A. General

Disaster Routing Service (DRS) enables customers to forward incoming telephone calls placed to multiple telephone numbers, en masse, to multiple telephone numbers at one or more locations, based on one of three predetermined destination options being active. Calls may only be forwarded to direct-dial telephone numbers, excluding international numbers. The customer can identify up to three destination routing options; however, only one destination option can be active at any time. The destination options will be denoted as Option 1, 2 or 3. Option 1 will be active when service is initially established. The Company will provide the customer with a password for each DRS group. For security purposes, the password and the group number will be required to change the destination routing options. DRS groups may also include telephone numbers equipped with Intelligent RedirectSM.

This service is not designed to restore service in the event that the customer's switching office is out of service. Calls may not be forwarded if the Company's central office or other network failures or limitations prevent the call from being delivered to the customer's number in the central office.

B. Regulations

1. All telephone numbers equipped with DRS must be included in one of the customer's groups. A group is a set of telephone numbers that will be forwarded in the same way, i.e., the same option must be active for all telephone numbers in a group. Each group must include at least one telephone number. A telephone number may only be included in one group. There is no upper limit on the quantity of numbers in one group.
2. DRS is available on telephone numbers associated with business lines or trunks. This service is available for use only with voice applications. It may not be used with data applications (e.g., on-line data transmission) or to avoid toll. DRS will not be provided in connection with Residence, Payphone Exchange Access Service, TeleBranch[®], Mobile Telephone Service or Personalized Ring.
3. The customer must identify the Primary Interexchange Carrier(s) (PICs) for telephone numbers that cannot initiate outbound calls and therefore have no PIC(s), such as Direct Inward Dialing (DID) Service, for applicable forwarded calls. For other telephone numbers equipped with DRS, the PIC(s) in the central office will be used. The appropriate charges outlined in the Access Service Tariff, SWBT Tariff FCC No. 73, Section 13.3.1, are applicable for PIC changes.

ADVANCED INTELLIGENT NETWORK SERVICES (cont'd)
DISASTER ROUTING SERVICE (DRS) (cont'd)

Effective July 15, 2024, Disaster Routing Service will no longer be available for purchase by new or existing customers. In addition, requests to move, add or change will not be accepted. The Company will continue to provide existing service to existing customers until the service is discontinued. (N)
