-P data provided may be delivered to the customer as raw data.

2. Terms and Conditions (T)

- a. The Station Message Detail Recording - Premises (SMDR-P) may be offered on ESSX service main station lines of customers where facilities and technology permit.
- b. Customers provided premises equipment is required. Channel charges specified in the Private Line *Guidebook* for a Voice Grade Local Channel also may apply. (T)
- c. Station message detail will be provided through the use of telephone central office equipment that will interface with the appropriate type line connections as specified by the customer.
- d. During collection or distribution of the customer's SMDR-P data, if data is destroyed, the Company shall not be liable, directly or indirectly, for damages, unless caused by the negligence of the Company in failing to maintain reasonable standards of maintenance and inspection and to exercise reasonable supervision.

3. Rates and Charges

A112.13.12 Telephone Numbers and Facilities Reserved for Future Use (See A12.13)

A112.13.13 Digital ESSX Customer Administration Service

A. General

1. The Digital ESSX Customer Administration Service (DECAS) feature permits Digital ESSX customers to activate/deactivate selected optional features, change certain service options, and change feature configurations on predesignated Digital ESSX station lines. Customer provided terminal equipment is required for the operation of the DECAS feature.
2. For DECAS equipped station lines, DECAS allows the customer to verify and/or display the assignment of features on a single station line, range of station lines or all station lines to determine which station or stations have a particular feature or service option.
3. Certain Digital ESSX station lines may be specified by the customer to be exempt from this feature. Additionally, the Company reserves the right to make station lines inaccessible for DECAS.
4. Changing the status of a station line from accessible to DECAS to inaccessible or vice versa, must be done by the Company via a Service Order request. A *Secondary* Service Charge specified in Section A4 applies. (T)

Note 1: Appropriate Private Line charges apply.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.13 Digital ESSX Service - 85 (Cont'd)

A112.13.13 Digital ESSX Customer Administration Service (Cont'd)

A. General (Cont'd)

5. The Company has made the following provision to protect the integrity of the switching system database and to ensure the security of DECAS changes.
 - a. A DECAS customer's change, display or verify capabilities are restricted to that particular customer's own Digital ESSX system.
 - b. All changes are audited as they are entered by the DECAS customer. Invalid changes will not be accepted. An error message detailing which command is in error will be given.
 - c. Customer access to the database is protected using a dialup, login, password/dialback arrangement.
6. A DECAS customer can schedule changes (individual or bulk) for completion by the next business day or for a future business day. Additionally priority changes may be requested and the changes completed the same day subject to ***Terms and Conditions*** in A112.13.13. (T)
7. Definitions pertaining to DECAS/Digital ESSX features are specified in A12.13.3. (T)
8. The DECAS feature allows the customer to perform the following transactions from the customer provided terminal.
 - a. Change particular service options on a per station basis and exchange station telephone numbers (TNs). The change capabilities are:
 - (1) Line Status (Active/Inactive)¹
 - (2) Call Pickup Group: The call pickup group to which a station is assigned can be changed on a per station basis
 - (3) The Forward to Number can be changed for a station line with CFBL and/or CFDA assigned
 - (4) Series Completion "Hunt To" Telephone Number (TN): The "hunt to" TN assigned to a station line can be changed on a per station basis²
 - (5) Station TN Rearrangement: Swap TNs from one location to another
 - (6) Access Line Class of Service
 - (7) Add/Change Customer Entered Listing Information
 - (8) Station Controlled Conference Type
 - (9) Call Transfer Type
 - (10) Suspension Treatments
 - (11) Restriction Codes
 - (12) Speed Call Group: The Speed Call Group to which a station line is assigned can be changed on a per station basis.

Note 1: Station lines made inactive using DECAS will continue to be billed at the ***guidebook*** rates. (T)

Note 2: All numbers in series completion hunt must be in the same customer group.

EFFECTIVE: February 28, 2006

d. A DECAS customer may also print the following administrative reports. (Cont'd)

The following information is included on all DECAS changeable station lines.

- Station Telephone Number
- Name¹
- Organization¹
- Location¹

e. Initial training of the customer for up to four (4) system managers in the use of this feature is included at the time the feature is put into service. Communications counselor training is a prerequisite to the DECAS system manager training. Any customer training or subsequent assistance necessary after the initial establishment of the feature is at the option of the customer and a Subsequent Training Charge applies per hour where such training is provided.

B. *Terms and Conditions*

1. DECAS is provided only with Digital ESSX systems served from a Digital central office and is furnished subject to the availability of facilities.
2. Customers equipped for DECAS must order via a Service Order² DECAS changeable features in groups of five (5) at the rates specified in A112.13.13.
3. Non-DECAS changeable features will be added subject to the specifications and rates in A112.13.8, A112.13.9, or A112.13.10 as appropriate.
4. Features for DECAS exempt station lines must be requested via a Service Order² and added by the Company. Rates and Charges for the features specified in A112.13.8, A112.13.9, or A112.13.10 apply as appropriate.
5. The customer provided DECAS terminal equipment requires a Digital ESSX main station line. Rates and charges in A112.13.8, A112.13.9, or A112.13.10 apply as appropriate.
6. DECAS changes must be entered prior to times to be designated by the Company to be completed as priority changes or by the next business day as requested by the customer.
7. A DECAS customer cannot activate features in excess of the quantity that has been ordered from the Company. The customer will receive an indication on the terminal screen when 100 percent utilization of a feature is reached. To add additional quantities will require a Service Order.²
8. Contractual obligations and End User Common Line Charges will be billed to the location where originally installed and will not transfer with a station line number rearrangement.
9. If the Company is requested to load DECAS changeable features for new Digital ESSX/DECAS customers, the Installation Charge specified in A12.13.13 applies per feature loaded.
10. The following types of lines will be restricted from Station TN Rearrangement capability. Service options and feature change capabilities will still be available except on lines assigned to multiline hunt groups.

Note 1: The DECAS customer is responsible for entering and updating the information contained in this field.

Note 2: Appropriate Service Charges specified in Section A4 will apply.

(T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.13.13 Digital ESSX Customer Administration Service (Cont'd)

B. Terms and Conditions (Cont'd)

10. (Cont'd)

- Station lines assigned to multiline hunt groups.
- Attendant Lines
- Any Digital ESSX line which has a special hardware configuration (e.g., ground start lines and lines having SCAN points or signal distribution points)
- Manual lines (e.g., station lines with full originating and/or terminating restrictions)

11. DECAS changeable features added by the Company at the customer's request will be subject to the appropriate Service Charges specified in Section A4. and the per line charges specified in A112.13.13.C.
12. Any required changes in customer provided equipment as a result of growth, desired enhancements or technological advancement, will be the responsibility of the DECAS customer. Compatibility with customer provided station terminal equipment is not guaranteed.
13. The DECAS customer is responsible for assigning and maintaining a record of station feature assignments. The DECAS customer also agrees to provide the Company with a central point of contact for inquires and/or trouble reports involving station features.
14. DECAS customers will be responsible for initiating a Service Order to correct any information pertaining to Listings that changed as a result of a DECAS TN swap. The appropriate Service Charges specified in Section A4. apply. (T)
15. DECAS customers will be limited to one (1) TN swap per day as a priority request. The number of feature changes that can be requested as priority changes will be determined by the Company when DECAS is ordered.

C. Rates and Charges

1. Digital ESSX-L customers will have the option of paying for DECAS on either a per system or a per line basis. Customers choosing to pay on a per system or a per line basis will be subject to the rates specified in A112.13.13.C. The installation charge will be reapplied if a Digital ESSX-L customer changes their DECAS billing arrangement subsequent to the installation of the DECAS feature.

A112.14 Electronic Tandem Switching Features - 85

Obsoleted 07-10-89, Type 4. This service is not offered for new installations after 07-10-89, except where a letter of intent was signed prior to 07-10-89 and the service is to be installed on or before 01-10-90. Subsequent additions to an existing system, under contract, are permitted. Additionally, a system under contract may be moved to another *Company* location within the State of Georgia. Customers paying obsoleted rates and charges will continue to pay obsoleted rates and charges until their payment period expires.

(T)

A112.14.1 General

Electronic Tandem Switching (ETS) Features are provided only in association with ESSX Service furnished from No. 1 Electronic Switching System (ESS) central office equipment located on Company premises and may be provided, subject to the availability of facilities, to ESSX systems which are served by the same such equipment.

Note 1: Applicable only to Speed Calling - Long, Group.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.14 Electronic Tandem Switching Features - 85 (Cont'd)

A112.14.2 Terms and Conditions

(T)

A. Explanation Of Terms

1. ETS Features

- a. ETS Features are offered where the ESS central office is equipped to provide the following:

- Automatic Route Selection - Deluxe
- Facility Restriction Levels
- Time of Day Routing
- Authorization Codes
- Deluxe Queueing
- Station Message Detail Recording to Premises
- Facility Administration and Control
- Traffic Data to Customer (Pollable)
- Facility Assurance Reports
- Uniform Numbering
- Automatic Alternate Routing
- Overflow

2. Automatic Route Selection-Deluxe (ARS-D)

ARS-D provides for the origination of only ten digit off-network calls to a public network telephone number, after the ESSX ARS-D access code, (e.g., "8"), automatically scans the digits and selects a first choice completing route when available, or subsequent route if the first choice route is not available. Routes may include Foreign Exchange Trunk lines, Wide Area Telephone Service lines, exchange trunk lines to the toll network or access lines to CCSA or other arrangements where compatible.

The final completing route may be the toll network or, at the option of the customer, the call attempt is routed to overflow tone if a Facilities Restriction Level (FRL) is insufficient to complete the call.

When ARS-D is provided in conjunction with Uniform Numbering/Automatic Alternate Routing (UN/AAR), incoming tie lines from other ESSX or PBX systems connected directly to the ESSX System may be arranged to have automatic access to the ARS-D and UN/AAR features. When such arrangements are provided, the tie lines to the ARS-D become "dedicated" tie lines and separate tie lines are required from the distant ESSX or PBX System if access is to be provided to other ESSX functions at the ARS-D equipped ESSX System. In addition, when ARS-D is provided in conjunction with UN/AAR, routes may include tie lines to a distant ESSX or PBX System equipped with an ARS-D like capability for subsequent access to the toll network.

The ARS-D feature provides all number translation and supervision necessary to route the call. "More Expensive Route" (MER) Tone is supplied, at the option of the customer, as a function of the route selected for a particular call.

Time of Day (TOD) Routing - TOD Routing is an ARS-D option which permits preprogrammed selection of alternate routing pattern groups for off-network calls (up to three sets of ARS-D routing pattern groups) on a time-of-day and day-of-week basis. Manual override is available with the Facility Administration and Control feature. The maximum number of programmed changes per week is sixteen.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.14 Electronic Tandem Switching Features - 85 (Cont'd)

A112.14.2 Terms and Conditions (Cont'd)

(T)

A. Explanation Of Terms (Cont'd)

3. Facilities Restriction Levels (FRL)

FRL is required in connection with ARS-D and is provided on each main station line and incoming tie line to determine both the types of calls and types of facilities within the privileges of the associated user. When the FRL is transmitted over a tie line to a distant PBX or ESSX System equipped with ARS-D (for call screening at the distant point), it is identified as a Traveling Class Mark (TCM).

Authorization Codes - Authorization Codes are an FRL option which provides for a main station line user to dial a code which overrides the FRL associated with that main station line or incoming tie line. The ESSX requests dialing of the authorization code when the default FRL (i.e., the FRL associated with the main station line or incoming tie line) has insufficient privileges to complete the call. The Authorization Code is also inspected for validity as a security check. The Authorization Code is recorded in the SMDR-P record of the call when the SMDR-P feature is provided.

4. Deluxe Queueing

Deluxe Queueing permits main station line users to be placed in a queue whenever the first choice route for completing a particular call is already in use. Two queueing arrangements are available;

- A Ring-back Queue (RBQ), in which case the calling main station line goes on-hook and is called back when a facility becomes available.
- An Off-hook Queue (OHQ), in which case the calling main station line remains off-hook and is held in queue until a facility becomes available.

Calls held in queue beyond a predetermined time limit will be removed from the queue and be routed, at the option of the customer, via either subsequent route choices or to overflow tone.

5. Station Message Detail Recording to Premises (SMDR-P)

SMDR-P provides a record, on magnetic tape equipment located at the customer's premises, of calls originating from ESSX main station lines to locations outside the same ESSX System. Facility groups may also be designated as requiring originating and/or terminating records.

6. Facilities Administration and Control

Facilities Administration and Control permits customer control of parameters which determine user calling privileges; i.e., Authorization Codes and associated FRL. In addition, FRL associated with main station lines, tie lines and Authorization Codes may be collectively upgraded or downgraded by invoking a predetermined set of FRL's identified as Controlled Alternate FRL's. Manual control (override) of TOD Pattern Groups and activation or deactivation of queueing is also provided.

7. Traffic Data to Customer (Pollable)

Traffic Data to Customer (Pollable) permits the customer to poll the switching equipment on a daily or hourly basis to obtain certain traffic measurements. Equipment must be provided at the customer's premises to record the traffic data.

Facility Assurance Reports (FAR) provide the customer the ability to obtain automatic circuit assurance data via the same equipment utilized to record traffic data. FAR includes, for example, the identity of facilities not accessed or facilities constantly off-hook during a specified period of time.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.14 Electronic Tandem Switching Features - 85 (Cont'd)

A112.14.2 Terms and Conditions (Cont'd)

(T)

A. Explanation Of Terms (Cont'd)

8. Uniform Numbering/Automatic Alternate Routing (UN/AAR)

UN permits main station line users to place calls via tie lines using a uniform dialing plan. The user dials an access code, followed by a seven digit number which uniquely identifies a specific on-network main station line. The number consists of a three digit location code and a four digit main station line code. (When the same access code is followed by a ten digit public network number, the call is routed via the ARS-D feature.) The feature provides the number translation and supervision necessary to route the call.

AAR provides automatic routing of on-network calls to alternate tie line routes when primary tie line routes are busy.

Automatic Overflow to DDD - Automatic Overflow to DDD provides completion of on-network calls via the toll network when all primary and alternate tie line routes are busy.

B. Automatic Route Selection-Deluxe (ARS-D)

1. ARS-D is only furnished in association with FRL.

2. Preferred routes and alternate routes in patterns will be specified by the customer.

3. A maximum of three ARS-D Pattern Groups with a maximum of sixty-four patterns in each Pattern Group will be provided. The three Pattern Groups referred to will consist of one primary and two additional Pattern Groups for TOD routing.

4. A maximum of ten routes are provided in a pattern.

5. Each WATS band is treated as a separate route.

6. A maximum of sixty-four Number Plan Areas (including the home NPA) may be designated by the customer for routing of calls by central office codes (six digit translation).

7. All rates and charges specified for ARS-D are in addition to the rates and charges for the associated facilities and facility terminations.

8. A single rate "per facility terminated in patterns" will apply regardless of the number of patterns having access to that facility. The monthly rate specified is applicable to each facility available to the patterns.

9. The charges specified in A112.14.3 Rates following for each code addition or change is applicable whether customer or Company initiated.

10. The TOD Routing feature permits up to sixteen programmed changes in Pattern Groups per week. When additional ARS-D patterns are required due to TOD changes, rates and charges as specified in A112.14.3 Rates following apply to each additional pattern.

11. CCSA access lines (off-net calls) and access lines to other similar arrangements, compatible with ARS-D, may be included as routes in patterns.

12. ESSX toll diversion and restriction does not function on calls routed via ARS-D.

C. Facilities Restriction Levels (FRL)

1. FRL is only furnished in association with ARS-D.

2. A maximum of eight Facilities Restriction Levels is available for each ESSX-1 System.

3. A maximum of twenty thousand Authorization Codes is available for each ESSX-1 System.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.14 Electronic Tandem Switching Features - 85 (Cont'd)

A112.14.2 Terms and Conditions (Cont'd)

(T)

C. Facilities Restriction Levels (FRL) (Cont'd)

4. Authorization Codes must consist of a uniform number of digits, with a minimum of three digits and a maximum of six digits.
5. Customer implementation of change of Authorization Codes or associated Facilities Restriction Level requires the Facilities Administration and Control Feature.
6. All main station lines and incoming tie line terminations with access to ARS-D must be equipped with FRL.

D. Deluxe Queueing

1. Calls in queue may overflow to subsequent routes or to tone at the customer's option.
2. Deluxe Queueing is available with facilities appearing as the primary (first choice) route in ARS-D or UN/AAR patterns.
3. The text and announcement provided with the Recorded Announcement option will be provided by the Company.
4. The music for the Music-On-Queue option must be provided by the customer.
5. The Music-On-Queue option requires a voice grade channel between the central office and the customer-provided music source at the customer premises. This feature is available only with OHQ.
6. Customer must specify the length of time a call is held in queue (threshold time limit) before overflowing to subsequent routes or to overflow tone.
7. Incoming tie lines can be arranged for OHQ only.
8. ESSX main station lines can be provided either RBQ or OHQ. All such main station lines must be equipped with the same type queueing.
9. OHQ must be equipped for either Recorded Announcement or Music-On-Queue.

E. Station Message Detail Recording To Premises (SMDR-P)

1. SMDR-P is not represented to be a provision of billing detail.
2. Station message detail records will be provided on terminal equipment located at the customer's premises at the rates and charges specified in A112.14.3 following.
3. The customer must provide compatible equipment located at his premises to record the SMDR-P Data .
4. Processing of message detail information (SMDR-Basic) by the Company's accounting center is not provided with this arrangement.
5. The customer must designate all main station lines in a No. 1 ESS customer group and/or selected facility groups on which SMDR-P originating and terminating records are to be provided.
6. Additions or deletions of SMDR-P recording are provided by Company service orders.
7. Where SMDR-P is provided, a detailed record may be made for each completed call. At the option of the customer, arrangements can be made to provide records of calls attempted as well as calls completed. Under certain exceptional conditions, with SMDR-P, calls may be processed without recording the call detail.
8. SMDR-P includes the recording of Account Codes and Authorization Codes where these optional features are provided.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.14 Electronic Tandem Switching Features - 85 (Cont'd)

A112.14.2 Terms and Conditions (Cont'd)

F. Customer Administration And Control

1. Customer Administration and Control Features are comprised of either or both the Facilities Administration and Control ETS optional feature and the Traffic Data to Customer (Pollable)/FAR ETS optional feature.
2. Traffic Data to Customer (Pollable)/FAR may be provided to No. 1/1A ESS-served ESSX Systems which are not equipped with the ETS features of ARS-D and FRL.
3. A business exchange line termination in each No. 1/1A ESS accessed is required. Rates and charges for a business exchange access line apply for each such termination provided.
4. Facilities Administration and Control provides:
 - a. Select ARS-D patterns groups and determine status.
 - b. Activate/deactivate queueing and determine status.
 - c. Change Authorization Codes and associated FRLs.
5. Traffic Data to Customer (Pollable) provides:
 - a. FAR reports listing trunks not accessed and all trunks constantly off-hook in the previous two hours.
 - b. Traffic data reports on trunk groups and queues.

G. Uniform Numbering/Automatic Alternate Routing (UN/AAR)

1. All calls must consist of a seven digit called number, after the access code or after the access code and Account Code (where this option is provided).
2. The customer must specify the first choice route and each subsequent route to each ESSX or PBX System involved.
3. The customer must notify the Company when any change in route or routing sequenced is desired.
4. The maximum number of routes in a pattern is four.
5. The maximum number of patterns is one hundred-eighty.
6. Where calls are routed via the toll network, the rates and charges specified for Automatic Overflow to DDD, PBX Exchange Trunks, and toll messages are applicable.
7. The rates and charges specified in A112.14.3 Rates following apply per tieline facility terminated in UN/AAR and/or ARS-D patterns apply once per facility, whether terminated in one or both patterns.

A112.16 (DELETED)

(D)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.17 Prestige Communications Package (PCP)

(Obsoleted December 15, 1989, Type 4)

Obsolete Service Offering. Not available for new installations or on transfers of service to a new location. Existing PCP customers may request feature changes and additions or line additions at the rates specified in this section. If the customer requires features not found in A112.17 that are available from A12.16, the entire PCP billing will be converted to rates specified in A12.16.

A112.17.1 General

- A. PCP is a central office communications system package provided in association with individual line exchange Business services furnished from Electronic Central Office equipment located in Company buildings. It is offered as a customer option and may be provided subject to the availability of facilities to individual service lines except services provided through No. 1 or 1A ESS remote switching systems (RSS). All exchange lines in a PCP system must have the same billing arrangement, i.e., must be either flat or measured service. (C)
- B. PCP service is offered in two categories, PCP I and II. PCP I provides for a system accommodating from two to six central office lines. PCP II provides for a system accommodating from seven to thirty central office lines. PCP II is offered only in conjunction with Individual Business Line service. The billing record of toll calls on lines using PCP service will not be affected by the application of the features of this service. Intercom calls between exchange lines in the same PCP system will not incur local usage charges.
- C. A customer may choose to combine exchange access lines terminating at different locations into a single PCP system. All exchange access lines terminating in a PCP system, however, must be served by the same central office.
- D. Six PCP features, Intercom, Call Pickup, Call Hold, Call Waiting, Call Forwarding Variable and Convenience Dialing, are not available to lines utilizing dial pulse signaling. All PCP features are available to lines utilizing Touch-Tone signaling. The rates and charges for Touch-Tone service are in addition to PCP rates and charges.
- E. The quality of transmission for calls utilizing PCP Call Forwarding Variable or Conferencing may vary depending on the distance and routing involved. The Company makes no representation as to the quality of the transmission on such calls.
- F. PCP standard and optional features are not compatible with existing Custom Calling Services, described in Section A13.
- G. An upgrade from PCP I to PCP II service or a downgrade from PCP II to PCP I service is allowed at rates and charges as specified in A112.17.3.C.2. as appropriate. An upgrade from Prestige Single Line Service (PSLS) to PCP I or PCP II service or a downgrade from PCP I or PCP II to PSLS is allowed at rates and charges as specified in A112.17.3.C.2. as appropriate.
- H. Suspension of PCP service is not allowed.
- I. Feature availability and/or operation may vary depending upon the type of central office serving the PCP system and or the current generic program available in the central office.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.17 Prestige Communications Package (PCP) (Cont'd)

(O)(T)

A112.17.2 Service Description

(O)(T)

A. Standard Features

(O)

1. Intercom

(O)

A user of a PCP I equipped line can dial up to five other lines in the same PCP system by dialing an access code followed by two digits. A user of a PCP II equipped line can dial up to twenty-nine other lines in the same PCP system by dialing an access code followed by two digits. Two user stations with the same line number cannot access each other utilizing the Intercom feature.

(O)

2. Call Hold

(O)

A user of a PCP line can place any established call on hold by flashing the switchhook and dialing a code. This frees the line to originate another call or use the call pickup feature.

(O)

3. Call Pickup

(O)

This feature enables a user of a PCP line to answer a call which has been directed to another line in the PCP system by dialing a code.

(O)

If more than one pickup group per PCP system is required, rates and charges as specified in *A112.17.3.A.2.d.* for additional call pickup groups apply as appropriate.

(O)(T)

4. User Transfer

(O)

The user of a PCP line can transfer any incoming call or intercom call to another line within or outside the PCP system.

(O)

5. Conferencing

(O)

The user of a PCP line can hold an in progress call and complete a second call while maintaining privacy from the first call. In addition, the user of a PCP line may choose to add on the previously held call into a three-way conference.

(O)

B. Optional Features

(O)

1. Call Waiting

(O)

This feature provides a tone burst alert to a PCP user who is on an existing call that another call is waiting. Call waiting may be provided on individual lines that are not in rotary (arranged for hunting) or on the last line in a rotary hunt group.

(O)

2. Call Forwarding Variable

This feature automatically transfers all calls made to the subscribing line to a different line, within or outside the PCP system.

(O)

(O)

3. Convenience Dialing

a. PCP I or II Convenience Dialing

(O)

This feature allows a user of a PCP line to abbreviate dialing patterns for frequently called and emergency numbers. By dialing an access code followed by one digit, a customer can dial up to 6 preprogrammed numbers. All lines in a PCP system may be provided with their own 6-number list.

(O)

(O)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.17 Prestige Communications Package (PCP) (Cont'd)

A112.17.2 Service Description (Cont'd)

B. Optional Features (Cont'd)

4. Alternate Answering

This feature automatically transfers incoming or intercom calls that encounter a don't answer condition after a preselected number of rings (from 1 to 7) on the subscribing PCP line to an alternate designated line within the PCP system. Because of technical limitations, the actual number of ring cycles before a don't answer call is transferred may vary slightly from the preset value. The number to which calls are transferred and the approximate number of ring cycles before a don't answer call is transferred are specified by the customer at the time the feature is ordered. This feature is in operation on a continuous basis and cannot be activated or deactivated by the customer. Changes to the feature must be requested from the Company by service order.

A112.17.3 Rates and Charges

The following rates and charges are for PCP service only and are in addition to the applicable service charges, monthly rates and nonrecurring charges for exchange access lines and other services or equipment with which they are associated.

A. Monthly Rates

1. PCP Standard Features¹

a. PCP I Service

	Feature Establishment Charge	Monthly Rate	USOC
(1) (DELETED)			
(2) Business Service

 - (7) Downgrades from PCP I or PCP II service to PSLs.

A112.18 Prestige Single Line Service (PSLS)

(Obsoleted December 15, 1989, Type 2)

A112.18.1 General

- A. PSLS provides central office calling features for Business Flat, Measured or Message Rate Services and is furnished only from central offices equipped to provide this service. It is offered only on a single exchange line basis as a customer option and is provided subject to the availability of facilities. PSLS is not available for lines equipped with Rotary (Grouping) arrangements, ESSX service or Coin Telephone Services. Custom Calling Service (CCS) options specified in Section A13 are not compatible with PSLS and may not be combined with PSLS features on the same line. (C)
- B. The billing record of any local or toll calls on lines using PSLS will not be affected by the application of the features of this service.
- C. Four PSLS features: Call Hold, Call Forwarding, Convenience Dialing and Speed Dial-Thirty are not available to lines utilizing dial pulse signaling. All PSLS features are available to lines utilizing Touch-Tone signaling. The rates and charges for Touch-Tone service are in addition to PSLS rates and charges.
- D. The quality of transmission for calls utilizing PSLS's User Transfer, Call Forwarding or Conferencing features may vary depending on the distance and routing of the calls involved. The Company makes no representation as to the quality of the transmission of such calls.
- E. Suspension of PSLS service is not allowed.
- F. The initial service period for PSLS is one month commencing with the date of installation of the service.
- G. Feature availability and/or operation may vary depending upon the type of central office serving PSLS and/or the current generic program available in the serving Electronic Central Office.

A user of PSLS can place any established call on hold by flashing the switchhook and dialing a code. This frees the line to originate another call.

2. User Transfer

A user of PSLS can transfer an incoming call to another exchange line.

3. Conferencing

The user of PSLS may hold an in-progress call and complete a second call while maintaining privacy from the first call, or may add on the previously held call for a three-way conference.

B. Optional Features

1. Call Waiting

This feature provides a tone burst alert to a PSLS line user who is on an existing call that another call is waiting.

2. Call Forwarding

This feature provides a PSLS user the ability to have all incoming calls forwarded to a different telephone number by dialing a code and the telephone number where calls are to be forwarded.

3. Convenience Dialing

This feature provides a PSLS user the ability to place a call by dialing a code plus one digit to any one of six telephone numbers preprogrammed by the customer.

4. Speed Dialing-Thirty

This feature is available in certain offices where PSLS is offered. When available, this feature provides a PSLS user the ability to place a call by dialing a code plus two digits to any one of thirty telephone numbers preprogrammed by the customer.

A112.18.3 Rates and Charges

The following rates and charges are for PSLS only and are in addition to the applicable service charges, monthly rates and nonrecurring charges for the exchange access line and other services or equipment with which it is associated.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.20 MultiServ Service

A112.20.1 General

- A. MultiServ service provides an arrangement of switching equipment and station lines for intercommunicating among the station lines and for connection through the local and long distance message network to other subscribers on a dial basis. MultiServ service is furnished from 1AESS, DMS-100, 5ESS and EWSD[®] central office equipment located on Company premises and associated facilities arranged to provide the following basic service capabilities/features:
1. Exchange and long distance message network calls may be made to main stations by dialing the number associated with that main station line or attendant position.
 2. Exchange and long distance message network calls may be made from main stations via direct outward dialing.
 3. Station-to-station intercommunication via two to seven-digit dialing between stations of the subscriber's system.
 4. Outgoing long distance message calls dialed by a main station will be identified by the seven-digit station number. Only calls billed to the subscriber by the Company will be provided this identification.
 5. Basic station line hunting.
 6. Touch-Tone service.
 7. Common recorded announcement interception of calls to unassigned station numbers.
 8. Unconditional Satisfaction Guarantee.
- B. MultiServ service will be furnished to subscribers requesting one (1) or more main station lines served by the same central office equipment.
- C. A subscriber's system may be comprised of the following components:
- Station Links
 - Feature Groups
 - Optional Capabilities
- D. Subscribers to ESSX service from DMS-10, 2BESS and Stromberg Carlson offices will be allowed to retain their service until the central office is converted to a MultiServ service supported switch type or until their ESSX service period of rate stability expires. If the central office is converted to a MultiServ service supported switch type prior to expiration of the ESSX service payment period, conversion may proceed as in A112.20.5 following.

A112.20.2 Terms and Conditions

- A. MultiServ service is furnished subject to the availability of facilities and features from central office equipment located in a central office building owned or leased by the Company. The service allows for normal station activity including incidental additions and deletions.
- B. Each system established must consist of a minimum of one (1) main station line.
- C. Main station lines will be comprised of the Station Link (or equivalent) and Feature Groups which include access to the serving central office equipment. Access to the exchange network will be included in the Station Link.
- D. MultiServ service systems must include exchange access and main station lines.
- E. MultiServ service will not be offered in a manner which provides for intercommunication only.
- F. Facilities may be used for direct connections between a subscriber's MultiServ service and other systems primarily for communication between stations of the two systems. Rates and charges for these connection facilities are specified in either Section A13. or Section B3. of the Private Line *Guidebook*. Private facility access charges apply. These facilities, connecting MultiServ service, may be arranged to provide completion of incoming or outgoing exchange and long distance message network through the subscriber's MultiServ service system to or from other systems, provided such connections to the exchange or long distance message network are only made one system at a time.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.20 MultiServ Service (Cont'd)

A112.20.2 Terms and Conditions (Cont'd)

- G.** Feature Groups as listed in A112.20.10 may require customer-provided compatible terminal equipment.
- H.** If the subscriber of MultiServ service has a Message Rate service, usage charges as specified in Section A3. are applicable on calls to locations outside the subscriber's system in addition to rates and charges in this and other guidebook sections for MultiServ service and other associated services. Usage charges are not applicable on calls originated and terminated within the same MultiServ service system, unless the system is equipped with Assumed Dial '9'.
- I.** Suspension/Denial of Service - MultiServ service may be suspended or denied at the subscriber's request or at the instance of the Company.
 1. Suspension at the request of the subscriber will be allowed on the link portion of the main station line at 50 percent of the rate regularly charged. Feature Groups and optional Features outlined in Section A12. will be suspended at no recurring charge during the period of suspension unless otherwise noted. Other rules and restrictions as outlined in Section A2. apply. The subscriber may request this suspension for a maximum of three months in succession. Charges for restoration will be applicable per line as specified in Section A4.
 2. Denial at the instance of the Company will be allowed for non-payment of rates and charges for MultiServ service and the associated services. Restoration charges will be applicable per line as specified in Section A4.
- J.** Listings will be furnished subject to the rates, terms and conditions specified in Section A6. (T)
- K.** Service charges, as specified in Section A4., apply to each station link in the same manner as for an individual business line and to all of the subscriber's systems unless otherwise indicated.
- L.** MultiServ service installation charges are due on initial installation unless arrangements are made for Installment or Deferred Billing as specified in Section A2.
- M.** End User Charges as specified for End User Common Access Service in BellSouth Telecommunications Inc., FCC No. 1, Section 4 apply per line. For purposes of application of End User Charges only, MultiServ service station lines for use by residents of dormitory living quarters, barracks and nursing homes will be considered residential service. Main station lines terminated in such housing for administrative or business use will be considered business service.
- N.** Concessions will not apply to MultiServ service except those allowed to Corporate Communication/Affiliate Billing MultiServ service accounts.
- O.** Service charges will not apply for the provision of Calling Number Delivery Blocking.
- P.** During collection or distribution of the subscriber's ACD-NMR and/or Switch-Computer Application Interface (SCAI) Link data, due to faults or defects in telephone equipment, data may be destroyed. The Company shall not be liable, directly or indirectly, for damages, except as outlined in A2.5.1.
- Q.** Customer Premises Equipment (CPE) and software for use with ACD and/or Switch-Computer Application Interface (SCAI) Link is the responsibility of the user for provisioning. The Company shall not be responsible if changes in any of the equipment, operations, or procedures of the Company utilized in the provision of ACD Service render any facilities provided by the customer obsolete, or require modification or alteration of such equipment or system, or otherwise affect its use or performance.
- R.** A mixture of Flat Rate and Message Rate Local Exchange Service will not be allowed.
- S.** ISDN Business Service (ISDN - IBS) lines may be purchased out of Section A42. to be associated with MultiServ service or MultiServ PLUS service. Terms and conditions of MultiServ service and MultiServ PLUS service will apply to these ISDN - IBS lines except as otherwise stated in Section A42.

Each ISDN Basic Rate DSL Access Arrangement will be counted as a MultiServ service or MultiServ PLUS service line in determining the total system size.

MultiServ service Optional Features compatible with ISDN may be purchased for use with these ISDN - IBS lines. MultiServ service Feature Groups are not available for use with these ISDN - IBS lines.

ISDN - IBS lines not associated with a MultiServ service or MultiServ PLUS service may not purchase features from this Section.
- T.** MultiServ service and MultiServ PLUS service are available to subscribers of Flat Rate service and Sharing and Resale of Basic Local Exchange service.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.20 MultiServ Service (Cont'd)

A112.20.3 Unconditional Satisfaction Guarantee

- A.** If the subscriber is not completely satisfied with MultiServ service within ninety (90) days of the effective billing date, all payments will be handled as indicated in this paragraph.
1. The following charges will be refunded:
 - a. Nonrecurring and recurring charges (up to ninety days recurring billing) for rate elements as specified in this sub-section for MultiServ service.
 - b. Service charges from Section A4.
 2. The following charges will not be refunded:
 - a. End User Common Line Charges as specified in BellSouth Telecommunications, Inc., FCC No. 1, Section 4.
 - b. Usage Charges from Section A3.
 3. Customer-provided equipment acquired for use with MultiServ service will not be included in this plan.
 4. This guarantee will not apply to transfers of service, moves, conversions or recasts.
 5. MultiServ service will be disconnected no later than ten (10) days after receipt of notification of dissatisfaction.
 6. Subscribers requesting an extension of the ten (10) day disconnection interval to accommodate installation of a replacement product/service, will be billed the recurring rates for that period, not to exceed six (6) months.
 7. Subscribers must retain continuous service beyond the ninety (90) days via other Local Exchange Services as offered in Section A3.

A112.20.4 Intercept of Calls

- A.** Rerouting of calls that cannot be completed to the number originally dialed will be offered either standard Intercept or Automatic Number Referral.
1. Intercept - Incoming calls from the exchange and long distance message networks to unassigned station numbers are intercepted by the same standard central office recorded announcement equipment used to intercept such calls for exchange services. The announcement provided states that the number called is not in service.
 Intercommunicating calls to unassigned station numbers are intercepted by central office recorded announcement equipment which is common to all subscribers' MultiServ service systems served out of the same office. The announcement states that the number is not in service. (C)
 2. Automatic Number Referral - Incoming calls to a telephone number that has been disconnected or changed may be routed to a mechanized announcement that tells the calling party that the number they dialed is not in service. Telephone numbers that are listed in the directory for main station lines will be provided Automatic Number Referral (if desired) at no charge if disconnected or changed. For numbers that are not listed, charges from A112.20.13 apply per telephone number referred. (C)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.20 MultiServ Service (Cont'd)

A112.20.5 Conversions

- A.** ESSX Service¹ may be converted to MultiServ service as follows.
1. Nonrecurring charges from this sub-section will not apply.
 2. Termination Liability/Cancellation Charges for original service will not apply.
 3. Service charges from Section A4. will not apply. (T)
 4. Changes, additions or rearrangements for new lines and/or optional features:
 - a. Nonrecurring charges from this sub-section will apply.
 - b. Service charges from Section A4. will apply. (T)
- B.** Subscribers of MultiServ service with analog Feature Groups must, upon the conversion of the central office facilities from analog to digital, convert to a corresponding digital Feature Group.
1. Conversion will be within thirty (30) days of the central office conversion.
 2. Nonrecurring charges from this sub-section will not apply.
 3. Cancellation charges for original service will not apply.
 4. If subscriber had a Rate Stability Plan in effect, it will continue uninterrupted.
 5. Service charges from Section A4. will not apply. (T)
 6. Changes, additions or rearrangements:
 - a. Nonrecurring charges from this sub-section will apply.
 - b. Service charges from Section A4. will apply. (T)
- C.** Subscribers of MultiServ PLUS service may convert to MultiServ service.
1. Cancellation charge, if in effect, will not apply.
 2. Nonrecurring charges from this sub-section will apply.
 3. Service charges from Section A4. will apply. (T)

A112.20.6 Payment Schedules

- A.** General
1. MultiServ service is offered at the rates and charges indicated in this sub-section.
 2. The rates in this sub-section are offered either as month-to-month rates or may be stabilized for periods of 36 to 59 months or 60 to 120 months with a Rate Stability Plan. A subscriber may not have month-to-month rates on a system with Rate Stability.
 3. MultiServ service under month-to-month rates is subject to Company initiated rate changes. (T)
 4. MultiServ service Station Links will have maximum rates indicated in this Section. These rates may be reduced with thirty days notice to the subscribers. Current rates applicable to the Station Links will apply to all subscribers. Subscribers may apply for rates developed and offered via a Contract Service Arrangement as specified in Section A5. and in accordance with *applicable* rules. (T)
- B.** Additions
- A MultiServ service subscriber may add main station lines and/or any feature/capability to the existing system at any time during the period of service.
- C.** Disconnects
1. When a portion of a subscriber's MultiServ service is disconnected, the expiration date of the remaining service will not be affected.
 2. Cancellation charges may be applicable whether the disconnection occurs at the subscriber's request or at the instance of the Company.

Note 1: Denotes ESSX-1 service, ESSX service - VS, S, M, L or Digital ESSX service - VS, S, M, L.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.20 MultiServ Service (Cont'd)

A112.20.6 Payment Schedules (Cont'd)

C. Disconnects (Cont'd)

3. A twelve (12) month minimum service period will apply to MultiServ service month-to-month subscribers. The one (1) to 36 month cancellation charge (See A112.20.8.C.) will apply to month-to-month subscribers who terminate their MultiServ service during their first twelve (12) months of service. Cancellation charges will not apply to Federal Income Tax-exempt organizations that use MultiServ service on a temporary basis for a period not to exceed three months.

