## A42. INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

### A42.3 BellSouth Primary Rate ISDN

#### A42.3.1 General

- A. BellSouth Primary Rate ISDN is an intraLATA offering supported by the Integrated Services Digital Network (ISDN) architecture.
- B. BellSouth Primary Rate ISDN provides an ISDN based DS1 access to the telecommunications network and includes the flexibility of integration of multiple voice and/or data transmission channels on the same line. The service will provide connectivity between ISDN compatible CPE and a serving central office. The service may not be installed at a carrier hotel, a collocation cage, or any similar location. The basic channel structure for BellSouth Primary Rate ISDN is twenty three 64 Kbps B-Channels and one 64 Kbps D-Channel. The customer has the option to activate up to 23 B-Channels on the first BellSouth Primary Rate ISDN arrangement and up to 24 channels on additional BellSouth Primary Rate ISDN arrangements. A Digital Data Only option<sup>1</sup> and an Inward Data Option are also available. The 23 B-Channels can be used to connect the customer's CPE to the Public Circuit Switched Network, e.g., outward, inward and 2-way network access. Calling Number Delivery, Called Number Delivery, Outgoing Calling Name Delivery and Hunting functionality are inherent to this service. Incoming Calling Name Delivery, an optional feature offered at rates listed in A42.3.4.5.D, is available in switch types where equipped. Redirecting Number, an optional feature described in A42.3.3, is offered at no charge to the customer in switch types where equipped. Numbers for use on BellSouth Primary Rate ISDN are available in this *Guidebook*. One Directory Listing will be furnished at no charge for each BellSouth Primary Rate ISDN B-Channel. Additional listings can be obtained as specified in Section A6. (C)
- C. BellSouth Primary Rate ISDN provides capability for the transmission of digital signals only. Clear Channel Capability and Extended Superframe Format are inherent to the service.
- D. BellSouth Primary Rate ISDN is provided within a LATA from wire centers where appropriate ISDN facilities are available as determined by the Company. Special Construction charges may apply as specified in Section A5.
- E. BellSouth Primary Rate ISDN Access Lines furnished between a serving wire center and a customer's premises will be offered at a non-distance sensitive rate per BellSouth Primary Rate ISDN Access Line. If a customer wishes to utilize another Company provided transport facility (e.g., SMARTRing service) that can meet the required standards to carry the BellSouth Primary Rate ISDN Access (DS1) Line, the customer will incur no charge for the BellSouth Primary Rate ISDN Access (DS1) Line. MegaLink service cannot be utilized to provide transport for BellSouth Primary Rate ISDN except where the BellSouth Primary Rate ISDN is terminated in FlexServ service. Asynchronous Transfer Mode (ATM) Service can be utilized to transport BellSouth Primary Rate ISDN Voice/Data – Flat Rate under the regulations stated in A42.3.2.EE.
- F. Interoffice Channels furnished between central offices will be charged at rates based on airline distance between the central offices, except as provided in A42.3.2.Q. (T)
- G. Airline distance between Company central offices shall be developed using the methodology found in B3.3.3. Fractional mileage shall be rounded up to the next full mile.
- H. The required components for BellSouth Primary Rate ISDN are as follows:
- BellSouth Primary Rate ISDN Access Line where applicable
  - Interoffice Channels where applicable
  - BellSouth Primary Rate ISDN Interface
  - BellSouth Primary Rate ISDN B-Channels
  - BellSouth Primary Rate ISDN D-Channel
  - Telephone Numbers
  - Call Types

**Note 1:** Effective May 1, 2014, customers may not add the Digital Data Only option, and existing term plans for this option may not be renewed. (N)

