A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.1 ESSX Service (Cont'd)

A112.1.12 Optional Service Features

(Obsoleted 11-26-92, Type A) Not available for new subscribers to this feature. Subsequent additions, deletions, and/or rearrangements to an existing system under contract are permitted, subject to the capacity of the central office from which it is provided. Additionally, obsoleted SMDR-P may be provided on a new ESSX service system added by a customer who already subscribes to SMDR-P on other ESSX service systems. Customers paying obsoleted contract rates and charges may continue to do so until their contract period expires (including contract period under recast) or they subscribe to the new restructured Station Message Detail Recording (SMDR) feature located in Section A112 and new Station Message Detail - Premises function located in Section A32. Customers paying obsoleted month-to-month rates and charges may do so until they subscribe as detailed above or until May 26, 1994, at which time they must subscribe to the new offerings.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service - Vintage II (Cont'd)

A112.26.12 Optional Service Features (Cont'd)

K. Outgoing Trunk Queuing - WATS (OTQ)

1. Terms and Conditions

- a. The OTQ feature is only available for subscriber systems equipped with Customer Facility Group Network Access Registers from No. 1A ESS central offices equipped with the 1AE5 or later generics. This feature can only be offered to serve customer stations (excluding the attendant) that are co-located in the same ESSX service as the WATS simulated facilities.
- b. The Inhibit Inflow/Outflow optional features require separate control channel(s) per queue between the central office and the customer provided control key(s) at the customer premises. Guidebook rates apply for control circuits between the control keys on customer premises and the ESSX service office.
- c. In addition to the rates shown for the Music-On-Queue optional feature, rates specified in the Private Line Services Guidebook apply for channels between the central office and the customer provided music source at the customer premises.

A112.28.8 Digital ESSX Service-VS and 200

A. Main Station Lines

1. The Digital ESSX service- VS and 200 main station line rate will be composed of the Intercom charge and the appropriate Exchange Circuit charge. Any charges for inside wiring already in place will also continue to apply.

a. Rates and Charges

(1) Intercom Charge - ESSX service-VS⁵

(a) Per main station	-	11.65	11.65	11.65	7.60	NRXKY
----------------------	---	-------	-------	-------	------	-------

(2) Intercom Charge - ESSX service-200⁵

(a) Per main station	-	9.65	9.65	9.65	6.10	NRXKY
----------------------	---	------	------	------	------	-------

Note 1: Each of the rate elements shown provide only the basic auxiliary line termination equipment and facilities located at the central office where the basic service is provided and is in addition to other rates and charges applicable for the associated services.

Note 2: One Installation Charge applies when any number of miscellaneous lines of the same type are installed at the same time.

Note 3: Recurring rates apply per DS-1 circuit terminated regardless of number of channels activated at time of initial installation.

Note 4: One installation charge applies when any number DS0 channels on the same DS1 circuit are activated at the same time, per occasion, per same group.

Note 5: New rates become effective with billing cycles beginning on or after December 1, 2001.

K. Queuing

1. General

a. Queuing permits main station line users to be placed in a queue whenever the first choice route for completing a particular call is already in use. Two queuing arrangements are available.

(1) Off-Hook Queuing (OHQ), the calling main station line remains off-hook and is held in a queue until facility becomes available

(2) Call-back Queuing (CBQ), the calling main station line goes on-hook and is called back when a facility becomes available.

2. Terms and Conditions

Queuing may be provided in conjunction with ARS-Basic or as a stand-alone option for outgoing exchange calls. Queuing will be offered where facilities permit.

3. Rates and Charges

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.30 Digital Electronic Tandem Switching Features (Cont'd)

A112.30.2 Terms and Conditions (Cont'd)

C. Definitions (Cont'd)

7. Network Speed Call (I) allows a customer group to have up to 1000 common preprogrammed speed call numbers. The numbers may be combined in one list or subdivided into multiple smaller lists. Each list requires a separate feature access code.
8. Priority Queuing (II) allows priority off-hook either trunk or station originating calls to queue against outgoing trunk/facilities. Two levels of priority can be assigned based on customer requirements.
9. See A112.28.11 for rates and charges for Off-hook and Call-back queuing.
10. Time of Day (TOD) system control provides a method of automatically changing network routing parameters according to a prespecified schedule. TOD is required for TOD ARS and TOD NCOS.
 - a. TOD Network Class of Service (NCOS) (I) provides the capability of mapping normal NCOS values into new values based on TOD, day of week, and day of year.
 - b. TOD ARS (I) will allow the customer to activate different routing patterns on specified ranges. Calls will be routed via instructions given in the route list elements.
 - c. Time of Day (TOD, II) system control provides a method of automatically changing the routing parameters according to a prespecified schedule.
11. Traveling Class Mark (TCM) provides the capability to transmit across a private network certain information along with a dialed number to identify privileges available to the caller. This feature equates to Network Information Signaling in the DMS-100.
12. Uniform Numbering (UN) provides a customer specified numbering plan, utilizing seven digits for on-net and ten digits for off-net or seven digits for on-net and 1+10 digits for off-net. Each customer switch connected to the ETN is identified by a unique three-digit location code called RNX.
13. Network Class of Service (NCOS) is an information bearing code that is assigned to every station line, trunk, authorization code, and attendant console at each ETN Tandem location. The NCOS is comprised of several pieces of information that combine to represent the identity of the station, trunk or attendant console to which it is assigned. NCOS equates to D-PAT for 5ESS.

