A131.2.1 General

A. Service Description

1. Area Communication Service (ACS) is an arrangement that provides calling, with abbreviated dialing, among multiple ESSX service systems for a single customer. ACS allows users in one ESSX service system to dial four or five digits to reach users in the other destinations included in the ACS arrangement. Destinations included in the ACS arrangement may be PBX, ESSX service, or any other location which may be dialed directly. The calls can be local or toll. The customer may subscribe to ESSX service at the other locations, but it is not required.
2. The only function ACS offers to ESSX service customers is abbreviated dialing to the other selected locations.

A131.2.2 Terms and Conditions

A. Service Specifications

1. ACS will allow four or five digit dialing on a system basis to the customer's distant number range. ACS will prefix any Access Code (if required), Home (HNPA) or Foreign Numbering Plan Area (FNPA) (if required), and NXX dialed by the customer before routing to the distant location.
2. For each ACS destination, customers must specify the number of other destinations to be called via ACS and the quantity of terminations required.
3. The four or five digit abbreviated dialing ranges cannot be duplicated at any other ACS location or destination.
4. ESSX service customer groups (Digital) or common blocks (Analog) are required at each serving central office at which ACS is provided.
5. ACS service will be offered only where facilities permit.
6. IntraLATA toll calls will be subject to the applicable rates for the authorized intraLATA toll service selected by the customer. InterLATA toll calls will be routed to the interexchange carrier (IC) to which the customer has presubscribed.
7. The Variable Term Payment Plan *Terms and Conditions* in A2.4.8 apply. (T)
8. A Termination Liability charge will apply to subscribers who discontinue service prior to the expiration of the selected payment plan. The Termination Liability charge will be 100 percent of the remaining monthly charges of the selected payment plan.

A131.2.3 Definitions

A. Features

Abbreviated dialing is the only feature offered by ACS.

B. Destination

Destination represents the number of routes or other locations in the ACS arrangement.

1. Requirements For Access

(Obsoleted 6-30-08, Type D; not available for new installations, moves or transfers. Existing customers may continue to utilize existing Dial or Dedicated Access arrangements.)

a. Dial Access

The customer must provide a switched (dial) access capability with asynchronous protocol from the customer's terminal location to the designated Company location. Customers who subscribe to a dial method of access, will be given a telephone number to dial which will establish a port connection.

b. Security Card

Dial and web access customers must also order a Security Card. This card provides the customer a unique password identification code, which will electronically change periodically. The Security Card charge specified in 4. following will apply for the initial card or for the issuance of additional cards for additional users or to replace a lost, damaged or expired card.

If the customer has purchased a Security Card in conjunction with another feature or service offered by the Company, that Security Card may also be used in conjunction with FlexServ service. It is the customer's responsibility to notify the Company of an existing Security Card so the Company can ensure that the card is validated for multiple features and/or services.

c. Dedicated Access

The customer must purchase a private line from the appropriate *guidebook* for access to FlexServ service from the customer's terminal location to the designated Company location. The type of dedicated access required will depend on the type of access desired. (T)

e. Other Requirements

In addition to either purchasing a dial access or a private line, the customer will be required to furnish a VT100 type terminal and a compatible data set. The data set required will depend on the type of access chosen by the customer and the capability for connection with the Company. CPE must comply with specifications found in BellSouth Technical Reference Publication 73535 for Corporate Packet Network Asynchronous Terminal Access (8/89) and BellSouth Technical Reference Publication 73516 Issue C, Corporate Packet Network Physical Interface Specifications (9/91). These publications are available from the Information Exchange Manager, BellSouth Telecommunications, Inc., SUP40 Southern Bell Center, 675 W. Peachtree St., N.E., Atlanta, Georgia 30375.
