

2.9 Connections of Customer-Provided Data Terminal Equipment Through a Data Set

Not applicable in the Southwest Region.

A. Customer-provided data terminal equipment may be connected to IITS through a Telephone Company-provided registered or grandfathered Data Set which will perform the functions of:

1. network control signaling,
2. conditioning the data signals generated by the Customer-provided terminal equipment to signals suitable for transmission by means of Telephone Company services, and
3. conditioning signals transmitted by means of Telephone Company services to data signals suitable for reception by Customer-provided equipment.