D. Transfer of Contract

Service may be transferred to a new subscriber at the same location upon prior written concurrence by the new subscriber as specified in Section A2. (T)

E. Deferred Payment

Nonrecurring charges may be deferred as specified in Section A2. or extended under Installment Billing as specified in Section A4. (T)

F. Prepayment

Recurring charges may be prepaid as specified in Section A2. (T)

G. Month-to-Month Payment Plan

1. The rates indicated in this section are available on a month-to-month basis under the *terms and conditions* in this sub-section. (T)
2. Month-to-month subscribers may elect to convert to a Rate Stability Plan under the following conditions:
 - a. No credit will be given for payments under the month-to-month payment plan.
 - b. Service at month-to-month rates when converted to the Rate Stability Plan will apply towards fulfillment of the period for a Cancellation Charge.
 - c. The Rate Stability plan will begin with the date requested at the prevailing *guidebook* rates. (T)
 - d. A service charge as specified in Section A4. will not apply. (T)

H. Rate Stability Plan

1. The rates indicated in this section may be stabilized for 36 to 120 months with a Rate Stability Plan under the *terms and conditions* preceding and in this sub-section.
2. Subscribers who choose this option will have the MultiServ service rates indicated in this sub-section stabilized for 36 to 59 months or for 60 to 120 months at the prevailing *guidebook* rates. Stabilized rates will not be subject to Company initiated increases for the duration of the stabilized period. (T)
3. Additions to a system that is under a Rate Stability Plan will be added under the Rate Stability Plan in effect and will be made to be coterminous with the MultiServ service under the Rate Stability Plan at the prevailing *guidebook* rate. (T)
4. All main station lines and optional features/capabilities must be rate stabilized for the same period.
5. At the expiration of the subscriber's chosen Rate Stability Plan, the subscriber may elect services at rates as currently offered in this *Guidebook*. Once the subscriber's chosen Rate Stability Plan expires, the Company reserves the right to convert the subscriber's account to the month to month rates and charges as outlined in this *Guidebook*. (T)

A112.20.7 Cancellation Charges and Moves of Service

A. Cancellation charges

1. Cancellation charges will apply to subscribers under the Rate Stability Plan and to month-to-month subscribers during their first twelve months of service.
2. Cancellation charges will apply only to the total removal of the subscriber's MultiServ service system.
3. Cancellation charges will be applied where service provided under a Rate Stability Plan is removed prior to the expiration of the Rate Stability Plan (see A112.20.8.C.).

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.20 MultiServ Service (Cont'd)

A112.20.7 Cancellation Charges and Moves of Service (Cont'd)

A. Cancellation charges (Cont'd)

4. When a subscriber's MultiServ service under a Rate Stability Plan is disconnected prior to the expiration of the selected service period as a result of a subscriber requested change to one of the separately *available* services listed following, cancellation charges will not apply when: (T)
- a. the completed service period is 12 months, and
 - b. the service period of the new arrangement for the separately *available* service equals or exceeds the remaining service period of the disconnected service, and (T)
 - c. the service orders to install the separately *available* service and disconnect the existing service are related together and there is no lapse in service between installation of the separately *available* service and disconnection of the existing service, and (T)
 - d. the service orders are for the same subscriber at the same location.

For the purposes of determining the separately *available* services to which the preceding conditions apply, the following list will be used: (T)

- MegaLink Service
- MegaLink Channel Service
- MegaLink ISDN Service
- LightGate Service

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.20 MultiServ Service (Cont'd)

A112.20.7 Cancellation Charges and Moves of Service (Cont'd)

B. Moves of Service

1. A MultiServ service subscriber may move a system within the same jurisdiction (the locations in the state within which the Company is authorized to operate). Service may be moved within the same central office or to another central office.
2. For complete moves within the same central office:
 - a. Cancellation charges will not apply.
 - b. Rate Stability Plan in effect will continue uninterrupted.
 - c. Nonrecurring charges from this sub-section will not apply.
 - d. A change of telephone number is not required. If a change in telephone number is requested, all nonrecurring charges (except charges for station links) apply as if for a new installation.
 - e. Service Charges from Section A4. will apply. (T)
 - f. Changes, additions and/or rearrangements:
 - Nonrecurring charges from this sub-section will apply.
 - Service charges from Section A4. will apply. (T)
3. For complete moves to another central office:
 - a. Cancellation charges will not apply.
 - b. Rate Stability Plan in effect will continue uninterrupted.
 - c. Nonrecurring charges from this sub-section apply as for a new system.
 - d. Service Charges from Section A4. will apply. (T)
 - e. Changes, additions and/or rearrangements:
 - Nonrecurring charges from this sub-section will apply.
 - Service charges from Section A4. will apply. (T)
4. For partial moves within the same central office:
 - a. Nonrecurring charges from this section will not apply.
 - b. Service Charges from Section A4. will apply. (T)
 - c. Changes, additions and/or rearrangements:
 - Nonrecurring charges from this sub-section will apply.
 - Service Charges from Section A4. will apply. (T)
5. For partial moves to another central office:
 - a. Nonrecurring charges from this sub-section will apply. (T)
 - b. Service Charges from Section A4. will apply. (T)
 - c. Changes, additions and/or rearrangements:
 - Nonrecurring charges from this sub-section will apply.
 - Service charges from Section A4. will apply. (T)

A112.20.8 Common Rates and Charges

A. General

1. Each main station line will be comprised of a Feature Group connected to the subscriber's premises by a Station Link or the equivalent.
 - a. The rates and charges specified herein for main station and bridged station links are applicable to each main station location and bridged station location respectively to which a customer-provided instrument can be connected.
 - b. Rates for the main station lines of MultiServ service subscribers will be based on the following criteria:
 - Station Link selected.
 - The appropriate Feature Group requested.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.20 MultiServ Service (Cont'd)

A112.20.8 Common Rates and Charges (Cont'd)

A. General (Cont'd)

- 1. Each main station line will be comprised of a Feature Group connected to the subscriber's premises by a Station Link or the equivalent. (Cont'd)
- c. Where main station lines are extended to a premises served by a central office other than the central office providing the telephone number, the interoffice channel will be provided at the rates in I. following. Rates for the MultiServ service Station Link will apply for the connection from the distant central office to the subscriber's premises. Rates from A112.20.8 and A112.20.9 will apply to each main station line so served. (T)
- d. Exchange Access
 - Exchange Access is provided by means of the Station Link. Usage charges may apply.
 - Presubscription of a Carrier of Preference is specified in Section 13 of the Interstate Access Services Tariff.

B. Service Establishment Charge

- 1. The following charges are in addition to any applicable service connection, move, change and installation charges provided for in other sections of this *Guidebook*. (T)
 - a. Service Establishment Charges
 - (1) Basic Service Establishment Charge

	Nonrecurring Charge	Monthly Rate	USOC
(a) Standard common equipment, each	\$250.00	\$-	M1ACS
(b) Common equipment customized by the Company at the subscriber's request, each ¹	325.00	-	M1ACC

C. Cancellation Charges

- 1. The following charges are incurred when a total disconnect of a MultiServ service system occurs when provided (1) under a Rate Stability Plan prior to the expiration of that Rate Stability Plan, or (2) under month-to-month rates when a subscriber disconnects their service during the first twelve (12) months of service.
 - a. Cancellation Charge
 - (1) Per system

	Nonrecurring Charge	USOC
(a) Disconnect in months 1-36	\$3,000	M1BPS
(b) Disconnect in months 37 and thereafter	2,000	M1BPT

D. Training Charges²

- 1. Self-paced Training
 - (a) Basic, per system **120.00** **M1CSA**
 - (b) ISDN, per system **120.00** **M1CDA**
- 2. System Manager Training (2-8 System Managers)
 - (a) Basic, per session **560.00** **M1CCB**
 - (b) Enhanced, per session **810.00** **M1CCC**
 - (c) Subsequent Basic and/or Enhanced Training, per hour **120.00** **M1CCD**

Note 1: A subscriber requested change from standard common equipment to customized common equipment will incur the difference between the two charges.

Note 2: Rates in this sub-section apply to charges for training provided by employees of the Company. Certain Company agents, not employees of the Company, may provide end user training under separate charges.

3. End User Training (Maximum 20 Students)^{2,3}

	Nonrecurring Charge	USOC MICNE
(a) Per class, per hour	\$120.00	
4. ACD Training - System Managers and Supervisors ^{2,3}		
(a) Initial Training, per hour	120.00	MICAF
(b) Managerial Reports Training, per hour	120.00	MICAG
(c) Optional Agent Training (maximum 20 attendees per class), per hour	120.00	MICAH
5. Attendant Training ^{2,3,4}		
(a) Per console type, per hour	120.00	MICTJ
6. Customized Training ⁵		
(a) Administrative charge, per hour	120.00	MICUK

E. Installation Charges

1. These charges apply as specified, when a rate element is added or changed. These charges apply in addition to other applicable nonrecurring charges.
2. One or more rate elements may be provided at the same time and in such instances the specified installation charge will apply for each rate element provided.

F. Additional Listings apply as specified in Section A6.

G. Service Charges apply as specified in Section A4. to service establishment, moves and changes of MultiServ service.

(T)

- Note 1:** Rates in this sub-section apply to charges for training provided by employees of the Company. Certain Company agents, not employees of the Company, may provide end user training under separate charges.
- Note 2:** This hourly rate is valid for training performed Monday through Friday, excluding legal holidays and must be performed during the business hours of 8 a.m. to 5 p.m.
- Note 3:** Training will be performed at the hourly rate for administrative charges outside normal business hours.
- Note 4:** Training addresses features associated with non-data link consoles for all central office types and Electronic Business Sets provisioned as a mini-console for subscribers served by a DMS-100 central office. In the latter case, EBS link(s), feature group(s) and feature charges apply as requested.
- Note 5:** Includes training provided by the Company, not provided by the CPE vendor, 36 hours/7 day per week training schedules, system training on ACD-MIS or Remote Load Management or special assemblies.

A112.20.10 Feature Groups

A. General

1. The quantity of Feature Groups offered will be dependent on the switch type.
2. Optional capabilities such as Tandem Switching Features, Systems Communication Service, Optional Service Features, Electronic Business Set Service, Multi-Account Service, and Customer Control are located elsewhere in this Section. (T)
3. The features are offered where facilities permit. This will be dependent on the serving central office.
4. Feature operation may vary based on the serving central office.
5. Each station line will be associated with one and only one Feature Group.
6. Combining of features from two or more Feature Groups will not be allowed.
7. The combining of one or more *non-guidebook* features with features or services associated with any *guidebook* rate element will not be allowed. (T)
8. All station lines in the same Multi-Line Hunt group must be equipped with the same Feature Group.

A112.20.11 Tandem Switching Features (TSF)

(O)(T)

A. General

(O)

Tandem Switching Features (TSF) provide a group of features for MultiServ service and MultiServ PLUS service designed to enable subscribers to link multiple locations. Tandem Switching Features consist of the following features.

(O)(T)

Note 1: Through December 22, 1997, subscribers will be allowed to convert from another feature group to Feature Group 10 or 11 without Service Charges being applicable.

(O)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.20 MultiServ Service (Cont'd)

A112.20.11 Tandem Switching Features (TSF) (Cont'd)

A. General (Cont'd)

1. Basic Capabilities, Per Node
 - Automatic Route Selection - Deluxe (ARS-D)/Network Automatic Route Selection (N-ARS)/Automatic Alternate Routing (AAR)
 - Traveling Class Mark (TCM)
 - Facilities Restriction Levels (FRL)
2. Automatic Route Selection - Deluxe (ARS-D) Per Line
3. Automatic Alternate Routing (AAR) Per Line
4. Additions, Deletions and/or Changes to Node
5. Uniform Numbering (UN)
6. Additions, Deletions and/or Changes to UN
7. TSF Terminations
 - Per Simulated Facilities Group (SFG)
 - Per Termination in SFG

B. Terms and Conditions

Tandem Switching Features are provided only in association with MultiServ service or MultiServ PLUS service furnished where capabilities exist from central office equipment located on Company premises.

(b) Per Termination in SFG (1AESS, DMS-100, 5ESS, EWSD [®])	-	2.20	2.05	1.85	MINTT

A112.20.12 Systems Communication Service (SCS)

A. General

1. Systems Communication Service (SCS) is an arrangement that provides calling, with abbreviated dialing, among multiple MultiServ service or MultiServ PLUS service systems. SCS allows users in one MultiServ service or MultiServ PLUS service system to dial four or five digits to reach users in the other destinations included in the SCS arrangement. Destinations included in the SCS arrangement may be PBX, MultiServ service, MultiServ PLUS service, or any other location which may be dialed directly (the subscriber may subscribe to MultiServ service or MultiServ PLUS service at the other locations, but it is not required). The calls can be local or toll.
2. The only function SCS offers to MultiServ service or MultiServ PLUS service subscribers is abbreviated dialing to the other selected locations.

B. Terms and Conditions

1. SCS will allow four or five-digit dialing on a system basis to the subscriber's distant number range. SCS will prefix any Access Code (if required), Home (HNPA) or Foreign Numbering Plan Area (FNPA) (if required), and NXX dialed by the subscriber before routing to the distant location.
2. The four or five-digit abbreviated dialing ranges cannot be duplicated at any other SCS location or destination.
3. MultiServ service or MultiServ PLUS service common equipment is required at each serving central office at which SCS is provided.
4. SCS will be offered only where facilities permit.
5. IntraLATA toll calls will be subject to the applicable rates for the authorized intraLATA toll service selected by the subscriber. InterLATA toll calls will be routed to the Interexchange Carrier (IC) to which the subscriber has presubscribed.
6. When SCS involves more than one subscriber, each subscriber must consent to sharing of information with other subscribers that is necessary for implementation of SCS.

C. Rates and Charges

(1) System Abbreviated Dialing Capability for 100 Numbers

(a) Per system ² (1AESS, DMS-100, 5ESS, EWSD [®])	51.00	-	-	-	M2ADA
--	-------	---	---	---	-------

(2) Change of SCS Translations

(a) Per system (1AESS, DMS-100, 5ESS, EWSD [®])	51.00	-	-	-	M2ACA
---	-------	---	---	---	-------

Note 1: Rates and charges for terminations in MultiServ service or MultiServ PLUS service (other than SFGs) are located in A112.20.8.

Note 2: Billing will be in increments of 100 numbers. Partial increments will be rounded up to the next 100.

(O)

	Installation Charge	Month to Month	Rate Stability Monthly Rate		USOC	
			36-59 Mos. Plan	60-120 Mos. Plan		
(a) Permanent (non-agency), per line (1AESS, DMS-100, 5ESS, EWSD®)	\$-	\$-	\$-	\$-	M2NEA	(O)
(b) Permanent (agency), per line ^{1,2,3} (1AESS, DMS-100, 5ESS, EWSD®)	-	-	-	-	M2NFA	(O)(T)
(c) Per call (1AESS, DMS-100, 5ESS, EWSD®) ^{2,4} (non-subscription)	-	-	-	-	NA	(O)(T)

Note 1: This feature, when established on a customer's line, enables subscribers of Non-Published Listing Service or special agencies as described below to prevent the transmission of their Directory Number and/or Directory Name on all outgoing calls placed from the customer's line. Calling Number Delivery Blocking - Permanent is established and/or removed from the customer's line via a service order. This feature is in operation on a continuous basis. Calling Number Delivery Blocking does not prevent transmission of the calling party number on services such as E911 that utilize Automatic Number Identification (ANI) for delivery of the calling number. Calling Number Delivery Blocking - Permanent (NOB) is available upon request, to the following entities and their employees/volunteers, for lines over which the official business of the agency is conducted including those at the residences of employees/volunteers where the head of the agency certifies to local Company management a need for blocking based upon health and safety concerns: (a) Non-profit, tax exempt, private and public social welfare agencies such as domestic violence intervention agencies, (b) federal, state and local law enforcement agencies. Other anonymity options may be made available to federal, state and local law enforcement agencies upon request at no charge.

(O)(T)

Note 2: Calling Number Delivery Blocking - Per Call is provided subject to availability of facilities where technically feasible. The Company assumes no liability for and will be held harmless from any incompatibility of the customer's CPE to perform satisfactorily with the network feature described herein. Calling Number Delivery Blocking does not prevent transmission of the calling party number on services such as E911 that utilize Automatic Number Identification (ANI) for delivery of the calling number.

(O)(T)

Note 3: If the preassigned access code for Calling Number Delivery Unblocking is dialed on a line that is provisioned with Calling Number Delivery Blocking - Permanent, the Directory Number and/or Directory Name will be delivered.

(O)(T)

Note 4: This feature allows a customer to temporarily prevent the transmission of that customer's Directory Number and/or Directory Name and thus control their availability to the called party. The transmission of the Directory Number and/or Directory Name can be temporarily prevented on an as needed basis by dialing a preassigned access code prior to making a call. This action must be repeated each time a call is made to prevent the transmission of the Directory Number and/or Directory Name.

A112.20.14 Electronic Business Set Service

A. General

Electronic Business Set Service provides central office features for use with subscriber premises electronic telephone set equipment served from a DMS-100 central office switch that is equipped to provide the service.

B. Terms and Conditions

1. Each electronic business set will require the Electronic Business Set Feature Package - Basic and the appropriate Station Link. (T)
2. Each electronic business set must have a Primary Directory Number associated with it.

C. Rates and Charges

Requires Electronic Business Set Feature Group - Basic.

Additional optional features are available in A112.20.13. (T)

1. Multiple Appearance Directory Number (MADN)

(a) Same Telephone Number as PDN or Station Line	-	.35	.30	.25	M4CPA
(b) Not PDN/Station Line, First Appearance	-	.35	.30	.25	M4C1A
(c) Not PDN/Station Line, Additional Appearance	-	.35	.30	.25	M4CAA

2. Per Key, each

(a) ACD Agent Not Ready Key	-	.25	.20	.15	M4DAF
(b) ACD Agent Display Queue Threshold Key	-	.50	.45	.40	M4DAG
(c) ACD Agent Event Code Logging Key ⁴	-	1.70	1.55	1.40	M4DAH
(d) ACD Supervisor Display Queue Status Key, Status	-	.50	.45	.40	M4DAL
(e) ACD Supervisor Display Queue Status Key, Threshold	-	.50	.45	.40	M4DAM
(f) ACD Supervisor Night Service Control Key ⁵	-	.40	.35	.30	M4DAN
(g) ACD Supervisor Observe Agent Key	-	1.20	1.10	1.00	M4DAO

Note 1: Requires ACD Basic.

Note 2: Requires a dedicated Four-wire Full Duplex digital facility from the Company's central office to the subscriber's premises. Appropriate Private Line Service charges apply.

Note 3: The Switch-Computer Application Interface (SCAI) Link must be used in conjunction with ACD.

Note 4: Requires ACD Network Management Reports.

Note 5: Requires Delay Announcement located in A112.20.13. (T)

(a) Anonymous Call Rejection	-	.40	.35	.30	M4GCT	(O)
(b) Auto Inspect ⁵	-	.15	.10	.05	M4GAK	(O)

Note 1: This feature, when established on a customer's line, enables subscribers of Non-Published Listing Service or special agencies as described below to prevent the transmission of their Directory Number and/or Directory Name on all outgoing calls placed from the customer's line. Calling Number Delivery Blocking - Permanent is established and/or removed from the customer's line via a service order. This feature is in operation on a continuous basis. Calling Number Delivery Blocking does not prevent transmission of the calling party number on services such as E911 that utilize Automatic Number Identification (ANI) for delivery of the calling number. Calling Number Delivery Blocking - Permanent (NOB) is available upon request, to the following entities and their employees/volunteers, for lines over which the official business of the agency is conducted including those at the residences of employees/volunteers where the head of the agency certifies to local Company management a need for blocking based upon health and safety concerns: (a) Non-profit, tax exempt, private and public social welfare agencies such as domestic violence intervention agencies, (b) federal, state and local law enforcement agencies. Other anonymity options may be made available to federal, state and local law enforcement agencies upon request at no charge. (O)

Note 2: Calling Number Delivery Blocking - Per Call is provided subject to availability of facilities where technically feasible. The Company assumes no liability for and will be held harmless from any incompatibility of the customer's CPE to perform satisfactorily with the network feature described herein. Calling Number Delivery Blocking does not prevent transmission of the calling party number on services such as E911 that utilize Automatic Number Identification (ANI) for delivery of the calling number. (O)

Note 3: If the preassigned access code for Calling Number Delivery Unblocking is dialed on a line that is provisioned with Calling Number Delivery Blocking - Permanent, the Directory Number and/or Directory Name will be delivered. (O)

Note 4: This feature allows a customer to temporarily prevent the transmission of that customer's Directory Number and/or Directory Name and thus control their availability to the called party. The transmission of the Directory Number and/or Directory Name can be temporarily prevented on an as needed basis by dialing a preassigned access code prior to making a call. This action must be repeated each time a call is made to prevent the transmission of the Directory Number and/or Directory Name. (O)

Note 5: Requires display capability. (O)

A112.20.15 Customer Control

(O)(T)

A. Description of Service

(O)

- Customer Control is a feature of MultiServ service and MultiServ PLUS service which utilizes a computer-based operations system accessed via a Company Secure Network. Customer Control allows end users to activate and/or deactivate selected features and/or change certain service options and feature configurations on predesignated Multiserv service or MultiServ PLUS service main station lines. These changes can be performed on a per line or a bulk change basis. Subscriber provided terminal equipment is required for the operation of Customer Control. The Customer Control feature will interface with the DMS-100, 5ESS, 1AESS, and EWSD® central office switching systems where facilities permit.

(O)(T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.20 MultiServ Service (Cont'd)

A112.20.15 Customer Control (Cont'd)

A. Description of Service (Cont'd)

2. Customer Control subscribers are subject to MultiServ service *Terms and Conditions* as stated in A112.20 or MultiServ PLUS service *Terms and Conditions* as stated in A112.21 following. (T)
3. All features which are available via MultiServ service may not be available for Customer Control from all central offices.
4. The Company will provision the features contained in the most feature rich feature group on all Non-Electronic Business Telephone Set main station lines which are controllable. Depending on the subscriber's serving central office switch type, all features in the most feature rich feature group may not be controllable via Customer Control.
5. Features which can be controlled by the subscriber may only be assigned/provisioned on like MultiServ service or MultiServ PLUS service Station Link type main station lines.
6. Customer Control allows the subscriber to schedule changes for completion by the next business day or for a future business day. Additional priority changes may be requested and the changes completed the same day subject to *Terms and Conditions* in this *Guidebook*. (T)
7. Customer Control is furnished subject to the availability of facilities and features.
8. This feature will be provided to the subscriber as Customer Control - Basic.
9. Customer Control will consist of the following rate elements:
 - a. Customer Control - Basic, Service Establishment - Initial Setup, Per System
 - b. Customer Control - Per Line
 - (1) Initial setup of a subscriber working in a 1AESS central office
 - (2) Initial setup of a subscriber working in a 5ESS central office
 - (3) Initial setup of a Non-Electronic Business Set subscriber working in a DMS-100 central office
 - (4) Initial setup of a subscriber working in a EWSD® central office
 - (5) Setup of an Electronic Business Set service subscriber working in a DMS-100 central office
 - (6) Setup of any subscriber who converts from ESSX Customer Administration Service (ECAS) or Digital ESSX Customer Administration Service (DECAS), from Section A112. to Customer Control
 - c. Security Card - Per Card
10. The following rate element(s) are optional for Customer Control:
 - a. Processor Connection, Per Additional Termination
 - b. User Identification Codes, Per Additional User Login
 - c. Additional Data Base, Per System
 - d. Activation/Deactivation/Change of a Customer Controllable Feature for an existing MultiServ service or MultiServ PLUS service subscriber by the Company at the subscriber's request subsequent to initial installation
 - Per change, per line
 - Bulk change
 - e. Activation/Deactivation/Change of a customer controllable feature for an existing MultiServ service or MultiServ PLUS service subscriber by the Company at the subscriber's request on Electronic Business Set Service:
 - Per change, per line
 - f. Completion of TN swap on customer controllable lines at the subscriber's request
 - g. Additional System Manager training

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.20 MultiServ Service (Cont'd)

A112.20.15 Customer Control (Cont'd)

A. Description of Service (Cont'd)

10. The following rate element(s) are optional for Customer Control: (Cont'd)

h. Subsequent System Manager training

11. For access to Customer Control - Basic, the subscriber will be required to provide a VT100 compatible terminal or a Personal Computer (PC) with the appropriate software to emulate such a terminal, a dial-up modem and a voice grade analog access line at the subscriber's premises. If the subscriber requires the ability to print Customer Control related information, they will be required to establish printing capabilities on their premises, by securing a VT102 or greater terminal and printer.

The dial-up modem must be compatible with one of the following standards - ITU-T (International Telecommunication Union - Telecommunication Standardization Sector, formerly CCITT) standards V.32bis, V.32, V.22bis, and V.22 or industry specifications V.32terbo or Bell 212A. Compression standard V.42bis and error control standard V.42 are supported.

The appropriate Service Establishment, Per Line and Security Card rate elements can be obtained from E. following.

12. The following subscriber directory information may be maintained for all of the subscriber's main station lines via the Customer Control data base:

- Station Telephone Number
- Name
- Organization
- Location

The information in the Name, Organization and Location fields must be entered and updated by the subscriber.

13. To gain access to the Company's Dial Access network, the subscriber must have one User Identification Code for each System Manager accessing the Customer Control Database. One Security Card will also be required for each System Manager accessing the Customer Control Database. The Security Card may be ordered from E. following. The Security Card rate element will provide for the initial card or for the issuance of multiple cards to different users at the subscriber's premises or for the replacement of lost, stolen or expired cards.

If the subscriber has purchased a Security Card in conjunction with another feature or service offered by the Company, that Security Card may also be used in conjunction with Customer Control. It is up to the subscriber to notify the Company of any existing Security Card so the Company can ensure that the card is validated for multiple features and/or services.

14. Customer Control - Per Line allows the subscriber to activate and/or deactivate any feature which is controllable.

The Company will provision Non-Electronic Business Set subscriber's main station line(s) with the features from the most feature rich Feature Group as described in A112.20.10 preceding when the subscriber orders Customer Control - Per Line as outlined in E. following. The subscriber who orders Customer Control - Per Line from the aforementioned Section will do so in conjunction with ordering MultiServ service or MultiServ PLUS service and will not order a Feature Group from A112.20.10 preceding.

15. The initial provisioning of features on an Electronic Business Set Service subscriber's main station line(s) will be done when the subscriber orders the Electronic Business Set Service basic Feature Group and Electronic Business Set Service features associated with MultiServ service from A112.20.10 preceding. Customer Control - Per Line will be ordered from E. following after MultiServ service or MultiServ PLUS service is working and will give the subscriber the ability to manipulate controllable features.

(T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.20 MultiServ Service (Cont'd)

A112.20.15 Customer Control (Cont'd)

A. Description of Service (Cont'd)

15. (Cont'd)

When a subscriber converts from ESSX Customer Administration Service (ECAS) or Digital ESSX Customer Administration Service (DECAS), as outlined in Section A112., MultiServ service or MultiServ PLUS service must be ordered and provisioned prior to ordering Customer Control. The Company will place the requested MultiServ service feature group and any optional features on the subscriber's line(s). Any controllable features that were provisioned on the subscriber's line via MultiServ service will remain on that line. At the time Customer Control is ordered, the Company will make all controllable features available but will not provision any new features on the subscriber's line(s). Any features which are not controllable via Customer Control must be purchased and provisioned from A112.20.13 preceding. Customer Control - Per Line will be ordered from E. following and will give the subscriber the ability to manipulate controllable features. (T)

The subscriber will be responsible for deactivating features they do not want on main station line(s) which are equipped with Customer Control. The subscriber will also be responsible for placing optional features that are controllable on their main station line(s) which are equipped with Customer Control.

16. The subscriber will be provided one Processor Connection in conjunction with the Service Establishment, Initial Setup. Additional Processor Connections can be obtained from E. following.
17. The subscriber will be provided one User Identification Code in conjunction with the Service Establishment, Initial Setup. Additional codes will be needed if multiple System Managers are accessing the data base at the same time. Additional User Identification Codes can be obtained from E. following.
18. The subscriber will be provided one Data Base setup in conjunction with the Service Establishment, Initial Setup. The Data Base setup includes the feature initialization. Additional Data Base setups can be ordered from E. following.
19. At the subscriber's request, the Company may, on a temporary basis, agree to perform the following Activation/Deactivation/Change functions, as outlined in E. following, for existing MultiServ service or MultiServ PLUS service subscribers:
 - Change station features,
 - Delete features from a line or
 - Add new features to a line.
20. At the subscriber's request, the Company may, on a temporary basis, agree to perform Telephone Number (TN) Swaps for existing or new MultiServ service or MultiServ PLUS service as outlined in E. following. TN Swaps can only be performed for like link type main station lines.
21. At the subscriber's request, the Company may, on a temporary basis, agree to perform the following Activation/Deactivation/Change functions, as outlined in E. following, for existing MultiServ service or MultiServ PLUS service for Electronic Business Set Service subscribers:
 - Change station features,
 - Delete features from a line or
 - Add new features to a line.The performance of these functions on a Per Key, Per Set, Per Directory Number or Per Key List basis will be determined by the feature(s) that the subscriber has purchased from A112.20.14 preceding.
22. Initial training of the subscriber for up to two System Managers in the use of Customer Control will be provided as the feature is put into service. Any Additional System Managers Training or Subsequent System Manager Training charge will be provided at an hourly rate as outlined in E. following. Prior to receiving this training, the subscriber should attend MultiServ service System Manager training as a prerequisite.
23. Customer Control provides the subscriber with the ability to print standard administrative reports.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.20 MultiServ Service (Cont'd)

A112.20.15 Customer Control (Cont'd)

B. Terms and Conditions

1. Customer Control is furnished subject to the availability of facilities, telephone numbers and the ability of the software to control the requested feature. (T)
2. Limitations and use of Customer Control as stated in Section A2. will apply. (T)
3. Suspension of service as specified in A112.20.2 preceding is not applicable for this feature. Using Customer Control to suspend MultiServ service or MultiServ PLUS service on a station does not affect the billing on the line. The subscriber will continue to pay appropriate rates and charges on the line. (T)
4. In no event shall the Company be liable for any losses or damages of any kind resulting from the unavailability of its equipment or facilities or for any act, omission, or failure of performance by the Company, or its employees, or agents, in connection with this *Guidebook*. (T)
5. To access the Customer Control database, the subscriber must use a voice grade analog line.
6. For main station lines equipped with Customer Control, the subscriber can verify and/or display the assignment of features on a single line, range of station lines or all station lines to determine which station or stations have a particular feature or service option.
7. Certain MultiServ service or MultiServ PLUS service main station lines may be specified by the subscriber to be exempt from the Customer Control feature. Additionally, the Company reserves the right to make station lines inaccessible for Customer Control.
8. Features for Customer Control exempt main station lines must be requested via a Service Order and added by the Company. Rates and Charges in E. preceding apply as appropriate. Appropriate Service Charges specified in Section A4. also apply. (T)
9. Customer Control changes must be entered in conjunction with the following:
 - Prior to Company designated schedules, or
 - As priority changes, or
 - As future dated transactions by the subscriber.
10. Subscribers who order an initial set of Customer Control - Per Line as outlined in E.2. following will be required to order Customer Control - Basic at the same time MultiServ service or MultiServ PLUS service is initially ordered. The subscriber will not order a Feature Group as outlined in A112.20.10 preceding. The Company will provision the subscriber's main station line(s) with the features (for their central office switch type) from the most feature rich Feature Group described in A112.20.10.
11. Subscribers who order Customer Control - Per Line as outlined in E.3. following will be required to order Customer Control - Basic after MultiServ service or MultiServ PLUS service is established. The features which are provisioned on the subscriber's main station line in conjunction with MultiServ service or MultiServ PLUS service will remain. The subscriber may use Customer Control to manipulate any controllable feature.
12. The following types of lines will be restricted from TN Swaps rearrangement capability. Service options and feature change capabilities will still be available except on lines assigned to multiline hunt groups.
 - Station lines assigned to multiline hunt groups.
 - Attendant lines
 - Any MultiServ service or MultiServ PLUS service station line which has a special hardware configuration (e.g., ground start lines and lines having signal distribution points)
 - Manual lines (e.g., station lines with full originating and/or terminating restrictions)
13. Changing the status of a station line from accessible to Customer Control to inaccessible or vice versa, must be done by the Company via a Service Order request. For station lines that are ordered without Customer Control, the appropriate rate element associated with the MultiServ service feature package applies. For station lines that are ordered with Customer Control, the Customer Control - Per Line charge applies. The Secondary Service Charge specified in Section A4. is applicable. (T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.20 MultiServ Service (Cont'd)

A112.20.15 Customer Control (Cont'd)

B. Terms and Conditions (Cont'd)

14. The subscriber will be responsible for installation, maintenance and testing of customer-provided compatible terminal equipment (CPE).
15. The Company does not assume responsibility for the compatibility or suitability of the subscriber's (CPE) equipment.
16. The Company shall not be responsible if changes in any of the equipment, operations, or procedures of the Company utilized in the provision of Customer Control render any facilities provided by a customer obsolete or require modification or alteration of such equipment or system or otherwise affect its use or performance.
17. Customer Control supports dial-up access security through the use of a Security Card. Customer Control supports access security by requiring login and password identifiers. The subscriber must have one User Identification Code for each System Manager accessing the Customer Control Database. The User Identification Code includes a password and is used in conjunction with the Security Card. In addition, Customer Control ensures that the user can access only their portion of their database.
18. The subscriber will be required to authenticate with a Security Card before network access is permitted. The network access security system validates the user, and establishes the call across the network to the host computer. Once the subscriber has purchased the Security Card, the Company will provide the subscriber with a login and password in order to maintain secure access and an audit trail. Rates for the Security Card are outlined in E. following.
19. The subscriber must provide the Company with a central point of contact for inquiries and/or trouble reports involving station features.
20. The Customer Control subscriber is responsible for initiating a Service Order to correct any information pertaining to the Company's Listings that changed as a result of a Customer Control TN Swap. The appropriate Service Charges specified in Section A4. apply. (T)

C. Moves of Service

1. When a subscriber elects to move service from one serving central office to a different switch type serving central office, an additional Database charge as outlined in E. following will apply.
2. Moves of Service terms and conditions as outlined in A112.20.7.B. preceding are applicable.

D. Application of Rates

1. Customer Control is available on a per line basis to customers who subscribe to MultiServ service or MultiServ PLUS service. All MultiServ service features which are controllable will be subject to the rates outlined in E. following.
2. The appropriate Service Charge(s) specified in Section A4. applies to the subsequent establishment of Customer Control.
3. If Customer Control is ordered at the same time as MultiServ service or MultiServ PLUS service, only one Service Charge is applicable.
4. Changing the status of a station line from accessible to Customer Control to inaccessible or vice versa, must be done by the Company via a Service Order request. Appropriate Service Charges specified in Section A4. apply.
5. The Service Establishment, Initial Setup - Per System charge for Customer Control - Basic is for the initial establishment of the Customer Control feature.

This charge includes the initial Processor Connection charge, the initial User Identification Codes (Per User Login) charge, the initial Database Establishment (Per System) charge and training for up to two System Managers.

ECAS/DECAS subscribers who convert, during their contract period, from the grandfathered ESSX service or Digital ESSX service to MultiServ service or MultiServ PLUS service will have the Customer Control Service Establishment, Per System Installation Charges waived. Service Charges from Section A4. will not apply.

			36-59 Mos. Plan	60-120 Mos. Plan	
(a) Electronic Business Set service subscriber working in a DMS-100 central office ²	\$ -	\$ 8.40	\$ 7.70	\$ 7.00	CCXSE
(b) Any subscriber who converts from ECAS/DECAS, MultiServ service or MultiServ PLUS service to Customer Control ³	-	8.40	7.70	7.00	CCXSA
(4) Processor Connection - Dial Access ¹					
(a) Per additional connection	.55	-	-	-	CCXPC
(5) User Identification Codes					
(a) Per additional user login ¹	50.00	-	-	-	CCXUC
(6) Security Card					
(a) Per card ¹	100.00	-	-	-	CCXSC
(7) Additional Database					
(a) Per system ¹	725.00	-	-	-	CCXAD
(8) Activation/Deactivation/Change of Customer Controllable features for existing MultiServ service or MultiServ PLUS service by the Company at the subscriber's request					
(a) Subsequent to initial installation, ¹ per change, per line	13.00	-	-	-	CCXCA
(b) Subsequent to initial installation, ¹ per bulk change	25.00	-	-	-	CCXCB
(c) Electronic Business Set Service, ¹ per change, per line	25.00	-	-	-	CCXBS

Note 1: Appropriate Service Charges as specified in Section A4. apply.

Note 2: Features ordered by the subscriber via MultiServ service or MultiServ PLUS service will remain on the subscriber's line. However, at the time Customer Control is ordered, the Company will make all controllable features available but will not provision any new features on the subscriber's main station line.

Note 3: At the time Customer Control is ordered, the Company will make all controllable features available but will not provision any features on the subscriber's main station line. Any features which may already be on the main station line will remain. MultiServ service or MultiServ PLUS service must be ordered and the features provisioned prior to ordering this feature. Non controllable features which are available via MultiServ service must be ordered from A112.20.13 preceding.

A112.21 MultiServ PLUS Service

A112.21.1 General

- A. Subscribers requesting one (1) or more main station lines in a system may subscribe to MultiServ PLUS service at the rates, *terms and conditions* specified in this *Guidebook*. These subscribers may apply for rates developed and offered via a Contract Service Arrangement as specified in Section A5. and further modified in A112.21.8 and A112.21.9. (T)
- B. *Terms, Conditions* and Rates from A112.20 apply to MultiServ PLUS service unless specifically amended or abridged herein. (T)

A112.21.2 Terms and Conditions (T)

- A. Charges from Section A3. for Network Access Registers (NARs) apply. Each subscriber to MultiServ PLUS service must subscribe to a minimum of one (1) Network Access Register.
- B. Rates and charges from A112.20 apply for the following: (T)
 - 1. Common Rates and Charges
 - a. Training Charges
 - b. Interoffice Channels
 - c. Miscellaneous Charges
 - 2. Feature Groups
 - 3. Tandem Switching Features (TSF)
 - 4. Systems Communication Service (SCS)
 - 5. Optional Service Features
 - 6. Electronic Business Set Service (EBS)

Note 1: Appropriate Service Charges as specified in Section A4. apply. (T)

Note 2: This hourly rate is valid for training performed Monday through Friday, excluding legal holidays and must be performed during the Business Hours of 8 a.m. to 5 p.m. Training outside of the aforementioned days and hours is available via Special Assembly and will be performed at the appropriate time and materials rates.

A112.21.2 Terms and Conditions (Cont'd)

B. Rates and charges from A112.20 apply for the following: (Cont'd)

7. Multi-Account Service (MAS)
8. Customer Control

C. Rates and Charges herein apply for the following:

1. Service Establishment
2. Cancellation Charge
3. Main Station Links

A112.21.3 Unconditional Satisfaction Guarantee

A. The following charges will also be refunded to a MultiServ PLUS service subscriber:

1. Network Access Register recurring charges
2. Grouping recurring charges

(Further explanation regarding Unconditional Satisfaction Guarantee is available in A112.20.3.)

A112.21.4 Intercept of Calls

A. Automatic Number Referral

Telephone numbers that are listed in the *Company's Listing Information System* for main station lines will be provided Automatic Number Referral (if desired) at no charge if disconnected or changed. For numbers that are not listed, charges from A112.20.13 apply per number referred. (T)

(Further explanation regarding Intercept of Calls is available in A112.20.4.)

