

AT&T INTERSTATE ACCESS GUIDEBOOK (Guidebook)

PART 12 - Competitive BDS Services - Southwest
SECTION 7 - Special Access Service

1st Revised Page 1

ACCESS SERVICE

7. Special Access Service

The following list matches the Telephone Company's Basic Service Element (BSE) names to the industry standard names for each BSE.

<u>Telephone Company Names</u>	<u>Generic Name of ONA Service</u>
Bridging	Bridging
- Central Office Bridging Capability	
- Telegraph Bridging	
Clear Channel Capability on 1.544 Mbps	Access to Clear Channel Transmission
Conditioning	Conditioning
Extended Superframe Format	Extended Superframe Conditioning
Multiplexing	Multiplexing - Digital
- Central Office Multiplexing	
Secondary Channel Capability	Secondary Channel Capability

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.1 Service Provisioning

Special Access Service includes all exchange access not utilizing Telephone Company end office switches.

- Special Access Service, with the exception of the WATS Access Line, Network Reconfiguration Service and Transport Resource Management Service, provides a transmission path connecting customer designated premises⁽¹⁾, either directly or through a Telephone Company Hub where bridging, multiplexing, Network Reconfiguration Service or Transport Resource Management Service functions are performed. Network Reconfiguration Service and Transport Resource Management Service, as set forth in Section 18 (Network Management Services), work in conjunction with Special Access Service allowing customers the ability to reconfigure their circuits.
- The WATS Access Line, offered under Voice Grade Service, provides a transmission path connecting a customer designated premises with the WATS serving office.

The connections provided by Special Access Service can be either analog or digital. Analog connections are differentiated by spectrum and bandwidth. Digital connections are differentiated by bit rate.

(1) Telephone Company Centrex CO-like switches and Telephone Company Answering Service Concentrators are considered to be customer premises for purposes of administering regulations and rates contained in this guidebook.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.1 Service Provisioning (Cont'd)

7.1.1 Types of Service Configurations

There are types of service configurations over which Special Access Services are provided, as shown following.

(A) Two-Point Service

A two-point service connects two customer designated premises, either on a directly connected basis or through a hub where multiplexing, Network Reconfiguration Service, or Transport Resource Management Service functions are performed.

(B) Multipoint Service

Multipoint service connects three or more customer designated premises through a Telephone Company Hub.

Only certain types of Special Access Service are provided as multipoint service. These are so designated in the Service Descriptions set forth in 7.3 (Service Descriptions, Rates and Charges).

There is no limitation on the number of mid-links (channels between hubs) available with multipoint service. However, when more than three mid-links are provided in tandem, the quality of the service may be degraded.

Multipoint service utilizing a customized technical specifications package, as set forth in 7.3 (Service Descriptions, Rates and Charges), will be provided when technically possible. If the Telephone Company determines that the requested characteristics for a multipoint service are not compatible, the customer will be advised and given the opportunity to change the order.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.1 Service Provisioning (Cont'd)

7.1.1 Types of Service Configurations (Cont'd)

(C) Multiplexed Service

Multiplexed service is an arrangement that allows the conversion of Voice Grade, Analog and Digital High Capacity facilities to lower capacity or bandwidth. The types of multiplexing available are as follows:

- (1) Voice Grade to Telegraph⁽¹⁾ (43 Type Carrier)
An arrangement that converts a Voice Grade channel to Telegraph Grade channels using frequency division multiplexing.
- (2) High Capacity (DS1) to Voice Grade⁽¹⁾
An arrangement that converts a 1.544 Mbps channel to 24 channels for use with Voice Grade services. A channel of this DS1 to the hub can also be used for MegaLink Data⁽¹⁾, Metallic⁽¹⁾ service or WATS Access Lines⁽¹⁾.
- (3) High Capacity (DS1) to DS0⁽¹⁾
An arrangement that converts a 1.544 Mbps channel to 23 64.0 kbps channels utilizing digital time division multiplexing.
- (4) High Capacity DS0 to Subrate⁽¹⁾
An arrangement that converts a 64.0 kbps channel to subspeeds of up to twenty 2.4 kbps, ten 4.8 kbps, or five 9.6 kbps channels using digital time division multiplexing.
- (5) DS0 to Subrate⁽¹⁾
An arrangement that converts a 64.0 kbps channel to subspeeds of up to twenty 2.4 kbps, ten 4.8 kbps, or five 9.6 kbps channels using digital time division multiplexing.

(1) Effective November 20, 2019, this Service will no longer be available for purchase by new or existing customers, and service agreements may no longer be renewed. In addition, requests to move, add or change existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable monthly extension rates until the service is discontinued. AT&T currently plans to discontinue this Service on or after June 30, 2024.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.1 Service Provisioning (Cont'd)

7.1.1 Types of Service Configurations

(D) WATS Access Line⁽¹⁾ Service

WATS Access Line Service connects a customer designated premises with the WATS serving office and is provided solely in conjunction with Switched Access Service, FGA, FGB, FGD, BSA-A, BSA-B and BSA-D, as set forth in Section 6 of Southwestern Bell Telephone Company, LLC's Tariff F.C.C. No. 1.

(E) Service to Service Through Connect Arrangement

The Service to Service Through Connect Arrangement rate element provides for an interconnection of like services in a Telephone Company Hub or serving wire center.

7.1.2 Types of Channels

For the purpose of ordering, there are multiple categories (channel types) of Special Access Service. These are as follows:

- Metallic⁽¹⁾
- Telegraph Grade⁽¹⁾
- Voice Grade⁽¹⁾

- Video⁽²⁾
- MegaLink Data⁽¹⁾
- High Capacity

Detailed descriptions of each of the channel types are provided in Section 7.3.

- (1) Effective November 20, 2019, this Service will no longer be available for purchase by new or existing customers, and service agreements may no longer be renewed. In addition, requests to move, add, or change existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable monthly extension rates until the service is discontinued. AT&T currently plans to discontinue this Service on or after June 30, 2024.
- (2) Effective December 31, 2020, Broadcast Video (TV1) service will no longer be available for purchase by new or existing customers, and service agreements may no longer be renewed. In addition, requests to move, add, or change existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable Monthly rate until the service is discontinued. AT&T currently plans to discontinue this Service on or after December 31, 2021.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.1 Service Provisioning (Cont'd)

7.1.3 Hubs

(A) General

A hub is a Telephone Company designated serving wire center at which bridging, multiplexing or Network Reconfiguration Service functions are performed.

- The bridging functions (1) connect three or more customer designate premises in a multipoint arrangement, (2) connect full-time and/or part-time video services as set forth in 7.3.6, or (3) reterminate Network Reconfiguration Service or Transport Resource Management Service, as set forth in Section 18 (Network Management Services).
- The multiplexing functions channelize analog or digital facilities to individual services requiring a lower capacity or bandwidth.

Some of the types of multiplexing available include the following:

- from higher to lower bit rate
- from higher to lower bandwidth
- from digital to voice frequency channels.

End to end services may be provided on channels of these facilities to a hub. The transmission performance for the end to end service provided between customer designated premises will be that of the lower capacity or bit rate. For example, when a 1.544 Mbps facility is multiplexed to voice frequency channels, the transmission performance of the channelized services will be Voice Grade, not High Capacity.

Cascading multiplexing occurs when a High Capacity digital channel is de-multiplexed to provide channels with a lesser capacity and one of the lesser capacity channels is further de-multiplexed. For example, a Supergroup facility is de-multiplexed to five Group facilities and then one of the Group facilities is further de-multiplexed to individual Voice Grade channels.

- The Network Reconfiguration Service and Transport Resource Management Service offerings allow the customer to reconfigure their Special Access Services.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.1 Service Provisioning (Cont'd)

7.1.3 Hubs (Cont'd)

(B) Types of Hubs

There are two types of bridging hubs and three types of multiplexing hubs. Bridging hubs are either intermediate or terminus. Multiplexing hubs are intermediate, super intermediate or terminus. The definitions for these hubs are as follows:

(1) Intermediate Bridging Hub

An intermediate bridging hub provides for the connection of three or more customer designated premises to form a Special Access multipoint service serving itself and a specified number of subtending wire centers.

Single office(s), subtending from different intermediate bridging hubs, that are to be bridged with multiple offices subtending from a common intermediate bridge will be bridged with the multiple offices at the common bridging hub.

(2) Terminus Bridging Hub

A terminus bridging hub provides for the connection of three or more customer designated premises to form a Special Access multipoint service within that bridging hub. For the purpose of multipoint service, the only instance when a terminus bridging hub may be connected to another office will be to interconnect to another bridging office when a bridging function is being performed.

(3) Intermediate Multiplexing Hub

An intermediate multiplexing hub converts from higher to lower bit rate, or bandwidth, or from digital to voice grade channels, serving itself and a specified number of subtending wire centers.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.1 Service Provisioning (Cont'd)

7.1.4 Ordering Options and Provisions

Each channel type is identified as a type of Special Access Service. However, such identification is not intended to limit a customer's use of the channel nor to imply that the channel is limited to a particular use. For example, if a customer's equipment is capable of transmitting voice over a channel that is identified as a Metallic Service in this guidebook, there is no restriction against doing so.

Customers can order a basic channel and select from a list of available transmission parameters and channel interfaces to meet specific communications requirements.

Additionally, the customer may specify optional features and BSEs for the individual channels derived from the facility to further tailor the channels to meet specific communications requirements. Descriptions of the optional features, BSEs and functions available are set forth in 7.3 (Service Descriptions, Rates and Charges).

The customer has the option of ordering Voice Grade and High Capacity (analog or digital) facilities (i.e., Group, Supergroup, Mastergroup, DS1 and DS3) to a Telephone Company Facility Hub for multiplexing to individual channels of lower capacity or bandwidth (i.e., Telegraph, Voice, etc.). Descriptions of the types of multiplexing available at the hubs, as well as the number of individual channels which may be derived from each type of facility are set forth in 7.3 (Service Descriptions, Rates and Charges).

For example, a customer may order a 1.544 Mbps facility from a customer designated premises to a Telephone Company Hub for multiplexing to Voice Grade (i.e., Group level) channels, which may be extended to other customer designated premises. Optional features and BSEs may be added to either the 1.544 Mbps or the Voice Grade channels.

When ordering multipoint service, bridging or multiplexing, the customer will select the designated bridging hub(s) for his serving wire center from NATIONAL EXCHANGE CARRIER ASSOCIATION TARIFF F.C.C. NO. 4 and will select the appropriate subtending wire centers from the Subtending Wire Center Section of the NECA Tariff. Different locations may be designated as hubs for different facility capacities, e.g., multiplexing from digital to digital may occur at one location, while multiplexing from digital to analog may occur at a different location.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.1 Service Provisioning (Cont'd)

7.1.4 Ordering Options and Provisions (Cont'd)

Special Access Service is ordered under the Access Order provisions set forth in Part 2, Section 5. Also included in that section are other charges which may be associated with ordering Special Access Service (e.g., Service Date Change Charges, Cancellation Charges, etc.). Ordering provisions as set forth in Part 2, Section 2, paragraph 2.6 will apply when more than one Exchange Telephone Company is involved.

7.1.5 Alternate Use

Alternate Use occurs when a service is arranged by the Telephone Company so that the customer can select different types of transmission at different times. A customer may use a service in any privately beneficial manner. However, where technical or engineering changes are required to effectuate an alternate use, the Telephone Company will make such special arrangements available on an individual case basis.

7.1.6 Diversity

A customer may request that the facilities used to provide 1.544 High Capacity (DS1) Special Access Service be specially routed. The regulations, rates and charges for Diversity are set forth in Section 27 of Southwestern Bell Telephone Company, LLC's Tariff F.C.C. Tariff No. 1.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.1 Service Provisioning (Cont'd)

7.1.7 Acceptance Testing

Testing and test results, are available at the customer's request as follows:

- (A) At no additional charge, the Telephone Company will cooperatively test the following parameters at the time of installation:
- (1) For Voice Grade⁽¹⁾ analog services (including WATS Access Lines⁽¹⁾, acceptance test will include tests for loss, 3-tone slope, DC continuity, operational signaling, C-notched noise and C-message noise when these parameters are applicable and specified in the order for service. Additionally, for Voice Grade⁽¹⁾ services, a balance test will be made if the customer has ordered the Improved Return Loss or Improved Equal Level Echo Path Loss optional features.
 - (2) For other analog services (i.e., Metallic⁽¹⁾, Telegraph⁽¹⁾, and Video⁽²⁾) acceptance tests will include tests for the parameters applicable to the service as specified by the customer in the order for service.
 - (3) For digital services, acceptance tests will include tests applicable to the service as specified in the appropriate Technical References for MegaLink Data⁽¹⁾ and High Capacity services.

- (1) Effective November 20, 2019, this Service will no longer be available for purchase by new or existing customers, and service agreements may no longer be renewed. In addition, requests to move, add, or change existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable monthly extension rates until the service is discontinued. AT&T currently plans to discontinue this Service on or after June 30, 2024.
- (2) Effective December 31, 2020, Broadcast Video (TV1) service will no longer be available for purchase by new or existing customers, and service agreements may no longer be renewed. In addition, requests to move, add, or change existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable Monthly rate until the service is discontinued. AT&T currently plans to discontinue this Service on or after December 31, 2021.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.1 Service Provisioning (Cont'd)

7.1.7 Acceptance Testing (Cont'd)

Testing and test results, are available at the customer's request as follows: (Cont'd)

- (B) In addition to the above tests, Additional Cooperative Acceptance Testing for Voice Grade^{/1/} and Digital^{/1/} services to test other parameters, as described in Part 4, Section 13, paragraph 13.3 and Section 13.3.7(A) (Additional Cooperative Acceptance Testing) of Southwestern Bell Telephone Company, LLC's Tariff F.C.C. Tariff No. 1, is available.

7.1.8 Design Layout Report

At the request of the customer, the Telephone Company will provide the make-up of the facilities and services provided under this guidebook as Special Access Service to aid the customer in designing its overall service. This information will be provided in the form of a Design Layout Report. The Design Layout Report will be provided to the customer at no charge, and will be reissued or updated whenever the facilities are materially changed.

/1/ Effective November 20, 2019, this Service will no longer be available for purchase by new or existing customers, and service agreements may no longer be renewed. In addition, requests to move, add, or change existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable monthly extension rates until the service is discontinued. AT&T currently plans to discontinue this Service on or after June 30, 2024.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations

This section contains the specific regulations governing the rates and charges that are applicable to Special Access Service.

Rates and charges for Special Access Service are set forth in Section 7.3 following, with the exception of the services provided by the Telephone Company in the Metropolitan Statistical Areas (MSAs) in which the Telephone Company has received Phase II pricing flexibility pursuant to Subpart H of Part 69 of the Commission's Rules. The rates and charges for the Special Access Services in the MSAs that have received Phase II pricing flexibility are set forth in Section 39.

Jurisdictional proration of rates and charges is set forth in Part 2, Section 2, paragraph 2.4 (Jurisdictional Reports). Where Access Services are jointly-provided, additional regulations are set forth in Part 2, Section 2, paragraph 2.6 (Jointly Provided Access Services).

Effective November 1, 2017, Competitive Counties and Non-Competitive Counties have been established and are defined in Part 2, Section 2, paragraph 2.12 and the wire centers within such counties are listed at the front of this Section.

For all rate elements other than End User channel terminations and their optional features, price flex rates and charges, as provided in Section 39.5.2 apply, regardless of whether the county is Competitive or Non-Competitive.

For End User channel terminations and their optional features, the application of "price cap" or "price flex" is dependent upon whether or not the serving wire center is located in a Competitive County. If the End User channel termination is in a Competitive County, price flex rates and charges apply, as provided in Section 39.5.2. If the End User channel termination is in a Non-Competitive County, price cap rates and charges apply, as provided in Section 7 of Southwestern Bell Telephone Company, LLC's Tariff F.C.C. No. 1.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.1 Rate Elements

There are four basic rate elements which apply to Special Access Service.

Rates and charges (both monthly and nonrecurring) for Arkansas, Kansas, Missouri, Oklahoma and Texas will be applied based on Pricing Zones as contained in Section 7.3.10 (High Capacity Service). The Pricing Zone for each serving wire center is as specified in NATIONAL EXCHANGE CARRIER ASSOCIATION, INC. TARIFF F.C.C. NO. 4. Additionally, if the Channel Mileage crosses Pricing Zones (e.g., serving wire center 1 is in Pricing Zone 1 and serving wire center 2 is in Pricing Zone 2), the higher priced mileage rate will be applied to the entire channel mileage.

(A) Channel Termination

The Channel Termination rate element provides for the communications path between a customer designated premises and the serving wire center of that premises, or for the communications path within a building which connects a customer's facilities with a customer designated premises without routing through the serving wire center.

Included as part of the Channel Termination is a standard channel interface arrangement which defines the technical characteristics associated with the type of facilities to which the access service is to be connected at the Point of Termination (POT) and the type of signaling capability, if any. The signaling capability itself is provided as an optional feature as set forth in (C) following.

One Channel Termination charge applies per customer designated premises at which the channel is terminated. This charge will apply even if the customer designated premises and the serving wire center are both located in the same Telephone Company building.

(B) Channel Mileage

The Channel Mileage rate element provides for the transmission facilities between the serving wire centers associated with two customer designated premises, between a serving wire center associated with a customer designated premises and a Telephone Company Hub, between two Telephone Company Hubs, or between a serving wire center associated with a customer designated premises and a WATS serving office.

A flat rate and a rate per mile applies to Channel Mileage.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.1 Rate Elements (Cont'd)

(C) Optional Features, BSEs and Functions

The various Optional Features and Functions rate elements provide for optional features, BSEs and functions which may be added to a Special Access Service to improve its quality or utility to meet specific communications requirements. These are not necessarily identifiable with specific equipment, but rather represent the end result in terms of performance characteristics. Although the equipment necessary to perform a specified function may be installed at various locations along the path of service, it will be charged for as a single rate element.

Examples of Optional Features, BSEs and Functions that are available include, but are not limited to, the following:

- Signaling Capability
- Hubbing Functions
- Conditioning
- Transfer Arrangements

(D) Service to Service Through Connect Arrangement

The Service to Service Through Connect Arrangement rate element provides for an interconnection of like services in a Telephone Company Hub or serving wire center. The through connection is provided in conjunction with Voice Grade⁽¹⁾ Analog, MegaLink Data⁽¹⁾ and High Capacity services. The customer billed for the through connect arrangement will be responsible for all billing associated with the interconnection.

(1) Effective November 20, 2019, this Service will no longer be available for purchase by new or existing customers, and service agreements may no longer be renewed. In addition, requests to move, add or change existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable monthly extension rates until the service is discontinued. AT&T currently plans to discontinue this Service on or after June 30, 2024.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.1 Rate Elements (Cont'd)

(E) Collocation Transport

Collocation Transport provides for the transmission facilities between collocation arrangements located in Telephone Company Central Offices.

There are two components of Collocation Transport.

(1) Inter/Intra Office Fixed

Inter/Intra office fixed rate element provides for the electronic equipment required to terminate a channel between two collocation arrangements located either in the same central office (intra) or in two separate central offices (inter).

When the Intra Office Fixed channel is ordered between two collocation arrangements that are for the same collocater, it will be provisioned as a temporary arrangement and will be in service until the collocater's own facilities are installed. There is no additional charge to disconnect these temporary facilities.

(2) Inter Office Per Mile

The Per Mile charge provides for the electronic equipment and facilities necessary to provide the interoffice transport between two collocation arrangements.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.2 Monthly Rates

Monthly rates are flat recurring rates that apply each month or fraction thereof that a Special Access Service is provided. For billing purposes, each month is considered to have 30 days.

7.2.3 Daily Rates

Daily rates are flat recurring rates that apply to each 24-hour period or fraction thereof that a Video⁽¹⁾ Special Access Service is provided for part-time or occasional use. For purposes of applying daily rates, the 24-hour period is not limited to a calendar day.

Part-time or occasional Video⁽¹⁾ Service provided within a consecutive 30-day period will be charged the daily rate, not to exceed an amount equal to the monthly rate. For each subsequent day or part day, a charge equal to 1/30th of the monthly rate shall apply.

(1) Effective December 31, 2020, Broadcast Video (TV1) service will no longer be available for purchase by new or existing customers, and service agreements may no longer be renewed. In addition, requests to move, add, or change existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable Monthly rate until the service is discontinued. AT&T currently plans to discontinue this Service on or after December 31, 2021.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.4 Nonrecurring Charges

Nonrecurring charges are one-time charges that apply for specific work activity (i.e., installation or change to an existing service). The types of nonrecurring charges that apply for Special Access Service are:

- Installation of Service
- Installation of Optional Features, BSEs and Functions
- Installation of Service to Service Through Connect Arrangements
- Service Rearrangements

(A) Installation of Service

Nonrecurring charges apply to each service installed. These charges are set forth in Section 7.3 as a nonrecurring charge for the Channel Termination rate element and are applied per circuit on a first and additional basis for each service ordered. The initial circuit incurs the first nonrecurring charge for each Channel Termination associated with that circuit. Each subsequent circuit incurs the additional nonrecurring charge for each Channel Termination associated with that additional circuit.

In order to receive the benefit associated with ordering multiple circuits, the following criteria must be met:

- Same Access Service Order
- Same Application for Service Date
- Same Due Date
- Identical Services
- Same Billing Account Number (BAN)
- Same Originating and Terminating Customer Designated Premises

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.4 Nonrecurring Charges (Cont'd)

(B) Installation of Optional Features, BSEs and Functions

Nonrecurring charges apply for the installation of some of the optional features, BSEs and functions available with Special Access Service. The charge applies whether the feature, BSE or function is installed coincident with the initial installation of service or at any time subsequent to the installation of the service.

The optional features for which nonrecurring charges apply are:

- Voice Grade Data⁽¹⁾ Capability

- MegaLink Data⁽¹⁾ Loop Transfer Arrangement
- MegaLink Data⁽¹⁾ Secondary Channel
- High Capacity Transfer Arrangement
- High Capacity Clear Channel Capability
- High Capacity SecureNet Hub Redundancy
- High Capacity SecureNet Serving Wire Center and Facility Redundancy

(C) Installation of Service to Service Through Connect Arrangements

Nonrecurring charges apply for the work activity necessary to provide the intraoffice connection between dedicated, like services. The through connection is provided in conjunction with Voice Grade Analog, MegaLink Data and High Capacity two-point services.

(1) Effective November 20, 2019, this Service will no longer be available for purchase by new or existing customers, and service agreements may no longer be renewed. In addition, requests to move, add or change existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable monthly extension rates until the service is discontinued. AT&T currently plans to discontinue this Service on or after June 30, 2024.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.4 Nonrecurring Charges (Cont'd)

(D) Service Rearrangements

Service Rearrangements are changes to existing (installed) services which **do not** result in either (1) a change in the minimum period requirements as set forth in Part 2, Section 5, paragraph 5.3.5 (Minimum Period Requirements) or (2) a change in the physical location of the point of termination at a customer designated premises.

The charge to the customer for the service rearrangement is dependent on whether the change is administrative only in nature or involves actual physical change to the service.

- (1) Certain administrative changes will be made without charge to the customer. These administrative changes are as follows:
- Change of customer name, (i.e., the customer of record does not change but rather the customer of record changes its name, e.g., ABC Communications to All Business Concepts Communications)
 - Change of customer's or customer's end user premises address when the change of address does not involve a physical relocation of the service
 - Change in billing data (name, address, contact name, or telephone number)
 - Change of agency authorization
 - Change of customer test line number
 - Change of customer's or customer's end user contact name or contact telephone number
 - Change of jurisdiction

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.4 Nonrecurring Charges (Cont'd)

(D) Service Rearrangements (Cont'd)

- (2) When a customer requests a change in the customer of record (i.e., existing access service is provided and billed to a different entity), a nonrecurring charge will apply. This change is considered an administrative service rearrangement when the new customer assumes liability for all current and prior charges for the service(s) and has complied with the regulations and conditions as set forth in Part 2, Section 2, paragraph 2.2.1 (Assignment and Transfer of Facilities) for the Assignment and Transfer of Facilities, and no physical relocation or rearrangement of the service is required.
- (3) When a customer requests the following administrative changes, a nonrecurring charge will apply as set forth in Southwestern Bell Telephone Company, LLC's Tariff F.C.C. No. 1, Section 7.4(E) (Service Rearrangement Charge) per circuit on a first and additional basis for the following change or combination of changes requested on the same Access Order. Each leg of a multipoint service will be treated as a separate circuit and nonrecurring charges will apply per leg on a first and additional basis. If a change(s) for more than one multipoint service is requested on the same Access Order, one First nonrecurring charge will apply to a leg of the first multipoint service. One Additional nonrecurring charge will apply to each of the remaining legs of all multipoint services on the same Access Order. The customer requesting administrative service rearrangements will be responsible for all billing associated with the changes requested.
 - Change of Access Carrier Name Abbreviation (ACNA)
 - Change of Billing Account Number (BAN) (e.g., a customer requests to aggregate all voice grade circuits on one BAN)
 - Change of customer Circuit Identification (CKR)

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.4 Nonrecurring Charges (Cont'd)

(D) Service Rearrangements (Cont'd)

- (4) When a change of customer name and change in billing data (name, address, contact name, or telephone number) are requested in association with a change in the customer of record, the Access Order Charge will apply as set forth in Part 2, Section 5, paragraph 5.3.1 (Access Order Charges).
- (5) If the change involves the addition of other customer designated premises to an existing multipoint service, the nonrecurring charge for the Channel Termination rate element will apply. The charge(s) will apply only for the location(s) that is being added.
- (6) If the change involves the addition of an optional feature, BSE or function which has a separate nonrecurring charge, that nonrecurring charge will apply.
- (7) If the change involves changing the type of signaling on a Voice Grade service, a charge equal to the Voice Grade channel termination rate element nonrecurring charge will apply. The charge will apply per service termination affected.
- (8) For all other changes, including the addition of an optional feature, BSE or function without a separate nonrecurring charge, and the retermination of circuits in a Network Reconfiguration Service Hub or Transport Resource Management Service Hub, a charge equal to a channel termination rate element nonrecurring charge will apply. Only one such charge will apply per service, per change.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.5 Surcharge for Special Access Service

(A) General Description

The Special Access Surcharge, with the exception of part-time or occasional Video⁽¹⁾ applies to all jurisdictionally interstate special access facilities ordered from the Special Access, MegaLink Custom Services, Self-healing Transport Network and Synchronous Broadband Network Services (SBNS) sections of this Guidebook unless exempted as specified in (B) following.

All such facilities terminated at an end user's PBX or other device that connect the special access facility with local exchange lines or trunks, irrespective of whether the interconnection capability exists in the customer's premises equipment or in a Centrex CO type switch are subject to the surcharge.

(B) Exemption Certification

(1) The special access facility will be exempted from the monthly surcharge if the customer provides the Telephone Company written certification or an Access Service Request (ASR) indicating that the interstate special access facility termination is one of the following:

- (a) An open-end termination in a Telephone Company switch of an FX line, including CCSA and CCSA-equivalent ONALs; or
- (b) An analog channel termination that is used for full-time radio or television program transmission; or
- (c) A termination used for TELEX service; or
- (d) A termination that by the nature of its operating characteristics could not make use of Telephone Company common lines; or

(1) Effective December 31, 2020, this Service will no longer be available for purchase by new or existing customers, and service agreements may no longer be renewed. In addition, requests to move, add, or change existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable Monthly rate until the service is discontinued. AT&T currently plans to discontinue this Service on or after December 31, 2021.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.5 Surcharge for Special Access Service (Cont'd)

(B) Exemption Certification (Cont'd)

(1) (Cont'd)

- (e) A termination that interconnects either directly or indirectly to the local exchange network where the usage is subject to Carrier Common Line charges such as, where the special access facility accesses only
- FGA and no local exchange lines, or
 - special access facility between customer points of termination, or
 - special access facility connecting CCSA or CCSA-type equipment (inter-machine trunks); or

- (f) A termination that the customer certifies to the Telephone Company is not connected to a PBX or other device capable of interconnecting the special access facility to a local exchange subscriber line, or the PBX or other device has been rendered incapable of interconnection by software or hardware changes.

- (2) Exemption certification shall be in the form of an ASR or written notification to the Telephone Company. Such notification shall be provided by the customer (1) when ordered or installed or (2) at such time as the facility is reterminated to a device not capable of interconnecting to the local exchange network, or (3) at such time as the special access facility becomes associated with a Switched Access Service that is subject to Carrier Common Line charges.

If certification is not received at the time the special access facility is obtained, the surcharge will be applied. Exempt status will become effective on the certification date indicated by the customer, subject to the regulations following.

The exemption certification is to be provided by the customer ordering the service. If written, the certification must be signed by the customer or authorized representative. The ASR or written certification must include the category of exemption, as set forth in (B) preceding, for each termination, and the date which the exemption is effective.

The customer shall also notify the Telephone Company when an exempted Special Access Service is changed or reterminated such that the exemption is no longer applicable.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.5 Surcharge for Special Access Service (Cont'd)

(C) Surcharge Credits

The Telephone Company will cease billing the Special Access Surcharge when certification that the special access facility has become exempt from the surcharge, as set forth in (B) preceding, is received. If the status of the special access facility was changed prior to receipt of the exemption certification, the Telephone Company will credit the customer's account, not to exceed ninety (90) days, based on the effective date of the change specified by the customer in the letter of certification.

(D) Surcharge Billing

The monthly Special Access Surcharge applies to special access facilities arranged, as set forth in (A) preceding, on a per voice grade channel equivalent basis as shown in the following example.

<u>Private Line Facility</u>	<u>Voice Grade Equivalent</u>		<u>Surcharge</u>		<u>Monthly Charge</u>
Group	12	x	\$25	=	\$300.00
DS1	24	x	\$25	=	\$600.00

In the case of multipoint special access facilities, one Special Access Surcharge will apply for each termination of a special access channel at an end user's premises.

The Telephone Company will bill the surcharge to the customer who orders the special access facility unless the facility is exempt as set forth in (B) preceding.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.6 Mileage Measurement

The mileage to be used to determine the monthly rate for the Channel Mileage is calculated on the airline distance between the locations involved, i.e., the serving wire centers associated with two customer designated premises, a serving wire center associated with a customer designated premises and a Telephone Company Hub, two Telephone Company Hubs or a serving wire center associated with a customer designated premises and the WATS serving office. The serving wire center associated with a customer designated premises is the serving wire center from which the customer designated premises would normally obtain dial tone.

To determine the rate to be billed, first compute the mileage using the V&H coordinates method, as set forth in the NATIONAL EXCHANGE CARRIER ASSOCIATION, INC. TARIFF F.C.C. NO. 4, then find the band into which the computed mileage falls and apply the rate shown in 7.3 (Service Descriptions, Rates and Charges) for that band. When the calculation results in a fraction of a mile, always round up to the next whole mile before determining the mileage and applying the rates.

When hubs are involved, mileage is computed and rates applied separately for each section of the Channel Mileage, i.e., customer designated premises serving wire center to hub, hub to hub and/or hub to customer designated premises serving wire center. However, when any service is routed through a hub for purposes other than customer specified bridging, multiplexing, Network Reconfiguration Service, or Transport Resource Management Service (e.g., the Telephone Company chooses to so route for test access purposes), rates will be applied only to the distance calculated between the serving wire centers associated with the customer designated premises.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.7 Moves

A move involves a change in the physical location of one of the following:

- The service facility
- The Point of Termination at the customer's premises
- The customer's premises

The charges are dependent on the type of move requested by the customer.

(A) Service Facility Move (SFM)

An SFM is a customer-initiated move of one end of a Telephone Company central office distribution link (e.g., jumper cable, DSX patch cable, etc.) from one facility to another existing facility (of the same or higher transmission speed). All activity associated with the SFM must occur within a single Telephone Company location (central office).

In order to be considered an SFM, all associated order activity (disconnects and new connects) must occur simultaneously and the facility to which service is being moved must be existing and have sufficient capacity to accept the moved service.

An SFM may result in the change of one end point (i.e., customer premises location) of the circuit involved provided the following conditions are met:

- (1) The change of customer premises can only occur on the end of the circuit which has the CFA.
- (2) The customer premises locations involved in the change belongs to the same customer.

- or -

The customer premises locations involved in the change belongs to two different customers but the customer requesting the SFM has previously coordinated the activity such that all activity (disconnects and new connects) will occur simultaneously. If this coordination has not been accomplished beforehand, then the Telephone Company will proceed with the disconnect/new connect orders as non-related and new installation charges will apply for services being relocated.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.7 Moves (Cont'd)

(A) Service Facility Move (SFM) (Cont'd)

On facility moves involving multiplexed (subtending) channels, SFMs shall be charged only for the higher level facility provided the entire facility (the full complement of subtending channels) is being moved concurrent to that particular SFM request. If the subtending channels are requested to be moved one at a time, the SFM will be charged on a per each channel moved basis.

Example 1

An SFM is requested to move 20 DS1s, with subtending VG channels, to a DS3 facility (where the DS3 end of the channel is moving to a new customer premises location). The resulting SFM charge will be 20 DS1 to DS3 SFM charges with no SFM charges for the subtending VG channels.

Example 2

An SFM is requested to move a DS3, with subtending DS1 channels, to another DS3 facility (where there is no change in the customer premises location on the DS3 facility end of the circuit). The resulting SFM charge will be a DS3 to DS3 SFM with no SFM charges for the subtending DS1 channels.

Example 3

An SFM is requested to move 6 DS1s, with subtending VG channels, previously riding one DS3 facility to another DS3 facility. The resulting SFM charge would be (6) DS1 to DS3 SFMs with no SFM charges for the subtending VG channels.

SFMs may be performed at the following service levels:

- Analog⁽¹⁾/MegaLink Data to 1.544 Mbps High Capacity (DS1)
- 1.544 Mbps High Capacity (DS1) to 1.544 Mbps High Capacity (DS1)/ReliaNet (DS1)
- 1.544 Mbps High Capacity (DS1) to MegaLink Custom (DS3)/ReliaNet (EC-1/DS3)

The charges for an SFM for the services shown above are detailed in Southwestern Bell Telephone Company, LLC's Tariff F.C.C. No. 1, Section 7.4(A) (SFMs) following. There will be no change in minimum period requirements.

The diagrams following illustrate typical service arrangements before and after an SFM has occurred.

(1) Analog services include: Metallic Service, Telegraph Grade Service or Voice Grade Service.

7.2.7 Moves (Cont'd)

(B) Moves of the Point of Termination Within the Same Customer Premises

When the move of the Point of Termination is to a new location within the same customer premises, the move will be treated as an extension of access service facilities. Extension of access service facilities will be provided, at the customer's request, on a time sensitive charge basis. The labor rates which apply are as set forth in Part 4, Section 13 (Rates and Charges). There will be no change in minimum period requirements.

(C) Moves of a Customer Premises

Moves to a different customer premises will be treated as a discontinuance and start of service, with exception as stated below, and all associated nonrecurring charges will apply. New minimum period requirements will be established for the new services except for Business Video Service. The customer will also remain responsible for satisfying all outstanding minimum period charges for the discontinued service.

If the move of the customer's premises is as a result of an SFM (Service Facility Move) according to Section 7.2.7(A), and the facility to the new premises is existing, then no additional nonrecurring charges will apply for that end of the channel or circuit. Only the SFM charge will be applicable for such moves.

7.2.8 Minimum Periods

The minimum service period for all services, except part-time and occasional Broadcast Video⁽²⁾ service and 128, 256 and 384 kbps MegaLink Data⁽¹⁾ Service, is one month. The minimum service period for part-time and occasional Broadcast and Video⁽²⁾ services is one day (i.e., a continuous 24-hour period, not limited to a calendar day). The minimum service period for 128, 256 and 384 kbps MegaLink Data⁽¹⁾ Service is 6 months.

- (1) Effective November 20, 2019, this Service will no longer be available for purchase by new or existing customers, and service agreements may no longer be renewed. In addition, requests to move, add, or change existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable monthly extension rates until the service is discontinued. AT&T currently plans to discontinue this Service on or after June 30, 2024.
- (2) Effective December 31, 2020, this Service will no longer be available for purchase by new or existing customers, and service agreements may no longer be renewed. In addition, requests to move, add, or change existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable Monthly rate until the service is discontinued. AT&T currently plans to discontinue this Service on or after December 31, 2021.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.9 Facility Hubs

The Telephone Company will commence billing the monthly rate for the facility to the hub on the date specified by the customer on the Access Order. Individual services utilizing these facilities may be installed coincident with the installation of the facility to the hub or may be ordered and/or installed at a later date, at the option of the customer. The customer will be billed for a Voice Grade or High Capacity Digital Channel Termination, Channel Mileage (when applicable) and the Multiplexer at the time the facility is installed. Individual service rates (by service type) will apply for a Channel Termination and additional Channel Mileage (as required) for each channelized service.

When cascading multiplexing is performed, whether in the same or a different hub, a charge for the additional multiplexing unit also applies. When cascading multiplexing is performed at different hubbing locations, Channel Mileage charges also apply between the hubs.

The Telephone Company will designate certain hubs for multipoint configurations and cross-connection of full-time and/or part-time Video Services. A customer can order full-time and/or part-time service(s) between customer designated premises and a hub and will be billed accordingly at the rates set forth in 7.3 (Service Descriptions, Rates and Charges) for the full-time or part-time service, as appropriate. At the request of a customer, the full-time and/or part-time services provided to the hub may be connected together in the following configurations: full-time to full-time, full-time to part-time or part-time to part-time. The customer will be charged for each such connection made at the rates for Other Labor as set forth in Part 4, Section 13 (Rates and Charges). The rates that apply for the service between each customer designated premises and the hub are a Channel Termination and Channel Mileage, if applicable.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.10 Shared Use

Shared use occurs when Special Access Service and Switched Access Service are provided over the same Special Access facility through a common interface. The Special Access monthly rate for the Channel Termination, Channel Mileage, if applicable, and multiplexer will apply, regardless of whether any individual channels of the Shared Special Access facility are used for Special Access Service, Switched Access Service, or any other type of service. The practice known as "ratcheting" (to apply non-Special Access rates on a proportional basis) shall not apply in any circumstance.

7.2 Rate Regulations (Cont'd)

7.2.11 WATS Access Lines⁽²⁾

When WATS Access Lines (WAL) are provided, the rate elements which apply are:

- WAL Channel Termination (CT) between the customer designated premises and the serving wire center associated with that premises
- Channel Mileage (CM) between the serving wire center associated with a customer designated premises and the WATS serving office⁽¹⁾ (when the serving wire center is not a WATS serving office).

In addition, the Special Access Line Surcharge, as set forth in 7.2.5, and Message Station Equipment Recovery Charge, as set forth in 7.2.17, will apply.

When extensions (i.e., additional terminations of the service at a different premises in the same or a different LATA) are provided, they are rated in the following manner. Both interLATA and intraLATA extensions require an additional WAL Channel Termination and Channel Mileage (as needed). In addition, the Special Access Line Surcharge and Message Station Equipment Recovery Charge will apply.

