A. General

- Systems Communication Service (SCS) is an arrangement that provides abbreviated dialing between systems. SCS allows users in a BellSouth Centrex service system to dial four or five digits to reach users in the other destinations included in the SCS arrangement. Destinations included in the SCS arrangement may be PBX, MultiServ service, MultiServ PLUS service, BellSouth Centrex service or any other location which may be dialed directly (the subscriber may subscribe to BellSouth Centrex service at the other locations, but it is not required). The calls can be local or toll.
- The only function SCS offers to BellSouth Centrex service subscribers is abbreviated dialing to the other selected locations.

B. Terms and Conditions

- SCS will allow four or five-digit dialing on a system basis to the subscriber's distant number range. SCS will prefix any Access Code (if required), Home (HNPA) or Foreign Numbering Plan Area (FNPA) (if required), and NXX dialed by the subscriber before routing to the distant location.
- The four or five-digit abbreviated dialing ranges cannot be duplicated at any other SCS location or destination.
- BellSouth Centrex service common equipment is required at each serving central office at which SCS is provided.
- SCS will be offered only where facilities exist.
- IntraLATA toll calls will be subject to the applicable rates for the authorized intraLATA toll service selected by the subscriber. InterLATA toll calls will be routed to the Interexchange Carrier (IC) to which the subscriber has presubscribed. Other usage charges will apply as appropriate.

Note 1: See A12.25.13.A.1. for availability of functions included in this rate element.

Note 2: Rates and charges for terminations in BellSouth Centrex service (other than Tandem Switching Features SFGs) are located in A12.25.8.