A112.21.5 Conversions

A. ESSX service and MultiServ service may be converted to MultiServ PLUS service as follows.

1. Nonrecurring charges from this sub-section of this guidebook will not apply.
2. Termination liability or cancellation charges for original service do not apply.
3. Service Charges from Section A4. will not apply.
4. Changes, additions and rearrangements:
 - a. Nonrecurring Charges from this section of this guidebook will apply.
 - b. Service Charges from Section A4. will apply.

B. Subscribers to analog Feature Groups must convert according to A112.20.5.

(Further explanation regarding Conversions is available in A112.20.5.)

A112.21.6 Payment Schedules

Information shown in A112.20.6 is applicable for MultiServ PLUS service.

A112.21.7 Cancellation Charges and Moves of Service

Information shown in A112.20.7 is applicable for MultiServ PLUS service.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.21 MultiServ PLUS Service (Cont'd)

A112.21.8 Common Rates and Charges

A. Service Establishment Charges

1. The following charges for service are in addition to any applicable service connection, move, change and installation charges provided for in other sections of this Guidebook:

a. Service Establishment Charges

(1) Basic Service Establishment Charge

	Nonrecurring Charge	USOC
(a) Standard common equipment, each	\$350.00	MIACS
(b) Common equipment customized by the Company at the subscriber's request, each ¹	400.00	MIACC

B. Cancellation Charges

1. The following charges are incurred when a total disconnect of a MultiServ PLUS service system occurs when provided (1) under a Rate Stability Plan prior to expiration of that Rate Stability Plan, or (2) under month-to-month rates when a subscriber disconnects their service during the first twelve (12) months of service.

a. Cancellation Charge

(1) Per system

(a) Disconnect in months 1-36	10,000.00	M1BPS
(b) Disconnect in months 37 and thereafter	7,500.00	M1BPT

C. Listings

A standard Listing will be provided for a main station line (not to exceed the number of NARs) at no charge. For Additional Listings, Designer Listings etc., see Section A6. (T)

D. Training Charges - See A112.20.8.D.

E. Installation Charges - See A112.20.8.E.

F. Additional Listings - See A112.20.8.F. (T)

G. Service Charges - See A112.20.8.G.

H. Bridged Links - See A112.20.8.H.

I. Interoffice Channels - See A112.20.8.I.

Note 1: A subscriber requested change from standard common equipment to customized common equipment will incur the difference between the two charges.

Customer Control for MultiServ PLUS service subscribers is available from A112.20.15. (T)

A112.22 MultiServ Multi-Account Service (MMAS)

A112.22.1 General

- A. MultiServ Multi-Account service is a fully partitioned MultiServ service and/or MultiServ PLUS service for use in an environment serving multiple tenants. The designated area must be wholly within the confines of the serving wire center boundary.
- B. Rates and conditions for MultiServ Multi-Account service as specified following and where applicable are in addition to the rates and conditions specified for MultiServ service and/or MultiServ PLUS service and the other features and services provided.
- C. A subscriber account of MultiServ Multi-Account service may be either a Primary Account or a Secondary Account.
- D. A MultiServ Multi-Account service System consists of a Primary Account with or without Secondary Accounts.
- E. A Primary Account is the subscriber who accepts responsibility for the coordinating role for the MultiServ Multi-Account service System as specified herein.
- F. A Secondary Account is any MultiServ service or MultiServ PLUS service subscriber of a system other than the Primary Account.

A112.22.2 Terms and Conditions (T)

- A. The provision of MultiServ Multi-Account service is dependent upon the establishment of a Primary Account under the terms and conditions for MultiServ service or MultiServ PLUS service. All other subscribers to a MultiServ Multi-Account service are considered Secondary Accounts. All Secondary Account agreements for MultiServ service or MultiServ PLUS service will be coterminous with the MultiServ service or MultiServ PLUS service of the Primary Account.
- B. The Primary Account accepts responsibility for the training of Secondary Accounts and will provide assistance in the coordination of MultiServ service or MultiServ PLUS service for Secondary Accounts. As a part of the coordinating role, the Primary Account is also responsible for insuring that the minimum system size established for MultiServ service or MultiServ PLUS service is maintained. The Primary Account is responsible for any cancellation charges applicable for the Primary and Secondary Accounts in the MultiServ Multi-Account service System.
- C. MultiServ Multi-Account service will provide partitioned MultiServ service and/or MultiServ PLUS service for each account subscribing to MultiServ Multi-Account service.
- D. Station-to-station calling is limited to MultiServ service or MultiServ PLUS service lines within each MultiServ Multi-Account service. Intercom calling between unaffiliated accounts is not permitted under MultiServ Multi-Account service.
- E. Each subscriber to MultiServ Multi-Account service is subject to all rates, *terms and conditions* of MultiServ service or MultiServ PLUS service as specified and where applicable in A112.20 and A112.21. (T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.22 MultiServ Multi-Account Service (MMAS) (Cont'd)

A112.22.2 Terms and Conditions (Cont'd)

- F. Each account will be directly responsible to the Company for all charges associated with its service. The Company will bill each account individually for its service.
- G. Appropriate MultiServ service or MultiServ PLUS service nonrecurring charges will apply as follows:
 1. MultiServ service or MultiServ PLUS service establishment and any installation charges associated with the Primary Account's service for MultiServ service or MultiServ PLUS service will apply to the Primary Account of a MultiServ Multi-Account service System.
 2. MultiServ service or MultiServ PLUS service installation charges will apply to the service associated with the Secondary Account's service.
- H. Appropriate MultiServ service or MultiServ PLUS service recurring rates will apply as follows:
 1. MultiServ service or MultiServ PLUS service establishment and any recurring rates associated with the Primary Account's service for MultiServ service or MultiServ PLUS service will apply to the Primary Account of a MultiServ Multi-Account service System.
 2. MultiServ service or MultiServ PLUS service recurring rates will apply to the service associated with the Secondary Account's service.
- I. The minimum number of main station lines per MultiServ Multi-Account service System will apply as specified for MultiServ service or MultiServ PLUS service in this *guidebook*. (T)
- J. Each account must designate the preferred carrier for long distance service.
- K. MultiServ service or MultiServ PLUS service features are provided individually to each account. Where the MultiServ service or MultiServ PLUS service *guidebook* permits, features may be provided on a station basis or a system basis. If provided on a system basis, appropriate system charges apply to each account electing this option. (T)
- L. A mix of flat rate and measured/message rate service subscribers within the same MultiServ Multi-Account service System is not permitted except as specified in A112.20.2.T.. (T)

A112.22.3 Conversions

- A. For conversion from a stand-alone MultiServ service to MultiServ service under MultiServ Multi-Account service, only a Secondary Service Charge as specified in Section A4. will apply.
- B. For conversion from a stand-alone MultiServ PLUS service to MultiServ PLUS service under MultiServ Multi-Account service, only a Secondary Service Charge as specified in Section A4. will apply.
- C. For conversion from a MultiServ service in a MultiServ Multi-Account service system to a stand-alone MultiServ PLUS service, the *terms and conditions* for conversions in A112.21.5 will apply. (T)

10. BellSouth Centrex Control supports dial-up access security through the use of a Security Card. BellSouth Centrex Control supports access security by requiring login and password identifiers. The subscriber must have one User Identification Code for each System Manager accessing the BellSouth Centrex Control Database. The User Identification Code includes a login and password and is used in conjunction with the Security Card. In addition, BellSouth Centrex Control ensures that the user can access only their portion of their database. (O)(T)

The subscriber will be required to authenticate with a Security Card before network access is permitted. The network access security system validates the user, and establishes the call across the network to the host computer. Once the subscriber has purchased the Security Card, the Company will provide the subscriber with a login and password in order to maintain secure access and an audit trail. Rates for the Security Card are outlined in **A112.25.16.E** following. (O)(T)

If the subscriber has purchased a Security Card in conjunction with another feature or service offered by the Company, that Security Card may also be used in conjunction with BellSouth Centrex Control. It is up to the subscriber to notify the Company of any existing Security Card so the Company can ensure that the card is validated for multiple features and/or services. (O)(T)

A112.26 ESSX Service - Vintage II

(Obsoleted 10-26-95, Type 4. Service rates and charges in this section are available for inward activity of existing subscribers only as specified following. Not available for new service or entire moves of existing service to new locations.)

Obsolescence Rules

1. Inward activity for ESSX service - Vintage II will be allowed.
2. ESSX service - Vintage II subscribers under the month-to-month payment option will be allowed to maintain their service at month-to-month rates.
3. ESSX service - Vintage II subscribers who have a portion of their existing service under a month-to-month payment option and a portion of their existing service under a Term Payment Plan may remain under the rates and charges outlined in this Section until such a time that the Term Payment Plan associated with the Common Equipment expires. Upon expiration of the Term Payment Plan associated with the Common Equipment, the Company reserves the right to convert all or part of the subscriber's account to the month-to-month rates and charges as outlined in this *Guidebook*. (T)
The subscriber can place their month-to-month rates under rates and charges equivalent to their Common Equipment Term Payment Plan.
Should the subscriber elect not to convert their month-to-month rates and charges to the Term Payment Plan, they may remain on the month-to-month rates and charges.
4. ESSX service - Vintage II subscribers under a Term Payment Plan will be allowed to maintain their ESSX service - Vintage II until the expiration date associated with the Common Equipment of their contract. Upon expiration of the Term Payment Plan associated with the Common Equipment, the Company reserves the right to convert all or part of the subscriber's account to the month-to-month rates and charges as outlined in this *Guidebook*. (T)
5. ESSX service - Vintage II subscribers under a Term Payment Plan will have until 02/28/96 to exercise the recast as described in A112.26.6 for a Term Payment Plan of not greater than 36 months in length. ESSX service - Vintage II subscribers under a month-to-month payment option will have until 02/28/96 to convert to a Term Payment Plan of not greater than 36 months in length.
6. Existing ESSX service - Vintage II subscribers who are under a Term Payment Plan may add a new secondary location (SLA) or move an existing SLA of their existing service.
7. Conversions from ESSX-1 service to ESSX service - Vintage II will not be allowed under this *guidebook*. (T)

A112.26.1 General

- A. ESSX service is furnished from No. 1 and 1A Electronic Switching System (ESS) Central Office equipment located on Company premises and associated facilities so arranged as to provide the following basic service features:
 1. Direct Inward Dialing (DID) and Direct Outward Dialing (DOD) of exchange and long distance message network calls to and from stations and attendant positions of a subscriber's system.
 2. Intercommunication calls between stations of the same subscriber's system.
 3. Identified Outward Dialing (IOD) by station number of outgoing long distance message calls dialed by a station. Only calls billed to the subscriber by the Company will be provided this identification.
 4. Common recorded announcement interception of calls to unassigned station numbers.
 5. Trunk answer any station of incoming primary directory listing calls.
 6. Basic Station Line Hunting
 7. Touch-Tone Service
- B. ESSX service will be furnished in four categories based on the size of the subscribers system.
 1. ESSX service-VS will serve systems with 1-24 main station lines.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service - Vintage II (Cont'd)

A112.26.1 General (Cont'd)

- B.** ESSX service will be furnished in four categories based on the size of the subscribers system. (Cont'd)
2. ESSX service-S will serve systems with 25-200 main station lines.
 3. ESSX service-M will serve systems with 201-600 main station lines.
 4. ESSX service-L will serve systems with more than 600 main station lines.
- C.** A subscriber's system derived from ESSX service may be comprised of the following components:
- Common Equipment¹
 - Network Access¹
 - Main Station Lines¹
 - Terminating Arrangements
 - Features
1. The Common Equipment, Network Access and Terminating Arrangements will be at the rates and charges as specified in A112.26.7. (T)
 2. Main Station Line rates will consist of the intercom charge and the appropriate wire center line charge (or equivalent). These charges will be located in A112.26.8, A112.26.9, and A112.26.10 for ESSX service (Very Small, Small, Medium, and Large) respectively.
 3. Line and System Features for ESSX service will be grouped as follows:
 - Group A Line Features
 - Optional System Features
 - Customer Management Features²
 - a. Group A Line Features will be offered on a grouped basis to subscribers of ESSX service who have selected a Term Payment Plan of 36, 60 or 84 months. Subscribers selecting the one month payment option will be offered the Group A Line Features on an individual basis only.
 - b. Optional Service Features and the Customer Management Features will be offered to subscribers of ESSX service under all payment plan options subject to the specific requirements within each arrangement.
 - c. An ESSX service-VS or S subscriber will select Group A features in A112.26.8.² (T)
 - d. An ESSX service -M subscriber will select Group A features in A112.26.9.² (T)
 - e. An ESSX service-L subscriber will select Group A features in A112.26.10.² (T)
 - f. Optional Service Features will be offered to all subscribers of ESSX service in A112.26.12. (T)
 - g. Customer Management Features will be offered to all subscribers of ESSX service in A112.26.15.² (T)
- D.** If the subscriber is not completely satisfied with his ESSX service within ninety (90) days of effective billing date, all payments will be handled as indicated in the following paragraphs.
1. The following charges will be refunded:
 - a. Nonrecurring and recurring charges (up to ninety days recurring billing) for rate elements as specified in Section A112. for ESSX service.
 - b. Service charges from Section A4. (T)
 2. The following charges will not be refunded:
 - a. Recurring charges for Network Access Registers and Grouping as specified in Section A3. (T)
 - b. End User Common Line Charges as specified in BellSouth FCC No. 4.

Note 1: Every system will include these components.

Note 2: Systems subscribing to the ECAS Feature in A112.26.15 must select ECAS Changeable Features subject to the rates, *terms and conditions* in A112.26.15. (T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service - Vintage II (Cont'd)

A112.26.1 General (Cont'd)

- D. If the subscriber is not completely satisfied with his ESSX service within ninety (90) days of effective billing date, all payments will be handled as indicated in the following paragraphs. (Cont'd)
 - 3. Customer provided equipment acquired for use with ESSX service will not be included in this plan.
 - 4. ESSX service provided under the One Month payment option is not eligible.
 - 5. Subscribers provided ESSX service via Special Contract arrangements may negotiate a satisfaction plan on an individual case basis.
 - 6. This guarantee will not apply to transfers of service, moves, conversions, or recasts.
 - 7. ESSX service will be disconnected no later than ten (10) days after receipt of notification of dissatisfaction.
 - 8. Subscribers requesting an extension of the 10 day disconnection interval to accommodate installation of a replacement product/service, will be billed the contracted recurring rates for that period, not to exceed six (6) months.
 - 9. Subscribers must retain continuous service beyond the ninety days via other Local Exchange services as offered in Section A3. (T)

A112.26.2 Terms and Conditions (T)

- A. ESSX service is furnished subject to the availability of facilities and features from a No. 1 or 1A Electronic Switching System located in a central office building owned or leased by the Company. The service allows for normal station activity including incidental additions and deletions. Major additions to and/or major relocations of a subscriber's system are subject to the same *terms and conditions* as initial installations. (T)
- B. Certain Auxiliary Services are available on an individual main station line basis and are subject to the capabilities of the serving ESS central office.
- C. Optional Service Features as listed in A112.26.12 include Attendant Service Features and Auxiliary Attendant Features. These Features may require customer provided compatible terminal equipment.
- D. All console functions by the attendants at the subscriber's premises are performed at the expense of the subscriber and must conform with the operating practices and procedures of the Company to maintain a proper standard of service.
- E. All ESSX service main station lines must be associated with the main switching equipment. Satellite switching equipment is not offered with ESSX service.
- F. Tie lines for direct connections between a basic subscriber's system and other systems are provided primarily for communication between stations of the two systems. In such cases, rates and charges for tie line service as specified in Section A13. and miscellaneous line termination charges apply. In addition, these tie line connections may be arranged to provide completion of incoming or outgoing local and long distance calls through the subscriber's system to or from other systems (ESSX service or non ESSX service) provided such connections to the exchange or long distance network are only made one system at a time. (T)
- G. Where completion of incoming and outgoing local and long distance calls through a subscriber's system is furnished to or from main station lines of a separate subscriber's system in another exchange or a non-subscriber's system in the same or different exchange, the charges applicable for the following features apply in addition to the regular charges for the facilities connecting the systems except for Subsidiary System Arrangements furnished under the *terms and conditions* specified in A112.26.12. (T)
 - 1. Rates and charges as specified in Section B3. of the Private Line *Guidebook* apply to miscellaneous lines furnished with unique access codes (trunk level access) except for tie lines furnished in connection with Subsidiary System Arrangements as specified in A112.26.12. (T)
 - 2. Optional features charges for ESSX service as outlined in A112.26.12 apply for each trunk terminated main station line as offered in A112.26.7, as appropriate. (T)
- H. Where the lines are arranged to switch calls through the system to or from one or more tie lines or private lines, charges for Dial Cut-Through Arrangement as specified in A112.26.7 shall apply per tie line so equipped. The charge is in addition to the regular charges for the facilities connecting the systems. (T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service - Vintage II (Cont'd)

A112.26.2 Terms and Conditions (Cont'd)

- I. Dormitory service is furnished in accordance with the terms and conditions for Dormitory Communications Service specified in Section A13.
- J. A system may not be provided for Intercommunication (stand alone) service only. Access to the exchange network must be provided.
- K. A mixture of Flat Rate and Message/ Measured Rate Service will not be allowed within a single customer system except where that a single customer system serves a Hotel/Motel or Hospital. For Hotel/Motel and Hospital applications, Message/ Measured Rate Service, if provided for guest/patient service, must have a separate dial access code from the flat rate service provided for administrative stations and be restricted from use of the administrative flat rate service.
- L. Suspension of Service - With the exception of Network Access Registers, suspension of ESSX service is not permitted.
- M. A twelve month minimum service period shall be required for subscription to ESSX service-M or ESSX service-L. The minimum service period as specified in Section A2. applies for ESSX service-VS and S.
- N. Touch-Tone service will be furnished subject to the terms and conditions, specified in Section A13. The rates and charges for ESSX service include the provision of Touch-Tone Service. Rates and charges as specified in Section A13. do not apply for the provision of Touch-Tone Service to ESSX service.
- O. Listings will be furnished subject to the rates, terms and conditions specified in Section A6. (T)
- P. The number of simultaneous exchange and toll network calls to and from main station lines and attendant positions of a subscriber's system is limited by the number of Network Access Registers subscribed to by the customer. Each Network Access Register may be arranged for two-way, one-way incoming or one-way outgoing operation depending upon the option of the customer at the time the Network Access Register is installed. When a change in the type of operation is requested by the customer, the Line Change Charge as specified in Section A4. is applicable.
- Q. Service charges, as specified in Section A4., apply to all subscriber's systems except as provided in A112.26.5.
- R. ESSX service installation charges due on an initial installation or subsequent addition may be paid in full at the time of installation or deferred over a predetermined period of time as specified in Section A22.
- S. If the subscriber of an ESSX service elects a Message/ Measured Rate Service option, Message/ Measured Rate Service usage charges specified in Section A3. are applicable on calls to locations outside the subscriber's system in addition to rates and charges in this and other guidebook sections for ESSX service and other associated services. Usage charges are not applicable on calls originated and terminated within the same subscriber's system.
- T. ESSX service main station lines may be restricted from dialing three-digit central office and service codes by applying Code Restriction to the line. The three-digit codes which may be restricted constitute those codes to which Public Announcement, Directory Assistance or Dial-It Services (e.g. 900, 211, 311, 511, 711, and 811 calls) are assigned which could generate billing to the originating main station line. Code Restriction arrangements may also be used to prohibit toll calls to a carrier other than the Presubscribed Interexchange Carrier (dialed 10XXX and 101XXXX). InterLATA calls dialed 0- (operator handled) calls cannot be restricted. The term "Public Announcement Services" as used herein are those services which, in the judgement of the Company, furnish advertised recorded announcement messages to the general public (e.g., time, weather, sport scores and stock market reports). The Public Announcement Service central office codes will be determined by the Company and will be commonly denied access in the office serving the subscriber's systems subscribing to this service arrangement.
 - 1. At the time a Code Restriction Arrangement is installed, the subscriber's system will be arranged for the code restriction specified by the customer and the main station lines designated by the customer will be so equipped. When the customer requests the subsequent addition or removal of code restriction on a main station line, the Secondary Service Charge as specified in Section A4. is applicable.
 - 2. Where Code Restriction applies to a particular central office code, direct outward dialed main station line access is denied to telephone numbers associated with that central office code.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service - Vintage II (Cont'd)

A112.26.2 Terms and Conditions (Cont'd)

T. (Cont'd)

3. Code Restriction Arrangements to deny access to Directory Assistance and/or Public Announcement Services are not assured. These features are intended to limit main station line direct dialed outgoing calls but such calls may, in certain circumstances be completed and charges will apply as specified elsewhere in this *Guidebook*.

U. End User Charges as specified in the End User Common Access Service section of BellSouth *F.C.C.* No. 4 apply as appropriate. (T)

V. Each system established per customer must consist of a minimum of one (1) Main Station Line. Systems installed or ordered prior to May 11, 1992 are not subject to this *terms and condition*. Small systems installed or ordered prior to May 11, 1992 may have less than 25 main station lines. (T)

W. ESSX service subscribers with rates and charges applicable out of the Vintaged Section A112.12 may subscribe to features found in A112.26 but not offered in A112.12. (T)

X. ESSX service subscribers with rates and charges applicable out of the Vintaged Section A112.12 wishing to add or change features must apply nonrecurring charges as indicated in A112.26. (T)

Y. For purposes of application of End User Access Charges only, as set forth in BellSouth *F.C.C.* No. 4, ESSX service main station lines for use by residents of dormitory living quarters will be considered residential service. Main station lines terminated in dormitory housing for administrative or other business use will not fall in this classification.

Z. Call Block, Call Return, Call Selector, Call Tracing, Preferred Call Forwarding, Repeat Dialing, Caller ID and Calling Number Delivery Blocking are Optional Service Features listed in A112.26.12. These features require the implementation of Common Channel Signaling System #7 (CCS7) into the network and may have limited availability. These features will only operate interoffice on local calls originating and terminating within Central Offices equipped with CCS7. These features will operate intraoffice prior to implementation of CCS7. These features will not work on an originating basis with party-line service, Toll Terminals, Trunks, and some Remote Switching Locations. Also, feature screening lists can only contain local telephone numbers of subscribers served out of CCS7 equipped Central Offices.

The Company will deliver all numbers, subject to technical limitations, including telephone numbers associated with Non-published Listing Service as described in Section A6. (T)

Optional Calling Number Delivery Blocking is available upon request, at no charge, to the following entities and their employees/volunteers, for lines over which the official business of the agency is conducted including those at the residences of employees/volunteers where the head of the agency certifies to local Company management a need for blocking based upon health and safety concerns: (a) Non-profit, tax exempt, private and public social welfare agencies such as domestic violence intervention agencies, (b) federal, state and local law enforcement agencies. Other anonymity options may be made available to federal, state and local law enforcement agencies upon request at no charge.

The Company's liability arising out of the provision of these features, including but not limited to the delivery or non-delivery of calling numbers, or the provision of other anonymity options to law enforcement agencies, is limited as set forth in A2.5.1. (T)

Telephone numbers transmitted via Caller ID or Call Tracing are intended solely for the use of the Caller ID or Call Tracing subscriber. Resale of this information is prohibited by this *Guidebook*, except the callers' numbers may be provided to the subscriber's client for those calls sponsored or provided by that specific client where the client's identity is disclosed to the caller and the client agrees not to distribute such information to others. (T)

AA. ESSX service subscribers ordering Assumed Dial '9' must use station terminal equipment that utilizes dual tone multi-frequency (DTMF) signaling.

AB. For every ESSX service main station line extended into a Foreign Exchange the ESSX service subscriber must terminate an ESSX service main station line in the exchange in which their common equipment is located. ESSX service main station lines extended into a Foreign Exchange do not apply toward the four line minimum.

AC. Service order charges will not apply for the provision of Calling Number Delivery Blocking.

AD. Calling Number Delivery Blocking - Permanent is provided subject to availability of facilities where technically feasible. The Company assumes no liability and will be held harmless from any incompatibility of the customer's CPE to perform satisfactorily with the network feature described herein.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service - Vintage II (Cont'd)

A112.26.2 Terms and Conditions (Cont'd)

(T)

AD. (Cont'd)

This feature, when established on a customer's line, enables subscribers of Non-Published Listing Service or special agencies as described below to prevent the transmission of their Directory Number and/or Directory Name on all outgoing calls placed from the customer's line. Calling Number Delivery Blocking - Permanent is established and/or removed from the customer's line via a service order. This feature is in operation on a continuous basis. Calling Number Delivery Blocking does not prevent transmission of the calling party number on services such as E911 that utilize Automatic Number Identification (ANI) for delivery of the calling number.

If the preassigned access code for Calling Number Delivery Unblocking is dialed on a line that is provisioned with Calling Number Delivery Blocking - Permanent, the Directory Number and/or Directory Name will be delivered.

Calling Number Delivery Blocking - Permanent (NOB) is available upon request, to the following entities and their employees/volunteers, for lines over which the official business of the agency is conducted including those at the residences of employees/volunteers where the head of the agency certifies to local Company management a need for blocking based upon health and safety concerns: (a) Non-profit, tax exempt, private and public social welfare agencies such as domestic violence intervention agencies, (b) federal, state and local law enforcement agencies. Other anonymity options may be made available to federal, state and local law enforcement agencies upon request at no charge.

- AE.** The Company's liability arising out of the provision of Calling Number Delivery Blocking, including but not limited to the delivery or non-delivery of calling numbers, or the provision of other anonymity options to law enforcement agencies, is limited as set forth in A2.5.1.

(T)

This feature allows a customer to temporarily prevent the transmission of that customer's Directory Number and/or Directory Name and thus control their availability to the called party.

The transmission of the Directory Number and/or Directory Name can be temporarily prevented on an as needed basis by dialing a preassigned access code prior to making a call. This action must be repeated each time a call is made to prevent the transmission of the Directory Number and/or Directory Name.

Calling Number Delivery Blocking - Per Call is provided subject to availability of facilities where technically feasible. The Company assumes no liability for and will be held harmless from any incompatibility of the customer's CPE to perform satisfactorily with the network feature described herein. Calling Number Delivery Blocking does not prevent transmission of the calling party number on services such as E911 that utilize Automatic Number Identification (ANI) for delivery of the calling number.

A112.26.3 Definitions

ACCESS CODE RESTRICTION GROUP (ACRG/CAT CODES)

An ACRG will allow stations (assigned to that ACRG) access to predefined facilities. Station access to facilities is restricted by the station ACRG assignment to the predefined facilities. Up to eight ACRGs can be established by the Company for each ESSX service group.

ACCESS LINES TO CUSTOMER ORIENTED FACILITIES (AUXILIARY SERVICE)

Allows dial access from ESSX service for connection to customer oriented facilities. (Recorded Telephone Dictation, Dial Code Sending Equipment and Loudspeaker Paging.)

ADVANCED PRIVATE LINE TERMINATIONS

See Miscellaneous Line Terminations.

ASSUMED DIAL "9"

Utilizes central office capabilities to allow the main station line equipped to access the network without dialing "9".

ATTENDANT ACCESS CIRCUIT

An attendant access circuit connects customer provided attendant terminal equipment to the serving central office. These circuits are used for the completion of calls directed to the attendant, extension of those calls to stations and attendant assistance for stations.

ATTENDANT CONFERENCE (AUXILIARY SERVICE)

(O)

Using a six-port conference circuit, an attendant may interconnect up to five conferees on one call. The sixth port is required for attendant access.

(O)

ATTENDANT CONTROL OF FACILITIES (AUXILIARY SERVICE)

(O)

Attendant Control of Facilities is a console attendant position option service arrangement which permits a subscriber's system attendant to restrict the dial access of all main station lines to FX, WATS, CCSA, EPSCS, ETS, IC and tie line terminations associated with that system. When such restriction is in effect, attempted outward dialed calls will be routed to the attendant.

(O)

ATTENDANT EMERGENCY OVERRIDE (AUXILIARY SERVICE)

(O)

This feature allows an attendant to override a main station line busy condition set by a make busy key. The attendant dials an access code plus the extension number and will terminate to the specific main station line dialed, regardless of call forwarding, series completion or multiline hunt arrangements.

(O)

ATTENDANT POSITION

(O)

Customer provided terminal equipment utilized for attendant control and call connecting functions.

(O)

ATTENDANT SERVICE (AUXILIARY SERVICE)

(O)

Incoming calls to the main listed number are answered by an attendant, who may complete the call to the desired main station line by means of the Call Transfer feature.

(O)

AUTOMATIC CALLBACK

(O)

Automatic Callback permits a main station line user who attempts an intercommunication call to a busy main station line to be automatically connected to that line when both called and calling lines are subsequently idle. Automatic Callback is only operational for intercommunication calls between main station lines served by the same No. 1 or 1A ESS customer group.

(O)

A calling main station line is permitted only one Automatic Callback request at a time. The called main station line is limited to only one request at a time for Automatic Callback. Once requested, Automatic Callback will remain active for a period not to exceed thirty minutes unless deactivated by the calling main station line.

(O)

EFFECTIVE: February 28, 2006

(O)(T)

A112.26.3 Definitions (Cont'd)

(O)(T)

AUTOMATIC ROUTE SELECTION - BASIC (ARS-B)

(O)

Automatic Route Selection - Basic (ARS-B) is an optional feature available where facilities permit, that allows station users, by dialing a preselected code to automatically select the preferred route subscribed for by a customer for network calls. Alternate routing to other facilities, subscribed for by the customer, is also provided. This arrangement is available for use with Foreign Exchange, WATS, CCSA off-net, tie lines and Interexchange Carrier (IC) access lines which are compatible with ARS and toll network facilities.

(O)

Automatic Route Selection - Basic is accessed by dialing a single code (1, 2, or 3 digits) which automatically selects the appropriate route (FX, WATS, CCSA off-net, tie line, IC access line or the Toll Network) to complete the call. If all facilities in the initial route selected are busy, the call will advance to other routes in the selected pattern. Patterns may consist of up to four (4) private routes. If no route is available, the call will route to the toll network or overflow tone (customer option). All patterns accessed by a single access code will have the same final route, either the toll network or overflow tone.

(O)

For calls using FX, WATS, CCSA off-net, IC or toll access line facilities, the routing may be based on a Number Plan Area (NPA) and limited to specified central office codes within the NPA as designated by the customer. This is referred to as Foreign Area Discrete Translation.

(O)

Automatic Route Selection - Basic is a call routing capability and therefore all codes must be in a route for selection. Code blocking is not provided by this feature.

(O)

Facility - A facility denotes a specific FX, CCSA, WATS circuit, tie line or IC Access Line circuit.

(O)

Route - A route is a group of one or more facilities of the same type used to complete 7 or 10 digit calls between the same points.

(O)

Route Selection - The automatic selection of the preferred route as predetermined by the customer upon dialing of an access code by the station user.

(O)

Pattern - A group of routes arranged to be selected in a sequence specified by the customer.

(O)

Area Code - An Area Code is a three numeral code to designate the geographical Number Plan Area (NPA) used in network dialing.

(O)

Foreign Area Discrete Translation - Foreign Area Discrete Translation is the screening of a specific group of digits by the ESS switcher to determine proper call routing.

(O)

AUTOMATIC ROUTE SELECTION-DELUXE (ARS-D)

(O)

ARS-D provides for the origination of only ten digit On-Network calls to a public network telephone number, after the system ARS-D access code, (e.g., "8"), automatically scans the digits and selects a first choice completing route when available. Routes may include Foreign Exchange Trunk lines, Wide Area Telephone Service lines, exchange trunk lines to the toll network or access lines to CCSA or other arrangements where compatible.

(O)

The final completing route may be the toll network or, at the option of the customer, the call attempt is routed to overflow tone if a Facilities Restriction Level (FRL) is insufficient to complete the call.

A112.26 ESSX Service - Vintage II (Cont'd)

(O)(T)

A112.26.3 Definitions (Cont'd)

(O)(T)

BASIC LINE TERMINATIONS

(O)

See Miscellaneous Line Terminations.

(O)

CALL BLOCK

(O)

This feature provides the customer the ability to prevent incoming calls from up to six different telephone numbers.

(O)

A screening list is created by the customer either by adding the last number associated with the line (incoming or outgoing), or by preselecting the telephone numbers to be blocked. When a call is placed to the customer's number from a number on the screening list, the caller receives an announcement indicating that the party he is attempting to call does not wish to receive calls at this time.

(O)

If the customer also subscribes to Preferred Call Forwarding and/or Call Selector and the same telephone numbers appear on those screening lists Call Block will take precedence.

(O)

This feature will not work if the incoming call is from a telephone number in a Multi-Line Hunt Group unless the telephone number is the main number of the hunt group, or is Telephone Number identified.

(O)

CALL FORWARDING - BUSY LINE

(O)

Automatically routes indialed calls to the attendant or preselected main station line when the called main station line is busy.

(O)

CALL FORWARDING - DON'T ANSWER

(O)

Automatically routes indialed calls to the attendant or to a preselected main station line when the called main station line doesn't answer within the ringing cycle. The selection or Ringing Cycle options are available on a per main station line basis and may be changed by Service Order.

(O)

CALL FORWARDING OVER PRIVATE FACILITIES

(O)

Call Forwarding over Private Facilities (CFPF) is an optional feature which includes and expands Call Forwarding - Variable (CFV) capabilities. CFPF allows a main station line user to have incoming calls forwarded to a location outside the ESSX[®] service group using a specific, selected facility or network which may include CCSA, EPSCS, ETS, WATS, Foreign Exchange, senderized tie lines and DDD. Automatic Route Selection (ARS) may also be selected for optimum routing. Activation of CFPF is identical to activation of CFV. To activate CFPF, a user goes off-hook, dials a CFV (CFPF) activation code, the selected facility/network access code plus the called number. When the called number answers, the calling user hangs up. From that point all calls to the calling user's main station line are forwarded to the distant location. To deactivate CFPF, the calling user dials a CFV (CFPF) deactivation code.

(O)

CALL FORWARDING - VARIABLE

(O)

When activated by a main station line user, this feature automatically routes calls intended for his main station line to any other main station line selected within the same system or optionally outside the subscriber's system. The main station line selected may also be the attendant. The attendant may also activate call forwarding for a main station line.

(O)

CALL HOLD

(O)

Allows a main station line user to place any call involving his main station line on hold by flashing and dialing a special code. The main station line is then free to originate another call. The first call is retrieved by dialing the hold code a second time.

(O)

CALL PICKUP

(O)

Allows a main station line user to answer calls directed to another main station line within the same preset Call Pickup group.

(O)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service - Vintage II (Cont'd)

(O)(T)

A112.26.3 Definitions (Cont'd)

(O)(T)

CALL RETURN

(O)

This feature enables a customer to place a call to the telephone number associated with the most recent call received, whether or not the call was answered or the number is known. The customer can dial a code to request that the network place the call.

(O)

If the called line is not busy, the call is placed. If the called line is busy, a confirmation announcement is heard. Once the customer hangs up, the network will monitor the busy/idle status of both lines every 45 seconds for up to 30 minutes. If during the queuing process both lines become idle, the customer is notified, via a distinctive ring (short, short, long), that the network is ready to place the call. When the customer picks up the telephone, the call will automatically be placed. If unanswered by the customer, the distinctive ring will repeat every five minutes until answered, or for the remainder of the 30 minute monitoring interval. Multiple numbers may be placed in queue. The first idle number will be connected first. Both the customer and the called party may originate and receive calls without affecting the call return feature status.

(O)

In some locations, due to technological limitations, Call Return must be purchased with Repeat Dialing.

(O)

CALL SELECTOR

(O)

Call Selector provides a distinctive ring pattern to the subscribing customer for up to six specific telephone numbers.

(O)

The customer creates a screening list of up to six telephone numbers through an interactive dialing sequence. When a call is received from one of the predetermined telephone numbers, the customer is alerted with a distinctive ringing pattern (short, long, short). Calls from the telephone numbers not included on the screening list will produce a normal ring.

(O)

If the customer also subscribes to Call Waiting and a call is received from a telephone number on the Call Selector screening list while the line is in use, the Call Waiting tone will also be distinctive.

(O)

When a telephone number on the Call Selector screening list also appears on the Preferred Call Forwarding list, the Preferred Call Forwarding will take precedence. Likewise, when the same number is shown on the Call Block list, the call will be blocked.

(O)

The customer's line will not produce a distinctive alert if the calling line is not referenced to and originated by the main telephone number or a Telephone Number identified number that represents all the lines in a collection of lines, such as a multi-line hunt group.

(O)

CALL TRACING

(O)

Call Tracing enables the customer to initiate an automatic trace of the last call received.

(O)

Upon activation by the customer, the network automatically sends a message to the Company's Security Department indicating the calling number, the time the call was received, and the time the trace was activated. The customer using this feature would be required to contact the local business office for further action. The customer is not provided the traced number.

(O)

Only calls within central offices equipped with CCS7 are traceable using Call Tracing.

This feature will not work if the incoming call is from a telephone number in a multi-line hunt group, unless the telephone number is the main telephone number in the hunt group or is Telephone Number identified.

(O)

(O)

If the customer receives another call after hanging up from the annoying call, prior to activating the trace, Call Tracing will not record the correct number.

(O)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service - Vintage II (Cont'd)

A112.26.3 Definitions (Cont'd)

CALL TRANSFER - ALL CALLS

Call Transfer - All Calls provides for the transfer, consultation hold and add-on by an ESSX service main station of any established call between stations inside or outside a subscriber's system.

CALL TRANSFER INTER-ESSX SERVICE SCREENING

Call Transfer Inter-ESSX service Screening is an extension of Dial Transfer Screening which may be used in ESSX service complexes that may have overlapping extension ranges. With this feature it is possible to optionally restrict transfers of external calls to main station lines outside the customer group of the controller party.

CALL WAITING - DIAL (DCW)

The Dial Call Waiting (DCW) feature provides the ability for originating ESSX service main station lines to invoke call waiting service on selected intragroup calls by dialing an access code followed by the extension number of the main station line to be call waited. Dial Call Waiting also includes the features of Call Waiting - Originating.

CALL WAITING - INTRAGROUP

Permits intragroup calls to a busy main station line equipped with the feature to be answered while the existing call is held.

CALL WAITING - ORIGINATING

Allows the application of the Call Waiting tone from the originating main station line to any busy main station line in the same system.

CALL WAITING - TERMINATING

Informs a busy main station line, when the main station line is so equipped, that an incoming call is waiting (burst of tone), and permits holding the present connection while answering the new call and return to the original connection.

CALLER ID

This feature enables the customer to view on a display unit the Directory Number (DN) on incoming telephone calls.

When Caller ID is activated on a customer's line, the Directory Numbers of incoming calls are displayed on the called CPE during the first long silent interval of the ringing cycle.

Any customer subscribing to Caller ID will be responsible for the provision of a display device which will be located on the customer's premises. The installation, repair, and technical capability of that equipment to function in conjunction with the feature specified herein will be the responsibility of the customer. The Company assumes no liability and will be held harmless for any incompatibility of this equipment to perform satisfactorily with the network features described herein.

If the incoming call is from a caller served by a PBX, only the main number of the PBX is transmitted and available for display.

If the incoming call originates from a multi-line hunt group, the telephone number transmitted will always be the main number of the hunt group.

Caller ID is not available on operator handled calls.