A112.32.12 Optional Service Features

A. Attendant Service - General

1. Central office attendant console operation is offered as an auxiliary service with ESSX service.
2. The Call Transfer-Attendant feature is furnished with Non-Data Link or Data Link Console operation.
3. As an alternative the subscriber may designate a selected station or stations to perform attendant functions. Incoming calls to the listed directory number are connected to the selected station and then completed to the desired party by operation of the Call Transfer feature.

B. Attendant Service - Non-Data Link Console Operation

1. **Terms and Conditions**

- a. Customer provided consoles will be allowed only where the equipment is compatible with the Central Office serving the system.
- b. Control channels are required for various console optional features as indicated and are provided at the appropriate rates and charges.

2. Rates and Charges

A112.32 ESSX Service - Vintage I (Cont'd)

A112.32.12 Optional Service Features (Cont'd)

K. Outgoing Trunk Queuing - WATS (OTQ)

1. Terms and Conditions

- a. The OTQ feature is only available for ESSX systems equipped with Customer Facility Group Network Access Registers from central offices equipped with the 1E5 or later generics. This feature can only be offered to serve customer stations (excluding the attendant) that are co-located in the same ESSX as the WATS simulated facilities.
- b. The Inhibit Inflow/Outflow optional features require separate control channel(s) per queue between the central office and the customer provided control key(s) at the customer premises. Guidebook rates apply for control circuits between the control keys on customer premises and the ESSX office.
- c. In addition to the rates shown for the Music-On-Queue optional feature, rates specified in the Private Line Guidebook apply for channels between the central office and the customer provided music source at the customer premises.

A112.34 Digital ESSX Service - Vintage I (Cont'd)

A112.34.11 Optional Service Features (Cont'd)

J. Automatic Route Selection - Basic

1. General

- a. Automatic Route Selection - Basic (ARS-B) is an optional feature, available where facilities permit that allows station users, by dialing a preselected code to automatically select the preferred route subscribed to by a customer for network calls. Alternate routing to other facilities subscribed to by the customer is also provided. This agreement is available for use with Foreign Exchange, WATS, CCSA off-net, tie lines and Interexchange Carrier (IC) access lines which are compatible with ARS and toll facilities.
- b. Automatic Route Selection - Basic is accessed by dialing a single code (1, 2 or 3 digits) which automatically selects the appropriate route (FX, WATS, CCSA off-net, tie line, IC access line or toll) to complete the call. If all facilities in the initial route selected are busy, the call will advance to other routes in the selected pattern. Patterns may consist of up to eight (8) private routes.
- c. For calls using FX, WATS, CCSA off-net, or IC access line facilities, the routing may be based on a Number Plan Area (NPA) and limited to specified central office codes within the NPA as designated by the customer. This is referred to as Foreign Area Discrete Translation.
- d. Automatic Route Selection - Basic is a call routing capability and, therefore, all codes must be in a route for selection. Code blocking is not provided by this feature.

2. Terms and Conditions

- a. Automatic Route Selection - Basic is provided only in association with Digital ESSX Service central office equipment located on Company premises and may be provided, subject to availability of facilities to Digital ESSX systems which are served by the same such equipment.
- b. Preferred routes and alternate routing patterns will be specified by the customer.
- c. All rates and charges specified for Automatic Route Selection - Basic are in addition to the rates and charges for associated facilities.
- d. The number of patterns required by a customer are governed by the type and variety of facilities to which the customer subscribes.
- e. A single rate per pattern will apply regardless of the number of routes in the pattern or the number of facilities in the route.

3. Rates and Charges

a. ARS-B

K.	Queuing				
1.	General				
a.	Queuing permits main station line users to be placed in a queue whenever the first choice route for completing a particular call is already in use. Two queuing arrangements are available.				
	- Off-Hook Queuing (OHQ), the calling main station line remains off-hook and is held in queue until a facility becomes available.				
	- Call-back Queuing (CBQ), the calling main station line goes on-hook and is called back when a facility becomes available.				
2.	Terms and Conditions				
	Queuing may be provided in conjunction with ARS-Basic or as a stand-alone option for outgoing exchange calls. Queuing will be offered where facilities permit.				
3.	Rates and Charges				
a.	Queuing				
	(1) Common Equipment				
	(a) Per system	\$61.00	\$57.00	\$54.00	QDE
