## **E5. ORDERING OPTIONS FOR BELLSOUTH SWA AND SPECIAL ACCESS (A.K.A. BELLSOUTH SPA) SERVICE**

### **E5.1 General**

#### **E5.1.1 Scope**

- A. This section sets forth the regulations and order related charges for Access Orders for BellSouth SWA and Special Access (a.k.a. BellSouth SPA) services. These charges are in addition to other applicable charges as set forth in other sections of this Tariff.
- B. An Access Order is the customer's request for the Company to provide the customer with BellSouth SWA service or Special Access (a.k.a. BellSouth SPA) service or to provide modifications to existing service. An Access Order may be submitted by Access Service Request (ASR) or by such other ordering processes as the Company may provide. Depending upon the services, facilities or service interval dates requested, one or more Access Orders may be required to provide the customer with access service. (D)

#### **E5.1.2 Ordering Conditions**

- A. A customer may order any number of services of the same type and between the same premises on a single Access Order. All details for services for a particular order must be identical except for those for Multipoint Service.
- B. The customer shall provide all information necessary for BellSouth to provide and bill for the requested service. In addition to the order information required in Section E5.2, the customer must also provide:
  - Customer name and premises address (es).
  - Billing name and address (when different from customer name and address).
  - Customer contact name(s) and telephone number(s) for the following provisioning activities: order negotiation, order confirmation, interactive design, installation and billing.
- C. A customer that orders services from this Tariff as an Enhanced Service Provider (ESP), must provide a signed statement that it meets the ESP definition as provided in Section E2.6.
- D. Orders for BellSouth SWA FGA and BellSouth SWA LSBSA shall be in lines.
- E. Orders for BellSouth SWA FGB and BellSouth SWA TSBSA 1 shall be in trunks.
- F. A customer who converts from an existing BellSouth SWA FG service to an equivalent unbundled service (i.e., BellSouth SWA FGA to BellSouth SWA LSBSA, BellSouth SWA FGB to BellSouth SWA TSBSA 1, BellSouth SWA FGC to BellSouth SWA TSBSA 2, and BellSouth SWA FGD to BellSouth SWA TSBSA 3) shall do so on no lower than an end office level. The Company and the customer will work cooperatively to accomplish these conversions.
- G. The day upon which the customer has provided to BellSouth a firm commitment for the service and complete and accurate information to allow for the processing of the Access Order by three o'clock p.m. Eastern Standard Time (EST)<sup>1</sup> is the Application Date. BellSouth will release an optional initial Pending Order Confirmation, which will include the BellSouth order number and circuit identification. At the customer's request, when the BellSouth facility availability is verified, either a Firm Order Confirmation, which will include critical date information, or a Design and Ordering Confirmation, which will include design as well as critical date information, will be released. Critical date information will include the Service Date. The Service Date (also sometimes referred to as the due date) is the date service is to be made available to the customer and billing will commence.

A Pending Order Confirmation is available for orders for BellSouth-provided switched access dedicated transport services, where ordered separately from other switched access services, and for BellSouth-provided special access services. A Design and Ordering Confirmation is not available for orders submitted by end users. A Pending Order Confirmation and a Design and Ordering Confirmation are not available for orders for services provided jointly with another Exchange Telephone Company.

- H. The time required to provision the service (i.e., the interval between the Application Date and the Service Date) is known as the service interval. Such intervals will be established in accordance with published service date interval guidelines which are available to customers upon request, whether the customer's service is subject to standard or negotiated intervals. The customer may request a service date other than that established pursuant to the service date interval guidelines, and the Company, where possible, will establish the service date in accordance with such request, subject, however, to other applicable provisions of this tariff.

**Note 1:** Access Orders received after three o'clock p.m. EST will be processed the next business day, which will be the Application Date.

  - 2. Failure to notify the Company prior to the original service date to request a different service date may result in the application of a Service Date Change-Additional Dispatch Charge for installations, moves and rearrangement of services. If a Company technician is dispatched to the Customer's premises on the scheduled service date and the customer has failed to notify the Company before three o'clock p.m. EST on the business day prior to the scheduled service date that it wishes to change the service date, the Company will delay the start of service pending negotiations with the customer. If the customer reschedules the service date, a Service Date Change-Additional Dispatch Charge will apply in addition to a Service Date Change Charge as specified in Section E5.2.3.D.4(a). If the customer cancels the service date, cancellation charges will apply in accordance with terms and conditions for cancellation charges as set forth in Section E5.2.4. Cancellation of the order will not preclude the application of the Service Date Change Charge and Service Date Change-Additional Dispatch Charge assessed for prior occurrences on the same order. (T)  
(T)
  - 3. A new service date may be established that is prior to the original service date if the Company determines it can accommodate the customer's request without delaying service dates for orders of other customers.