The Company will deliver all numbers subject to technical limitations including telephone numbers associated with Non-published Listing Service as described in Section A6.

EFFECTIVE: February 28, 2006

(O)(T)

A112.26.3 Definitions (Cont'd)

(O)(T)

CALLING NUMBER DELIVERY BLOCKING - PER CALL

(O)

This feature allows customers to prevent the transmission of that customer's Directory Number and/or Directory Name and thus control it's availability to the called party.

(O)

The transmission of the Directory Number and/or Directory Name can be temporarily prevented on an as needed basis by dialing a preassigned access code prior to making a call. This action must be repeated each time a call is made to prevent the transmission of the Directory Number and/or Directory Name.

(O)

CALLING NUMBER DELIVERY BLOCKING - PERMANENT

(O)

This feature enables certain subscribers as described in A12.1, preceding, to prevent the transmission of their Directory Number and/or Directory Name on all outgoing calls placed from the customer's line. Calling Number Delivery Blocking - Permanent is established and/or removed from the customer's line via a service order. This feature is in operation on a continuous basis. Calling Number Delivery Blocking does not prevent transmission of the calling party number on services such as E911 that utilize Automatic Number Identification (ANI) for delivery of the calling number.

(O)

If the preassigned access code for Calling Number Delivery Unblocking is dialed on a line that is provisioned with Calling Number Delivery Blocking - Permanent, the Directory Number and/or Directory Name will be delivered.

(O)

CANCEL CALL WAITING

(O)

This feature allows the customer with Call Waiting (Terminating) service to inhibit the operation of Call Waiting for one call. The customer dials the Cancel Call Waiting code, obtains recall dial tone, and places a call normally. During this call, Call Waiting service will be inactive. Anyone calling the Call Waiting customer will receive the normal busy treatment, and no Call Waiting tones will interrupt the customer's call.

(O)

CATEGORY CODES (CAT)

(O)

See Access Code Restriction Group.

(O)

CENTRALIZED ATTENDANT SERVICE (CAS) (AUXILIARY SERVICE)

(O)

CAS allows a customer having an ESSX service with data link console(s) and a number of remote PBX's and/or subscriber's systems to concentrate all attendants at one location. In addition to decreasing the number of attendants required, CAS should also result in better service and administrative control.

A112.26.3 Definitions (Cont'd)

(O)(T)

CIRCULAR HUNT

(O)

See Station Hunting Arrangements.

(O)

CODE RESTRICTION ARRANGEMENTS

(O)

A Code Restriction Arrangement automatically denies a portion or all main station lines of the ESSX service direct outward dialing access to one or more three-digit codes within the local calling area in which the system is located. Code restriction provides a distinctive tone to indicate that access is not permitted on call attempts.

(O)

The three-digit central office and service codes which may be restricted constitute those codes to which Public Announcement and Directory Assistance Services are assigned. The term "Public Announcement Services" as used herein are those services which, in the judgment of the Company, furnish advertised recorded announcement messages to the general public (e.g., time, weather, sport scores and stock market reports). The Public Announcement Service central office codes arranged for code restriction will be determined by the Company and will be commonly denied access in the central office serving the subscriber's systems subscribing to this service arrangement.

(O)

At the time a code restriction arrangement is installed, the ESSX service will be arranged for the code restriction specified by the customer and the main station lines designated by the customer will be so equipped. When the customer requests the subsequent addition or removal of code restriction on a main station line, the appropriate Service Charge as specified for a change in line termination applies per main station line affected except that no such charge applies when the code restriction arrangement is disconnected in its entirety.

(O)

Code restriction is not furnished in connection with the attendant access lines of a subscriber's system.

(O)

Where code restriction applies to a particular central office code, direct outward dialed main station line access is denied to telephone numbers associated with that central office code.

(O)

COMMON BLOCK

(O)

A Common Block is that portion of the memory storage in a No. 1 or 1A ESS central office that contains the features for a specific subscriber's system.

(O)

CONFERENCE CALLING - STATION

(O)

Allows a main station user to establish a conference connection of up to six conferees (including the originator) without the aid of the attendant.

(O)

CONSULTATION HOLD-ALL CALLS

(O)

Allows a main station user to place a call on hold by depressing the switchhook, at which time dial tone is returned. The station user may then proceed to establish connection with another internal station or outside party, and after speaking with the "consulted" party, the station user may (1) return to the call initially held, (2) depress the switchhook thereby effecting Add-On Conference, or (3) hang up and effect transfer of the initial call to the consulted party.

(O)

A112.26 ESSX Service - Vintage II (Cont'd)

A112.26.3 Definitions (Cont'd)

CUSTOMER CONTROLLED STATION RESTRICTION (AUXILIARY SERVICE)

Permits the customer to change the calling arrangement of selected main station lines to four different restrictions as follows:

Outgoing Call Restriction

Calls dialed, other than intercommunication calls, will be routed to a tone.

Incoming Call Restriction

Calls from outside the subscriber's system direct dialed to selected main station lines, will be routed to the attendant or to an announcement. Calls to the attendant and intercommunication calls are not restricted.

Station-To-Station Call Restriction

All calls dialed to selected main station lines, other than attendant calls, will be routed to an announcement.

Total Restriction

All calls dialed to or dialed from selected main station lines will be routed to the attendant or to an announcement, and outgoing call attempts will receive a tone.

DIAL "O" CALLING (AUXILIARY SERVICE)

Dial "0" Calling permits a main station line user to reach an attendant position by dialing the single digit "0".

DIAL CODE SENDING (CODE CALLING) FEATURE

Code Calling provides dial access to customer-premises located code calling equipment by main station line, attendant access and tie lines of a subscriber's system. The dialed two or three digit code activates signaling devices on the customer's premises to produce a coded signal corresponding to the dialed code. The called party, upon recognition of the signal, is automatically connected to the calling party by dialing a special code from any main station line in the subscriber's system.

DIAL CUT-THROUGH ARRANGEMENTS

See Miscellaneous Line Terminations.

DIAL THRU ATTENDANT (DTA)

The DTA feature allows main station line users to complete dialing on other than station-to-station calls after the attendant selects the trunk facility on attendant-handled outgoing calls.

DIALTONE PROVISIONING (Dial Tone II)

This feature will provide ECAS customers with the capability of requesting new service on stations through ECAS as well as the ability to disconnect service on existing stations.

Two options are available.

Option 1 - allows the customer to subscribe to reserved loop facilities as described in A112.26.13.

Option 2 - the ECAS customer has no reserved facilities and simply places an order via ECAS for new service.

(T)

DIRECT CONNECT NUMBER (MANUAL ORIGINATION)

See Hot Line Station.

DIRECT INWARD DIALING

Incoming calls from the exchange or toll network may be dialed directly to any called main station line served by the ESSX service main switching equipment without the help of an attendant.

DIRECT OUTWARD DIALING

Outward calls may be dialed directly to completion from any unrestricted main station line served by the ESSX service main switching equipment without the help of an attendant.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service - Vintage II (Cont'd)

(O)(T)

A112.26.3 Definitions (Cont'd)

(O)(T)

DIRECTED CALL PICKUP - BARGE-IN

(O)

Allows calls directed to a main station line with the Directed Call Pickup feature to be answered by any main station line in the Call Pickup group. This is accomplished by dialing an access code followed by the extension number of the main station line to which the call was directed. If the main station line has already answered, a three-way connection is established.

(O)

DIRECTED CALL PICKUP - NON BARGE-IN

(O)

The Directed Call Pickup - Non Barge-In feature allows an ESSX service main station line user to pick up an unanswered call to another ESSX service main station line equipped with Directed Call Pickup by dialing a special answer code plus the number of the main station line being rung. If the main station line being rung has already answered, busy tone will be returned to the main station line user dialing the answer code and station line number.

(O)

DISTINCTIVE RINGING AND CALL WAITING TONE

(O)

Distinctive Ringing and Call Waiting Tone are furnished in different classes which permit main station line users to identify the source of calls. These three classes identify:

(O)

Class	Call Source
A	Intercommunication
B	Direct inward dialed local and toll Attendant completed CCSA access line Tie Line
C	Call Waiting-Originating Console night service arrangement

(O)

(O)

(O)

(O)

Distinctive ringing is furnished to indicate the source of calls to idle main station lines. Distinctive tone is furnished to indicate the source of calls to busy main station lines equipped for Call Waiting optional service features.

(O)

A distinctive ringing/tone is furnished to each class and is used to identify all call sources within each class.

(O)

ELECTRONIC MESSAGE REGISTRATION SERVICE (AUXILIARY SERVICE)

(O)

Provides for automatic counting, storage and display of stored message unit count for local message units generated from individual main station lines arranged for this feature. Customer provided terminal equipment is used to retrieve and display message unit usage. An optional customer provided tape printer may be used where printed tape is desired in addition to the visual display.

(O)

ESSX CUSTOMER ADMINISTRATION SERVICE (ECAS)

(O)

Provides the customer with the capability to activate/deactivate specific optional ESSX service features, change service options, and display and verify the features and service options on a per main station basis.

(O)

ESSX SERVICE MAIN STATION EXTENSION SERVICE

(O)

ESSX service main station extension service consists of an additional station or stations on the same station circuit as the associated ESSX service main station.

(O)

ESSX SERVICE MAIN STATION LINE

(O)

An ESSX service Main Station line connects customer provided terminal equipment to the serving central office.

(O)

FLEXIBLE INCOMING CALL RESTRICTION (AUXILIARY SERVICE)

(O)

Permits the customer to route incoming calls for preselected main station lines to the attendant, to a recorded announcement, or to a designated main station line.

(O)

HOT LINE STATIONS (MANUAL ORIGATION)

(O)

Stations specially programmed to dial a specific internal station number or "0" for the attendant when the station user goes off-hook.

(O)

INTERCEPT

(O)

Intrasystem and incoming network calls dialed to unassigned numbers are routed to common recorded announcements.

(O)

INTERCOM

(O)

Provides station to station calling for the customer within the subscriber's system without utilizing Network Access Registers, but does require additional central office equipment.

(O)

LOUDSPEAKER PAGING FEATURE

(O)

Allows the subscriber's attendants and main station line users to dial access customer provided loudspeaker paging equipment. Capabilities are provided to allow multizone paging where a separate access code or directory number is provided for each zone within a customer's location. Optional arrangements may be provided to allow the paged party to be connected to the calling party by dialing an answering code from any main station line within the subscriber's system.

(O)

MISCELLANEOUS LINE TERMINATIONS

(O)

Miscellaneous lines are those lines not basic to the system; such as, Tie Lines, WATS, Foreign Exchange, CCSA, IC, etc., which require ESSX service switching capabilities in order to function with ESSX service.

(O)

Advanced Private Line Termination (APLT)

(O)

The APLT unit is used to terminate tie lines, private line facilities and access lines from switched private line services, such as Enhanced Private Switched Communications Service (EPSCS), and access lines furnished by Interexchange Carriers to the ESSX service dial switching equipment.

(O)

Basic Line Terminations

(O)

Provides terminations (senderized) for miscellaneous lines interconnecting a subscriber's system to distant switching systems and access to Foreign Exchange and WATS lines, etc. This arrangement does not provide for switching (Tandem) through the ESSX service for connection to miscellaneous lines of the distant switching system.

(O)

Optional Dial Cut-Through Arrangements (Tandem)

(O)

Provides for the switching (nonsenderized) of calls which either originate within the subscriber's system and terminate in distant systems over certain miscellaneous lines, and/or switch tandem through the system between certain miscellaneous lines where the digits dialed by the calling party are transmitted to the distant system directly as they are dialed by the calling party.

(O)

Trunk Equipment

(O)

Provides access to the subscriber's system by means of a simulated facilities group and permits dialing of calls over miscellaneous lines to and from ESSX service main station lines.

(O)

MULTI-LINE HUNT GROUP (BASIC)

(O)

See Station Hunting Arrangements.

(O)

NETWORK ACCESS LIMITER

(O)

The Network Access Limiter limits switched non-intercom exchange access in a subscriber's system equivalent to that of a local exchange line group.

(O)

A112.26.3 Definitions (Cont'd)

(O)(T)

NETWORK ACCESS REGISTER

(O)

The Network Access Register provides for exchange and long distance message network calling to and from main stations and attendant positions of a subscriber's system.

(O)

OFF-HOOK QUEUE

(O)

See Queuing

(O)

PREFERENTIAL HUNT

(O)

See Station Hunting Arrangements.

(O)

PREFERRED CALL FORWARDING

(O)

Preferred Call Forwarding allows the customer to transfer selected calls to another telephone number. A screening list of up to six numbers is created by the customer and placed in the network memory via an interactive dialing sequence. Subsequently, calls are forwarded to the Call Forwarding telephone number only if the calling number can be obtained and is found to match a number on the screening list.

(O)

If the customer also subscribes to Call Block and the same telephone number is entered on both screening lists, the Call Block feature must be deactivated to allow the call to be forwarded.

(O)

This feature will not work if the calling line is not referenced to and originated by the main telephone number or Telephone Number identified number that represents all the lines in a collection of lines, such as a multi-line hunt group.

(O)

QUEUING

(O)

Deluxe Queuing

(O)

Deluxe queuing permits station users to be placed in a queue whenever the first choice route for completing a particular call is already in use. Two queuing arrangements are available:

(O)

- A Ring-back Queue (RBQ), in which case the calling station goes on-hook and is called back when a facility becomes available.

(O)

- An Off-hook Queue (OHQ), in which case the calling station remains off-hook and is held in queue until a facility becomes available.

(O)

Outgoing Trunk Queuing - WATS (OTQ) - Phase 1 (Auxiliary Service)

(O)

Outgoing Trunk Queuing - WATS is an ESSX service optional feature, available where facilities permit, that allows main station line users, by dialing a preselected code, to have their call held in queue (stored), if all the associated WATS access lines are in use for prior calls. The call is completed, without further dialing, when a facility becomes available; or on reaching the time limit in queue, is advanced to the preselected option. The calling main station line must remain off-hook to retain the call in queue.

(O)

Inhibit ETS Queuing (INEQ)

(O)

The INEQ feature allows the ETS Deluxe Queuing (ETSQ) feature to be inhibited on a per-station basis for an ETS customer station. The ETSQW feature increases the utilization of outgoing facilities by allowing calls to wait until a facility is available. When a facility becomes available for a particular call on queue, the call is automatically made without redialing.

(O)

RECORDED TELEPHONE DICTATION ACCESS TO

(O)

Permits access to customer-owned telephone dictating equipment by main station lines, tie trunks, and attendants within the subscriber's system. Main station line, attendant and tie trunk access must be via a line equipped with Touch-Tone signaling.

(O)

REPEAT DIALING

(O)

Repeat Dialing, when activated, automatically redials the last number the customer attempted to call. If the called line is not busy, the call will be placed. (O)

If the called line is busy, a confirmation announcement is heard, the customer hangs up and a queuing process begins. For the next 30 minutes, both the calling and called lines are checked periodically for availability to complete the call. If during this queuing process the called line becomes idle, the customer is notified, via a distinctive ring, that the network is ready to place the call. When the customer picks up the telephone, the call will automatically be placed. In some locations, due to technological limitations, Repeat Dialing must be purchased with Call Return. (O)

RING-BACK QUEUE

SELECTED CUSTOMER CONTROL OF FACILITIES (AUXILIARY SERVICE)

(O)

Selected Customer Control of Facilities is an optional feature which allows an ESSX service attendant to control dial access to an individual facility group. The facility group may be real or simulated facilities. Attendant Control of Facilities, a previously developed feature, allows for attendant control of all facilities accessed through a particular "IXX" code. The attendant can access the facilities for completion of selected calls. In contrast, Selective Customer Control of Facilities allows an attendant to control access to a particular facility group through activation and deactivation of a key connected to the Master Scan Point of the facility group. One key is associated with one facility group. All traffic, regardless of source, is denied access to the affected facility group once Selected Customer Control of Facilities is activated. When the facility group is part of an Automatic Route Selection - Basic or ARS - Deluxe route pattern, calls will automatically route to the next facility group in the routing pattern. If there is no alternate route, the call will receive normal reorder treatment. (O)

SIMPLIFIED MESSAGE DESK INTERFACE

(O)

Simplified Message Desk Interface provides customers the ability to route called number identification to a centralized point using a customer provided voice/text messaging system. A Digital ESSX service station user may have incoming calls forwarded to that centralized point when that person's station is busy or when he is not available to answer the calls. Through the use of an I/O (input/output) channel, call information is transported from the central office to the centralized point at the customer's premises. This information includes the number called, the reason for the forwarding of the call (busy or don't answer), and for intra-central office calls the calling number. That centralized point, using an optional capability, may activate a signal to the called station to give an alert that a message is waiting. (O)

SINGLE DIGIT DIALING OR ABBREVIATED DIALING FOR SERVICES

(O)

Provides ESSX service main station lines the ability to dial a one- or two-digit code to reach selected lines within the subscriber's system. Also provides the ability to use variable length codes by means of timing. Abbreviated dialed calls are completed to predesignated ESSX service administrative main station lines. This feature may also be used to reach particular internal facilities such as dial dictation equipment. Abbreviated dialing is not required where regular "IXX" or "level" access codes are utilized without conflict in the numbering plan. (O)

SPEED CALLING

(O)

Lets the main station line user place calls to a list of frequently called telephone numbers by dialing fewer digits than the complete directory number. Telephone numbers, including routing codes, are limited to a maximum of sixteen digits. The service is offered in repertory sizes of six and thirty. With the six list, the user will dial a one-digit code; with the thirty list, the main station line user will dial a two-digit code. Using the Customer Changeable capability, the directory numbers that are represented by a speed calling code may be changed by the list owner. (O)

SPLIT SERVICE OFFERING

(O)

This feature permits segregation of main station lines for a customer into separate groups, thereby enabling each group to have a different set of common features; i.e., Call Transfer, Group Use. (O)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service - Vintage II (Cont'd)

(O)(T)

A112.26.3 Definitions (Cont'd)

(O)(T)

STATION DIAL CODE SCREENING

(O)

Station Dial Code Screening permits designated main station lines to be used to originate calls to specified Message Telecommunications Service (MTS) telephones in Number Plan Areas (NPA's) and Central Office Codes within the continental U.S., and restricts these main station lines from originating calls to other MTS access lines. Three- or six-digit screening is provided.

(O)

STATION DIRECT INWARD DIALING RESTRICTION (AUXILIARY SERVICE)

(O)

Permits the customer to have selected main station lines restricted from receiving Direct In-Dialed calls from the MTS network. Direct In-Dial call attempts will be routed to the attendant.

(O)

STATION HUNTING ARRANGEMENTS

(O)

Circular Hunt, Uniform Call Distribution and Preferential Hunt are optional main station line hunt arrangements for searching over and distributing calls in a hunt group. These hunts are extensions of the basic multiline hunting feature included in basic service.

(O)

Circular Hunt

(O)

Circular Hunt permits a complete hunt over all the terminals in the group starting and ending with the dialed number.

(O)

Multi-Line Hunt Group (Basic)

When a call is originated to a busy station line in a basic multi-line hunting group, the call hunts once in a pre-arranged order for an idle station through all remaining station lines in that group.

(O)

(O)

Preferential Hunt

Preferential Hunt permits a prehunt over a subset or preferential group of main station lines before hunting through the entire multi-line hunt group. The hunt through the group may be a regular or circular hunt. Each main station line may have its own preferential group or list.

(O)

(O)

Series Non-Sequential

When a call is originated to a busy station in a series non-sequential hunting group, the call hunts for an idle station in that group in a prearranged numerical sequence. A number may not hunt to any number which would hunt back to the original number dialed.

(O)

(O)

Series Sequential

When a call is originated to a busy station in a series sequential station hunting group, the call hunts for an idle station in that group in an ascending numerical sequence. A number may not hunt to any number which would hunt back to the original number dialed. Each line can hunt to and/or be hunted from only one number.

(O)

(O)

Uniform Call Distribution

Uniform Call Distribution provides an even distribution of incoming network and intercom calls among the individual main station lines of a hunt group and includes Circular Hunt.

(O)

(O)

- Call Queuing is an option that may be added to the UCD arrangement. Queuing permits calls, in excess of main station lines in a UCD group, to be held in the central office and distributed in their order of arrival to the main station lines in the UCD group as the main station lines become available.

(O)

(O)

STATION IDENTIFICATION

An itemized list of toll calls is shown on the toll bill with the number of each originating main station line.

(O)

STATION MESSAGE DETAIL RECORDING

(O)

Station Message Detail Recording (SMDR) is a feature that provides a record, by main station line number, of originating traffic routing over local lines, tie lines, WATS Interexchange Carrier access lines and/or the toll network.

(O)

(O)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service - Vintage II (Cont'd)

(O)(T)

A112.26.3 Definitions (Cont'd)

(O)(T)

STATION MESSAGE DETAIL RECORDING - RAO

(O)

Station Message Detail Recording (SMDR) - RAO is an arrangement to provide a record by main station line number of originating intercity traffic routing over dial type tie lines, FX, WATS, CCSA, Interexchange Carrier (IC), access lines and/or the MTS Network (Toll).

(O)

The station message detail will include the calling main station line number, the called number, date, time of day, duration of call and the type of facility used. The record will be provided on magnetic tape to customers requiring message detail for cost allocation and telecommunications system management purposes. The detail will be provided on all facilities in routes selected by the customer for Station Message Detail Recording - RAO.

(O)

STATION NUMBER CORRELATION

(O)

Permits main station line numbers to be the same as numeric room numbers, where facilities permit.

(O)

STATION RESTRICTION

(O)

Various types of restrictions may be assigned as options to main station lines. A main station line may be provided with a combination of the various types of main station line restrictions available.

(O)

Full Restriction

(O)

From Incoming Calls

(O)

- Allows the main station line to receive only intra-system (including tie line and other customer oriented facilities) calls, except from the attendant. In-dialed calls from the exchange network are routed to intercept.

(O)

From Outgoing Calls

(O)

- Allows the main station line user to originate only intra-system calls to main station lines, tie lines, and FX lines, within the same system, but cannot call the attendant or use the Call Transfer feature.

(O)

From Incoming and Outgoing Calls

(O)

- Combination of the above, and in effect, Interior Service without attendant access capability.

(O)

Semi-restriction

(O)

From Incoming Calls

(O)

- Allows the main station line to receive only intra (including tie line and other customer-oriented facilities) calls, including calls from the attendant. In-dialed calls from the exchange network are routed to intercept.

(O)

From Outgoing Calls

(O)

- Allows the main station line user to originate calls to main station lines, tie lines, and FX lines, including calls to the attendant.

(O)

From Incoming and Outgoing Calls

(O)

- Combination of the above, and in effect, Interior Service with attendant access capability.

(O)

Denied Service

(O)

From Incoming Calls

(O)

- The main station line is used for outgoing calls only and cannot receive calls. All incoming calls are routed to common intercept announcement.

(O)

From Outgoing Calls

(O)

- The main station line is used for incoming calls only and no outgoing calls can be originated from the main station line.

(O)

EFFECTIVE: February 28, 2006

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service - Vintage II (Cont'd)

(O)(T)

A112.26.3 Definitions (Cont'd)

(O)(T)

Denied Access to ESSX service Facilities with Unique Access Codes (Trunk Level Access)

(O)

- This feature prevents the main station line user from dial access to certain miscellaneous lines and other customer-oriented facilities by means of category codes. A subscriber's system is limited to a maximum of eight category codes. This feature does not prevent intra-system main station line calling.

(O)

STATION-TO-STATION CALLING

(O)

Calls may be dialed directly to completion between any two main station lines of a subscriber's system.

(O)

SUBSCRIBER SYSTEM

(O)

The subscriber system consists of all stations of a customer with the same primary directory listing which are served by the same central office equipment.

(O)

SUBSIDIARY SYSTEM ARRANGEMENTS

(O)

A Subsidiary System of ESSX service is a customer provided equipment system which is furnished PBX trunks from the central office serving the subscriber's system and which is connected by the trunks to that system.

(O)

A Subsidiary System Arrangement provides station numbers, which are in sequence with the main station line numbers of the customer's ESSX service to the stations of one or more subsidiary systems.

(O)

THREE-WAY CONFERENCE

(O)

Allows a station user to add a third party to an existing two-party conversation.

(O)

TOLL DIVERSION

(O)

Toll Diversion automatically denies an ESSX service main station direct dialing access to the long distance message network. Station users attempting to place such calls are diverted to the attendant.

(O)

TOLL RESTRICTION

(O)

Toll Restriction automatically denies an ESSX service main station direct dialing access to the long distance message network. Station users attempting to place such calls will receive an announcement to indicate that access is denied.

(O)

TRUNK-ANSWER ANY STATION

(O)

Trunk Answer Any Station is an attendant position night service arrangement whereby, when activated by the attendant, calls to the primary directory listing activate a common alerting signal on the customer's premises. These calls may then be answered by a main station in the system upon dialing a special code.

(O)

TRUNK EQUIPMENT

(O)

A112.26.4 Intercept Of Calls To Unassigned Station Lines

(O)(T)

- A. Incoming calls from the exchange and toll networks to unassigned station lines are intercepted by the same standard central office recorded announcement equipment used to intercept such calls for exchange services. The announcement provided states that the number called is not in service.

(O)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service - Vintage II (Cont'd)

A112.26.4 Intercept Of Calls To Unassigned Station Lines (Cont'd)

- B.** Intercommunicating calls to unassigned station lines are intercepted by central office recorded announcement equipment which is common to all subscriber systems served out of the same office. The announcement states that the number is not in service and advises that the attendant or the directory of the caller's system should be consulted.

A112.26.5 Conversion

A. Conversion of ESSX-1 service to ESSX service

1. When a customer whose present ESSX-1 service elects to convert to ESSX service, installation and service charges do not apply to Common Equipment, in-service station lines, terminating arrangements, toll diversion and toll restriction equipped station lines, conference arrangements and other optional features and/or services provided that all of the following conditions are met:
 - a. The customer's system must continue to be served by the same central office equipment,
 - b. There must be no interruption of service, and
 - c. There are no moves, changes or additions in existing station lines, terminating arrangements, or optional features requested by the customer.
 - d. A Service Charge as specified in Section A4. will apply. (T)
2. Customers with ESSX-1 service converting to ESSX service must elect a payment period equal to or greater than the unexpired portion of their current payment plan. The following options are available.
 - a. Month-to-Month Payment Plan (One month option)
 - b. Term Payment Plan of 36, 60 or 84 months

B. Replacement of Number 1/1A ESS Central Office Equipment

1. The rates and charges in this and other *guidebook* sections for ESSX service and the associated features and services will continue to apply to existing ESSX service subscribers served at a location that is converted through no desire or fault of the subscriber to other than Number 1/1A ESS central office equipment. Should one of the aforementioned existing subscribers wish to utilize features and/or services specific to the non-Number 1/1A ESS equipment, the billing for the customer's system will be converted to rates and charges appropriate for the central office equipment providing his service. (T)

C. Conversion of ESSX Service - Vintaged to ESSX Service

1. ESSX service-vintaged consists of those rates and charges moved to Section A112. and applicable to subscribers of ESSX service as of July 10, 1989.
2. Customers with ESSX service under the Vintaged Section (A112) may select a payment period under Section A112. providing the following conditions are met: (T)
 - a. The customer's selected payment period under A112 has expired, or
 - b. The customer's selected payment period under A112 has not expired but the customer desires to select a payment period under Section A12 equal to or exceeding the unexpired portion of his current payment period.
 - (1) Charges as described under Termination Liability in A112.26.6 will not apply. (T)
 - c. A Service Charge as specified in Section A4. will apply. (T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service - Vintage II (Cont'd)

A112.26.6 Payment Schedules

A. General

1. ESSX service is offered as follows
 - a. The Payment periods are:
 - Month to Month Payment Plan (One month option)
 - 36 Month Term Payment Plan
 - 60 Month Term Payment Plan
 - 84 Month Term Payment Plan
 - b. ESSX service subscribers may select variable payment periods under the Term Payment Plan as follows.
 - (1) 36 Month Term Payment Plan - payment periods may be selected from 24 months to 48 months in length at 36 month rates and charges.
 - (2) 60 Month Term Payment Plan - payment periods may be selected from 49 months to 72 months in length at 60 month rates and charges.
 - (3) 84 Month Term Payment Plan - payment periods may be selected from 73 months to 96 months in length at 84 month rates and charges.

Rate stability for other payment periods will be handled on an individual case basis.
 - c. Items that may be placed under the ESSX service Term Payment Plan:
 - Main Station Lines
 - Extension Station Lines
 - Group A Features
 - Optional Service Features
 - System Common Equipment
 - Line Terminating Arrangements

Terms and conditions concerning the ESSX service Term Payment Plan are specified in this Section. (T)
2. The monthly rate for ESSX service is dependent upon the payment period selected by the customer.
3. The monthly rate for ESSX service under the Term Payment Plan for the periods of 36, 60, or 84 months is not subject to Company initiated rate increases.
4. ESSX service-VS and S will be offered to subscribers having 4-200 main station lines under any of the payment options offered.
 - a. An ESSX service-VS or S subscriber may elect a 36, 60 or 84 month payment period for any portion or all of the total system size with the remainder to be under the one month payment option.
 - (1) Group A line features may be added under any of the payment plan options.
 - (2) Auxiliary Attendant Features or Optional service features may be added under any of the payment plans provided that they are not added for a payment period of shorter duration than the payment period associated with the ESSX service common equipment.

EFFECTIVE: February 28, 2006

(O)

4. ESSX service-VS and S will be offered to subscribers having 4-200 main station lines under any of the payment options offered. (Cont'd) (O)
 - b. An ESSX service-VS subscriber may add station lines up to 30 lines and: (O)
 - (1) Add those lines and associated Group A line features at the one month rate specified for ESSX service-VS or, (O)
 - (2) Resubscribe the entire system under the payment periods as offered for ESSX service-S. (O)

There will be no termination liability. (O)

ESSX service-VS Subscribers will be liable for the difference in Service Establishment charges between ESSX service-VS and S. (O)
 - c. An ESSX service-S subscriber may add station lines up to 220 Lines, and: (O)
 - (1) Add those lines and associated Group A line features at the one month rate specified for ESSX service-S or, (O)
 - (2) Resubscribe the entire system under the payment periods as offered for ESSX service-M. (O)

There will be no termination liability. (O)

ESSX service-S Subscribers will be liable for the difference in Service Establishment charges between ESSX service-S and ESSX service-M. (O)
5. ESSX service-M will be offered to subscribers with 201-600 main station lines under one month, 36 months, 60 months or 84 month payment options. (O)
 - a. An ESSX service-M subscriber may elect a 36, 60 or 84 month payment period for any portion or all the total system size with the remainder to be under the one month payment option. (O)
 - (1) Group A line features may be added under any of the payment plan options. (O)
 - (2) Auxiliary Attendant Features or Optional service features may be added under any of the payment plan options provided that they are not added for a payment period of shorter duration than the payment period associated with the ESSX service common equipment. (O)
 - b. An ESSX service-M subscriber may add station lines up to the 660 Lines and: (O)
 - (1) Add those lines and associated Group A features at the one month rate specified for ESSX service-M or, (O)
 - (2) Resubscribe the entire system under the payment periods as offered for ESSX service-L. (O)

There will be no termination liability. (O)

ESSX service-M subscribers will be liable for the difference in Service Establishment charges between ESSX service-M and ESSX service-L. (O)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service - Vintage II (Cont'd)

A112.26.6 Payment Schedules (Cont'd)

A. General (Cont'd)

6. ESSX service-L will be offered to subscribers with more than 600 main station lines under one month, 36 month, 60 month and 84 month payment options.
 - a. An ESSX service-L subscriber may elect a 36, 60 or 84 month payment period for any portion or all of the total system size with the remainder to be under the one month payment option.
 - (1) Group A line features may be added under any of the payment plan options.
 - (2) Auxiliary Attendant Features or Optional service features may be added under any of the payment plan options provided that they are not added for a payment period of shorter duration than the payment period associated with the ESSX service common equipment.

B. Expiration of Payment Period

1. ESSX service-VS, S, M and L customers must upon the expiration of their payment period:
 - a. Select a new payment period as offered in the current *guidebook* (a service charge as specified in Section A4. will apply), or (T)
 - b. Revert to the current *guidebook* rates for the one month payment option if at the request of the customer (a service charge as specified in Section A4. will apply), or (T)
 - c. Revert to the current *guidebook* rates for the one month payment option if at the instance of the Company (a service charge as specified in Section A4. will not apply). (T)
2. An ESSX service-VS, S, M or L customer may at any time during his selected payment period resubscribe for an equal or longer payment period at the current *guidebook* rates subject to the following conditions. (T)
 - a. No credit will be given for payments made during the formerly selected period. Nonrecurring charges will not be reapplied.
 - b. The new payment period begins with the billing date following the date the new payment period is requested.
 - c. No termination charge applies for the former payment period.
 - d. A Service Charge as specified in Section A4. will apply. (T)
3. An ESSX service-VS, S, M or L customer may at any time during his selected payment period resubscribe for a payment period shorter in length than the time remaining in the existing service agreement, subject to the following conditions:
 - a. No credit will be given for payments made during the formerly selected period. However, nonrecurring charges will not be reapplied.
 - b. The new payment period begins with the date requested.
 - c. A termination charge will be applied to the former payment period.
 - d. A Service Charge as specified in Section A4. will apply. (T)

C. Disconnects

1. When equipment or facilities, i.e., station lines, etc., are disconnected from a system for which the current payment period is longer than one month, the expiration date of the remaining equipment and service will not be affected.
2. Equipment or facilities disconnected from a system prior to the expiration date of the payment period for such equipment will require termination charges for premature disconnection if applicable.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service - Vintage II (Cont'd)

A112.26.6 Payment Schedules (Cont'd)

D. Supersedure

Service may be transferred to a new customer at the same location upon prior written concurrence by the new customer as specified in products section of the *Guidebook*. The new customer will be subject to all provisions and equipment configurations currently in effect for the previous customer. *Terms and conditions* concerning transfer of service between subscribers as stated in other sections of this *Guidebook* also apply under the ESSX service Term Payment Plan. (T)

E. Deferred Payment

1. Payment of nonrecurring charges for ESSX service may be deferred over the length of the customer's payment period or a shorter period (in annual increments) subject to the conditions specified in this paragraph.
 - a. The charges to be deferred must be among the following types:
 - (1) Installation
 - (2) Service Establishment
 - (3) Feature Establishment
 - b. The customer must select a payment period longer than one month.
 - c. The total amount of nonrecurring charges as defined in preceding may be deferred.
 - d. The minimum amount deferrable per ESSX service System is \$1,000.00.
 - e. Interest on deferred amounts will be calculated at the rate set forth in the deferred payment agreement executed by the customer. The interest rate to be charged on deferred payments will be revised periodically by the Company. If, in the judgment of the Company, the maximum interest rate allowed by law is insufficient to cover the costs of providing the deferred payment option, the Company will suspend the availability of said option until such time as the costs of providing said option can be recovered through the application of a lawful interest rate. Suspension of the deferred payment option will not affect customers who have executed a deferred payment agreement prior to the effective date of such suspension.
 - f. The deferred charges (including calculated interest) will be prorated on a monthly basis over the selected deferral period length.
 - g. All deferred charges must be paid in full when the customer:
 - (1) Selects a payment period with an expiration date prior to the expiration date of the deferral period.
 - (2) Disconnects service, for the system, prior to expiration of the selected deferral period.
 - (3) Fails to pay a monthly amount hereunder within 30 days of its due date.
 - h. The customer may prepay only the total outstanding deferred charges at any time during the selected deferral period. Customer will be given a credit for the amount of unearned interest. Customer may not prepay less than the total of the outstanding deferred charges.

F. Prepayment

1. For payment periods longer than one month, the customer may prepay the total outstanding recurring monthly rates. The prepayment of monthly rates in no way constitutes a purchase and the Company retains full ownership of all services covered by the prepayment. The following conditions apply:
 - a. Customers who prepay six months or more will have an allowance applied. A factor of .375 percent will be credited for each month prepaid. This amounts to a discount of 4.5 percent per year.
 - b. Monthly rates for all services covered by a single Letter of Election must be prepaid. Monthly rates must be prepaid for services added subsequently and placed on the same Letter of Election (i.e., customer-elected coterminous option) with a prepaid system.
 - c. Customers who change the length of a prepaid payment period will be credited any unused portion of the prepayment, subject to termination charges as specified in G. following.
 - d. Customers who prematurely disconnect will have termination charges deducted from the prepaid amount and any balance credited to their bill.

EFFECTIVE: February 28, 2006

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service - Vintage II (Cont'd)

(O)(T)

A112.26.6 Payment Schedules (Cont'd)

(O)(T)

G. Termination Liability

(O)

The Termination Liability applicable to ESSX service is dependant upon the payment period selected by the customer. Termination charges for the optional payment periods are as follows:

(O)

1. One Month Payment Plan

(O)

a. ESSX service-VS and S Customers - No Termination Liability will be applicable.

(O)

b. ESSX service-M Customers

(O)

(1) Within 12 months of date of installation - If a customer's Main Station Line count falls below 75 percent of the total main station lines initially installed, they will be charged 90 percent of the amount due for the period remaining up to 12 months from the date of installation for each line disconnected thereafter.

(O)

(2) Beyond 12 months of date of installation No Termination Liability will be applicable.

(O)

c. ESSX service-L Customers

(O)

(1) Within 12 months of date of installation - If a customer's main station line count falls below 90 percent of the total main station lines initially installed, they will be charged 90 percent of the amount due for the period remaining up to 12 months from the date of installation for each line disconnected thereafter.

(O)

(2) Beyond 12 months of date of installation - No Termination Liability will be applicable.

(O)

2. ESSX Service Term Payment Plan Option

(O)

a. ESSX service-VS, S, M and L customers that contract a portion of their system under the ESSX service Term Payment Plan Option are subject to the following liability charges.

(O)

(1) Main Station Lines - 90 percent of the remaining amount due for each main station line disconnected after the customer's total main station line count falls below 90 percent of the total main station lines initially installed or of the annually adjusted installed total (whichever is higher). The annually adjusted total is determined every 12 months from date of original installation.

(O)

(2) All non-contracted items - No Termination Liability will be applicable.

(O)

3. A customer may move a system under a payment plan within the same jurisdiction and will not incur termination charges if existing loops and central office equipment are reusable during the current engineering interval. Main station line installation charges will apply as appropriate to all main station lines relocated.

(O)

H. Cancellation Charges

(N)

1. Cancellation charges will only apply to subscribers under the Term Payment Plan.

(N)

2. Cancellation charges will apply only to the total removal of the subscriber's ESSX service system.

(N)

3. Cancellation charges will be applied where service provided under a Term Payment Plan is removed prior to the expiration of the subscribers Term Payment Plan.

(N)

4. The customer who elects to disconnect their ESSX service prior to the end of their Term Payment Plan period will pay the lower of the Cancellation or Termination Liability charge. To determine which charge is applicable, the Company will calculate the Termination Liability charge and compare this amount to the appropriate Cancellation charge (depending on the customer's size and remaining contract duration). The customer will be billed the lower of the two charges.

(N)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service - Vintage II (Cont'd)

A112.26.6 Payment Schedules (Cont'd)

H. Cancellation Charges (Cont'd)

- 5. The following charges are applied when a total disconnect of a ESSX service system provided under a Rate Stability Plan occurs prior to the expiration of the subscribers Rate Stability Plan and the Company determines that the Cancellation Charge is lower than the Termination Liability charge.

