5.2 International Plan B*

General Description

This is a volume discounted calling plan utilizing Switched Access lines and sub-minute timing of calls. Outbound calling and inbound toll free service are offered under this plan. (D)

Calls originate and terminate on Switched Access facilities provided by local exchange companies or other authorized access providers. For Switched Access, the Customer is responsible for establishing local access facilities and for all nonrecurring, recurring, construction and other charges in connection with such local access.

A Customer using multiple Switched Access Lines for a single toll free number must arrange for hunting service from the local exchange company.

Volume Discounts:

When the Company's International Service is used in conjunction with a corresponding domestic service, the applicable international usage is combined with interstate usage for the purpose of applying the volume discounts provided in the Company's Interstate Product Reference and Pricing Guidebook.

5.4 Select Term Plan Options*

The Company offers one, two, three, four and five year term plan options which offer additional discounts for the Customer who commits to these terms. The monthly discounts are applied to the monthly usage. Penalties apply if the Customer terminates the term plan prior to completion of the contracted term. The Customer may elect to take another term plan, which is longer than the remainder of the current term at any time without incurring any penalty. A Customer canceling prior to the contract termination date or switching to a term plan shorter than the remainder of the current term shall be charged the difference between the amount billed or credited to date and the amount the Customer would have been billed or credited based on the most recently completed commitment period or thirty five percent (35%) of the average monthly billing to date for each of the remaining months of the term plan, whichever is greater.

5.4.1 Term Plan Discount Schedule

In any month, when the Customer's aggregate volume drops below \$200, \$200 less the discount will be charged. The Customer will receive both monthly discounts and credits to their yearly accrual account on the \$200 charge (based on the \$200-\$500 level discount). Accrued discounts will be forfeited when the Customer discontinues the plan prior to the termination date of the agreement.

5.5.3 International to U.S. Toll Free Service, ITFS and UIFN

Toll free service provides the Customer with one or more telephone numbers which when dialed from stations in the international public switched network shall terminate on Customer-designated facilities or equipment. All charges accruing in connection with usage of the Customer's assigned numbers are billed to the Customer rather than to the party originating the call. All toll free service calls are billed in one-minute increments and are subject to a minimum billing of one minute. In addition to usage charges, the Customer is billed non-recurring and monthly recurring charges set forth in Table C.

(A) ITFS – International Toll Free Service (ITFS) allows for the origination of toll free calls from international locations to be routed to a domestic toll free number. Different ITFS numbers must be requested for each country. ITFS countries are identified by a "N" in the UIFN column in Table A following.

(B) UIFN – Universal International Phone Number (UIFN) is a service where calls are made to a special UIFN number that is common to all participating countries. Calls to the UIFN number are routed to a Customer's domestic toll free number. Assignment of the common UIFN number is managed by the International Telecommunications Union ("ITU"). UIFN applicable countries are identified by a "Y" in the UIFN column in Table A following.