The following diagram depicts a WATS Access Line Service connecting a customer designated premises to a WATS serving office. The customer's serving wire center and the WATS serving office are located 10 miles apart. The applicable rate elements are:

- Channel Termination (1 applicable)
- Channel Mileage

- (1) When the WAL is used in conjunction with unrestricted WATS Access Line Service and the WSO has inherent technical limitations requiring additional transport, the WATS Access Line Extender (WALE) rating will only be between the customer designated premises serving wire center and the WATS Serving Office normally used for provision of WATS and WATS type service.
- (2) Effective November 20, 2019, this Service will no longer be available for purchase by new or existing customers, and service agreements may no longer be renewed. In addition, requests to move, add or change existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable monthly extension rates until the service is discontinued. AT&T currently plans to discontinue this Service on or after June 30, 2024.

ACCESS SERVICE

7.2.13 Multipoint Service

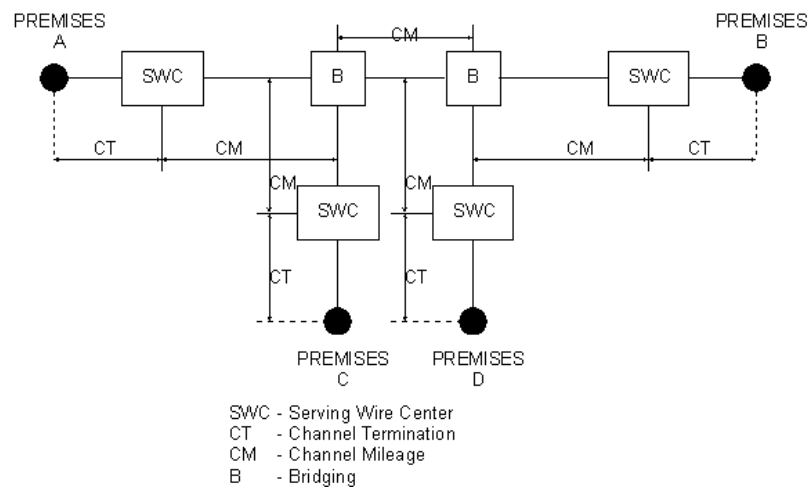

The rate elements applicable to multipoint service are as follows:

- Channel Terminations (one per customer designated premises)
- Channel Mileage (as applicable)
- Bridging
- Additional Optional Features, BSEs and Functions (when applicable)

In addition, the Special Access Surcharge, as set forth in 7.2.5, and a Message Station Equipment Recovery Charge, as set forth in 7.2.17, may be applicable.

(A) Following is an example of a multipoint service in which Voice Grade multipoint service connects four customer premises via two customer specified bridging hubs. The applicable rate elements are:

- Channel Termination (4 applicable)
- Channel Mileage (5 sections)
- Bridging BSE (6 applicable, i.e., one at each bridge port)

7.2.14 Multiplexed Service

The rate elements applicable to multiplexed service are as follows:

- Channel Terminations
- Channel Mileage
- Multiplexing BSE

In addition, the Special Access Surcharge, as set forth in 7.2.5, and a Message Station Equipment Recovery Charge, as set forth in 7.2.17, may be applicable.

Following is an example of multiplexing a 1.544 Mbps channel to 24 Voice Grade channels.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.15 Alternate Use

The arrangement required to transfer the service from one operation to the other (i.e., the transfer relay and control leads) will be rated and provided on an individual case basis. In addition, the customer will pay the stated guidebook rates for the Access Service rate elements for the service ordered (i.e., Channel Terminations, Channel Mileage and Optional Features, BSEs and Functions).

7.2.16 Customized Channels

When a customized channel is ordered, the customer will be notified whether Additional Engineering Charges apply. In such cases, the customer will be given an estimate of the hours to be billed before any further action is taken on the order.

7.2.17 Message Station Equipment Recovery Charge

The Message Station Equipment Recovery Charge is a charge to recover that portion of message station equipment that is assigned to Special Access Service.

This charge is assessed only to those customers to which the Special Access Surcharge applies. The rate for the Message Station Equipment Recovery is set forth in Southwestern Bell Telephone Company, LLC's Tariff F.C.C. No. 1, Section 7.4(C).

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.18 Service to Service Through Connect Arrangements

The Service to Service Through Connect Arrangement rate element provides for an interconnection of like services in a Telephone Company Hub or serving wire center. This arrangement is an intraoffice connection that is provisioned in lieu of a channel termination to a customer designated premises. The through connection is provided in conjunction with Voice Grade⁽²⁾ Analog, MegaLink Data⁽²⁾ and High Capacity services. Additional Channel Mileage would apply if the two like services are located in different hubs or serving wire centers. The customer billed for the through connect arrangement will be responsible for all billing associated with the interconnection.

The following diagram depicts a Service to Service Through Connect Arrangement in which Voice Grade⁽²⁾ Services, extended from DS1 multiplexed services, utilize a through connect arrangement in a Telephone Company Hub. Additional channel mileage was required to coterminate the services. The applicable rate elements are:

- 1.544 Mbps Channel Terminations (2 applicable)⁽¹⁾
- DS1 to Voice Multiplexers⁽²⁾ (2 applicable)⁽¹⁾
- Voice Grade⁽²⁾ Channel Mileage
- Multiplexer to Multiplexer Service to Service Through Connect Arrangement

CT - Channel Termination
 CM - Channel Mileage
 MUX - Multiplexer
 - Service to Service through Connect Arrangement

(1) Service already established.

(2) Effective November 20, 2019, this Service will no longer be available for purchase by new or existing customers, and service agreements may no longer be renewed. In addition, requests to move, add or change existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable monthly extension rates until the service is discontinued. AT&T currently plans to discontinue this Service on or after June 30, 2024.

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.19 Optional Payment Plan

(A) General Description

Optional Payment Plan (OPP) provides the customer with rate stabilization and a discount of existing guidebook rates for three or five years commitments.

The customer agrees to a **State** or **Company** (i.e., within areas served by the Telephone Company) minimum monthly revenue commitment as set forth in 7.2.19(C). Decreases in OPP recurring monthly guidebook rates will be passed on to existing participants; however, the minimum monthly revenue commitment will not be reduced. Should the Telephone Company increase its OPP recurring monthly guidebook rates during the OPP commitment, the customer will continue to pay the customer established OPP rates.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.19 Optional Payment Plan (Cont'd)

(B) Services Available Under Optional Payment Plan

A customer may elect to participate in an OPP for the following services and rate elements as described in 7.3 (Service Descriptions, Rates and Charges):

- (1) Four-Wire Voice Grade Service⁽⁴⁾
 - Channel Termination
 - Channel Mileage (Fixed and Per Mile)
 - Optional Features, Basic Service Elements (BSEs) and Functions
- (2) MegaLink Data Service (All Speeds)⁽⁴⁾⁽⁶⁾
 - Channel Termination
 - Channel Mileage (Fixed and Per Mile)
 - Optional Features, BSEs and Functions
- (3) High Capacity Service (1.544 Mbps)⁽¹⁾⁽²⁾⁽³⁾⁽⁵⁾⁽⁶⁾
 - Channel Termination
 - Channel Mileage (Fixed and Per Mile)
 - Optional Features, BSEs and Functions

- (1) Effective May 17, 2003, High Capacity Service (1.544 Mbps) Optional Pricing Plan (OPP) service will no longer be available to new customers. There will be no change to existing customers.
- (2) At the expiration of the grandfathered DS1 High Capacity Service OPP term, the customer may choose a new DS1 Term Payment Plan with the prices in effect at that time. If the customer elects not to establish a new DS1 TPP, or does not renew the existing OPP as stipulated in 7.2.19(E), the service will be billed the guidebook month-to-month rates in effect at the time the grandfathered DS1 High Capacity Service OPP term expires.
- (3) Existing DS1 High Capacity Service OPP terms may be converted to a new DS1 Term Payment Plan. If the expiration date for the new DS1 Term Payment Plan is beyond the expiration of the original DS1 High Capacity Service OPP term, the remaining charges and any nonrecurring termination charges for the original DS1 High Capacity Service OPP term will not apply. Access Order charges associated with conversion to new DS1 TPPs will be waived. Refer to DS1 Term Payment Plan in section 7.2.22 following for all DS1 TPP terms and conditions.
- (4) Effective on September 13, 2017, Optional Payment Plans are no longer available for Four-Wire Voice Grade Service and MegaLink Data Service, including for any otherwise available renewals, extensions or conversions. Circuits already subject to a Four-Wire Voice Grade Service or MegaLink Data Service Optional Payment Plan, as of September 13, 2017, will continue to be provided under the then-current Optional Payment Plan term for the remainder of that term.
- (5) Effective November 1, 2022, DS1 Term Payment Plan 2- and 3-year and MegaLink Custom 3-year Payment Plans (collectively, Term Plan Services), are no longer available, including conversions. Existing Term Plan Services, as of November 1, 2022, will continue to be provided under the then-current terms, for the remainder of the applicable term.
- (6) Effective January 17, 2024, DS1 Term Payment Plan 1-year and MegaLink Custom 1-year Payment Plans (collectively, Term Plan Services) are no longer available, including conversions. Existing Term Plan Services on January 17, 2024, will continue to be provided for the remainder of the then-current terms.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.19 Optional Payment Plan (Cont'd)

(C) Terms and Conditions

(1) Minimum Monthly Revenue Commitment (MMRC)

The minimum monthly revenue commitment (MMRC) is established at a State or Company (i.e., within the areas served by the Telephone Company) level. The initial MMRC is determined by multiplying the quantity of services to be included in the OPP, as specified by the customer, at the OPP establish date by the current OPP rates.

$$\text{MMRC} = \text{NUMBER OF SERVICES} \times \text{RATES}$$

The customer has a grace period of six months following the establishment of an OPP. This grace period is provided in order to allow the customer adequate time to finalize the MMRC for the account.

Nonrecurring charges will not be included in the MMRC.

Special construction charges incurred for a service billed under an OPP will not be included in the MMRC.

(a) Exceeding the MMRC

The MMRC can be exceeded by 25 percent throughout the three year or five year OPP without penalty. The MMRC will be reconciled quarterly. If the excess is greater than 25 percent, the excess above 25 percent is billed a 5 percent adjustment factor. The customer can increase the MMRC, rather than pay the 5 percent adjustment factor.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.19 Optional Payment Plan (Cont'd)

(C) Terms and Conditions (Cont'd)

(1) Minimum Monthly Revenue Commitment (MMRC) (Cont'd)

(b) Increasing the MMRC

The customer has the option to increase the MMRC rather than pay the adjustment factor. If the increase is received within 30 days of the time the adjustment factor was billed, the adjustment factor will not apply. To initiate an increase in MMRC, the customer must provide the amount of the increase in writing with the understanding that this increased MMRC becomes the new MMRC.

The new MMRC equals the existing MMRC plus the increased service(s) multiplied by the customer-established rate(s).

NEW INCREASED MMRC = EXISTING MMRC + (INCREASED SERVICE(S) X CUSTOMER ESTABLISHED RATE(S))

An increase in the MMRC does not change any of the terms or conditions in effect.

(c) Decreasing the MMRC

The customer may elect to decrease the MMRC at any time during the life of the OPP. To initiate a decrease in the MMRC, the customer must provide the amount of the decrease in writing with the understanding that the decreased MMRC becomes the new MMRC.

The decreased MMRC will be calculated as follows:

NEW DECREASED MMRC = EXISTING MMRC - DECREASE IN MMRC

When the MMRC is decreased, the customer will be assessed the following termination charge:

TERMINATION CHARGE = TERMINATION % X DECREASE IN MMRC
X MONTHS REMAINING IN OPP

TERMINATION % = 50% FOR THREE YEAR OPP
= 40% FOR FIVE YEAR OPP

A decrease in the MMRC does not change any of the terms or conditions in effect.

7.2 Rate Regulations (Cont'd)

7.2.19 Optional Payment Plan (Cont'd)

(C) Terms and Conditions (Cont'd)

(2) Conversion to Other Telephone Company Services

A customer may convert to other Telephone Company services not covered by another term pricing plan(s) without incurring termination liabilities. The new service must represent equal to or greater than revenues remaining in the existing OPP service period being converted.

At the time of disconnect from the existing OPP service and the connect of the new service, if the total revenue for the new service (i.e., total monthly recurring charges for the minimum period for the new service) is less than the revenue that would have been collected under the existing OPP, a termination charge as set forth in 7.2.19(H) (3) will apply.

(D) OPP Renegotiation

- (1) The customer may terminate an existing OPP prior to the end of the three or five-year commitment and renegotiate a new OPP.
- (2) The renegotiated OPP may be a three or five-year commitment.
- (3) The renegotiated OPP will be based on the current rates.
- (4) The renegotiated OPP MMRC must reflect an increase from the previous OPP MMRC.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.19 Optional Payment Plan (Cont'd)

(E) OPP Renewal

- (1) Customers electing to renew an existing OPP must provide the Telephone Company, in writing, their intent to renew their OPP. Written notification must be provided 90 days prior to the expiration of the current OPP.
- (2) The customer must renew at the same commitment as the customer's existing OPP, i.e., three-year or five-year.
- (3) The customer will continue to be billed at the current OPP rates.
- (4) The customer is not required to increase the MMRC.
- (5) If the customer does not renew the OPP, the customer's service will be billed at the applicable guidebook monthly rates in effect at the time the OPP expires.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.19 Optional Payment Plan (Cont'd)

(F) OPP Extension

(1) Customers may extend an OPP by providing written notification to the Telephone Company 60 days prior to the expiration of the current OPP. An OPP may be extended one time only.

(2) The extension period for a three year or five-year OPP is 60 months.

(3) (a) Three Year OPP customers with the 60-month extension will be billed customer-established rates. The customer-established rates will be modified as follows:

THREE YEAR EXTENSION RATE = CUSTOMER-ESTABLISHED
OPP RATES X .95

(b) Five-year OPP customers with the 60-month extension will be billed customer-established rates. For existing customers with extensions prior to 3/31/00, the per mile rate elements will be modified as follows:

FIVE YEAR EXTENSION RATE = CUSTOMER-ESTABLISHED
OPP PER MILE RATE X MULTIPLIER

<u>Per Mile Rate Elements</u>	<u>Multiplier</u>
-------------------------------	-------------------

Voice Grade	.255
MegaLink Data 9.6 Kbps	.519
MegaLink Data 56 Kbps	.458
High Capacity 1.544	.950

Note: For new customers after 3/31/00, the Per Mile Rate Element Multiplier will not apply.

(c) Customers currently enrolled in the 24-month extension may remain with the customer-established 24-month extension; however, the rate modifications do not apply.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.19 Optional Payment Plan (Cont'd)

(F) OPP Extension (Cont'd)

- (4) The customer who elects a 60-month extension will have a one-time option to increase or decrease the MMRC based upon the preceding rate modifications. This MMRC adjustment must be provided to the Telephone Company within 90 days of the start of the 60-month extension. The access order charge will not be applied to the one-time MMRC adjustment.
- (5) A 60-month extension OPP customer may convert to other Telephone Company services not covered by another term pricing plan(s) without incurring termination liabilities. The new service must represent equal to or greater than revenues remaining in the existing OPP service period being converted.

At the time of disconnect from the existing OPP service and the connect of the new service, if the total revenue for the new service (i.e., total monthly recurring charges for the minimum period for the new service) is less than the revenue that would have been collected under the existing OPP, a termination charge as set forth in 7.2.19(H) (3) will apply.

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.19 Optional Payment Plan (Cont'd)

(G) Conversion to Other Telephone Company Term Pricing Plans

Conversion to other Telephone Company term pricing plan(s) will be allowed, without incurring termination charges, providing all of the following conditions are met:

- (1) a minimum period of 12 months has been completed under the existing OPP,
- (2) the due date of the new connect order must be the same as the due date of the disconnect order,
- (3) the OPP service being disconnected must convert service, on a circuit equivalent basis, to a new service with a term pricing plan period that is greater than the number of months remaining in the current OPP, and
- (4) the new service must be provided between the same customer locations and with the same customer of record as the disconnected service.
- (5) the monthly rates for the new service will be those in effect at the time the service is converted. Nonrecurring charges for the new service will apply.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.19 Optional Payment Plan (Cont'd)

(H) Rate Applications

(1) Billed Revenues

When the customer's actual billed revenues fall below the MMRC, the customer will be billed the MMRC.

(2) Nonrecurring Charges

The OPP nonrecurring charges, as shown in 7.3 (Service Descriptions, Rates and Charges) and the Access Order Charge as set forth in 5.2 (Access Order), will apply for those services ordered and installed under a new three-year or five-year OPP.

For existing five-year OPP customers who order and install new services:

- The OPP nonrecurring charge will be waived when the customer increases the MMRC by 50% of the monthly rate associated with the newly installed services.
- The OPP nonrecurring charges will apply if the customer does not increase the MMRC by 50% of the monthly rate associated with the newly installed services.

The Access Order Charge will apply to all orders for new service.

The OPP nonrecurring charges do not apply to existing services that are to be converted to an OPP; however, the Access Order Charge will apply.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.19 Optional Payment Plan (Cont'd)

(H) Rate Applications (Cont'd)

(3) Termination of Service

Customers requesting the termination of an OPP prior to the expiration date, excluding OPPs terminated as a result of a renegotiation, will be charged a percentage of the MMRC for the remainder of the term as indicated below.

TERMINATION % = 50% FOR A THREE YEAR OPP AND
40% FOR A FIVE YEAR OPP

The termination charge is calculated as follows:

TERMINATION CHARGE = MMRC X MONTHS REMAINING IN OPP X
TERMINATION PERCENTAGE

Customers who ordered OPP service prior to October 6, 1999 and request the termination of an OPP prior to the expiration date of an extension of service will be calculated as follows:

TERMINATION CHARGE = NUMBER OF MONTHS UTILIZED OF THE
EXTENSION X (CURRENT MONTHLY RATE - OPP MONTHLY RATE)

Customers who ordered OPP service on or after October 6, 1999 and request the termination of an OPP prior to the expiration date of an extension of service will be Calculated as follows:

Minimum Monthly Revenue Commitment	X	Months remaining in OPP extension	X	Termination percentage of 45%
= Termination Charge				

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.20 High Capacity Term Pricing Plan (HC-TPP) ⁽¹⁾ ⁽²⁾ ⁽³⁾

(A) General Description

High Capacity Term Pricing Plan (HC-TPP) provides the customer with rate stabilization and discounted guidebook rates. The customer agrees to a minimum monthly revenue commitment when establishing service under HC-TPP.

The minimum monthly revenue commitment is established on a per LATA, state or company level as described in 7.2.20(C)(1) (Minimum Monthly Revenue Commitment). When the minimum monthly revenue commitment is met at the LATA, state or company level, the customer has the ability to move an HC-TPP circuit within the level specified from one location to another location without incurring a Termination Charge.

Decreases in HC-TPP monthly recurring guidebook rates will be passed on to customers who participate in an HC-TPP. The customer's minimum monthly revenue commitment will be reduced accordingly. The Telephone Company will notify customers participating in HC-TPP when monthly rates are decreased.

Should the Telephone Company increase its rates during the HC-TPP period, the customer would continue to pay the rates in effect at the time the customer elected to establish service under HC-TPP. If the customer upgrades to MegaLink Custom, STN or ReliaNet Service, the minimum monthly revenue commitment will be decreased to reflect the decreased number of circuits.

- (1) Effective May 17, 2003, High Capacity Service (1.544 Mbps) Term Pricing Plan (HC-TPP) service will no longer be available to new customers. There will be no change to existing customers.
- (2) At the expiration of the grandfathered DS1 High HC-TPP, the customer may choose a new DS1 Term Payment Plan with the prices in effect at that time. If the customer elects not to establish a new DS1 TPP, or does not renew the existing HC-TPP as stipulated in 7.2.20(C)(4), the service will be billed the guidebook month-to-month rates in effect at the time the grandfathered HC-TPP term expires.
- (3) Existing HC-TPPs may be converted to a new DS1 Term Payment Plan (TPP) term. If the expiration date for the new DS1 TPP term is beyond the expiration of the original HC-TPP, no other charges from the original plan will apply. Access Order charges associated with conversion to new DS1 TPPs will be waived. Refer to DS1 Term Payment Plan in Section 7.2.22 following for all DS1 TPP terms and conditions.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.20 High Capacity Term Pricing Plan (HC-TPP) (Cont'd)

(B) Services Available Under HC-TPP

A customer may elect to participate in HC-TPP for the following rate elements as described in 7.3 (Service Descriptions, Rates and Charges):

High Capacity Channel Termination

- High Capacity Channel Mileage (Fixed and Per Mile)
- High Capacity Multiplexing
- Securenet options for Missouri as set forth in 7.2.20 (G)
- Collocation Transport Inter/Intra Office (Fixed and Per Mile)

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.20 High Capacity Term Pricing Plan (HC-TPP) (Cont'd)

(C) Terms and Conditions

(1) Minimum Monthly Revenue Commitment

The customer agrees to a minimum monthly revenue commitment when electing to participate in a HC-TPP.

The minimum monthly revenue commitment is determined when the customer specifies the quantity of services to be included in the HC-TPP. That amount is then calculated using the current HC-TPP rates in effect at the time to arrive at the minimum monthly revenue commitment.

The minimum monthly revenue commitment is calculated as follows:

(Number of circuits)		(Rates in effect when)
(ordered)	X	(customer establishes)
		(service under HC-TPP)

= Initial minimum monthly revenue commitment

The customer may establish the HC-TPP minimum monthly revenue requirement at LATA, state or company level as follows:

Less than 71% of total DS1 revenues is established as
HC-TPP = LATA

71% to 90.99% of total DS1 revenues is established as
HC-TPP = state

91% or greater of total DS1 revenues is established
as HC-TPP = company

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.20 High Capacity Term Pricing Plan (HC-TPP) (Cont'd)

(C) Terms and Conditions (Cont'd)

(1) Minimum Monthly Revenue Commitment (Cont'd)

(a) Maintaining the Minimum Monthly Revenue
Commitment

A customer who chooses the state level must maintain that level of minimum monthly revenue commitment for a minimum of one quarter before returning to a LATA level. At the quarterly review, if the level is below 71%, the customer has 30 days to increase the revenue to between 71% and 90.99% to maintain the state level.

If the customer elects not to increase the revenues, the minimum monthly revenue commitment will be modified to reflect the LATA level and an Access Order charge will apply.

A customer who chooses the company level must maintain that level of minimum monthly revenue commitment for a minimum of one year.

After the minimum one-year commitment is met, quarterly reviews will be conducted. At the quarterly review, if the level is below 91%, the customer has 30 days to increase the revenue to 91% or greater to maintain the company level.

If the customer elects not to increase the revenues, the minimum monthly revenue commitment will be modified to reflect the state level and an Access Order charge will apply.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.20 High Capacity Term Pricing Plan (HC-TPP) (Cont'd)

(C) Terms and Conditions (Cont'd)

(1) Minimum Monthly Revenue Commitment (Cont'd)

(b) Exceeding the Minimum Monthly Revenue Commitment

The customer is permitted to exceed the minimum monthly revenue commitment by 10 percent throughout the life of a 3-year HC-TPP or by 15 percent throughout the life of a 5-year HC-TPP. If the customer exceeds the minimum monthly revenue commitment by more than 10 percent on a 3-year HC-TPP, that portion of the minimum monthly revenue commitment will be assessed and billed a 20 percent adjustment factor. If the customer exceeds the minimum monthly revenue commitment by more than the 15 percent on a 5-year HC-TPP, that portion of the minimum monthly revenue commitment will be assessed and billed a 30 percent adjustment factor. The revenue commitment amount will be reconciled quarterly.

The adjustment factor will be billed until such time as the customer establishes a new revenue commitment or the billing no longer exceeds the 10 or 15 percent allowance.

The adjustment factor will not apply to the company level minimum monthly revenue commitment.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.20 High Capacity Term Pricing Plan (HC-TPP) (Cont'd)

(C) Terms and Conditions (Cont'd)

(1) Minimum Monthly Revenue Commitment (Cont'd)

(c) Increasing the Minimum Monthly Revenue Commitment

The customer has the option to increase the minimum monthly revenue commitment rather than pay the adjustment factor. If the increase is received within 30 days of the time the adjustment factor was billed, the adjustment factor will not apply. To initiate an increase in the minimum monthly revenue commitment, the customer must provide the amount of the increase in writing with the understanding that this increased minimum monthly revenue commitment becomes the new minimum monthly revenue commitment.

The increased minimum monthly revenue commitment would be calculated as follows:

(Rates in effect	Service to)	(Existing)
(when customer	X be added)	+	(minimum)
(established)		(monthly)
(increased service)		(revenue)
(under HC-TPP)		(commitment)

= Increased minimum monthly revenue commitment

An increase in the minimum monthly revenue commitment does not change any of the conditions in effect during the life of the HC-TPP.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.20 High Capacity Term Pricing Plan (HC-TPP) (Cont'd)

(C) Terms and Conditions (Cont'd)

(1) Minimum Monthly Revenue Commitment (Cont'd)

(d) Decreasing the Minimum Monthly Revenue Commitment

The customer may elect to decrease the minimum monthly revenue commitment at any time during the life of the HC-TPP. To initiate a decrease in the minimum monthly revenue commitment, the customer must provide the amount of the decrease in writing with the understanding that the decreased minimum monthly revenue commitment becomes the new minimum monthly revenue commitment.

The decreased minimum monthly revenue commitment will be calculated as follows:

Existing minimum monthly revenue commitment	-	Decrease in minimum monthly revenue commitment
---	---	--

= Decreased (new) minimum monthly revenue
commitment

In addition, the customer will be assessed a termination charge of 20% on either a 3-year or 5-year HC-TPP as follows:

Termination percentage	X	Decrease in minimum monthly revenue commitment	X	Months remaining in revenue commitment
---------------------------	---	---	---	---

= Termination charge

A decrease in the minimum monthly revenue commitment does not change any of the conditions in effect during the life of the HC-TPP.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.20 High Capacity Term Pricing Plan (HC-TPP) (Cont'd)

(C) Terms and Conditions (Cont'd)

(2) Nonrecurring Charges

The HC-TPP nonrecurring charges, as described in 7.3 (Service Descriptions, Rates and Charges), will apply for those services ordered and installed under a 5-Year HC-TPP. The nonrecurring charges will not apply toward the minimum monthly revenue commitment.

The HC-TPP nonrecurring charges, as described in 7.3 (Service Descriptions, Rates and Charges), do not apply to existing services that are to be billed under HC-TPP; however, the Access Order Charge (AOC) as defined in Part 2, Section 5, paragraph 5.4.4 (Access Order) will apply.

(3) Renegotiation

The customer may choose to terminate an existing HC-TPP before the end of the three or five-year period and negotiate a **new** three or five-year HC-TPP without termination liability provided the new HC-TPP meets the following requirements:

- (a) the new HC-TPP must represent a greater minimum monthly revenue commitment than the previous HC-TPP, and
- (b) the new HC-TPP must be based upon the rates that are currently in effect and available to all customers.

An existing three-year HC-TPP may be converted into a five-year HC-TPP without termination liabilities, provided that:

- (a) the three-year HC-TPP has not ended,
- (b) the converted HC-TPP must be based upon the rates that are currently in effect and otherwise available to all customers, and
- (c) the customer's minimum monthly revenue commitment will be adjusted accordingly, based upon the applicable five-year HC-TPP rates times the customer's current HC-TPP number of circuits ordered.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.20 High Capacity Term Pricing Plan (HC-TPP) (Cont'd)

(C) Terms and Conditions (Cont'd)

(3) Renegotiation (Cont'd)

When the customer converts to a five-year HC-TPP, actual time in service for the original HC-TPP will be applied to the new HC-TPP. However, no credits or refunds will apply for the billing of actual time in service for the previous HC-TPP.

(4) Renewal

The customer must provide the Telephone Company with a written notice of intent to renew or extend an HC-TPP no later than 60 days prior to its expiration. The renewal rates will be the rates that are currently in effect and available to all customers. If the customer elects not to renew or extend the HC-TPP, or does not notify the Telephone Company of its intent to renew or extend the HC-TPP, the customer's service will automatically be billed under the guidebook month-to-month rates in effect at the time the HC-TPP expires.

7.2 Rate Regulations (Cont'd)

7.2.20 High Capacity Term Pricing Plan (HC-TPP) (Cont'd)

(C) Terms and Conditions (Cont'd)

(5) Extension of Service

The customer must provide the Telephone Company with a written notice of intent to extend the HC-TPP no later than 60 days prior to the expiration of the service period.

- (a) The customer may elect to extend the existing HC-TPP for an additional 24-month period at the current rates for the three or five-year HC-TPP being extended. If the current HC-TPP rates are lower than the original HC-TPP rates, the customer's minimum monthly revenue commitment will be adjusted accordingly. If current HC-TPP rates create a minimum monthly revenue commitment higher than the existing minimum monthly revenue commitment, the customer's existing minimum monthly revenue commitment will continue to apply.
- (b) After completion of the first 24-month extension period, the customer may elect to extend the existing HC-TPP for another 24-month period at the current guidebook rates for the three or five-year HC-TPP being extended originally. The Lata, State, or Company level MMRC, established with the MMRC developed in 7.2.20(C) (5) (a) above, will be recomputed based on the customer's current recurring HC-TPP billing.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.20 High Capacity Term Pricing Plan (HC-TPP) (Cont'd)

(C) Terms and Conditions (Cont'd)

(6) Upgrades of Service

A customer may upgrade HC-TPP circuits to MegaLink Custom, STN or ReliaNet Service without termination liability given that:

- (a) the customer identifies the High Capacity circuits being moved,
- (b) the MegaLink Custom, STN or ReliaNet Service that the above High Capacity circuits are being moved to is a new MegaLink Custom, STN or ReliaNet Service,
- (c) the upgrade rates are based on those rates currently in effect in Part 12, Section 39, paragraph 39.5.2 (Rates and Charges) for MegaLink Custom, STN and ReliaNet, and available to all customers, and
- (d) the due date to disconnect the HC-TPP and the due date to connect the MegaLink Custom, STN or ReliaNet Service must be the same.

The AOC will apply.

(7) Conversion from HC-TPP to Other SWBT Services

A customer may convert an existing HC-TPP to other access services, without termination liabilities if all of the following criteria are met:

- (a) the customer identifies the HC-TPP circuits being moved,
- (b) the HC-TPP circuits must be converted to other SWBT services,
- (c) the new service represents equal to or greater than revenue remaining in the HC-TPP service period being converted,
- (d) the new contract should have termination liability plan equal to or greater than the HC-TPP being replaced,

The AOC will apply.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.20 High Capacity Term Pricing Plan (HC-TPP) (Cont'd)

(D) Rate Applications

(1) Billed Revenues

If the customer reduces the number of circuits under HC-TPP without decreasing the minimum monthly revenue commitment, the initial minimum monthly revenue commitment will be billed.

(2) Special Construction Charges

Any special construction charges incurred for services billed under an HC-TPP will apply. These charges do not apply toward the minimum monthly revenue commitment.

(3) Termination of Service

Customers requesting the termination of an HC-TPP prior to the expiration date, excluding HC-TPP terminated as a result of a renegotiation, will be charged as indicated following:

HC-TPP	Termination Percentage
3 years	20%
5 years	20%

The termination charge will be calculated as follows:

$$\begin{array}{rcl}
 \text{Minimum monthly} & & \text{Months} \\
 \text{revenue} & & \text{remaining} \\
 \text{commitment} & \times & \text{in HC-TPP} \\
 & & \times \text{Termination} \\
 & & \text{percentage} \\
 & = & \text{Termination charge}
 \end{array}$$

Customers requesting the termination of an HC-TPP prior to the expiration date of the first extension of service will be charged a termination charge as calculated below:

$$\begin{array}{rcl}
 \text{Number of months} & & \text{Current} & & \text{HC-TPP} \\
 \text{utilized of the} & & \text{Monthly} & & \text{Monthly} \\
 \text{extension of service} & \times & \text{Rate} & \times & \text{Rate} \\
 & = & \text{Termination charge}
 \end{array}$$

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.20 High Capacity Term Pricing Plan (HC-TPP) (Cont'd)

(F) Right of Successor of an HC-TPP Agreement

If a current HC-TPP customer, at any time during the term of an HC-TPP Agreement, assigns or transfers part or all of the Services Available Under HC-TPP identified in 7.2.20(B) to an unaffiliated customer, the assignor or transferor (former customer) may choose either (1) or (2) below:

- (1) If the current HC-TPP customer (assignor or transferor) can qualify for HC-TPP with the remaining access services, a one-time adjustment to the MMRC will be made for the amount of transferred services; and
 - (a) If the new customer (assignee or transferee) is not a current HC-TPP customer and chooses not to subscribe to HC-TPP, the current HC-TPP customer (assignor or transferor) must pay termination liability charges as set forth in Section 7.2.20(C)(1)(d), preceding, for the amount of services assigned or transferred. If within sixty (60) days, however, the customer (assignee or transferee) includes the assigned or transferred services in a new HC-TPP MMRC, termination liability will be waived on the portion of assigned or transferred services included in the HC-TPP MMRC by the customer (assignee or transferee); or
 - (b) If the new customer (assignee or transferee) is a current HC-TPP customer and chooses not to include the assigned or transferred services in its HC-TPP MMRC, the HC-TPP customer (assignor or transferor) must pay termination liability charges as set forth in Section 7.2.20(D)(3), preceding, for the amount of access services assigned or transferred. If within sixty (60) days, however, the customer (assignee or transferee) includes the transferred services in the HC-TPP MMRC, termination liability will be waived on the portion of assigned or transferred services included in the HC-TPP MMRC by the customer (assignee or transferee).

(G) SecureNet

The following provisions will apply for SecureNet options offered in the state of Missouri:

- (1) Three (3) and five (5) year SNS billing periods are available.
- (2) With the exception of availability, all terms and conditions as set forth in 7.3.10(E) (6) apply.
- (3) Revenue from SecureNet options will be included in the Minimum Monthly Revenue Commitment as set forth in 7.2.20(C) (1).
- (4) A customer may elect to upgrade existing High Capacity SecureNet options to MegaLink Custom Service SecureNet options without incurring termination liabilities. All rates and charges as set forth in Part 12, Section 39, paragraph 39.5.2 for MegaLink Custom Service will apply.
- (5) Discontinuance of a SecureNet option at an existing customer location will result in termination liabilities as set forth in (7) following.
- (6) A customer may renew an SNS option for another 3- or 5-year period. The customer must provide the Telephone Company with a written notice of intent to renew an SNS option no later than 90 days prior to its expiration. The renewal rates will be the rates that are currently in effect and available to all customers. If the customer elects not to renew an SNS option, or does not notify the Telephone Company of its intent to renew the option, the customer's service will automatically be billed under the guidebook month-to-month rates in effect at the time the SNS option expires.

7.2.22 DS1 Term Payment Plan (DS1 TPP)⁽²⁾⁽³⁾

(A) General Description

For DS1 TPPs beginning prior to November 25th, 2019:

The DS1 Term Payment Plan (DS1 TPP) is a term plan that allows a customer to purchase DS1 High Capacity Service over a 1, 2, 3, 5 or 7 year period.⁽¹⁾⁽²⁾⁽³⁾ During the term of the selected DS1 TPP, Telephone Company initiated recurring rate changes (increases or decreases) will automatically be applied to the monthly payments for the remaining months of the current DS1 TPP term. The monthly recurring rate during the DS1 TPP term will never exceed the initial DS1 TPP rate. The DS1 TPP rates can be found in Part 12, Section 39, paragraph 39.5.2.7.1(E).

For DS1 TPPs beginning on or after November 25th, 2019:

New term plan customers will be required to pay the lower of: (1) the guide book term plan rate at time of billing; or (2) 120% of the initial rate in the first year of the contract, 144% in the second year of the contract, and 173% in the third year of the contract.

The DS1 TPP cannot be combined with other discounts, or pricing flexibility contracts, unless explicitly stated in the respective guidebook terms and conditions.

The following recurring rate elements are included in the DS1 TPP and are described in Section 7.3 (Service Descriptions):

- DS1 High Capacity Service Channel Termination
- DS1 High Capacity Service Channel Mileage - Fixed and Per Mile
- DS1 High Capacity Service Central Office Multiplexing
- DS1 High Capacity Service Collocation Transport (Fixed and Per Mile)

- (1) Effective on September 13, 2017, DS1 TPP 5- and 7-year Payment Plans are no longer available, including for any otherwise available conversions. Circuits already subject to a DS1 TPP 5- or 7-year Payment Plan, as of September 13, 2017, will continue to be provided under the then-current DS1 TPP 5- or 7-year Payment Plan term for the remainder of that term.
- (2) Effective November 1, 2022, DS1 Term Payment Plan 2- and 3-year and MegaLink Custom 3-year Payment Plans (collectively, Term Plan Services), are no longer available, including conversions. Existing Term Plan Services, as of November 1, 2022, will continue to be provided under the then-current terms, for the remainder of the applicable term.
- (3) Effective January 17, 2024, DS1 Term Payment Plan 1-year and MegaLink Custom 1-year Payment Plans (collectively, Term Plan Services) are no longer available, including conversions. Existing Term Plan Services on January 17, 2024, will continue to be provided for the remainder of the then-current terms.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.22 DS1 Term Payment Plan (DS1 TPP) (Cont'd)

(B) Conversion of Service to a New DS1 TPP or Higher Speed Service

During a customer's DS1 TPP term, conversion may be made to a new DS1 TPP term of the same or different length or an upgrade may be made to a higher speed service, if the expiration date for the new DS1 TPP term or for the new higher service is beyond the end of the original DS1 TPP term. The new DS1 TPP term or higher speed service must occur between the same two termination points as the original DS1 service being converted. The new DS1 TPP term or the higher speed service term becomes effective upon completion of the conversion activity. The rates, terms and conditions applicable for the new DS1 TPP term or higher speed service will be those in effect at the time the conversion is requested. Credit for months under the previous DS1 TPP may not be transferred to the new DS1 TPP or to the higher speed service term. When all conditions described above are met, termination liability for the remaining months on the original DS1 TPP will not apply.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.22 DS1 Term Payment Plan (DS1 TPP) (Cont'd)

(C) Moves

During a DS1 TPP term a customer may move one end of a DS1 High Capacity Service to another location in the same LATA and keep the DS1 TPP in force provided the following requirements are met:

- (1) the customer must have met the minimum in-service period at the previous location and will be subject to a new minimum in-service period at the new location; and
- (2) the Move is accommodated on a single customer order with the stipulation that the BAN (Billing Account Number), the NC (Network Channel Code), ACTL (Access Customer Terminal Location) and the ECCKT (Circuit Id) are provided and are the same as for the existing circuit being moved.

Moves to a different wire center may result in a change in the application of the rate elements associated with the service and therefore could result in a change in the monthly recurring charges.

EXAMPLE #1: One end of a DS1 is changed from Location A to Location B within the same LATA. The new Channel Mileage associated with the one-ended Move increased by 2 miles. Therefore, the resulting Channel Mileage calculation increases the monthly recurring charge accordingly.

EXAMPLE #2: One end of a DS1 is changed from Location C to Location D within the same LATA. The new Channel Mileage associated with the one-ended Move decreased by 5 miles. Therefore, the resulting Channel Mileage calculation decreases the monthly recurring charge accordingly.

If no lapse in service occurs and if the requirements in (1) and (2) as stated previously are met, termination liability will not apply. Nonrecurring Channel Termination Charges or Nonrecurring Collocation Transport Charges and Access Order Charges for the physical move will apply.

(D) Expiration of DS1 TPP Term Options

DS1 TPP is not available for renewal. At the expiration of the DS1 TPP term, the customer may select a new DS1 TPP term at the prevailing DS1 TPP rates. If a customer does not wish to purchase a new DS1 TPP at the expiration of the term, the customer's service will automatically convert to the current month-to-month rates.