- (1) Per Very Small or Small System

	Nonrecurring Charge	USOC
(a) Disconnect in months 1-48	\$3,000.00	NRCS1
(b) Disconnect in month 49 and thereafter	2,000.00	NRCS2
(2) Per Medium or Large System		
(a) Disconnect in months 1-48	10,000.00	NRCM1
(b) Disconnect in month 49 and thereafter	7,500.00	NRCM2

- I. When a subscriber's ESSX service under a Term Payment Plan is disconnected prior to the expiration of the selected service period as a result of a subscriber requested change to one of the separately *available* services listed following, termination or cancellation charges will not apply when: (T)

- 1. the completed service period is 12 months, and
- 2. the service period of the new arrangement for the separately *available* service equals or exceeds the remaining service period of the disconnected service, and (T)
- 3. the service orders to install the separately *available* service and disconnect the existing service are related together and there is no lapse in service between installation of the separately *available* service and disconnection of the existing service, and (T)
- 4. the service orders are for the same subscriber at the same location.

For the purposes of determining the separately *available* services to which the preceding conditions apply, the following list will be used: (T)

- MegaLink Service
- MegaLink Channel Service
- MegaLink ISDN Service
- LightGate Service

A112.26.7 Common Rates And Charges

A. General

- 1. Station Lines
 - a. The rates and charges specified herein for main station lines provide for main station line components.
 - b. The rates and charges specified herein for extension stations provide for an extension station line component. The extension station line consists of usage of traffic sensitive Central Office equipment.
 - c. The rates and charges specified herein for main and extension station lines are applicable to each main station location and extension station location respectively to which a customer-provided instrument can be connected.
 - d. Rates for the main station lines of ESSX service-VS, S, M and L customers will be based on the following criteria:
 - Main Station Group Size
 - Distance from the Serving Central Office
 - The type of payment plan selected by the customer
 - e. The total main group size will consist of main station lines and attendant access lines for all locations served by the same ESSX service.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service - Vintage II (Cont'd)

A112.26.7 Common Rates And Charges (Cont'd)

A. General (Cont'd)

1. Station Lines (Cont'd)

- f. The distance band will be based on airline mileage from the serving central office to the Network Interface Location at the customer's premises.

Where main stations are in a foreign exchange (FX) or a foreign central office (FCO) area the distance band will be calculated from the FX or the FCO to the Network Interface Location serving those main stations.

Systems with more than one location served by the same ESSX service control group will calculate the distance band per location.

- g. In a different central office serving area of a multi-office exchange:

The rate of ESSX service in a FX or FCO area is the monthly rate for the ESSX service desired, plus an FX or FCO mileage charge as specified in Section A9. (T)

When ESSX service main station lines are connected by facilities which are routed between two or more central offices in the same exchange the foreign central office mileage charge is calculated separately on an airline basis between the ESS central office from which the subscriber's system is served and the central office from which exchange service normally would be rendered.

- h. Rates, charges, liabilities and additional *terms and conditions* if applicable may be developed on an individual case basis for main station lines exceeding five (5) airline miles from the serving central office. (T)

2. Exchange Access

- a. Exchange Access is provided by means of Network Access Registers.
 b. Presubscription of a Carrier of Preference is specified in Section 13 of the Interstate Access Service Tariff.

3. Main Station Line Terminated as a PBX Trunk

- a. Where an ESSX service Main Station Line is terminated as a PBX Trunk in customer provided equipment, the appropriate recurring charge specified in A112.26.7.C. will apply in addition to the appropriate Main Station Line Rate (Intercom and Mileage). This *term and condition* does not apply to station lines installed or ordered prior to December 16, 1985. (T)

4. Subsequent Training

- a. After the initial installation of the subscriber's system, subsequent training will be provided at the charges indicated in A12.20.8.D. (T)

B. Nonrecurring Charges

1. The following nonrecurring charges for service are in addition to any applicable service connection, move, change and installation charges specified in other sections of this *Guidebook*. (T)

- a. Service Establishment Charge

- (1) Initial Service Establishment Charge

	Nonrecurring Charge	USOC
(a) Each ESSX service-VS system	\$1,000.00	NA
(b) Each ESSX service-S system	1,000.00	NA
(c) Each ESSX service-M system	1,500.00	NA
(d) Each ESSX service-L system	2,000.00	NA

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service - Vintage II (Cont'd)

B. Nonrecurring Charges (Cont'd)

1. The following nonrecurring charges for service are in addition to any applicable service connection, move, change and installation charges specified in other sections of this Guidebook. (Cont'd)
 - b. Installation Charges

These charges apply as specified, when an optional feature is added or changed. These charges apply in addition to other applicable nonrecurring charges.

One or more optional features may be provided at the same time and in such instances the specified installation charge will apply for each feature provided.
 - c. Service Connection Charges

Service Charges as specified for business service in Section A4. are applicable for each main station line, console access loop, extension station line, etc.

C. Recurring Charges

1. Common Equipment

B. Group A Line Features

1. General

ESSX service-VS and S customers may add features from Group A at the rates shown in a. or b. following if a payment period of 36, 60 or 84 months is selected. ESSX service-VS and S customers choosing the one month payment option must add Group A features at the rates specified in c. following. An additional common block may be required if certain feature parameters are exceeded. (T)

a. Group A Line Features

The following ESSX service-VS and S Group A features are available. (T)

There is no minimum number of features or groupings of features that must be obtained unless specified by the features.

- (1) Three-Way Calling, Consultation Hold, Call Transfer-Individual¹
- (2) Three-Way Calling, Consultation Hold, Call Transfer-All Calls
- (3) Call Forwarding - Busy Line
- (4) Call Forwarding - Don't Answer
- (5) Call Forwarding - Variable
- (6) Call Forwarding - Variable (Outside)
- (7) Call Hold
- (8) Call Pickup
- (9) Call Waiting Terminating
- (10) Call Waiting Originating
- (11) Speed Call (6) Customer Changeable

Note 1: An ESSX service-VS and S subscriber system may be provided with only one type of call transfer capability without using the Split Service feature. The Split Service feature in A112.26.12.L. is required to provide more than one type call transfer within the same subscriber system. (T)

B. Group A Line Features

1. General

ESSX service-M customers may add features from Group A following at the rates shown in a. or b. following if a contract period of 36, 60 or 84 months is selected. ESSX service-M customers choosing the one month payment option may add features from c. following for Group A features. An additional common block may be required if certain feature parameters are exceeded. (T)

a. Group A Line Features

The following ESSX service-M Group A features are available. (T)

There is no minimum number of features or groupings of features that must be obtained unless specified by the feature.

- (1) Three-Way Calling, Consultation Hold, Call Transfer-Individual¹
- (2) Three-Way Calling, Consultation Hold, Call Transfer-All Calls
- (3) Call Forwarding - Busy Line
- (4) Call Forwarding - Don't Answer

Note 1: An ESSX service-M system may be provided with only one type of call transfer capability without using the Split Service feature. The Split Service feature in A112.26.12.L. is required to provide more than one type call transfer within the same ESSX service-M system. (T)

A112.26.11 Telephone Numbers And Facilities Reserved For Future Use

(O)(T)

A. General

(O)

1. A customer may reserve preassigned telephone numbers and facilities necessary to meet his or her specified growth requirements at specific locations, on a mutually agreeable date. In the event the customer elects not to be provided with reserved telephone numbers, timely main station line additions cannot be assured and facilities necessary for his or her growth requirements will be provided only within normal engineering and construction intervals.

(O)

2. Telephone numbers reserved for future use service include preassigned telephone numbers and the facilities required. Such telephone numbers and facilities will be removed from reserved status and assigned as active main station lines as requested by the customer.

(O)

3. The assignment of telephone numbers and the sequence of numbers assigned to a subscriber's system is made at the discretion of the Company.

(O)

4. The service is furnished subject to the availability of facilities and telephone numbers.

(O)

5. Calls to reserved (unassigned) telephone numbers will be routed to intercept over ESSX service common recorded announcement facilities as specified in *A112.26.4*.

(O)(T)

6. Telephone numbers furnished herein retain their reserved status until assigned to a main station line at which time the service assumes rates and charges applicable to an ESSX[®] service main station line.

(O)

7. Reserved numbers not assigned to a main station line as agreed in *A112.26.11* will be billed at the following rates until removed from reserved status or billed as an active ESSX service main station line.

(O)(T)

B. Rates apply to each reserved telephone number.

A112.26.12 Optional Service Features

(O)(T)

A. Attendant Service

(O)

Central office attendant console operation is offered as an auxiliary service with ESSX service.

(O)

The Call Transfer-Attendant feature is furnished with Non-DATA Link or Universal Data Link Console operation.

(O)

As an alternative the subscriber may designate a selected station or stations to perform attendant functions. Incoming calls to the listed directory number are connected to the selected station and then completed to the desired party by operation of the Call Transfer feature.

(O)

Note 1: Apply 60 percent of the monthly rate applicable, as specified preceding for a main station line. (Intercom and appropriate mileage).

C. Centralized Attendant Service

Centralized Attendant Service (CAS) allows a customer with a number of locations that are served by either a PBX, or ESSX service to concentrate all attendants at a single centralized location (MAIN). Incoming calls over a local exchange trunk to an unattended location (BRANCH) are routed to the main location via a Release Link Trunk (RLT), where a CAS attendant completes the call by dialing the called party's extension number over the same Release Link Trunk facilities.

1. Types of Equipment With Which CAS is Associated

The main location must be a subscriber's system that is equipped for this service, and utilizes customer provided compatible terminal equipment.

The branch locations must be one of the following:

- a. ESSX service
- b. (DELETED)
- c. A location that has switching equipment that is customer-provided or is in an area that is served by another telephone company can be interconnected as a branch location only if the switching equipment is compatible with the Company's.

2. Basic Service Features

Note 1: In addition apply rates and charges as specified in Section B3. of the Private Line *Guidebook* for a private line channel between the serving central office and the customer premises and for customer provided equipment associated with that charge. (T)

Note 2: Apply recurring charges for initial installation.

EFFECTIVE: February 28, 2006

Note 1: Rates and charges for the tie line or Private Line facility are applicable for each RLT provided.

Note 2: One Installation Charge applies when any number of release link trunk groups of the same type are installed at the same time at the same location.

Note 3: Rates and charges as specified in A112.26.12.A. for equipment is required.

(T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS**A112.26 ESSX Service - Vintage II (Cont'd)****A112.26.12 Optional Service Features (Cont'd)****D. Automatic Route Selection - Basic (ARS-B)**

1. General

- a. Automatic Route Selection - Basic (ARS-B) is an optional feature, available where facilities permit that allows station users, by dialing a preselected code to automatically select the preferred route subscribed to by a customer for network calls. Alternate routing to other facilities subscribed to by the customer is also provided. This agreement is available for use with Foreign Exchange, WATS, CCSA off-net tie lines and Interexchange Carrier (IC) access lines which are compatible with ARS and the MTS network facilities.
- b. Automatic Route Selection - Basic is accessed by dialing a single code (1, 2 or 3 digits) which automatically selects the appropriate route (FX, WATS, CCSA off-net, tie line, IC access line or the MTS Network) to complete the call. If all facilities in the initial route selected are busy, the call will advance to other routes in the selected pattern. Patterns may consist of up to four (4) private routes. If no route is available, the call will route to the MTS network or overflow tone (customer option). All patterns accessed by a single access code will have the same final route, either the MTS network or overflow tone.
- c. For calls using FX, WATS, CCSA off-net or IC access line facilities, the routing may be based on a Number Plan Area (NPA) and limited to specified central office codes within the NPA as designated by the customer. This is referred to as Foreign Area Discrete Translation.
- d. Automatic Route Selection - Basic is a call routing capability and, therefore, all codes must be in a route for selection Code blocking is not provided by this feature.

2. ***Terms and Conditions***

- a. Automatic Route Selection - Basic is provided only in association with ESSX service furnished from No. 1 Electronic Switching System (ESS) central office equipment located on Company premises and may be provided, subject to the availability of facilities to subscriber systems which are served by the same such equipment.
- b. Preferred routes and alternate routing patterns will be specified by the customer.
- c. All rates and charges specified for Automatic Route Selection - Basic are in addition to the rates and charges for associated facilities.
- d. The number of patterns required by a customer are governed by the type and variety of facilities to which the customer subscribes.
- e. A single rate per facility will apply regardless of the number of patterns having access to the facility. The monthly rate specified is applicable to each facility available to the patterns.
- f. Patterns without final route to the DDD Network may be offered only if a customer subscribes to a sufficient number of facilities which, in the judgment of the Company, provides an adequate level of service so as to avoid interfering with the service of others or to prevent others from making or receiving calls over their telephone service.

A112.26 ESSX Service - Vintage II (Cont'd)

A112.26.12 Optional Service Features (Cont'd)

D. Automatic Route Selection - Basic (ARS-B) (Cont'd)

2. Terms and Conditions (Cont'd)

- g. Where a route is used in one pattern (pattern reached by one access code) only one translation may be provided per route. Where a route is used in two or more patterns each pattern is accessed by different access codes. One translation per pattern may be provided subject to the appropriate charges as specified in paragraph E.1.d. following. Where central office code translation is required for more than one Numbering Plan Area (NPA) per single facility group or route, rates and charges as specified should be applied for each NPA translated.
- h. A group of patterns may have either the DDD Network as a final route or overflow tone. A combination of both within the same pattern group is not permitted. Dial "9" may be used as an access code only if the patterns accessed have the DDD Network as a final route.
- i. Where toll restricted main station lines have access to ARS-Basic patterns with final route to the DDD Network, apply charges and rate as specified for patterns with overflow to tone in lieu of the charge and rate specified for final route to the DDD Network

E. Station Message Detail Recording Via Revenue Accounting Office (RAO)

- 1. General
 - a. Station Message Detail Recording (SMDR) - RAO is an arrangement to provide a record, by main station line number, of originating intercity traffic routing over dial type tie lines, FX, WATS, CCSA, Interexchange Carrier access lines and or the MTS Network (Toll) and at the customer's option on certain incoming calls² that the attendant extends to a station or the line within the customer's ESSX service group.
 - b. The station message detail will include the calling main station line number, the called number, date, time of day, duration of call and the type of facility used. The record will be provided on magnetic tape, to customers requiring message detail for cost allocation and telecommunications system management purposes. The detail will be provided on all facilities in routes selected by the customer for Station Message Detail Recording - RAO.
- 2. **Terms and Conditions**
 - a. Station Message Detail Recording (SMDR) - RAO may be offered to main station lines of customers where facilities permit and where the Company's message billing process has been arranged to provide this optional feature.
 - b. Station Message Detail Recording - RAO is not represented to be a provision of billing detail. Where tie line, Interexchange Carrier access line, and Foreign exchange facilities are involved all such call attempts, whether completed or not, will appear in the SMDR - RAO.
 - c. Station Message details will be provided on magnetic tape. The tape density and number of tracks will be that used by the program and data processing system in use by the Company's accounting center furnishing the tape. The customer will be responsible for making the tape format compatible with his data processing equipment.

Note 1: Additions of patterns, per pattern, see A112.26.12.D.3 preceding.

Note 2: SMDR - RAO detail on incoming calls does not include the calling number or the type of facility used.

2. Terms and Conditions (Cont'd)

- d. A magnetic tape will be provided by the Company on each occasion Station Message Detail Recording - RAO is furnished to the customer. The tape becomes the property of the customer on a "no exchange" basis and the tape may not be returned to the Company for reuse.
- e. Station Message details may be provided on all facilities subscribed for the customer including the Network (Toll), but will not include intercom calls originated by station users. The customer may designate the group or groups of facilities on which SMDR - RAO is to be provided. Where the facility designated by the customer is the toll network, the magnetic tape file will include a record of each message itemized on the customer's bill. (C)
- f. Directory Assistance (DA) call detail may be provided on the magnetic tape (customer option).

F. Subsidiary System Arrangements

1. Subsidiary System

A Subsidiary System of ESSX service is a customer-provided equipment system which is furnished PBX trunks from the central office serving the customer's ESSX service and which is connected by tie lines to that ESSX service.

A Subsidiary System Arrangement provides station numbers which are in sequence with the main station line numbers of the customers' ESSX service to the stations of one or more subsidiary systems.

2. **Terms and Conditions**

- a. Subsidiary System Arrangement (SSA) station numbers are provided by the same central office equipment and facilities which furnish Direct-Inward-Dialing (DID) service and will only be furnished where adequate DID facilities are available in the central office serving the customer's system and where the subsidiary system is properly equipped for DID service.
- b. The PBX trunks of the subsidiary system are provided at the same rates and charges as specified for such trunks furnished from the central office serving the customer's ESSX service. In addition, foreign central office or foreign exchange mileage charges are applicable to those trunks when the subsidiary system is located outside the area of that serving central office.
- c. The same rates and charges as specified for DID service apply for SSA station numbers. Where more than one subsidiary system is involved, each subsidiary system is considered a separate service and the count of station numbers furnished will commence anew at each such system for the purpose of determining the applicable rates and charges.
- d. Tie lines connecting the ESSX service and subsidiary systems are provided at the same rates and charges as specified for ESSX service tie line terminals in a customer-provided equipment system.
- e. SSA station numbers are furnished subject to the condition that all inward and outward local and toll network calling by subsidiary system stations be via the central office serving the customer's ESSX service.
 - (1) Where subsidiary system station's outward local and toll network calls are placed via tie lines and the network access registers of the ESSX service, the charges for such calls are identified and billed as primary directory listing calls of the ESSX service.
 - (2) Where subsidiary system station's outward local and toll network calls are placed via PBX trunks, the charges for such calls are identified as primary directory listing calls of the subsidiary system except as specified in f. following.

(T)

A112.26.12 Optional Service Features (Cont'd)

F. Subsidiary System Arrangements (Cont'd)

2. Terms and Conditions (Cont'd)

- f. At the option of the customer, identification of outgoing toll network calls by SSA station number will be provided at the same rates and charges as specified for Identified-Outward-Dialing (IOD) service subject to the following conditions.
 - (1) The identification of outgoing toll calls by SSA station number will only be provided on calls routed via PBX trunks.
 - (2) Where more than one subsidiary system is arranged for the identification of outgoing toll calls by SSA station number, each system shall be considered a separate service and the count of connecting channels which serve as IOD trunks will commence anew at each system for the purpose of determining the applicable rates and charges.
- g. The ESSX service subsidiary system arrangement is provided solely for the furnishing of SSA station numbers to subsidiary systems for local and toll network and intercommunication calling and does not provide any of the basic optional service features of ESSX service to stations of the subsidiary systems.

3. Rates and Charges

a. Each Subsidiary System Arrangement

- (1) Direct-Inward-Dialing¹
- (2) Identified-Outward-Dialing²

I. Access to Customer Provided Features^{6,7}

1. General

Rates and charges for the appropriate channels as specified in Section B3. of the Private Line *Guidebook* apply to each access code arranged (originate or answer) for connection to customer provided features. (T)

All rates and charges specified herein are in addition to existing rates and charges for ESSX service and other services with which they are associated.

For rates and charges applicable for control channels when required for supervision purposes with equipment and/or apparatus located on customer premises, see A13.1. (T)

Note 1: Rates and charges as specified in Section B3. of the Private Line *Guidebook* apply for channels associated with each display unit. (T)

Note 2: Applicable to each controlling main station line arranged for control of station restrictions.

Note 3: The controlling station may be a main station line, attendant console or inquiry and display console.

Note 4: Maximum 8 per system. The rates and charges Per System and Per Main Station Line equipped are the same for one Line Configuration or up to and including eight Line Configuration Packages.

Note 5: One required for each separate announcement text.

Note 6: This feature provides for access only to customer provided features which may require customer provided compatible terminal equipment.

Note 7: Rates and charges as specified in Section B3. of the Private Line *Guidebook* for a local channel also apply. (T)

		Monthly Rate					
	Installation Charge	1 Month	36 Months	60 Months	84 Months	USOC	
(a)	Per Main Station Line Equipped	\$6.50	\$35	\$30	\$30	\$30	SCG
(b)	Per group with same screening arrangement and same access code	305.75	55.00	50.00	49.00	49.00	SCZ

Note 1: Except where all ESSX service main station lines have the same Arrangement, each main station line or group of main station lines requires a Split Service Offering Feature at the rate and charge as specified in this *Guidebook*. This feature is not available on International Direct Distance Dialed (IDDD) calls. The provision of this feature will not affect the local or toll billing for any completed call. (T)

Note 2: Main Station line calling arrangement restrictions are not assured. This feature is intended to limit main station line direct dialed outgoing calls, but such calls may in certain circumstances, be completed and will be charged for as specified in other sections of this *Guidebook*. Main station lines with Station Dial Code Screening are assigned to a specific code screening arrangement by main station line number. Removal of the code screening arrangement from a main station line number(s) or changing the main station line number(s) from one code screening arrangement to a different code screening, requires a main station line number rearrangement. (T)

Note 3: Arrangement II is available only with access to channels associated with private line networks and requires the associated facilities to be senderized and equipped with uniform numbering.

K. Station Message Detail Recording

1. General

- a. Station Message Detail Recording (SMDR) is a feature that provides a record, by main station line number, of originating traffic routing over local lines, tie lines, WATS, Interexchange Carrier access lines and/or the toll network. The SMDR content may vary depending upon the switching technology from which the call record is generated.
- b. The station message detail may include, but is not limited to, the calling main station line number, the called number, connect time and date, call duration, facility used, disconnect time, digits outputted by switch, and end of dialing. SMDR data provided to customers using the ETS feature may include, but is not limited to, incoming call identification, outgoing facility used, midnight passed, prefix digits, interLATA carrier, and call event code where these features are offered.
- c. Station Message Detail Recording (SMDR) is designed for either an ETS or non-ETS ESSX service customer.
- d. For SMDR data delivery rates and charges, see Network Usage Information Service in Section A32. (T)
- e. SMDR as shown in this section is required for the activation of SMDR for ESSX service.

Note 1: Requires customer-provided terminal equipment.

Note 2: Service charges in Section A4. do not apply. (T)

Note 3: This feature is provided subject to the availability of facilities.

A112.26.13 Reserved for Future Use

A112.26.14 Reserved for Future Use

A112.26.15 Customer Management Features

A. ESSX Customer Administration Service

1. General

- a. The ESSX Customer Administration Service (ECAS) feature permits ESSX service customers to activate/deactivate selected optional features, change certain service options, and change feature configurations on predesignated ESSX service station lines. Customer provided terminal equipment is required for the operation of the ECAS feature.
- b. For ECAS equipped station lines, ECAS allows the customer to verify and/or display the assignment of features on a single station line, range of station lines or all station lines to determine which station or stations have a particular feature or service option.
- c. Certain ESSX service station lines may be specified by the customer to be exempt from this feature. Additionally, the Company reserves the right to make station lines inaccessible for ECAS.
- d. Changing the status of a main station line from accessible to ECAS to inaccessible or vice versa, must be done by the Company via a Service Order request. Appropriate Service Order charges specified in Section A4. apply.
- e. The Company has made the following provisions to protect the integrity of the switching system database and to ensure the security of ECAS changes.
 - (1) An ECAS customer's change, display or verify capabilities are restricted to that particular customer's own ESSX service system.
 - (2) All changes are audited as they are entered by the ECAS customer. Invalid changes will not be accepted. An error message detailing which command is in error will be given.
 - (3) Customer access to the database is protected using dialup, login, password/dialback arrangement.

Note 1: Requires appropriate rates and charges associated with Network Usage Information Service in Section A32.

(T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service - Vintage II (Cont'd)

A112.26.15 Customer Management Features (Cont'd)

A. ESSX Customer Administration Service (Cont'd)

1. General (Cont'd)

f. An ECAS customer can schedule changes (individual or bulk) for completion by the next day or for a future day. Additionally priority changes may be requested and the changes completed the same day subject to ***Terms and Conditions*** in this ***Guidebook***. (T)

g. Definitions pertaining to ECAS/ESSX service features are specified in A112.26.3. (T)

h. The ECAS feature allows the customer to perform the following transactions from the customer provided terminal:

(1) Change particular service options on a per station basis and exchange station telephone numbers (TNs). The change capabilities are:

- Line Status (Active/Inactive)¹

- CAT Code

- Ringing Cycles for CFDA

- Call Pickup Group: The call pickup group to which a station is assigned can be changed on a per station basis.

- The Forward to Number can be changed for a station line with CFBL and/or CFDA assigned.

- Speed Call Group: The Speed Call group to which a station is assigned can be changed on a per-station basis.

- Series Completion "Hunt To" Telephone Number (TN): The "hunt to" TN assigned to a station line can be changed on a per station basis²

- Station TN Rearrangement: Swap TNs from one location to another³

- Facility Restriction Levels

- Access Line Class of Service

- Add/Change Customer Entered Listing Information

The common block to which a station line is assigned when a customer has split service can be changed on a per station basis.

(2) Activate/deactivate the following features and service options on a single station line basis:

- Automatic Callback Calling

- Call Forwarding Busy Line

- Call Forwarding Don't Answer

- Call Forwarding Variable

- Call Forwarding Variable - Outside

- Call Hold

Note 1: Station lines made inactive using ECAS will continue to be billed at the ***guidebook*** rates. (T)

Note 2: All numbers in series completion hunt must be in the same common block.

Note 3: Rearranged station telephone numbers carry all features and characteristics to their new location unless the common block is also changed.

EFFECTIVE: February 28, 2006

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service - Vintage II (Cont'd)

A112.26.15 Customer Management Features (Cont'd)

A. ESSX Customer Administration Service (Cont'd)

1. General (Cont'd)

h. The ECAS feature allows the customer to perform the following transactions from the customer provided terminal: (Cont'd)

(4) An ECAS customer may also print the following administrative reports.

- Configuration (i.e., service options, station features) for a single station line or span of ESSX service station lines.
- A listing of all pending changes including the type of change and the scheduled effective date.
- Customer Entered Listing Information

The following information is included on all ECAS changeable station lines.

- Station Telephone Number
- Name¹
- Organization¹
- Location¹

(5) Initial training of the customer for up to four system managers in the use of this feature is included at the time the feature is put into service. Communication counselor training is a prerequisite to the ECAS system manager training. Any customer training or subsequent assistance necessary after the initial installation of the feature is at the option of the customer and a Subsequent Training Charge applies per hour where such training is provided.

- i. An ECAS customer can add, change and delete authorization codes.
- j. ESSX service main station lines reserved for future use via DialTone provisioning include preassigned telephone numbers and the facilities required. Such telephone numbers and facilities will be removed from reserved status and assigned as active main station lines as requested by the customer.
- k. The assignment of reserved ESSX service main station line facilities and the sequence of numbers for DialTone provisioning assigned to a subscriber's system is made at the discretion of the Company.
- l. DialTone provisioning is furnished subject to the availability of facilities and telephone numbers.
- m. Calls to telephone numbers reserved (but not activated) via DialTone provisioning will be routed to intercept over ESSX service common recorded announcement facilities as specified in A112.26.1. (T)
- n. Telephone numbers and telephone facilities for ESSX service main station lines furnished via DialTone provisioning while in reserved status will be billed at 60 percent of the ESSX service main station line rate (Intercom and Wire Center Line charges).
- o. Telephone numbers and telephone facilities for ESSX service main station lines furnished via DialTone provisioning retain their reserved status until assigned to a main station line at which time the service assumes rates and charges applicable to an ESSX service main station line.
- p. ESSX service main station lines reserved via DialTone provisioning will be included in the determination of System Size (Small, Medium or Large).

Note 1: The ECAS customer is responsible for entering and updating the information contained in this field.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service - Vintage II (Cont'd)

A112.26.15 Customer Management Features (Cont'd)

A. ESSX Customer Administration Service (Cont'd)

1. General (Cont'd)

- q. To gain access to the Company's Dial Access network, the subscriber must have one Security Card for each System Manager accessing the ECAS Database. Subscribers under an existing ECAS contract will be issued up to (not to exceed) three (3) Security Cards at no additional charge when required by the Company to use a Security Card to access the Company's network.

Once the first three (3) Security Card(s) have been issued, the subscriber must pay for any subsequent Security Cards. Should the subscriber require more Security Cards, they may be ordered from 3. following.

- r. The Security Card rate element will provide for the issuance of a card for each System Manager or for the replacement of lost, stolen or expired cards. If the subscriber has purchased a Security Card in conjunction with another feature or service offered by the Company, that Security Card may also be used in conjunction with Customer Control. It is up to the subscriber to notify the Company of an existing Security Card so the Company can ensure that the card is validated for ECAS.

2. *Terms and Conditions*

- a. ECAS is provided only with ESSX service served from a No. 1/1A ESS central office and is furnished subject to the availability of facilities. (T)

- b. Customers equipped for ECAS must order via a service order¹ ECAS changeable features in groups of five (5), except as noted, at the rates specified in this *Guidebook*. (T)

- c. Non-ECAS changeable features with the exception of Three-Way Calling, Consultation Hold, Call Transfer (all calls) will be added subject to the specifications and rates in A112.26.8, A112.26.9, A112.26.10 or A112.26.12 as appropriate. Three-Way Calling, Consultation Hold, Call Transfer (all calls) is offered in groups of five (5) at the rates specified in this *Guidebook*. (T)

- d. Features for ECAS exempt station lines must be requested via a Service Order¹ and added by the Company. Rates and Charges for the features specified in A112.26.8, A112.26.9 or A112.26.10 apply as appropriate.

- e. The customer provided ECAS terminal equipment requires an ESSX service main station line. Rates and charges in A112.26.8, A112.26.9 and A112.26.10 apply as appropriate.

- f. ECAS changes must be entered prior to a time to be designated by the Company to be completed as priority changes or by the next day as requested by the customer.

- g. An ECAS customer cannot activate features in excess of the quantity that has been ordered from the Company. The customer will receive an indication when 100% utilization of a feature is reached. Additional quantities of features may be added subject to *Terms and Conditions*. (T)

- h. Contractual obligations and End User Common Line charges will be billed to the location where originally installed and will not transfer with a station number rearrangement.

- i. If the Company is requested to load ECAS changeable features for new ESSX service /ECAS customers, Installation Charges specified in 3. following applies per ECAS feature added.

- j. The following types of lines will be restricted from Station TN Rearrangement capability. Service options and feature change capabilities will still be available except on lines assigned to multiline hunt groups.

- Station lines assigned to multiline hunt groups

- Attendant Lines

- Any ESSX service line which as a special hardware configuration (e.g., ground start lines and lines having signal distribution points)

- Manual lines (e.g., station lines with full originating and/or terminating restrictions)

- k. ECAS functions performed by the Company at the customer's request subsequent to the initial installation will be subject to the nonrecurring charge specified in 3. following.

Note 1: Appropriate Service Order charges specified in Section A4. will apply.

A112.26 ESSX Service - Vintage II (Cont'd)

A112.26.15 Customer Management Features (Cont'd)

A. ESSX Customer Administration Service (Cont'd)

2. Terms and Conditions (Cont'd)

- l. The Per System charges specified in 3. following apply when a feature is initially activated in a Common Block.
- m. Any required changes in customer provided equipment as a result of growth, desired enhancements or technological advancement, will be the responsibility of the ECAS customer. Compatibility with customer provided station terminal equipment is not guaranteed.
- n. The ECAS customer is responsible for assigning and maintaining a record of station feature assignments. The ECAS customer also agrees to provide the Company with a central point of contact for inquiries and/or trouble reports involving station features.
- o. ECAS customers will be responsible for initiating a Service Order to correct any information pertaining to Listings that changed as a result of an ECAS TN swap. The appropriate Service Order charges specified in Section A4. apply.
- p. The number of the TN swaps that can be requested as priority changes will be determined by the Company when ECAS is ordered.
- q. When required by the Company to use a Security Card, the ECAS subscriber will be required to authenticate with the card before network access is permitted. The network access security system validates the user, and establishes the call across the network to the ECAS host computer. In conjunction with the Security Card, the Company will provide a login and password in order to maintain secure access and an audit trail. Rates for the Security Card are outlined in 3. following.

(T)

3. Rates and Charges

ESSX service-L customers will have the option of paying for ECAS on either a per system or a per line basis. Customers choosing to pay on a per system or a per line basis will be subject to the rates specified in this Guidebook. The installation charge will be reapplied if an ESSX service-L customer changes their ECAS billing arrangement subsequent to the installation of the ECAS feature.

(Obsoleted 10-26-95, Type 4) Service rates and charges in this section are available for inward activity of existing subscribers only as specified following. Not available for new service or entire moves of existing service to new locations.

Obsolescence Rules

1. Inward activity for Digital ESSX service - Vintage II will be allowed.
2. Digital ESSX service - Vintage II subscribers under the month-to-month payment option will be allowed to maintain their service at month-to-month rates.
3. Digital ESSX service - Vintage II subscribers who have a portion of their existing service under a month-to-month payment option and a portion of their existing service under a Term Payment Plan may remain under the rates and charges outlined in this Section until such a time that the Term Payment Plan associated with the Common Equipment expires. Upon expiration of the Term Payment Plan associated with the Common Equipment, the Company reserves the right to convert all or part of the subscriber's account to the month-to-month rates and charges as outlined in this *Guidebook*. (T)

The subscriber can place their month-to-month rates under rates and charges equivalent to their Common Equipment Term Payment Plan.

Should the subscriber elect not to convert their month-to-month rates and charges to the Term Payment Plan, they may remain on the month-to-month rates and charges.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service - Vintage II (Cont'd)

4. Digital ESSX service - Vintage II subscribers under a Term Payment Plan will be allowed to maintain their Digital ESSX service - Vintage II until the expiration date associated with the Common Equipment of their contract. Upon expiration of the Term Payment Plan associated with the Common Equipment, the Company reserves the right to convert all or part of the subscriber's account to the month-to-month rates and charges as outlined in this *Guidebook*. (T)
5. Digital ESSX service - Vintage II subscribers under a Term Payment Plan will have until 02/28/96 to exercise the recast as described in A112.28.6, for a Term Payment Plan of not greater than 36 months in length. Digital ESSX - Vintage II service subscribers under a month-to-month payment option will have until 02/28/96 to convert to a Term Payment Plan of not greater than 36 months in length.
6. Existing Digital ESSX service - Vintage II subscribers who are under a Term Payment Plan may add a new secondary location (SLA) or move an existing SLA of their existing service.
7. Conversions from ESSX-1 service to Digital ESSX service - Vintage II will not be allowed under this *Guidebook*. (T)
8. **(DELETED)** (D)
Digital ESSX service - Vintage II subscribers currently covered under Term Payment Plans may retain their contract as outlined in A112.28. (T)

A112.28.1 General

- A. Digital ESSX service is furnished from Digital Central Office equipment located on Company premises and associated facilities so arranged as to provide the following basic service features:
 1. Direct Inward Dialing (DID) and Direct Outward Dialing (DOD) of exchange and long distance message network calls to and from stations and attendant positions of a subscriber's digital system.
 2. Intercommunication calls between stations of the same subscriber's digital system.
 3. Identified Outward Dialing (IOD), by station number of outgoing long distance message calls dialed by a station. Only calls billed to the subscriber by this Company will be provided this identification.
 4. Common recorded announcement interception of calls to unassigned station numbers.
 5. Basic Station Line Hunting.
 6. Touch-Tone Service
- B. Digital ESSX service will be furnished in four categories, based on the size of the subscriber's system.
 1. Digital ESSX service-VS will serve systems with 1-24 Main Station Lines.
 2. Digital ESSX service-S will serve systems with 25-200 Main Station Lines.
 3. Digital ESSX service-M will serve systems with 201-600 Main Station Lines.
 4. Digital ESSX service-L will serve systems with more than 600 Main Station Lines.
- C. A subscriber's system derived from Digital ESSX service may be comprised of the following components:
 - Common Equipment¹
 - Network Access¹
 - Main Station Lines¹
 - Terminating Arrangements
 - Features

The Common Equipment, Network Access and Terminating Arrangements will be at the rates and charges as specified in A112.28.7. (T)

Note 1: Every system will include these components.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service - Vintage II (Cont'd)

A112.28.1 General (Cont'd)

- C. A subscriber's system derived from Digital ESSX service may be comprised of the following components: (Cont'd)

Main Station Line rates will consist of the intercom charge and the appropriate wire center line charge or equivalent. These charges will be located in A112.28.8, A112.28.9, and A112.28.10 for Digital ESSX service (Very Small, Small, Medium and Large) respectively.

Line and System Features for Digital ESSX service will be grouped as follows:

A Line Features Grouped

A Line Features Individual

Optional Service Features

Customer Management Features¹

A Line Features will be offered on a grouped basis to subscribers of Digital ESSX service who have selected a Term Payment Plan of 36, 60 or 84 months. Subscribers selecting the one month payment option will be offered the Group A Line features on an individual basis only.

Optional System Features and the Customer Management Features will be offered to subscribers of Digital ESSX service under all payment plan options subject to the specific requirements within each arrangement.

A Digital ESSX service-VS or S subscriber will select Group A Features in A112.28.8. (T)

A Digital ESSX service-M subscriber will select Group A Features in A112.28.9. (T)

A Digital ESSX service-L subscriber will select Group A Features in A112.28.10. (T)

Optional Service Features will be offered to all subscribers of Digital ESSX service in A112.28.11. (T)

Customer Management Features will be offered to all subscribers of Digital ESSX service in A112.28.13. (T)

- D. If the subscriber is not completely satisfied with his Digital ESSX service within ninety (90) days of effective billing date, all payments will be handled as indicated in the following paragraphs.

1. The following charges will be refunded:

a. Nonrecurring and recurring charges (up to ninety days recurring billing) for rate elements as specified in Section A12. for Digital ESSX service.

b. Service connection charges from Section A4. (T)

2. The following charges will not be refunded:

a. Recurring charges for Network Access Registers and Grouping as specified in Section A3. (T)

b. End User Common Line Charges as specified in BellSouth FCC No. 4.

3. Customer provided equipment acquired for use with Digital ESSX service will not be included in this plan.

4. Digital ESSX service provided under the One Month payment option is not eligible.

5. Subscribers provided Digital ESSX service via Special Contract arrangements may negotiate a satisfaction plan on an individual case basis.

6. This guarantee will not apply to transfers of service, moves, conversions, or recasts.

7. Digital ESSX service will be disconnected no later than ten (10) days after receipt of notification of dissatisfaction.

8. Subscribers requesting an extension of the 10 day disconnection interval to accommodate installation of a replacement product/service, will be billed the contracted recurring rates for that period, not to exceed six (6) months.

