**A5. CHARGES APPLICABLE UNDER SPECIAL CONDITIONS****A5.9 Charges For Circuits With Terminations In The "Same Building"**

- A. When due to the size of a building, or where for other reasons it is necessary, in the judgment of the Company, to provide exterior or special cable and wire facilities, additional charges apply based on the difference between the estimated cost to be incurred and the estimated cost that would have been incurred if standard interior cable and wire facilities had been installed.
- B. Where two or more structures are under separate roofs but are connected by enclosed passageways which are over 100 feet in length, the cost of the interior cable and wire facilities in excess of 100 feet are applicable in addition to other rates and charges. If, in the judgment of the Company, exterior type cable or wire facilities are required between terminations in different structures, then charges apply as though each structure were a separate building.