7.2 Rate Regulations (Cont'd)

7.2.22 DS1 Term Payment Plan (DS1 TPP) ⁽³⁾ (Cont'd)

(E) DS1 High Capacity Service Portability Commitment

DS1 High Capacity Service Portability Commitment (Portability Commitment) ⁽²⁾ provides a Customer the ability to establish a volume commitment in the form of DS1 Channel Terminations and receive a waiver on DS1 TPP Termination Liability, as described in 7.2.22 (G), during the life of the Portability Commitment ⁽²⁾. The Portability Commitment ⁽²⁾ will consist of a Commitment Level (CL), as described below, and will have a term of three years. The Portability Commitment ⁽²⁾ does not otherwise affect the rates, terms, or conditions of the Customer's DS1 TPP. Only Portability Commitments ⁽²⁾ established prior to August 30, 2016, may be renewed. To renew, the Customer must notify the Telephone Company, in writing, with such notice directed to both the Customer's account manager and the access service center, and specifically identify the Customer's Commitment Level (as defined herein), prior to the expiration of the Customer's existing Portability Commitment ⁽²⁾ term.

For a Portability Commitment ⁽²⁾ under Section 7.2.22(E) (1), Customers may purchase DS1 service under DS1 TPP terms of 2, 3, 5 or 7 years ^{(1) (3)} and have the associated Channel Terminations count towards the CL. After establishing the CL, Customer may continue to purchase DS1 service on a month-to-month arrangement or under a DS1 TPP of 1, 2, 3, 5 or 7 years ⁽¹⁾ without portability and have the associated Channel Terminations not count toward the Customer's portability CL.

For a Portability Commitment ⁽²⁾ under Section 7.2.22(E) (2), Customers may purchase DS1 service under DS1 TPP terms of 1, 2, 3, 5 or 7 years ^{(1) (3)} or on a month-to-month basis and have the associated Channel Terminations count towards the CL.

Access Order Charges and all installation charges will be billed as applicable.

- (1) Effective on September 13, 2017, DS1 TPP 5- and 7-year Payment Plans are no longer available, including for any otherwise available conversions. Circuits already subject to a DS1 TPP 5- or 7-year Payment Plan, as of September 13, 2017, will continue to be provided under the then-current DS1 TPP 5- or 7-year Payment Plan term for the remainder of that term.
- (2) Effective on October 30, 2020, new DS1 High Capacity Service Portability Commitments will no longer be available for purchase by new or existing customers, and existing Portability Commitments may no longer be renewed.
- (3) Effective November 1, 2022, DS1 Term Payment Plan 2- and 3-year and MegaLink Custom 3-year Payment Plans (collectively, Term Plan Services), are no longer available, including conversions. Existing Term Plan Services, as of November 1, 2022, will continue to be provided under the then-current terms, for the remainder of the applicable term.

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.22 DS1 Term Payment Plan (DS1 TPP) ^{(2) (3)} (Cont'd)(E) DS1 High Capacity Service Portability Commitment ⁽¹⁾
(Cont'd)

(1) For Portability Commitments ⁽¹⁾ established prior to August 30, 2016, the terms and conditions associated with the Portability Commitment ⁽¹⁾ are as follows:

- (a) Customer commits to a 3-Year Commitment Level (CL) that is reviewed on a monthly basis. The initial monthly CL is calculated by the Telephone Company and is the total of all DS1 Channel Terminations in-service for the month previous to the month in which the Customer notifies the Telephone Company, in writing, of the Customer's CL. The initial monthly CL will consist of all Channel Terminations including those on Month-to-Month terms and other term pricing plans. The effective date of the Portability Commitment ⁽¹⁾ will be the first day of the month immediately following the month in which the Portability Commitment ⁽¹⁾ is signed;
- (b) Customer must have a minimum of 40 Channel Terminations in-service each month and at least 80% of the CL under a 2, 3, 5 or 7 year DS1 TPP each month;
- (c) At the commencement of the Customer's Portability Commitment ⁽¹⁾ and upon any renewal of a Portability Commitment ⁽¹⁾, at least 80 percent of the Customer's CL must be purchased under a 2, 3, 5 or 7 year DS1 TPP; and

(1) Effective on October 30, 2020, new DS1 High Capacity Service Portability Commitments will no longer be available for purchase by new or existing customers, and existing Portability Commitments may no longer be renewed.

(2) Effective November 1, 2022, DS1 Term Payment Plan 2- and 3-year and MegaLink Custom 3-year Payment Plans (collectively, Term Plan Services), are no longer available, including conversions. Existing Term Plan Services, as of November 1, 2022, will continue to be provided under the then-current terms, for the remainder of the applicable term.

(3) See Page 72 for the 5- and 7- year Term Payment Plan availability.

ACCESS SERVICE

7.2.22 DS1 Term Payment Plan (DS1 TPP) ⁽²⁾ ⁽³⁾ (Cont'd)

- (E) DS1 High Capacity Service Portability Commitment ⁽¹⁾ (Cont'd)
(1) (Cont'd)

(d) Each month, the total number of 2, 3, 5 and 7 year DS1 TPP Channel Terminations for the previous month will be calculated and measured against the corresponding monthly CL;

(i) If the total number of Channel Terminations, as calculated above, is 80% - 124% of the CL, no other charges will apply for the previous month.

(ii) If the total number of Channel Terminations, as calculated above, is less than 80% of the CL, charges will be assessed as follows:

Customer will be billed the difference between 80% of the CL and the actual number of in-service Channel Terminations.

EXAMPLE #1: Customer A has a CL = 1,000 Channel Terminations for the month of June. Customer A must have at least 800 DS1 Channel Terminations in-service to meet the 80% target. In July, the monthly review calculated 795 DS1 Channel Terminations in-service for the month of June. The difference between 80% of the CL (800) and the actual in-service total (795) is 5 Channel Terminations. Therefore, the Customer will be billed an amount equal to 5 Channel Terminations multiplied by the lowest available Price Cap Zone 1 Channel Termination rate, as set forth in Part 12, Section 39, paragraph 39.5.2.7.1(E). For subsequent months, Customer A will continue to be billed an amount equal to the difference between 80% of the CL and the actual in-service number of Channel Terminations that are below 80% of the CL (multiplied) by the lowest available Price Cap Zone 1 Channel Termination rate, as set forth in Part 12, Section 39, paragraph 39.5.2.7.1(E), until 80% of the CL is met.

- (1) Effective on October 30, 2020, new DS1 High Capacity Service Portability Commitments will no longer be available for purchase by new or existing customers, and existing Portability Commitments may no longer be renewed.
(2) Effective November 1, 2022, DS1 Term Payment Plan 2- and 3-year and MegaLink Custom 3-year Payment Plans (collectively, Term Plan Services), are no longer available, including conversions. Existing Term Plan Services, as of November 1, 2022, will continue to be provided under the then-current terms, for the remainder of the applicable term.
(3) See Page 72 for the 5- and 7- year Term Payment Plan availability.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.22 DS1 Term Payment Plan (DS1 TPP) (Cont'd)

(E) DS1 High Capacity Service Portability Commitment⁽¹⁾ (Cont'd)

(1) (Cont'd)

(d) (Cont'd)

- (iii) If the total number of in-service Channel Terminations, as calculated above, is more than 124% of the CL, the Customer will be billed an adjustment factor equal to the Nonrecurring Channel Termination charge multiplied by the difference between the actual number of Channel Terminations in-service and 124% of the CL.

EXAMPLE #2: Customer B has a CL of 500 Channel Terminations. In month 5 of the commitment, Customer B has 650 Channel Terminations in-service. Customer B has exceeded the CL by more than the 124% threshold (620). Customer B will be charged an adjustment factor equal to 30 Channel Terminations (650-620) multiplied by the current Nonrecurring Channel Termination rate. For subsequent months, Customer B will continue to be charged the Nonrecurring Channel Termination rate multiplied by the difference between the actual number of Channel Terminations in-service and 124% of the CL until Customer B no longer exceeds the CL by the 124% threshold.

⁽¹⁾ Effective on October 30, 2020, new DS1 High Capacity Service Portability Commitments will no longer be available for purchase by new or existing customers, and existing Portability Commitments may no longer be renewed.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2.22 DS1 Term Payment Plan (DS1 TPP) (Cont'd)

(E) DS1 High Capacity Service Portability Commitment⁽¹⁾
(Cont'd)

(1) (Cont'd)

(d) (Cont'd)

- (iv) Customers may increase the CL at any time by providing written notification to Telephone Company. Credits for previously charged adjustments billed for exceeding the CL will not be provided when a Customer increases the CL. However, an adjustment factor will not be billed if notice to increase the CL is provided to the Telephone Company within the calendar month following a reported adjustment, and the CL increase is sufficient that the number of in-service rate elements does not exceed 124% of the new CL. For instance, in Example #2 above, if the Customer increases the CL from 500 to 525 before the end of month 6, the adjustment factor applicable to month 5 will not be billed because the actual in-service volume (650) is less than or equal to the new 124% threshold (651).

⁽¹⁾ Effective on October 30, 2020, new DS1 High Capacity Service Portability Commitments will no longer be available for purchase by new or existing customers, and existing Portability Commitments may no longer be renewed.

(E) DS1 High Capacity Service Portability Commitment⁽¹⁾ (Cont'd)

(1) (Cont'd)

(d) (Cont'd)

(v) If the Customer elects to terminate the DS1 High Capacity Service Portability Commitment⁽¹⁾ or elects to decrease the CL prior to the 3-Year commitment, Termination Liabilities will apply. Termination Liability is calculated as the decreased number of Channel Terminations multiplied by the lowest available Price Cap Zone 1 Channel Termination rate, as set forth in Part 12, Section 39, paragraph 39.5.2.7.1(E), multiplied by the number of months remaining in the term of the Portability Commitment⁽¹⁾.

EXAMPLE #3: Customer C has a CL equal to 1,000 Channel Terminations. In month 10 of the 36-month Portability Commitment⁽¹⁾, Customer C elects to decrease the CL by 50 Channel Terminations. The Termination Liability associated with the decrease is equal to:

(50 Channel Terminations) X (26 months remaining) X (Lowest Available Price Cap Zone 1 Channel Termination rate)

EXAMPLE #4: Customer D has a CL equal to 500 Channel Terminations. In month 20 of the 36-month Portability Commitment⁽¹⁾, Customer D elects to terminate the entire Portability Commitment⁽¹⁾. The Termination Liability associated with the termination of the entire commitment is equal to:

(500 Channel Terminations) X (16 months remaining) X (Lowest Available Price Cap Zone 1 Channel Termination rate)

⁽¹⁾ Effective on October 30, 2020, new DS1 High Capacity Service Portability Commitments will no longer be available for purchase by new or existing customers, and existing Portability Commitments may no longer be renewed.

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.22 DS1 Term Payment Plan (DS1 TPP) (Cont'd)

(E) DS1 High Capacity Service Portability Commitment⁽¹⁾ (Cont'd)(2) For Portability Commitments⁽¹⁾ established on or after August 30, 2016, the terms and conditions associated with the Portability Commitment⁽¹⁾ are as follows:

- (a) Customer commits to a 3-Year Commitment Level (CL) that is reviewed on a monthly basis by the Telephone Company. To begin the process of establishing a Portability Commitment⁽¹⁾, Customer must request from the Telephone Company a list of DS1 circuits with Channel Terminations for all of the ACNAs of Customer and any entities that are then affiliated companies of Customer. Customer must designate from the provided list which DS1 circuits with Channel Terminations are to be included in, and which are to be excluded from, its Portability Commitment⁽¹⁾ and return the list with those designations to the Telephone Company. Failure to provide a designation for a listed circuit will be deemed to be a designation that such circuit is to be excluded from its Portability Commitment⁽¹⁾.

Only those DS1 circuits with Channel Terminations that are designated as being included ("Designated DS1s") will be subject to the Portability Commitment⁽¹⁾.

The Customer's initial monthly CL is the total number of Channel Termination associated with Designated DS1s.

The effective date of the Portability Commitment⁽¹⁾ will be the first day of the month immediately following the month in which the Portability Commitment⁽¹⁾ is signed.

- (b) Customer must commit a minimum of 100 DS1 circuits with Channel Terminations to establish a Portability Commitment⁽¹⁾.

⁽¹⁾ Effective on October 30, 2020, new DS1 High Capacity Service Portability Commitments will no longer be available for purchase by new or existing customers, and existing Portability Commitments may no longer be renewed.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.22 DS1 Term Payment Plan (DS1 TPP) (Cont'd)

(E) DS1 High Capacity Service Portability Commitment⁽¹⁾ (Cont'd)

(2) (Cont'd)

- (c) Customer, including all of its ACNAs and Affiliates, may be subject to only one Portability Commitment⁽¹⁾ for the operating territory of the Telephone Company. An "Affiliate," as that term is used in connection with the Portability Commitment⁽¹⁾, is a person that (directly or indirectly) owns or controls, is owned or controlled by, or is under common ownership or control with, another person. For purposes of the prior sentence, "own" means to own an equity interest (or the equivalent thereof) of more than 10 percent.
- (d) Designated DS1s that are disconnected during the term of the Portability Commitment⁽¹⁾ will not incur Termination Liability charges.
- (e) Circuits which are not included in the Portability Commitment⁽¹⁾ by Customer in the initial designation, as described in Section 7.22(E) (2) (a), or ordered under the DS1 TPP on or after August 30, 2016 without being designated for the Portability Commitment⁽¹⁾, may not be added to the Portability Commitment⁽¹⁾ for the duration of the Portability Commitment⁽¹⁾ term.
- (f) Customer may add additional DS1 circuits with channel terminations to the Portability Commitment⁽¹⁾ during the term of the Portability Commitment⁽¹⁾ only when initially ordering such DS1 circuit. A DS1 circuit with a Channel Termination that is so added, will be considered a Designated DS1.
- (g) Any Designated DS1 with an expired term plan that is subject to month-to-month rates will continue to count toward Customer's CL.

⁽¹⁾ Effective on October 30, 2020, new DS1 High Capacity Service Portability Commitments will no longer be available for purchase by new or existing customers, and existing Portability Commitments may no longer be renewed.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.22 DS1 Term Payment Plan (DS1 TPP) (Cont'd)

(E) DS1 High Capacity Service Portability Commitment⁽¹⁾ (Cont'd)

(2) (Cont'd)

(h) During the monthly review of Customer's Designated DSIs and its CL by the Telephone Company, it will be determined if Customer met, did not meet, or exceeded its CL on the last day of the month being reviewed.

If Customer did not meet its CL, Customer will be billed a charge for each Channel Termination below its CL equal to the lowest available Price Cap Zone 1 Channel Termination rate, as set forth in Part 12, Section 39, paragraph 39.5.2.7.1(E), on such last day of the month.

Example: Customer's CL is 100 Channel Terminations. At the end of the month, Customer had 90 Channel Terminations in service. Customer will be billed:

$(100 - 90) \times (\text{Lowest available Price Cap Zone 1 Channel Termination rate})$

If a Customer exceeds its CL by 115 percent or greater for three consecutive months, Customer's CL will be increased to ninety percent (90%) of the average number of Designated DSIs for those three months.

Example: Customer's CL is 100 Channel Terminations. For three consecutive months during the Portability Commitment⁽¹⁾ term, the Customer's Channel Termination volumes are 118, 120 and 122, for an average of 120. The Customer's new CL will be:

$[(118+120+122)/(3)] \times (90\%) = 108$

⁽¹⁾ Effective on October 30, 2020, new DS1 High Capacity Service Portability Commitments will no longer be available for purchase by new or existing customers, and existing Portability Commitments may no longer be renewed.

(E) DS1 High Capacity Service Portability Commitment⁽¹⁾ (Cont'd)

(2) (Cont'd)

- (i) If Customer elects to decrease the CL prior to expiration of the 3-Year commitment, a buy-down charge will apply. The buy-down charge is calculated as the number by which the CL is decreased multiplied by the lowest available Price Cap Zone 1 Channel Termination rate, as set forth in Part 12, Section 39, paragraph 39.5.2.7.1(E), on the date of the buy-down multiplied by the number of months remaining in the term of the Portability Commitment⁽¹⁾.

Example: Customer C has a CL equal to 1,000 Channel Terminations. In month 10 of the 36-month Portability Commitment⁽¹⁾, Customer C elects to decrease the CL by 50 Channel Terminations. The buy-down charge associated with the decrease is equal to:

(50 Channel Terminations) X (Lowest available Price Cap Zone 1 Channel Termination rate) X (26 months remaining) = Buy-down Charge

⁽¹⁾ Effective on October 30, 2020, new DS1 High Capacity Service Portability Commitments will no longer be available for purchase by new or existing customers, and existing Portability Commitments may no longer be renewed.

7.2.22 DS1 Term Payment Plan (DS1 TPP)⁽²⁾⁽³⁾⁽⁴⁾ (Cont'd)

(F) Applicable One-Time Charges

(1) Access Order Charge

Access Order Charges will apply, as described in Part 2, Section 5, paragraph 5.3.1, to all order activity. An Access Order charge will apply on any changes made to a plan (e.g., moving from a 3 year to a 7 year plan, on physical moves of DS1 High Capacity Services, and new installations) as applicable.

(2) DS1 Term Payment Plan Non-Recurring Charges

Nonrecurring Channel Termination charges will apply per Channel Termination or the nonrecurring Collocation Transport nonrecurring charge will apply on new installations of DS1 High Capacity Service on 1-year DS1 TPP term, and on all physical moves of DS1 High Capacity Services. Nonrecurring Channel Termination charges and nonrecurring Collocation Transport charges will be waived on new installations with 2, 3, 5 and 7 year DS1 TPP terms. The Nonrecurring Channel Termination Charge will also apply, applicable as stated in 7.2.22(E) previously, for Customers who have a DS1 High Capacity Service Portability Commitment⁽¹⁾.

- (1) Effective on October 30, 2020, new DS1 High Capacity Service Portability Commitments will no longer be available for purchase by new or existing customers, and existing Portability Commitments may no longer be renewed.
- (2) Effective November 1, 2022, DS1 Term Payment Plan 2- and 3-year and MegaLink Custom 3-year Payment Plans (collectively, Term Plan Services), are no longer available, including conversions. Existing Term Plan Services, as of November 1, 2022, will continue to be provided under the then-current terms, for the remainder of the applicable term.
- (3) See Page 72 for the 5- and 7- year Term Payment Plan availability.
- (4) Effective January 17, 2024, DS1 Term Payment Plan 1-year and MegaLink Custom 1-year Payment Plans (collectively, Term Plan Services) are no longer available, including conversions. Existing Term Plan Services on January 17, 2024, will continue to be provided for the remainder of the then-current terms.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.22 DS1 Term Payment Plan (DS1 TPP) (Cont'd)

(G) Termination Liability

Termination liability charges will apply in the following cases:

- (1) In the event service is terminated prior to the expiration of the minimum service period, charges, as specified in Part 2, Section 5, paragraph 5.3.5 (Minimum Period Requirements), will apply in addition to the termination liability charges identified in 7.2.22 (G) (2) following.
- (2) In the event service is terminated prior to the end of the DS1 TPP term, a termination charge utilizing the following termination percentage will apply:

Termination Billing Period Percentage: 40%

The termination charge is calculated as follows:

(Monthly Recurring Rate) X (Months remaining in DS1 TPP term) X (Termination Billing Period Percentage)

Example: A Customer with a \$500 monthly rate terminates service with 10 months remaining in a 3 year DS1 TPP term. The termination liability charge would be calculated as follows:

$$(\$500) \times (10) \times (.40) = \$2000$$

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.23 Video Pricing Plan (VPP)

(A) General Description

Video Pricing Plan (VPP) provides the customer with rate stabilization and discounted guidebook rates. The customer agrees to a 1, 3 or 5-year fixed service period.

If the Telephone Company initiates rate changes resulting in a decrease of rates for an existing service with a 1, 3 or 5-year fixed service period, those rate changes will be passed along to the customer. Rate changes resulting in an increase of rates for an existing service with a 1, 3 or 5-year fixed service period will not exceed the original rate for that selected service period.

(B) Services Available Under VPP

A customer may elect to participate in VPP for the following rate elements as described in 7.3 (Service Descriptions, Rates and Charges):

(1) Broadcast Video Service (TV1) ^{/1/}

- Channel Termination
- Channel Mileage (Fixed and Per Mile)
- Optional Features, BSEs and Functions

(C) Terms and Conditions

(1) Renewal

The customer must provide the Telephone Company with a written notice of intent to renew an VPP no later than 60 days prior to its expiration. The renewal rates will be the rates that are currently in effect and available to all customers. If the customer elects not to renew the VPP or does not notify the Telephone Company of its intent to renew the VPP, the customer's service will automatically be billed under the guidebook month-to-month rates in effect at the time the VPP expires.

/1/ Effective December 31, 2020, this Service will no longer be available for purchase by new or existing customers, and service agreements may no longer be renewed. In addition, requests to move, add, or change existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable Monthly rate until the service is discontinued. AT&T currently plans to discontinue this Service on or after December 31, 2021.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Rate Regulations (Cont'd)

7.2.23 Video Pricing Plan^{/1/} (VPP) (Cont'd)

(D) Rate Applications

(1) Termination of Service

Customers requesting the termination of an VPP prior to the expiration date, will be charged as indicated following:

<u>VPP</u>	<u>Termination Percentage</u>
1 year	30%
3 years	20%
5 years	15%

The termination charge will be calculated as follows:

Fixed Service Period	X	Months remaining in VPP	X	Termination percentage
Monthly Rate				
= Termination charge				

7.2.24 Reserved for Future Use

/1/ Effective December 31, 2020, Broadcast Quality (TV1) service will no longer be available for purchase by new or existing customers, and service agreements may no longer be renewed. In addition, requests to move, add, or change existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable Monthly rate until the service is discontinued. AT&T currently plans to discontinue this Service on or after December 31, 2021.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.3 Service Descriptions, Rates and Charges

Effective November 1, 2017, all rate elements, other than End User channel terminations and their optional features in Non-Competitive Counties, are no longer available from Section 7.3 for new service subscriptions. The application of rates and charges for Special Access services is based upon the county classifications as Competitive or Non-Competitive, as provided in Section 7.2. A list of Competitive and Non-Competitive Counties is located at the front of this Section.

7.3.1 General

The types of Special Access Service are:

- Metallic⁽¹⁾ (MT)
- Telegraph Grade⁽¹⁾ (TG)
- Video⁽²⁾
- High Capacity (HC)
- Voice Grade⁽¹⁾ (VG)
- MegaLink Data⁽¹⁾ (DA)

Each of the channel types has its own characteristics. All are subdivided by one or more of the following:

- Transmission specifications
- Bandwidth
- Speed (i.e., bit rate)
- Spectrum

- (1) Effective November 20, 2019, this Service will no longer be available for purchase by new or existing customers, and service agreements may no longer be renewed. In addition, requests to move, add, or change existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable monthly extension rates until the service is discontinued.
- (2) Effective December 31, 2020, this Service will no longer be available for purchase by new or existing customers, and service agreements may no longer be renewed. In addition, requests to move, add, or change existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable Monthly rate until the service is discontinued. AT&T currently plans to discontinue this Service on or after December 31, 2021.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.3 Service Descriptions, Rates and Charges

Effective November 1, 2017, all rate elements, other than End User channel terminations and their optional features in Non-Competitive Counties, are no longer available from Section 7.3 for new service subscriptions. The application of rates and charges for Special Access services is based upon the county classifications as Competitive or Non-Competitive, as provided in Section 7.2. A list of Competitive and Non-Competitive Counties is located at the front of this Section.

7.3.1 General (Cont'd)

(A) Descriptions

Each service consists of a basic channel to which the following services can be added as required to construct the service desired by the customer:

- Technical specifications packages (customized or predefined)
- Channel interface(s)
- Optional features, BSEs and functions

Paragraph (A) of 7.3.2 through 7.3.10 provides a description of the characteristics of each basic channel type and indicates whether the channel is provided between customer designated premises or between a customer designated premises and a Telephone Company Hub where bridging or multiplexing functions are performed. Customized channels are available as specified in 7.2.16.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.3 Service Descriptions, Rates and Charges (Cont'd)

7.3.1 General (Cont'd)

(B) Technical Specifications Packages

A matrix is provided in paragraph (B) of 7.3.2 through 7.3.10 which indicates the transmission parameters that are available with each Technical Specifications Package. The codes used to design the packages are constructed using the information shown across the top of the matrix as follows:

- The first two symbols of the code are letters which indicate the category of Special Access Service to which the parameters are applicable. These two letter codes also are shown in parentheses following the channel type in 7.3.1 preceding.
- An alpha, numeric or alpha-numeric designation follows these two letters to indicate the specific predefined package.
- The letter "C" following the two-letter code indicates the technical specifications package for a customized service. For a customized service, the customer may select any parameters available with that category of service as long as the parameters are compatible. Customized technical specifications packages will be provided where technically feasible. If the Telephone Company determines that the requested parameter specifications are not compatible, the customer will be advised and given the opportunity to change the order.

7.3.1 General (Cont'd)

(B) Technical Specifications Packages (Cont'd)

All services installed after the effective date of this guidebook will conform to the transmission specification standards contained in this guidebook or in the following Technical References for each category of service:

Metallic ⁽¹⁾	TR-NPL-000336
Telegraph Grade ⁽¹⁾	TR-NPL-000336
Voice Grade ⁽¹⁾	TR-TSY-000335
	PUB 41004, Table 4
WALS ⁽¹⁾	TR-NWT-000334
Broadcast Video ⁽²⁾	GR-0338-CORE
MegaLink Data ⁽¹⁾	TR-NPL-000341
	PUB 62310
High Capacity	TP-76625
	PUB 62411
	TR-INS-000342

Customers who wish to obtain copies of these references may obtain ordering information from the User's Guide section of this guidebook.

- (1) Effective November 20, 2019, this Service will no longer be available for purchase by new or existing customers, and service agreements may no longer be renewed. In addition, requests to move, add, or change existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable monthly extension rates until the service is discontinued. AT&T currently plans to discontinue this Service on or after June 30, 2024.
- (2) Effective December 31, 2020, this Service will no longer be available for purchase by new or existing customers, and service agreements may no longer be renewed. In addition, requests to move, add, or change existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable Monthly rate until the service is discontinued. AT&T currently plans to discontinue this Service on or after December 31, 2021.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.3 Service Descriptions, Rates and Charges (Cont'd)

7.3.1 General (Cont'd)

(C) Channel Interfaces

A matrix is provided in paragraph (C) of Sections 7.3.2 through 7.3.10 that indicates the channel interfaces which are compatible with each channel type.

Channel interfaces at each Point of Termination on a two-point or multipoint service may be symmetrical or asymmetrical. However, communications can only be provided between points of termination with compatible channel interfaces. Only certain channel interfaces are compatible. These may be found in the appropriate Technical Reference cited for each channel type.

Only certain channel interface combinations are available with the predefined technical specifications packages. These are delineated in the Technical References cited in (B) preceding. When a customized channel is requested, all channel interface combinations available with the specified type of service are available with the customized channel.

(D) Optional Features, BSEs and Functions

Information is included in 7.3.2 through 7.3.10, where appropriate, to provide a description of the optional features, BSEs and functions available with each type of Special Access Service and to indicate with which technical packages they are available. A description of each optional feature, BSE and function is also provided.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.3 Service Descriptions, Rates and Charges (Cont'd)

7.3.2 Metallic Service⁽¹⁾

(A) Basic Channel Description

A Metallic channel is an unconditioned two-wire channel capable of transmitting low speed varying signals at rates up to 30 baud. This channel is provided by metallic or equivalent facilities. Metallic channels are provided between customer designated premises or between a customer designated premises and a Telephone Company Hub where bridging functions are performed. Interoffice metallic facilities will be limited in length to a total of five miles per channel.

7.3.3 Telegraph Grade⁽¹⁾ Service

(A) Basic Channel Description

A Telegraph Grade channel is an unconditioned channel capable of transmitting binary signals at rates of 0-75 baud or 0-150 baud. This channel is furnished for half-duplex or duplex operation. Telegraph Grade channels are provided between customer designated premises or between a customer designated premises and a Telephone Company Hub.

(B) Technical Specifications Packages

<u>Transmission Parameter</u>	<u>Package TG-</u>

Rates and Charges are found in Section 39.

- (1) Effective November 20, 2019, this Service will no longer be available for purchase by new or existing customers, and service agreements may no longer be renewed. In addition, requests to move, add or change existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable monthly extension rates until the service is discontinued. AT&T currently plans to discontinue this Service on or after June 30, 2024.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.3 Service Descriptions, Rates and Charges (Cont'd)

7.3.4 Voice Grade⁽⁴⁾ Service

(A) Basic Channel Description

A Voice Grade channel is a channel which provides voice frequency transmission capability in the nominal frequency range of 300 to 3000 hertz (Hz) and may be terminated two-wire or four-wire. Voice Grade channels are provided between customer designated premises, between a customer designated premises and a Telephone Company Hub or between a customer designated premises and a WATS serving office. When a single Voice Grade channel is ordered to be terminated at a customer's designated Interexchange Carrier's all-digital POP which requires a minimum digital interface level of 1.544 Mbps, the Telephone Company will provide the required interface where facilities are available.

(B) Technical Specifications Packages

7.3.4 Voice Grade Service⁽¹⁾ (Cont'd)

(D) Analog Service to Service Through Connect Arrangement

Multiplexed Arrangement

This provides for the interconnection of two subtending analog channels derived from DS1 multiplexed services. The through connect will be provisioned in lieu of a typical voice grade channel termination. The ordering customer must provide channel assignments for both. Voice Grade channel mileage is required if the multiplexed services are terminated in two separate hubs.

(E) Four-Wire/Two-Wire Conversion

When a customer requests that an effective four-wire channel be terminated with a two-wire channel interface at the customer designated premises, a four-wire to two-wire conversion is required. The rate for the conversion is included as part of the basic Channel Termination rate.

(1) Effective November 20, 2019, this Service will no longer be available for purchase by new or existing customers, and service agreements may no longer be renewed. In addition, requests to move, add or change existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable monthly extension rates until the service is discontinued. AT&T currently plans to discontinue this Service on or after June 30, 2024.

(1) Denotes WATS Access Lines (WALs).

(2) When WAL extensions are provided, Echo Control limits are not applicable.

(3) Signaling is provided in conjunction with Switched Access service, 6.4 (Miscellaneous Services Descriptions) of Southwestern Bell Telephone Company, LLC's Tariff F.C.C. No. 1.

(4) Obsolete, and limited to existing installations at existing locations, for existing customers as of February 8, 1989.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.3 Service Descriptions, Rates and Charges (Cont'd)

7.3.4 Voice Grade Service⁽²⁾ (Cont'd)

(F) Optional Features, BSEs and Functions (Cont'd)

- (1) Central Office Bridging BSE Capability
 - (a) Data Bridging (two-wire and four-wire)
 - (b) Voice Bridging (two-wire and four-wire)
- (2) Central Office Multiplexing BSE
Voice to Telegraph Grade (43 Type Carrier): An arrangement that converts a Voice Grade channel to Telegraph Grade channels using frequency division multiplexing.
- (3) Conditioning BSE
Conditioning provides more specific transmission characteristics for Voice Grade services. C-Type conditioning controls attenuation distortion and envelope delay distortion. Sealing Current helps maintain continuity on dry metallic loops.

For two-point services, the parameters apply to each service. For multipoint services, the parameters apply to each mid link or end link. C-Type conditioning and Data Capability may be combined on the same service.

- (a) C-Conditioning
C-Conditioning upgrades the frequency response and envelope delay distortion limits of the analog data channel. The specifications for C-Conditioning, which are less stringent than C-Type conditioning, are delineated in the appropriate Technical Reference for Voice Grade Service.
- (b) C-Type Conditioning⁽¹⁾
C-Type Conditioning is provided for the additional control of attenuation distortion and envelope delay distortion on data services. The attenuation distortion and envelope delay distortion specifications for C-Type Conditioning are delineated in the appropriate Technical Reference for Voice Grade Service.

- (1) This feature is obsolete, and limited to existing installations at existing locations, for existing customers as of February 8, 1989.
- (2) Effective November 20, 2019, this Service will no longer be available for purchase by new or existing customers, and service agreements may no longer be renewed. In addition, requests to move, add or change existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable monthly extension rates until the service is discontinued. AT&T currently plans to discontinue this Service on or after June 30, 2024.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.3 Service Descriptions, Rates and Charges (Cont'd)

7.3.4 Voice Grade Service⁽¹⁾ (Cont'd)

(F) Optional Features, BSEs and Functions (Cont'd)

(3) Conditioning BSE (Cont'd)

(c) Improved Attenuation Distortion (IAD)

Improved Attenuation Distortion upgrades the frequency response limits of the analog data channel. The specifications for Improved Attenuation Distortion are delineated in the appropriate Technical References for WAL application and Voice Grade Services.

(d) Improved Envelope Delay Distortion (IEDD)

Improved Envelope Delay Distortion upgrades the frequency versus delay response limits of the analog data channel. The specifications for Improved Envelope Delay Distortion are delineated in the appropriate Technical Reference for Voice Grade Service.

(e) Sealing Current Conditioning

Sealing Current Conditioning is provided to help maintain continuity on dry metallic loops. It is associated with four-wire DA or NO type channel interfaces.

(4) Data Capability

Data Capability provides transmission characteristics suitable for data communications. Specifically, Data Capability provides for the control of Signal to C-Notched Noise Ratio and intermodulation distortion.

The Signal to C-Notched Noise Ratio and intermodulation distortion specifications for Data Capability are delineated in the appropriate Technical Reference for Voice Grade Service.

When a service equipped with Data Capability is used for voice communications, the quality of the voice transmission may not be satisfactory.

- (1) Effective November 20, 2019, this Service will no longer be available for purchase by new or existing customers, and service agreements may no longer be renewed. In addition, requests to move, add or change existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable monthly extension rates until the service is discontinued. AT&T currently plans to discontinue this Service on or after June 30, 2024.

ACCESS SERVICE

7.3 Service Descriptions, Rates and Charges (Cont'd)

7.3.4 Voice Grade Service⁽¹⁾ (Cont'd)

(F) Optional Features, BSEs and Functions (Cont'd)

(5) Improved Echo Control

Improved Echo Control for two-wire WALs provides more stringent control of reflected signals. Specifications can only be met with limited facility configurations.

The Improved Echo Control specifications are delineated in the appropriate Technical Reference for Voice Grade Service.

(6) Improved Equal Level Echo Path Loss

Provides improved Echo Control at four-wire interface for effective two-wire voice grade configurations. Specifications can only be met with limited facility configurations. Improved Equal Level Echo Path Loss specifications are delineated in the appropriate Technical Reference for Voice Grade Service.

(7) Improved Return Loss

Improved Return Loss at a two-wire point of termination provides for more stringent Echo Control specifications. This option is only applicable when ordered on effective two-wire channels and the transmission path is four-wire at one POT and two-wire at the other POT. Specifications can only be met with limited facility configurations. The Improved Return Loss specifications are delineated in the appropriate Technical Reference for Voice Grade Service.

(8) Improved Termination

Improved Termination at a four-wire point of termination provides, for a fixed 600 ohm impedance, variable level range and simplex reversal capability when ordered with either an effective two-wire or four-wire channel. Telephone Company equipment is required at the customer's premises where this option is ordered. The Improved Termination specifications are delineated in the appropriate Technical Reference for Voice Grade Service.

(1) Effective November 20, 2019, this Service will no longer be available for purchase by new or existing customers, and service agreements may no longer be renewed. In addition, requests to move, add or change existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable monthly extension rates until the service is discontinued. AT&T currently plans to discontinue this Service on or after June 30, 2024.

(9) Selective Signaling Arrangement

An arrangement that permits code selective ringing for up to ten codes on a multipoint service.

Signaling Capability must also be ordered when the Selective Signaling Arrangement is provided.

(10) Signaling Capability

Signaling Capability provides for the process by which one customer premises alerts another customer premises on the same service with which it wishes to communicate.

(G) Rates and Charges

All rates and charges apply to Arkansas, Kansas, Missouri, Oklahoma and Texas.⁽¹⁾

Rates and Charges are found in Section 39.

- (1) Effective on September 13, 2017, Optional Payment Plans are no longer available for Four-Wire Voice Grade Service, including for any otherwise available renewals, extensions or conversions. Circuits already subject to a Four-Wire Voice Grade Service Optional Payment Plan, as of September 13, 2017, will continue to be provided under the then-current Optional Payment Plan term for the remainder of that term.
- (2) Effective November 20, 2019, this Service will no longer be available for purchase by new or existing customers, and service agreements may no longer be renewed. In addition, requests to move, add or change existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable monthly extension rates until the service is discontinued. AT&T currently plans to discontinue this Service on or after June 30, 2024.

7.3.6 Video Service

(A) Basic Channel Description

(1) Broadcast Video (TV1)^{/2/}

A Broadcast Video service provides a video channel with one-way point to point or multipoint transmission capability for a standard 525 line/60 field monochrome, or National Television Systems Committee (NTSC) color video signal with zero to four associated audio signals. Video signals with one to four 20 kilohertz (kHz) audio signals are non-diplexed^{/1/} at a video channel bandwidth of 30 Hz to 4.2 MHz.

The provision of the associated audio signal(s) is a function of the channel interface selected by the customer. The audio signal(s) can support any bandwidth up to 20 kHz that the customer requires.

Broadcast Video channels are provided between customer designated premises or between a customer designated premise and a Telephone Company Hub using a single fiber facility.

Broadcast Video Services are provided where facilities are available. Where facilities are not available, Special Construction may apply.

/1/ Non-diplexed means video and audio signals are provided on separate transmission interfaces.

/2/ Effective December 31, 2020, this Service will no longer be available for purchase by new or existing customers, and service agreements may no longer be renewed. In addition, requests to move, add, or change existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable Monthly rate until the service is discontinued. AT&T currently plans to discontinue this Service on or after December 31, 2021.

7.3 Service Descriptions, Rates and Charges (Cont'd)

7.3.6 Video Service (Cont'd)

(C) Channel Interfaces (CI)

(1) Broadcast Video (TV1)

The following channel interfaces define the bandwidth and the provision of the audio and video signal(s):

Conductor	Code	Impedance	Option	Provision
02	TV	6	0	Video only
04	TV	6	20	Video with one 20 kHz non-diplexed audio ⁽¹⁾
06	TV	6	20	Video with two 20 kHz non-diplexed audios ⁽¹⁾
08	TV	6	20	Video with three 20 kHz non-diplexed audios ⁽¹⁾
10	TV	6	20	Video with four 20 kHz non-diplexed audios ⁽¹⁾

(2) Reserved for Future Use

(D) Optional Features, BSEs and Functions

(1) Broadcast Video (TV1)

(a) Bridging

Bridging is used for multipoint service to connect and distribute video signals at Telephone Company central office. Bridging is available with two, four or eight output signals per bridge. The capability exists to cascade off of the eight output signal bridge only, using any of the available bridges.

(2) Reserved for Future Use

(3) Reserved for Future Use

(E) Rates and Charges

Rates and Charges are found in Section 39.