Note 1: Systems subscribing to the DECAS Feature in A112.28.13 must select DECAS Changeable Features subject to the rates, *terms and conditions* in A112.28.13. (T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS**A112.28 Digital ESSX Service - Vintage II (Cont'd)****A112.28.1 General (Cont'd)**

- D.** If the subscriber is not completely satisfied with his Digital ESSX service within ninety (90) days of effective billing date, all payments will be handled as indicated in the following paragraphs. (Cont'd)
- 9. Subscribers must retain continuous service beyond the ninety days via other Local Exchange services as offered in Section A3. (T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service - Vintage II (Cont'd)

A112.28.2 Terms and Conditions

- A. Digital ESSX service is furnished subject to the availability of facilities and features from Digital Central Office equipment, located in a central office building owned or leased by the Company. The service allows for normal station activity including incidental additions and deletions. Major additions to and or major relocations of a subscriber's Digital system are subject to the same terms and conditions as initial installations.
- B. Certain Auxiliary Services are available on an individual main station line basis and are subject to the capabilities of the serving central office.
- C. Optional Service Features as listed in A112.28.11 include Attendant Features and Auxiliary Attendant Features. These features may require customer provided compatible terminal equipment.
- D. All console functions by the attendants at the subscriber's premises are performed at the expense of the subscriber and must conform with the operating practices and procedures of the Company to maintain a proper standard of service.
- E. All Digital ESSX service main station lines must be associated with the main switching equipment. Satellite switching equipment is not offered with Digital ESSX service.
- F. Tie lines for direct connections between a basic subscriber's Digital system and other systems are provided primarily for communication between stations of the two systems. In such cases, rates and charges for tie line service as specified in Section A13. and miscellaneous line termination charges apply. In addition, these tie line connections may be arranged to provide completion of incoming or outgoing local and long distance calls through the subscriber's Digital system to or from other systems (Digital ESSX service or non-Digital ESSX service) provided such connections to the exchange or long distance network are only made at one system at a time.
- G. Where completion of incoming and outgoing local and long distance calls through a subscriber's Digital system is furnished to or from main station lines of a separate subscriber's Digital system in another exchange or a subscriber's non-Digital system in the same or different exchange, the charges applicable for the following features apply in addition to the regular charges for the facilities connecting the systems except for Subsidiary System Arrangements furnished under the terms and conditions specified in A112.28.11.
 - 1. Rates and charges as specified in Section B3. of the Private Line Guidebook apply to miscellaneous lines furnished with unique access codes (trunk level access) except for tie lines furnished in connection with Subsidiary System Arrangements as specified in A112.28.11.
 - 2. Digital ESSX service optional feature charges as outlined in A112.28.8, 9 and 10 apply for each trunk terminated main station line as offered in A112.28.7, as appropriate.
- H. Dormitory service is furnished in accordance with the terms and conditions for Dormitory Communications Service specified in Section A13.
- I. A system may not be provided for Intercommunication (standalone) service only. Access to the Exchange Network must be provided.
- J. A mixture of Flat Rate and Message/ Measured Rate Service will not be allowed within a single customer system except where that single customer system serves a hotel/motel or hospital. For hotel/motel and hospital application, Message/ Measured Rate Service, if provided for guest/patient service, must have a separate dial access code from the flat rate service provided for administrative stations and be restricted from use of the administrative flat rate service.
- K. Suspension of Service
With the exception of Network Access Registers, suspension of Digital ESSX service is not permitted.
- L. A twelve month minimum service period shall be required if the subscriber's system is a Digital ESSX service-M or L. The normal minimum service period as specified in Section A2. will be applicable to Digital ESSX service-VS or S.
- M. Touch-Tone service will be furnished subject to the terms and conditions, specified in Section A13. The rates and charges for Digital ESSX service station lines include the provision of Touch-Tone service. Rates and charges for Touch-Tone service as specified in Section A13. do not apply for the provision of Touch-Tone service to Digital ESSX service.
- N. Listings will be furnished subject to the rates, terms and conditions specified in Section A6.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service - Vintage II (Cont'd)

A112.28.2 Terms and Conditions (Cont'd)

- O. The number of simultaneous exchange and toll network calls to and from main station lines and attendant positions of a subscriber's Digital system is limited by the number of Network Access Registers subscribed to by the customer. Each Network Access Register may be arranged for two-way, one-way incoming or one-way outgoing operation depending upon the option of the customer at the time the Network Access Register is installed. When a change in the type of operation is requested by the customer, the Line Change Charge in Section A4. is applicable. (T)
- P. Service charges, as specified in Section A4., apply to all subscriber's of Digital systems except as provided in A112.28.5. (T)
- Q. Digital ESSX service installation charges are due on initial installation or subsequent additions unless deferred over a predetermined period of time as specified in this Section.
- R. If the subscriber of Digital ESSX service elects a Message/ Measured Rate Service option, Message/ Measured Rate Service usage charges specified in Section A3. are applicable on calls to locations outside the subscriber's Digital system in addition to rates and charges in this and other *guidebook* sections for Digital ESSX service and other associated services. Usage charges are not applicable on calls originated and terminated within the same subscriber's Digital system. (T)
- S. Digital ESSX service main station lines may be restricted from dialing three-digit central office and service codes by applying Code Restriction to the line. The three-digit codes which may be restricted constitute those codes to which Public Announcement, Directory Assistance or Dial-It¹ Services (e.g., 900, 211, 311, 511, 711, and 811 calls) are assigned which could generate billing to the originating main station line. Code Restriction arrangements may also be used to prohibit toll calls to a carrier other than the Presubscribed Interexchange Carrier (dialed 10XXX and 101XXXX). InterLATA calls dialed 0- (operator handled) calls cannot be restricted. The term "Public Announcement Services" as used herein are those services which, in the judgment of the Company, furnish advertised recorded announcement messages to the general public (e.g., time, weather, sport scores and stock market reports). The Public Announcement Service central office codes will be determined by the Company and will be commonly denied access in the central office serving the subscriber's Digital systems subscribing to this service arrangement.
 - 1. At the time a Code Restriction arrangement is installed, the subscriber's Digital system will be arranged for the Code Restriction specified by the customer and the main station lines designated by the customer will be so equipped. When the customer requests the subsequent addition or removal of code restriction on a main station line, the Secondary Service Charge is applicable.
 - 2. Where Code Restriction applies to a particular central office code, direct outward dialed main station line access is denied to telephone numbers associated with that central office code.
 - 3. Code Restriction Arrangements to deny access to Directory Assistance and/or Public Announcement Services are not assured. These features are intended to limit main station line direct dialed outgoing calls, but such calls may, in certain circumstances, be completed and will be charged for in the normal manner.
- T. End User Charges as specified in the End User Common Access Service section of BellSouth *F.C.C. No. 4* apply as appropriate. (T)
- U. Digital ESSX Customer Administration Service (DECAS) may be provided with Digital ESSX service where facilities permit.

Note 1: Dial-it is a service of AT&T.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service - Vintage II (Cont'd)

A112.28.2 Terms and Conditions (Cont'd)

- V. Each system established per customer must consist of a minimum of one (1) Main Station Line. Systems installed or ordered prior to May 11, 1992 are not subject to this *term and condition*. Small systems installed or ordered prior to May 11, 1992 may have less than 25 main station lines. (T)
- W. Digital ESSX service subscribers with rates and charges applicable out of the Vintaged Section A112.13 may subscribe to features found in A112.28 but not offered in A112.13. (T)
- X. Digital ESSX service subscribers with rates and charges applicable out of the Vintaged Section A112.13 wishing to add or change features must apply nonrecurring charges as indicated in A112.28. (T)
- Y. Features followed with I are unique to the DMS-100 switch and those with II are unique to the 5ESS switch.
- Z. For purposes of application of End User Access Charges only, as set forth in BellSouth F.C.C. No. 4, Digital ESSX service main station lines for use by residents of dormitory living quarters will be considered residential service. Main station lines terminated in dormitory housing for administrative or other business use will not fall in this classification.
- AA. Call Return, Call Tracing, Repeat Dialing, Calling Name Display, Caller ID and Calling Number Delivery Blocking are Optional Service Features listed in A112.28.12. These features require the implementation of Common Channel Signaling System #7 (CCS7) into the network and may have limited availability. These features will only operate interoffice on local calls originating and terminating within Central Offices equipped with CCS7. These features will operate intraoffice prior to implementation of CCS7. These features will not work on an originating basis with party-line service, Toll Terminals, Trunks, and some Remote Switching Locations.
- The Company will deliver all numbers, subject to technical limitations, including telephone numbers associated with Non-published Listing Service as described in Section A6. (T)
- Optional Calling Number Delivery Blocking is available upon request, at no charge, to the following entities and their employees/volunteers, for lines over which the official business of the agency is conducted including those at the residences of employees/volunteers where the head of the agency certifies to local Company management a need for blocking based upon health and safety concerns: (a) Non-profit, tax exempt, private and public social welfare agencies such as domestic violence intervention agencies, (b) federal, state and local law enforcement agencies. Other anonymity options may be made available to federal, state and local law enforcement agencies upon request at no charge.
- The Company's liability arising out of the provision of these features, including but not limited to the delivery or non-delivery of calling numbers, or the provision of other anonymity options to law enforcement agencies, is limited as set forth in A2.5.1. (T)
- Telephone numbers transmitted via Caller ID or Call Tracing are intended solely for the use of the Caller ID or Call Tracing subscriber. Resale of this information is prohibited by this *Guidebook*, except the callers' numbers may be provided to the subscriber's client for those calls sponsored or provided by that specific client where the client's identity is disclosed to the caller and the client agrees not to distribute such information to others. (T)
- AB. Digital ESSX service subscribers ordering Assumed Dial "9" must use station terminal equipment that utilizes dual tone multifrequency (DTMF) signaling.
- AC. For every Digital ESSX service main station line extended into a Foreign Exchange, the Digital ESSX service subscriber must terminate a Digital ESSX service main station line in the exchange in which their common equipment is located. Digital ESSX service main station lines extended into a Foreign Exchange do not apply toward the four line minimum.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service - Vintage II (Cont'd)

A112.28.2 Terms and Conditions (Cont'd)

AD. Service order charges will not apply for the provision of Calling Number Delivery Blocking.

AE. Calling Number Delivery Blocking - Permanent is provided subject to availability of facilities where technically feasible. The Company assumes no liability and will be held harmless from any incompatibility of the customer's CPE to perform satisfactorily with the network feature described herein.

This feature, when established on a customer's line, enables subscribers of Non-Published Listing Service or special agencies as described below to prevent the transmission of their Directory Number and/or Directory Name on all outgoing calls placed from the customer's line. Calling Number Delivery Blocking - Permanent is established and/or removed from the customer's line via a service order. This feature is in operation on a continuous basis. Calling Number Delivery Blocking does not prevent transmission of the calling party number on services such as E911 that utilize Automatic Number Identification (ANI) for delivery of the calling number.

If the preassigned access code for Calling Number Delivery Unblocking is dialed on a line that is provisioned with Calling Number Delivery Blocking - Permanent, the Directory Number and/or Directory Name will be delivered.

Calling Number Delivery Blocking - Permanent (NOB) is available upon request, to the following entities and their employees/volunteers, for lines over which the official business of the agency is conducted including those at the residences of employees/volunteers where the head of the agency certifies to local Company management a need for blocking based upon health and safety concerns: (a) Non-profit, tax exempt, private and public social welfare agencies such as domestic violence intervention agencies, (b) federal, state and local law enforcement agencies. Other anonymity options may be made available to federal, state and local law enforcement agencies upon request at no charge.

AF. The Company's liability arising out of the provision of Calling Number Delivery Blocking, including but not limited to the delivery or non-delivery of calling numbers, or the provision of other anonymity options to law enforcement agencies, is limited as set forth in A2.5.1.

This feature allows a customer to temporarily prevent the transmission of that customer's Directory Number and/or Directory Name and thus control their availability to the called party.

The transmission of the Directory Number and/or Directory Name can be temporarily prevented on an as needed basis by dialing a preassigned access code prior to making a call. This action must be repeated each time a call is made to prevent the transmission of the Directory Number and/or Directory Name.

Calling Number Delivery Blocking - Per Call is provided subject to availability of facilities where technically feasible. The Company assumes no liability for and will be held harmless from any incompatibility of the customer's CPE to perform satisfactorily with the network feature described herein. Calling Number Delivery Blocking does not prevent transmission of the calling party number on services such as E911 that utilize Automatic Number Identification (ANI) for delivery of the calling number.

A112.28 Digital ESSX Service - Vintage II (Cont'd)

(O)(T)

A112.28.3 Definitions

(O)(T)

ACCESS CODE RESTRICTION GROUP (ACRG) (CAT CODES)

(O)

An ACRG will allow Stations (assigned to that ACRG) access to predefined facilities. Station access to facilities is restricted by the station ACRG assignment to the predefined facilities. Up to eight ACRGs can be established by the Company for each group.

(O)

ACCESS LINES TO CUSTOMER PROVIDED FEATURES

(O)

Allows dial access from Digital ESSX service for connection to customer provided features. (Recorded Telephone Dictation, Dial Code Sending Equipment and Loudspeaker Paging).

(O)

ADDITIONAL ANNOUNCEMENT

(O)

Second or third announcement available with Automatic Call Distribution or Uniform Call Distribution.

(O)

ADDITIONAL DIRECTORY NUMBERS

(O)

An assigned Directory Number other than the Primary Number on an Electronic Business Set (EBS).

(O)

ASSUMED DIAL "9"

(O)

Utilizes central office capabilities to allow the main station line equipped to access the network without dialing "9".

(O)

ATTENDANT ACCESS LINE

(O)

An attendant access line connects customer provided attendant terminal equipment to the serving central office. These lines are used for the completion of calls directed to the attendant, extension of those calls to stations and attendant assistance for stations.

(O)

ATTENDANT ACTIVATION/DEACTIVATION OF CALL FORWARDING

(O)

Allows a console attendant to program, activate and/or deactivate Call Forwarding for stations assigned Call Forwarding - Variable.

(O)

ATTENDANT ACTIVATION/DEACTIVATION OF MESSAGE WAITING

(O)

Permits an attendant to activate/deactivate Message Waiting for Message Waiting equipped main station lines.

(O)

ATTENDANT CALL TRANSFER

(O)

This feature allows the attendant to transfer a call to another Directory Number (DN) or another attendant position.

(O)

ATTENDANT AUTODIAL

(O)

This feature permits an attendant to dial frequently called numbers by depressing the Autodial feature key, which is programmed with the number.

(O)

ATTENDANT CAMP-ON AND CAMP-ON MODE OPTIONS

(O)

This feature allows incoming listed number calls, which the attendant attempts to complete to a busy main station line, to be held waiting and then automatically connected when the called main station line becomes available. An indication of camp-on will be given to the busy main station line each time the attendant attempts a completion.

(O)

ATTENDANT CAMP-ON WITH DISTINCTIVE TONE

(O)

This feature allows incoming listed number calls, which the attendant attempts to complete to a busy main station line, to be held waiting and then automatically connected when the called main station line becomes available. An indication of the distinctive tone will be given to the busy main station line.

(O)

ATTENDANT CONFERENCE

(O)

Using a six-port conference circuit, an attendant may interconnect up to five conferees on one call. The sixth port is required for attendant access.

(O)

ATTENDANT CONTROL OF FACILITIES

(O)

Attendant Control of facilities (ACOF) permits an attendant to restrict dial access by all stations to tie lines, FX lines and WATS lines. This feature can also be used to restrict access to any dial access code activatable feature. It does so by establishing groups of facilities and/or features that simultaneously will be activated. This feature can be accessed via key or a dial access code.

(O)(T)

ATTENDANT GROUP TRUNK ACCESS CONTROL

(O)

This feature utilizes special keys on the customer provided attendant console to serve as a common interface for trunk group busy and trunk group access for all trunk groups allocated to the customer group.

(O)

ATTENDANT POSITION

(O)

Customer provided terminal equipment utilized for attendant control and call connecting functions.

(O)

ATTENDANT RECALL TIMER

(O)

This feature returns attendant-extended calls to a main station to the attendant after a prescribed waiting period if the main station user is unable to answer.

(O)

ATTENDANT SERVICE

(O)

Incoming calls to the main listed number are answered by an attendant, who may complete the call to the desired main station line by means of the Call Transfer feature. An unrestricted or semirestricted main station line user may dial the attendant over attendant lines to secure help in the completion of an outgoing call by means of Dial "0" calling.

(O)

ATTENDANT SPEED CALLING

(O)

Allows an attendant to dial frequently dialed numbers by depressing a speed call key and dialing one or two digits instead of all the digits in the number.

(O)

ATTENDANT/STATION CONTROLLED OUTGOING RESTRICTIONS

(O)

Allows the attendant or designated station to place restrictions on call origination for individual directory numbers or groups of directory numbers.

(O)

AUTOMATIC CALL DISTRIBUTION I (ACD)

(O)

Automatic Call Distribution (ACD) features provide advanced call distribution and queuing capabilities as an integrated function of Digital ESSX service. The ACD features are grouped into two sets: ACD Basic, without Network Management Reports (NMR) and ACD with NMR.

(O)

AUTOMATIC CALLBACK/RING AGAIN

(O)

Automatic Callback permits a main station line user who attempts an intercommunication call to a busy main station line to be automatically connected to that line when both called and calling lines are subsequently idle.

(O)

AUTOMATIC LINE

(O)

Station specially programmed to dial a specific internal or external station number or "0" for the attendant when the station user goes off-hook.

(O)(T)

AUTOMATIC ROUTE SELECTION

(O)

Automatic Route Selection is an optional feature, available where facilities permit, that allows station users, by dialing a preselected code to automatically select the preferred route subscribed for by a customer for network calls. Alternate routing to other facilities, subscribed to by the customer, is also provided. This arrangement is available for use with Foreign Exchange (FX), WATS, CCSA off-net, tie lines and Interexchange Carrier (IC) access lines which are compatible with ARS and toll network facilities.

(O)

BASIC TERMINATIONS

(O)

See Miscellaneous Line Terminations

(O)

BUSINESS SET INTERCOM

(O)

Places an intercom call between two Electronic Business Set stations automatically when a designated button is depressed.

(O)(T)

A112.28.3 Definitions (Cont'd)

(O)(T)

CALL FORWARDING - BUSY LINE

(O)

Automatically routes calls to the attendant or preselected main station line when the called main station line is busy. This feature may be either fixed (changeable by service order only) or programmable (customer changeable) by station user via feature activation code.

(O)

CALL FORWARDING - DON'T ANSWER

(O)

Automatically routes calls to the attendant or preselected main station line when the called main station line doesn't answer within the preset ringing cycle. This feature may be either fixed (changeable by service order only) or programmable (customer changeable) by station user via feature activation code.

(O)

CALL FORWARDING - VARIABLE

(O)

When activated by a main station line user, automatically routes calls intended for his main station line to any other main station line selected within the same system or optionally outside the subscriber's Digital system. The main station line selected may also be the attendant. The attendant may also activate call forwarding for a main station line.

(O)

CALL HOLD

(O)

Allows a main station line user to place any call involving their main station line on hold by flashing and dialing a special code. The main station line is then free to originate another call. The first call is retrieved by dialing the hold code a second time.

(O)

CALL PARK

(O)

Call Park allows the attendant to park calls against any directory number in the attendant customer group or allows station users to park calls against their own directory number. The parked call may be retrieved from any station by dialing the feature access code for retrieval plus the directory number.

(O)

CALL PICKUP

(O)

Allows a main station line user to answer calls directed to another main station line within the same preset call pick-up group.

(O)

CALL RETURN

(O)

This feature enables a customer to place a call to the telephone number associated with the most recent call received, whether or not the call was answered or the number is known. The customer can dial a code to request that the network place the call.

(O)

If the called line is not busy, the call is placed. If the called line is busy, a confirmation announcement is heard. Once the customer hangs up, the network will monitor the busy/idle status of both lines every forty-five seconds for up to thirty minutes. If during the queuing process both lines become idle, the customer is notified, via a distinctive ring (short, short, long), that the network is ready to place the call. When the customer picks up the telephone, the call will automatically be placed. If unanswered by the customer, the distinctive ring will repeat every five minutes until answered, or for the remainder of the thirty minute monitoring interval. Multiple numbers may be placed in queue. The first idle number will be connected first. Both the customer and the called party may originate and receive calls without affecting the call return feature status.

(O)

CALL TRACING

(O)

Call Tracing enables the customer to initiate an automatic trace of the last call received.

(O)

Upon activation by the customer, the network automatically sends a message to the Company's Security Department indicating the calling number, the time the call was received, and the time the trace was activated. The customer using this feature would be required to contact the local business office for further action. The customer is not provided the traced number.

(O)

Only calls within central offices equipped with CCS7 are traceable using Call Tracing.

This feature will not work if the incoming call is from a telephone number in a multi-line hunt group, unless the telephone number is the main telephone number in the hunt group or is Telephone Number identified.

(O)

If the customer receives another call after hanging up from the annoying call, prior to activating the trace, Call Tracing will not record the correct number.

(O)

(O)

A112.28 Digital ESSX Service - Vintage II (Cont'd)

A112.28.3 Definitions (Cont'd)

CALL TRANSFER

Call Transfer provides for the transfer of calls by a Digital ESSX service main station line. The Call Transfer feature is needed in addition to Three-way Calling if the station's type of call transfer is different from the call transfer type selected for the customer's group.

CALL WAITING - TERMINATING

Informs a busy main station line, when the main station line is so equipped, that an incoming call is waiting (burst of tone), and permits holding the present connection while answering the new call and return to the original connection.

CALL WAITING - EXEMPT

Call Waiting-Exempt allows a called station to be exempt from Dial Call Waiting and Call Waiting-Originating.

CALL WAITING - ORIGINATING

Allows an equipped main station line to send the Call Waiting tone to any busy main station line in the same system.

CALL WAITING INDICATION

This feature is installed at the MLHG (Multi Line Hunt Group) customer premises. Customer provided equipment is also required to provide an indication of the call delay experiences by callers that are waiting on queue to be answered.

CALL WAITING - INTRAGROUP

Permits intragroup calls to a busy main station line equipped with the feature to be answered while the existing call is held.

CALL WAITING RINGBACK ALERT

A terminating main station line feature that provides a distinctive alert which indicates to the caller that a called main station line is busy but has received a Call Waiting indication.

CALLER ID

This feature enables the customer to view on a display unit the Directory Number (DN) on incoming telephone calls.

When Caller ID is activated on a customer's line, the Directory Numbers of incoming calls are displayed on the called CPE during the first long silent interval of the ringing cycle.

Any customer subscribing to Caller ID will be responsible for the provision of a display device which will be located on the customer's premises. The installation, repair, and technical capability of that equipment to function in conjunction with the feature specified herein will be the responsibility of the customer. The Company assumes no liability and will be held harmless for any incompatibility of this equipment to perform satisfactorily with the network features described herein.

If the incoming call is from a caller served by a PBX, only the main number of the PBX is transmitted and available for display.

If the incoming call originates from a multi-line hunt group, the telephone number transmitted will always be the main number of the hunt group.

Caller ID is not available on operator handled calls.

Caller ID is available on Electronic Telephone Sets in A112.28.11.M. (T)

The Company will deliver all numbers, subject to technical limitations, including telephone numbers associated with Non-published Listing Service as described in Section A6. (T)

A112.28 Digital ESSX Service - Vintage II (Cont'd)

(O)(T)

A112.28.3 Definitions (Cont'd)

(O)(T)

CALLING NAME DISPLAY

(O)

This feature enables the name of the calling or called party to be displayed on incoming and outgoing calls, respectively. The names displayed are those datafilled through service order to correspond to particular Directory Numbers (DNs). This feature is restricted to calls within a customer group.

(O)

CALLING NUMBER DELIVERY BLOCKING - PER CALL

(O)

This feature allows customers to prevent the transmission of that customer's Directory Number and/or Directory Name and thus control it's availability to the called party.

(O)

The transmission of the Directory Number and/or Directory Name can be temporarily prevented on an as needed basis by dialing a preassigned access code prior to making a call. This action must be repeated each time a call is made to prevent the transmission of the Directory Number and/or Directory Name.

(O)

CALLING NUMBER DELIVERY BLOCKING - PERMANENT

(O)

This feature enables certain subscribers as described in A12.13, preceding, to prevent the transmission of their Directory Number and/or Directory Name on all outgoing calls placed from the customer's line. Calling Number Delivery Blocking - Permanent is established and/or removed from the customer's line via a service order. This feature is in operation on a continuous basis. Calling Number Delivery Blocking does not prevent transmission of the calling party number on services such as E911 that utilize Automatic Number Identification (ANI) for delivery of the calling number.

(O)

If the preassigned access code for Calling Number Delivery Unblocking is dialed on a line that is provisioned with Calling Number Delivery Blocking - Permanent, the Directory Number and/or Directory Name will be delivered.

(O)

CATEGORY (CAT) CODES

(O)

See Access Code Restriction Group and Network Class of Service.

(O)

CODE CALLING ANSWER

(O)

This feature allows the code call signals to be answered from any station within the Digital ESSX service group via dial access code.

(O)

CODE RESTRICTION ARRANGEMENTS

(O)

A Code Restriction Arrangement automatically denies a portion of all main station lines of a subscriber's Digital system direct outward dialing access to one or more three-digit codes within the local calling area in which the system is located. Code restriction provides a distinctive tone to indicate that access is not permitted on call attempts.

(O)

CONFERENCE CALLING - STATION

(O)

Allows a main station user to establish a conference connection of up to six conferees (including the originator) without the aid of the attendant.

(O)

CONSULTATION HOLD-ALL CALLS

(O)

Allows a main station user to place a call on hold by depressing the switchhook, at which time dial tone is returned. The station user may then proceed to establish connection with another internal station or outside party, and after speaking with the "consulted" party, the station user may (1) return to the call initially held, (2) depress the switchhook thereby effecting Add-On Conference or (3) hang up and effect transfer of the initial call to the consulted party.

(O)

CUSTOMER GROUP

(O)

A Customer Group is that portion of the memory storage in the serving central office that contains the features for a specific system.

(O)

CUSTOMER GROUP TRANSPARENCY

(O)

Allows customers with separate entities to establish a separate Digital ESSX service for each of their entities but still have a certain degree of feature transparency between them. Digital ESSX service within the same DMS-100 may be grouped by translations into a "Family".

(O)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service - Vintage II (Cont'd)

A112.28.3 Definitions (Cont'd)

DATA CALL PROTECTION

Data Call Protection prevents calls from being interrupted by call waiting tones, testing or busy verification attempts. Data call protection is not customer changeable and lines assigned this feature may not utilize call transfer or conference capabilities.

DIAL "0" CALLING

Dial "0" Calling permits a main station line user to reach an attendant position by dialing the single digit "0".

DIAL CALL WAITING (DCW)

The Dial Call Waiting (DCS) feature provides the ability for originating main station lines to invoke call waiting service on selected intragroup calls by dialing an access code followed by the extension number of the main station line to be call waited.

DIAL CODE SENDING (CODE CALLING) FEATURE

Code Calling provides dial access to customer-premises located code calling equipment by main station line, attendant access and tie lines of a subscriber's Digital system. The dialed two or three digit code activates signaling devices on the customer's premises to produce a coded signal corresponding to the dialed code. The called party, upon recognition of the signal, is automatically connected to the calling party by dialing a special code from any main station line in the system.

DIAL THRU ATTENDANT (DTA)

The DTA feature allows main station line users to complete dialing on other than station-to-station calls after the attendant selects the trunk facility.

DIALTONE PROVISIONING (DialTone II)

This feature will provide DECAS customers with the capability of requesting new service on stations through DECAS as well as the ability to disconnect service on existing stations.

Two Options are available.

Option 1 - allows the customer to subscribe to reserved loop facilities as described in A112.28.13.

Option 2 - the DECAS customer has no reserved facilities and simply places an order via DECAS for new service.

DIGITAL ESSX CUSTOMER ADMINISTRATION SERVICE (DECAS)

Provides the customer with the capability to activate/deactivate specific optional Digital ESSX service features, change service options, and display and verify the features and service options on a per main station basis.

DIGITAL FAMILY

A number of Digital ESSX's services with a certain degree of dialing and feature operation transparency existing between them.

DIRECT INWARD DIALING

Incoming calls from the exchange or toll network may be dialed directly or any called main station line served by the Digital ESSX service main switching equipment without the help of an attendant.

DIRECT OUTWARD DIALING

Outward calls may be dialed directly from any unrestricted main station line served by the Digital ESSX service main switching equipment without the help of an attendant.

(O)(T)

DIRECTED CALL PICK-UP - BARGE-IN

(O)

Allows calls directed to a main station line with the Directed Call Pick-Up feature to be answered by any main station line in the group. This is accomplished by dialing an access code followed by the extension number of the main station line to which the call was directed. If the main station line has already answered, a three-way connection is established.

(O)

DIRECTED CALL PICK-UP - BARGE-IN EXEMPT

(O)

Directed Call Pick-up with Barge-In Exempt allows a called station to be exempt from Directed Call Pick-Up with Barge-In.

(O)

DIRECTED CALL PICK-UP - BARGE-IN TERMINATING

(O)

This feature must be assigned to the main station line that is being answered via Directed Call Pick-Up - Barge-In.

(O)

DIRECTED CALL PICK-UP - NON BARGE-IN

(O)

The Directed Call Pick-Up-Non Barge-In feature allows a Digital ESSX service main station line user to pick up an unanswered call to another main station line equipped with Directed Call Pick-Up by dialing a special answer code plus the number of the main station line being rung. If the main station line being rung has already answered, busy tone will be returned to the main station line user dialing the answer code and station line number.

(O)

DIRECTED CALL PICK-UP - NON BARGE-IN EXEMPT

(O)

Directed Call Pick-Up - Nonbarge-In Exempt allows a station to be exempt from Directed Call Pick-Up - Non Barge-In.

(O)

DIRECTED CALL PICK-UP - NON BARGE-IN ORIGINATING

(O)

This feature enables a Digital ESSX service station user to answer calls directed to station lines in any pickup group in the same Digital ESSX service group. If a connection is established (prior to the pickup code being dialed,) the station dialing the code will receive busy treatment.

(O)

DIRECTED CALL PICK-UP - NON BARGE-IN TERMINATING

(O)

This feature must be assigned to the main station line that is being answered via Directed Call Pickup - Non Barge-In.

(O)

DIRECTORY NUMBER HUNTING

(O)

A112.28.3 Definitions (Cont'd)

(O)(T)

EXECUTIVE BUSY OVERRIDE (EBO)

(O)

EBO allows a station user to gain access to a busy station within the same system. An EBO warning tone is transmitted to the called station and then a three-way call is established.

(O)

EXECUTIVE CONFERENCE

(O)

Permits a Digital ESSX service customer to have access to a dialable conference with a maximum of 150 conferees.

(O)

FACILITY GROUPS (FG)

(O)

Provides simulated trunk group access for miscellaneous line terminations. A FG may be one-way (incoming or outgoing) or two-way operational.

(O)

HOSPITAL COMMUNICATIONS FEATURES

(O)

Do Not Disturb (DND)

(O)

Permits stations to be denied from receiving Direct Inward Dialing (DID) and station-to-station calls.

(O)

FIXED NIGHT SERVICE

(O)

This feature provides for the routing arrangements to be made by the Company and may be changed only by service order.

(O)

GROUP BUSY INDICATION

(O)

This feature has the capability to let the attendant know via a lamp on the console that all the facilities in that particular facility group are busy.

(O)

GROUP INTERCOM

(O)

Allows abbreviated dialing between stations in the same group all of which are equipped with the Group Intercom feature.

(O)

HOT LINE STATION

(O)

See Automatic Line.

(O)

INTERCEPT

(O)

Intrasystem and incoming network calls dialed to unassigned numbers are routed to common recorded announcements.

(O)

INTERCOM

(O)

Provides station to station calling for the customer within the subscriber's system without utilizing Network Access Registers, but does require additional central office equipment.

(O)

INTERPOSITION TRANSFERS

(O)

This feature allows an attendant to call and speak to another attendant and to transfer a call to another attendant.

(O)

LAST NUMBER REDIAL

(O)

Allows a station user the ability to redial the last number called by depressing one or two keys rather than the entire number.

(O)

LOUDSPEAKER PAGING ANSWER

(O)

Provides that loudspeaker paging may be answered from any station within the business customer group via a dialed access code.

(O)

MAIN STATION EXTENSION SERVICE

(O)

Main station extension service consists of an additional station or stations on the same station circuit as the associated main station.

(O)

A112.28.3 Definitions (Cont'd)

(O)(T)

MAIN STATION LINE

(O)

A main station line connects customer provided terminal equipment to the serving central office.

(O)

MAKE BUSY ARRANGEMENTS

(O)

This is a key activated feature which permits a line associated with a Multi Line Hunt Group (MLHG) to busy their position to prevent incoming calls from being directed to a vacant position on a per line basis. In a group arrangement this key activated feature allows a user to busy out all positions associated with a MLHG.

(O)

MAKE LINE BUSY

(O)

Provides the individual station user with the option of making the line or directory number appear busy/unavailable to incoming calls. The All Calls feature enables the user to make the line appear busy to all types of incoming calls. The Intragroup feature makes the line appear busy to intragroup calls with external calls not blocked.

(O)

MISCELLANEOUS LINE TERMINATIONS

(O)

Miscellaneous lines are those lines not basic to the system; such as Tie Lines, WATS, Foreign Exchange, CCSA, etc., which require Digital ESSX service switching capabilities in order to function with Digital ESSX service.

(O)

MULTI-LINE HUNT GROUP (BASIC)

(O)

See Station Hunting Arrangements

(O)

MULTIPLE APPEARANCE DIRECTORY NUMBER (MADN) RING FORWARD

(O)

Permits a Digital ESSX service station user to forward the ringing on their MADN to another appearance of the same MADN. This forwarding can take place automatically or upon the manual activation of a button on an Electronic Business Set.

(O)

MULTIPLE CALL ARRANGEMENT

Allows each group member to be simultaneously active on a call with a different external party.

(O)

MUSIC/ANNOUNCEMENT ON HOLD

(O)

Allows the Digital ESSX service to provide music and/or announcement to a calling line that has been placed on certain types of hold or has entered a queue for certain Digital ESSX service features. It may be used for Attendant Camp-On, Attendant Hold, Call Hold, Call Park, and Permanent Hold.

(O)

(O)

NETWORK ACCESS REGISTER

The Network Access Register provides for exchange and long distance message network calling to and from main stations and attendant positions of a subscriber's Digital system.

(O)

(O)

NETWORK CLASS OF SERVICE

This feature provides the capability to allow or deny types of calls to a station on both an incoming and an outgoing basis.

(O)

OFF-HOOK QUEUE

(O)

A112.28.3 Definitions (Cont'd)

(O)(T)

OPTIONAL DIAL CUT THRU ARRANGEMENT

(O)

Provides for the switching of calls which either originate within the Digital ESSX service and terminate in distant systems over certain miscellaneous lines and/or switch tandem through the system between certain miscellaneous lines where the digits dialed by the called party are transmitted to the distant end directly as they are dialed by the calling party.

(O)

OVERFLOW MESSAGE INFORMATION

(O)

This feature allows the system to increment an overflow message register located on the subscriber premises when calls to a MLHG encounter a busy group.

(O)

PERMANENT HOLD

(O)

Allows a main station user to place any call involving his main station line on hold by flashing the switchhook and dialing a special code. When Permanent Hold is activated no calls can be originated or terminated from the main station line. The first call is retrieved by going off-hook. If the call is not retrieved within a time designated by the customer, the station line will ring and the held call will be returned.

(O)

PERSONAL CALL SCREENING

(O)

Allows the calls that have been forwarded via Call Forwarding - Variable to be transferred back to any base station in the call forwarding chain.

(O)

POSITION BUSY

(O)

A key activated feature that allows an attendant to busy out his position to prevent incoming calls from being directed to that particular attendant position.

(O)

PREFERENTIAL HUNT

(O)

See Station Hunting Arrangements.

(O)

PRIVACY ENABLE

(O)

Privacy Enable is used to exclude other members of a MADN group from joining a call.

(O)

PRIVACY RELEASE

(O)

Privacy Release is used to allow other members of a MADN group to join a call.

(O)

PROGRAMMABLE LINE SELECTION

(O)

An Electronic Business Set option that provides the ability for originating and/or terminating line selection.

(O)

QUERY BUSY STATION

(O)

Permits a designated Electronic Business Set to query the busy status of other Digital ESSX service stations. Digital ESSX service stations to be monitored are assigned a key on the EBS. Depression of the key will provide a visual and audible indication of the busy status of the queried station.

(O)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service - Vintage II (Cont'd)

(O)(T)

A112.28.3 Definitions (Cont'd)

(O)(T)

QUEUING

(O)

Queuing permits station users to be placed in a queue whenever the first choice route for completing a particular call is already in use. Two queuing arrangements are available:

(O)

A Call-Back Queue (CBQ), in which case the calling station goes on-hook and is called back when a facility becomes available.

(O)

An Off-Hook Queue (OHQ), in which case the calling station remains off-hook and is held in queue until a facility becomes available.

(O)

REPEAT DIALING

(O)

Repeat Dialing, when activated, automatically redials the last number the customer attempted to call. If the called line is not busy, the call will be placed.

(O)

If the called line is busy, a confirmation announcement is heard, the customer hangs up and a queuing process begins. For the next thirty minutes, both the calling and called lines are checked periodically for availability to complete the call. If during this queuing process the called line becomes idle, the customer is notified, via a distinctive ring, that the network is ready to place the call. When the customer picks up the telephone, the call will automatically be placed.

(O)

RING AGAIN

(O)

See Automatic Callback.

(O)

SHORT HUNT - BUSINESS SET

(O)

Provides the capability for incoming calls to hunt over a set of directory number appearances on a Business Set in search of an idle directory number on which to terminate.

(O)

SIMPLIFIED MESSAGE DESK INTERFACE I (SMDI)

(O)

Simplified Message Desk Interface provides customers the ability to route called number identification to a centralized point using a customer provided voice/text messaging system. A Digital ESSX service station user may have incoming calls forwarded to that centralized point when that person's station is busy or when he is not available to answer the calls. Through the use of an I/O (input/output) channel, call information is transported from the central office to the centralized point at the customer's premises. This information includes the number called, the reason for the forwarding of the call (busy or don't answer), and for intra-central office calls the calling number. That centralized point, using an optional capability, may activate a signal to the called station to give an alert that a message is waiting.

(O)

SINGLE CALL ARRANGEMENT

(O)

Allows each Multiple Appearance Directory Number group only one active call with an external party.

(O)

SPEED CALLING

(O)

Lets the main station line user place calls to a list of frequently called telephone numbers by dialing fewer digits than the complete directory number.

(O)

STATION DIRECT INWARD DIALING RESTRICTION

(O)

Permits the customer to have selected main station lines restricted from receiving Direct In-Dialed calls from the MTS network. Direct In-Dial call attempts will be routed to the attendant.

(O)

A112.28.3 Definitions (Cont'd)

(O)(T)

STATION HUNTING ARRANGEMENTS

(O)

Directory Number Hunt, Distributed Line Hunt, Uniform Call Distribution and Preferential Hunt are optional main station line hunt arrangements for searching over and distributing calls in a hunt group. These hunts are extensions of the basic multiline hunting feature included in Digital ESSX service.

(O)

Directory Number Hunting (DNH)

(O)

Each line in a DNH group has its own unique directory number. The hunt group is accessed by dialing any number in the hunt group. The number of lines hunted depends on the hunting option (i.e., circular or sequential assigned to the DNH group).

(O)

- Circular hunt permits a complete hunt over all the terminals in the group starting and ending with the dialed number.

(O)

- Sequential hunting starts at the number dialed and ends at the last number in the group.

(O)

Distributed Line Hunting (DLH)

(O)

With DLH hunting starts after the first idle line found by the previous hunt and continues until the starting point is reached. DLH provides for an equal distribution of calls.

(O)

Multi-Line Hunt Group (Basic)

(O)

When a call is originated to a busy station line in a basic multi-line hunting group, the call hunts once in a prearranged order for an idle station through all remaining station lines in that group.

