22 - AT&T Volume Discount Plan

22.1 AT&T Volume Discount Plan

22.1.1 General Description

(B) Volume Tiers and BCD Discounts

Volume Tiers	Average Monthly Volume	Billing Credit Discount BCD
BellSouth Metro Ethernet Connections: Bandwidth Speeds 100Mb - 1000Mb		
Layer 1	8 to 15	2.0%
Layer 2	16 to 23	2.5%
Layer 3	24 to 31	3.0%
Layer 4	32 or more	3.5%

(C) Example of BCD Calculation

For example, a Customer subscribes to DS1 services with monthly Local Channel in-service volumes as shown below. A Customer calculates its total volume by adding up the in-service totals for the months the Customer subscribed to AT&T Volume Discount Plan during the plan year.

In-Service Monthly Volumes

January
 February
 March 30
 April 60
 May 90
 June 120
 July 150
 August 180
 September 210
 October 240
 November 270
 December 300
 Total 1,650

A Customer calculates its AMISV as follows:

$$\text{AMISV} = 1,650(\text{from Total above}) / 10(\text{Number of subscribed months for plan year}) = 165$$

After the AMISV is calculated, in this case 165, a Customer can obtain their BCD using the Billing Credit Discount Table in Section 22.1.1(B), above. For this example, BCD = 2.0%.