7.3.7 Reserved for Future Use

7.3.8 Reserved for Future Use

(1) Non-diplexed means video and audio signals are provided on separate transmission interfaces.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.3 Service Descriptions, Rates and Charges (Cont'd)

7.3.9 MegaLink Data Service⁽⁴⁾

(A) Basic Channel Description

A MegaLink Data channel is a channel for duplex four-wire transmission of synchronous serial data at the rate of 2.4, 4.8, 9.6, 19.2, 56 kbps or 64 kbps⁽¹⁾ Clear Channel (CC), 128, 256, 384, 512 or 768⁽²⁾ kbps.⁽³⁾ The actual bit rate is a function of the channel interface selected by the customer. The channel provides a synchronous service with timing provided by the Telephone Company through the Telephone Company's facilities to the customer in the received bit stream. MegaLink Data channels are provided between customer designated premises for two-point service at all speeds or between a customer designated premises and a Telephone Company Digital Hub for multipoint service at all speeds, except 64 kbps (CC).

When a single MegaLink Data channel is ordered to be terminated at a customer's designated Interexchange Carrier's all-digital POP which requires a minimum digital interface level of 1.544 Mbps, the Telephone Company will provide the required interface where facilities are available.

128, 256, 384, 512 and 768 kbps are provisioned from specific wire centers which are listed in the NATIONAL EXCHANGE CARRIER ASSOCIATION, INC. TARIFF F.C.C. NO. 4.⁽³⁾ Availability is not restricted to customers serviced by the wire centers listed in F.C.C. No. 4, but the service must be routed through the designated offices in F.C.C. No. 4. Mileage as defined in Section 7.2.6 will apply.

It is the customer's responsibility to arrange for the Channel Service Unit-type equipment or other Network Channel Terminating Equipment associated with the MegaLink Data channel at the customer premises.

- (1) 64 kbps Clear Channel (CC) is offered only where equipment and facilities are available.
- (2) 128, 256, 384, 512 or 768 kbps is offered only where equipment and facilities are available.
- (3) Effective October 27, 2016, MegaLink Data Service 128, 256, 384, 512 and 768 Kbps channels are limited to existing Customers for existing service arrangements; no new or additional term commitments of any kind, including any otherwise available renewals, will be available; and no move, add, or change orders will be accepted.
- (4) Effective November 20, 2019, this Service will no longer be available for purchase by new or existing customers, and service agreements may no longer be renewed. In addition, requests to move, add or change existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable monthly extension rates until the service is discontinued. AT&T currently plans to discontinue this Service on or after June 30, 2024.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.3 Service Descriptions, Rates and Charges (Cont'd)

7.3.9 MegaLink Data Service⁽²⁾ (Cont'd)

(B) Technical Specifications Packages

<u>Transmission Parameter</u>	Package DA-					
	<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>	<u>5</u>	<u>6</u>
Error-Free Seconds	X	X	X	X	X	X

The Telephone Company will provide a channel capable of meeting a monthly average performance greater than or equal to 99.875% error-free seconds while the channel is in service, if it is measured through a CSU equivalent which is designed, manufactured and maintained to conform with the specifications contained in the appropriate Technical Reference for MegaLink Data Service.

Voltages which are compatible with MegaLink Data Service are delineated in the appropriate Technical Reference for MegaLink Data Service.

For 128, 256, 384, 512 and 768 kbps, the following technical specifications packages apply:⁽¹⁾

Technical Specifications Packages

<u>Transmission Parameter</u>	Package HC-					
	<u>0</u>	<u>1</u>	<u>1C</u>	<u>2</u>	<u>3</u>	<u>4</u>
Error-Free Seconds		X				

A channel with technical specifications package HC1 will be capable of an error-free second performance of 98.75% over a continuous 24-hour period as measured at the 1.544 Mbps rate through a Channel Service Unit equivalent which is designed, manufactured and maintained to conform with the specifications contained in the appropriate Technical Reference for High Capacity Service.

Clear Channel Capability BSE is not available with 128, 256, 384, 512 or 768 kbps services.⁽¹⁾

- (1) Effective October 27, 2016, MegaLink Data Service 128, 256, 384, 512 and 768 Kbps channels are limited to existing Customers for existing service arrangements; no new or additional term commitments of any kind, including any otherwise available renewals, will be available; and no move, add, or change orders will be accepted.
- (2) Effective November 20, 2019, this Service will no longer be available for purchase by new or existing customers, and service agreements may no longer be renewed. In addition, requests to move, add or change existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable monthly extension rates until the service is discontinued. AT&T currently plans to discontinue this Service on or after June 30, 2024.

ACCESS SERVICE

7.3 Service Descriptions, Rates and Charges (Cont'd)

7.3.9 MegaLink Data Service⁽⁴⁾ (Cont'd)

(C) Channel Interfaces (CI)

The following channel interfaces define the bit rates that are available for a MegaLink Data channel:

CI	Bit Rate
DU-24	2.4 kbps
DU-48	4.8 kbps
DU-96	9.6 kbps
DU-19	19.2 kbps
DU-56	56 kbps
DU-64	64 kbps (CC) ⁽¹⁾
DS-1S	128 kbps ^{(2) (3)}
DS-1S	256 kbps ^{(2) (3)}
DS-1S	384 kbps ^{(2) (3)}
DS-1S	512 kbps ^{(2) (3)}
DS-1S	768 kbps ^{(2) (3)}

(D) Service to Service Through Connect Arrangement

This provides the interconnection of two subtending digital data channels derived from DS1 multiplexed services. The through connect will be provisioned in lieu of a typical MegaLink Data channel termination. The through connect will be provisioned for all MegaLink Data speeds: 2.4, 4.8, 9.6, 19.2, 56 kbps, 64 kbps (CC), 128, 256 384, 512 and 768 kbps.⁽³⁾ The ordering customer must provide channel assignments for both. Channel mileage is required if the multiplexed services are terminated in two separate digital hubs.

- (1) MegaLink Data Service 64 kbps channel interface is offered only with Clear Channel.
- (2) MegaLink Data Service 128, 256, 384, 512 or 768 kbps is offered only where equipment and facilities are available.
- (3) Effective October 27, 2016, MegaLink Data Service 128, 256, 384, 512 and 768 Kbps channels are limited to existing Customers for existing service arrangements; no new or additional term commitments of any kind, including any otherwise available renewals, will be available; and no move, add, or change orders will be accepted.
- (4) Effective November 20, 2019, this Service will no longer be available for purchase by new or existing customers, and service agreements may no longer be renewed. In addition, requests to move, add or change existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable monthly extension rates until the service is discontinued. AT&T currently plans to discontinue this Service on or after June 30, 2024.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.3 Service Descriptions, Rates and Charges (Cont'd)

7.3.9 MegaLink Data Service⁽¹⁾ (Cont'd)

(E) Optional Features, BSEs and Functions

	Package DA-					
	1	2	3	4	5	6
Central Office Bridging						
Capability	X	X	X	X	X	
Secondary Channel Capability	X	X	X	X	X	
Transfer Arrangement	X	X	X	X	X	X

(1) Central Office Bridging BSE Capability

(2) Secondary Channel Capability BSE

Secondary Channel Capability provides for an additional low-speed digital transmission channel within the existing 2.4, 4.8, 9.6, 19.2 and 56 kbps primary channels. It is available as a point-to-point or a multipoint service utilizing a nonrepeated channel termination. The Secondary Channel can be used as a communications channel for the controlling and monitoring of the customer's network.

(3) Transfer Arrangement

An arrangement that affords the customer an additional measure of protection and/or flexibility in the use of their access channel(s) on a 1xN basis. The arrangement can be utilized to transfer a leg of a Special Access Service to either a spare or working channel that terminates in either the same or a different customer designated premises. This arrangement is only available at a Telephone Company Digital Hub. A key activated or dial-up control service is required to operate the transfer arrangement. A spare channel, if required, is not included as a part of the option.

- (1) Effective November 20, 2019, this Service will no longer be available for purchase by new or existing customers, and service agreements may no longer be renewed. In addition, requests to move, add or change existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable monthly extension rates until the service is discontinued. AT&T currently plans to discontinue this Service on or after June 30, 2024.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.3 Service Descriptions, Rates and Charges (Cont'd)

7.3.9 MegaLink Data Service (Cont'd)

(F) Rates and Charges

All rates and charges apply to Arkansas, Kansas, Missouri, Oklahoma and Texas.⁽¹⁾

Rates and Charges are found in Section 39.

(1) Effective on September 13, 2017, Optional Payment Plans are no longer available for MegaLink Data Service, including for any otherwise available renewals, extensions or conversions. Circuits already subject to a MegaLink Data Service Optional Payment Plan, as of September 13, 2017, will continue to be provided under the then-current Optional Payment Plan term for the remainder of that term.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.3 Service Descriptions, Rates and Charges (Cont'd)

7.3.10 High Capacity Service

(A) Basic Channel Description

A High Capacity channel is a channel for the transmission of nominal 64 kbps⁽¹⁾ or 1.544 Mbps, isochronous serial data. The actual bit rate and framing format is a function of the channel interface selected by the customer. High Capacity channels are provisioned (1) between customer designated premises, (2) between a customer designated premises and a Telephone Company Hub, (3) between Network Reconfiguration Service Hubs at 1.544 Mbps transmission, (4) between Transport Resource Management Service Hubs at 1.544 Mbps transmission, (5) between a Transport Resource Management Service Hub and a Telephone Company Hub at 1.544 Mbps transmission, (6) between a Network Reconfiguration Service Hub and a Transport Resource Management Service Hub at 1.544 Mbps transmission, or (7) between a Network Reconfiguration Service Hub and a Telephone Company Hub at 1.544 Mbps transmission.

Loop Redundancy⁽²⁾, which provides automatic restoration of the 1.544 Mbps High Capacity Service Channel Termination and physical route redundancy between the customer's premises and the customer's serving wire center in the event of a single loop failure, will be provided on High Capacity Channel Terminations in those situations where the customer's premises and serving wire center are equipped with the necessary equipment and facilities. If the equipment and facilities are not available, the interval for loop redundancy will be within 2 years from the date of customer request or the agreed upon date if Special Construction applies.

It is the customer's responsibility to arrange for the Network Channel Terminating Equipment associated with the High Capacity channel at the customer's premises. When a single High Capacity channel is ordered to be terminated at a customer's designated Interexchange Carrier's all digital POP which requires a minimum digital interface level of 44.736 Mbps, the Telephone Company will provide the required interface where facilities are available.

- (1) Available only as a channel of a 1.544 Mbps facility between two Telephone Company MegaLink Data Hubs. The customer must provide system and channel assignment data.
- (2) As of the effective date of the guidebook, by the end of 1997, all but 500 of the current High Capacity lines in SWBT territory will be served from wire centers providing Loop Redundancy (with basic DS1 service).

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.3 Service Descriptions, Rates and Charges (Cont'd)

7.3.10 High Capacity Service (Cont'd)

(B) Technical Specifications Packages

<u>Transmission Parameter</u>	<u>Package HC-</u>					
	<u>0</u>	<u>1</u>	<u>1C</u>	<u>2</u>	<u>3</u>	<u>4</u>
Error-Free Seconds		X				

A channel with technical specifications package HC1 will be capable of an error-free second performance of 98.75% over a continuous 24-hour period as measured at the 1.544 Mbps rate through a Channel Service Unit equivalent which is designed, manufactured and maintained to conform with the specifications contained in the appropriate Technical Reference for High Capacity Service.

(C) Channel Interfaces (CI)

The following channel interface defines the bit rate that is available for a High Capacity DS1 channel:

<u>CI</u>	<u>Bit Rate</u>
DS-15 ⁽¹⁾	1.544 Mbps (DS1)

(D) Service to Service Through Connect Arrangement

(1) High Capacity Service Arrangement

This provides the interconnection of two DS1 services at a Digital Hub and may also be used to connect a High Capacity Service Customer to a ReliaNet MAC primary serving wire center when that customer chooses not to use a ReliaNet Auxiliary Connection.

(2) Multiplexed Service Arrangement

This provides the interconnection of two digital channels extended from High Capacity multiplexed services. The through connect will be provisioned in lieu of a typical High Capacity channel termination. The ordering customer must provide channel assignments for both multiplexed services. Channel mileage is required if the multiplexed services are terminated in two separate digital hubs.

(1) A 64 kbps channel is available as a channel(s) of a 1.544 Mbps facility to a Telephone Company Hub.

ACCESS SERVICE

(1) Reserved for Future Use

(2) Central Office Multiplexing BSE

(a) DS0 to Subrate⁽³⁾

An arrangement that converts a 64.0 kbps channel to subspeeds of up to twenty 2.4 kbps, ten 4.8 kbps, or five 9.6 kbps channels using digital time division multiplexing.

(b) DS1 to DS0⁽³⁾

An arrangement that converts a 1.544 Mbps channel to 23 64.0 kbps channels utilizing digital time division multiplexing.

(c) DS1 to Voice⁽³⁾

An arrangement that converts a 1.544 Mbps channel to 24 channels for use with Voice Grade Services. A channel of this DS1 to the hub can also be used for MegaLink Data, Metallic Service, or WATS Access Lines.

- (1) Available only on a channel of a 1.544 Mbps facility to a Telephone Company Hub or on a DS0 channel that connects to a customer's Network Reconfiguration Service (NRS) network which contains a DS1 channel.
- (2) Obsolete, and limited to existing installations at existing locations, for existing customers as of October 23, 1993.
- (3) Effective November 20, 2019, this Service will no longer be available for purchase by new or existing customers, and service agreements may no longer be renewed. In addition, requests to move, add or change existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable monthly extension rates until the service is discontinued. AT&T currently plans to discontinue this Service on or after June 30, 2024.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.3 Service Descriptions, Rates and Charges (Cont'd)

7.3.10 High Capacity Service (Cont'd)

(E) Optional Features, BSEs and Functions (Cont'd)

(3) Clear Channel Capability BSE

Clear Channel Capability is a BSE that provides the customer with an increase in usable bandwidth from 1.344 Mbps to 1.536 Mbps of an unconstrained data stream across the network. Clear Channel Capability is provided only on 1.544 Mbps High Capacity service and requires the customer signal at the channel interface to conform to Bipolar with Eight Zero Substitution (B8ZS) line code format as described in the appropriate Technical Reference for High Capacity Service. Customer equipment must be compatible with this method of providing the unconstrained signal.

(4) Extended Superframe Format BSE

Extended Superframe Format is a BSE that passes a customer provided framing format for 1.544 Mbps High Capacity service. Extended Superframe Format extends the customer's 1.544 Mbps framing structure from 12 to 24 frames and divides the 8 kbps 193rd bit position pattern into three distinct functionalities: 2 kbps for frame synchronization, 2 kbps for cyclic redundancy checking, and 4 kbps used primarily to send performance monitoring information over the Facilities Data Link.

(5) Power Over the Interface⁽¹⁾

Power Over the Interface is an optional feature available with the installation of 1.544 Mbps High Capacity service. This option provides line power to the Customer's Premises Equipment, enabling the customer to benefit from uninterrupted service if a commercial power failure occurs.

(1) Obsolete, and limited to existing installations at existing locations, for existing customers as of October 23, 1993.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.3 Service Descriptions, Rates and Charges (Cont'd)

7.3.10 High Capacity Service (Cont'd)

(E) Optional Features, BSEs and Functions (Cont'd)

(6) SecureNet

SecureNet options provide automatic restoration capabilities which prevent service interruption in the event of a single facility break or a single electronics failure. SecureNet Options are available with two-point 1.544 Mbps High Capacity Service and are available only where fiber optic facilities are used to provide the 1.544 Mbps High Capacity Service.

The automatic restoration capabilities are provided through the use of intelligent components which are capable of sensing transmission failure and by separately routing the primary transmission path and secondary transmission path in geographically separate fiber optic cables. In the event of a transmission failure, the intelligent components will automatically switch the 1.544 Mbps High Capacity Service to either the primary or secondary transmission path within 2.0 seconds.

The primary and secondary transmission paths for 1.544 Mbps High Capacity Service provisioned with SecureNet will be routed in geographically separate fiber optic cables up to the nearest point to the customer's premises that route redundancy can be achieved. In the event a facility break occurs in that portion of the 1.544 Mbps High Capacity Service for which route redundancy could not be achieved, the Telephone Company cannot guarantee automatic restoration of the customer's service within 2.0 seconds and a credit as set forth for SecureNet in Part 2, Section 2, paragraphs 2.5.6(B) (2) and 2.5.11 (MegaLink Custom and Special Access Services Equipped with a SecureNet Option) will not apply.

SecureNet options are available at those serving wire centers where equipment and facilities are available. Hub Redundancy and Serving Wire Center and Facility Redundancy will be provided in those serving wire centers found in the NATIONAL EXCHANGE CARRIER ASSOCIATION, INC. TARIFF F.C.C. NO. 4. Technical specifications may be referenced in the appropriate Technical Reference.

SecureNet is provided with two options allowing for two levels of 1.544 Mbps High Capacity Service Redundancy.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.3 Service Descriptions, Rates and Charges (Cont'd)

7.3.10 High Capacity Service (Cont'd)

(E) Optional Features, BSEs and Functions (Cont'd)

(6) SecureNet (Cont'd)

(a) Hub Redundancy

This option provides automatic restoration of the 1.544 Mbps High Capacity Service and physical route redundancy from the customer's premises to the customer's DS3/DS1 multiplexing hub in the event of a single loop, serving wire center, interoffice facility or hub failure. The customer's wire center and multiplexing hub may be collocated. This option includes interoffice mileage for the redundant facility. When a 1.544 Mbps High Capacity Service is derived from a MegaLink Custom Electrical Service via multiplexing and provisioned with Hub Redundancy, the MegaLink Custom Electrical service must also be provisioned with this option in accordance with Part 12, Section 20, paragraph 20.2.2 (SecureNet). A 1.544 Mbps High Capacity Service equipped with Hub Redundancy may be directly connected to a Self-healing Transport Network as described in Part 12, Section 19, paragraph 19.3.1(B) (2) (b) (SecureNet Interconnection with High Capacity DS1 Services).

Hub Redundancy is available where more than one exchange telephone company is involved (i.e., jointly provided service) when those telephone companies have agreed upon facilities and terms and conditions of the jointly provided service.

(6) SecureNet (Cont'd)

(b) Serving Wire Center and Facility Redundancy

This option provides automatic restoration of the 1.544 Mbps High Capacity Service and physical route redundancy from the customer's premises to a DS3/DS1 multiplexing hub or from a customer's premises to another premises in the event of a single loop, wire center or interoffice facility failure. The customer's serving wire center and DS3/DS1 multiplexing hub are separate locations. This option includes interoffice mileage for the redundant facility.

Serving Wire Center and Facility Redundancy is available where more than one exchange telephone company is involved (i.e., jointly provided service) when those telephone companies have agreed upon facilities and terms and conditions of the jointly provided service.

(7) Transfer Arrangement

An arrangement that affords customers an additional measure of flexibility in the use of their access channel(s). The arrangement can be utilized to transfer a leg of a Special Access Service to either a spare or working channel that terminates in either the same or a different customer premises. A key activated or dial-up control service is required to operate the transfer arrangement. A spare channel, if required, is not included as part of the option.

(F) Rates and Charges

Rates and charges for Arkansas, Kansas, Missouri, Oklahoma and Texas will be applied based on Pricing Zones as contained in this section.

Rates and Charges are found in Section 39.

18. Network Management Services

18.1 Network Reconfiguration Service^{/1/}

18.1.1 General

Network Reconfiguration Service is a BSE that permits customers to access a database maintained by the Telephone Company to reconfigure their dedicated network. Customers gain database access through the use of a terminal on their premises without going through normal service order procedures.

Network Reconfiguration Service allows customers direct access to, and control of, their 45 Mbps services, 1.544 Mbps services, subtending channels, and Internodal Facilities (the facilities that connect a Digital Cross-Connect System in one central office with a Digital Cross-Connect System in another central office) without going through normal service order procedures. Network Reconfiguration Service utilizes a central office cross-connect system for the remote reconfiguration of these channels. Customers can reconfigure their dedicated service network from their premises, or they can have the Telephone Company perform the reconfigurations.

Customers will access Network Reconfiguration Service by using a terminal on their premises in conjunction with dedicated lines provided for in Part 12, Sections 7 and 20, or in conjunction with a local telephone line with a seven-digit telephone number.

Network Reconfiguration Service is available at those Hubs where Telephone Company cross-connect systems are located. Network Reconfiguration Hub designations are found in the National Exchange Carrier Association, Inc. Tariff F.C.C. No. 4.

/1/ Effective December 5, 2018, Network Reconfiguration Service (NRS) will no longer be available for purchase by new or existing customers, and NRS service agreements may no longer be renewed. Effective July 31, 2022, the Telephone Company will no longer accept new requests for physical changes to existing service arrangements including the upgrade or downgrade of access/port speed, installation of new service, or moves to different service addresses.

18. Network Management Services (Cont'd)

18.1 Network Reconfiguration Service^{/1/} (Cont'd)

18.1.2 Network Reconfiguration Options

Two network reconfiguration options are available to Network Reconfiguration customers:

- On-demand
- Reservation

The on-demand option will make immediate changes to the network, while the reservation option will be executed at a specified time designated by the customer. Both types of reconfigurations are available whether the customer performs the reconfigurations or requests the Telephone Company to perform them.

/1/ Effective December 5, 2018, Network Reconfiguration Service (NRS) will no longer be available for purchase by new or existing customers, and NRS service agreements may no longer be renewed. Effective July 31, 2022, the Telephone Company will no longer accept new requests for physical changes to existing service arrangements including the upgrade or downgrade of access/port speed, installation of new service, or moves to different service addresses.

18. Network Management Services (Cont'd)

18.1 Network Reconfiguration Service^{/1/} (Cont'd)

18.1.3 Network Reconfiguration Functions

Network Reconfiguration Service provides the following functions:

(A) Routing/Rerouting

The routing feature allows customers to select the routes that will be used to connect their circuits between DCSs. The route selection process can be controlled by various parameters according to the customer's needs. Rerouting of circuits off of a failed internodal facility to a working one is also available.

(B) Renaming

Renaming permits customers to rename their network locations, circuits and facilities.

(C) Special Day Definition

Special day definition gives customers the capability to specify circuit reconfiguration on special days, e.g., payday, holidays.

(D) Resource Verification

Resource verification allows customers to verify the resource availability for the reservation period in their reconfiguration request prior to the system's confirmation or denial of the request.

(E) Transaction Log

Transaction log provides customers a database log that contains every transaction involving reconfigurations.

(F) Multi-Level Security

Multi-level security eliminates the unauthorized entry into a customer's circuit network arrangement inventory.

/1/ Effective December 5, 2018, Network Reconfiguration Service (NRS) will no longer be available for purchase by new or existing customers, and NRS service agreements may no longer be renewed. Effective July 31, 2022, the Telephone Company will no longer accept new requests for physical changes to existing service arrangements including the upgrade or downgrade of access/port speed, installation of new service, or moves to different service addresses.

18. Network Management Services (Cont'd)

18.1 Network Reconfiguration Service^{/1/} (Cont'd)

18.1.3 Network Reconfiguration Functions (Cont'd)

- (G) Compatibility Table
Compatibility table permits customers to view the allowable access line combinations that can be used with Network Reconfiguration Service.
- (H) Path Priority
Path priority gives customers the ability to arrange their circuit paths in order of priority when multiple routes exist.
- (I) Reservation Summary Screen
Reservation summary screen allows customers to view the status of their reconfiguration reservations.
- (J) Simple Commands and Screens
Simple commands and screens permits customers to use simple commands on screens with easy to use menus.
- (K) MACRO Command/Network Modeling
MACRO command/network modeling (i.e., model request) gives customers the ability to initiate with one command, multiple two-point cross-connections. Customers can build separate network models, such as day-time models, night-time models, and disaster recovery models and invoke their activation or switch from one to the other.
- (L) Variable Bandwidth
Variable bandwidth applies to an Internodal Facility and permits it to be used interchangeably to connect full 45 Mbps or 1.544 Mbps services, or to connect one or more individual subtending channels.

/1/ Effective December 5, 2018, Network Reconfiguration Service (NRS) will no longer be available for purchase by new or existing customers, and NRS service agreements may no longer be renewed. Effective July 31, 2022, the Telephone Company will no longer accept new requests for physical changes to existing service arrangements including the upgrade or downgrade of access/port speed, installation of new service, or moves to different service addresses.

18. Network Management Services (Cont'd)

18.1 Network Reconfiguration Service^{/1/} (Cont'd)

18.1.4 Technical Specifications

Services that are cross-connected by Network Reconfiguration Service must have identical technical characteristics to ensure compatibility and proper operations, e.g., Data to Data, Voice to Voice.

Network Reconfiguration Service specifications are delineated in Technical Reference TR-TSY-000366.

/1/ Effective December 5, 2018, Network Reconfiguration Service (NRS) will no longer be available for purchase by new or existing customers, and NRS service agreements may no longer be renewed. Effective July 31, 2022, the Telephone Company will no longer accept new requests for physical changes to existing service arrangements including the upgrade or downgrade of access/port speed, installation of new service, or moves to different service addresses.

18. Network Management Services (Cont'd)

18.1 Network Reconfiguration Service^{/1/} (Cont'd)

18.1.5 Rate Regulations

This section contains information related to the rate elements applicable to Network Reconfiguration Service. Rates and charges associated with the rate elements are listed in 18.1.6.

Effective November 1, 2017, Competitive Counties and Non-Competitive Counties have been established and are defined in Part 2, Section 2, paragraph 2.12 and the wire centers within such counties are listed in the front of Part 12, Section 7 (or 39) or in Sections 15.2(C) and (D) of Southwestern Bell Telephone Company, LLC's Tariff F.C.C. No. 1.

For all rate elements in Section 18.1, price flex rates and charges, as provided in Part 12, Section 39, paragraph 39.5.2, apply, regardless of whether the county is Competitive or Non-Competitive.

(A) Rate Element Descriptions

(1) Service Establishment Charge

The Service Establishment charge applies per customer database setup. The customer database setup is a grid, built by the Telephone Company, which contains all the circuits the customer will be able to control and reconfigure. Security, as well as circuit inventory, is built into the grid, permitting the customer control of its own circuits. Also included is the provisioning of customer training. This charge includes the connection of the initial circuits.

/1/ Effective December 5, 2018, Network Reconfiguration Service (NRS) will no longer be available for purchase by new or existing customers, and NRS service agreements may no longer be renewed. Effective July 31, 2022, the Telephone Company will no longer accept new requests for physical changes to existing service arrangements including the upgrade or downgrade of access/port speed, installation of new service, or moves to different service addresses.

18. Network Management Services (Cont'd)

18.1 Network Reconfiguration Service^{/1/} (Cont'd)

18.1.5 Rate Regulations (Cont'd)

(A) Rate Element Descriptions (Cont'd)

(2) Database Modification Charge

This charge applies (per customer contact, or request) each time the customer requests a subsequent modification of its database. A modification can be an addition or deletion of circuits terminating on the cross-connect system, or a rearrangement of the database, e.g., an outside move, a change in the signaling characteristics of a circuit (e.g., from data to voice), a rearrangement of the customer's routing priority between nodes, virtual port establishment, etc.

/1/ Effective December 5, 2018, Network Reconfiguration Service (NRS) will no longer be available for purchase by new or existing customers, and NRS service agreements may no longer be renewed. Effective July 31, 2022, the Telephone Company will no longer accept new requests for physical changes to existing service arrangements including the upgrade or downgrade of access/port speed, installation of new service, or moves to different service addresses.

18. Network Management Services (Cont'd)

18.1 Network Reconfiguration Service^{/1/} (Cont'd)

18.1.5 Rate Regulations (Cont'd)

(A) Rate Element Descriptions (Cont'd)

(3) Port Charges

Port Charges apply per port termination on the cross-connect system. There are three types of charges:

- Subtending Port Charge - applies per subtending channel port termination for all Special Access services (64 kbps and below or 45 Mbps service) per circuit on the cross-connect system.
- 1.544 Mbps Port Charge - applies for 128 kbps - 1.544 Mbps channel port termination per circuit on the cross-connect system.
- 45 Mbps Port Charge - applies for 45 Mbps channel port termination per circuit on the cross-connect system.

Two Port Charges apply per circuit connecting 2 Network Reconfiguration Hubs or 2 cross-connect systems within the same Network Reconfiguration Hub (with one Port Charge applying at each termination of the circuit).

/1/ Effective December 5, 2018, Network Reconfiguration Service (NRS) will no longer be available for purchase by new or existing customers, and NRS service agreements may no longer be renewed. Effective July 31, 2022, the Telephone Company will no longer accept new requests for physical changes to existing service arrangements including the upgrade or downgrade of access/port speed, installation of new service, or moves to different service addresses.

18. Network Management Services (Cont'd)

18.1 Network Reconfiguration Service^{/1/} (Cont'd)

18.1.5 Rate Regulations (Cont'd)

(A) Rate Element Descriptions (Cont'd)

(4) Reconfiguration Charges

Full 45 Mbps or 1.544 Mbps bandwidth, sub 45 Mbps or 1.544 Mbps bandwidth, contiguous subtending channel groupings (up to and including all 24 subtending channels within a 1.544 Mbps service), contiguous 1.544 Mbps service groupings (up to and including all 28 1.544 Mbps services within a 45 Mbps service), or individual subtending channel or 1.544 Mbps service arrangements are as specified by the customer. This specification limits the parameters within which the service can be reconfigured and defines how reconfiguration charges will apply. If reconfiguration is at the subtending channel, 1.544 Mbps or 45 Mbps level, one reconfiguration charge applies per subtending channel, 1.544 Mbps service or 45 Mbps circuit reconfigured; if reconfiguration is for a previously defined contiguous group of subtending channels, one reconfiguration charge applies per group of DS0s reconfigured; etc. One reconfiguration charge applies per cross-connect and/or disconnect successfully completed in a DCS per request.

There are two types of reconfiguration charges:

- For individual reservation or demand request performed by the customer, or for each segment of a model request performed by the customer or Telephone Company.
- For individual reservation or demand requests performed by the Telephone Company at the customer's request.

/1/ Effective December 5, 2018, Network Reconfiguration Service (NRS) will no longer be available for purchase by new or existing customers, and NRS service agreements may no longer be renewed. Effective July 31, 2022, the Telephone Company will no longer accept new requests for physical changes to existing service arrangements including the upgrade or downgrade of access/port speed, installation of new service, or moves to different service addresses.

18. Network Management Services (Cont'd)

18.1 Network Reconfiguration Service^{/1/} (Cont'd)

18.1.5 Rate Regulations (Cont'd)

(A) Rate Element Descriptions (Cont'd)

(4) Reconfiguration Charges (Cont'd)

For example, if a customer wishes to reconfigure a circuit that is routed through two NRS Hub offices (the existing circuit being routed between customer premises A through the two NRS Hub offices to customer premises B, and the customer wishes to reconfigure the circuit to be rerouted between customer premises A through the two NRS Hub offices to customer premises C), two transactions would occur: one transaction to disconnect the circuit between premises A and B, and one transaction to reconnect the circuit between premises A and C. The customer would be billed four NRS charges: two for disconnecting the circuit (one for each disconnect at each NRS Hub), and two for reconnecting the circuit (one for each reconnect at each NRS Hub).

/1/ Effective December 5, 2018, Network Reconfiguration Service (NRS) will no longer be available for purchase by new or existing customers, and NRS service agreements may no longer be renewed. Effective July 31, 2022, the Telephone Company will no longer accept new requests for physical changes to existing service arrangements including the upgrade or downgrade of access/port speed, installation of new service, or moves to different service addresses.

18. Network Management Services (Cont'd)

18.1 Network Reconfiguration Service^{/1/} (Cont'd)

18.1.5 Rate Regulations (Cont'd)

(B) Application of Rates

When Network Reconfiguration Service is used in conjunction with Special Access or MegaLink Custom services, the appropriate regulations, rates and charges as set forth in Part 12, Sections 7 and 20 will apply in addition to charges as set forth in 18.1.6:

- One Channel Termination (CT) applies between the customer premises and serving wire center.
- Channel Mileage or Interoffice Mileage, if applicable, applies between the serving wire center and the Telephone Company Network Reconfiguration Hub, or between two Network Reconfiguration Hubs.

Nonrecurring charges, as set forth in Part 12, Sections 7 and 20, are also applicable when existing channels must be reterminated in a Network Reconfiguration Port to provide Network Reconfiguration Service. When an existing DS3 circuit is reterminated in a Network Reconfiguration Port, termination charges as set forth in Part 12, Section 20, paragraphs 20.4.5 (Minimum Service Periods), 20.4.6 (Termination Charges) and 20.4.12(B) (Moving Customer Premises), will only apply to the Optional Features, BSEs and Functions associated with the reterminated DS3 circuit. Termination charges will not apply to Channel Terminations and Interoffice Mileage associated with the reterminated DS3 circuit when the DS3 end points involved do not change.

When a new or existing High Capacity Term Pricing Plan (HC-TPP) customer subscribes to or has a 3 or 5 year HC-TPP, as described in Part 12, Section 7, paragraph 7.2.10 (High Capacity Term Pricing Plan (HC-TPP) and requests an associated NRS with that HC-TPP DS1 circuit terminating on the NRS, NRS recurring rates and nonrecurring charges associated with the Service Establishment Charge, 1.544 Mbps Port Charge and the Database Modification Charge, will apply.

/1/ Effective December 5, 2018, Network Reconfiguration Service (NRS) will no longer be available for purchase by new or existing customers, and NRS service agreements may no longer be renewed. Effective July 31, 2022, the Telephone Company will no longer accept new requests for physical changes to existing service arrangements including the upgrade or downgrade of access/port speed, installation of new service, or moves to different service addresses.

 SWC = Serving Wire Center

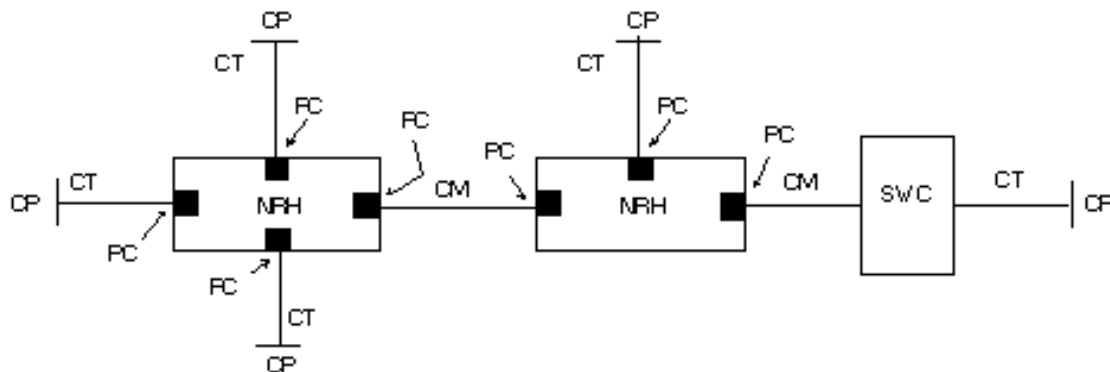

/1/ Effective December 5, 2018, Network Reconfiguration Service (NRS) will no longer be available for purchase by new or existing customers, and NRS service agreements may no longer be renewed. Effective July 31, 2022, the Telephone Company will no longer accept new requests for physical changes to existing service arrangements including the upgrade or downgrade of access/port speed, installation of new service, or moves to different service addresses.

18. Network Management Services (Cont'd)

18.1 Network Reconfiguration Service (Cont'd)

18.1.6 Reserved for Future Use

19. Self-healing Transport Network⁽²⁾ (Cont'd)19.1 General Description⁽¹⁾

Self-healing Transport Networks (STN) provide for dedicated digital transport from two or more customer specified STN Access Nodes, one of which, at a minimum, must be a Telephone Company central office (CO Access Node). An Access Node is a Telephone Company central office or a customer premises equipped with STN features and functions. The Telephone Company will identify central offices equipped with STN features and functions. For a listing of the Telephone Company offices equipped with STN capabilities, see the National Exchange Carrier Association, Inc., Tariff F.C.C. No. 4.

Rates and charges for Self-healing Transport Network for are set forth in Section 19.4 following, with the exception of the services provided by the Telephone Company in the Metropolitan Statistical Areas (MSAs) in which the Telephone Company has received Phase II pricing flexibility pursuant to Subpart H of Part 69 of the Commission's Rules. The rates and charges for the Self-healing Transport Network in the MSAs that have received Phase II pricing flexibility are set forth in Section 39.

⁽¹⁾ The regulations below are effective December 4, 2012.

For Volume Options 3, 6, 12, and 24, Customers may not purchase additional STN service; however, they may continue to purchase additional Digital Transport Links (DTL's) and directly related elements associated with an existing STN service, subject to existing capacity availability, for the remainder of any Minimum Period. Existing service will be provided according to all applicable rates, terms and conditions for the remainder of any Minimum Period. Upon the expiration of any Minimum Period, service will be provided on a month-to-month basis at the then-applicable month-to-month rate until service is discontinued by the Telephone Company. No new or additional Minimum Period commitments of any kind, including any otherwise available renewals, extensions or renegotiations, will be available. Upon the expiration of any Minimum Period commitment, no move, adds or change orders will be accepted.

For Volume Options 36 and 48, Customers are limited to existing service and quantities at existing locations. The Telephone Company will not accept any requests for additions, partial disconnections, moves, upgrades or changes to STN Volume Options 36 and 48. Customers with existing Volume Options 36 and/or 48 will not be able to add access nodes, reconfigure the ring, or move access nodes. They may continue to add additional Digital Transmission Links (DTLs) and Interfaces at current Tariff rates.

⁽²⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.1 General Description (Cont'd)

STN provides premises-to-premises arrangements or premises-to-hub arrangements for interconnection to other Access Services with transmission speeds of 1.544 Mbps or greater. STNs are characterized by a ring configuration which provides redundant transmission over separate physical facilities. Digital Transmission Links (DTL) interconnect customer selected Access Nodes to form the ring configuration. The DTL is a high capacity channel which delivers the same bandwidth signal at each Access Node in a given STN. The standard Volume Option DTL transport signal is a 44.736 Mbps bandwidth or equivalent. Each DTL will include Network Access Points (NAP) located in customer specified Access Nodes. A NAP designates the point at which a particular DTL may be interconnected with a Premises Access Node or with High Capacity Services or MegaLink Custom Services in a central office Access Node. Only two NAPs, one of which must be located in a Premises Access Node, may be specified for each DTL. The high capacity channel is available for use only at the designated NAPs. STN is equipped with self-healing characteristics, multiplexing capabilities, performance monitoring, and network supervision. Multiplexing may be provided only in a Telephone Company Central office node which has been designated as a Hubbing and Bridging office in the National Exchange Carrier Association, Inc., Tariff F.C.C. No. 4.

In addition to the standard 44.736 Mbps electrical interface, STN also offers the following SONET (Synchronous Optical Network) based Interfaces.

<u>SONET-based Interface</u>	<u>Bandwidth</u>
DS1	1.544 Mbps
EC-1	51.84 Mbps
OC3	155.520 Mbps
OC3c	155.520 Mbps (concatenated)
OC12	622.080 Mbps
OC12c	622.080 Mbps (concatenated)

SONET interfaces are available only where STN is provisioned using SONET-based facilities. Therefore, the SONET-based Interface Options will not be available at those locations. The Telephone Company will notify the customer accordingly when the service is ordered.