(O)

Preferential Hunt

(O)

Preferential Hunt permits a prehunt over a subset or preferential group of main station lines before hunting through the entire Multiline hunt group. The hunt through the group may be a regular or circular hunt. Each main station line may have its own preferential group or list.

(O)

Series Non-Sequential

(O)

When a call is originated to a busy station in a series non-sequential hunting group, the call hunts for an idle station in that group in a prearranged numerical sequence. A number may not hunt to any number which would hunt back to the original number dialed. Each line can hunt to and/or be hunted from only one number.

(O)

Series Sequential

(O)

When a call is originated to a busy station in a series sequential station hunting group, the call hunts for an idle station in that group in an ascending numerical sequence. A number may not hunt to any number which would hunt back to the original number dialed. Each line can hunt to and/or be hunted from only one number.

(O)

Uniform Call Distribution

(O)

Uniform Call Distribution provides an even distribution of incoming network and intercom calls among the individual main station lines of a hunt group and includes Circular Hunt.

(O)

- Call Queuing is an option that may be added to the UCD arrangement. Queuing permits calls, in excess of main station lines in a UCD group, to be held in the central office and distributed in their order of arrival to main station lines in the UCD group as the main station lines become available.

(O)(T)

STATION IDENTIFICATION

(O)

An itemized list of toll calls is shown on the toll bill with the number of each originating main station line.

(O)

STATION MESSAGE DETAIL RECORDING

(O)

Station Message Detail Recording (SMDR) is a feature that provides a record, by main station line number, of originating traffic routing over local lines, tie lines, WATS Interexchange Carrier access lines and/or the toll network.

(O)

STATION MESSAGE DETAIL RECORDING - RAO

(O)

Station Message Detail Recording (SMDR) - RAO is an arrangement to provide a record by main station line number of originating intercity traffic routing over dial type tie lines, WATS, CCSA, interexchange carrier access lines and/or the Toll Network.

(O)

The station message detail will include the calling main station line number, the called number, date, time of day, duration of call and the type of facility used. The record will be provided on magnetic tape to customers requiring message detail for cost allocation and telecommunications system management purposes. The detail will be provided on all facilities in routes selected by the customer for Station Message Detail Recording - RAO.

(O)

STATION MESSAGE WAITING

(O)

Allows station users to activate message waiting against another station. A Stuttered Dial Tone (for stations without message waiting lamps) or Message Waiting Lamp may be used to provide indication of a waiting message. A designated code is used to access the station user who left the message.

(O)

STATION NUMBER CORRELATION

(O)

Permits main station line numbers to be the same as numeric room numbers, where facilities permit.

(O)

STATION-TO-STATION CALLING

(O)

Calls may be dialed directly to completion between any two main station lines of a subscriber's Digital system.

(O)

SUBSCRIBER'S DIGITAL SYSTEM

(O)

A subsidiary system of a subscriber's Digital system consists of all stations of a customer with the same primary directory listing which is served by the same digital central office equipment.

(O)

SUBSIDIARY SYSTEM ARRANGEMENTS

(O)

A Subsidiary System of a subscriber's Digital system is a customer-provided equipment system which is furnished PBX trunks from the central office serving the customer's Digital system and which is connected by the trunks to that system.

(O)

A Subsidiary System Arrangement provides station numbers, which are in sequence with the main station line numbers of the customer's Digital system to the stations of one or more subsidiary systems.

(O)

THREE-WAY CALLING

(O)

Allows a station user to add a third party to an existing two-party conversation.

(O)

TOLL DIVERSION

(O)

Toll Diversion automatically denies a subscriber's Digital station direct dialing access to the long distance message network. Station users attempting to place such calls are diverted to the attendant.

(O)

TOLL RESTRICTION

(O)

Toll restriction automatically denies a subscriber's Digital station direct dialing access to the long distance message network. Station users attempting to place such calls will receive an announcement to indicate that access is denied.

(O)

TRUNK EQUIPMENT

(O)

See Miscellaneous Line Termination.

(O)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service - Vintage II (Cont'd)

TRUNK VERIFICATION FROM STATION

Permits a designated Digital ESSX service station to verify the condition of the trunks in the Digital ESSX service by dialing a predefined access code, the trunk group access code and the member number of the trunk to be verified.

UNIFORM CALL DISTRIBUTION (UCD)

See Station Hunting Arrangements.

A112.28.4 Intercept Of Calls To Unassigned Station Lines

- A.** Incoming calls from the exchange and toll networks to unassigned station lines are intercepted by the same standard central office recorded announcement equipment used to intercept such calls for exchange services. The announcement provided states that the number called is not in service.
- B.** Intercommunicating calls to unassigned station lines are intercepted by central office recorded announcement equipment which is common to all subscriber's Digital systems served out of the same office. The announcement states that the number is not in service. (C)

A112.28.5 Conversion

- A.** Replacement of Central Office Equipment
 - 1. The rates and charges in this and other guidebook sections for ESSX service and the associated features and services will continue to apply to ESSX service subscribers served at a location that is converted through no desire or fault of the subscriber to Digital central office equipment. Should one of the aforementioned existing subscribers wish to utilize features and/or services specific to the Digital central office equipment, the billing for that customer's system will be converted to charges appropriate for the central office equipment providing his service.
- B.** (DELETED)
- C.** Conversion of Digital ESSX service - Vintaged to Digital ESSX service
 - 1. Digital ESSX service - vintaged consists of those rates and charges moved to Section A112. and applicable to subscribers of Digital ESSX service as of July 10, 1989.
 - 2. Customers with Digital ESSX service under the Vintaged Section (A112.) may select a payment period under A112.28 providing the following conditions are met:
 - a. The customer's selected payment period under Section A112. has expired, or
 - b. The customer's selected payment period has not expired but the customer desires to select a payment period in Section A112.28 equal to or exceeding the unexpired portion of his current payment period.
 - (1) Charges as described under Termination Liability in A112.28.6 will not apply.
 - c. A Service Ordering Charge as specified in Section A4. will apply.

A112.28.6 Payment Schedules

- A.** General
 - 1. Digital ESSX service is offered as follows.
 - a. The contract periods are:
 - Month-to-Month Payment Plan (One month option)
 - 36-Month Term Payment Plan
 - 60-Month Term Payment Plan
 - 84-Month Term Payment Plan

(O)(T)

A112.28.6 Payment Schedules (Cont'd)

(O)(T)

A. General (Cont'd)

(O)

1. Digital ESSX service is offered as follows. (Cont'd) (O)
 - b. Digital ESSX service subscribers may select variable payment periods under the Term Payment Plan as follows. (O)
 - (1) 36-Month Term Payment Plan - payment periods may be selected from 24 months to 48 months in length at 36 month rates and charges. (O)
 - (2) 60-Month Term Payment Plan - payment periods may be selected from 49 months to 72 months in length at 60 month rates and charges. (O)
 - (3) 84-Month Term Payment Plan - payment periods may be selected from 73 months to 96 months in length at 84 month rates and charges. (O)

Rate stability for other payment periods will be handled on an individual case basis. (O)
 - c. Items that may be placed under the Term Payment Plan (O)
 - (1) Main Station Lines (O)
 - (2) Extension Station Lines (O)
 - (3) Line Feature Options (O)
 - (4) Optional Service Features (O)
 - (5) System Common Equipment (O)
 - (6) Terminating Arrangements (O)
2. The monthly rate for Digital ESSX service is dependent upon the payment period selected by the customer. (O)
3. The monthly rate for Digital ESSX service under the ESSX service Term Payment Plan for the periods of 36, 60 or 84 months is not subject to Company initiated rate increases. (O)
4. Digital ESSX service-VS and S will be offered to subscribers having 4-200 main station lines under any of the payment options offered. (O)
 - a. A Digital ESSX service-VS or S subscriber may elect a 36, 60 or 84 month payment period for any portion or all of the total system size with the remainder to be under the one month payment option. (O)
 - (1) Group A line features may be added under any of the payment plan options. (O)
 - (2) Auxiliary Attendant Features, or Optional service features may be added under any of the payment plans provided that they are not added for a payment period of shorter duration than that associated with the Digital ESSX service common equipment. (O)
 - b. A Digital ESSX service-VS subscriber may add station lines up to 30 lines and: (O)
 - (1) Add those lines and associated Group "A" line features at the one month rate specified for Digital ESSX service-VS or, (O)
 - (2) Resubscribe the entire system under the payment periods offered for Digital ESSX service-S. (O)
 - (3) There will be no termination liability. (O)
 - (4) Digital ESSX service-VS Subscribers will be liable for the difference in service establishment charges between Digital ESSX service-VS and S. (O)
 - c. A Digital ESSX service-S subscriber may add station lines up to 220 Lines, and: (O)
 - (1) Add those lines and associated Group "A" line features at the one month rate specified for Digital ESSX service-S or, (O)
 - (2) Resubscribe the entire system under the payment periods offered for Digital ESSX service-M. (O)
 - (3) There will be no termination liability. (O)
 - (4) Digital ESSX service-S subscribers will be liable for the difference in service establishment charges between Digital ESSX service-S and M. (O)

A112.28 Digital ESSX Service - Vintage II (Cont'd)

A112.28.6 Payment Schedules (Cont'd)

A. General (Cont'd)

5. Digital ESSX service-M will be offered to subscribers with 201-600 main station lines under one month, 36 months, 60 months or 84 months payment options.
 - a. A Digital ESSX service-M subscriber may elect a 36, 60 or 84 month payment period for any portion or all the total system size with the remainder to be under the one month payment option.
 - (1) Group "A" line features may be added under any of the payment plan options.
 - (2) Auxiliary Attendant Features, or Optional Service Features may be added under any of the payment plans provided that they are not added for a payment period of shorter duration than the payment period associated with the Digital ESSX service common equipment.
 - b. A Digital ESSX service-M Subscriber may add station lines up to the 660 Lines and:
 - (1) Add those lines and associated Group "A" features at the one month rate specified for Digital ESSX service-M or,
 - (2) Resubscribe the entire system under the payment periods as offered for Digital ESSX service-L.
 - (3) There will be no termination liability.
 - (4) Digital ESSX service-M subscribers will be liable for the difference in service establishment charges between Digital ESSX service-M and L.
6. Digital ESSX service-L will be offered to subscribers with more than 600 main station lines under one month, 36 month, 60 month and 84 month payment options.
 - a. A Digital ESSX service-L subscriber may elect a 36, 60 or 84 month payment period for any portion or all of his total system size with the remainder to be under the one month payment option.
 - (1) Group "A" line features may be added under any of the payment plan options.
 - (2) Auxiliary Attendant Features, or Optional Service Features may be added under any of the payment plans provided that they are not added for a payment period of shorter duration than the remaining payment period associated with the Digital ESSX service common equipment.

B. Expiration of Payment Period

1. Digital ESSX service-VS, S, M and L customers must upon the expiration of their payment period:
 - a. Select a new payment period as offered in the current *guidebook* (a service ordering charge as specified in Section A4. will apply), (T)
 - b. Revert to the current *guidebook* rates for the one month payment option if at the request of the customer (a service ordering charge as specified in Section A4. will apply), or (T)
 - c. Revert to the current *guidebook* rates for the one month payment option if at the instance of the Company (a service ordering charge as specified in Section A4. will not apply). (T)
2. A Digital ESSX service-VS, S, M or L customer may at any time during his selected payment period resubscribe for an equal or longer payment period at the current *guidebook* rates subject to the following conditions. (T)
 - a. No credit will be given for payments made during the formerly selected period. Nonrecurring charges will not be reapplied.
 - b. The new payment period begins with the billing date following the date the new payment period is requested.
 - c. No termination charge applies for the former payment period.
 - d. A Service Ordering charge as specified in Section A4. will apply. (T)
3. A Digital ESSX service-VS, S, M or L customer may at any time during his selected payment period resubscribe for a payment period, shorter in length than the time remaining in the existing service agreement, subject to the following conditions:
 - a. No credit will be given for payments made during the formerly selected period. However, nonrecurring charges will not be reapplied.

A112.28 Digital ESSX[®] Service - Vintage II (Cont'd)

A112.28.6 Payment Schedules (Cont'd)

B. Expiration of Payment Period (Cont'd)

3. (Cont'd)

- b. The new payment period begins with the date requested.
- c. A termination charge will be applied to the former payment period.
- d. A Service Ordering charge as specified in Section A4. will apply. (T)

C. Disconnects

- 1. When equipment or facilities, i.e., station lines, etc., are disconnected from a system for which the current payment period is longer than one month, the expiration date of the remaining equipment and service will not be affected.
- 2. Equipment or facilities disconnected from a system prior to the expiration date of the payment period for such equipment will require termination charges for premature disconnection if applicable.

D. Supersedure

Service may be transferred to a new customer at the same location upon prior written concurrence by the new customer as specified in products section of the *Guidebook*. The new customer will be subject to all provisions and equipment configurations currently in effect for the previous customer. *Terms and Conditions* concerning transfer of service between subscribers as stated in other sections of this *Guidebook* also apply under the Digital ESSX service Term Payment Plan. (T)

E. Deferred Payment

- 1. Payment of nonrecurring charges for Digital ESSX service may be deferred over the length of the customer's payment period or a shorter period (in annual increments) subject to the conditions specified in this paragraph.
 - a. The charges to be deferred must be among the following types:
 - (1) Installation
 - (2) Service Establishment
 - (3) Feature Establishment
 - b. The customer must select a payment period longer than one month.
 - c. The total amount of nonrecurring charges as defined preceding may be deferred.
 - d. The minimum amount deferrable per Digital ESSX service System is \$1,000.00.
 - e. Interest on deferred amounts will be calculated at the rate set forth in the deferred payment agreement executed by the customer. The interest rate to be charged on deferred payments will be revised periodically by the Company. If, in the judgment of the Company, the maximum interest rate allowed by law is insufficient to cover the costs of providing the deferred payment option, the Company will suspend the availability of said option until such time as the costs of providing said option can be recovered through the application of a lawful interest rate. Suspension of the deferred payment option will not affect customers who have executed a deferred payment agreement prior to the effective date of such suspension.

EFFECTIVE: February 28, 2006

(O)(T)

A112.28.6 Payment Schedules (Cont'd)

(O)(T)

- E. Deferred Payment (Cont'd) (O)

 - 1. (Cont'd) (O)
 - f. The deferred charges (including calculated interest) will be prorated on a monthly basis over the selected deferral period length. (O)
 - g. All deferred charges must be paid in full when the customer: (O)
 - (1) Selects a payment period with an expiration date prior to the expiration date of the deferral period. (O)
 - (2) Disconnects service, for the system, prior to expiration of the selected deferral period. (O)
 - (3) Fails to pay a monthly amount hereunder within 30 days of its due date. (O)
 - h. The customer may prepay only the total outstanding deferred charges at any time during the selected deferral period. Customer will be given a credit for the amount of unearned interest. Customer may not prepay less than the total of the outstanding deferred charges. (O)

- F. Prepayment (O)
 - 1. For payment periods longer than one month, the customer may prepay the total outstanding recurring monthly rates. The prepayment of monthly rates in no way constitutes a purchase and the Company retains full ownership of all services covered by the prepayment. The following conditions apply: (O)
 - a. Customers who prepay six months or more will have an allowance applied. A factor of .375 percent will be credited for each month prepaid. This amounts to a discount of 4.5 percent per year. (O)
 - b. Monthly rates for all services covered by a single Letter of Election must be prepaid. Monthly rates must be prepaid for services added subsequently and placed on the same Letter of Election (i.e., customer-elected coterminous option) with a prepaid system. (O)
 - c. Customers who change the length of a prepaid payment period will be credited any unused portion of the prepayment, subject to termination charges as specified in G. following. (O)
 - d. Customers who prematurely disconnect will have termination charges deducted from the prepaid amount and any balance credited to their bill. (O)
- G. Termination Liability (O)

The Termination Liability applicable to Digital ESSX service is dependent upon the payment period selected by the customer. Termination charges for the optional payment periods are as follows: (O)

 - 1. One Month Payment Plan (O)
 - a. Digital ESSX service-VS and S Customers - No Termination Liability will be applicable. (O)
 - b. Digital ESSX service-M Customers (O)
 - (1) Within 12 months of date of installation - If a customer's Main Station Line count falls below 75 percent of the total main station lines initially installed, they will be charged 90 percent of the amount due for the period remaining up to 12 months from the date of installation for each line disconnected thereafter. (O)
 - (2) Beyond 12 months of date of installation - No Termination Liability will be applicable. (O)
 - c. Digital ESSX service-L Customers (O)
 - (1) Within 12 months of date of installation - If a customer's main station line count falls below 90 percent of the total main station lines initially installed, they will be charged 90 percent the amount due for the period remaining up to 12 months from the date of installation for each line disconnected thereafter. (O)
 - (2) Beyond 12 months of date of installation - No Termination Liability will be applicable. (O)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service - Vintage II (Cont'd)

A112.28.6 Payment Schedules (Cont'd)

G. Termination Liability (Cont'd)

2. Digital ESSX service Term Payment Plan Option
 - a. Digital ESSX service-VS, S, M and L customers that contract a portion of their system under the Term Payment Plan Option are subject to the following liability charges.
 - (1) Main station lines under contract - 90 percent of the remaining amount due for each Main Station Line disconnected after the customer's total main station line count falls below 90 percent of the total main station lines initially installed or of the annually adjusted installed total (whichever is higher). The annually adjusted total is determined every 12 months from date of original installation.
 - (2) All non-contracted items - No Termination Liability will be applicable.
3. A customer may move a system under a payment plan within the same jurisdiction and will not incur termination charges if existing loops and Central Office equipment are reusable during the current engineering interval. Main station line installation charges will apply as appropriate to all main station lines relocated.

H. Cancellation Charges

1. Cancellation charges will only apply to subscribers under the Term Payment Plan.
2. Cancellation charges will apply only to the total removal of the subscriber's Digital ESSX service system.
3. Cancellation charges will be applied where service provided under a Term Payment Plan is removed prior to the expiration of the subscribers Term Payment Plan.
4. The customer who elects to disconnect their Digital ESSX service prior to the end of their Term Payment Plan period will pay the lower of the Cancellation or Termination Liability charge. To determine which charge is applicable, the Company will calculate the Termination Liability charge and compare this amount to the appropriate Cancellation Charge (depending on the customer's size and remaining contract duration). The customer will be billed the lower of the two charges.
5. The following charges are applied when a total disconnect of a Digital ESSX service system provided under a Rate Stability Plan occurs prior to the expiration of the subscribers Rate Stability Plan and the Company determines that the Cancellation Charge is lower than the Termination Liability charge.

a. Cancellation Charges

- (1) Per Very Small or Small System

- | | Nonrecurring Charge | USOC |
|---|----------------------------|-------------|
| (a) Disconnect in months 1-48 | \$3,000.00 | NRCS1 |
| (b) Disconnect in month 49 and thereafter | 2,000.00 | NRCS2 |

- (2) Per Medium or Large System

- | | | |
|---|-----------|-------|
| (a) Disconnect in months 1-48 | 10,000.00 | NRCM1 |
| (b) Disconnect in month 49 and thereafter | 7,500.00 | NRCM2 |

- I.** When a subscriber's Digital ESSX service under a Term Payment Plan is disconnected prior to the expiration of the selected service period as a result of a subscriber requested change to one of the separately *available* services listed following termination or cancellation charges will not apply when: (T)
1. the completed service period is 12 months, and
 2. the service period of the new arrangement for the separately *available* service equals or exceeds the remaining service period of the disconnected service, and (T)
 3. the service orders to install the separately *available* service and disconnect the existing service are related together and there is no lapse in service between installation of the separately *available* service and disconnection of the existing service, and (T)
 4. the service orders are for the same subscriber at the same location.

A112.28.7 Common Rates And Charges

A. General

1. Station Lines

- a. The rates and charges specified herein for main station lines provide for main station line components.
- b. The rates and charges specified herein for main station and extension station lines are applicable to each main station location and extension station location respectively to which a customer-provided instrument can be connected.
- c. Rates for the main station lines of Digital ESSX service-VS, S, M and L customers will be based on the following criteria:
 - (1) Main Station Group Size
 - (2) Distance from the Serving Central Office
 - (3) The type of payment plan selected by the customer.
- d. The total main station group size will consist of main station lines and attendant access lines for all locations served by the same Digital ESSX service.
- e. The distance band will be based on airline mileage from the serving central office to the Network Interface Location at the customer's premises.
 - (1) Where main stations are in a foreign exchange (FX) or a foreign central office (FCO) area the distance band will be calculated from the FX or the FCO to the Network Interface Location serving those main stations.
 - (2) Systems with more than one location served by the same Digital ESSX service control group will calculate the distance band per location.
- f. In a different central office serving area of a multi-office exchange:
 - (1) The rate of Digital ESSX service in a FX or FCO area is the monthly rate for the Digital ESSX service desired, plus a FX or FCO mileage charge as specified in Section A9. (T)
 - (2) When Digital ESSX service main station lines are connected by facilities which are routed between two or more central offices in the same exchange, the foreign central office mileage charge is calculated separately on an airline basis between the central office from which the Digital ESSX service is served and the central office from which exchange service normally would be rendered.
- g. Rates, charges, liabilities and additional *terms and conditions* if applicable may be developed on an individual basis for main station lines exceeding five (5) airline miles from the serving central office. (T)
- h. Exchange Access
 - (1) Exchange Access is provided by means of Network Access Registers.
 - (2) Presubscription of a Carrier of Preference is specified in Section 13 of the Interstate Access Service Tariff.
- i. Main Station Line Terminated as a PBX Trunk
 - (1) Where a Digital ESSX service Main Station Line is terminated as a PBX Trunk in customer provided equipment, the appropriate recurring charge specified in A112.28.7 will apply in addition to the appropriate main station line rate (intercom and mileage). (T)

2. Subsequent Training

- a. After the initial installation of the subscriber's system, subsequent training will be provided at the charges indicated in A12.20.8.D. (T)

B. Nonrecurring

1. The following nonrecurring charges for service are in addition to any applicable service connection, move, change and installation charges provided for in other sections of this *Guidebook*. (T)

a. Service Establishment Charge

(1) Initial Service Establishment Charge

	Nonrecurring Charge	USOC
(a) Each Digital ESSX service-VS system	\$1,000.00	NA
(b) Each Digital ESSX service-S system	1,000.00	NA
(c) Each Digital ESSX service-M system	1,500.00	NA
(d) Each Digital ESSX service-L system	2,000.00	NA

b. Installation Charges

(1) These charges apply as specified, when an optional feature is added or changed. These charges apply in addition to other applicable nonrecurring charges.

(2) One or more optional features may be provided at the same time and in such instances the specified installation charge will apply for each feature provided.

c. Service Connection Charges

(1) Service charges as specified for business service in Section A4. are applicable for each main station line, console access loop, extension station line, etc. (T)

C. Recurring

1. Common Equipment

B. Features

1. General

- a. The features offered for Digital ESSX service-VS and S customers are "A" Line Features-Grouped, "A" Line Features-Individual and Optional Service Features. (T)
- b. Digital ESSX service-VS and S customers may add features on a per line basis from "A" Line Features-Grouped at the rates shown in 2.a. following if a Term Payment Plan of 36, 60 or 84 months is selected. (T)
- c. Digital ESSX service-VS and S customers may add features on a per system basis from "A" Line Features-Individual at the rates shown in 2.b. following if a Term Payment Plan of 36, 60, 84 months is selected. If a feature is selected on a per system basis then any or all lines may be equipped with that feature at the system recurring rate. The installation charge will apply per line. (T)
- d. Digital ESSX service-VS and S customers choosing the one month payment plan may add features from "A" Line Features-Individual at the rates shown in 2.b. following. These features will be offered on a per line basis only. (T)
- e. The features are offered where facilities permit. This will be dependent on the serving central office.
- f. All features may not be offered from all central offices.
- g. Feature operation may vary based on the serving central office.

B. Features

(O)

1. General

(O)

- a. The features offered for Digital ESSX service-L customers are "A" Line Features-Grouped, "A" Line Features - Individual and Optional Service Features. (O)
- b. Digital ESSX service-L customers may add features on a per line basis from "A" Line Features-Grouped at the rates shown in 2.a. following if a Term Payment Plan of 36, 60 or 84 months is selected. (O)
- c. Digital ESSX service-L customers may add features on a per system basis from "A" Line Feature Individual at the rates shown in 2.b. following if a term payment plan of 36, 60, 84 months is selected. If a feature is selected on a per system basis then any or all lines may be equipped with that feature at the system recurring rate. The installation charge will apply per line. (O)
- d. Digital ESSX service-L customers choosing the one month payment plan may add features from "A" Line Features-Individual at the rates shown in 2.b. following. These features will be offered on a per line basis only. (O)
- e. The features are offered where facilities permit. This will be dependent on the serving central office. (O)(T)
- f. All features may not be offered from all central offices. (O)(T)
- g. Feature operation may vary based on the serving central office. (O)(T)

2. Rates and Charges

E. Central Office Features Associated with Customer Provided Electronic Telephone Sets¹ I

1. General

a. Central office features associated with electronic sets may be:

(1) provided only via termination on an electronic set, or

(2) certain Digital ESSX service "A" line features assigned to Primary Directory Numbers and/or additional Directory Numbers associated with electronic sets.

2. **Terms and Conditions**

a. Each electronic set will require a main station line charge and a line additive charge. The intercom charge from A112.28.8, A112.28.9 and A112.28.10 will also apply.

b. Main station lines terminated in customer provided electronic telephone sets must be via non loaded facilities.

c. Each electronic set must have a primary Directory Number associated with it.

d. An electronic set may have a Private Business Line (PBL) appearing as one of the Directory Number keys.

e. Rates and Charges for an individual business line service as specified in Section A3. will apply for the Private Business Line. The number assigned to a PBL will be outside the Digital ESSX service station range. The PBL cannot use the code access features available on the main station set. Services such as Custom Calling cannot be assigned to a PBL.

G. Station Message Detail Recording Via Revenue Accounting Office (RAO)

1. General

a. Station Message detail recording (SMDR) - RAO is an arrangement to provide a record, by main station line number, or originating intercity traffic routing over dial type tie lines, WATS, CCSA, other Common Carrier access lines and/or the MTS Network (Toll).

b. The station message detail will include the calling main station line number, the called number, date, time of day, duration of call and the type of facility used. The record will be provided on magnetic tape, to customers requiring message detail for cost allocation and telecommunications system management purposes. The detail will be provided on all facilities in routes selected by the customer for Station Message Detail Recording - RAO.

Note 1: Availability is based on the type of central office serving the subscriber.

Note 2: Ring Again/Automatic Callback may be used in conjunction with Call Back Queuing found in A112.28.11 to provide Call Back Queuing for Electronic Telephone Sets. (T)

Note 3: A key is required per station being monitored.

A112.28 Digital ESSX Service - Vintage II (Cont'd)

A112.28.11 Optional Service Features (Cont'd)

G. Station Message Detail Recording Via Revenue Accounting Office (RAO) (Cont'd)

2. Terms and Conditions

- a. Station Message Detail Recording (SMDR) - RAO may be offered to main station lines of customers where facilities permit and where the Company's message billing process has been arranged to provide this optional feature.
- b. Station Message Detail Recording is not represented to be a provision of billing detail.
- c. Station Message details will be provided on magnetic tape. The tape density and number of tracks will be that used by the program and data processing system in use by the Company's accounting center furnishing the tape. The format may be changed to serve Company purposes and the customer will be responsible for making the tape compatible with his data processing equipment.
- d. Station Message details may be provided on all facilities subscribed to by the customer including Message Telecommunications Service (MTS), but will not include intercom calls originated by the station users. The customer may designate the group or groups of facilities on which SMDR - RAO is to be provided. Where the facility designated by the customer is the MTS network, the magnetic tape file will include a record of each message itemized on the customer's bill. (C)

I. Subsidiary System Arrangements

1. General

A Subsidiary System of a Digital ESSX service system is a customer-provided system which is furnished PBX trunks from the central office serving the subscriber's Digital system and which is connected by the lines to that Digital ESSX service.

A Subsidiary System Arrangement provides station numbers which are in sequence with the main station line numbers of the subscriber's Digital system to the stations of one or more subsidiary systems.

2. **Terms and Conditions**

- a. Subsidiary System Arrangement (SSA) station numbers are provided by the same central office equipment and facilities which furnish Direct-Inward-Dialing (DID)/Identified-Outward-Dialing (IOD) service and will only be furnished where adequate DID/IOD facilities are available in the central office serving the customer's system and where the subsidiary system is properly equipped for DID/IOD service.
- b. The PBX trunks of the subsidiary system are provided at the same rates and charges as specified for such trunks furnished from the central office serving the subscriber's Digital system. In addition, foreign central office or foreign exchange mileage charges are applicable to those trunks when the subsidiary system is located outside the area of that serving central office.
- c. The same rates and charges are specified for DID service apply for SSA station numbers. Where more than one subsidiary system is involved, each subsidiary system is considered a separate service and the count of station numbers furnished will commence anew at each such system for the purpose of determining the applicable rates and charges.
- d. Tie lines connecting the Digital ESSX service and subsidiary systems are provided at the same rates and charges as specified for Digital ESSX service tie line terminals, tie lines, and tie line terminals in a customer-provided equipment system.
- e. SSA station numbers are furnished subject to the condition that all inward and outward local and toll network calling by subsidiary system stations be via the central office serving the subscriber's Digital system.

Note 1: This feature provides for access to customer provided features which may require customer provided compatible terminal equipment.

Note 2: A separate private line is required.

(T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service - Vintage II (Cont'd)

A112.28.11 Optional Service Features (Cont'd)

I. Subsidiary System Arrangements (Cont'd)

2. *Terms and Conditions* (Cont'd)

e. (Cont'd)

- (1) Where the subsidiary system station's outward local and toll network calls are placed via tie lines and the network access registers of the Digital ESSX service, the charges for such calls are identified and billed as primary directory listing calls of the Digital ESSX service.
 - (2) Where the subsidiary system station's outward local and toll network calls are placed via PBX trunks, the charges for such calls are identified as primary directory listing calls of the Digital ESSX service.
- f. At the option of the customer, identification of outgoing toll network calls by SSA station number will be provided at the same rates and charges as specified for Identified-Outward-Dialing (IOD) service subject to the following conditions:
- (1) The identification of outgoing toll calls by SSA station number will only be provided on calls routed via PBX trunks.
 - (2) Where more than one subsidiary system is arranged for the identification of outgoing toll calls by SSA station number, each system shall be considered a separate service and the count of connecting channels which serve as IOD trunks will commence anew at each system for the purpose of determining the applicable rates and charges.
- g. The Digital ESSX service subsidiary system arrangement is provided solely for the furnishing of SSA station numbers to subsidiary systems for local and toll network and intercommunication calling and does not provide any of the basic of optional service features of Digital ESSX service to stations of the subsidiary systems.

3. Rates and Charges

a. Each Subsidiary System Arrangement

- (1) Direct-Inward-Dialing¹
- (2) Identified-Outward-Dialing²
- (3) Exchange Access, per trunk³
- (4) Tie Line Service⁴
- (5) Dial Cut-through Arrangement, per tie line arranged for tandem operation⁵

J. Automatic Route Selection - Basic

1. General

- a. Automatic Route Selection - Basic (ARS-B) is an optional feature, available where facilities permit that allows station users, by dialing a preselected code to automatically select the preferred route subscribed to by a customer for network calls. Alternate routing to other facilities subscribed to by the customer is also provided. This agreement is available for use with Foreign Exchange, WATS, CCSA off-net and Interexchange Carrier (IC) access lines which are compatible with ARS and the MTS network facilities.

Note 1: Apply rates and charges as specified in this *Guidebook* for DID service. (T)

Note 2: Apply rates and charges as specified in this *Guidebook* for IOD service. (T)

Note 3: Apply rates and charges as specified in Section A3. for PBX trunks. (T)

Note 4: Apply rates and charges as specified in other sections of this *Guidebook* for tie line terminations tie line mileage, etc., as appropriate. (T)

Note 5: Apply rates and charges as specified in A112.28.7.D. for USOC: EVK. (T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service - Vintage II (Cont'd)

A112.28.11 Optional Service Features (Cont'd)

J. Automatic Route Selection - Basic (Cont'd)

1. General (Cont'd)

- b. Automatic Route Selection - Basic is accessed by dialing a single code (1, 2 or 3 digits) which automatically selects the appropriate route (FX, WATS, CCSA off-net, IC access line or the MTS Network) to complete the call. If all facilities in the initial route selected are busy, the call will advance to other routes in the selected pattern. Patterns may consist of up to eight (8) private routes.
- c. For calls using FX, WATS, CCSA off-net or IC access line facilities, the routing may be based on a Number Plan Area (NPA) and limited to specified central office codes within the NPA as designated by the customer. This is referred to as Foreign Area Discrete Translation.
- d. Automatic Route Selection - Basic is a call routing capability and, therefore, all codes must be in a route for selection. Code blocking is not provided by this feature.

2. *Terms and Conditions*

- a. Automatic Route Selection - Basic is provided only in association with Digital ESSX service central office equipment located on Company premises and may be provided, subject to the availability of facilities to subscriber systems which are served by the same such equipment.
- b. Preferred routes and alternate routing patterns will be specified by the customer.
- c. All rates and charges specified for Automatic Route Selection - Basic are in addition to the rates and charges for the associated facilities.
- d. The number of patterns required by a customer are governed by the type and variety of facilities to which the customer subscribes.
- e. A single rate per pattern will apply regardless of the number of routes in the pattern or the number of facilities in the route.

3. Rates and Charges

a. Automatic Route Selection - Basic

K. Queuing

1. General

a. Queuing permits main station line users to be placed in a queue whenever the first choice route for completing a particular call is already in use. Two queuing arrangements are available.

(1) Off-Hook Queuing (OHQ), the calling main station line remains off-hook and is held in queue until a facility becomes available.

(2) Call-Back Queuing (CBQ), the calling main station line goes on-hook and is called back when a facility becomes available.

2. **Terms and Conditions**

a. Queuing may be provided in conjunction with ARS-Basic or as a stand-alone option for outgoing exchange calls.

b. Queuing will be offered on a as per facilities permit basis and may not be available from all central office types.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service - Vintage II (Cont'd)

(O)(T)

A112.28.11 Optional Service Features (Cont'd)

(O)(T)

O. Automatic Call Distribution I (ACD)

(O)(T)

1. General

(O)

- a. Automatic Call Distribution - (ACD) features provide advanced call distribution and queuing capabilities as an integrated function of Digital ESSX service. ACD may be offered to ESSX service main station lines of customers where facilities permit. The ACD features are grouped into two sets: ACD Basic, without Network Management Reports (NMR) and ACD with NMR. (O)

(O)

(1) Agent Position - An Electronic Business Set (EBS) used with the ACD for call distribution. (O)

(O)

(2) Supervisory Position - An Electronic Business Set used in conjunction with ACD to supervise the ACD group. (O)

(O)

(3) Incoming Call Queue (O)

(O)

- When all agents are busy, the incoming calls are placed in the appropriate incoming queues on a priority and order-of-arrival basis. Calls are then removed as agents become available to answer them. (O)

(O)

(4) ACD Basic includes one primary directory number. ACD Basic has the capability for supplemental ACD numbers. (O)

(O)

(5) Agent Position Keys: (O)

(O)

- Call/Answer Supervisor Key¹ - If an agent requires assistance while handling an ACD call, the agent can call the supervisor for private consultation (followed by transfer of the caller to the supervisor, if desired). If the supervisor is busy with another agent call, the calling agent receives a busy tone and returns to the ACD caller. The agent can also answer a call from the supervisor by depressing the Call/Answer supervisor key. (O)

(O)

- Agent Not Ready Key - This key is used to terminate active calls and/or allow the agent time to follow up on the call before being returned to the idle agent queue to answer another incoming call. (O)

(O)

- Emergency Key - In the event of a threatening or abusive call, this key enables the agent to immediately conference the supervisor. If equipped, an emergency recording device automatically connects to the call. (O)

(O)

- In Calls Key - This key is used by the agent to answer an incoming ACD call. (O)

(O)

- Secondary ACD Directory Number Key - The agent's position can be equipped with one or more directory numbers that are separate from the ACD feature. The Secondary ACD Directory Numbers(s) key is used by the agent to place or receive non-ACD calls. Rates and charges are contained herein. (O)

(O)

(6) Supervisory Position Keys: (O)

(O)

- Call Agent Key¹ - The supervisor can call a particular agent position by operating keys associated with supervisor/agent communications. (O)

(O)

Note 1: Requires an Additional Directory Number (ADN)

(O)(T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service - Vintage II (Cont'd)

A112.28.11 Optional Service Features (Cont'd)

(O)(T)

O. Automatic Call Distribution I (ACD) (Cont'd)

(O)(T)

1. General (Cont'd)

(O)

a. (Cont'd)

(O)

(6) Supervisory Position Keys: (Cont'd)

(O)

- Answer Agent Key¹ - This feature is used to answer agent calls to the supervisor.

(O)

- Display Queue Status Key - One Display Queue key is available for optional assignment to each applicable ACD-DN. This key displays the following status information of calls waiting for the ACD-DN:

(O)

- Number of calls waiting in queue

(O)

- Number of agent positions manned for the ACD-DN

(O)

- Waiting time (in seconds) of the first call in queue

(O)

The display window is updated approximately every 12 seconds.

(O)

- Night Service Control Key - This feature allows a supervisor to place an ACD group into night service by key activation.

(O)

- Observe Agent Key - This key enables the supervisor to obtain a "listen-only" path to an ACD caller. Only calls presented on the agent's In Calls key can be observed.

(O)

- Answer Emergency Key¹ - This feature uses specially assigned directory numbers on key-lamp pairs to respond to calls that have been initiated by the Emergency key on an agent's position.

(O)

- Agent Status Lamps - One agent key-lamp pair is assigned for each agent in the supervisor's group. The lamp enables the supervisor to determine the status of each agent position in the group.

(O)

OFF Agent position is unmanned

(O)

ON Agent is handling an ACD call

(O)

FLASH Agent is waiting for an ACD call

(O)

WINK Agent is busy on post-call work (not-ready-state)

(O)

- Enhanced Observe Agent Key² - This feature allows the ACD supervisor to observe any agent or supervisor with an In Calls key in any ACD group in the same customer group. The operation and interaction of this key is identical to the Observe Agent feature.

(O)

(7) Agent Queue

(O)

- If answering positions (agents) are available but there are no incoming calls waiting, the available agents are placed in a designated agent queue on a first-in, first-out basis. The agent who has been waiting the longest receives the first incoming call.

(O)

(8) Recorded Announcement

(O)

- Requires a Digital Recorded Announcement Module (DRAM) equipped with one NT1X75BA Controller card and up to 8 ROM/RAM cards (one per announcement).

(O)

Note 1: Requires an Additional Directory Number (ADN)

(O)(T)

Note 2: Requires an Observe Agent Key.

P. Station Message Detail Recording

1. General

- a. Station Message Detail Recording (SMDR) is a feature that provides a record, by main station line number, of originating traffic routing over local lines, tie lines, WATS, Interexchange Carrier access lines and/or the toll network. The SMDR content may vary depending upon the switching technology from which the call record is generated.
- b. The station message detail may include, but is not limited to, the calling main station line number, the called number, connect time and date, call duration, facility used, disconnect time, digits outpulsed by switch, and end of dialing. SMDR data provided to customers using the ETS feature may include, but is not limited to, incoming call identification, outgoing facility used, midnight passed, prefix digits, interLATA carrier, and call event code where these features are *available via guidebook*. (T)
- c. Station Message Detail Recording (SMDR) is designed for either a DETS or non-DETS Digital ESSX service customer.
- d. For SMDR data delivery rates and charges, see Network Usage Information Service in Section A32. (T)
- e. SMDR as shown in this Section is required for the activation of SMDR for ESSX service. (T)

2. **Terms and Conditions** (T)

- a. The Station Message Detail Recording (SMDR) may be offered on Digital ESSX service main station lines of customers where facilities and technology permit.
- b. SMDR is not represented to be a provision of billing detail.

