A115. OBSOLETE SERVICE OFFERINGS - CONNECTIONS OF TERMINAL EQUIPMENT AND COMMUNICATIONS SYSTEMS

A115.1 Terminal Equipment

A115.1.1 Connection of Voice Transmitting and/or Receiving Terminal Equipment For Recording of Two-Way Telephone Conversations

A. Terms and Conditions (T)

1. General

Telecommunications service furnished by the Company is not represented as adapted to the recording of telephone conversations. However, recording equipment may be used in connection with telecommunications service subject to the *terms and conditions* specified in A15.1.1.D. and A15.1.3.B. (T)

(Filed in compliance with order dated May 20, 1948 of Federal Communications Commission in Docket No. 6787)

- a. Connection of voice recording equipment with facilities of the Company for the recording of two-way telephone conversations is permitted by means of a direct electrical connection or a connecting arrangement by the Company for additions to Grandfathered Terminal Equipment or Communications Systems.
- b. The voice recording equipment must comply with the minimum network protection criteria set forth for direct electrical connection of customer-provided voice terminal equipment in A15.1.3.C.
- c. Except as otherwise provided in A15.1.7 and A15.1.8, installations of new connecting arrangements will not be made for connection of terminal equipment, for connection of communications systems and for equipment-to-equipment connections. Treatment with respect to grandfathered installations which include such connecting arrangements is covered in A15.1.3.B. (T)

A115.2 Communications Systems (Cont'd)

A115.2.3 Public Address and Loudspeaker or Radio Paging Systems (Cont'd)

A. Terms and Conditions (Cont'd)

1. General (Cont'd)

Radio paging systems used to transmit voice paging messages or announcements or code signaling tones, may be used in connection with Company facilities furnished for dial PBX systems. (C)

Connection of the above public address and paging systems are subject to the following conditions:

a. Connection with Company Facilities

- (1) Connection of public address or loudspeaker paging systems with facilities of the Company shall be made only through connecting equipment or arrangements furnished by the Company. The connecting equipment or arrangements will include a connecting block or equivalent to which the public address or loudspeaker paging system will be connected.
- (2) Connection of radio paging systems with facilities of the Company shall be made only through an Interface Trunk Circuit furnished by the Company. This circuit will accept calls from dial PBX stations directly or over dial repeating tie lines from another PBX. Connection of calls from the local and long distance message telecommunications network must be through the attendant and the attendant must do the necessary dialing. (C)
- (3) The Company facilities when so connected may be used only to transmit messages or signals to public address and loudspeaker or radio paging systems. Such public address and loudspeaker or radio paging systems may not be used to originate messages into Company facilities.
- (4) Except as otherwise provided in A15.1.7 and A15.1.8, installations of new connecting arrangements will not be made for connection of terminal equipment, for connection of communications systems and for equipment-to-equipment connections. Treatment with respect to grandfathered installations which include such connecting arrangements is covered in A15.1.3.B.

A. *Terms and Conditions* (T)

1. General

- a. Connection of alarm detection and reporting equipment with the facilities of the Company shall be made only through an alarm coupler furnished by the Company. The alarm coupler consists of a one-way interface unit which, in response to a signal from the customer's device, seizes the telephone line, transmits dial pulses corresponding to a predetermined telephone number and a prerecorded voice alarm report originated by the customer's device to the line and disconnects at the end of the report.
- b. The alarm coupler is furnished for use in connection with telephones associated with individual lines or dial PBX station lines.
- c. The alarm coupler is furnished only for the purpose of reporting a condition or result of an operation of the equipment with which it is associated and shall not be used to connect any other equipment with Company facilities.
- d. Alarm detection and reporting equipment connected through an alarm coupler shall not be used to interconnect any line or channel of the Company with any other line or channel of the Company or any other person.
- e. Except as otherwise provided in A15.1.7 and A15.1.8, installations of new connecting arrangements will not be made for connection of terminal equipment, for connection of communications systems and for equipment-to-equipment connections. Treatment with respect to grandfathered installations which include such connecting arrangements is covered in A15.1.3.B. (T)

A115.1.6 Dictation Recording Equipment

A. Terms and Conditions (T)

1. General

Recording equipment may be used in connection with dial PBX or Centrex Type Services facilities of the Company for the recording of dictation subject to the following conditions.

a. Connection with Company Facilities

- (1) Connection of dictation recording equipment with the dial PBX or Centrex Type Services facilities of the Company shall be made only through a dial dictation recording terminal furnished for this purpose. The dial dictation recording terminal will include and terminate in a connecting block to which alone the dictation recording equipment may be connected.
- (2) The dictation recording equipment may be used only with dial extensions of the customer's PBX or Centrex Type Services dial extensions of associated dial PBX or Centrex Type Services systems connected by dial tie lines, and in no case shall such equipment be connected to the local and long distance networks.
- (3) One dial dictation recording terminal is required for connection with each dictation recording machine.
- (4) Auxiliary equipment at the PBX may be required.
- (5) Except as otherwise provided in A15.1.7 and A15.1.8, installations of new connecting arrangements will not be made for connection of terminal equipment, for connection of communications systems and for equipment-to-equipment connections. Treatment with respect to grandfathered installations which include such connecting arrangements is covered in A15.1.3.B. (T)