## A42. INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

### A42.3 BellSouth Primary Rate ISDN (Cont'd)

#### A42.3.1 General (Cont'd)

- I. Incoming Call Extension (ICE) is an optional offering allowing customers to retain their numbers. ICE-SRC (Incoming Call Extension - Same Rate Center) and ICE-DRC (Incoming Call Extension - Different Rate Center) may be used in any ANSA arrangement. ICE-SRC and ICE-DRC may be used if an ANSA customer's non-equipped, serving wire center switch is replaced by a PRI capable switch. ICE is only available within the Local Calling Area. (T)
1. ICE-SRC applies if the Customer's Serving Central Office and the ANSA office are in the same Toll Message Rate Center (TMRC). Rates and charges are applicable per number. (T)
  2. ICE-DRC applies if the customer's Serving Central Office and the ANSA office are in different Toll Message Rate Centers. Hunting between ICE numbers is not allowed. Rates and charges are applicable per number or per path. Customers may be required to make CPE software modifications to translate dialed numbers to terminated numbers. (T)
- J. BellSouth Primary Rate ISDN B-Channel rates for the Voice/Data (Standard) option are listed in A42.3. Exchange access is included as a part of the B-Channel rate and is offered on a flat rate basis and on a usage sensitive basis with Area Calling Service. (T)
- K. BellSouth Primary Rate ISDN B-Channel rates for the Digital Data Only<sup>1</sup> option are listed in A42.3.4.C. Exchange access is included as a part of the B-Channel rate and is offered on a flat rate basis and on a usage sensitive basis with Area Calling Service. (C)
- L. BellSouth Primary Rate ISDN B-Channel rates for the Inward Data option are listed in A42.3. Exchange access is included as a part of the B-Channel on a flat rate basis only. (T)
- M. The BellSouth Primary Rate ISDN Inward Data option is characterized by the following: (T)
1. It is arranged for inward service only. Originating Calls will be denied.
  2. It is arranged to terminate analog and digital data calls only.
  3. The number of numbers associated with a BellSouth Primary Rate ISDN Inward Data Option arrangement must be equal to, or less than the number of BellSouth Primary Rate ISDN Inward Data Interfaces comprising the arrangement and all numbers must use the same routing unless the customer subscribes to additional numbers as stated in A42.3.4.C.7. This restriction does not apply to Inward Data Extended Reach Service. (T)
  4. Calling Number Delivery, Called Number Delivery, and Hunting are inherent to the service.
- N. Voice calls on the B-Channel may be completed to both ISDN and non-ISDN lines.
- O. Digital Data Transmission on the B-Channel will be circuit switched at 64 Kbps within the switch and between ISDN compatible central offices. ISDN interconnection to non-ISDN equipped central offices may be subjected to analog transmission or sub-rated to 56 Kbps.
- P. BellSouth Primary Rate ISDN Extended Reach Service (ERS) is available only for the Inward Data Option. ERS is designed to "extend the reach" of the Inward Data Option customer from a centrally located metropolitan local calling area into the areas of the LATA which are "non-local" to the metropolitan area. The ERS customer purchases numbers within each desired "non-local" calling area to allow their clients to call them without incurring intraLATA Long Distance Message Telecommunications Service charges. (T)
1. ERS is offered under two configurations:
    - a. A Dedicated Route Arrangement, and (T)
    - b. A Final Route Arrangement. (T)

The ERS Dedicated Route Arrangement is only available where the target local calling area(s) have an ISDN equipped central office. It is intended for use where the volume of traffic is sufficient to warrant one or more dedicated DS1 interoffice facilities. The ERS Final Route Arrangement will be utilized where the target local calling area(s) do not have an ISDN equipped central office and/or the volume of traffic is insufficient to justify a dedicated DS1 interoffice facility.
  2. For ERS Dedicated Route Arrangements the customer must purchase ERS Remote Numbers, ERS Primary Rate Interfaces, and ERS B-Channels in the target local calling area(s). The ERS Primary Rate Interfaces and ERS B-Channels are extended to the customer's premises (typically in a centrally located metropolitan area, but in the same LATA as the target local calling area) via ERS Interoffice Channels and a BellSouth Primary Rate ISDN Access Line or other Company provided transport facility. (T)
  3. For ERS Final Route Arrangements the customer must purchase ERS *Remote Numbers* in the target local calling area(s). Calls that terminate to these *Remote Numbers* are switched over intraLATA toll message trunk groups to the customer's local serving central office where they terminate on ERS Final Route Primary Rate Interfaces and ERS Final Route B-Channels, via an ERS Final Number. A BellSouth Primary Rate ISDN Access Line or other Company provided transport facility is required for connection to the customer's local serving central office. (T)
- Note 1:** Effective May 1, 2014, customers may not add the Digital Data Only option, and existing term plans for this option may not be renewed. (N)