### E5.2 Access Order (Cont'd)

#### E5.2.4 Cancellation Of An Access Order (Cont'd)

##### B. (Cont'd)

4. Charges applicable as specified in 3. preceding are based on the estimated costs incurred by the Company at the time the order is cancelled. The estimated costs incurred are determined based on the following:
  - a. Certain Company critical dates are associated with an Access Order provisioning interval whether standard or negotiated. These dates are used by the Company to monitor the progress of the provisioning process. At any point in the Access Order interval the Company is able to determine which critical date was last completed and can thus determine what percentage of the Company's provisioning costs have been incurred as of that critical date.
  - b. The critical dates tracked by the Company are as follows:
    - Application Date (APP): The date the customer provides to the Company, (1) a firm commitment for service and (2) sufficient information as detailed in E5.1. preceding to enable the Company to begin service provisioning. This is also the order date.
    - Scheduled Issue Date (SID): The date that the order is to enter the Company's order distribution system.
    - Design Layout Report Date (DLRD): The date the Design Layout Report (DLR) is forwarded to the customer.
    - Records Issue Date (RID): The date that all design and assignment information is to be sent to the central office and installation forces.
    - Wired and Office Tested Date (WOT): The date by which all intraoffice wiring is to be completed, all plug-ins optioned, aligned, and frame continuity established, and the interoffice facilities, if applicable, tested. In addition, switching equipment, including translation loading, is to be installed and tested.
    - Plant Test Date (PTD): The date on which overall testing of the service is to be started.
    - Engineering Information Report Date (EIRD): The date the engineering group in another ISS area provides information to the primary engineering group.
    - Service Date (DD): The date on which service is to be made available to the customer. This is sometimes referred to as the Due Date.
    - Designed, Verified, and Assigned Date (DVA): The date by which field implementation groups must report that all documents and materials have been received.
    - Frame Continuity Date (FCD): Date on which frame-to-frame testing must be completed. This is sometimes referred to as the Facility Continuity Check Date.
    - Loop Assignment and Make-up Date (LAM): The date by which Local Loop Assignment and Make-up information must be available.
    - Confirming Design Layout Report Date (CDLRD): The date the Design Layout Report (DLR) is to be confirmed by the customer.
  - c. The percentage of the total provisioning cost incurred by the Company at a particular critical date varies by the type of service as shown in d. following.

### **E5.2 Access Order (Cont'd)**

#### **E5.2.7 Minimum Period Charges**

- A. When Access Service is disconnected prior to the expiration of the minimum period, the customer is obligated for payment of the minimum period charges as set forth following. When Access Service is disconnected after the expiration of the minimum period, billing for service will be performed in accordance with the provisions set forth in E5.2.6 preceding. The disconnect date is the final date the customer has use of the service.

The Minimum Period Charge, for service provided with a one month minimum period will be determined as follows:

1. For BellSouth SWA service usage sensitive rate elements (i.e., Carrier/Common Line, Local Switching/, Access Tandem Switching, BellSouth SWA Common Transport and Interconnection), the charge for a month or fraction thereof is equal to the applicable rates for the actual or assumed usage for the month or such fraction thereof.
  2. For BellSouth SWA Transport components which are not usage sensitive (i.e., Switched Local Channel, Switched Dedicated Interoffice Channel and Channelization Equipment), the charge for a month or fraction thereof is the applicable monthly rates for the service as set forth in E 6.8 following.
  3. For Special Access (a.k.a. BellSouth SPA) service, the charge for a month or fraction thereof is the applicable monthly rate for the service as set forth in Section E7. following.

Should billing for a service which is disconnected prior to the expiration of the Minimum Period cover multiple billing cycles, the bill reflecting the disconnect of service will be adjusted to account for that portion of the Minimum Period Charge previously billed to the customer. In no event shall the total recurring charge billed to the customer for such service exceed the applicable Minimum Period Charge.
- F. All applicable nonrecurring charges associated with the provision of service will be billed in addition to the Minimum Period Charge. Such nonrecurring charges include the nonrecurring charge for the installation of service and/or optional features. Service Order Modification Charges, Additional Engineering and Labor Charges, if any, etc.

#### **E5.2.8 Shared Use Facilities**

Shared Use occurs when BellSouth SWA and Special Access (a.k.a. BellSouth SPA) services are provided over the same high capacity facility through a common interface. The facility may be ordered either as digital high capacity BellSouth SWA or Special Access (a.k.a. BellSouth SPA).

Billing will commence for the high capacity facility as soon as the facility is turned over to the IC for use (i.e., on the service date.) Such billing will include charges for the Local Channel or Switched Local Channel, the Channelization Equipment (i.e., the multiplexer) and the interoffice transport mileage, if any. Nonrecurring installation charges will also apply at this time.

Such billing will continue until such time as the IC requests, by placing an order for service, that one or more of the derived channels be used in the provisioning of an end to end BellSouth SWA or Special Access (a.k.a. ## **E5. ORDERING OPTIONS FOR BELLSOUTH SWA AND SPECIAL ACCESS (A.K.A. BELLSOUTH SPA) SERVICE**

### **E5.2 Access Order (Cont'd)**

#### **E5.2.8 Shared Use Facilities (Cont'd)**

When the original facility is ordered as Special Access (a.k.a. BellSouth SPA), the billing change to the existing facility, if any, will depend on whether the end to end service provisioned over the derived channel(s) is Special (a.k.a. BellSouth SPA) or BellSouth SWA. If Special Access (a.k.a. BellSouth SPA) service, the billing for the facility will not change but additional billing will commence for the end to end service provisioned over the facility. This billing will include an additional local channel(s) and interoffice mileage, if applicable, of a lower capacity level (e.g., voice grade).