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.1 General Description (Cont'd)

Technical specifications for SONET-based Interfaces are contained in the following publications:

 Bellcore Document GR-253-CORE

 Bellcore Document TR-NWT-000496

 Bellcore Document GR-1374-CORE

 American National Standard, ANSI T1.105-1991

 American National Standard, ANSI T1.102-1993

In the event of a single facility failure or single Access Node failure on a given ring, STN will restore transmission within an engineered objective of 50 milliseconds, not to exceed 2.5 seconds. For a single facility failure, 100% of the STN transmission will be restored within 2.5 seconds. The loss of an Access Node will result in the restoration of the transmission of the total STN ring minus the failed Access Node transmission.

The STN architecture is designed to permit rearrangement of NAPs and/or Multiplexers as set forth in Section 19.3.2.

DTLs, Optional SONET-based Interfaces, Multiplexers and Access Nodes may be added to existing STN service.

The Telephone Company will meet or exceed the specified acceptance and maintenance parameters set forth for STN Services in Southwestern Bell Technical Publication 76635 and for SONET-based Interfaces in Southwestern Bell Technical Publication 76839.

There are five basic rate categories which apply to STN. Three of the rate categories apply based on the DTL Volume Option selected; the other two rate categories apply to STN, independent of the DTL Volume Option selected by the customer.

The three basic rate categories which apply on a DTL Volume Option basis are Basic Configuration, Additional Access Node and Additional DTL. The Basic Configuration rate category provides for the appropriate number of Access Nodes equipped with the number of DTLs in the customer selected DTL Volume Option. The Additional Access Node rate category provides for any quantity of Access nodes in addition to the Basic Configuration. The Additional DTL rate category provides for any quantity of DTLs required by the customer over and above those included in the DTL Volume Option selected by the customer. Additional DTLs are provided on both a Basic Configuration and an Additional Access Node basis. The SONET-based Interfaces (DS1, EC-1, OC3c, OC12) provide for the circuit card plug-in units and fiber-optic terminal multiplexing equipment (if required) to convert the optical carrier (OC) signal to the bandwidth that corresponds with the interface as specified in the preceding table.

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.1 General Description (Cont'd)

The two basic rate categories that apply to STN, independent of the selected DTL Volume Option are Transport and Optional Features and Functions. The Transport rate category provides for the transmission facilities between the Access Nodes. The Optional Features and Functions rate category provides for optional features and functions which may be added to an STN to improve its quality or utility to meet specific communications requirements. There are three types of Optional Features and Functions available to STN; Multiplexing, SecureNet Interconnection, and SONET-based Interface Options. The Optional Features and Functions rate categories are detailed as follows:

The Multiplexing rate category provides for an arrangement that converts a standard DTL (44.736 Mbps) into 28 (1.544 Mbps) channels using digital time division multiplexing at the Central Office.

The SecureNet Interconnection with High Capacity DS1 Services rate category provides for interconnection with High Capacity DS1 Services equipped with the SecureNet Hub Redundancy feature (Option 1) as set forth in 7.3.10(E)(6)(a) (Hub Redundancy) preceding. Because SecureNet is only provisioned via specific pairs of Telephone Company central offices, interconnection of STN and High Capacity Services equipped with SecureNet Option 1 requires that the customer must designate both SecureNet offices as STN Access Nodes.

This SecureNet Interconnection will be available only on the standard DTL (44.736 Mbps) interface, not on SONET-based interfaces.

The STN Interconnection with SecureNet Equipped MegaLink Custom Service rate category provides for interconnection of an STN with MegaLink Custom Services equipped with the SecureNet Serving Wire Center and Facility Redundancy feature as set forth in 20.2.2(B) (Serving Wire Center and Facility Redundancy) following.

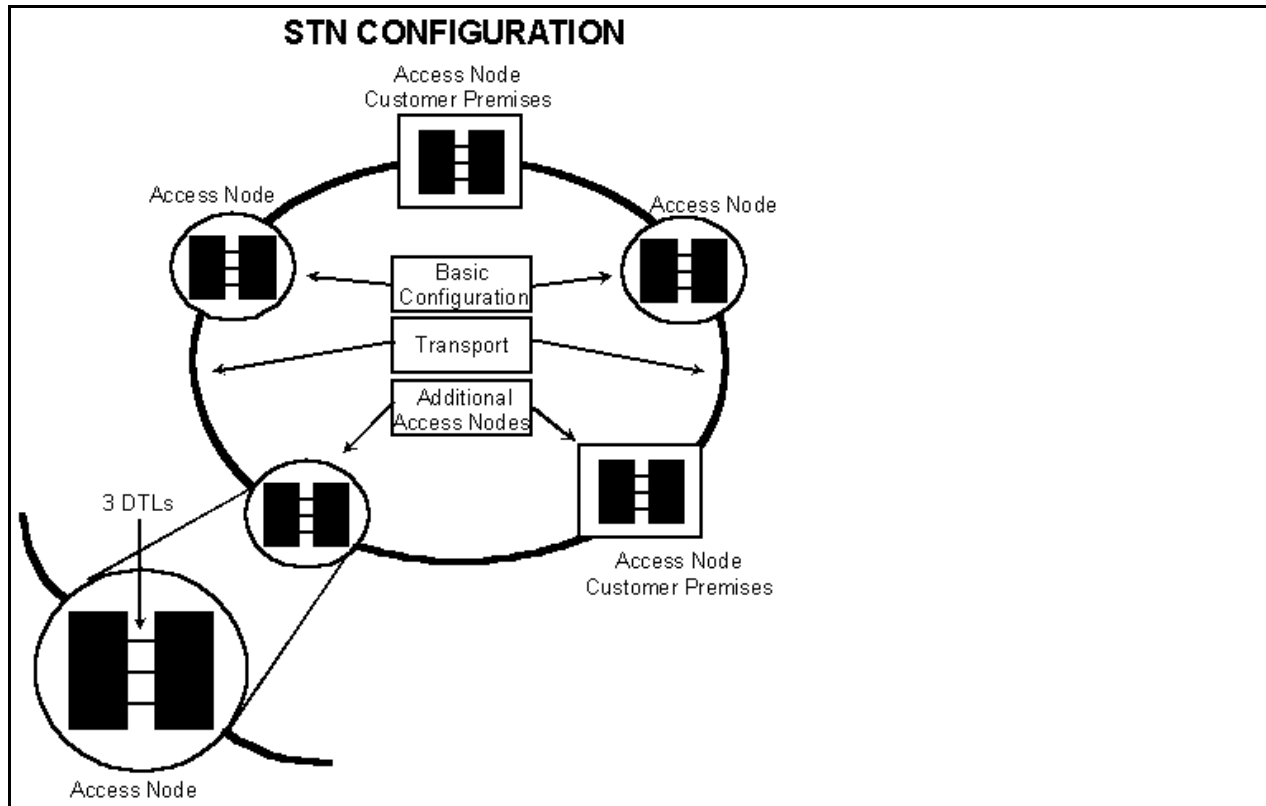

In addition, other service specific charges and nonrecurring charges may apply as specified in Section 19.3 (Rate Regulations).

Ordering and billing provisions as set forth in 2.6 (Jointly Provided Access Services) will apply when more than one Exchange Telephone Company is involved when those telephone companies have agreed upon facilities and terms and conditions of the jointly provided service.

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.1 General Description (Cont'd)

The following diagram depicts an STN configuration transversing five Access Nodes:

This configuration depicts an STN arrangement using the Basic Configuration equipped with DTL Volume Option 3 which includes three Access Nodes and three DTLs, plus two Additional Access Nodes.

- Basic Configuration (described in Section 19.3.1(A) (1))
- DTL Volume Option (described in Section 19.3.1(A))
- Additional Access Nodes (described in Section 19.3.1(A) (2))

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.2 Service Provisioning19.2.1 Testing(A) Acceptance Testing

At the time STN services are installed and at no additional charge, the Telephone Company will, at the customer's request, cooperatively test STN as specified in Technical Publication 76635, and for SONET-based Interfaces in Technical Publication 76839.

(B) Testing Capabilities

In addition to the above tests, Additional Cooperative Acceptance Testing to test other parameters not defined in Technical Publication 76635 or 76839 is available at the customer's request. Charges as defined in Section 13.4.9 (Testing Service for Special Access and Self-Healing Transport Network) will apply. All test results will be made available to the customer upon request.

19.2.2 Design Layout Report

At the request of the customer, the Telephone Company will provide to the customer the makeup of the facilities and services provided under this tariff as STN to aid the customer in designing its overall service. This information will be provided in the form of a Design Layout Report. The Design Layout Report will be provided to the customer at no charge, and will be reissued or updated whenever these facilities are materially changed.

19.2.3 Special Construction

Where facilities and equipment do not exist or are not available, Special Construction charges, as set forth in Section 5.2.6(C) preceding, may apply.

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

19. Self-healing Transport Network⁽²⁾ (Cont'd)19.3 Rate Regulations

This section contains specific regulations governing the rates and charges for STN.

Effective November 1, 2017, Competitive Counties and Non-Competitive Counties have been established and are defined in Section 2.7 and the wire centers within such counties are listed in Sections 15.2(C) and (D).

For all rate elements in Section 19, price flex rates and charges, as provided in Section 39.5.2, apply, subject to service availability,⁽¹⁾ regardless of whether the county is Competitive or Non-Competitive.

If the Telephone Company initiates rate changes resulting in a decrease of rates for an existing service with a 3 or 5 year billing period, those rate changes will be passed along to the customer. Rate changes resulting in an increase of rates for an existing 3 or 5 year billing period will not exceed the original rate for that selected bill period. Rate changes may occur as a result of F.C.C. action.

Other Access Services used in conjunction with STN are governed by specific regulations and applicable rates and charges set forth in other sections of this tariff unless otherwise noted herein.

19.3.1 Rate Categories

There are five basic rate categories which apply to STN. There are three rate categories that apply on a DTL Volume Option basis. These rate categories may not be intermixed between different Volume Options on a particular STN. Two rate categories apply to STN, independent of the DTL Volume Option selected by the customer.

(A) DTL Volume Option-Based Rate Categories

The three basic rate categories which apply on a DTL Volume Option basis are as follows:

- Basic Configuration
- Additional Access Node
- Additional DTL

⁽¹⁾ See Footnote 1 on Page 19.3.

⁽²⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.3 Rate Regulations (Cont'd)19.3.1 Rate Categories (Cont'd)(A) DTL Volume Option Rate Categories (Cont'd)(1) Basic Configuration

The Basic Configuration rate category provides for the following Access Nodes equipped with the number of DTLs in the customer selected DTL Volume Option:

<u>DTL Volume Option</u>	<u>Number of Access Nodes</u>
3	3
6	4
12	4
24	5
36	5
48	5

(2) Additional Access Node

The Additional Access Node rate category provides for any quantity of Access Nodes in addition to the Basic Configuration.

(3) Additional DTL

The Additional DTL rate category provides for any quantity of DTLs required by the customer over and above those included in the DTL Volume Option selected by the customer. Additional DTLs are provided on both a Basic Configuration and an Additional Access Node basis.

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.3 Rate Regulations (Cont'd)19.3.1 Rate Categories (Cont'd)(B) STN Rate Categories

The two basic rate categories that apply to STN, independent of selected DTL Volume Option are as follows:

(1) Transport

The Transport rate category provides for the transmission facilities between the Access Nodes.

(2) Optional Features, BSEs and Functions

The Optional Features, BSEs and Functions rate category provides for the following optional features, BSEs and functions which may be added to an STN to improve its quality or utility to meet specific communications requirements:

(a) Central Office Multiplexing BSE

The Multiplexing rate category provides for an arrangement that converts a standard DTL (44.736 Mbps) at an Access CO node into 28 (1.544 Mbps) channels using digital time division multiplexing.

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.3 Rate Regulations (Cont'd)19.3.1 Rate Categories (Cont'd)(B) STN Rate Categories (Cont'd)(2) Optional Features, BSEs and Functions (Cont'd)(b) SecureNet Interconnection of High Capacity DS1 Service

The SecureNet rate category provides for interconnection with High Capacity DS1 Service equipped with the SecureNet Hub Redundancy feature as set forth in 7.3.10(E)(6)(a) (Hub Redundancy) preceding.

(c) STN Interconnection with SecureNet Equipped MegaLink Custom Service

This rate category provides for interconnection of an STN with MegaLink Custom Service equipped with the SecureNet Serving Wire Center and Facility Redundancy feature as set forth in 20.2.2(B) (Serving Wire Center and Facility Redundancy) following.

(d) C-Bit Parity Framing Format Option

C-Bit Parity Framing Format Option (C-Bit) allows customers to specify the C-Bit format rather than using the standard M13 multiplex format interface. C-Bit allows DS3 framing bits to be rearranged for additional performance monitoring capabilities by the customer. The performance monitoring capability is inherent to the customer's CPE. The Telephone Company does not monitor the C-Bits for performance or any other purpose.

When C-Bit is ordered with new STN service, the C-Bit nonrecurring charge does not apply. When C-Bit option is requested for existing STN service, a nonrecurring charge will apply as set forth in Section 19.4 following.

C-Bit Parity Framing Format is not available when multiplexing is utilized on the DTL as described in Section 19.1.

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.3 Rate Regulations (Cont'd)19.3.1 Rate Categories (Cont'd)(B) STN Rate Categories (Cont'd)(2) Optional Features, BSEs and Functions (Cont'd)(e) SONET-based Interface Options

The SONET-based Interface Option provides the circuit or channel card plug-in units and fiber-optic terminal multiplexing equipment (if required) to convert the optical carrier signal to the bandwidth that corresponds with the interface as specified in Section 19.1.

STN Volume Option	-----Interface (Port)-----					
	DS1	EC-1	OC3	OC3c	OC12	OC12c
3	X	X				
6	X	X	X	X		
12	X	X	X	X	X	X
24	X	X	X	X	X	X
36	X	X	X	X	X	X
48	X	X	X	X	X	X

If the customer elects a DS1 interface at any STN node, the first DS1 interface ordered will dedicate an entire DTL. This DTL will then accommodate up to 27 additional DS1 interfaces (total of 28 DS1s per DTL).

If the customer elects an EC-1 interface, this interface is the sole interface of that particular DTL.

If the customer elects an OC3 interface, this interface utilizes (3) three DTLs of bandwidth capacity.

If the customer elects an OC3c interface, this is a concatenated signal which cannot be demultiplexed into a lower capacity. The OC3c interface utilizes (3) three DTLs of bandwidth capacity.

If the customer elects an OC12 interface, this interface utilizes (12) twelve DTLs of bandwidth capacity.

If the customer elects an OC12c interface, this is a concatenated signal which cannot be demultiplexed into a lower capacity. The OC12c interface utilizes (12) twelve DTLs of bandwidth capacity.

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.3 Rate Regulations (Cont'd)19.3.1 Rate Categories (Cont'd)(B) STN Rate Categories (Cont'd)(2) Optional Features, BSEs and Functions (Cont'd)(e) SONET-based Interface Options (Cont'd)

Rates and charges for SONET-based Interface Options, as shown following in Section 19.4, are applied in addition to any other applicable STN rate element rates and charges such as for Basic Configuration, Additional Access Nodes, Additional DTLs, etc.

Table A, following, represents the possible point-to-point interface combinations available for STN SONET-based Interface Options.

TABLE A

Network Access Point (NAP) SONET Based Interface Combinations

	NAP B							
		DS1 ⁽²⁾	DS3	EC-1	OC3	OC3C	OC12	OC12c
NAP A	DS1 ⁽²⁾	X	X ⁽¹⁾	X ⁽³⁾	X		X	
	DS3	X ⁽¹⁾	X	X	X		X	
	EC-1	X ⁽³⁾	X	X	X		X	
	OC3	X	X	X	X		X	
	OC3C					X	X	
	OC12	X	X	X	X	X	X	
	OC12c							X

- ¹ This option is via the conventional Central Office Hub multiplexing and standard DTL. DS1 interfaces do not apply.
- ² If the DS1 interface on one NAP is derived from SONET technology, the interface on the opposite NAP, if not a DS1 interface, must be a SONET signal (OC3, OC12).
- ³ As of December 29, 2009, this option is no longer available.

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.3 Rate Regulations (Cont'd)19.3.2 Nonrecurring Charges*

Nonrecurring charges are one-time charges that apply for a specific work activity (e.g., installation or change to an existing service). Nonrecurring charges are applicable for initial and subsequent installation of service, service rearrangements and NAP Rearrangement.

(A) Nonrecurring Charges for Installation of Service

There are two types of nonrecurring charges for Installation of Service: Initial and Subsequent. These nonrecurring charges apply to STN components and apply to selected STN rate elements on a first and additional basis.

(1) Initial

Initial nonrecurring charges apply for the installation of the Basic Configuration, and any Additional Access Nodes and Additional DTLs when STN service is first established.

(2) Subsequent

Subsequent nonrecurring charges apply when the customer requests to modify an existing STN service by adding Access Nodes or additional DTLs after the initial Service Order.

(B) Nonrecurring Charges for Service Rearrangements

Nonrecurring charges apply for Service Rearrangements or changes. Service Rearrangements are changes to existing services which do not result in either a change in the Minimum Period requirements as set forth in 19.3.5 following or a change in the physical location of the point of termination at the customer's premises or the customer's end user's premises. A change in service arrangement is a change in the physical location of the Point of Termination at the customer designated premises as set forth in 19.3.7 following.

* For Services ordered under MVP, refer to Section 38.3(E) (5).

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.3 Rate Regulations (Cont'd)19.3.2 Nonrecurring Charges (Cont'd)(B) Nonrecurring Charges for Service Arrangements (Cont'd)

Changes which result in the establishment of a new minimum period are treated, with the exception of Minimum Period Upgrades (19.3.10), as a discontinuance of the existing service and an installation of a new service and all applicable nonrecurring charges will apply. Changes in the physical location of the point of termination are treated as moves and are described and charged for as specified in 19.3.7 (Moves).

A nonrecurring charge will apply per DTL on a first and additional basis for the following change or combination of changes requested by the customer on the same Access Order and will be charged as set forth in 19.4(C) (2).

- Change of Access Carrier Name Abbreviation (ACNA)
- Change of Billing Account Number (BAN)
- Change of customer Circuit Identification (CKR)

The customer requesting administrative service rearrangements will be responsible for all billing associated with the changes requested.

When a change of customer name and change in billing data (name, address, contact name, or telephone number) are requested in association with a change in the customer of record, the Access Order Charge will apply as set forth in Section 5.4(A) (Access Order Charge) preceding.

(C) Nonrecurring Charge for NAP Rearrangement

A nonrecurring charge will apply for customer requested rearrangements of a NAP to another STN Access Node on the same STN Volume Option as set forth in 19.4 following.

(D) Nonrecurring Charge for Basic Configuration

A nonrecurring charge as set forth in 19.4 following also applies.

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.3 Rate Regulations (Cont'd)19.3.2 Nonrecurring Charges (Cont'd)(E) Nonrecurring Charge for Additional Access Node

A nonrecurring charge applies on a per node basis as set forth in 19.4 following. The nonrecurring charge will be applied depending on whether the Access Node is a central office or a customer premises.

(F) Nonrecurring Charge for Additional DTL

A nonrecurring charge is applied for the first DTL on the initial service order and for each additional DTL placed on the same order.

A nonrecurring charge is also applicable for a subsequent DTL placed on an order following the initial Service Order. A different nonrecurring charge is applicable for each subsequent additional DTL placed on the same order.

(G) Nonrecurring Charge for Optional Features and Functions(1) Multiplexer

A nonrecurring charge will be applied for the installation of each Multiplexer; additionally, a nonrecurring charge will apply for each multiplexer relocation required by the customer during the Minimum or Optional Renewal Period.

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.3 Rate Regulations (Cont'd)19.3.2 Nonrecurring Charges (Cont'd)(G) Nonrecurring Charge for Optional Features and Functions (Cont'd)(2) SecureNet Interconnection of High Capacity DS1 Service

A nonrecurring charge is applicable for the interconnection of each DTL in a given STN arrangement with High Capacity DS1 Service equipped with the SecureNet Hub Redundancy feature as set forth in 7.3.10(E)(6)(a) (Hub Redundancy) preceding.

(3) STN Interconnection with SecureNet Equipped MegaLink Custom Service

A nonrecurring charge is applicable for the interconnection of each DTL in a given STN arrangement with a MegaLink Custom Service equipped with the SecureNet Serving Wire Center and Facility Redundancy feature as set forth in 20.5.3(D) (STN Interconnection with SecureNet Equipped MegaLink Custom Service) following.

(4) SONET-based Interface Options

A nonrecurring charge is applicable on a per node, first and additional basis for each SONET-based Interface Option. If multiples of the same type Interface option are ordered on the same access order, the first Interface option is assessed the "first" nonrecurring charge and each additional is assessed the "additional" installation charge. These nonrecurring charges are applicable in addition to all other STN nonrecurring charges (e.g. Basic Configuration, Additional Access Nodes, Additional DTLs, etc).

(5) C-Bit Parity Framing Format Option

A nonrecurring charge is applied on a per DTL first and additional basis when the option is added to an existing STN.

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.3 Rate Regulations (Cont'd)19.3.3 Monthly Recurring Rates

Monthly rates are recurring charges that apply each month that the service is provided and are specific to the Minimum Period selected by the customer.

Except for the Transport rate element and any STN Optional Features and Functions selected, the DTL Volume Option selected by the customer will dictate the basic rates that will apply throughout the selected Minimum Period and any Optional Renewal Periods.

(A) Monthly Recurring Rate for Basic Configuration

One Basic Configuration monthly recurring rate will apply for each STN arrangement, specific to the DTL Volume Option selected by the customer.

(B) Monthly Recurring Rate for Additional Access Node

A monthly recurring rate specific to the DTL Volume Option selected by the customer is applied on a per node basis to add Access Nodes to the Basic Configuration.

(C) Monthly Recurring Rate for Additional DTL

A monthly recurring rate specific to the DTL Volume Option selected by the customer is applied to add DTLs to the selected DTL Volume Option. The rate is applied when an Additional DTL is added to the Basic Configuration. A different monthly recurring rate is applied if an Additional DTL is added to an Additional Access Node. Example below illustrates a typical application of the Additional DTL rate element.

Example:

Customer has existing a V.O. 3 DTL STN under a 60 Month Minimum Period. The STN has 5 Access Nodes (3 with the Basic Configuration and 2 Additional Access Nodes). Customer desires to add 3 Additional DTLs to this arrangement.

<u>Existing Arrangement</u>	<u>Monthly Rate</u>
Basic Config (1)	= \$ 4,484.00
Addtl Access Node (2)	= <u>4,354.00</u>
Total	= \$ 8,838.00

New Arrangement (w/Addtl DTLs)

Basic Config	= \$ 4,484.00
Addtl Access Node (2)	= <u>4,354.00</u>
Addtl DTL to Basic Config (3)	= <u>3,300.00</u>
Addtl DTL to A.A. Nodes (3) x (2)	= <u>1,110.00</u>
Total	= \$13,248.00

(D) Monthly Recurring Rate for Transport

The monthly recurring Transport rate applies on a per mile basis to each STN arrangement. This charge is applied to the airline mileage measured between Access Nodes as set forth under regulations for Determining Transport Mileage, 19.3.4 following.

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022.
(Ref: WC Docket Nos. 09-185 and 11-179)

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.3 Rate Regulations (Cont'd)19.3.3 Monthly Recurring Rates (Cont'd)(E) Monthly Recurring Rates for Optional Features, BSEs and Functions(1) Central Office Multiplexing BSE

A monthly recurring rate is applicable on a per multiplexer basis. Multiplexer additions are permitted anytime throughout the Minimum or Optional Renewal Period, subject to the regulations set forth in 19.3.9 following. The monthly recurring rate for a multiplexer is set forth in Section 19.4 following.

(2) SecureNet Interconnection of High Capacity DS1 Service

A monthly recurring rate is applicable for the interconnection of each DTL in a given STN arrangement with High Capacity Service equipped with the SecureNet Hub Redundancy feature as set forth in 7.3.10(E)(6)(a) (Hub Redundancy) preceding. The monthly recurring rate is set forth in Section 19.4 following.

(3) STN Interconnection with SecureNet Equipped MegaLink Custom Service

A monthly recurring rate is applicable for the interconnection of each DTL in a given STN arrangement with MegaLink Custom Service equipped with the SecureNet Serving Wire Center and Facility Redundancy feature as set forth in 20.2.2(B) (Serving Wire Center and Facility Redundancy) following. The monthly recurring rate is set forth in Section 20.5.3(D) following.

(4) SONET-based Interface Options

A monthly recurring rate is applicable for Interface Options, bandwidths other than 44.736 Mbps which is standard for STN service. SONET-based Interface Options are available in DS-1, EC-1, OC3, OC3c, OC12, and OC12c bandwidths. The recurring rate is applicable on a per access node, per interface basis and are set forth in Section 19.4 following and is applicable in addition to all other STN recurring rates (e.g. Basic Configuration, Additional Access Nodes, Additional DTLs, etc.)

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.3 Rate Regulations (Cont'd)19.3.4 Determining Transport Mileage

The mileage to be used to determine the monthly rate for Transport is calculated based on the sum of the airline distance between customer designated Access nodes in a given STN service arrangement and rounded to the next higher mile. The Telephone Company will provide the customer with the ring topology and airline distances between the Access Nodes associated with the requested STN service arrangement. The Telephone Company will utilize the V&H coordinates method, as set forth in the National Exchange Carrier Association, Inc. Tariff F.C.C. No. 4.

19.3.5 STN Minimum Period

STN is provided for a Minimum Period of 36 or 60 months, at the customer's option. Minimum period regulations are contained in Section 2.5.4 (Minimum Periods).

19.3.6 Recast of Minimum Period

When a customer elects to recast (i.e., change) an STN Minimum period and no physical work is required, the nonrecurring charges as set forth in 19.3.2 preceding will not apply.

When a customer elects to recast an STN Minimum Period and physical work is required, only the applicable nonrecurring charges for the work being done will apply.

Nonrecurring charges as set forth in Section 5 (Ordering for Access Service) preceding which may be associated with ordering STN will apply.

19.3.7 Moves(A) Moves within a Customer's Premises

A move involves a change in the physical location of the Point of Termination on the customer's premises.

Such moves will be treated as an extension of STN facilities. Extension of STN facilities will be provided, at the customer's request, on a time-sensitive charge basis. The labor rates which apply are as set forth in Section 13.4 (Rates and Charges) preceding. There will be no change in Minimum Period requirements.

(B) Moves of STN Access Nodes

Moves of STN Access Nodes will be provided, at the customer's request, on a time-sensitive charge basis. The charge will not exceed the subsequent nonrecurring charge for an Additional Access Node, as specified in Section 19.4, for the specific STN Volume Option being modified. The labor rates which apply are as set forth in Section 13.4, (Rates and Charges) preceding. No change in billing period is required.

Termination charges will not apply to moves of STN Access Nodes.

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.3 Rate Regulations (Cont'd)19.3.8 Additions of Service(a) Service Established After August 29, 1993

The customer may elect to add service at any time subsequent to the initial installation of STN. All appropriate rate elements apply.

Subsequent service additions are for a given STN arrangement and are coterminous with the Minimum Period and are subject to all applicable STN terms and conditions.

(b) Service Established Prior to and including August 29, 1993

The customer may elect to add DTLs, Access Nodes and Multiplexers at any time subsequent to the initial installation of STN. The monthly recurring rate for each such subsequent addition is determined by the application of the appropriate annual multiplier set forth in Table A, following, to the rate in effect at the time the service is initially established.

TABLE A

Minimum or Optional Renewal Period Months	36 Month Multiplier	60 Month Multiplier
0	1.00	1.00
1 - 12	1.10	1.03
13 - 24	1.15	1.06
25 - 36	1.20	1.10
37 - 48	1.25	1.15
49 - 60	1.25	1.20
61 - Above	1.25	1.25

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.3 Rate Regulations (Cont'd)19.3.8 Additions of Service (Cont'd)(b) Service Established Prior to and including August 29, 1993 (Cont'd)

EXAMPLE:

The customer elects to add one Additional DTL, one Additional Access Node and one Multiplexer in the 37th month of a 60 month Minimum Period. The monthly billing in effect for the initial establishment of the STN is \$11,896.

To determine the monthly rate for the subsequent addition of the DTLs, Access Node and multiplexers

		Multiplier
1 Additional DTL (Basic Configuration)	\$3,965.00	$\times 1.15 = \$ 4,559.75$
1 Additional DTL (Additional Access Node)	1,243.00	$\times 1.15 =$
1,429.45		
1 Additional Access Node	3,730.00	$\times 1.15 =$
4,289.50		
1 Multiplexer	887.50	$\times 1.15 =$
	<u>1,020.62</u>	
		TOTAL
	\$11,299.32	

Total billing for the STN arrangement in this example would be calculated as follows:

$$\$11,896.00 + \$11,299.32 = \$23,195.32$$

Subsequent service additions are for a given STN arrangement and are coterminous with the Minimum Period and are subject to all applicable STN terms and conditions.

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.3 Rate Regulations (Cont'd)19.3.9 Optional Renewal Periods

Upon completion of a 36 or 60 month term, Minimum Period the customer may elect to:

1. Sign a new 36 or 60 month STN agreement; or
2. Annually renew the STN for up to five (5) one-year periods; or
3. Terminate STN under provisions in Section 19.3.15 following; or
4. Continue on a month-to-month arrangement at the last month's charges as set forth in 19.4 following.

If the customer elects to annually renew, the monthly recurring charges for each of the Optional Renewal Periods will be the customer's monthly recurring charges at the conclusion of the immediately preceding Minimum Period or Optional Renewal Period and modified by the following table:

Optional Renewal	
<u>Year</u>	<u>Multiplier</u>
1	.90
2	.95
3	.95
4	.95
5	.95

EXAMPLE

Assume the customer has a monthly recurring charge of \$42,670.50 and elects to renew for a one-year period for each of the next two consecutive years. The monthly recurring charge in this example would be calculated as follows:

Year

1	\$42,670.50 x .90 = \$38,403.45
2	\$38,403.45 x .95 = \$36,483.27
3	36,483.27 x .95 = \$34,659.11
4	\$34,659.11 x .95 = \$32,926.15
5	\$32,926.15 x .95 = \$32,279.84

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.3 Rate Regulations (Cont'd)19.3.10 Upgrades

There are two types of Upgrades available for STN customers. Volume Option Upgrades and Minimum Period Upgrades as follows:

(A) Volume Option Upgrades

The STN customer may choose to upgrade a particular STN by increasing to a higher Volume Option configuration (e.g., from V.O. 6 to V.O. 12 or V.O. 12 to V.O. 24, etc.). Charges for this type of upgrade will be dependent on whether the customer, for a particular STN to be upgraded, has added sufficient Additional DTLs to reach the upgrade crossover as defined in the following table.

TABLE C

Exiting STN Volume Option	---Upgrade Crossover (Total DTLs)----					
	VO3	VO6	VO12	VO24	VO36	VO48
3	-	5	9	20	24	30
6	-	-	9	20	24	30
12	-	-	-	20	24	30
24	-	-	-	-	30	30
36	-	-	-	-	-	42
48	-	-	-	-	-	-

If the STN customer has reached the Upgrade Crossover, (as specified on Table C), the upgrade may be done without termination liability or nonrecurring charges, except for the Access Order Charge as set forth in Section 5.4. If the STN customer has not reached the Upgrade Crossover, the upgrade may still be ordered; however, the customer will be subject to nonrecurring charges, in addition to the Access Order Charge, on a time-sensitive basis with no termination charges provided conditions are met as set forth in 19.3.15(A) (1) (e). The charges for this upgrade will not exceed the nonrecurring charge applicable to the target Volume Option Basic Configuration (the higher Volume Option which is being upgraded to). Labor rates for the time-sensitive charges are set forth in Section 13.4 (Rates and Charges) preceding.

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

19. Self-healing Transport Network⁽¹⁾ (Cont'd)

19.3 Rate Regulations (Cont'd)

19.3.10 Upgrades (Cont'd)

(B) Minimum Period Upgrades

The STN customer may choose to upgrade a particular STN 36 Month Minimum Period to a 60 Month Minimum Period.

The only charge for the upgrade will be the normal Access Order charge as specified in Section 5.4. No termination liability will be applied to this upgrade provided conditions are met as set forth in Section 19.3.15(A) (1) (e).

19.3.11 Shared Use

(1) The Company currently plans to discontinue this Service on or after October 15, 2022.
(Ref: WC Docket Nos. 09-185 and 11-179)

19. Self-healing Transport Network⁽¹⁾ (Cont'd)

19.3 Rate Regulations (Cont'd)

19.3.11 Shared Use (Cont'd)

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

19. Self-healing Transport Network⁽¹⁾ (Cont'd)19.3 Rate Regulations (Cont'd)19.3.16 Transitioning from Other Access Services to STN

The customer may, at any time, move other Telephone Company Access Services to an STN service. Charges for the transition will be the nonrecurring charges for the installation of the new STN rate elements as listed in Section 19.4 (Rates and Charges) following, created by the transition. No other charges, such as SFMs (previously known as Rollovers), will be applicable to such transitions. Termination charges, if applicable for the Access Services being transitioned from, will be governed by the relevant Telephone Company tariff sections for the services in questions.

19.3.17 DTL Portability

STN customers have the ability to move (portability) certain DTLs, as specified following, to any other STN within the Telephone Company jurisdictional area without incurring termination liabilities, provided certain conditions are met:

- (1) This portability applies only to STNs of Volume Options 12 and above. This Volume Option limitation applies to both the source STN - STN from which the DTL will be moved, to the target STN - the STN to which the DTL will be moved (e.g., a DTL from a Volume Option 12 STN may not be moved to a Volume Option 6 STN).
- (2) Portability applies only to those DTLs purchased above and beyond the Basic Configuration, i.e., Additional DTLs.
- (3) Portability applies only if the number of months remaining in the target STN's Minimum Period are equal to or greater than the months remaining in the source STN's Minimum Period (e.g., a DTL from an STN with 24 months remaining in the Minimum Period may not be moved to an STN with only 10 months remaining in the Minimum Period).

Under STN Portability the customer's total monthly charges associated with each STN involved in the move (source STN and target STN) will be modified to reflect the higher or lower quantity of DTL's resulting after the move. Due to the restrictions as noted above, no STN total monthly charge will be reduced below that of the Basic Configuration for that particular STN Volume Option.

Charges for the DTL Portability will be the same as the existing NAP Rearrangement charge as listed in Section 19.4 (Rates and Charges) following.

⁽¹⁾ The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)

20. MegaLink Custom Services

20.1 General Description

MegaLink Custom Service is a special access service utilizing DS3 technology to provide dedicated high capacity transport between customer designated premises*, either directly or through a Telephone Company Hub where bridging, multiplexing, Transport Resource Management Service, or Network Reconfiguration Service functions are performed. (Transport Resource Management Service and Network Reconfiguration Service, as set forth in Section 18, work in conjunction with MegaLink Custom Service, allowing customers the ability to reconfigure their circuits.) The DS3 signal provides for the transmission of nominal 44.736 Mbps isochronous serial data. MegaLink Custom Services are provided (1) between two customer designated premises, (2) between a customer designated premises and a Telephone Company Hub Central Office, (3) between a Telephone Company Hub Central Office and a Transport Resource Management Service Hub, (4) between Transport Resource Management Service Hubs at 44.736 Mbps transmission, (5) between Network Reconfiguration Service Hubs at 44.736 Mbps transmission, (6) between a Network Reconfiguration Service Hub and a Transport Resource Management Service Hub at 44.736 Mbps transmission, (7) between a Network Reconfiguration Service Hub and a Telephone Company Hub at 44.736 Mbps transmission, or (8) between a Telephone Company Hub Central Office and a ReliaNet Node, for interconnection with High Capacity Services or other MegaLink Custom Services. MegaLink Custom Services may include Optional Features, BSEs and Functions.

MegaLink Custom Service offers the customer the option of requesting either an electrical or optical interface at their premises. The interface at a Telephone Company Hub Central Office is electrical.

Customers requesting electrical interface will receive an electrical signal with a transmission speed of 44.736 Mbps per channel. Compatible channel interfaces are set forth in Technical Reference Publication TR-INS-000342.

Rates and charges for MegaLink Custom Services are set forth in Section 20.5 following, with the exception of the services provided by the Telephone Company in the Metropolitan Statistical Areas (MSAs) in which the Telephone Company has received Phase II pricing flexibility pursuant to Subpart H of Part 69 of the Commission's Rules. The rates and charges for the Optical Carrier Network (OCN) Point-to-Point Service in the MSAs that have received Phase II pricing flexibility are set forth in Section 39.

*Telephone Company Centrex CO-like switches and Telephone Company Answering Service Concentrators are considered to be customer premises for purposes of administering regulations and rates contained in this tariff.

20. MegaLink Custom Services (Cont'd)20.1 General Description (Cont'd)

Customers requesting an optical interface will receive (an) optical signal(s) at the transmission speed(s) associated with the equivalent number of DS3s requested on the Access Order. The transmission speeds for optical interfaces are stated as approximate multiples of 44.736 Mbps.

Technical specifications for MegaLink Custom Services may be found in the following Technical Reference Publications:

Technical Reference PUB 76625
Technical Reference TR-INS-000342

It is the customer's responsibility to arrange for the Network Channel Terminating Equipment associated with the high capacity channel at the customer's premises.

The four basic rate categories which apply to MegaLink Custom Service are Channel Termination, Interoffice Mileage, Service to Service Through Connect Arrangements and Optional Features and Functions. Channel Termination provides for the communications path between a customer designated premises and the serving wire center for that premises or for the communications path within a building which connects a customer's facilities with a customer designated premises without routing through the serving wire center. Interoffice Mileage provides for the transmission facilities between the serving wire centers associated with two customer designated premises, between a serving wire center and a Telephone Company Hub Central Office or, in the case of a Service Extension, between two Telephone Company Hub Central Offices. The Service to Service Through Connect Arrangement rate category provides for an interconnection of two MegaLink Custom Services or a MegaLink Custom Service and a DTL associated with STN Service in the same Telephone Company Hub Central Office. The Optional Features, BSEs and Functions rate category provides for optional features and functions which may be added to a MegaLink Custom Service to improve its quality or utility to meet specific communications requirements.

Loop Redundancy⁽¹⁾, which provides automatic restoration of the Megalink Custom Service Channel Termination and physical route redundancy between the customer's premises and the customer's serving wire center in the event of a single loop failure, will be provided on Megalink Custom Channel Terminations in those situations where the customer's premises and serving wire center are equipped with the necessary equipment and facilities. If the equipment and facilities are not available, the interval for loop redundancy will be within 2 years from the date of customer request or the agreed upon date if Special Construction applies.

- (1) As of the effective date of the tariff, by the end of 1997, all but 100 of the current MegaLink Custom lines in SWBT territory will be served from wire centers providing Loop Redundancy (with basic DS3 service).

20. MegaLink Custom Services (Cont'd)20.1 General Description (Cont'd)

The following describes the service configurations available for MegaLink Custom Service.

Customer Designated Premises to Telephone Company Hub Central Office

Electrical Interface

This service configuration provides electrical DS3 signals at the customer designated premises and the Telephone Company Hub Central Office.

Example:

Optical Interface

This service configuration provides optical signals at the customer designated premises and electrical DS3 signals at the Telephone Company Hub Central Office.

