The following equation based on CCS and distance is used to determine the applicable monthly charge. The number of lines located 0 to 15 miles and 15 or more miles from the Hub location are used in the equation.

$(\text{Total remote lines within 0 to 15 miles}) (\$CCS) / (\text{Total remote lines in Network}) + (\text{Total remote lines beyond 15 miles}) (\$CCS) / (\text{Total remote lines in Network}) + \$1.00 = \text{Price per line per month (Rounded to the nearest multiple of \$.05)}$.

Virtual Route Selection

The following prices for Virtual Route Selection are in addition to charges for CVN.

The following equation is based on CCS and distance is used to determine the applicable monthly price. The number of remote lines located 0 to 15 miles and 15 or more miles from the hub are used. The price per remote line is applied to each remote line in the network.

$$\begin{aligned} & (\text{Total remote lines within 0-15 miles}) (\$CCS) / (\text{Total remote lines in the Network}) \\ + & (\text{Total remote lines within 15+ miles}) (\$CCS) / (\text{Total remote lines in the Network}) \\ + & \$1.22 \\ = & \text{Price per remote line per month (Rounded to the nearest multiple of } \$0.05 \\ & \text{/16KFX/} \end{aligned}$$

The Company reserves the right to reassess the pricing of the Carrier's customer's network if the negotiated CCS is exceeded.

Nonrecurring Charges and charges/prices for optional *Out of Network Numbers* are found under the Area Wide Networking feature described elsewhere in this offering.

Regional CVN (RCVN)

The following equation is used to determine the monthly price:

$$\text{RCVN}^{/1/}, \text{ per line} = (1.5) * (\text{weighted average price of CVNs in Carrier's customer's network})$$

/1/ Use a factor of 1.2 if Carrier's customer subscribes to VRS. The price for VRS is in addition to the price for RCVN. All remote locations must have VRS for the 1.2 factor to apply.