When the original facility is ordered as Special Access (a.k.a. BellSouth SPA) and BellSouth SWA service is provisioned over a derived channel(s), the Special Access (a.k.a. BellSouth SPA) billing for the original facility will be reduced in direct proportion to the number of channels being utilized for BellSouth SWA service. For example, if six channels of DS1 are to be used for BellSouth SWA, the Special Access (a.k.a. BellSouth SPA) rate will be reduced by one fourth. The IC will be billed one fourth of the BellSouth SWA DS1 rate, plus all other applicable BellSouth SWA charges for the BellSouth SWA service provided.

When the original facility is ordered as BellSouth SWA the billing change to the existing facility, if any, will depend on whether the end to end service provisioned over the derived channel(s) is BellSouth SWA or Special Access (a.k.a. BellSouth SPA) service. If BellSouth SWA service, the billing for the facility will not change but additional billing will commence for the end to end service provisioned over the facility. This billing will include local switching, carrier common line and additional interoffice transport at a lower capacity, if applicable.

When the original facility is ordered as BellSouth SWA and Special Access (a.k.a. BellSouth SPA) service is provisioned over a derived channel(s), the BellSouth SWA billing for the original facility will be reduced in direct proportion to the number of channels being utilized for Special Access (a.k.a. BellSouth SPA) service. For example, if six channels of a DS1 are to be used for Special Access (a.k.a. BellSouth SPA), the BellSouth SWA rate will be reduced by one fourth. The IC will be billed three fourths of the BellSouth SWA DS1 rate, plus all other applicable BellSouth SWA charges. The IC will be billed one fourth of the Special Access DS1 (a.k.a. BellSouth SPA DS1) rate, plus all other applicable charges for the Special Access (a.k.a. BellSouth SPA) service provided.

BellSouth Dedicated Ring is only available for Shared Use with SMARTRing<sup>®</sup> service (a.k.a. BellSouth Dedicated Ring) and vice versa. ### **E5.4 Shared Network Arrangement**

#### **E5.4.1 General**

- A.** Shared Network Arrangement (SNA) is a service offering whereby one or more customers may share capacity on a channelized high capacity service. The BellSouth SWA DS3 and BellSouth SWA DS1 service customers who are sharing capacity on their services with others are considered to be the host subscribers under these arrangements. The host subscriber is considered the customer for the higher level service and is solely responsible for payment of the rate elements for such level of service, from the subscribers terminal location through channelization. SNAs will be limited to customers utilizing BellSouth SWA DS3 service sharing capacity with other customers utilizing sub-BellSouth SWA DS3 services and/or customers utilizing BellSouth SWA DS1 service sharing capacity with other customers utilizing sub-BellSouth SWA DS1 services. Each rate element of any complete service, associated with the SNA, will be billed to a single subscriber and the Company will maintain separate records (including billing and network configuration) for each customer's portion of the SNA.
- B.** Each service user of the lower level service is responsible for payment of the charges associated with lower level service. Under the SNA, the Company may provide the host subscriber record information (e.g. traffic patterns, percent interstate usage, etc.) pertaining to the services of other users of the shared network. Disclosure of record information will be under the sole discretion of the Company as is necessary to perform billing reconciliations and/or other functions required in connection with maintaining separate account records.
- C.** Each subscriber entering into the SNA is solely responsible to the Company for charges associated with that subscriber's portion of the shared network.
  - 1.** For example, SNAs for BellSouth SWA Dedicated Transport, the host customer would be responsible for a BellSouth SWA DS3 service switched Local Channel and the DS3 to DS1 Channelization Equipment. The service user will be responsible for payment of the switched Dedicated Interoffice Channel charges as well as any end office based BellSouth SWA charges associated with the service.
- D.** Disconnection of the service by the host subscriber does not relieve another user of the shared network of any obligation to pay access charges associated with the portion of the shared network to which that user subscribes. The host subscriber is solely responsible for notifying the connecting service user in the event of disconnection of the host's service which affects that portion of the shared network service to which the user has subscribed. It is the responsibility of the service user to issue disconnect requests to the Company in the event the service user is notified by the host that the facility will be disconnected.
- E.** SNAs can be utilized on any of the following rate elements that comprise a service arrangement within a shared network:
  - Switched Local Channels
  - Switched Access Channelization Elements
  - Switched Access Dedicated Interoffice Channels
- F.** A one-time Coordination Charge will be assessed with the establishment of a Shared Network Arrangement. The host subscriber and the service user may, by mutual agreement, designate which party will be responsible for payment of the Coordination Charge. In the event no such agreement is communicated to the Company, the charge will be applied to the host subscriber's account and the host subscriber will be responsible for payment of said charge.
- G.** Coordination Charges for the establishment of a SNA for BellSouth SWA services are specified in Section 6.8.7 of Tariff FCC No. 1. In addition, a separate Processing Charge will also apply to process each service order on a shared network account. (C)