## A42. INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

### A42.3 BellSouth Primary Rate ISDN (Cont'd)

#### A42.3.2 Regulations (Cont'd)

- Q. When a customer's normal serving central office is not equipped to provide BellSouth Primary Rate ISDN, the customer may be served, at the Company's option, from an equipped central office without incurring interoffice channel charges. BellSouth Primary Rate ISDN customers to be served under this arrangement must sign an agreement that the service may be moved back at the Company's discretion to the normal serving central office and to a probable number change when/if that office is equipped with ISDN. This is referred to as the Alternate Network Serving Arrangement (ANSA). If a customer, under ANSA, requests BellSouth Primary Rate ISDN from an ISDN equipped central office other than that determined by the Company, interoffice channel charges as specified in A42.3.4.B will apply. Also, if a customer requests BellSouth Primary Rate ISDN from a central office other than their normal serving office and ANSA does not apply, interoffice channel charges will apply as specified in A42.3.4.B. ANSA does not apply for Inward Data Extended Reach Service.
- R. The BellSouth Primary Rate ISDN - Digital Data Only option<sup>1</sup> provides for the transmission of data mode calls only. The BellSouth Primary Rate ISDN - Digital Data Only arrangement will be provisioned with the customer's requested number of Digital Data Only B-channels with no B-channels capable of transmitting voice mode calls in the same arrangement. (C)
- S. The BellSouth Primary Rate ISDN Inward Data option provides for the transmission of inward analog and digital data calls only.
- T. *Terms and Conditions* in Section A2, prohibiting the mixing of flat and message or flat and measured service do not apply for BellSouth Primary Rate ISDN. (T)
- U. No usage charges apply for calls within the local calling area for BellSouth Primary Rate ISDN customers utilizing the Flat Rate BellSouth Primary Rate ISDN B-Channel. Long Distance Message Telecommunications Service rates as specified in Section A18 apply for intraLATA calls terminated beyond the local calling area.
- V. The following usage regulations will apply for all dialed sent paid local calls for BellSouth Primary Rate ISDN customers utilizing the Usage Sensitive BellSouth Primary Rate ISDN B-Channel:
1. Usage charges will be billed at the usage rates described in Section A3.2.8 for Area Calling Service.
  2. Summarized total usage charges will be reduced by fifty percent prior to the application of the usage allowance. Time/Day discounts described in Section A3.2.8 do not apply.
  3. A usage allowance of \$25.00 per activated B-Channel is applicable for all calls terminating in Bands A, B, and C.
  4. Total billed usage charges above the allowance will not exceed \$20.00 per activated B-Channel for calls terminating in Bands A, B, and C. This does not apply to resold services. (T)
  5. Local calls that are not dialed sent paid (i.e., operator assisted, mechanized calling card, etc.) will be billed individually at the same usage rates specified in Section A3.2.8 (including Time/Day usage provisions), in addition to any applicable Local Calling Card Service or Operator Assisted Local Call surcharges. Such calls are itemized on the subscriber's billing statement and are billed outside any applicable calling allowance or usage billing reductions for dialed sent paid local calls.
- W. The Next Route Index Feature allows a BellSouth Primary Rate ISDN Digital Data Only<sup>1</sup> customer to arrange analog calls to overflow to a Voice/Data arrangement in the same switch or allows the customer to overflow analog and digital calls to a Voice/Data arrangement in the same switch. These same capabilities are available to a BellSouth Primary Rate ISDN Inward Data customer to overflow calls to a Voice/Data arrangement in the same switch. It does not allow Voice/Data or Inward Data calls to overflow to a Digital Data Only arrangement nor does it allow Voice/Data or Digital Data Only calls to overflow to an Inward Data arrangement. (C)
- X. BellSouth Primary Rate ISDN Digital Data Only<sup>1</sup> Signaling Groups may be configured in one of the following four standard arrangements of call types: (C)
1. Inward Calls: The number of Inward calls accommodated by the Signaling Group will be equal to the number of activated B-channels.
  2. Outward calls: The number of Outward calls accommodated by the Signaling Group will be equal to the number of activated B-channels.
  3. Inward calls and Outward calls: The maximum number of simultaneous calls for each call type is determined by the customer. For each call type, the maximum number of simultaneous calls must be less than or equal to the number of activated B-channels in the Signaling Group.
  4. 2-Way calls: The number of 2-Way calls accommodated by the Signaling Group will be equal to the number of activated B-Channels.
- Y. The Company reserves the right to audit the customer's traffic usage for the Incoming Call Extension feature to insure that simultaneous calls are not occurring on the low use option. If such calls are occurring, the customer will be required to subscribe to the high use option.
- Z. The Service Installation Guarantee as set forth in B2.4.17 of the Private Line Services Guidebook applies for BellSouth Primary Rate ISDN.
- Note 1:** Effective May 1, 2014, customers may not add the Digital Data Only option, and existing term plans for this option may not be renewed. (N)