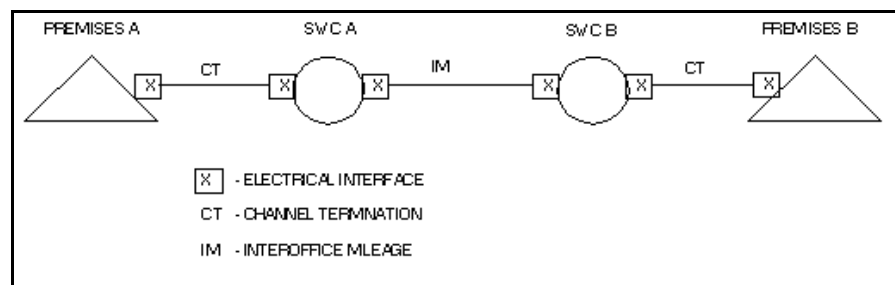

Example:

20. MegaLink Custom Services (Cont'd)20.1 General Description (Cont'd)Customer Designated Premises to Customer Designated PremisesElectrical Interface to Electrical Interface

This service configuration provides electrical DS3 signals at both customer designated premises.

Example:

Optical Interface to Electrical Interface

at one

0. MegaLink Custom Services (Cont'd)

20.2 Optional Feature, BSE and Function Descriptions

20.2.1 Central Office Multiplexing BSE

DS3 to DS1 multiplexing provides an arrangement in a Telephone Company Hub Central Office that converts a DS3 signal to 28 DS1 channels using digital time division multiplexing.

When ordering multiplexing, the customer will select the designated hub(s) and subtending wire center(s) from the National Exchange Carriers Association, Inc. Tariff F.C.C. No. 4 Subtending Wire Center section(s) and Wire Center section(s). A description of the types of multiplexing hubs are as set forth in 7.1.3(B) (3) (Intermediate Multiplexing Hub), 7.1.3(B) (4) (Super Intermediate Multiplexing Hub) and 7.1.3(B) (5) (Terminus Multiplexing Hub) preceding.

20.2.2 SecureNet

SecureNet options provide MegaLink Custom Service with automatic restoration capabilities which prevent service interruption in the event of a single facility break or a single electronics failure. SecureNet options are available only where fiber optic facilities are used to provide the underlying MegaLink Custom Service.

The automatic restoration capabilities are provided through the use of intelligent components which are capable of sensing a transmission failure and by separately routing the primary transmission path and secondary transmission path in geographically separate fiber optic cables. In the event of a transmission failure, the intelligent components will automatically switch the MegaLink Custom Service to either the primary or secondary path within 2.0 seconds.

The primary and secondary transmission paths for MegaLink Custom Service will be routed in geographically separate fiber optic cables up to the nearest point to the customer's premises that route redundancy can be achieved.

20. MegaLink Custom Services (Cont'd)20.2 Optional Feature, BSE and Function Descriptions (Cont'd)20.2.2 SecureNet (Cont'd)

In the event a facility break occurs in that portion of the service for which route redundancy could not be achieved, the Telephone Company cannot guarantee automatic restoration of the customer's service within 2.0 seconds and a credit as set forth for SecureNet in Section 2.5.5(B) (When A Credit Allowance Applies) will not apply.

SecureNet options are only available with MegaLink Custom Service, with electrical interfaces at the customer's premises. SecureNet options are available at those serving wire centers where equipment and facilities are available. Hub Redundancy and Serving Wire Center and Facility Redundancy will be provided in those serving wire centers found in the National Exchange Carrier Association, Inc. Tariff F.C.C. No. 4. Technical specifications may be referenced in Technical Reference TP 76625 and in Technical Reference TR-INS-000342.

SecureNet is provided with three options allowing for various levels of self-healing capabilities.

(A) Hub Redundancy

This option provides automatic restoration and physical route redundancy from the customer's premises to the customer's DS3/DS1 multiplexing hub in the event of a single loop, wire center, interoffice facility or hub failure.

Hub Redundancy is only available for MegaLink Custom Service, with electrical interfaces at the customer's premises, provided from a customer's premises to a DS3/DS1 multiplexing hub office. The MegaLink Custom Service must be equipped with a DS3 to DS1 Central Office Multiplexing arrangement. The Hub Redundancy option includes the multiplexing capabilities provisioned on the secondary transmission path at the redundant DS3/DS1 multiplexing hub office. The serving wire center and multiplexing hub may be collocated. This option includes interoffice mileage for the redundant facility.

Hub Redundancy is available where more than one exchange telephone company is involved (i.e., jointly provided service) when those telephone companies have agreed upon facilities and terms and conditions of the jointly provided service.

20. MegaLink Custom Services (Cont'd)

20.2 Optional Feature, BSE and Function Descriptions (Cont'd)

20.2.2 SecureNet (Cont'd)

(B) Serving Wire Center and Facility Redundancy

This option provides automatic restoration and physical route redundancy from the customer's premises to the customer's Telephone Company Hub Central Office or from the customer's premises to another premises in the event of a single loop, wire center or interoffice facility failure. The customer's serving wire center and Telephone Company Hub Central Office are separate locations. This option includes interoffice mileage for the redundant facility.

Serving Wire Center and Facility Redundancy is available where more than one exchange telephone company is involved (i.e., jointly provided service) when those telephone companies have agreed upon facilities and terms and conditions of the jointly provided service.

20. MegaLink Custom Services (Cont'd)20.2 Optional Feature, BSE and Function Descriptions (Cont'd)20.2.3 Service Extension

An existing MegaLink Custom Service can be extended from the current Telephone Company Hub Central Office to another Telephone Company Hub Central Office via a Service Extension.

Example:

20. MegaLink Custom Services (Cont'd)20.2 Optional Feature, BSE and Function Descriptions (Cont'd)20.2.4 STN Interconnection with SecureNet Equipped MegaLink Custom Service

This option is provided for interconnection of an STN with MegaLink Custom Service equipped with the SecureNet Serving Wire Center and Facility Redundancy feature as set forth in 20.2.2(B) (Serving Wire Center and Facility Redundancy).

20.2.5 C-Bit Parity Framing Format Option

C-Bit Parity Framing Format Option (C-Bit) allows customers to specify the C-Bit format rather than using the standard M13 multiplex format interface. C-Bit allows DS3 framing bits to be rearranged for additional performance monitoring capabilities by the customer. The performance monitoring capability is inherent to the customer's CPE. The Telephone Company does not monitor the C-Bits for performance or any other purpose.

C-Bit is available when MegaLink Custom Service is provided over SONET facilities from end to end. C-Bit is not available if the customer's MegaLink Custom Service:

- Is provided over asynchronous fiber, microwave radio, or other incompatible facility; or
- Utilizes multiplexing as described in Section 20.2.1

If C-Bit is ordered with new MegaLink Custom Service, the C-Bit nonrecurring charge does not apply. If C-Bit is ordered for existing MegaLink Custom Service and is available, a nonrecurring charge will apply as set forth in Section 20.5.7 (J) following.

Customers with existing MegaLink Custom service provided over incompatible facilities may order C-Bit if SONET facilities exist for the service route requested. SONET facilities are available at those serving wire centers where equipment and facilities exist, as found in the National Exchange Carrier Association, Inc. (NECA) Tariff F.C.C. No. 4. In this case, the customer must disconnect their existing service and order new service. Customers under an existing term pricing plan will not be charged a termination charge, provided the conditions contained in 20.4.6 following are met. All applicable nonrecurring charges for the new service will apply, however, the C-Bit nonrecurring charge will not apply for the new service being ordered as described above.

20. MegaLink Custom Services (Cont'd)20.3 Service Provisioning20.3.1 Design Layout Report

At the request of the customer, the Telephone Company will provide to the customer the make-up of the facilities and services provided under this tariff as MegaLink Custom Service to aid the customer in designing its overall service. This information will be provided in the form of a Design Layout Report. The Design Layout Report will be provided to the customer at no charge, and will be reissued or updated whenever these facilities are materially changed.

20.3.2 Acceptance Testing

At no additional charge, the Telephone Company will, at the customer's request, cooperatively test at the time of installation, the parameters contained in Technical Reference TP 76625.

In addition to the above tests, Additional Cooperative Acceptance Testing, to test other parameters not defined in Technical Reference TP 76625, is available at the customer's request. Charges as defined in Section 13.3.7 (Special Access, MegaLink Custom Service and STN Rates and Charges) will apply. All test results will be made available to the customer upon request.

20.3.3 Diversity

A customer may request that the facilities used to provide MegaLink Custom (DS3) services be specially routed. The regulations, rates and charges for Diversity are set forth in Section 27.

20. MegaLink Custom Services (Cont'd)20.4 Rate Regulations

This section contains the specific regulations governing the rates and charges which may apply to MegaLink Custom Service.

The rates and charges in effect at the time the MegaLink Custom Service is installed and accepted by the customer are the rates and charges which will be billed to the customer requesting the service. The rates and charges in effect at that time may not be the same as those rates and charges in effect at the time the customer requests the service.

If the Telephone Company initiates rate changes resulting in a decrease of rates for an existing service with a 1, 3, 5 or 10 year⁽¹⁾⁽²⁾⁽⁵⁾⁽⁶⁾ billing period, those rate changes will be passed along to the customer. Rate changes resulting in an increase of rates for an existing service with a 1, 3, 5 or 10 year⁽¹⁾⁽²⁾⁽⁵⁾⁽⁶⁾ billing period will not exceed the original rate for that selected bill period. Rate changes may occur as a result of F.C.C. action.

Rates and charges (both monthly and nonrecurring) for Kansas MegaLink Custom Services (identified as Nonzoned) will be applied as contained in 20.5. Rates and charges for Arkansas, Missouri, Oklahoma and Texas will be applied based on Pricing Zones as contained in 20.5. The Pricing Zone for each serving wire center is as specified in the National Exchange Carrier Association, Inc. Tariff F.C.C. No. 4. Additionally, if the Channel Mileage crosses Pricing Zones (e.g., serving wire center 1 is in Pricing Zone 1 and serving wire center 2 is in Pricing Zone 2), the higher priced mileage rate will be applied to the entire channel mileage.

Effective November 1, 2017, Competitive Counties and Non-Competitive Counties have been established and are defined in Section 2.7 and the wire centers within such counties are listed in Sections 15.2(C) and (D).

For all rate elements other than End User channel terminations and their optional features,⁽⁴⁾ price flex rates and charges, as provided in Section 39.5.2, apply, regardless of whether the county is Competitive or Non-Competitive.

For End User channel terminations and their optional features,⁽³⁾⁽⁴⁾ the application of “price cap” or “price flex” is dependent upon whether or not the serving wire center is located in a Competitive County. If the End User channel termination is in a Competitive County, price flex rates and charges apply, as provided in Section 39.5.2. If the End User channel termination is in a Non-Competitive County, price cap rates and charges apply, as provided in Sections 7.3 and 20.5.

- (1) Effective October 25, 2014, MegaLink Custom Services 10-year term plans are no longer available for new circuits. There is no change for existing circuits.
- (2) Effective on September 13, 2017, MegaLink Custom Services 5-year Payment Plans are no longer available, including for any otherwise available renewals or conversions. Circuits already subject to a MegaLink Custom Services 5-year Payment Plan, as of September 13, 2017, will continue to be provided under the then-current MegaLink Custom Services 5-year Payment Plan term for the remainder of that term.
- (3) Until February 1, 2018, End User channel terminations and their optional features that had not qualified for Phase II, Level 2 pricing flexibility prior to June 1, 2017, will be rated at the price cap rate regardless of the status of the county in which the applicable wire center is located.
- (4) Optional features for End User channel terminations includes all optional features in Section 7.3, except for the Loop Transfer Arrangement, and all optional features in Section 20.5.
Certain material previously appearing on this page now appears on 1st Revised Page 20-16.1.
- (5) Effective November 1, 2022, DS1 Term Payment Plan 2- and 3-year and MegaLink Custom 3-year Payment Plans (collectively, Term Plan Services), are no longer available, including conversions. Existing Term Plan Services, as of November 1, 2022, will continue to be provided under the then-current terms, for the remainder of the applicable term.
- (6) Effective January 17, 2024, DS1 Term Payment Plan 1-year and MegaLink Custom 1-year Payment Plans (collectively, Term Plan Services) are no longer available, including conversions. Existing Term Plan Services on January 17, 2024, will continue to be provided for the remainder of the then-current terms..

20. MegaLink Custom Services (Cont'd)20.4 Rate Regulations (Cont'd)

MegaLink Custom Services offer Portability for any existing term priced service provided each of the following conditions are met:

- (a) Service to be moved is either a 5 year⁽²⁾ or 10 year⁽¹⁾ Billing Period.
- (b) Customer must begin a new Billing Period (5 years or greater)^{(1) (2)} for the service to be moved and the monthly revenue must be equal to or greater than that of the service in original location.
- (c) New service location is within the same state (i.e. Arkansas, Kansas, Missouri, Oklahoma or Texas) as the original service.
- (d) Facilities and equipment are available in the desired new location.

Charges to MegaLink Custom portability are set forth in 20.4.2(G).

20.4.1 Rate Categories

There are four basic rate categories which apply to MegaLink Custom Service:

- Channel Termination
- Interoffice Mileage
- Service to Service Through Connect Arrangements
- Optional Features, BSEs and Functions

⁽¹⁾ Effective October 25, 2014, MegaLink Custom Services 10-year term plans are no longer available for new circuits. There is no change for existing circuits.

⁽²⁾ Effective on September 13, 2017, MegaLink Custom Services 5-year Payment Plans are no longer available, including for any otherwise available renewals or conversions. Circuits already subject to a MegaLink Custom Services 5-year Payment Plan, as of September 13, 2017, will continue to be provided under the then-current MegaLink Custom Services 5-year Payment Plan term for the remainder of that term.

20. MegaLink Custom Services (Cont'd)

20.4 Rate Regulations (Cont'd)

20.4.1 Rate Categories (Cont'd)

(A) Channel Termination

Channel Termination provides for the communications path between a customer designated premises and the serving wire center for that premises or for the communications path within a building which connects a customer's facilities with a customer designated premises without routing through the serving wire center.

Two types of Channel Terminations are provided.

(1) Electrical Channel Termination

An Electrical Channel Termination provides for an electrical interface at the customer designated premises.

(2) Optical Channel Termination

An Optical Channel Termination provides for an optical interface at the customer designated premises.

(B) Interoffice Mileage

Interoffice Mileage provides for the transmission facilities between the serving wire centers associated with two customer designated premises, between a serving wire center and a Telephone Company Hub Central Office or, in the case of a Service Extension, between two Telephone Company Hub Central Offices.

There are two components of Interoffice Mileage.

(1) Interoffice Fixed

The Interoffice Fixed charge provides for the electronic equipment required to terminate an interoffice channel in the serving wire center(s) and Telephone Company Hub Central Office(s).

(2) Per Mile

The Per Mile charge provides for the electronic equipment and fiber optic cable necessary to provide the interoffice transport.

SECTION 20 - MegaLink Custom Services

44.736 Mbps, ReliaNet DS3 Access Ports, etc.) in the same Telephone Company Hub Central Office.

20. MegaLink Custom Services (Cont'd)20.4 Rate Regulations (Cont'd)20.4.1 Rate Categories (Cont'd)(C) Service to Service Through Connect Arrangements

The Service to Service Through Connect Arrangement rate category provides for an interconnection of two MegaLink Custom Services or services with equivalent interface transmission speeds (e.g., STN DTL at

(D) Optional Features, BSEs and Functions

The Optional Features, BSEs and Functions rate category provides for optional features, BSEs and functions which may be added to a MegaLink Custom Service to improve its quality or utility to meet specific communications requirements.

(1) Multiplexing

The Multiplexing rate category provides for an arrangement that converts a DS3 signal to 28 DS1 channels using digital time division multiplexing.

(2) STN Interconnection with SecureNet Equipped MegaLink Custom Service

The STN Interconnection with SecureNet equipped MegaLink Custom Service rate category provides automatic restoration capabilities which prevent service interruption in the event of a single facility break or a single electronics failure.

(E) Collocation Transport

Collocation Transport provides for the transmission facilities between collocation arrangements located in Telephone Company Central Offices.

There are two components of Collocation Transport.

(1) Inter/Intra Office Fixed

Inter/Intra office fixed rate element provides for the electronic equipment required to terminate a channel between two collocation arrangements located either in the same central office (intra) or in two separate central offices (inter).

(2) Inter Office Per Mile

The Per Mile charge provides for the electronic equipment and facilities necessary to provide the interoffice transport between two collocation arrangements.

20. MegaLink Custom Services (Cont'd)20.4 Rate Regulations (Cont'd)20.4.2 Nonrecurring Charges*

Nonrecurring charges are one-time charges that apply for specific work activity (i.e., installation of service or change to an existing service). The types of nonrecurring charges that apply for MegaLink Custom Service are:

- Installation of service
- Installation of optional features, BSEs and functions
- Installation of service to service through connect arrangements
- Service rearrangements
- Moves

(A) Nonrecurring Charges for the Installation of MegaLink Custom Service

Nonrecurring charges apply for each service installed and are applied per DS3 or DS3 equivalent, per customer designated premises on a first and additional basis.

The initial DS3 or DS3 equivalent incurs the first nonrecurring charge for each channel termination associated with the DS3 or DS3 equivalent. The remaining DS3s or DS3 equivalents incur the additional nonrecurring charge for each channel termination.

In order to receive the benefit associated with ordering multiple DS3 or DS3 equivalents, the following criteria must be met:

- Same Access Service Order
- Same Application for Service Date
- Same Due Date
- Identical Services
- Same Billing Account Number (BAN)
- Same Two Service End Points

* For Services ordered under MVP, refer to Section 38.3(E) (5).

0. MegaLink Custom Services (Cont'd)

20.4 Rate Regulations (Cont'd)

20.4.2 Nonrecurring Charges (Cont'd)

(B) Nonrecurring Charges for the Installation of Service Extensions

Service extensions to single or multiple hub locations ordered with the same due date as the associated DS3 or DS3 equivalent will not incur a nonrecurring charge. Service extensions to single or multiple hub locations ordered with a different due date than the associated DS3 or DS3 equivalent will incur a first and additional nonrecurring charge per DS3 or DS3 equivalent, per service extension.

In order to receive the benefit associated with ordering multiple DS3 or DS3 equivalents for one Service Extension, the following criteria must be met:

- Same Access Service Order
- Same Application for Service Date
- Same Due Date
- Identical Services
- Same Billing Account Number (BAN)
- Same Two Service End Points

20. MegaLink Custom Services (Cont'd)20.4 Rate Regulations (Cont'd)20.4.2 Nonrecurring Charges (Cont'd)(C) Nonrecurring Charges for the Installation of Optional Features, BSEs and Functions

Nonrecurring charges apply for the installation of optional features, BSEs and functions available with MegaLink Custom Service. The charge applies whether the feature, BSE or function is installed coincident with the initial installation of service or at any time subsequent to the installation of the service, with the exception of C-Bit Parity Framing Format Option on MegaLink Custom Service, as described below.

(1) DS3 to DS1 Multiplexing

The nonrecurring charges for DS3 to DS1 multiplexers are applied on a per multiplexer basis.

(2) SecureNet

The nonrecurring charges for SecureNet are applied on a per premises, per DS3 basis.

(3) STN Interconnection with SecureNet Equipped MegaLink Custom Service

The nonrecurring charges for SecureNet Interconnection are applied on a per DS3 per interconnection basis. In addition, nonrecurring charges are applicable for two (2) Service to Service Through Connect Arrangements per DS3 per interconnection.

(4) C-Bit Parity Framing Format Option on MegaLink Custom Service

A nonrecurring charge is applied on a per DS3 first and additional basis when the option is added to existing MegaLink Custom Service.

(D) Nonrecurring Charges for the Installation of Service to Service Through Connect Arrangements

The nonrecurring charges for Service to Service through Connect Arrangements are applied per DS3 or DS3 equivalent basis.

20. MegaLink Custom Services (Cont'd)20.4 Rate Regulations (Cont'd)20.4.2 Nonrecurring Charges (Cont'd)(E) Nonrecurring Charges for Service Rearrangements

Nonrecurring charges may apply for Service Rearrangements which are administrative changes to existing services which do not result in a change in the minimum period requirements or a change in the physical location of the point of termination at a customer designated premises.

The customer requesting administrative service rearrangements will be responsible for all billing associated with the changes requested.

A nonrecurring charge will apply per DS3 or DS3 equivalent on a first and additional basis for the following change or combination of changes requested by the customer on the same Access Order and will be charged as set forth in Section 20.5.8 (Administrative Charges).

- Change of Access Carrier Name Abbreviation (ACNA)
- Change of Billing Account Number (BAN)
- Change of Customer Circuit Identification (CKR)
- Change in customer of record

A change in the customer of record (i.e., existing access service is provided and billed to a different entity) is considered an administrative service rearrangement when the new customer assumes liability for all current and prior charges for the service(s) and has complied with the regulations and conditions as set forth in Section 2.2.1 (Assignment and Transfer of Facilities), preceding, and no physical relocation or rearrangement of the service is required.

20. MegaLink Custom Services (Cont'd)20.4 Rate Regulations (Cont'd)20.4.2 Nonrecurring Charges (Cont'd)(E) Nonrecurring Charges for Service Rearrangements
(Cont'd)

When a change of customer name and change in billing data (name, address, contact name, or telephone number) are requested in association with a change in the customer of record, the Access Order Charge will apply as set forth in Section 5.3.1 (Access Order Charges) preceding.

Certain administrative changes will be made without charge(s) to the customer. These administrative changes are as follows:

- Change of customer name, (i.e., the customer of record does not change but rather the customer of record changes its name--e.g., ABC Communications to All Business Concepts Communications).
- Change of customer's or customer's end user premises address when the change of address is not a result of a physical relocation of the service.
- Change in billing data (name, address, contact name, or telephone number).
- Change of agency authorization.
- Change of customer test line number.
- Change of customer's or customer's end user contact name or contact telephone number.
- Change of jurisdiction.

(F) Nonrecurring Charges for Moves

Nonrecurring charges apply for the work activity necessary to provide a change in the physical location of a customer's premises or the point of termination at a customer's premises. The nonrecurring charges for move activities are further explained in Section 20.4.12 (Moves).

(G) Nonrecurring Charges for Portability

Nonrecurring charges apply when a customer elects to relocate a MegaLink Custom Service under the Portability provision, as discussed in 20.4. The nonrecurring charge will be assessed on a per DS3 relocated basis. The specific charge will be the nonrecurring charge associated with the particular rate element which is being relocated, as specified in 20.5 (Rates and Charges).

20. MegaLink Custom Services (Cont'd)20.4 Rate Regulations (Cont'd)20.4.3 Monthly Recurring Rates

Monthly recurring rates are charges that apply each month or fraction thereof that MegaLink Custom Service is provided. For billing purposes, each month is considered to have 30 days.

Monthly Extension Rates

Monthly extension rates are charges that the customer may elect to be converted to at the end of a term plan, until a new term is selected or service is disconnected. Monthly extension rates are only available once the term plan has expired.

Monthly recurring rates apply to the following rate categories.

(A) Monthly Recurring Rates For Channel Termination

The monthly recurring rates for Channel Terminations are based on the Channel Termination Volume Options and billing periods selected by the customer.

The Channel Termination Volume Options designate the number of DS3s or DS3 equivalents associated with the service. The volume options include quantities of 1, 3, 6 and 12 DS3s or DS3 equivalents.

The Channel Termination charge also depends on the channel termination interface selected by the customer. A customer may select an electrical or optical interface.

Optical interfaces are provided on fiber facilities. When selecting an optical interface, the customer restates the bit rate (i.e., transmission speed) as an appropriate DS3 equivalent in order to determine the applicable rates.

20. MegaLink Custom Services (Cont'd)20.4 Rate Regulations (Cont'd)20.4.3 Monthly Recurring Rates (Cont'd)(A) Monthly Recurring Rates For Channel Termination
(Cont'd)

The following chart illustrates typical transmission speeds available for optical interfaces and the DS3 equivalent for each speed.

<u>Transmission Speed</u>	<u>Equivalent DS3s</u>
45 Mbps	1
150 Mbps	3
565 Mbps	12

Equipment utilized by the customer to terminate an optical signal provided by the Telephone Company must be compatible with the equipment the Telephone Company utilizes to transmit the optical signal.

One Channel Termination charge applies per customer designated premises at which the service is terminated. This charge applies even if the customer designated premises and the serving wire center are located in the same Telephone Company building. Channel Termination Volume Options for each Channel Termination for a customer designated premises to customer designated premises service must be the same.

20.4 Rate Regulations (Cont'd)20.4.3 Monthly Recurring Rates (Cont'd)(A) Monthly Recurring Rates For Channel Termination
(Cont'd)

To develop a Channel Termination rate for a quantity of DS3s or DS3 equivalents not contained in a Channel Termination Volume Option, the customer must specify the appropriate Volume Options which result in the requested number of DS3s or DS3 equivalents.

Example: A customer who wants a 5 year billing period for 7 DS3s from a premises to a Telephone Company Hub Central Office may choose the following Channel Termination Rates:

A 5 year Electrical Channel Termination Volume
Option of 6 DS3s

plus

A 5 year Electrical Channel Termination Volume
Option of 1 DS3

Electrical interface and optical interface Channel Termination Volume Options may not be combined on one request for service at the same customer designated premises.

(B) Monthly Recurring Rates For Interoffice Mileage

The Interoffice Mileage charges are based on the number of interoffice miles, volume option and billing period selected.

When interoffice mileage is required, the following charges will apply.

(1) Interoffice Fixed

The Interoffice Fixed charge is based on the billing period selected by the customer and is applied on a per DS3 or DS3 equivalent basis.

The rate is developed by multiplying the number of DS3s or DS3 equivalents by the appropriate fixed charge based on the billing period specified by the customer.

(2) Per Mile

A Per Mile rate is based on the Channel Termination Volume Option and billing period selected by the customer and is applied on a per airline mile basis.

The Volume Option utilized to develop the Per Mile rate must be the same as the Channel Termination Volume Option specified by the customer.

To calculate the appropriate rate, multiply the number of miles, as calculated in Section 20.4.7 (Determining the Interoffice Mileage), by the appropriate Per Mile rate, for the billing period selected.

20. MegaLink Custom Services (Cont'd)20.4 Rate Regulations (Cont'd)20.4.3 Monthly Recurring Rates (Cont'd)(C) Monthly Recurring Rates For Optional Features, BSEs and Functions(1) DS3 to DS1 Multiplexing

The recurring rates for DS3 to DS1 multiplexing arrangements are applied on a per multiplexer basis and are based on the billing period selected by the customer.

(2) SecureNet

The recurring rates for SecureNet are applied on a per premises, per DS3 basis and are based on the billing period selected by the customer.

(3) Service Extensions

The recurring rates applicable for a Service Extension utilize the Interoffice Fixed and Per Mile charge applicable for MegaLink Custom Service.

The Interoffice Fixed rate is based on the billing period selected by the customer and is applied on a per DS3 or DS3 equivalent basis. The Interoffice Fixed rate for the Service Extension is applicable in addition to an Interoffice Fixed charge which may be applicable for the MegaLink Custom Service.

The Per Mile rate for a Service Extension is based on the billing period and Volume Option specified by the customer and is applicable for the appropriate number of miles from the original Telephone Company Hub Central Office to the new Telephone Company Hub Central Office.

(4) STN Interconnection with SecureNet Equipped MegaLink Custom Service

The recurring rates for this interconnection are applied per DS3 per interconnection and are based on the billing period selected by the customer.

20. MegaLink Custom Services (Cont'd)20.4 Rate Regulations (Cont'd)20.4.4 Billing Period

- (A) The billing period establishes the amount of time that rates for a service are stabilized by the Telephone Company.

The following billing periods are available for MegaLink Custom Services and associated optional features, BSEs and functions:

Monthly (Temp-DS3)
Month to Month
Monthly Extension:

1 year⁽⁴⁾, 3 year⁽³⁾, 5 year⁽²⁾ and 10 year⁽¹⁾

One month prior to the expiration of the billing period, with the exception of Temp-DS3, the customer must select one of the following options:

- (1) Renew the service for a specified period of time as provided in this tariff under the regulations, nonvintage rates in effect at the time of expiration of the existing service.
- (2) Elect to be converted to monthly extension rates.
- (3) Elect to disconnect the service upon expiration of the billing period.

If a customer selects neither (1) nor (3) preceding, the current regulations, non-vintage rates and charges for the Month to Month rate option will be applied upon expiration of the billing period.

If the customer does not choose one of the preceding options prior to the expiration date of the commitment period, monthly extension rates will be applied upon expiration of the commitment period.

Option (1) as described preceding is available to customers if the term plans remain in effect and are not grandfathered. If the term plans are grandfathered and the service expires, absent customer notification, the customers expired service will be converted to monthly extension rates upon expiration.

The customer must provide the Telephone Company with a written notice of intent to extend the DS3 billing period no later than one month prior to the expiration of the service period.

The customer's existing service will not be subject to the 1 year minimum service period after reverting to the monthly extension rate option.

Nonrecurring charges are not applicable for services renewed, as long as the same number of DS3s are renewed. Any change in the number of DS3s will incur the appropriate nonrecurring charges.

For Temp-DS3 the minimum billing period is one (1) month and the maximum billing period is eleven (11) months.

- (1) Effective October 25, 2014, MegaLink Custom Services 10-year term plans are no longer available for new circuits. There is no change for existing circuits.
- (2) Effective on September 13, 2017, MegaLink Custom Services 5-year Payment Plans are no longer available, including for any otherwise available renewals or conversions. Circuits already subject to a MegaLink Custom Services 5-year Payment Plan, as of September 13, 2017, will continue to be provided under the then-current MegaLink Custom Services 5-year Payment Plan term for the remainder of that term.
- (3) Effective November 1, 2022, DS1 Term Payment Plan 2- and 3-year and MegaLink Custom 3-year Payment Plans (collectively, Term Plan Services), are no longer available, including conversions. Existing Term Plan Services, as of November 1, 2022, will continue to be provided under the then-current terms, for the remainder of the applicable term.
- (4) Effective January 17, 2024, DS1 Term Payment Plan 1-year and MegaLink Custom 1-year Payment Plans (collectively, Term Plan Services) are no longer available, including conversions. Existing Term Plan Services on January 17, 2024, will continue to be provided for the remainder of the then-current terms.

20. MegaLink Custom Services (Cont'd)20.4 Rate Regulations (Cont'd)20.4.4 Billing Period (Cont'd)

- (B) Provided the end points remain the same, a customer may request to convert from MegaLink Custom Service Vintage rates and charges to MegaLink Custom Service rates and charges. All terms and conditions will apply as set forth in 20.1 through 20.5.8.

With the exception of the Access Order Charge as set forth in 5.3.1, no nonrecurring charges will apply.

A customer must establish a minimum of a 5-year billing period if 5 or more years remain on the existing Vintage billing period. If the existing Vintage billing period is less than 5 years but more than 1 year, a minimum of a 3-year billing period must be established. For an existing Vintage billing period of 1 year or less, a customer must establish a Month-to-Month billing period for a minimum of 1 year.

20.4.5 Minimum Service Periods

Minimum service periods establish the minimum period for which a MegaLink Custom Service or an optional feature, BSE and function will be provided.

The minimum service periods are as follows:

MegaLink Custom Service	1 year ⁽¹⁾
Temp-DS3	1 month
Service Extension	1 year ⁽¹⁾
SecureNet Options	1 year ⁽¹⁾
Central Office Multiplexing	1 month
Central Office Multiplexing	1 year ⁽¹⁾
Interoffice Mileage	
-(Fixed and Per Mile)	1 year ⁽¹⁾

When a service is discontinued prior to the expiration of the minimum service period, the applicable charge will be the total monthly charges for the remainder of the minimum service period plus termination charges for the remainder of the billing period as described in Section 20.4.6.

Services which are terminated after the minimum service period and prior to the expiration of the billing period are subject to termination charges as described in Section 20.4.6 (Termination Charges).

If a customer requests a change from a MegaLink Custom Service Vintage billing period to a MegaLink Custom Service billing period, a new minimum service period must be established.

⁽¹⁾ Effective January 17, 2024, the 1-year minimum period no longer applies.

20. MegaLink Custom Services (Cont'd)20.4 Rate Regulations (Cont'd)20.4.6 Termination Charges

In the event service is terminated prior to the expiration of the minimum service period, charges, as specified in Section 20.4.5 (Minimum Service Periods), will apply. Termination charges do not apply to Temp-DS3 service. In the event service is terminated after the minimum service period and prior to the end of the billing period, a termination charge utilizing the following termination percentage will apply:

<u>Billing Period</u>	<u>Termination Percentage</u>
1, 3, 5 or 10 year ⁽¹⁾⁽²⁾⁽³⁾⁽⁴⁾	20%

The termination charge is based on the volume option selected by the customer.

The termination charge is calculated as follows:

$$\text{monthly rate} \times \frac{\text{months remaining}}{\text{in billing period}} \times \text{termination percentage}$$

Example: A customer with a \$5,000 monthly rate terminates service with 10 months remaining in a 3 year billing period. The termination charge would be calculated as follows:

$$\$5,000 \times 10 \times .20 = \$10,000$$

The termination charge would be: \$10,000

If Special Construction applied for the service being terminated, an associated Termination Charge, as set forth in F.C.C. No. 69, Section 2.6.4 (Types of Liabilities and Charges), may apply.

When a MegaLink Custom service, which is billed under the Shared Use provision is terminated, the termination liability will be based on the full charges as listed in Section 20.5 herein, as opposed to the Shared Use billed amount.

- (1) Effective October 25, 2014, MegaLink Custom Services 10 year term plans are no longer available for new circuits. There is no change for existing circuits.
- (2) Effective on September 13, 2017, MegaLink Custom Services 5-year Payment Plans are no longer available, including for any otherwise available renewals or conversions. Circuits already subject to a MegaLink Custom Services 5-year Payment Plan, as of September 13, 2017, will continue to be provided under the then-current MegaLink Custom Services 5-year Payment Plan term for the remainder of that term.
- (3) Effective November 1, 2022, DS1 Term Payment Plan 2- and 3-year and MegaLink Custom 3-year Payment Plans (collectively, Term Plan Services), are no longer available, including conversions. Existing Term Plan Services, as of November 1, 2022, will continue to be provided under the then-current terms, for the remainder of the applicable term.
- (4) Effective January 17, 2024, DS1 Term Payment Plan 1-year and MegaLink Custom 1-year Payment Plans (collectively, Term Plan Services) are no longer available, including conversions. Existing Term Plan Services on January 17, 2024, will continue to be provided for the remainder of the then-current terms.

20. MegaLink Custom Services (Cont'd)20.4 Rate Regulations (Cont'd)20.4.6 Termination Charges (Cont'd)

When an existing DS3 circuit is reterminated in a Network Reconfiguration Port, termination charges as set forth in 20.4.5 (Minimum Service Periods), 20.4.6 (Termination Charges) and 20.4.12(B) (Moving Customer Premises), will only apply to the Optional Features, BSEs and Functions associated with the reterminated DS3 circuit. Termination charges will not apply to Channel Terminations and Interoffice Mileage associated with the reterminated DS3 circuit when the DS3 end points involved do not change.

Under the following conditions, a termination charge will not apply:

- At the time the customer modifies service as set forth in Section 20.4.13 (Modification of Service).
- At the time the customer relocates a DS3 to DS1 Multiplexer, as set forth in Section 20.4.14 (Relocation of a DS3 to DS1 Multiplexer).
- At the time the customer replaces a MegaLink Custom Service with a STN, DSRS or ReliaNet Service subject to the following criteria:
 - (1) Both MegaLink Custom Service end points must be on the STN, DSRS or ReliaNet;
 - (2) the Minimum Period for STN, DSRS or ReliaNet must be greater than or equal to the remaining MegaLink Custom Service Billing Period; and,
 - (3) the total Minimum Period revenue for the STN, DSRS or ReliaNet must be greater than or equal to the remaining Billing Period revenue for the MegaLink Custom Service.

20. MegaLink Custom Services (Cont'd)20.4 Rate Regulations (Cont'd)20.4.7 Determining Interoffice Mileage

The mileage to be used to determine the monthly rate for the Interoffice Per Mile rate is calculated on the airline distance between the two serving wire centers for a service with two channel terminations, between the serving wire center and the Telephone Company Hub Central Office or, in the case of a Service Extension, between two Telephone Company Hub Central Offices. The serving wire center associated with a customer designated premises is the serving wire center from which the customer designated premises would normally obtain dial tone.

To calculate the appropriate mileage, use the V&H coordinate method, as set forth in the National Exchange Carrier Association, Inc. Tariff F.C.C. No. 4. If the calculation results in a fraction of a mile, round up to the next whole mile.

20.4.8 Ordering Options and Conditions

MegaLink Custom Services are ordered under the Access Order provisions set forth in Section 5 (Ordering for Access Service) preceding. Also included in Section 5 are other charges which may be associated with ordering MegaLink Custom Service (e.g., Service Date Change Charges, Cancellation Charges, etc.)

Ordering, rating and billing procedures as set forth in Section 2.6 (Jointly Provided Access Services), preceding, will apply for MegaLink Custom Service where more than one exchange telephone company is involved (i.e., jointly provided service).

Temp-DS3 customers must submit connect and disconnect orders at the time of initial service order. Temp-DS3 service may be extended once for a maximum of 30 days provided the customer notifies the Telephone Company at least 15 days prior to the established disconnection date. Extensions beyond this period will not be permitted.

20.4.9 Special Access Surcharge

Regulations for the Special Access Surcharge may apply for all jurisdictionally interstate special access facilities as set forth in Section 7.2.5 (Surcharge for Special Access Service) preceding.

20.4.10 Message Station Equipment Recovery Charge

Regulations for the Message Station Equipment Recovery Charge may apply as set forth in Section 7.2.17 (Message Station Equipment Recovery Charge) preceding.

20. MegaLink Custom Services (Cont'd)

20.4 Rate Regulations (Cont'd)

20.4.11 Shared Use

Shared Use occurs when Special Access Service and Switched Access Service are provided over the same MegaLink Custom Services Special Access facility through a common interface. The Special Access monthly rate for the Channel Termination, Channel Mileage, if applicable, and multiplexer will apply, regardless of whether any individual channels of the Shared Special Access facility are used for Special Access Service, Switched Access Service, or any other type of service. The practice known as "ratcheting" (to apply non-Special Access rates on a proportional basis) shall not apply in any circumstance.

- 20. MegaLink Custom Services (Cont'd)
 - 20.4 Rate Regulations (Cont'd)
 - 20.4.11 Shared Use (Cont'd)

20. MegaLink Custom Services (Cont'd)20.4 Rate Regulations (Cont'd)20.4.12 Moves

A move involves a change in the physical location of one of the following:

- The service facility
- The Point of Termination at the customer's premises;
- the customer's premises.

The charges are dependent upon the type of move requested by the customer.

(A) Service Facility Move (SFM)

An SFM is a customer-initiated move of one end of a Telephone Company central office distribution link (e.g., jumper cable, DSX patch cable, etc.) from one facility to another existing facility (of the same or higher transmission speed). All activity associated with the SFM must occur within a single Telephone Company location (central office).

In order to be considered an SFM, all associated order activity (disconnects and new connects) must occur simultaneously and the facility to which service is being moved must be existing and have sufficient capacity to accept the moved service.