Note 1: Requires Observe Agent Key.

Note 2: Requires a dedicated 4 wire Full Duplex Data grade circuit from the Company's central office to the customer's premises. Appropriate Private Line charges apply.

Note 3: Requires ACD Basic.

A112.28.12 Telephone Numbers And Facilities Reserved For Future Use

A. General

1. A customer may reserve preassigned telephone numbers and facilities necessary to meet their specified growth requirements at specific locations, on a mutually agreeable date. In the event the customer elects not to be provided with reserve telephone numbers timely main station line additions cannot be assured and facilities necessary for growth requirements will be provided only within normal engineering and construction intervals.
2. Telephone numbers reserved for future use includes preassigned telephone numbers and the facilities required. Such telephone numbers and facilities will be removed from reserved status and assigned as active main station lines as requested by the customer.
3. The assignment of telephone numbers and the sequence of numbers assigned to a subscriber's Digital system is made at the discretion of the Company.
4. The service is furnished subject to the availability of facilities and telephone numbers.
5. Calls to reserved (unassigned) telephone numbers will be routed to intercept over Digital ESSX service common recorded announcement facilities as specified in A112.28.4.
6. Telephone numbers furnished herein retain their reserved status until assigned to a main station line at which time the service assumes rates and charges applicable to a Digital ESSX service main station line.
7. Reserved numbers not assigned to a main station line as agreed in A112.28.12 will be billed at the following rates until removed from reserved status or billed as an active Digital ESSX service main station line.

B. Rates and Charges

1. Reserved Digital ESSX service Telephone Numbers

	Monthly Rate	USOC
(a) Per Reserved Telephone Number ²	\$-	REN+X

Note 1: Requires appropriate rates and charges associated with Network Usage Information Service in Section A32. (T)

Note 2: Apply 60 percent of the monthly rate applicable, as specified preceding for a main station line (Intercom and appropriate mileage).

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service - Vintage II (Cont'd)

A112.28.13 Customer Management Features

A. Digital ESSX Customer Administration Service

1. General

- a. The Digital ESSX Customer Administration Service (DECAS) feature permits Digital ESSX service customers to activate/deactivate selected optional features, change certain service options, and change feature configurations on predesignated Digital ESSX service station lines. Customer provided terminal equipment is required for the operation of the DECAS feature.
- b. For DECAS equipped station lines, DECAS allows the customer to verify and/or display the assignment of features on a single station line, range of station lines or all station lines to determine which station or stations have a particular feature or service option.
- c. Certain Digital ESSX service station lines may be specified by the customer to be exempt from this feature. Additionally, the Company reserves the right to make station lines inaccessible for DECAS.
- d. Changing the status of a station line from accessible to DECAS to inaccessible or vice versa, must be done by the Company via a Service Order request. Appropriate Service Order Charges specified in Section A4. apply.
- e. The Company has made the following provision to protect the integrity of the switching system database and to ensure the security of DECAS changes.
 - (1) A DECAS customer's change, display or verify capabilities are restricted to that particular customer's own Digital ESSX service.
 - (2) All changes are audited as they are entered by the DECAS customer. Invalid changes will not be accepted. An error message detailing which command is in error will be given.
 - (3) Customer access to the database is protected using a dialup, login, password/dialback arrangement.
- f. A DECAS customer can schedule changes (individual or bulk) for completion by the next business day or for a future business day. Additionally priority changes may be requested and the changes completed the same day subject to *Terms and Conditions* in this *Guidebook*. (T)
- g. Definitions pertaining to DECAS/Digital ESSX service features are specified in A112.28.3. (T)
- h. The DECAS feature allows the customer to perform the following transactions from the customer provided terminal.
 - (1) Change particular service options on a per station basis and exchange station telephone numbers (TNs). The change capabilities are:
 - Line Status (Active/Inactive)¹
 - Call Pickup Group: The call pickup group to which a station is assigned can be changed on a per station basis
 - The Forward to Number can be changed for a station line with CFBL and/or CFDA assigned
 - Series Completion "Hunt To" Telephone Number (TN): The "hunt to" TN assigned to a station line can be changed on a per station basis²
 - Station TN Rearrangement: Swap TNs from one location to another
 - Access Line Class of Service
 - Add/Change Customer Entered Listing Information
 - Station Controlled Conference Type

Note 1: Station lines made inactive using DECAS will continue to be billed at the *guidebook* rates. (T)

Note 2: All numbers in series completion hunt must be in the same customer group.

EFFECTIVE: February 28, 2006

A112.28 Digital ESSX Service - Vintage II (Cont'd)

A112.28.13 Customer Management Features (Cont'd)

A. Digital ESSX Customer Administration Service (Cont'd)

1. General (Cont'd)

h. The DECAS feature allows the customer to perform the following transactions from the customer provided terminal. (Cont'd)

(5) A DECAS customer may also print the following administrative reports.

- Configuration (i.e., service options, station features) for a single station or span of Digital ESSX service station lines.
- A listing of all pending changes including the type of change and the scheduled effective date.
- Customer Entered Listing Information

The following information is included on all DECAS changeable station lines.

- Station Telephone Number
 - Name¹
 - Organization¹
 - Location¹
- i. Initial training of the customer for up to four system managers in the use of this feature is included at the time the feature is put into service. Communications counselor training is a prerequisite to the DECAS system manager training. Any customer training or subsequent assistance necessary after the initial establishment of the feature is at the option of the customer and a Subsequent Training Charge applies per hour where such training is provided.
- j. A DECAS customer can add, change and delete authorization codes.²
- k. Digital ESSX service main station lines reserved for future use via DialTone provisioning include preassigned telephone numbers and the facilities required. Such telephone numbers and facilities will be removed from reserved status and assigned as active main station lines as requested by the customer.
- l. The assignment of reserved Digital ESSX service main station line facilities and the sequence of numbers for DialTone provisioning assigned to a subscriber's system is made at the discretion of the Company.
- m. DialTone provisioning is furnished subject to the availability of facilities and telephone numbers.
- n. Calls to telephone numbers reserved (but not activated) via DialTone provisioning will be routed to intercept over Digital ESSX service common recorded announcement facilities as specified in A112.28.1. (T)

Note 1: The DECAS customer is responsible for entering and updating the information contained in this field.

Note 2: Furnished subject to the availability of the facilities in the Central Office.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service - Vintage II (Cont'd)

A112.28.13 Customer Management Features (Cont'd)

A. Digital ESSX Customer Administration Service (Cont'd)

1. General (Cont'd)

- o. Telephone numbers and telephone facilities for ESSX service main station lines furnished via DialTone provisioning while in reserved status will be billed at 60 percent of the Digital ESSX service main station line rate (Intercom and Wire Center Line charges).
- p. Telephone numbers and telephone facilities for ESSX service main station lines furnished via DialTone provisioning retain their reserved status until assigned to a main station line at which time the service assumes rates and charges applicable to a Digital ESSX service main station line.
- q. Digital ESSX service main station lines reserved via DialTone provisioning will be included in the determination of System Size (Small, Medium or Large).
- r. PreSet Conference can be created, changed or deleted from a preestablished PreSet Conference number via DECAS.¹ A list of the available PreSet Conference numbers is available to the customer via DECAS.
- s. Meet Me Conference can be created, changed or deleted from a preestablished PreSet Conference number via DECAS.¹ A list of the available Meet Me Conference numbers is available to the customer via DECAS.
- t. To gain access to the Company's Dial Access network, the subscriber must have one Security Card for each System Manager accessing the DECAS Database. Subscribers under an existing DECAS contract will be issued up to (not to exceed) three (3) Security Cards at no additional charge when required by the Company to use a Security Card to access the Company's network.

Once the first three (3) Security Card(s) have been issued, the subscriber must pay for any subsequent Security Cards. Should the subscriber require more Security Cards, they may be ordered from 3.d.(4) following.

- u. The Security Card rate element will provide for the issuance of a card for each System Manager or for the replacement of lost, stolen or expired cards. If the subscriber has purchased a Security Card in conjunction with another feature or service offered by the Company, that Security Card may also be used in conjunction with Customer Control. It is up to the subscriber to notify the Company of an existing Security Card so the Company can ensure that the card is validated for DECAS.

2. *Terms and Conditions*

- a. DECAS is provided only with Digital ESSX service served from a Digital central office and is furnished subject to the availability of facilities.
- b. Customers equipped for DECAS must order via a Service Order² DECAS changeable features in groups of five (5) at the rates specified in A112.28.13.
- c. Non-DECAS changeable features will be added subject to the specifications and rates in A112.28.8, A112.28.9, A112.28.10, or A112.28.11 as appropriate.
- d. Features for DECAS exempt station lines must be requested via a Service Order² and added by the Company. Rates and Charges for the features specified in A112.28.8, A112.28.9, A112.28.10, or A112.28.11 apply as appropriate.
- e. The customer provided DECAS terminal equipment requires a Digital ESSX service main station line. Rates and charges in A112.28.8, A112.28.9, A112.28.10, or A112.28.11 apply as appropriate.
- f. DECAS changes must be entered prior to times to be designated by the Company to be completed as priority changes or by the next business day as requested by the customer.
- g. A DECAS customer cannot activate features in excess of the quantity that has been ordered from the Company. The customer will receive an indication on the terminal screen when 100 percent utilization of a feature is reached. To add additional quantities will require a Service Order.²

Note 1: Furnished subject to the availability of facilities in the Central Office.

Note 2: Appropriate Service Order charges specified in Section A4. will apply.

(T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service - Vintage II (Cont'd)

A112.28.13 Customer Management Features (Cont'd)

A. Digital ESSX Customer Administration Service (Cont'd)

2. Terms and Conditions (Cont'd)

- h. Contractual obligations and End User Common Line Charges will be billed to the location where originally installed and will not transfer with a station line number rearrangement.
- i. If the Company is requested to load DECAS changeable features for new Digital ESSX service /DECAS customers, the Installation Charge specified in 3.b. following applies per feature loaded.
- j. The following types of lines will be restricted from Station TN Rearrangement capability. Service options and feature change capabilities will still be available except on lines assigned to multiline hunt groups.
 - Station lines assigned to multiline hunt groups.
 - Attendant Lines
 - Any Digital ESSX service line which has a special hardware configuration (e.g., ground start lines and lines having signal distribution points)
 - Manual lines (e.g., station lines with full originating and/or terminating restrictions)
- k. DECAS changeable features added by the Company at the customer's request will be subject to the appropriate Service Order charges specified in Section A4. and the per line charges specified in 3.b. following.
- l. Any required changes in customer provided equipment as a result of growth, desired enhancements or technological advancement, will be the responsibility of the DECAS customer. Compatibility with customer provided station terminal equipment is not guaranteed.
- m. The DECAS customer is responsible for assigning and maintaining a record of station feature assignments. The DECAS customer also agrees to provide the Company with a central point of contact for inquires and/or trouble reports involving station features.
- n. DECAS customers will be responsible for initiating a Service Order to correct any information pertaining to Listings that changed as a result of a DECAS TN swap. The appropriate Service Order charges specified in Section A4. apply.
- o. The number of TN swaps that can be requested as priority changes will be determined by the Company when DECAS is ordered.
- p. When required by the Company to use a Security Card, the DECAS subscriber will be required to authenticate with the card before network access is permitted. The network access security system validates the user, and establishes the call across the network to the DECAS host computer. In conjunction with the Security Card, the Company will provide a login and password in order to maintain secure access and an audit trail. Rates for the Security Card are outlined in 3.d.(4) following.

3. Rates and Charges

Digital ESSX service-L customers will have the option of paying for DECAS on either a per system or a per line basis. Customers choosing to pay on a per system or a per line basis will be subject to the rates specified in 3.a following. The installation charge will be reapplied if a Digital ESSX service-L customer changes their DECAS billing arrangement subsequent to the installation of the DECAS feature.

A112.28.14 Switched Data Service I

A. General

- Switched Data Service is a digital switched service that may be utilized by Digital ESSX service subscribers to provide up to a maximum of 56 kilobits per second full duplex information via a specially equipped two-wire Digital ESSX service main station line.
- Switched Data Service Capability will be provided to Digital ESSX service subscribers via non-loaded facilities utilizing main station lines within the engineering limits of Switched Data service where facilities permit.
- Digital ESSX service main station lines with Switched Data Service capability will allow digital calls only. Main station lines equipped with Switched Data Service capability are not voice functional.

Note 1: Apply sixty percent of the monthly rate applicable for intercom and the wire center line for a main station line at the customer's main location.

Note 2: Rates and charges specified elsewhere in Section A112. are applicable.

Note 3: When required by the Company to use a Security Card to access the Company's network, up to three (3) Security Cards, as outlined in A112.28.13.A.1.t. preceding, will be provided at no charge to subscribers who are under the existing DECAS rate and *guidebook* structure. (T)

Note 4: Appropriate Service Charges as specified in Section A4. apply. (T)

A112.28.14 Switched Data Service I (Cont'd)

B. Terms and Conditions

1. Switched Data Service capability for Digital ESSX service main station lines is furnished at rates specified in C. following. Rates for locations beyond two and one half miles will be provided as specified in Section A5. (T)
2. The total quantity of voice functional main station lines and Switched Data Service capable main station lines for one subscriber will determine Digital ESSX service size (Small, Medium, Large). (T)
3. A Digital ESSX service subscriber utilizing Switched Data Service capability must subscribe to a main station line that will include the exchange circuit and the C.O. termination at rates and charges as specified in C. following for Message and Flat Rate service. The C.O. termination will include intercom, provisioning for Switched Data Service and Data Call Protection per main station line. (T)
4. Digital ESSX service subscribers who originate a call to a Switched Data line outside of their system will be subject to the AccuPulse service usage charge in A29.6. (T)
5. End User Common Line Charge will apply as appropriate.
6. DECAS capabilities may not be used to affect changes on Switched Data Service capable Digital ESSX service main station lines.
7. The following features will be offered to Switched Data Service capable main station lines at the rates and charges as indicated in the appropriate Digital ESSX service sections of this *Guidebook*. (T)
 - Autodial
 - Automatic Line
 - Call Forwarding Busy Line
 - Call Forwarding Don't Answer
 - Call Forwarding Variable
 - Call Back Queue
 - Group Intercom
 - Station Restrictions
 - Ring Again
 - Speed Calling Long
 - Speed Calling Short
 - Make Line Busy

These features are in addition to Digital ESSX service standard features as indicated in A112.28.1. (T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.29 ESSX Multi-Account Service

(Obsoleted 10-08-95, Type 4) Service rates and charges in this section are available for inward activity of existing ESSX Multi-Account Service (EMAS) Primary and Secondary Account subscribers only as specified following. Not available for new service or entire moves of existing service to new locations.

Obsolescence Rules

1. Inward activity for EMAS will be allowed.
2. EMAS subscribers under the month-to-month payment option will be allowed to maintain their service at month-to-month rates.
3. EMAS subscribers who have a portion of their existing service under a month-to-month payment option and a portion of their existing service under a Term Payment Plan may remain under the rates and charges outlined in this Section until such a time that the Term Payment Plan associated with the Common Equipment expires. Upon expiration of the Term Payment Plan associated with the Common Equipment, the Company reserves the right to convert all or part of the subscriber's account to the month-to-month rates and charges as outlined in this *Guidebook*. (T)
 The subscriber may place their month-to-month rates under rates and charges equivalent to their ESSX service - Vintage II or Digital ESSX service - Vintage II Common Equipment Term Payment Plan.
 Should the subscriber elect not to convert their month-to-month rates and charges to the Term Payment Plan, they may remain on the month-to-month rates and charges.
4. EMAS subscribers under a Term Payment Plan will be allowed to maintain their service until the expiration date associated with the Common Equipment of their contract. Upon expiration of the Term Payment Plan associated with the Common Equipment, the Company reserves the right to convert all or part of the subscriber's account to the month-to-month rates and charges as outlined in this *Guidebook*. (T)
5. EMAS subscribers under a Term Payment Plan or a month-to-month payment option will have until 12/29/95 to convert to a Term Payment Plan period of not greater than 36 months in length.
6. Existing EMAS subscribers who are under a Term Payment Plan may add a new secondary location (SLA) of their existing service.
7. Conversions from ESSX-1 service will not be allowed under this *Guidebook*. (T)
8. **(DELETED)** (D)
 EMAS subscribers currently covered under Term Payment Plans may retain their contract as outlined in A112.26. (T)

A112.29.1 General

- A. ESSX Multi-Account service is a fully partitioned ESSX service for use in an environment serving multiple tenants located in a building or buildings on the same continuous property. The continuous property area for each ESSX Multi-Account service must be specifically identified and under the control of a single owner or management unit. Areas so designated may be intersected or transversed by public thoroughfares provided that the adjacent property segments created by intersecting or transversing thoroughfares would be continuous in the absence of the thoroughfare. The designated service area must be wholly within the confines of the serving wire center boundary.

- B.** Rates and conditions for ESSX Multi-Account service as specified following and where applicable are in addition to the rates and conditions specified for ESSX service. (T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.29 ESSX Multi-Account Service (Cont'd)

A112.29.2 Terms and Conditions

- A. The provision of ESSX Multi-Account service is dependent upon the establishment of a Primary Account for a minimum of thirty-six (36) months under the terms and conditions of the Term Payment Plan located in A112.26.6 and A112.28.6. All other subscribers to an ESSX Multi-Account service are considered Secondary Accounts. All Secondary Account agreements for an ESSX Multi-Account service must terminate either on or before the expiration date of the Primary Account's subscription agreement for ESSX Multi-Account service. (T)
- B. The Primary Account accepts responsibility for the training of Secondary Accounts and will provide assistance in the coordination of ESSX service for Secondary Accounts. As a part of the coordinating role, the Primary Account is also responsible for monitoring the total system size and will notify the Company when the ESSX Multi-Account service moves from one size classification to another such as the movement from an ESSX service-S to an ESSX service-M. The Primary Account is also responsible for insuring that the minimum system size established for ESSX service is maintained throughout the life of the agreement. (T)
- C. ESSX Multi-Account service will provide partitioned ESSX service for each account subscribing to ESSX Multi-Account service. Each ESSX Multi-Account service subscriber is required to have separate Network Access Registers (NARs) to provide network access.
- D. Station to Station calling is limited to ESSX service main station lines within each ESSX Multi-Account service. Intercom calling between unaffiliated accounts is not permitted under ESSX Multi-Account service.
- E. Each subscriber to ESSX Multi-Account service is subject to all rates, *terms and conditions* of ESSX service as specified and where applicable in Section A112. (T)
- F. Each account will be directly responsible to the Company for all charges associated with its service. The Company will bill each account directly for its service.
- G. Appropriate nonrecurring charges will apply as follows:
 - 1. Service Establishment Charges for ESSX service (Small, Medium or Large) as specified in A112.26.7 or A112.28.7 will apply to the Primary Account of a Multi-Account system. (T)
 - 2. Installation Charges for ESSX Multi-Account service as specified in A112.29.5 or A112.29.6 will apply to the Secondary Accounts. (T)
- H. Appropriate recurring charges will apply as follows:
 - 1. Common Equipment Charges for ESSX service (Small, Medium or Large) as specified in A112.26.7 or A112.28.7 will apply to the Primary Account of a Multi-Account system. (T)
 - 2. Charges for ESSX Multi-Account service as specified in A112.29.5 or A112.29.6 will apply to the Secondary Accounts. (T)
- I. System size (ESSX service - Small, Medium and Large) will be determined by the total number of main station lines in a Multi-Account system. The minimum number of main station lines per Multi-Account system will apply as specified in A112.26.2.V. or A112.28.2.V. (T)
- J. Each account must designate its preferred carrier for long distance service.
- K. ESSX service features are provided individually to each account. Where the ESSX service *guidebook* permits, features may be provided on either a station basis or a system basis as described in Section A112. If provided on a system basis, appropriate system charges apply to each account electing this option. (T)
- L. The mix of ESSX service and Digital ESSX service customers within the same Multi-Account system is not permitted.
- M. The Company maintains the right to serve directly any subscriber within the designated service area.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.29 ESSX Multi-Account Service (Cont'd)

A112.29.3 Definitions

ACCOUNT

A subscriber of ESSX Multi-Account service - may be either a Primary Account or a Secondary Account.

MULTI-ACCOUNT SYSTEM

Consists of a Primary Account with or without Secondary Account(s).

PRIMARY ACCOUNT

The subscriber who accepts responsibility for the coordinating role for the Multi-Account system as specified in this Section.

SECONDARY ACCOUNT

Any ESSX Multi-Account service subscriber of a system other than the Primary Account.

A112.29.4 Conversion

A. Conversion from ESSX Service to ESSX Multi-Account Service.

1. When a subscriber with ESSX service elects to convert to an ESSX Multi-Account service, the following conditions apply:
 - a. When a Primary Account of the same system size as the one from which converting is established, no Service Establishment Charge will apply.
 - b. When a Primary Account of a larger system size other than the one from which converting is established, the subscriber will be liable for the difference in Service Establishment Charges between the appropriate system sizes.
 - c. When a Secondary Account is established by conversion from an existing ESSX service, no Installation Charge will apply.

B. Conversion from ESSX Multi-Account Service to ESSX Service.

1. When a subscriber with ESSX Multi-Account service elects to convert to an ESSX service, the following conditions apply:
 - a. When a Primary Account converts to an ESSX service, no Service Establishment Charge applies providing the original Service Establishment Charge was for a system the same size or larger than the system to which converting.
 - b. When a Secondary Account converts to an ESSX service, the difference between the Installation Charge for ESSX Multi-Account service and the Service Establishment Charge for ESSX service will apply.
 - c. The minimum number of main station lines per ESSX service converted will apply as specified in A112.26.2 or A112.28.2.

(T)

A112.29.5 ESSX Service

A. Common Equipment

1. The following rates and charges are for the ESSX Multi-Account service feature only and are in addition to the appropriate and applicable service charges, monthly rates and nonrecurring charges for ESSX service, Network Access Registers, and other services to which ESSX Multi-Account service subscribers may subscribe. Rates and charges for ESSX Multi-Account service apply only to each Secondary Account.

A112.30 Digital Electronic Tandem Switching Features

(Obsoleted 10-08-95, Type 4) Service rates and charges in this Section are available for inward activity of existing subscribers only as specified in the obsolescence rules stated in A112.28. Not available for new service or moves of existing service to new locations.

A112.30.1 General

A. Digital Electronic Tandem Switching (DETS) features are provided only in association with Digital ESSX service furnished where capabilities exist from central office equipment located on Company premises. In the following sections of the *guidebook* the DMS100 supported features are denoted by "I" and the SESS supported features are denoted by "II". (T)

A112.30.2 Terms and Conditions

A. The following are DETS features only:

- Automatic Alternate Routing II
- Automatic Route Selection - Deluxe II
- Facility Restriction Levels
- Network Automatic Route Selection I
- Priority Queuing II
- Traveling Class Mark
- Uniform Numbering

B. The following are DETS or non-DETS features:

- Authorization Codes
- Automatic Circuit Assurance II¹
- Direct Inward System Access I
- Network Speed Call I
- Queuing
- Time of Day
- Traffic Data to Customer II¹

Note 1: For rates and charges see Section A32.

A112.30 Digital Electronic Tandem Switching Features (Cont'd)

A112.30.2 Terms and Conditions (Cont'd)

(T)

C. Definitions

1. Authorization Codes (AUTH) enable selected users to temporarily override the access restrictions assigned to a station or trunk. Authorization codes, when dialed by the caller, grant the caller privileges associated with the authorization code rather than the station or trunk from which the calls are being made.
2. Automatic Alternate Routing (AAR, II) is an alternate routing capability similar to ARS-D with the difference being that AAR is used to route calls to stations on the customer's private telecommunications network.
3. Automatic Route Selection - Deluxe (ARS-D, II) extends the choice of private routes for each NPA/NXX to sixteen versus four for ARS and can include tie lines in routing patterns. Stations accessing the ARS-D feature can be given one of sixteen special classes of service (i.e., FRLs) that defines how many of the maximum number of routes for the dialed NPA/NXX will be examined before the call is blocked. Also, this service allows the routing patterns to be changed under customer control or to change automatically as a function of Time of Day feature.
4. Direct Inward System Access (DISA, I) enables selected outside callers from the public switched network direct access into the Digital ESSX service and to gain access to network facilities without attendant assistance. Rates and charges for DISA are in addition to those for facilities, transport, Feature Group A, individual business lines, etc.
5. Facility Restriction Level (FRL) defines the calling privileges associated with a line. Each outgoing route within a routing pattern is assigned an FRL that identifies the minimum level of privilege needed to access the facility. The originating line must have an FRL equal to or greater than that of the facility to be used. This feature equates to Line Screening Codes and Flags in the DMS100.
6. Network Automatic Route Selection (N-ARS, I) allows a multi-location customer to route on-network and off-network calls between the customer's locations.
7. Network Speed Call (I) allows a customer group to have up to 1000 common preprogrammed speed call numbers. The numbers may be combined in one list or subdivided into multiple smaller lists. Each list requires a separate feature access code.
8. Priority Queuing (II) allows priority off-hook either trunk or station originating calls to queue against outgoing trunk/facilities. Two levels of priority can be assigned based on customer requirements.
9. See A112.28.11 for rates and charges for Off-hook and Call-back queuing.
10. Time of Day (TOD) system control provides a method of automatically changing network routing parameters according to a prespecified schedule. TOD is required for TOD ARS and TOD NCOS.
 - a. TOD NCOS (I) provides the capability of mapping normal NCOS values into new values based on TOD, day of week, and day of year.
 - b. TOD ARS (I) will allow the customer to activate different routing patterns on specified ranges. Calls will be routed via instructions given in the route list elements.
 - c. Time of Day (TOD, II) system control provides a method of automatically changing the routing parameters according to a prespecified schedule.
11. Traveling Class Mark (TCM) provides the capability to transmit across a private network certain information along with a dialed number to identify privileges available to the caller. This feature equates to Network Information Signaling in the DMS100.
12. Uniform Numbering (UN) provides a customer specified numbering plan, utilizing 7 digits for on-net and 10 digits for off-net or 7 digits for on-net and 1+10 digits for off-net. Each Customer switch connected to the ETN is identified by a unique 3 digit location code called RNX.
13. Network Class of Service (NCOS) is an information bearing code that is assigned to every station line, trunk, authorization code, and attendant console at each ETN Tandem location. The NCOS is comprised of several pieces of information that combine to represent the identity of the station, trunk or attendant console to which it is assigned. NCOS equates to D-PAT for 5ESS.

A112.31 ESSX ISDN Service

(O)(T)

(Obsoleted 10-22-95, Type 4) Service rates and charges in this Section are available for inward activity of existing subscribers only as specified in the obsolescence rules stated in A112.28. Not available for new service or entire moves of existing service to new locations.

(N)

Note 1: For Queuing see *A112.28.11* for rates and charges.

(O)(T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.31 ESSX ISDN Service (Cont'd)

A112.31.1 General

- A. ESSX ISDN service is an intraLATA group of offerings supported by the Integrated Services Digital Network (ISDN) architecture. ESSX ISDN service supports simultaneous transmission of voice and data on the same exchange access line. ESSX ISDN service is available only to Digital ESSX service customers. The ESSX ISDN service lines in this offering can be added to Digital ESSX service Systems under the same terms and conditions specified in A112.28. (T)
- B. ESSX ISDN service provides a method of access to the subscriber's Digital ESSX service system called Basic Rate Access. Basic Rate Access will consist of up to two 64 Kbps (B) channels and one 16 Kbps (D) channel at the service delivery point.
- C. ESSX ISDN service will consist of the following components:
 - 1. Digital ESSX service Common Equipment¹
 - 2. Basic Rate Digital Subscriber Line (DSL) Access Arrangement¹
 - 3. ISDN Loop Access Mileage¹
 - 4. ISDN Bearer Alternative Services¹
 - Minimum of one and maximum of eight Bearer Services per Basic Rate DSL Access Arrangement
 - Maximum of eight identifiable users with a maximum of two simultaneous channels in use per Basic Rate DSL Access Arrangement
 - 5. Usage Charges¹
 - 6. Features
 - 7. Network Access¹

A112.31.2 Terms and Conditions

- A. Customer Premises Equipment (CPE) for use with ESSX ISDN service Interface is the responsibility of the user for provisioning. (T)
- B. The Company shall not be responsible if changes in any of the equipment, operations, or procedures of the Company utilized in the provision of Basic Rate ESSX ISDN service render any facilities provided by the customer obsolete or require modification or alteration of such equipment or system, or otherwise affect its use or performance.
- C. Terms and conditions for ESSX ISDN service are applied based on the system size as defined in Digital ESSX service in this Section. (T)
- D. Suspension of service is not allowed.
- E. Service Order Charges and Central Office Line Charges in Section A4. are applicable in addition to rates and charges in A112.31.5 following. (T)
- F. ESSX service Flat Rate or Measured /Message Rate Network Access Registers (NARs) as provided in Section A3. should be used with ESSX ISDN service. (T)
- G. ESSX ISDN service subscribers with mixed or flat rate Digital ESSX service must choose circuit switched B channels designated for use with Mixed or Flat Rate systems in this Section. These B channel rates include a usage surcharge in lieu of the usage charges in Section A3. (T)

ESSX ISDN service subscribers with measured rate Digital ESSX service must choose circuit switched B channels designated for use with all measured systems in this Section. Usage charges defined in Section A3. are applicable for transmission outside of the subscriber's system or the subscriber's serving central office. (T)
- H. Each ESSX ISDN service Basic Rate Access Arrangement line will be counted as a Digital ESSX service line in determining the total system size.
- I. Telephone numbers transmitted via the Calling/Called Number Display feature are intended solely for the use of the ESSX ISDN service subscriber. Resale of this information is prohibited by this *Guidebook* except the callers' numbers may be provided to the subscriber's client for those calls sponsored or provided by that client where the client's identity is disclosed to the caller and the client agrees not to distribute such information to others. (T)

Note 1: Every system will include these components.

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.31 ESSX ISDN Service (Cont'd)

A112.31.2 *Terms and Conditions* (Cont'd)

J. (DELETED)

A112.31.3 Definitions

B Channel

A bidirectional synchronous channel capable of supporting 64 Kbps of digital transmission.

D Channel

A 16 Kbps digital signaling channel also capable of supporting 9.6 Kbps of packet information for the Basic Rate Interface (BRI).

64 Kbps Clear Channel Capacity (CCC)

A B channel connection that provides end-to-end digital connection in which all 64 Kbps of bandwidth are available for customer use.

Configuration Groups (5ESS)

Configuration Groups use a similar software assignment concept to associate physical buttons of ISDN terminals to feature and actions. Since Configuration Groups use a group assignment process, it is necessary to group ISDN terminals together by type and common button action, so that terminals assigned to the same Configuration Group will operate in the same manner. Call appearances and features on one terminal's buttons will then appear on the same button numbers on any other terminal in the same Configuration Group, as long as the same features/call appearances are used on each terminal. If not, the buttons cannot be used for a different feature or function. Variations in terminal types, features, call appearances, and feature button location will necessitate multiple Configuration Groups.

A112.31.4 Service Bearer Alternatives and Features

- A. ESSX ISDN service Capability is provided through Bearer Alternatives and Features. Customers are required to subscribe to at least one Bearer Alternative Service. Features are available to increase the capability of the Bearer Alternative Service and may be subscribed to on an as needed basis.
- B. B Channel Bearer Alternatives
 - 1. Circuit Switched (B channel) Bearer Alternatives are usage sensitive switched services that offer up to 64 Kbps intra-office transmission for voice, data, or alternate voice and data transmission.
 - a. Alternate Voice/Data - This option permits the customer to utilize either circuit voice or data transmission paths on a per call selection basis. Transmission on the B channel will be circuit switched at 64 Kbps within the switch and/or equipped facilities between ISDN compatible central offices. ISDN interconnection to non-ISDN equipped central offices will be potentially subjected to analog transmission or sub-rated to 56 Kbps. This option includes one directory number (DN).
 - b. (DELETED)

(T)

A112.31.4 Service Bearer Alternatives and Features (Cont'd)

C. (DELETED)

(D)

D. Features - Circuit Switched Voice

1. Inspect is used to retrieve and display call-related information about any call appearance that has a call associated with it. This could be the active call, a call on hold, or an alerting call. It includes time of day and date (5ESS only).
2. Calling/Called Number Delivery - provides a user who is receiving/originating a call with information about the calling/called party and the facility or destination. It allows the calling/called DN to display for all terminals that share the same DN. Calling Number Delivery Blocking is available to customers at no charge.¹
3. ISDN Intercom (ICOM)
 - a. Automatic - allows the ISDN telephone to originate calls to a DN by using only the ICOM feature button.
 - b. Group (Dial) - allows the ISDN telephone to originate a call to a DN by pressing the ICOM feature button and dialing one or two digits.
4. Additional Call Appearance - allows the set to have more than one DN button assigned to the same PDN.
5. Non-Shared Secondary-Only DN - a secondary DN that appears on only one terminal.
6. Shared Non-ISDN DN - allows a Non-ISDN set to share calls with an ISDN set.
7. Shared Primary DN - a primary DN that appears on more than one terminal.
8. Shared Secondary-Only DN - First Appearance - the first appearance of a secondary DN that appears on more than one terminal but is not the primary DN on any of those terminals.
9. Shared Secondary-Only DN - Additional Device - allows the first appearance of the Shared Secondary-Only DN on an Additional Device.
10. Manual Exclusion (Privacy) - allows a user to inhibit other stations in the same group from picking up a call on hold or bridging to a call that is active at that station.
11. Privacy Release (DMS only) - allows other stations to bridge into an existing call.
12. Conference, Drop, Hold, Transfer
 - a. Conference - allows the set user to select an idle call appearance for the second leg of a three-way conference.
 - b. Drop - allows the set user to drop the last party added to a conference call. For a two-party call, pressing this button disconnects the set from the call.
 - c. Hold - allows the set user to place a call on hold by pressing the function button. Any set with the call appearance for the call on hold can pick up the call by pressing the call appearance button.
 - d. Transfer - allows the user to transfer a call to another DN in the customer group by pressing the transfer button, dialing the DN, and pressing the button again.
13. Additional call appearance of a shared DN - allows the set to have more than one DN button assigned to the same DN.
14. Call Forwarding Variable - Feature Button (5ESS) - when activated by a main station line user, automatically routes calls intended for his main station line to any other main station line selected inside or outside the subscriber's Digital system. This feature is used only when the subscriber requires Call Forwarding - Variable on a feature button.

(T)

Note 1: This is a mandatory feature in the DMS-100 if any line in the system is equipped for this feature.

A112.31 ESSX ISDN Service (Cont'd)

A112.31.4 Service Bearer Alternatives and Features (Cont'd)

D. Features - Circuit Switched Voice (Cont'd)

15. Visual Message Indicator - provides the user of a message service with a visual indication that a message is waiting.
16. Audible Message Waiting Indicator (5ESS) - provides the user of a message service with an indication that a message is waiting.
17. Voice features compatible with ISDN lines not defined in this document will be available and as indicated in A112.28 (Digital ESSX service) of this *Guidebook*.

E. Features - Circuit Switched Data

1. Circuit Switched Data Call Hunting (5ESS) - allows multi-line hunting with Circuit Switched Data Service Capability

F. (DELETED)

(T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.31 ESSX ISDN Service (Cont'd)

A112.31.5 Rates and Charges

- A. The ESSX ISDN service is associated with existing forms of exchange access which are Digital ESSX service. These rates and charges are applicable in addition to the rates and charges for associated services and features.
- B. ESSX ISDN service Bearer Alternative Services will be available in combinations restricted by the limits of the Company central office type. The subscriber will choose the most appropriate combination(s) and will be billed the Required Bearer Alternative and Additional Options as needed.
- C. Digital ESSX service Common Equipment is required for all ESSX ISDN service lines. Rates and charges for Digital ESSX service Common Equipment are in addition to the charges in E. following.
 - 1. Rates, charges, liabilities and additional *terms and conditions* if applicable may be developed on an individual basis for Basic Rate DSL Access Arrangements exceeding the qualified loop area requirements. (T)
- D. ISDN Basic Rate Access Capability Charges
 - 1. Basic Rate DSL Access Arrangement

4. Usage

a. Circuit Switching - Outside the Business Group

- (1) For fully Measured systems per minute usage rates, for all circuit switched services (voice and/or data) apply to the average local exchange use (rounded to the nearest second) and are defined in Section A3. Usage rates are applicable for transmission outside of the subscriber's system or the subscriber's serving central office. (T)

ESSX ISDN service subscribers associated with Mixed or Flat Rate Digital ESSX service will have a surcharge built into the rate for B channel Circuit Switched Voice/Data in lieu of usage rates in Section A3. (T)

b. Calling Number Delivery

- (1) Charges for the inward delivery of calling number information (CNI) on a flat rate basis will be as indicated in 6 following.
- (2) Charges for the inward delivery of calling number information (CNI) on a measured basis (USOC DS1FC) will be as follows:

	Charge Per Calling Number Delivered	USOC
(a) Per calling number delivered - first 50,000	\$.0075	NA
(b) Per calling number delivered - 50,001 - 400,000	.005	NA
(c) Per calling number delivered - over 400,000	.0025	NA

- 5. ESSX ISDN Service Features are available on a per Alternative Bearer Service basis. Features associated with Digital ESSX service are under the terms and conditions in A112.28. (T)

7. Feature Administration Charges						
a. Charges for Multi-button ISDN features will be based on the total number of configuration groups or terminals programmed.						
(1) Programmable Buttons						
(a) Per configuration group (5ESS)	15.00	-	-	-	-	DS1A1
(b) Per terminal (DMS)	.50	-	-	-	-	DS1A2
8. Circuit Switched Data Call Hunting (5ESS)						
(a) Each	2.50	.20	.15	.10	.05	HTGSD
9. (DELETED)						

Note 1: (Obsoleted 01-05-95, Type 4. Service and rates in this section are available for existing customers at existing locations only. Not available for new service, additions to existing service, or moves of existing service to new locations.)

Existing subscribers to this feature may convert to the flat rate Calling/Called Number Delivery feature. Existing customers under contract may not recast this feature at the end of their contract period. Existing customers may continue to pay these rates until their contract expires or until such a time that the customer requests additions to their measured Calling/Called Number Delivery feature. When the customer requests additions to their measured Calling/Called Number Delivery feature, they must subscribe to the flat rate Calling/Called Number Delivery feature for all Calling/Called Number Delivery lines. For such conversions, the installation charge for the flat rate Calling/Called Number Delivery feature will not apply. Service Charges from Section A4. are also not applicable. (T)

A112. OBSOLETE CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.32 MultiServ Service Message Rate Station Links

Obsoleted 10-13-02, Type D. Service rates and charges in this section are available for inward activity for existing customers only. Not available for new service, conversions, or moves of existing service to new locations except when a subscriber remains within the same serving central office switch.