## A42. INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

### A42.3 BellSouth Primary Rate ISDN (Cont'd)

#### A42.3.2 Definitions (Cont'd)

##### DIGITAL DATA ONLY B-CHANNEL<sup>2</sup>

The term "Digital Data Only B-Channel" denotes a bi-directional synchronous channel capable of supporting 64 Kbps of digitally transmitted data mode calls when provisioned by the BellSouth Primary Rate ISDN Digital Data Only option. (C)

##### EXTENDED REACH SERVICE FINAL TELEPHONE NUMBER (ERS FTN)

ERS FTNs are telephone numbers assigned in the ERS subscriber's serving central office. These numbers are required for ERS Final Route Arrangements and may be required where the Overflow Feature for ERS Dedicated Route arrangements is utilized for call overflows to intraLATA toll message trunk groups.

##### EXTENDED REACH SERVICE REMOTE TELEPHONE NUMBER (ERS RTN)

ERS RTNs are telephone numbers assigned to each local calling area to which the Extended Reach subscriber provides local number access. These telephone numbers are applicable for both ERS Dedicated Route Arrangements and ERS Final Route Arrangements.

##### FACILITY ASSOCIATED SIGNALING

In Facility Associated Signaling (FAS) arrangements for BellSouth Primary Rate ISDN, a D-Channel is provided for every DS1 facility. Since the subscriber may select the number of B-Channels activated (up to 23), the channel configuration for FAS arrangements may be described as nB+D where  $1 \leq n \leq 23$ . Thus, the maximum channel configuration for a FAS arrangement is 23B+D.

##### HIGH USE OPTION

The term "High Use Option" for Incoming Call Extension denotes that more than one simultaneous incoming call is received per number. (T)

##### INCOMING CALLING NAME DELIVERY

Delivery of the name associated with a call incoming to the customer's PRI and customer's premise equipment for display on a telephone with appropriate display equipment.

##### INTEROFFICE CHANNEL

An Interoffice Channel provides for the transmission facilities between Company serving wire centers within a LATA.

##### INWARD CALL

An Inward call denotes a call that is switched through the *Company* Network and terminates in a BellSouth Primary Rate ISDN arrangement<sup>1</sup>. (T)

##### INWARD DATA B-CHANNEL

An Inward Data B-Channel provides circuit switched service that will allow either analog data or digital data transmission at up to 64 Kbps and will include the functionality of Hunting and Calling/Called Number Delivery.

##### LOW USE OPTION

The term "Low Use Option" for Incoming Call Extension denotes that a maximum of one incoming call is received per number at one time. (T)

##### NEXT ROUTE INDEX FEATURE

The Next Route Index Feature allows a BellSouth Primary Rate ISDN Digital Data Only<sup>2</sup> customer to arrange analog calls to overflow to a Voice/Data arrangement<sup>1</sup> in the same switch or allows the customer to overflow analog and digital calls to a Voice/Data arrangement<sup>1</sup> in the same switch. These same capabilities are available to a BellSouth Primary Rate ISDN Inward Data customer to overflow calls to a Voice/Data arrangement<sup>1</sup> in the same switch. (C)

##### NON-FACILITY ASSOCIATED SIGNALING

In Non-Facility Associated Signaling (NFAS) arrangements for BellSouth Primary Rate ISDN, a D-Channel controls multiple (up to 20) DS1 facilities. In NFAS arrangements, the first DS1 will typically be configured as 23B+D, and all other DS1's controlled by the D-Channel will be configured as 24B. The channel configuration for NFAS arrangements may be described as mB+D where  $1 \leq m \leq 479$ . Thus, the maximum channel configuration for a NFAS arrangement is 479B+D.

##### OUTGOING CALLING NAME DELIVERY

The name that is delivered to Calling Name Display equipment when an outgoing call is placed. This name is defined in A6.2.1. All customer numbers will use this name unless Secondary Calling Name Delivery is purchased. (T)

**Note 1:** A BellSouth Primary Rate ISDN Arrangement may be either a single PRI or multiple PRIs that are associated with the same number or numbers. (T)

**Note 2:** Effective May 1, 2014, customers may not add the Digital Data Only option, and existing term plans for this option may not be renewed. (N)
