A34. ADVANCED INTELLIGENT NETWORK (AIN) SERVICES

A34.5 CrisisLink Service

Except as otherwise indicated for Wire Centers in Section A2.3.1.F, effective October 15, 2025, CrisisLink Service will no longer be available for purchase by new or existing customers. In addition, requests to move, add, change, or renew existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable Monthly rates until the service is discontinued.

A34.5.1 General

- A. CrisisLink service allows the subscriber to establish predetermined alternate routing plans for incoming voice and data traffic. CrisisLink service can be used as a disaster recovery service. The alternate routing plan is created by the subscriber working with a Company representative at the time the CrisisLink service is established. The subscriber's alternate routing plan may:
- Route incoming calls to an announcement
 - Route incoming calls to a single Backup Number
 - Route incoming calls to multiple Backup Numbers according to subscriber-defined percentage allocation
 - Route incoming calls to either an announcement or a Backup Number on a percentage basis
- The plan is then loaded into the AIN Service Management System (SMS) where it remains dormant until activated. The CrisisLink service subscriber must contact the Company to activate the alternate routing plan. This will route traffic to numbers preselected by the CrisisLink service subscriber.
- The CrisisLink service subscriber may make changes to the routing plan at the time activation is requested. The subscriber may change the numbers to which the calls are to be routed and the percentages of calls to be routed to other numbers. The subscriber cannot request activation on additional numbers to be redirected at that time.
- In order to restore the original call routing, the subscriber must contact the Company to deactivate the alternate routing plan. Any changes made to the routing plan at the time the plan was activated will not be retained.
- The plan may be updated and changed on a permanent basis by the CrisisLink service subscriber at any time that the plan is not activated.
- B. The subscriber must establish a CrisisLink service routing plan for each location included in his serving arrangement for which traffic is to be rerouted.
- C. CrisisLink service test call capability allows a subscriber whose CrisisLink service routing plan has been activated, to place a call to test the operation of the subscriber's normal service. In this manner, the subscriber may test his facilities before initiating recovery.
- D. The CrisisLink service subscriber is required to specify a Callback Number and Verification Party Name(s) which will be used by the Company representative receiving a request to activate, deactivate, or modify a subscriber's CrisisLink service to verify a request.