An SFM may result in the change of one end point (i.e., customer premises location) of the circuit involved provided the following conditions are met:

- (1) The change of customer premises can only occur on the end of the circuit which has the CFA.
- (2) The customer premises locations involved in the change belongs to the same customer.

- or -

The customer premises locations involved in the change belongs to two different customers but the customer requesting the SFM has previously coordinated the activity such that all activity (disconnects and new connects) will occur simultaneously. If this coordination has not been accomplished beforehand, then the Telephone Company will proceed with the disconnect/new connect orders as non-related and new installation charges will apply for services being relocated.

20. MegaLink Custom Services (Cont'd)20.4 Rate Regulations (Cont'd)20.4.12 Moves (Cont'd)(A) Service Facility Move (SFM) (Cont'd)

On facility moves involving multiplexed (subtending) channels, SFMs shall be charged only for the higher level facility provided the entire facility (the full complement of subtending channels) is being moved concurrent to that particular SFM request. If the subtending channels are requested to be moved one at a time, the SFM will be charged on a per each channel moved basis.

Example 1

An SFM is requested to move 20 DS1s, with subtending VG channels, to a DS3 facility (where the DS3 end of the channel is moving to a new customer premises location). The resulting SFM charge will be 20 DS1 to DS3 SFM charges with no SFM charges for the subtending VG channels.

Example 2

An SFM is requested to move a DS3, with subtending DS1 channels, to another DS3 facility (where there is no change in the customer premises location on the DS3 facility end of the circuit). The resulting SFM charge will be a DS3 to DS3 SFM with no SFM charges for the subtending DS1 channels.

Example 3

An SFM is requested to move 6 DS1s, with subtending VG channels, previously riding one DS3 facility to another DS3 facility. The resulting SFM charge would be (6) DS1 to DS3 SFMs with no SFM charges for the subtending VG channels.

Under MegaLink Custom Service, SFMs may be performed at the following service levels:

- DS3 to DS3 (or equivalent 45 Mbps service)

The charges for an SFM for the services shown above are detailed in 20.5.7(I) (SFMs) following. There will be no change in minimum period requirements.

20. MegaLink Custom Services (Cont'd)20.4 Rate Regulations (Cont'd)20.4.12 Moves (Cont'd)(B) Moves of the Point of Termination Within the Same Customer Premises

A move of a Point of Termination of an existing service to a new location within the same customer premises, may be provided, at the customer's request, on a time sensitive charge basis.

The labor rates which apply are as set forth in Section 13.4.2(C) (Testing and Maintenance With Other Telephone Companies or Other Labor), preceding, of this tariff for Additional Labor. No change in billing period is required.

(C) Moving Customer Premises

A move of existing service may be provided at the customer's request. The customer will be billed 5% of the termination charge as set forth in 20.4.6 (Termination Charges), with the exception as follows. Following the payment of applicable termination charges, customer will be responsible for any nonrecurring charges associated with the reconnection of the service (e.g., Channel Termination Installation Charge).

If the move of the customer's premises is as a result of an SFM (Service Facility Move) according to Sect. 20.4.12(A), and the facility to the new premises is existing, then termination charges will not apply. No nonrecurring charges will apply for that end of the channel or circuit except the applicable SFM charge.

One end of a MegaLink Custom service (e.g., the customer premises) may be moved without termination liability provided the following circumstances exist:

- 1) Customer maintains the same level and commitment of service (i.e., quantity of DS3 channels and billing period length).
- 2) All equipment and transport facilities exist at the new location.

Charges for this one-ended move shall be on a time sensitive charge basis. The labor rates which apply are set forth in Section 13.4.2(C) (Testing and Maintenance With Other Telephone Companies or Other Labor).

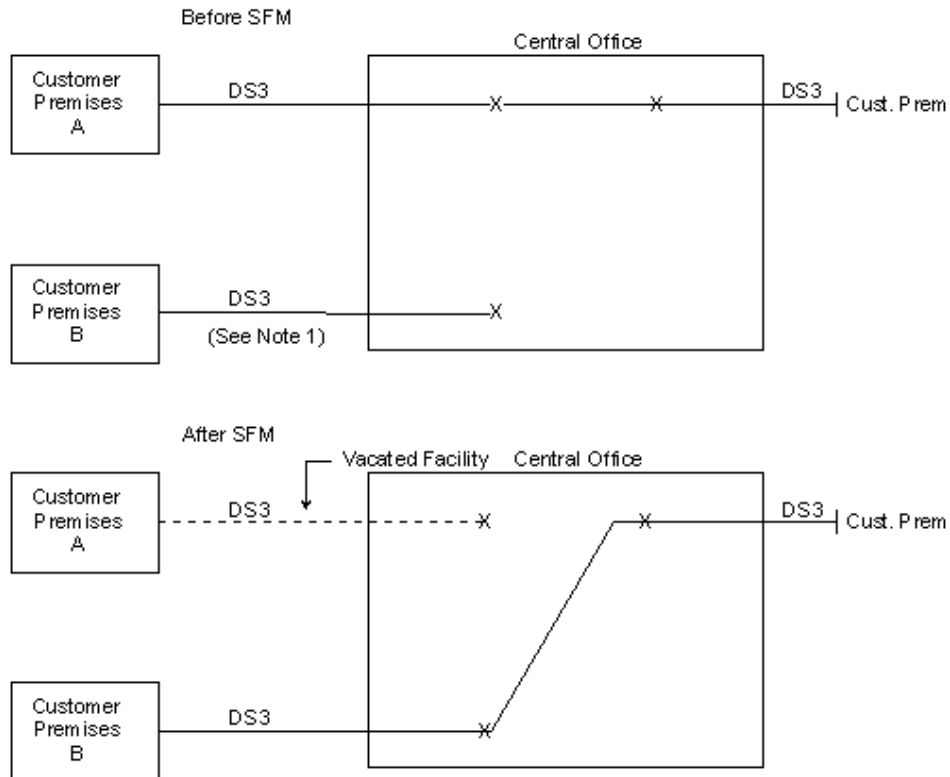

The diagrams following illustrate typical service arrangements before and after an SFM has occurred.

20. MegaLink Custom Services (Cont'd)20.4 Rate Regulations (Cont'd)20.4.12 Moves (Cont'd)

20. MegaLink Custom Services (Cont'd)20.4 Rate Regulations (Cont'd)

20. MegaLink Custom Services (Cont'd)20.4 Rate Regulations (Cont'd)20.4.12 Moves (Cont'd)EXAMPLE 3

DS3 to DS3 SFM -Different CUSTOMER PREMISES

Note 1: This facility may exist as a result of an order for MegaLink Custom (DS3) service concurrent with the SFM request or, in the case of virtual collocation, as a cross-connect arrangement requested by the interconnector.

20. MegaLink Custom Services (Cont'd)

20.4 Rate Regulations (Cont'd)

20.4.13 Modification of Service

The customer may request to modify service (i.e., establish a new billing period or add rate elements to existing service) provided all the following conditions are met:

- a new billing period is established which includes a new minimum service period
- the expiration of the new billing period must extend to or beyond the expiration of the existing billing period
- the total revenue, based on recurring rates, over the revised billing period must be equal to or greater than the remaining revenue from the existing billing period
- the service end points must remain the same

The non-vintage rates and charges (as listed in Section 20.5) in effect at the time service is modified are the rates and charges which will be billed to the customer during the new billing period. No additional administrative charges shall apply to these modifications except the Access Order Charge as set forth in 5.3.1.

20. MegaLink Custom Services (Cont'd)20.4 Rate Regulations (Cont'd)20.4.14 Relocation of a DS3 to DS1 Multiplexer

A customer may request to relocate a DS3 to DS1 Multiplexer. The customer will be charged the nonrecurring charge as specified in 20.5.7(B) (DS3 to DS1 Multiplexing), following, for the installation of the relocated multiplexer. A termination charge, as described in 20.4.6 (Termination Charges), preceding, will not apply for the DS3 to DS1 Multiplexer at the time it is relocated.

20.4.15 Service Extension

The Volume Option for a Service Extension must be less than or equal to the Channel Termination Volume Option specified by the customer for the MegaLink Custom Service being extended.

MegaLink Custom Service with Serving Wire Center and Facility Redundancy can be extended with a Service Extension. However, the Service Extension cannot be equipped with a SecureNet option.

MegaLink Custom Service with Hub Redundancy cannot be extended with a Service Extension. Likewise, an existing MegaLink Custom Service with a Service Extension cannot be equipped with a Hub Redundancy option.

20.4.16 Facility Hubs

The Telephone Company will commence billing the monthly rate for the facility to the hub on the date specified by the customer on the Access Order. Individual services utilizing these facilities may be installed coincident with the installation of the facility to the hub or may be ordered and/or installed at a later date, at the option of the customer. The customer will be billed the appropriate MegaLink Custom Channel Termination, Interoffice Mileage (when applicable) and the Multiplexer rates at the time the facility is installed. Individual service rates (by service type) will apply for a Channel Termination and additional Channel Mileage (as required) for each channelized service.

When cascading multiplexing is performed, whether in the same or a different hub, a charge for the additional multiplexing unit also applies. When cascading multiplexing is performed at different hubbing locations, Interoffice Mileage charges also apply between the hubs.

20. MegaLink Custom Services (Cont'd)20.4 Rate Regulations (Cont'd)20.4.17 Connecting Facility Assignment Credits

Connecting Facility Assignment (CFA) Credit is an option available to customers of MegaLink Custom Services who allow the Telephone Company use of their channel terminations for the provision of Special Access High Capacity (DS1) channel terminations to other Telephone Company customers. With CFA Credits, the Telephone Company will provide a credit to the customer of the MegaLink Custom Service for the use of their DS3 channel termination and associated DS3 to DS1 multiplexer. The Telephone Company will bill the customer of the DS1 service for the DS1 Channel Termination so provided.

The following terms and conditions apply to all CFA Credit Arrangements.

- (A) The Access Customer Name Abbreviation (ACNA) for the Special Access High Capacity Customer must be different than the ACNA for the customer of the MegaLink Custom Service.
- (B) Requests to establish or discontinue a CFA Credit will be accepted only from the customer of the MegaLink Custom Service.
- (C) When requesting a CFA Credit, the DS3 customer must provide the Telephone Company with information sufficient to correctly establish billing for a DS1 channel termination. This includes the CFA of the DS3, the DS1 customer's name, and the channel assigned to that customer. The Telephone Company will work cooperatively with the DS3 customer to identify the DS1 customer(s). However, if the DS3 customer cannot or will not provide the required information, CFA Credits will not be established.

20. MegaLink Custom Services (Cont'd)

20.4 Rate Regulations (Cont'd)

20.4.17 Connecting Facility Assignment Credits (Cont'd)

- (D) The Telephone Company and the DS3 customer must also agree to work cooperatively to maintain accurate customer records of any CFA Credit arrangements. The customer records which must be jointly maintained are:

-connecting facility assignments by DS1 customer and
-additions, moves or deletions of DS1 customers onto
or off of the DS3 channel termination.

If the Telephone Company and the DS3 customer cannot work cooperatively to maintain these customer records, additional CFA Credits will not be established.

- (E) CFA Credits can be established on Special Access DS3s for Special Access DS1s only. In addition, if channels become vacant subsequent to the establishment of a CFA Credit (e.g., the DS1 customer disconnects service), the CFA Credit will be eliminated.
- (F) In any month, the total CFA credits for any MegaLink Custom channel termination shall not exceed 100 percent of the combined monthly charges for the MegaLink Custom channel termination and its associated DS3 to DS1 multiplexer.
- (G) After the DS3 customer has requested a CFA Credit on an existing MegaLink Custom Service, and the Telephone Company and the DS3 customer have reached agreement that sufficient information has been identified to accurately initiate or modify the CFA Credit arrangement, within five business days of the date of reaching such agreement, the Telephone Company will send the DS1 customer via U.S. Mail a 30-day advance written notification before allowing the CFA Credit arrangement to become effective.

20. MegaLink Custom Services (Cont'd)20.4 Rate Regulations (Cont'd)20.4.17 Connecting Facility Assignment Credits (Cont'd)

- (H) The Telephone Company will only remove a DS1 customer from the CFA Credit arrangement at the request of the DS3 customer or because the DS1 customer has disconnected service or moved service to a different transport facility. The DS3 customer must give the Telephone Company 14 days advance written notification of any request to remove a DS1 customer from the CFA Credit arrangement.
- (I) In the event a billing dispute is initiated by a DS1 customer, the Telephone Company will negotiate with the DS1 customer as set forth in 2.5 (Billing Regulations).
- (J) The Telephone Company will accept requests to disconnect the DS3 service only from the customer for the MegaLink Custom Service. So that DS1 customers using the DS3 channel termination will have the opportunity of continuing service without disruption, the DS3 customer is responsible for notifying all DS1 customers of the disconnection.
- (K) The credit to be applied for each DS1 channel termination using the DS3 channel termination is set forth in 20.5.5 (MegaLink Custom Service). Charges for DS1 service are set forth in 7.3.10 (High Capacity Service).

20.4.18 Temp-DS3 Service

Temp DS3 service is provided for customers who require a MegaLink Custom Service for a short duration of time (less than 12 months), such as a trade show or convention.

Temp-DS3 is provided where facilities and equipment are available and is subject to billing in full month increments. These rate elements will all carry 30 day minimum periods and a maximum period of 11 months. No other rate elements, except as listed herein, are available for use with Temp-DS3 service. Temp-DS3 is only available with Volume Option 1.

31. Synchronous Broadband Network Services (Cont'd)31.3 ReliaNet Service⁽¹⁾31.3.1 Service Description

ReliaNet is a transport service, providing customer access to a SONET-based high capacity inter-office network utilizing ring network architecture for facility redundancy and fault-tolerance in the event of a single facility or equipment failures.

The basic structure of the ReliaNet revolves around the SWBT (the Telephone Company) inter-office network. This transport network consists, by definition, only of Telephone Company central offices. Each central office on the ReliaNet network is called a node. These nodes are equipped with the SONET transmission equipment necessary to produce the bandwidth to transport a variety of Access Services. Depending on the volume option level required by the customer, the inter-office network is sized to accommodate.

ReliaNet will utilize bandwidth from the inter-office network in terms of SONET Volume Options (SVOs) as illustrated in the table below.

SONET VOLUME OPTIONS (SVO)	
SVO	BANDWIDTH
3	155.520 Mbps
6	311.040 Mbps
12	622.080 Mbps
24	1244.160 Mbps
48	2488.320 Mbps

The inter-office network provides high capacity bandwidth ranging from SVO (3) to SVO (48). The customer gains access to this inter-office network via Master Access Connections (MAC) and Auxiliary Connections as described following.

(1) Master Access Connection (MAC)

The Master Access Connection (MAC) is always required in conjunction with the inter-office network and is considered the primary aggregation point of the customer's traffic to or from the network. The MAC provides transport capacity from the inter-office network. This capacity is utilized via Auxiliary Connections (as described following) which are associated with that particular MAC.

⁽¹⁾ Effective October 19, 2012, ReliaNet is limited to existing Customers for existing service arrangements. Existing Customers may not purchase additional ReliaNet service arrangements; however, they may continue to order service connections associated with their existing ReliaNet service, subject to existing capacity availability, for the remainder of any term commitment, including any contract, term plan or other applicable arrangement (collectively, "term commitment"). Existing service will be provided according to all applicable rates, terms and conditions for the remainder of any term commitment. Upon the expiration of any term commitment, service will be provided on a month-to-month basis at the then-applicable month-to-month rate until service is discontinued. No new or additional term commitments of any kind, including any otherwise available renewals, extensions or renegotiations, will be available. Upon the expiration of any term commitment no move, adds or change orders will be accepted.

31. Synchronous Broadband Network Services (Cont'd)31.3 ReliaNet Service (Cont'd)31.3.1 Service Description (Cont'd)(1) Master Access Connection (MAC) (Cont'd)

The MAC is provisioned under two options - Option A and B. The MAC - Opt. A provides five distinct SVOs - SVO (3), (6), (12), (24) and (48) and allows for the connection of up to two customers premises locations to the inter-office network. With the MAC - Opt. A, ReliaNet will provide facility redundancy not only in the inter-office network and in the customer premises loop facility, but also redundancy of the customer premises (premises) themselves when two premises are specified. This will insure that all customer traffic will continue to route through an alternate premises in the event of a single facility or equipment failure in the primary premises.

In the dual premises arrangement the same traffic signals will be delivered to both premises. In addition, the customer will be required to deliver identical signals to the ReliaNet network from each premises.

The MAC - Opt. B provides three distinct SVOs - SVO (3), (6) and (12) and allows the connection of one customer premises location to the inter-office network. MAC - Opt. B will provide facility redundancy between the customer premises and the inter-office network but will not provide complete redundancy due to the single node link at the inter-office network.

(2) Auxiliary Connection (AC)

In addition to the MAC the customer may connect to the inter-office network via an Auxiliary Connection (AC). The Auxiliary Connection is an optional connection provided in those situations where a ReliaNet customer, who has ordered a MAC, desires to interconnect other customers to his ReliaNet via subtended connections. These ACs depending on the availability of facilities, may or may not be facility redundant as is the MAC. The capacity available on each Auxiliary Connection varies depending on the specific option selected by the customer, up to a maximum bandwidth of 155.520 Mbps. With all Auxiliary Connections, the inter-office transport is provided as part of the connection as described following.

31. Synchronous Broadband Network Services (Cont'd)31.3 ReliaNet Service (Cont'd)31.3.1 Service Description (Cont'd)(2) Auxiliary Connection (AC) (Cont'd)

There are three categories of Auxiliary Connections - On-Net, Off-Net and Intra-MAC. On-Net ACs are auxiliary connections ordered under three basic options. Option 1 is for those customer premises which have redundant fiber facilities to their serving wire center located on the Telephone Company inter-office network.⁽¹⁾ Option 1 Plus is for those customer premises which have both redundant fiber facilities as well as redundant serving wire centers located on the inter-office network. Option 2 is for those customer premises which have their serving wire center on the network but whose premises do not have redundant fiber facilities to their serving wire center. The On-Net Option 1 Plus AC provides the highest level of protection with dual-entrance facilities into the customer premises from the inter-office network in addition to serving wire center redundancy which provides protection in the event of failure at the primary serving wire center. The Intra-MAC AC is for those customer premises who have as their serving wire center the primary serving wire center of the MAC for that particular ReliaNet. Due to this configuration, no interoffice facilities are required to transport the AC traffic to the MAC. The level of protection provided by the Intra-MAC AC is dependent on the type of facility provided between the customer's premises and the associated serving wire center.¹ The Intra-MAC Plus AC is an enhanced Intra-MAC AC for customer premises which have as their serving wire center the primary serving wire center of the MAC, but desire serving wire center protection at all times. Some interoffice facilities are required to provide alternate serving wire center protection. Off-Net ACs are auxiliary connections for those customer premises which do not have their serving wire center on the Telephone Company inter-office network.

⁽¹⁾ In some limited circumstances, depending on availability of facilities, for EC-1, DS3 and OC3c interfaces, the fiber facilities from the customer premises to the serving wire center will be single loop rather than redundant. As noted in Tariff F.C.C. No. 73, Section 20.1, by the end of 1997, all but 100 of the current lines in SWBT territory will be served from wire centers providing Loop Redundancy.

31. Synchronous Broadband Network Services (Cont'd)31.3 ReliaNet Service (Cont'd)31.3.1 Service Description (Cont'd)(2) Auxiliary Connection (AC) (Cont'd)

For customers who desire to connect two MACs on the same ReliaNet, transport is provided via the MAC to MAC Connection rate element. This optional transport is non-distance sensitive and provides dedicated point to point transmission of a customer's traffic signals originating and terminating between the two affected MAC rate elements. The MAC to MAC Connection will not transverse a digital cross connect (DCS) system; therefore, will not be subject to mapping by the Telephone Company.

The sum total of the transport capacity of all the Auxiliary Connections and MAC to MAC Connection associated with a MAC may not exceed the capacity of that MAC. If, for example, the customer's MAC has a capacity of SVO (12), then the total capacity of the Auxiliary Connections associated with this MAC may not exceed 622 Mbps.

AC to AC traffic is permitted on ReliaNet via the AC to AC Connection rate element.

ReliaNet does not allow for transmission of customer's traffic between two MACs on a ReliaNet network unless the customer has specifically requested this type of transmission via the MAC to MAC Connection rate element.

The Auxiliary Connection Portability feature provides for the move of an AC to a different location on the inter-office network. During the term of the ReliaNet, an AC may be moved, without termination liability, to another location (within the particular city of that ReliaNet) provided that the proposed serving wire center is listed in the National Exchange Carrier Association, Inc. Tariff F.C.C. No. 4. Auxiliary Connection Portability will be provided only in those situations where facilities and equipment are available to do so. The cumulative quantity of SVOs, or equivalent, associated with the MAC must be maintained within the particular ReliaNet for the portability to be valid. For example, if a MAC is ordered for SVO (12), then no more than 622 Mbps of total service capacity may be relocated under Auxiliary Connection Portability for that particular MAC.

31. Synchronous Broadband Network Services (Cont'd)31.3 ReliaNet Service (Cont'd)31.3.1 Service Description (Cont'd)

Dependent upon the customer's bandwidth requirements as indicated by the SVO of the MAC, various signal outputs (access ports) are available at the MAC and ACs. The MAC (Options A & B) will allow access port connections at EC-1 (51.84 Mbps), DS3 (44.736 Mbps), OC3 (155.520 Mbps), OC3c (155.520 Mbps - concatenated), and OC12 (622.080 Mbps). The AC will allow access port connections as follows: On-Net AC - Option 1, Option 1 *Plus* and both Intra-MAC and Intra-MAC *Plus*: 1.544 Mbps (DS1), 44.736 Mbps (DS3), EC-1 and OC3c. On-Net AC - Option 2: 1.544 Mbps (DS1). Off-Net AC - 1.544 Mbps (DS1) and 44.738 Mbps (DS3). See Tables 1 through 5 following for matrices of the various port connection possibilities based on bandwidth availability. Table 6 gives equivalent access port connection capacities of the five SVO options.

1. Synchronous Broadband Network Services (Cont'd)

31.3 ReliaNet Service (Cont'd)

31.3.1 Service Description (Cont'd)

The basic ReliaNet rate elements are described in more detail as follows. Refer to Figure 1 following for graphic illustration of the rate elements as described following.

ReliaNet will be available in specified cities as follows:

Little Rock, AR
Kansas City, MO
St. Louis, MO
Kansas City, KS
Topeka, KS
Wichita, KS
Oklahoma City, OK
Tulsa, OK
Austin, TX
Dallas, TX
El Paso, TX
Ft. Worth, TX
Houston, TX
San Antonio, TX

The specific serving wire centers (ReliaNet nodes) equipped to provide ReliaNet are found in the National Exchange Carrier Association (NECA), Inc. Tariff F.C.C. No. 4.

There will be no provisions for utilizing SecureNet service options on services ordered for interconnection with ReliaNet.

31. Synchronous Broadband Network Services (Cont'd)31.3 ReliaNet Service (Cont'd)31.3.1 Service Description (Cont'd)

31. Synchronous Broadband Network Services (Cont'd)31.3 ReliaNet Service (Cont'd)31.3.2 Rate Regulations - (ReliaNet)

This section contains specific regulations governing the rates and charges for ReliaNet.

Effective November 1, 2017, Competitive Counties and Non-Competitive Counties have been established and are defined in Section 2.7 and the wire centers within such counties are listed in Sections 15.2(C) and (D).

For all rate elements in Section 31.3, price flex rates and charges, as provided in Section 39.5.2, apply, subject to service availability,⁽¹⁾ regardless of whether the county is Competitive or Non-Competitive.

If the Telephone Company initiates rate changes resulting in a decrease of rates, for an existing service with a 1, 3, 4 or 5 year minimum period, those rate changes will be passed along to the customer. Rate changes resulting in an increase of rates for an existing 1, 3, 4 or 5 year billing period will not exceed the original rate for that selected bill period. Rate changes may occur as a result of F.C.C. action.

Other Access Services used in conjunction with ReliaNet are governed by specific regulations and applicable rates and charges set forth in other sections of this tariff unless otherwise noted herein.

Customers of MegaLink Custom (DS3) Service ordered from Section 20 of this tariff may move DS3 services over to ReliaNet SVOs without termination liability provided conditions are met as set forth in 20.4.6. Provisions for this move are provided in Section 31.3.2(M) following. Customers of High Capacity Service (including OPP and HC-TPP pricing plans) may also move High Capacity (DS1) services to ReliaNet SVOs as set forth in Section 31.3.2(M) following.

(A) Rate Categories

There are four basic rate categories which apply to the ReliaNet service. 1) Master Access Connection, 2) Auxiliary Connection, 3) MAC to MAC Connection and 4) AC to AC Connection. The following are detailed descriptions of each category and its component rate elements:

⁽¹⁾ See Footnote 1 on Page 31-8.

31. Synchronous Broadband Network Services (Cont'd)31.3 ReliaNet Service (Cont'd)31.3.2 Rate Regulations - (ReliaNet) (Cont'd)(A) Rate Categories (Cont'd)(1) Master Access Connection (MAC)

Master Access Connections (MACs) provide the facilities and equipment for connecting the ReliaNet customer of record to the inter-office network. These connections utilize a ring architecture which provides fault-tolerance in the serving wire center and the loop transport. MACs may be ordered only if the customer's serving wire center and alternate serving wire center are nodes on the inter-office network. There are two options available for the MAC: Opt. A and Opt. B.

The MAC is the aggregation point for all the customer's traffic to or from the inter-office network. Specifically, it provides the SONET multiplexer(s) or FOTs (Fiber Optic Terminals) at the customer premises, electrical and fiber-optic terminating equipment, fiber loop transport to the inter-office network node(s), FOTs at the inter-office network node(s) and the plug-in units required to access the SONET bandwidth on the inter-office network.

MAC - Opt. A

The MAC - Opt. A provides for the connection of up to two customer premises locations to the inter-office network in those cases where the customer wishes to obtain fault-tolerance from the inter-office network to more than a single customer premises location. Should the customer desire to connect two customer premises to the ReliaNet, the MAC - Opt. A rate element provides flat-rated transport between the two customer premises.

31. Synchronous Broadband Network Services (Cont'd)31.3 ReliaNet Service (Cont'd)31.3.2 Rate Regulations - (ReliaNet) (Cont'd)(A) Rate Categories (Cont'd)(1) Master Access Connection (MAC) (Cont'd)MAC - Opt. B

The MAC - Opt. B provides for the connection of one customer premises location to the interoffice network where serving wire center redundancy is not required. The MAC - Option B provides a redundant fiber loop to a single serving wire center location on the interoffice network and therefore does not provide protection for the serving wire center of this ReliaNet option.

The MAC - Opt. A is available in SVOs of (3), (6), (12), (24) and (48). The MAC - Opt. B is available in SVOs of (3), (6) and (12). Both MAC - Opt. A and B offer the following access port hand-offs: EC-1, 44.736 Mbps (DS3), OC3, OC3c, and OC12.

If customer's initial MAC is SVO (12) or greater, and the customer is utilizing the OC12 Sonet-based Interface option on that MAC, one additional OC12 interface may be specified at that MAC location. All MAC volume options may be ordered and used when the additional OC12 interface is ordered. For example, an SVO (3) or (6) may be ordered with the second OC12 Sonet-based Interface option, however the usable bandwidth above the SVO option ordered is not available on that second OC12 interface. See Table 5 for bandwidth available on SVOs. When the additional OC12 interface is utilized to capacity, another additional OC12 interface may be specified.

See Table 1 preceding in 31.3.1 for matrices of the various port connection possibilities based on bandwidth availability. Both MAC options are available in 3, 4 and 5 year Minimum Periods. There is no Connection Portability available on the MAC.

31. Synchronous Broadband Network Services (Cont'd)

31.3 ReliaNet Service (Cont'd)

31.3.2 Rate Regulations - (ReliaNet) (Cont'd)

(A) Rate Categories (Cont'd)

(2) Auxiliary Connection (AC)

The Auxiliary Connection is an optional connection provided in those situations where ReliaNet customers, who have ordered a MAC, desire to interconnect other customers to their ReliaNet via subtending connections.

This rate element provides the FOTs at the customer premises, fiber facilities between the customer premises and the inter-office network node (only with On-Net Options 1 and 2), FOTs in the inter-office network necessary to convert the SVO signal of the AC to the required connection bandwidth on the Telephone Company network, and all fiber facilities within the inter-office network (when applicable) from the point of connection at the AC to the point of connection at the MAC serving wire center(s). This element also includes the associated plug-in units and DSX cross-connection equipment necessary to connect the incoming service to the inter-office network node on the ReliaNet.

31. Synchronous Broadband Network Services (Cont'd)31.3 ReliaNet Service (Cont'd)31.3.2 Rate Regulations - (ReliaNet) (Cont'd)(A) Rate Categories (Cont'd)(2) Auxiliary Connection (Cont'd)

There are three basic categories offered under the AC rate category: On-Net, Off-Net and Intra-MAC.

On-Net ACs are auxiliary connections of three types or options.

On-Net Option 1 is for those customer premises which have redundant fiber facilities to their serving wire center, which is a node located on the Telephone Company inter-office network.⁽¹⁾

On-Net Option 1 Plus is for those customer premises which have both redundant fiber facilities as well as redundant serving wire centers located on the inter-office network.

Both the On-Net Option 1 and Option 1 Plus ACs provide the FOTs at the customer premises and at the inter-office network node necessary to convert the SVO signal to the required connection bandwidth. They also provide the fiber loop facilities from the customer premises to the inter-office network (redundant routes) and the inter-office mileage to the point(s) of contact with the MAC serving wire center(s) node. Also included in both On-Net AC Option 1 rate elements are the associated plug-in units, DSX cross-connection equipment necessary to connect the incoming service to the inter-office network node on the ReliaNet.

On-Net Option 1 AC will provide facility redundancy between the customer premises and the inter-office network but will not provide complete redundancy due to the single node link at the inter-office network. Complete redundancy is, however, provided from this point of connection at the ReliaNet node to the MAC customer premises.

On-Net Option 1 Plus provides complete redundancy, including serving wire protection, from the customer's premises at the On-Net connection to the customer premises at the ReliaNet MAC connection.

(1) In some limited circumstances, depending on availability of facilities, for EC-1, DS3 and OC3c interfaces, the fiber facilities from the customer premises to the serving wire center will be single loop rather than redundant. As noted in Tariff F.C.C. No. 73, Section 20.1, by the end of 1997, all but 100 of the current lines in SWBT territory will be served from wire centers providing Loop Redundancy.

31. Synchronous Broadband Network Services (Cont'd)31.3 ReliaNet Service (Cont'd)31.3.2 Rate Regulations - (ReliaNet) (Cont'd)(A) Rate Categories (Cont'd)(2) Auxiliary Connections (Cont'd)

On-Net Option 2 is for those customer premises whose serving wire center is a node on the inter-office network but whose premises do not have redundant fiber facilities to their serving wire center on the network. This On-Net AC rate element provides the FOTs at the customer premises and at the inter-office network nodes necessary to convert the SVO signal to the required connection bandwidth. It also provides the fiber loop facilities from the customer premises to the inter-office network (single non-redundant route) and the inter-office mileage to the point of contact with the MAC serving wire center(s). Also included in the Off-Net AC rate element are the associated plug-in units, DSX cross-connection equipment necessary to connect the incoming service to the inter-office network node on the ReliaNet.

Off-Net AC is for those customer premises whose serving wire center is not a node on the Telephone Company inter-office network. The Off-Net AC rate element provides the DSX cross-connection equipment necessary to interconnect the incoming or outgoing Special Access service to the ReliaNet inter-office network node. It also provides the inter-office mileage (flat-rated) to the point of contact with the MAC serving wire center(s). In addition to the Off-Net AC rate element, the customer will also be required to purchase channel terminations and inter-office mileage from his serving wire center to the nearest appropriate inter-office network node (as determined by the Telephone Company). The Channel Termination and mileage (as required) will be purchased from the appropriate Special Access service tariff from which the baseline service would normally be ordered (e.g., Section 7.3.10 for High Capacity [DS1] service or Section 20.1 for MegaLink Custom [DS3] service). Multiplexer options are available only for High Capacity service used in conjunction with ReliaNet Off-Net ACs.

31. Synchronous Broadband Network Services (Cont'd)31.3 ReliaNet Service (Cont'd)31.3.2 Rate Regulations - (ReliaNet) (Cont'd)(A) Rate Categories (Cont'd)(2) Auxiliary Connections (Cont'd)

Intra-MAC AC is for those customer premises who have as their serving wire center the primary serving wire center of the MAC for that particular ReliaNet. There are two options for the Intra-MAC AC - the basic Intra-MAC and Intra-MAC Plus.

Intra-MAC

In this configuration the customer's serving wire center shares the same wire center as the MAC, therefore, no inter-office facilities are required to transport the AC traffic to the MAC. No alternate serving wire center protection is provided on the Intra-MAC.

Intra-MAC Plus

In this configuration the customer's serving wire center shares the same wire as the MAC (similar to the Intra-MAC); however, alternate serving wire center protection is provided, thus some inter-office transport is required and is provided as part of this rate element.

Both the Intra-MAC and Intra-MAC Plus AC rate elements provide the FOTs at the customer premises and at the inter-office network node(s) necessary to convert the SVO signal to the required connection bandwidth. They also provide the fiber loop facilities from the customer premises to the inter-office network node(s) (redundant routes when applicable)¹. No inter-office mileage need be ordered with this rate element. Also included in both Intra-MAC rate elements are the associated plug-in units, DSX cross-connection equipment necessary to connect the incoming service to the inter-office network node on the ReliaNet.

1 In some limited circumstances, depending on availability of facilities, for EC-1, DS3 and OC3c interfaces, the fiber facilities from the customer premises to the serving wire center will be single loop rather than redundant. As noted in Tariff F.C.C. No. 73, Section 20.1, by the end of 1997, all but 100 of the current MegaLink Custom lines in SWBT territory will be served from wire centers providing Loop Redundancy.

31. Synchronous Broadband Network Services (Cont'd)31.3 ReliaNet Service (Cont'd)31.3.2 Rate Regulations - (ReliaNet) (Cont'd)(A) Rate Categories (Cont'd)(2) Auxiliary Connection (Cont'd)

On-Net Option 2 and Off-Net ACs will not provide complete end-to-end facility redundancy due to the single facility link to the inter-office network, however, they will have complete facility redundancy from the point of connection at the inter-office network to the MAC customer premises.⁽¹⁾

The AC is available with access port hand-offs as follows: On-Net Option 1, Option 1 *Plus* and both Intra-MAC and Intra-MAC *Plus* ACs - EC-1, 1.544 Mbps (DS1), 44.736 Mbps (DS3) and OC3c. On-Net Option 2 - 1.544 Mbps (DS1) and Off-Net AC - 1.544 Mbps (DS1) and 44.736 Mbps (DS3). See Tables 2 - 5 preceding in 31.3.1 for matrices of the various port connection possibilities based on bandwidth availability. The DS1 port AC rate elements will be offered under 1 month, 3, 4 and 5 Year Minimum Periods. All other AC rate elements will be offered under 1, 3, 4 and 5 year Minimum Periods.

Any Off-Net AC (DS1 port) associated with an OPP (Optional Payment Plan - Sect. 7.2.19) or an HC-TPP (High Capacity-Term Pricing Plan - Sect. 7.2.20) account must be ordered to be co-terminous with the existing OPP or HC-TPP service, respectively. The High Capacity (DS1) services associated with these Off-Net ACs will remain under all applicable OPP or HC-TPP regulations as described in Section 7.2.19 or 7.2.20, respectively. Any On-Net AC (DS1 port) which, at the customer's request, is converted to the ReliaNet Service network will be removed from that customer's OPP or HC-TPP account [as specified in Section 7.2.19(C)(1)(c) - Decreasing the Minimum Monthly Revenue Commitment or 7.2.20(C)(6) - Upgrades of Service] and will then be charged and regulated by applicable ReliaNet rates, terms and conditions.

(1) This will also apply to those limited circumstances where EC-1, DS3 or OC3c interfaces are provisioned over single fiber loop facilities.

31. Synchronous Broadband Network Services (Cont'd)31.3 ReliaNet Service (Cont'd)31.3.2 Rate Regulations - (ReliaNet) (Cont'd)(A) Rate Categories (Cont'd)(2) Auxiliary Connection (Cont'd)

Although DS1 is the lowest bandwidth interface available on ReliaNet, the customer may connect Voice Grade Service or MegaLink Data Service as ordered under Sections 7.3.4 and 7.3.9, respectively, to an AC on a ReliaNet node. This connection can be made if the desired ReliaNet node is listed in National Exchange Carrier Association (NECA), Inc., Tariff F.C.C. No. 4 as having either DS1/DS0 or DS1/VG multiplexing capability.

The Auxiliary Connection Portability feature, as defined in Section 31.3.1(2) preceding, is available on all ACs, with the exception of the Intra-MAC ACs, provided that the new serving wire center is within the metropolitan area of that ReliaNet city and is listed in National Exchange Carrier Association (NECA), Inc., Tariff F.C.C. No. 4. Auxiliary Connection Portability will be provided only in those situations where facilities and equipment are available to do so. The cumulative quantity of SVOs, or equivalent, associated with the MAC must be maintained within the particular ReliaNet for the portability to be valid.

If the AC is not ordered directly by the MAC customer of record, the ordering customer is required to have a Letter of Agency from that MAC customer granting permission to utilize the ReliaNet network.

31. Synchronous Broadband Network Services (Cont'd)

31.3 ReliaNet Service (Cont'd)

31.3.2 Rate Regulations - (ReliaNet) (Cont'd)

(A) Rate Categories (Cont'd)

(3) MAC to MAC Connection

This rate element provides inter-office transport to allow the connection between one customer's MAC and a second MAC arrangement on the same ReliaNet network.

There are two arrangements under which the MAC to MAC Connection may exist. The first is where the two MACs being connected share the same primary serving wire center. The second is where the two MACs have different primary serving wire centers. The following rate structure is applicable to both arrangements.

MAC to MAC Connection is applicable on a per connection, per EC-1 basis. This rate element is non-distance sensitive and is incurred on a recurring and non-recurring charge basis. MAC to MAC Connection is available under 3, 4 and 5 Year Minimum Periods.

31. Synchronous Broadband Network Services (Cont'd)

31.3 ReliaNet Service (Cont'd)

31.3.2 Rate Regulations - (ReliaNet) (Cont'd)

(A) Rate Categories (Cont'd)

(4) AC to AC Connection

This rate element provides inter-office transport to allow the connection between one customer's AC and another AC on the same ReliaNet network.

There are two arrangements under which the AC to AC Connection may exist. The first is where the two ACs being connected share the same primary serving wire center. The second is where the two ACs have different primary serving wire centers. The following rate structure is applicable to both arrangements:

AC to AC Connection is applicable on a per connection, per EC-1, DS3 or OC3c basis. Since DS3 (44.736 Mbps) is the lowest bandwidth available for this connection, if DS1 signals are desired to be transported using this connection the customer will have to order a minimum of a DS3 level AC to AC Connection.

This rate element is non-distance sensitive and is incurred on a recurring and non-recurring charge basis. AC to AC Connection is available under 12 month, 3, 4 and 5 Year Minimum Periods.

The AC to AC Connection is available under the same Minimum Periods as its associated AC rate element as specified in Section 31.3.2(A) (2). A single AC to AC Connection rate (within each Minimum Period grouping) is applicable to the connection of all types and options of ACs (e.g., On-Net - all options, Intra-MAC, Off-Net).

