A132. OBSOLETE SERVICE OFFERINGS - INTEGRATION PLUS MANAGEMENT SERVICES (IPMS)

A132.1 Integration Plus Management Services (IPMS) Description

A132.1.1 Reserved for Future Use

A132.1.2 Integration Plus Management Services Terminal Interface

A. Terms and Conditions

1. Requirements For Access

(Obsoleted 6-23-08, Type D; not available for new installations, moves or transfers. Existing customers may continue to utilize existing Dial or Dedicated Access arrangements.)

a. Dial Access

The customer must provide a switched (dial) access capability with asynchronous protocol from the customer's terminal location to the designated Company location. Customers who subscribe to a dial method of access, will be given a telephone number to dial which will establish a port connection.

b. Security Card

Dial and web access customers must also order a Security Card. This card provides the customer a unique password identification code which will electronically change periodically. The Security Card charge specified in 4 will apply for the initial card or for the issuance of additional cards for additional users or to replace a lost, damaged or expired card. Should a customer receive a defective card, that card will be replaced at no charge to the customer.

If the customer has purchased a Security Card in conjunction with another feature or service offered by the Company, that Security Card may also be used in conjunction with FlexServ service. It is the customer's responsibility to notify the Company of an existing Security Card so the Company can ensure that the card is validated for multiple features and/or services.

c. Dedicated Access

The customer must purchase a Private Line for access to FlexServ service from the customer's terminal location to the designated Company location. The type of dedicated access required will depend on the type of access desired.

d. Other Requirements

In addition to either purchasing a dial access or a private line, the customer will be required to furnish a VT100 type terminal and a compatible data set. The data set required will depend on the type of access chosen by the customer and the capability for connection with the Company. CPE must comply with specifications found in BellSouth Technical Reference Publication 73535 for Corporate Packet Network Asynchronous Terminal Access (8/89) and BellSouth Technical Reference Publication 73516 Issue C, Corporate Packet Network Physical Interface Specifications (9/91). These publications are available from the Information Exchange Manager, *AT&T* Telecommunications, Inc., SUP40 *AT&T* Center, 675 W. Peachtree St., N.E., Atlanta, Georgia 30375.