31. Synchronous Broadband Network Services (Cont'd)31.3 ReliaNet Service (Cont'd)31.3.2 Rate Regulations - (ReliaNet) (Cont'd)(B) Nonrecurring Charges

Nonrecurring charges are one-time charges that apply for a specific work activity (e.g., installation or change to an existing service). Nonrecurring charges are applicable for initial and subsequent installations of service.

Easy Pay is a ReliaNet option which provides the customer the opportunity to pay nonrecurring charges on a monthly basis rather than in one up-front lump-sum payment. These charges are established on a contract term basis (12, 36, 48 or 60 month) and are incurred monthly along with any applicable recurring charges. Easy Pay Nonrecurring Charges for applicable ReliaNet rate elements are shown in detail on 31.3.3(E).

NRC Temporary Waiver

The Telephone Company will waive nonrecurring charges for all MACS and AC rate elements as follows:

<u>Minimum Period</u>	<u>Charges Waived</u>
36 Month	50% of Nonrecurring Charges
60 Month	100% of Nonrecurring Charges

The waiver period will end July 1, 2002. When the waiver period ends all nonrecurring charges will apply as set forth in 31.3.3 following.

(1) Nonrecurring Charges for MAC (Opt. A & B)

A nonrecurring charge applies on a per arrangement basis for each ReliaNet MAC ordered. The arrangement is defined as either a single or dual customer premises loop connection as described in 31.3.2(A) (1) preceding. Charges are set forth in 31.3.3.

(2) Nonrecurring Charges for On-Net AC - Opt. 1, Opt. 1 Plus, Intra-MAC, Intra-MAC Plus

A nonrecurring charge applies for each connection of an On-Net AC - Opt. 1, Opt. 1 Plus, Intra-MAC and Intra-MAC Plus customer premises to the ReliaNet interoffice network as described in 31.3.2(A) (2) preceding, on a first and additional basis, per EC-1, DS1, DS3 or OC3C. Charges are set forth in 31.3.3.

31. Synchronous Broadband Network Services (Cont'd)31.3 ReliaNet Service (Cont'd)31.3.2 Rate Regulations - (ReliaNet) (Cont'd)(B) Nonrecurring Charges (Cont'd)(3) Nonrecurring Charge for On-Net AC - Option 2

A nonrecurring charge applies for each connection of an On-Net AC - Opt. 2 customer premises to the ReliaNet interoffice network as described in 31.3.2(A)(2) preceding, on a first and additional basis, per each DS1 connection. Charges are set forth in 31.3.3.

(4) Nonrecurring Charge for Off-Net AC

A nonrecurring charge applies for each connection of an Off-Net AC customer premises to the ReliaNet interoffice network as described in 31.3.2(A)(2) preceding, on a first and additional basis, per each DS1 and DS3 connection. Charges are set forth in 31.3.3.

(5) Nonrecurring Charge for Service Rearrangements

Nonrecurring charges apply for Service Rearrangements or changes. Service Rearrangements are changes to existing services which do not result in either a change in Minimum Period requirements as set forth in 31.3.2(D) following. A change in service arrangement is a change in the physical location of the Point of Termination at the customer designated premises as set forth in 31.3.2(F) following.

A nonrecurring charge will apply per each ReliaNet channel (e.g., 45 Mbps, OC3, etc.) on a first and additional basis for the following change or combination of changes requested by the customer on the same Access Order and will be charged as set forth in 31.3.3(B)-(E).

- Change of Access Carrier Name Abbreviation (ACNA)
- Change of Billing Account Number (BAN)
- Change of customer Circuit Identification (CKR)

31. Synchronous Broadband Network Services (Cont'd)31.3 ReliaNet Service (Cont'd)31.3.2 Rate Regulations - (ReliaNet) (Cont'd)(B) Nonrecurring Charges (Cont'd)(5) Nonrecurring Charge for Service Rearrangements
(Cont'd)

The customer requesting the administrative service rearrangements will be responsible for all billing associated with the changes requested.

When a change of customer name and change in billing data (name, address, contact name, or telephone number) are requested in association with a change in the customer of record, the Access Order Charge will apply as set forth in Section 5.4(A) (Access Order Charge).

(6) Nonrecurring Charges for Easy Pay Option

The customer may elect to pay certain ReliaNet nonrecurring charges on SWBT's Easy Pay option. If this option is chosen, nonrecurring charges for applicable ReliaNet rate elements will be selected from the table on 31.3.3(E) in lieu of the nonrecurring charges as set forth in 31.3.3(B) (C) or (D). The monthly payment term (12 month, 3 Year, 4 Year or 5 Year) for the Easy Pay Option may be selected by the customer not to exceed the Minimum Period for the associated rate element. For example, if the customer orders a MAC with a 3 Year Minimum Period, the Easy Pay Option if desired, may be either 12 month or 3 Years.

The Easy Pay charges consist of the normal nonrecurring charges amortized over the specific Minimum Period with interest charges included at the rate of 9%. These charges will apply on a monthly basis, in addition to any other applicable recurring rates, for the duration of the Minimum Period.

(7) Nonrecurring Charges for Auxiliary Connection Portability

Nonrecurring Charges apply when a customer elects to relocate SVO bandwidth under the Auxiliary Connection Portability provision, as discussed in 31.3.2(A) (2). The nonrecurring charge will be assessed on a per relocated AC basis. The specific charge will be the nonrecurring charge associated with the particular rate element which is being relocated, as specified in 31.3.3.

31. Synchronous Broadband Network Services (Cont'd)

31.3 ReliaNet Service (Cont'd)

31.3.2 Rate Regulations - (ReliaNet) (Cont'd)

(B) Nonrecurring Charges (Cont'd)

(8) Nonrecurring Charges for MAC to MAC Connection

Nonrecurring Charges apply when the customer requests the connection of two ReliaNet MACs. A nonrecurring charge is assessed on a per connection, per EC-1 basis.

(9) Nonrecurring Charge for AC to AC Connection

Nonrecurring charges apply when the customer requests the connection of two ReliaNet ACs. A nonrecurring charge is assessed on a per connection, per EC-1 or DS3 basis. The charges are incurred on a first and additional basis.

31. Synchronous Broadband Network Services (Cont'd)31.3 ReliaNet Service (Cont'd)31.3.2 Rate Regulations - (ReliaNet) (Cont'd)(C) Monthly Recurring Rates

Monthly rates are recurring charges that apply each month that the service is provided and are specific to the Minimum Period selected by the customer.

(1) Monthly Recurring Rate for MAC - Opt. A & B

A monthly recurring rate will apply specific to the SVO selected by the customer. The MAC - Opt. A provides for connection of up to two customer premises locations to the inter-office network and includes flat-rated transport for distances up to 20 miles between the serving wire centers of the two customer premises locations. For calculation of this mileage, see Section 31.3.2(N) (Determining Transport Mileage).

The MAC - Opt. B provides for connection of one customer premises location to the interoffice network. Option B will only connect the customer to a single serving wire center on the interoffice network. MAC option A is available for SVO (3), (6), (12), (24) and (48). Both options are available at 3, 4 and 5 year Minimum Periods. MAC Opt. B is available for SVO (3), (6) and (12). Both options are available at 3, 4 and 5 year Minimum Periods.

(2) Monthly Recurring Rate for On-Net AC - Opt. 1, Opt. 1 Plus, Intra-MAC and Intra-MAC Plus

The monthly recurring Auxiliary Connection rate applies on a per each DS1, EC-1, DS3 and OC3C connection to the inter-office network. The same recurring rate applies independent of the size of the MAC SVO bandwidth. The On-Net AC - Opt. 1, Opt. 1 Plus, Intra-MAC (DS1 port) and Intra-MAC Plus (DS1 port) are available at 1 Month, 3, 4 and 5 year Minimum Periods. All other On-Net AC - Opt. 1, Opt. 1 Plus and Intra-MAC ports are available at 1, 3, 4 and 5 year Minimum Periods. Volume pricing is available for the On-Net AC - Opt. 1 and is applicable for EC-1 and DS3 port connections for quantities of (3), (6) or (12) EC-1s or DS3s, respectively. The monthly recurring rate for these volume priced ACs applies on a per each EC-1 or DS3 connection basis, however must be purchased in quantities of (3), (6), or (12) per service order to obtain these rates.

31. Synchronous Broadband Network Services (Cont'd)31.3 ReliaNet Service (Cont'd)31.3.2 Rate Regulations - (ReliaNet) (Cont'd)(C) Monthly Recurring Rates (Cont'd)(3) Monthly Recurring Rate for On-Net AC - Option 2

The monthly recurring Auxiliary Connection rate applies on a per DS1 connection to the inter-office network. The same recurring rate applies independent of the size of the MAC SVO bandwidth and is available at 1 month, 3 year, 4 year and 5 year Minimum Periods.

(4) Monthly Recurring Rate for Off-Net AC

The monthly recurring Auxiliary Connection rate applies on a per each DS1 and DS3 connection to the inter-office network. The same recurring rate applies independent of the MAC SVO bandwidth. The Off-Net AC (DS1 port) is available at 1 month, 3 year, 4 year and 5 year Minimum Periods. The DS3 Off-Net AC ports are available at 1 year, 3 year, 4 year and 5 year Minimum Periods.

With the Off-Net AC, the customer will be required to purchase Channel Termination and inter-office mileage from his serving wire center to the nearest appropriate inter-office network node (as determined by the Telephone Company). These rate elements will be purchased from the appropriate Special Access service tariff from which the baseline service would normally be ordered (e.g., Section 7.3.10 for High Capacity [DS1] service or Section 20.1 for MegaLink Custom [DS3] service).

31. Synchronous Broadband Network Services (Cont'd)

31.3 ReliaNet Service (Cont'd)

31.3.2 Rate Regulations - (ReliaNet) (Cont'd)

(C) Monthly Recurring Rates (Cont'd)

(5) Monthly Recurring Rate for MAC to MAC Connection

A monthly recurring rate applies to the MAC to MAC Connection as follows:

A recurring rate applies on a per connection, per EC-1 basis and is available at 3, 4 and 5 year Minimum Periods.

(6) Monthly Recurring Rate for AC to AC Connection

A monthly recurring rate applies to the AC to AC Connection as follows:

A recurring rate applies on a per connection, per EC-1 or DS3 basis and is available at 1, 3, 4 and 5 year Minimum Periods.

(7) Monthly Extension Rate

Upon expiration of an initial 48 month Minimum Period or a 4 Year Renewal the customer can subscribe to a new service or disconnect service. If the customer does not elect to subscribe to a new service or disconnect service, the Telephone Company will convert the customer's service to the monthly extension rates as listed in Section 31.3.3(F) and/or Section 39.5.2.13(A) (7).

(D) Minimum Period

ReliaNet rate elements are provided for a Minimum Period of 1, 12, 36, 48 or 60 months, at the customer's option. Not all rate elements are available at every Minimum Period. Applicable Minimum Period, are set forth in 31.3.2 (c) preceding.

When a service is discontinued prior to the expiration of the Minimum Period, the applicable charge will be the termination charges as described in Section 31.3.2(K) following.

The Minimum Period of an AC cannot exceed the remaining portion of the Minimum Period of its associated MAC.

31. Synchronous Broadband Network Services (Cont'd)

31.3 ReliaNet Service (Cont'd)

31.3.2 Rate Regulations - (ReliaNet) (Cont'd)

(E) Recast of Minimum Period

When a customer elects to recast (i.e., change) a ReliaNet Minimum period and no physical work is required, the nonrecurring charges as set forth in 31.3.2(B) preceding will not apply.

When a customer elects to recast a ReliaNet Minimum Period and physical work is required, only the applicable nonrecurring charges for the work being done will apply.

Nonrecurring charges as set forth in Section 5 (Ordering for Access Service) preceding which may be associated with ordering ReliaNet will apply.

(F) Moves

A move involves a change in the physical location of the Point of Termination within the customer's premises, or the move of the Point of Termination of an existing service to a new customer premises location as follows:

(1) Relocation

A move of the Point of Termination within the customer's premises will be treated as an extension of the Access Connection. Extension of the Access Connection will be provided, at the customer's request, on a time-sensitive charge basis. The labor rates which apply are as set forth in Section 13.4 (Rates and Charges) preceding. There will be no change in Minimum Period requirements.

A move of the Point of Termination which requires a change in customer premises location will also be treated as a relocation and charges will apply as set forth in the preceding paragraph. In addition, if the move of the customer's premises location involves a change in serving wire center, the situation may exist that the new serving wire center may not be included on the inter-office Network. If this is the case, the resulting move procedure will include the purchase of the Auxiliary Connection as described in 31.3.2(A) (2).

31. Synchronous Broadband Network Services (Cont'd)31.3 ReliaNet Service (Cont'd)31.3.2 Rate Regulations - (ReliaNet) (Cont'd)(G) Additions of Service

The customer may elect to add service at any time subsequent to the initial installation of ReliaNet. All appropriate rate elements apply. The monthly recurring rates and nonrecurring charges for each subsequent addition shall be the same as those in effect at the time the service was initially established, except in those cases where a lower rate/charge has been subsequently introduced. In this case, the rates/charges will be those currently in effect. In the event that the customer initially purchased service during the nonrecurring charge waiver period and subsequently orders additional service after the waiver period has ended (May 1, 1998), the normal nonrecurring charge (at the time of service establishment) will apply to the additional rate elements. Any additions to service subsequent to the initial order but prior to the end of the nonrecurring waiver will continue to have nonrecurring charges waived.

Subsequent service additions are for a given ReliaNet arrangement and may not exceed the Minimum Period of the associated MAC rate element and are subject to all applicable ReliaNet terms and conditions.

In the event the ReliaNet customer elects a renewal option listed in Section 31.3.2 (H) at the rates listed in Section 31.3.3(D) and/or 39.5.2.13(A) (4), the rates for subsequent ACs placed on renewed MAC arrangements will be the ReliaNet renewal rates in effect at the time the customer renewed the given MAC arrangement.

31. Synchronous Broadband Network Services (Cont'd)31.3 ReliaNet Service (Cont'd)31.3.2 Rate Regulations - (ReliaNet) (Cont'd)(H) Optional Renewal Periods

ReliaNet offers three Optional Renewal plans - Annual, 4 Year and 5 Year Renewals. The customer, at the end of their initial Minimum Period, may select one or the other of the two following plans. The plans may not be mixed once one is selected. Regulations for the three plans are as follows.

(1) Annual Renewal⁽¹⁾

Upon completion of the 12, 36 or 60 month Minimum Period, the customer may elect to annually renew ReliaNet for up to five (5) one-year periods, terminate ReliaNet under provisions in Section 31.3.2(K) following, or absent either of those elections, continue on a month-to-month arrangement at the last month's charges as set forth in 31.3.3(A) or 31.3.3(B) following. If the customer elects to renew, the monthly recurring charges for each of the Optional Renewal Periods will be the customer's monthly recurring charges at the conclusion of the immediately preceding Minimum Period or Optional Renewal Period and modified by the following table:

<u>Optional Renewal Year</u>	<u>MAC Multiplier</u>	<u>AC Multiplier</u>
1	.90	.99
2	.95	.99
3	.95	.99
4	.95	.99
5	.95	.99

EXAMPLE

Assume the customer has a MAC with a monthly recurring charge of \$42,670.50 and elects to renew for a one-year period for each of the next two consecutive years. The monthly recurring charge in this example would be calculated as follows:

Year

1	$\$42,670.50 \times .90 = \$38,403.45$
2	$\$38,403.45 \times .95 = \$36,483.27$

(1) This offering is obsolete and limited to existing customers at existing locations as of March 9, 2001.

31. Synchronous Broadband Network Services (Cont'd)31.3 ReliaNet Service (Cont'd)31.3.2 Rate Regulations - (ReliaNet) (Cont'd)(H) Optional Renewal Periods (Cont'd)(2) 4 Year Renewal

Upon completion of a 12 month minimum period or the initial 36, 48 or 60 month Minimum Period, the customer may elect to renew the ReliaNet for a full 4 year renewal period.

(3) 5 Year Renewal

Upon completion of the 12⁽¹⁾, 36, 48 or 60 month Minimum Period, the customer may elect to renew the ReliaNet for a full 5 year renewal period.

If the customer chooses this renewal option, the Optional Renewal Period monthly recurring charges will be the customer's monthly recurring charges at the conclusion of the immediately preceding Minimum Period modified by the following table:

Optional Renewal Term	MAC Multiplier	AC Multiplier
5 Years	.70 (Rx)	.70 (Rx)

EXAMPLE

Assume the customer has an AC with a monthly recurring charge of \$10,000 and a MAC with a monthly recurring charge of \$40,000 and elects to renew for a full 5 year Minimum Period. The monthly recurring charge in this example would be calculated as follows:

Years

$$1-5 \quad (\$10,000 \times .70) + (\$40,000 \times .70) = \$35,000$$

(I) Special Access Surcharge

Regulations for the Special Access Surcharge apply for all jurisdictionally interstate special access facilities as set forth in Section 7.2.5 (Surcharge for Special Access Service) preceding.

(J) Message Station Equipment Recovery Charge

Regulations for the Message Station Equipment Recovery Charge apply as set forth in Section 7.2.17 (Message Station Equipment Recovery Charge) preceding.

31. Synchronous Broadband Network Services (Cont'd)

31.3 ReliaNet Service (Cont'd)

31.3.2 Rate Regulations - (ReliaNet) (Cont'd)

(K) Termination Options

(1) Complete Termination

No termination liability charge applies for complete termination.

(2) Partial Termination

No termination liability charge applies for partial termination.

ACCESS SERVICE

39. Metropolitan Statistical Area Access Services39.1 General Description

- (A) This section of the tariff provides the regulations, rates and, terms and conditions that apply to telecommunications services provided by the Telephone Company in the Metropolitan Statistical Areas (MSAs) in which the Telephone Company has received Phase II pricing flexibility pursuant to Subpart H of Part 69 of the Commission's Rules. MSAs are divided into the categories below:

(1) Full Service MSAs

Full Service Relief MSAs are those MSAs which qualified for Phase II pricing flexibility for all elements of service, i.e., local channels (channel terminations) between LEC end offices and customer (end user) premises; entrance facilities; dedicated interoffice facilities; local channels (channel terminations) between an interexchange carrier's point of presence and a serving wire center. The Full Service Relief MSAs are set forth in Section 39.2(A), following.

(2) Limited Service MSAs

Limited Service Relief MSAs are those MSAs that qualified for Phase II pricing flexibility for all elements of service except local channels (channel terminations) between a LEC end office and a customer (end user) premise. The Limited Service Relief MSAs are set forth in Section 39.2(B), following.

- (B) The services provided in MSAs pursuant to this section of the tariff are set forth in Section 39.3 following. These services are comparable to the SWA Dedicated Transport Services in Sections 6.9.2(A)(1), 6.9.2(A)(3), 6.9.2(B)(1), 6.9.2(B)(3), 6.9.2(B)(4), 6.9.2(F), and 6.9.2(G)⁽¹⁾. The general regulations, service descriptions and rate regulations for the SWA Dedicated Transport Services in Section 6⁽¹⁾ are also applicable to the services specified in this section, except as provided below.

An exception in 39.4(F) applies for term pricing plans.

- (C) Unless otherwise provided for in this section, regulations set forth in Sections 1, 2, 5, 13 and 15 are also applicable.

⁽¹⁾ Material in this section has been de-tariffed pursuant to FCC Order 17-43, released April 28, 2017. Terms and Conditions for de-tariffed services are available at www.att.com/guidebook.

ACCESS SERVICE

39. Metropolitan Statistical Area Access Services (Cont'd)39.2 Metropolitan Statistical Areas

(A) Full Service Relief MSAs are listed below:

State	MSA
Arkansas	Fayetteville/Springdale
Arkansas	Little Rock ⁽²⁾
Kansas	Topeka ⁽²⁾
Missouri	St. Joseph
Missouri	Springfield
Oklahoma	Lawton
Texas	Abilene
Texas	Amarillo ⁽¹⁾
Texas	Corpus Christi ⁽³⁾
Texas	Longview-Marshall
Texas	Lubbock
Texas	Midland ⁽³⁾
Texas	San Antonio ⁽⁴⁾

(B) Limited Service Relief MSAs are listed below:

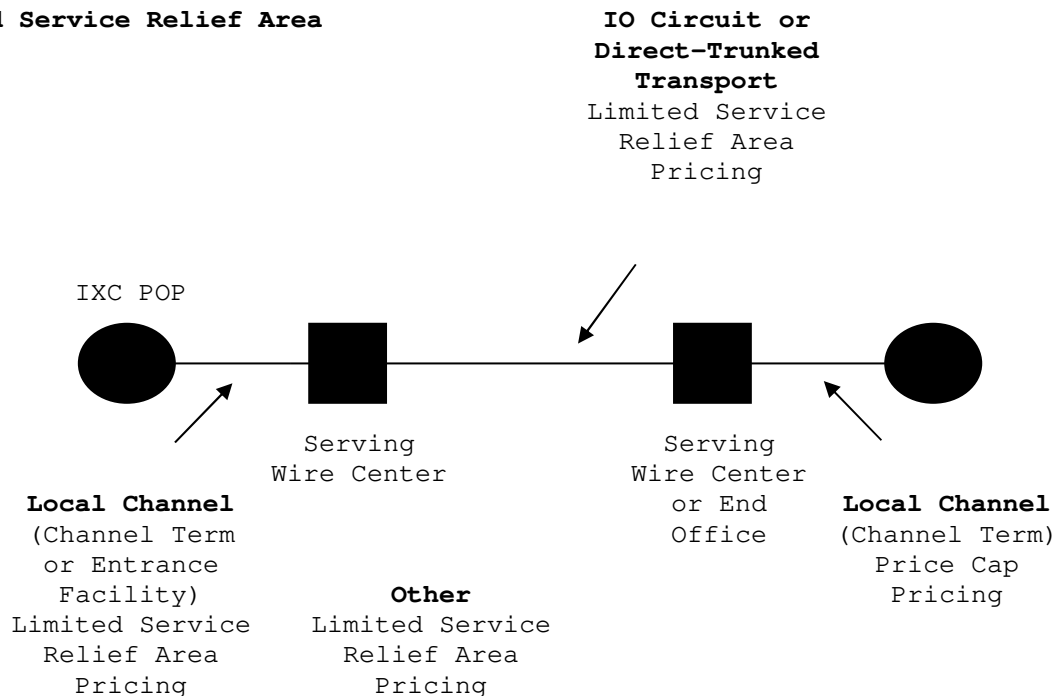

State	MSA	State	MSA
Arkansas	Fort Smith	Texas	Austin-San Marcos
Arkansas	Memphis	Texas	Brownsville-Harlingen
Kansas	Kansas City	Texas	Dallas/Ft. Worth
Kansas	Wichita	Texas	Houston
Missouri	Joplin	Texas	McAllen/Edinburg
Missouri	Kansas City		
Missouri	St. Louis	Texas	Tyler
Oklahoma	Fort Smith	Texas	Waco
Oklahoma	Oklahoma City	Texas	Wichita Falls
Oklahoma	Tulsa		

- (1) This MSA previously qualified for Limited Service Relief and is now qualified for Full Service Relief per the April 11, 2002 approval of Southwestern Bell's most recent Price Flex petition, Memorandum Opinion and Order, CCB/CPD No. 01-35, DA 02-283.
- (2) This MSA previously qualified for Limited Service Relief and is now qualified for Full Service Relief per the May 15, 2003 approval of Southwestern Bell's most recent Price Flex petition, Memorandum Opinion and Order, WCB/Pricing No. 03-8, DA 03-1721.
- (3) This MSA previously qualified for Limited Service Relief and is now qualified for Full Service Relief per the May 25, 2005 approval of Southwestern Bell's most recent Price Flex petition, Memorandum Opinion and Order, WCB/Pricing No. 05-16, DA 05-1525.
- (4) This MSA previously qualified for Limited Service Relief and is now qualified for Full Service Relief pursuant to Southwestern Bell Telephone Company's Price Flex petition, WCB/Pricing No. 12-05, DA 12-1000, being deemed granted by operation of law effective June 25, 2012.

ACCESS SERVICE

39. Metropolitan Statistical Area Access Services (Cont'd)39.4 Rate Regulations (Cont'd)

- (B) Figure 2 illustrates services provided within an MSA located in a Limited Service Relief Area. The rates and charges for all associated rate elements for services in a Limited Service Relief Area are contained in Section 39.5⁽¹⁾, of this Tariff.

Limited Service Relief Area**Figure 2**

⁽¹⁾ Material in this section has been de-tariffed pursuant to FCC Order 17-43, released April 28, 2017. Terms and Conditions for de-tariffed services are available at www.att.com/guidebook.

ACCESS SERVICE

39. Metropolitan Statistical Area Access Services (Cont'd)39.4 Rate Regulations (Cont'd)

- (C) Figure 3 illustrates a service provided from two MSA's with one MSA located in a Full Service Relief Area and one MSA located in a Limited Service Relief Area. The rates and charges for local channels and optional features located in the Full Service Relief Area are obtained as previously stated in 39.4(A). The rates and charges for local channels and optional features located in the Limited Service Relief Area are obtained as stated in 39.4(B). Interoffice channels between a Full Service Relief Area and a Limited Service Relief Area are rated the same as that of an interoffice channel in a Limited Service Relief Area and rates and charges are obtained as stated in 39.4(B), preceding.

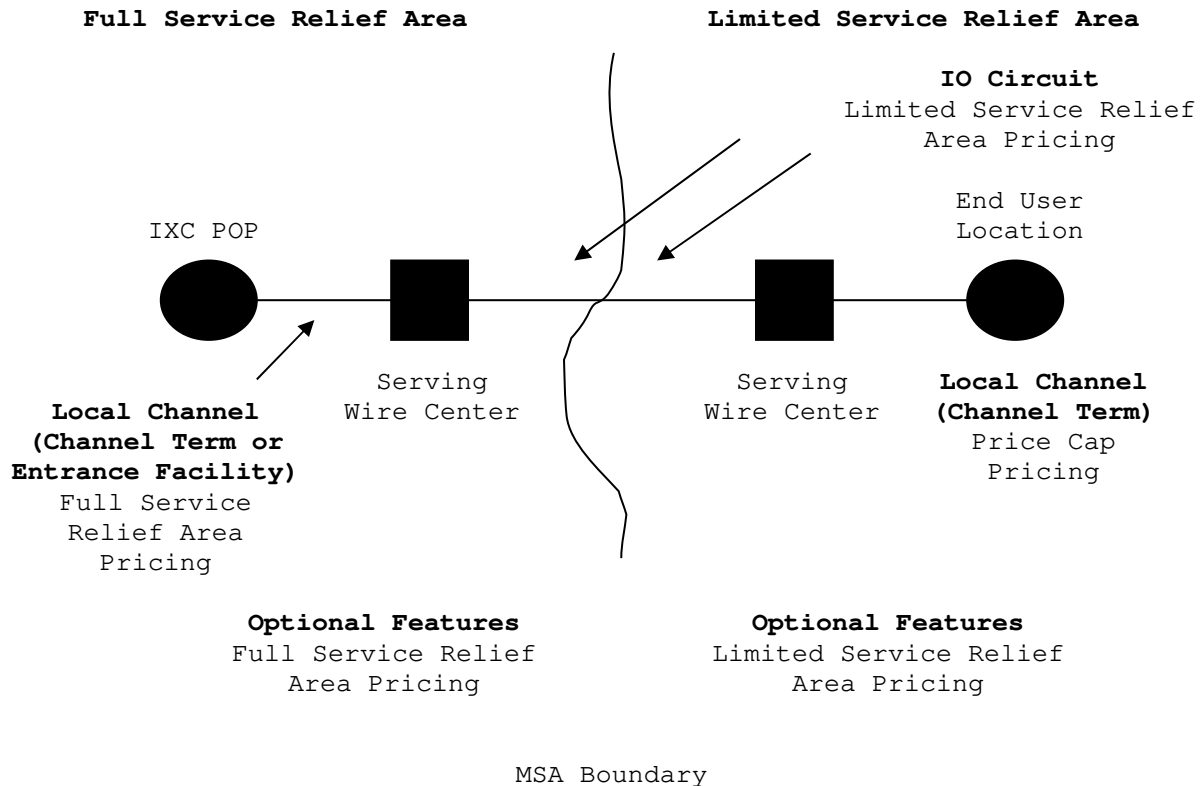

Figure 3

ACCESS SERVICE

39. Metropolitan Statistical Area Access Services (Cont'd)39.4 Rate Regulations (Cont'd)

- (D) Figure 4 illustrates a service provided from two MSAs with one MSA located in a Full Service Relief Area and one MSA located in a Non-Relief Area. The rates and charges for local channels and optional features located in the Full Service Relief Area are obtained as stated in 39.4(A) preceding.

Interoffice channels between a Full Service Relief Area and a Non-Relief Area are rated the same as that of an interoffice channel in a Non-Relief Area.

Rates and charges for local channels, interoffice channels and optional features in a Non-Relief Area are obtained in Sections 6.9.2(A) (1), 6.9.2(A) (3), 6.9.2(B) (1), 6.9.2(B) (3), 6.9.2(B) (4), 6.9.2(F), and 6.9.2(G) ⁽¹⁾ of this Tariff.

ACCESS SERVICE

39. Metropolitan Statistical Area Access Services (Cont'd)

39.4 Rate Regulations (Cont'd)(F) Term Pricing Plans

For the purpose of Metropolitan Statistical Area Access Services, the following plans apply when referring to Term Pricing Plans:

- Optional Payment Plan (OPP)⁽¹⁾
- High Capacity Term Pricing Plan (HC-TPP)⁽²⁾
- Video Pricing Plan (VPP)
- DS1 Term Payment Plan (DS1 TPP)⁽⁴⁾⁽⁵⁾⁽⁷⁾
- The various pricing plans associated with Transport Resource Management (TRM) Service, Self-Healing Transport Network (STN)⁽³⁾, MegaLink Custom Service⁽⁶⁾, and ReliaNet Service.

For Term Pricing Plans beginning prior to November 25th, 2019:

The Telephone Company ensures that rates provided under a term pricing plan will not be increased by the Telephone Company above the rates in effect at the beginning of the Customer's term pricing plan period.

Customers under their current term pricing plan will continue to pay the rates in effect at the beginning of their plan period until the effective tariff rates in Section 39.5, following, become lower than the rates received under their term pricing plan.

For Term Pricing Plans beginning on or after November 25th, 2019:

New term plan customers will be required to pay the lower of: (1) the guide book term plan rate at time of billing; or (2) 120% of the initial rate in the first year of the contract, 144% in the second year of the contract, and 173% in the third year of the contract.

- (1) Effective May 17, 2003, High Capacity Service (1.544 Mbps) Optional Pricing Plan (OPP) service will no longer be available to new Customers. There will be no change to existing Customers. See Section 7.2.19(B) for conversion options.
- (2) Effective May 17, 2003, High Capacity Service (1.544 Mbps) Term Pricing Plan (HC-TPP) service will no longer be available to new Customers. There will be no change to existing Customers. See Section 7.2.20 for conversion options.
- (3) The Company currently plans to discontinue this Service on or after October 15, 2022. (Ref: WC Docket Nos. 09-185 and 11-179)
- (4) Effective November 1, 2022, DS1 Term Payment Plan 2- and 3-year and MegaLink Custom 3-year Payment Plans (collectively, Term Plan Services), are no longer available, including conversions. Existing Term Plan Services, as of November 1, 2022, will continue to be provided under the then-current terms, for the remainder of the applicable term.
- (5) See Page 147 for the 5- and 7- year Term Payment Plan availability.
- (6) See Page 169 for the 5- and 10- year Payment Plan availability.
- (7) Effective January 17, 2024, DS1 Term Payment Plan 1-year and MegaLink Custom 1-year Payment Plans (collectively, Term Plan Services) are no longer available, including conversions. Existing Term Plan Services on January 17, 2024, will continue to be provided for the remainder of the then-current terms.

ACCESS SERVICE

39. Metropolitan Statistical Area Access Services (Cont'd)

39.4 Rate Regulations (Cont'd)(F) Term Pricing Plans (Cont'd)

Additional pricing flexibility relief was granted on April 11, 2002 for certain MSAs as indicated in Section 39.2. Customers in these additional relief areas** that committed to new term pricing plans as outlined above on or after July 3, 2001 but before June 18, 2002 will pay the rates outlined in the following Table A. Customers in these relief areas signing new term pricing plans on or after June 18, 2002 will pay the rates outlined in Section 39.5.

Additional pricing flexibility relief was granted on May 15, 2003 for certain MSAs as indicated in Section 39.2. Customers in these additional relief areas** that committed to new term pricing plans as outlined above on or after July 4, 2001 will pay the rates outlined in Section 39.5.4. Customers in these relief areas signing new term pricing plans on or after June 13, 2003 will pay the rates outlined in Section 39.5.

Additional pricing flexibility relief was granted on May 12, 2006 for certain MSAs as indicated in Section 39.2. Customers in these relief areas signing new term pricing plans on or after June 3, 2006 will pay the rates outlined in Section 39.5.

The effective date provides the effective date upon which these rates are applicable. Customers in relief areas not falling into these specific situations would pay the rates outlined in Section 39.5.

** This includes approved services in new full relief areas, new limited relief areas, and channel termination services for those limited relief MSAs which are becoming full relief areas.

Material now appearing on this page previously appeared on 7th Revised Page 39-8.1.

(1) Effective October 27, 2016, MegaLink Data Service 128.0, 256.0, 384.0, 512.0 and 768.0 Kbps channels are limited to existing Customers for existing service arrangements; no new or additional term commitments of any kind, including any otherwise available renewals, will be available; and no move, add, or change orders will be accepted.

(2) Effective November 20, 2019, this Service will no longer be available for purchase by new or existing customers, and service agreements may no longer be renewed. In addition, requests to move, add or change existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable monthly extension rates until the service is discontinued. AT&T currently plans to discontinue this Service on or after June 30, 2024.

(1) Effective November 20, 2019, this Service will no longer be available for purchase by new or existing customers, and service agreements may no longer be renewed. In addition, requests to move, add or change existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable monthly extension rates until the service is discontinued. AT&T currently plans to discontinue this Service on or after June 30, 2024.

* The key activated control channel is rated as a Metallic Channel Termination (use USOC T6EME in lieu of T6ECS) and Channel Mileage, if applicable (use USOC 1L5MX in lieu of 1L5XX).

** An additional Channel Termination charge will apply whenever a spare channel is configured as a leg to the customer's premises. Additional channel mileage will also apply when the transfer arrangement is not located in the customer premises serving wire center.

- (1) Effective on September 13, 2017, DS1 TPP 5- and 7-year Payment Plans are no longer available, including for any otherwise available conversions. Circuits already subject to a DS1 TPP 5- or 7-year Payment Plan, as of September 13, 2017, will continue to be provided under the then-current DS1 TPP 5- or 7-year Payment Plan term for the remainder of that term.
- (2) Effective November 20, 2019, this Service will no longer be available for purchase by new or existing customers, and service agreements may no longer be renewed. In addition, requests to move, add or change existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable monthly extension rates until the service is discontinued. AT&T currently plans to discontinue this Service on or after June 30, 2024.
- (3) For DS1 TPPs effective on or after November 25th, 2019, see terms in section 39.4(F) of this guidebook.
- (4) Effective November 1, 2022, DS1 Term Payment Plan 2- and 3-year and MegaLink Custom 3-year Payment Plans (collectively, Term Plan Services), are no longer available, including conversions. Existing Term Plan Services, as of November 1, 2022, will continue to be provided under the then-current terms, for the remainder of the applicable term.
- (5) Effective January 17, 2024, DS1 Term Payment Plan 1-year and MegaLink Custom 1-year Payment Plans (collectively, Term Plan Services) are no longer available, including conversions. Existing Term Plan Services on January 17, 2024, will continue to be provided for the remainder of the then-current terms.

⁽¹⁾ The regulations below are effective December 4, 2012.⁽²⁾ The Company currently plans to discontinue this Service on or after October 15, 2022.
(Ref: WC Docket Nos. 09-185 and 11-179)

(x,y) For Volume Options 3, 6, 12, and 24, Customers may not purchase additional STN service; however, they may continue to purchase additional Digital Transport Links (DTL's) and directly related elements associated with an existing STN service, subject to existing capacity availability, for the remainder of any Minimum Period. Existing service will be provided according to all applicable rates, terms and conditions for the remainder of any Minimum Period. Upon the expiration of any Minimum Period, service will be provided on a month-to-month basis at the then-applicable month-to-month rate until service is discontinued by the Telephone Company. No new or additional Minimum Period commitments of any kind, including any otherwise available renewals, extensions or renegotiations, will be available. Upon the expiration of any Minimum Period commitment, no move, adds or change orders will be accepted.

(x,y) For Volume Options 36 and 48, Customers are limited to existing service and quantities at existing locations. The Telephone Company will not accept any requests for additions, partial disconnections, moves, upgrades or changes to STN Volume Options 36 and 48. Customers with existing Volume Options 36 and/or 48 will not be able to add access nodes, reconfigure the ring, or move access nodes. They may continue to add additional Digital Transmission Links (DTLs) and Interfaces at current Tariff rates.

x Issued under authority of Special Permission No. 12-036 of the F.C.C. in order to revise material filed under Transmittal No. 3361 before it becomes effective.

y Original effective date December 4, 2012.

(3) Effective October 25, 2014, MegaLink Custom Services 10-year term plans are no longer available for new circuits. There is no change for existing circuits.

(4) Effective on September 13, 2017, MegaLink Custom Services 5-year Payment Plans are no longer available, including for any otherwise available renewals or conversions. Circuits already subject to a MegaLink Custom Services 5-year Payment Plan, as of September 13, 2017, will continue to be provided under the then-current MegaLink Custom Services 5-year Payment Plan term for the remainder of that term.

(5) For MegaLink Custom Services effective on or after November 25th, 2019, see terms in section 39.4(F) of this guidebook.

(6) Effective November 1, 2022, DS1 Term Payment Plan 2- and 3-year and MegaLink Custom 3-year Payment Plans (collectively, Term Plan Services), are no longer available, including conversions. Existing Term Plan Services, as of November 1, 2022, will continue to be provided under the then-current terms, for the remainder of the applicable term.

(7) Effective January 17, 2024, DS1 Term Payment Plan 1-year and MegaLink Custom 1-year Payment Plans (collectively, Term Plan Services) are no longer available, including conversions. Existing Term Plan Services on January 17, 2024, will continue to be provided for the remainder of the then-current terms.

(2) For MegaLink Custom Services effective on or after November 25th, 2019, see terms in section 39.4(F) of this guidebook.

(3) Effective November 1, 2022, DS1 Term Payment Plan 2- and 3-year and MegaLink Custom 3-year Payment Plans (collectively, Term Plan Services), are no longer available, including conversions. Existing Term Plan Services, as of November 1, 2022, will continue to be provided under the then-current terms, for the remainder of the applicable term.

(4) For MegaLink Custom Services 5- and 10-year Payment Plans, see Page 169.

(5) Effective January 17, 2024, DS1 Term Payment Plan 1-year and MegaLink Custom 1-year Payment Plans (collectively, Term Plan Services) are no longer available, including conversions. Existing Term Plan Services on January 17, 2024, will continue to be provided for the remainder of the then-current terms..
